Beijing Metro Selects NICE's Next Generation Security Solutions to Enhance Safety and Security at More than 20 Stations

*Company's advanced real-time digital video solution to be deployed in preparation for the 2008 Olympics*

**Raanana, Israel, April 17, 2006 - NICE Systems (NASDAQ: NICE)**, the global provider of advanced solutions that enable organizations to extract Insight from Interactions(TM) to drive performance, today announced that it has been selected by Beijing Metro to supply its next generation security solutions to help enhance the safety and security at more than 20 stations of the city's subway system. Following mounting security concerns worldwide and in preparation for the 2008 Olympics, this project is part of Beijing's massive campaign to upgrade its subway system's security network.

All stations connected to the security system will be monitored from the station monitoring room and from the central command and control center, giving security personnel the power to identify risk, make optimal decisions, and take action that improves security.

NICE's advanced real-time distributed digital video solution will spot suspicious packages left behind on a crowded subway platform and automatically alert security personnel. The solution will also be utilized to automatically detect unauthorized entry into secured areas. The result is a better control of potential threats and enhanced commuter safety.

"We are very excited to be a part of this important project and deliver Insight from Interactions to help increase the security of Beijing's mass transit system," said Doron Ben Sira, President of NICE APAC. "This project is the latest in NICE's history of supplying advanced security solutions for internal security. We already have a strong track record for supporting large city centers and their transit systems all over the world, and are becoming the de-facto choice for governments seeking to ensure the safety and security of commuters."

#### **About NICE**

NICE Systems (NASDAQ: NICE) is the leading provider of Insight from Interactions(TM) solutions, based on advanced analytics of unstructured multimedia content - from telephony, web, radio and video communications. NICE is revolutionizing VoIP interactions management with state-of-the-art solutions for IP contact centers, branches, and command and control centers. NICE's solutions are changing the way organizations make decisions, helping them improve business and operational performance, address security threats and be

### **NICE Receives 2006 IP Video Surveillance Competitive Strategy Leadership Award**

*Leading industry analyst Frost & Sullivan recognizes company's significant impact on video security market*

**Ra'anana, Israel, April 20, 2006 - NICE Systems (NASDAQ: NICE)**, the global provider of advanced solutions that enable organizations to extract Insight from Interactions(TM) to drive performance, today announced that it has received Frost & Sullivan's 2006 Competitive Strategy Leadership of the Year Award for IP Video Surveillance.

This Award is presented each year to a company whose competitive strategy has yielded significant gains in market share during the research period. The Award recipient may have also executed an innovative strategy within the existing competitive landscape, empowering the company to overtake the competition. Frost & Sullivan analysts expect such innovations to produce lasting, precedent-setting trends in the industry.

To determine the Award's recipient, Frost & Sullivan conducted extensive research on the IP Video Surveillance market, including interviews with industry experts, industry participants, and end-users, as well as extensive secondary data research. The Award recipient is ranked number one among all industry participants.

NICE was chosen for its success in achieving significant gains in the market due to superior market strategy, having strengthened its position in the IP video surveillance market by offering market leading home-grown solutions, as well as through a successful acquisition and effective partnerships with channel and technology partners.

Frost & Sullivan commended NICE for the FAST Video Security AG acquisition as having added advanced IP based technology to the company's portfolio, and for having enhanced its presence and distribution channels in NA, EMEA
