APEX MUNICIPAL FUND, INC.

Managed Dividend Policy

The Fund's dividend policy is to distribute all or a portion of its net investment income to its shareholders on a monthly basis. In order to provide shareholders with a more consistent yield to the current trading price of shares of Common Stock of the Fund, the Fund may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any particular month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Fund for any particular month may be more or less than the amount of net investment income earned by the Fund during such month. The Fund's current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Assets, Liabilities and Capital, which comprises part of the financial information included in this report.

Quality Profile

The quality ratings of securities in the Fund as of June 30, 2001 were as follows:

S&P Rating/Moody's Rating	Percent of Net Assets
AAA/Aaa	7.2%
BBB/Baa	13.9
BB/Ba	15.3
B/B	6.2
CCC/Caa	0.1
NR (Not Rated)	55.0
Other+	0.5

+ Temporary investments in short-term municipal securities.

Apex Municipal Fund, Inc., June 30, 2001

DEAR SHAREHOLDER

For the year ended June 30, 2001, Apex Municipal Fund, Inc. earned \$0.596 per share income dividends, which included earned and unpaid dividends of \$0.049.

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

This represents a net annualized yield of 6.30%, based on a month-end net asset value of \$9.45 per share. Over the same period, the Fund's total investment return was +8.48%, based on a change in per share net asset value from \$9.33 to \$9.45, and assuming reinvestment of \$0.597 per share income dividends. For the six-month period ended June 30, 2001, the Fund's total investment return was +5.54%, based on a change in per share net asset value from \$9.26 to \$9.45, and assuming reinvestment of \$0.301 per share income dividends.

The Municipal Market Environment

During the six-month period ended June 30, 2001, among considerable weekly volatility, long-term fixed-income bond yields generally moved higher. So far in 2001, investors generally focused on the actions taken by the Federal Reserve Board to reverse the ongoing US economic slowdown. US economic growth fell into the 1%-2% range in 2001 after expanding at more than 5% during the first half of 2000. In mid-December 2000, the Federal Reserve Board announced that economic conditions warranted the cessation of the series of short-term interest rate increases initiated in February 2000. Citing declining consumer confidence and weakening industrial production, the Federal Reserve Board at each of their meetings in January, February and March of this year lowered short-term interest rates in an effort to promote stronger US economic growth. Given continued weak equity markets, investors focused on the declining supply of US Treasury securities and forecasts of sizeable Federal budget surpluses. This positive economic environment fostered a significant decline in US Treasury bond yields. By late March 2001, US Treasury bond yields declined approximately 20 basis points (0.20%) to 5.25%.

Despite additional actions by the Federal Reserve Board in April, May and June, fixed-income securities were unable to maintain their earlier market gains. Recovering US stock markets, especially the NASDAQ, caused many investors to reallocate assets out of US Treasury securities to equities. Additionally, many investors believed that the 275 basis point decline in short-term interest rates engineered by the Federal Reserve Board over the last six months would eventually rekindle a strong US economy with concomitant inflationary pressures. In recent months, recovering equity markets, renewed inflationary fears, and the expectation that the US economy will resume strong growth in late 2001 put consistent pressures on fixed-income issues. By the end of June 2001, long-term US Treasury bond yields rose to 5.75%, an increase of approximately 30 basis points over the last six months.

During the last six months, tax-exempt bond yields also reacted to the Federal Reserve Board actions and equity market volatility. However, this reaction was muted in both intensity and degree. In early 2001, municipal bond yields traded in a narrow range supported by a strong US Treasury market and continued investor demand. As it became apparent that any proposed changes in the Federal tax system were unlikely to have any immediate, material impact on existing Federal tax brackets, tax-exempt bond yields responded by moving higher in early 2001. By late March 2001, long-term uninsured revenue bond yields, as measured by the Bond Buyer Revenue Bond Index, approached 5.40%, a decline of approximately 10 basis points from the end of December 2000. Similar to the US Treasury market, tax-exempt bond yields were pushed higher during the remainder of the period by equity market improvement in April, as well as the possibility that the Federal Reserve Board was close to the end of its current interest rate easing cycle. At the end of June 2001, long-term municipal bond yields rose to approximately 5.50%, although over the past six months, they rose approximately five basis points.

The recent relative outperformance of the tax-exempt bond market was particularly impressive given the dramatic increase in long-term municipal bond issuance during the June 2001 quarter. Historically, low municipal bond yields have continued to allow municipalities to refund outstanding, high-couponed debt. Also, as yields rose in early April, tax-exempt issuers rushed to issue

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

new financing, fearing higher yields in the coming months. During the past six months, almost \$135 billion in long-term tax-exempt bonds was issued, an increase of over 40% compared to the same period a year ago. During the three-month period ended June 30, 2001, tax-exempt bond issuance was particularly heavy, with more than \$75 billion in long-term municipal bonds underwritten, an increase of over 45% compared to the same three-month period a year ago.

Historically, June has been a period of weak investor demand for tax-exempt products as investors are often forced to liquidate bond positions to meet Federal and state tax payments. In recent months, there was no appreciable selling by retail accounts. It has been noted that, thus far in 2001, new net cash inflows into municipal bond mutual funds have reached \$4 billion compared to new net cash outflows of more than \$13 billion for the same period a year ago. This suggests that the positive technical structure of the municipal market has remained intact. Also, the months of June and July tend to be periods of strong retail demand in response to the larger-coupon income payments and proceeds from bond maturities these months generate. Additionally, short-term tax-exempt interest rates are poised to move lower. Seasonal tax pressures have kept short-term municipal rates artificially high, although not as high as in recent years. As these pressures abate, short-term interest rates are likely to decline below 3%. As short-term interest rates decline, investors have tended to extend maturities to take advantage of the steep municipal yield curve. We believe all of these factors should enhance the tax-exempt market's technical position in the coming months.

Looking forward, the municipal market's direction appears uncertain. Should the US economy materially weaken into late summer, the Federal Reserve Board may be forced to ease monetary policy to a greater extent than investors currently expect. The prospect of two or three additional interest rate easings may push fixed-income bond yields, including municipal bond yields, lower. However, should the cumulative 275 basis point reduction in short-term interest rates by the Federal Reserve Board and the economic stimulus produced by recent Federal tax reform combine to restore consumer confidence and economic activity, tax-exempt bond yields may not decline further. Given the strong technical position of the municipal bond market, we believe the tax-exempt market is poised to continue to outperform its taxable counterpart in the coming months.

Portfolio Strategy

During the six-month period ended June 30, 2001, the high-yield tax-exempt market saw a marked improvement in valuations for much of the high-yield sector, in contrast to the prior six-month period, in which the high-yield tax-exempt market deteriorated significantly. The more constructive environment was attributable to the abrupt and forceful easing of monetary policy in January 2001 by the Federal Reserve Board in response to a rapid deterioration in economic fundamentals. Encouraged by prospects of steadily declining short-term interest rates, fixed-income investors increased exposure to speculative-grade credits in anticipation of the stimulative effect of an easing in monetary policy. Implicit in the decision to reallocate asset weightings in this manner has been the belief that credit spreads already reflect current weak economic conditions. The anticipatory nature of markets suggests that investors are looking beyond present circumstances and are now beginning to discount an eventual economic rebound. In effect, the investors are demonstrating their conviction that the Federal Reserve Board will be successful in its efforts to reignite growth.

While these developments suggest a brighter outlook ahead, the months leading up to the Federal Reserve Board's first rate reduction proved to be a difficult environment for investors in the high-yield market. Poor liquidity and anemic investor demand continued to chip away at valuations. The effect was all the more pronounced as the late year bond market rally was largely confined to the

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

higher

2 & 3

Apex Municipal Fund, Inc., June 30, 2001

investment-grade sectors. By year end, with investor sentiment at its nadir and credit spreads near their widest point in several years, the stage was set for the Federal Reserve Board's surprise move and the ensuing turnaround.

Our investment strategy remains largely unchanged. We have consistently sought to manage reinvestment risk in an effort to stabilize the Fund's dividend stream in a variety of interest rate environments. The distressed nature of the high-yield market provided the opportunity to continue the gradual restructuring of the Fund at some of the most attractive yields in recent years. Recent additions to the Fund included a senior living project in North Carolina and tax increment financing in Missouri. Despite the well-publicized financial woes affecting California's two largest privately owned utilities, the utility sector remains a favorite given current trends toward consolidation within the industry. The Fund had no exposure to either utility and was unaffected by the subsequent decline in market value of their respective debt obligations. Apart from the debt issued by Southern California Edison and Pacific Gas and Electric, the utility sector has been one of the best-performing groups in the tax-exempt high-yield market. Notwithstanding our favorable outlook, this outperformance prompted us to reduce our exposure modestly as a means of funding new purchases.

In Conclusion

We appreciate your ongoing interest in Apex Municipal Fund, Inc., and we look forward to serving your investment needs in the months and years to come.

Sincerely,

/s/ Terry K. Glenn

Apex Municipal Fund, Inc., June 30, 2001

NOTES TO FINANCIAL STATEMENTS

1. Significant Accounting Policies:

Apex Municipal Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940 as a non-diversified, closed-end management investment company. The Fund's financial statements are prepared in conformity with accounting principles generally accepted in the United States of America, which may require the use of management accruals and estimates. The Fund determines and makes available for publication the net asset value of its Common Stock on a weekly basis. The Fund's Common Stock is listed on the New York Stock Exchange under the symbol APX. The following is a summary of significant accounting policies followed by the Fund.

(a) Valuation of investments--Municipal bonds are traded primarily in the over-the-counter markets and are valued at the most recent bid price or yield equivalent as obtained by the Fund's pricing service from dealers that make markets in such securities. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the over-the-counter market, valuation is the last asked price (options written) or the last bid price (options purchased). Securities with remaining maturities of sixty days or less are valued at amortized cost, which approximates market value. Securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Fund, including valuations furnished by a pricing service retained by the Fund, which may utilize a matrix system for valuations. The procedures of the pricing service and its valuations are reviewed by the officers of the Fund under the general supervision of the Board of Directors.

(b) Derivative financial instruments--The Fund may engage in various portfolio investment strategies to increase or decrease the level of risk to which the Fund is exposed more quickly and efficiently than transactions in other types of instruments. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

o Financial futures contracts--The Fund may purchase or sell financial futures contracts and options on such futures contracts for the purpose of hedging the market risk on existing securities or the intended purchase of securities. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

o Options--The Fund is authorized to write covered call options and purchase put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked to market to reflect the current market value of the option written.

When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

Written and purchased options are non-income producing investments.

(c) Income taxes--It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no Federal income tax provision is required.

(d) Security transactions and investment income--Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Interest income is recognized on the accrual basis. The Fund will adopt the provisions to amortize all premiums and discounts on debt securities effective July 1, 2001, as now required under the new AICPA Audit and Accounting Guide for Investment Companies. The cumulative effect of this accounting change will have no impact on the total net assets of the Fund, but will result in a \$34,920 increase to the cost of securities and a corresponding \$34,920 decrease to net unrealized depreciation, based on debt securities held as of June 30, 2001.

(e) Dividends and distributions--Dividends from net investment income are declared daily and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

2. Investment Advisory Agreement and Transactions with Affiliates:

The Fund has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of the Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, the Fund pays a monthly fee at an annual rate of .65% of the Fund's average weekly net assets.

Prior to January 1, 2001, FAM provided accounting services to the Fund at its cost and the Fund reimbursed FAM for these services. FAM continues to provide certain accounting services to the Fund. The Fund reimburses FAM at its cost for such services. For the year ended June 30, 2001, the Fund reimbursed FAM an aggregate of \$24,777 for the above-described services. The Fund entered into an agreement with State Street Bank and Trust Company ("State Street"), effective January 1, 2001, pursuant to which State Street provides certain accounting services to the Fund. The Fund pays a fee for these services.

Certain officers and/or directors of the Fund are officers and/or directors of FAM, PSI, Merrill Lynch, Pierce, Fenner & Smith Incorporated, and/or ML & Co.

3. Investments:

Purchases and sales of investments, excluding short-term securities, for the year ended June 30, 2001 were \$32,987,549 and \$30,827,448, respectively.

Net realized losses for the year ended June 30, 2001 and net unrealized losses as of June 30, 2001 were as follows:

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

	Realized Losses	Unrealized Losses
Long-term investments	\$ (1,269,704)	\$ (6,002,799)
Total	\$ (1,269,704) =====	\$ (6,002,799) =====

As of June 30, 2001, net unrealized depreciation for Federal income tax purposes aggregated \$6,002,799, of which \$6,289,210 related to appreciated securities and \$12,292,009 related to depreciated securities. The aggregate cost of investments at June 30, 2001 for Federal income tax purposes was \$187,991,181.

4. Common Stock Transactions:

At June 30, 2001, the Fund had one class of shares of Common Stock, par value \$.10 per share, of which 150,000,000 shares were authorized. Shares issued and outstanding during the years ended June 30, 2001 and June 30, 2000 remained constant.

5. Capital Loss Carryforward:

At June 30, 2001, the Fund had a net capital loss carryforward of approximately \$22,153,000, of which \$2,775,000 expires in 2002, \$1,754,000 expires in 2003, \$7,057,000 expires in 2004, \$1,312,000 expires in 2005, \$938,000 expires in 2006, \$2,975,000 expires in 2008 and \$5,342,000 expires in 2009. This amount will be available to offset like amounts of any future taxable gains. Expired capital loss carryforward in the amount of \$3,879,734 has been reclassified to paid-in capital in excess of par.

6. Subsequent Event:

On July 5, 2001, the Fund's Board of Directors declared an ordinary income dividend to Common Stock shareholders in the amount of \$.049283 per share, payable on July 30, 2001 to shareholders of record as of July 17, 2001.

Apex Municipal Fund, Inc., June 30, 2001

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders,
Apex Municipal Fund, Inc.:

We have audited the accompanying statement of assets, liabilities and capital, including the schedule of investments, of Apex Municipal Fund, Inc. as of June 30, 2001, the related statements of operations for the year then ended and changes in net assets for each of the years in the two-year period then ended, and the financial highlights for each of the years presented. These financial statements and the financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on the financial statements and the financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and

Edgar Filing: APEX MUNICIPAL FUND INC - Form N-30D

disclosures in the financial statements. Our procedures included confirmation of securities owned at June 30, 2001 by correspondence with the custodian. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements and the financial highlights present fairly, in all material respects, the financial position of Apex Municipal Fund, Inc. as of June 30, 2001, the results of its operations, the changes in its net assets, and the financial highlights for the respective stated periods in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP

IMPORTANT TAX INFORMATION (unaudited)

All of the net investment income distributions declared monthly by Apex Municipal Fund, Inc. during its taxable year ended June 30, 2001 qualify as tax-exempt interest dividends for Federal income tax purposes.

Please retain this information for your records.

ABOUT INVERSE FLOATERS

As a part of its investment strategy, the Fund may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Fund to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed rate, tax-exempt securities. To the extent the Fund invests in inverse securities, the market value of the Fund's portfolio and the net asset value of the Fund's shares may also be more volatile than if the Fund did not invest in these securities.
