Item 2.02. Results of Operations and Financial Condition.

On October 11, 2012, AGL Resources Inc. (the “Company”) issued a press release announcing that it expects its third quarter 2012 earnings results to be negatively impacted by changes in natural gas prices. The Company anticipates third-quarter 2012 earnings results to be negatively impacted by pre-tax hedge losses of \$16 million, approximately \$0.08 per diluted share, in its wholesale services segment. These losses are temporary and will be recovered in future periods. Based on current expectations, they will largely be recovered in the fourth quarter of 2012 and the first quarter of 2013.

As a result, the Company expects full-year 2012 earnings to be in the range of \$2.60 to \$2.75 per diluted share, assuming normal weather for the remainder of the year, compared to its previously announced guidance of \$2.80 to \$2.95 per diluted share. This revised range reflects the significant impact of unprecedented warm weather in the first half of 2012, which impacted earnings in our distribution and retail segments by \$0.13 per share, as well as the anticipated timing of realizing the economic value in the wholesale business through recovery of the hedge losses. A copy of the press release is attached hereto as Exhibit 99.1 and incorporated by reference herein.

The information in the preceding paragraphs, as well as Exhibit 99.1 referenced therein, shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, nor incorporated by reference in any filing under the Securities Act of 1933, as amended, unless the Company expressly so incorporates such information by reference.
