UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE  
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2009

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE  
SECURITIES EXCHANGE ACT OF 1934

Commission file number: 000-23192

CELADON GROUP, INC.  
(Exact name of registrant as specified in its charter)

Delaware  
(State or other jurisdiction of  
incorporation or organization)

13-3361050  
(IRS Employer  
Identification No.)

9503 East 33rd Street  
One Celadon Drive  
Indianapolis, IN  
(Address of principal executive offices)

46235-4207  
(Zip Code)

(317) 972-7000  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes

No

Edgar Filing: CELADON GROUP INC - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer  Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12-b2 of the Exchange Act).

Yes  No

As of October 30, 2009 (the latest practicable date), 22,081,363 shares of the registrant's common stock, par value \$0.033 per share, were outstanding.

CELADON GROUP, INC.  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
September 30, 2009  
(Unaudited)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements include the accounts of Celadon Group, Inc. and its majority owned subsidiaries (the "Company"). All material intercompany balances and transactions have been eliminated in consolidation.

The unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles ("GAAP") in the United States of America pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") for interim financial statements. Certain information and footnote disclosures have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, the accompanying unaudited financial statements reflect all adjustments (all of a normal recurring nature), which are necessary for a fair presentation of the financial condition and results of operations for these periods. The results of operations for the interim period are not necessarily indicative of the results for a full year. These condensed consolidated financial statements and notes thereto should be read in conjunction with the Company's audited consolidated financial statements and notes thereto, included in the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2009.

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

2. New Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board ("FASB") issued SFAS No. 157, Fair Value Measurements ("SFAS 157"), which was primarily codified into Topic 820 in the Accounting Standards Codification ("ASC"). SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements required under other accounting pronouncements, but does not change existing guidance as to whether or not an instrument is carried at fair value. It also establishes a fair value hierarchy that prioritizes information used in developing assumptions when pricing an asset or liability. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. In February 2008, FASB issued Staff Position No. 157-2, which provides a one-year delayed application of SFAS 157 for nonfinancial assets and liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The Company's adoption of the provisions of SFAS 157 with respect to the financial assets and liabilities measured at fair value did not have a material impact on the fair value measurements or the consolidated financial statements. In accordance with SFAS 157-2, the Company's adoption did not have a material impact on nonfinancial assets and nonfinancial liabilities, including, but not limited to, the valuation of the Company's reporting units for the purpose of assessing goodwill impairment, the valuation of property and equipment when assessing long-lived asset impairment, and the valuation of assets acquired and liabilities assumed in business combinations. In October 2008, FASB issued SFAS 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active, which became effective upon issuance, including periods for which financial statements have not been issued. SFAS 157-3 clarifies the application of SFAS 157. The Company's adoption of SFAS 157-3 in determination of fair values did not have a material impact on the consolidated financial statements.

In December 2007, FASB issued SFAS No. 141R (revised 2007), Business Combinations ("SFAS 141R"), which was primarily codified into Topic 805 Business Combinations in the ASC. The statement retains the purchase method of accounting for acquisitions, but requires a number of changes, including changes in the way assets and liabilities are recognized in the purchase accounting. It also changes the recognition of assets acquired and liabilities assumed arising from contingencies, requires the capitalization of in-process research and development at fair value, and requires the expensing of acquisition-related costs as incurred. SFAS 141R was effective for us beginning July 1, 2009 and will apply prospectively to business combinations completed after that date.

Table of Contents

CELADON GROUP, INC.  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
September 30, 2009  
(Unaudited)

In December 2007, FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB 51 ("SFAS 160"), which was primarily codified in to Topic 810 Consolidations in the ASC, and changes the accounting and reporting for minority interests. Minority interests will be recharacterized as noncontrolling interests and will be reported as a component of equity separate from the parent's equity, and purchases or sales of equity interests that do not result in a change in control will be accounted for as equity transactions. In addition, net income attributable to the noncontrolling interest will be included in consolidated net income on the face of the income statement and, upon a loss of control, the interest sold, as well as any interest retained, will be recorded at fair value with any gain or loss recognized in earnings. SFAS 160 was effective for us beginning July 1, 2009 and did not have a material impact on the consolidated financial statements.

In March 2008, FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133 ("SFAS 161"), which was primarily codified into Topic 815 Derivatives and Hedging in the ASC. SFAS 161 requires enhanced disclosures about an entity's derivative and hedging activities, including (i) how and why an entity uses derivative instruments, (ii) how derivative instruments and related hedged items are accounted for under SFAS No. 133, and (iii) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. The Company adopted this statement effective July 1, 2009.

In May 2009, FASB issued SFAS No. 165, Subsequent Events, which was primarily codified into Topic 855 Subsequent Events in the ASC. This standard is intended to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Specifically, this standard sets forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. SFAS No. 165 is effective for fiscal years and interim periods ended after June 15, 2009. We adopted this statement effective July 1, 2009.

In April 2009, the FASB issued FSP No. FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, which were primarily codified into Topic 825 into the ASC. This FSP amends FASB Statement No. 107, to require disclosures about fair values of financial instruments for interim reporting periods as well as in annual financial statements. The FSP also amends APB Opinion No. 28 to require those disclosures in summarized financial information at interim reporting periods. This FSP was effective for interim reporting periods ending after June 15, 2009. The adoption of this FSP did not affect the Company's consolidated condensed financial statements.

In June 2009, the FASB issued SFAS No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles, which was primarily codified into Topic 105 Generally Accepted Accounting Standards in the ASC. This standard will become the single source of authoritative nongovernmental U.S. generally accepted accounting principles ("GAAP"), superseding existing FASB, American Institute of Certified Public Accountants ("AICPA"), Emerging Issues Task Force ("EITF"), and related accounting literature. This standard reorganizes the thousands of GAAP pronouncements into roughly 90 accounting topics and displays them using a consistent structure. Also included is relevant Securities and Exchange Commission guidance organized using the same topical structure in separate sections. This guidance will be effective for financial statements issued for reporting periods that end after September 15, 2009. Beginning in the first quarter of 2010, this guidance impacts the

Company's financial statements and related disclosures as all references to authoritative accounting literature reflect the newly adopted codification.

Table of Contents

CELADON GROUP, INC.  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
September 30, 2009  
(Unaudited)

## 3. Income Taxes

Income tax expense varies from the federal corporate income tax rate of 35%, primarily due to state income taxes, net of federal income tax effect and our permanent differences primarily related to per diem pay structure.

The company follows ASC Topic 740-10-25 in Accounting for Uncertainty in Income Taxes. Topic 740 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. As of September 30, 2009, the Company recorded a \$0.6 million liability for unrecognized tax benefits, a portion of which represents penalties and interest.

As of September 30, 2009, we are subject to U.S. Federal income tax examinations for the tax years 2006 through 2008. We file tax returns in numerous state jurisdictions with varying statutes of limitations.

## 4. Earnings Per Share

The difference in basic and diluted weighted average shares is due to the assumed exercise of outstanding stock options. A reconciliation of the basic and diluted earnings per share calculation is as follows (amounts in thousands, except per share amounts):

	For three months ended September 30,	
	2009	2008
Net income	\$565	\$2,769
Denominator		
Weighted average number of common shares outstanding	21,847	21,581
Equivalent shares issuable upon exercise of stock options	343	450
Diluted shares	22,190	22,031
Earnings per share		
Basic	\$0.03	\$0.13
Diluted	\$0.03	\$0.13

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
September 30, 2009  
(Unaudited)

## 5. Segment Information and Significant Customers

The Company operates in two segments, transportation and e-commerce. The Company generates revenue in the transportation segment primarily by providing truckload-hauling services through its subsidiaries, Celadon Trucking Services, Inc. ("CTSI"), Celadon Logistics Services, Inc. ("CLSI"), Servicios de Transportacion Jaguar, S.A. de C.V., ("Jaguar"), and Celadon Canada, Inc. ("CelCan"). The Company provides certain services over the Internet through its e-commerce subsidiary TruckersB2B, Inc. ("TruckersB2B"). TruckersB2B is an Internet based "business-to-business" membership program, owned by Celadon E-Commerce, Inc., a wholly owned subsidiary of Celadon Group, Inc. The e-commerce segment generates revenue by providing discounted fuel, tires, and other products and services to small and medium-sized trucking companies. The Company evaluates the performance of its operating segments based on operating income (amounts below in thousands).

	Transportation	E-commerce	Consolidated
<b>Three months ended September 30, 2009</b>			
Operating revenue	\$ 125,525	\$ 2,312	\$ 127,837
Operating income	2,395	322	2,717
<b>Three months ended September 30, 2008</b>			
Operating revenue	\$ 144,612	\$ 2,256	\$ 146,868
Operating income	6,622	329	6,951

Information as to the Company's operating revenue by geographic area is summarized below (in thousands). The Company allocates operating revenue based on country of origin of the tractor hauling the freight:

	United States	Canada	Mexico	Consolidated
<b>Three months ended September 30, 2009</b>				
Operating revenue	\$ 111,856	\$ 9,960	\$ 6,021	\$ 127,837
<b>Three months ended September 30, 2008</b>				
Operating revenue	\$ 128,199	\$ 11,236	\$ 7,433	\$ 146,868

No customer accounted for more than 5% of the Company's total revenue during any of its two most recent fiscal years or the interim periods presented above.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
September 30, 2009  
(Unaudited)

## 6. Stock Based Compensation

The company accounts for all share-based grants to employees based up a grant date fair value of an award in accordance with FAS 123R, which was primarily codified into Topic 718 in the ASC. On January 2006, stockholders approved the Company's 2006 Omnibus Incentive Plan ("2006 Plan"), which provides various vehicles to compensate the Company's key employees. The 2006 Plan utilizes such vehicles as stock options, restricted stock grants, and stock appreciation rights ("SARs"). The 2006 Plan, as amended, authorized the Company to grant 2,687,500 shares. The Company has granted no stock options or shares of restricted stock pursuant to the 2006 Plan in fiscal 2010. The Company is authorized to grant an additional 1,138,715 shares pursuant to the 2006 Plan.

The following table summarizes the expense components of our stock based compensation program (in thousands):

	For three months ended September 30,	
	2009	2008
Stock options expense	\$ 320	\$ 331
Restricted stock expense	342	293
Stock appreciation rights expense	399	261
Total stock related compensation expense	\$ 1,061	\$ 885

The Company has granted a number of stock options under various plans. Options granted to employees have been granted with an exercise price equal to the market price on the grant date and expire on the tenth anniversary of the grant date. Options granted to employees vest 25 percent or 33 percent per year, commencing with the first anniversary of the grant date. Options granted to non-employee directors have been granted with an exercise price equal to the market price on the grant date, vest over four years, commencing with the first anniversary of the grant date, and expire on the tenth anniversary of the grant date.

A summary of the activity of the Company's stock option plans as of September 30, 2009 and changes during the period then ended is presented below:

Options	Shares	Weighted-Average		
		Weighted-Average Exercise Price	Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at July 1, 2009	1,289,841	\$ 9.87	7.04	\$677,650
Granted	---	---	---	---
Exercised	---	---	---	---
Forfeited or expired	(3,500 )	\$ 15.58	---	---
Outstanding at September 30, 2009	1,286,341	\$ 9.85	6.79	\$2,658,132
Exercisable at September 30, 2009	687,526	\$ 10.10	5.95	\$1,447,057

Table of Contents

CELADON GROUP, INC.  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
September 30, 2009  
(Unaudited)

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	Fiscal 2010	Fiscal 2009
Weighted average grant date fair value	---	\$ 5.08
Dividend yield	---	0
Expected volatility	---	45.5 %
Risk-free interest rate	---	2.32 %
Expected lives	---	4 years

## Restricted Shares

	Number of Shares	Weighted Average Grant Date Fair Value
Unvested at July 1, 2009	309,706	\$11.81
Granted	---	---
Vested	(75,373 )	\$9.93
Forfeited	(15,069 )	\$15.75
Unvested at September 30, 2009	219,264	\$11.56

Restricted shares granted to employees have been granted with a fair value equal to the market price on the grant date and the grants vest by 25 percent or 33 percent per year, commencing with the first anniversary of the grant date. In addition, for a portion of the shares certain financial targets must be met for these shares to vest. Restricted shares granted to non-employee directors have been granted with a fair value equal to the market price on the grant date and vest on the date of the Company's next annual meeting.

As of September 30, 2009, the Company had \$1.4 million and \$2.3 million of total unrecognized compensation expense related to stock options and restricted stock, respectively, that is expected to be recognized over the remaining period of approximately 2.3 years for stock options and 2.9 years for restricted stock.

## Stock Appreciation Rights

	Number of Shares	Weighted Average Grant Date Fair Value
Vested at July 1, 2009	144,844	\$8.64
Granted	---	---
Paid	---	---

Forfeited	---	---
Vested at September 30, 2009	144,844	\$8.64

SARs granted to employees vested on a four year vesting schedule.

September 30, 2009  
(Unaudited)

## 7. Stock Repurchase Programs

On October 24, 2007, the Company's Board of Directors authorized a stock repurchase program pursuant to which the Company purchased 2,000,000 shares of the Company's common stock in open market transactions at an aggregate cost of approximately \$13.8 million. We intend to hold repurchased shares in treasury for general corporate purposes, including issuances under stock plans. We account for treasury stock using the cost method.

## 8. Comprehensive Income

Comprehensive income consisted of the following components for the first quarter of fiscal 2010 and 2009, respectively (in thousands):

	Three months ended September 30,	
	2009	2008
Net income	\$565	\$2,769
Foreign currency translation adjustments	664	(1,193 )
Total comprehensive income	\$1,229	\$1,576

## 9. Commitments and Contingencies

The Company has outstanding commitments to purchase approximately \$43.4 million of revenue equipment at September 30, 2009.

Standby letters of credit, not reflected in the accompanying consolidated financial statements, aggregated approximately \$4.2 million at September 30, 2009.

The Company has employment and consulting agreements with various key employees providing for minimum combined annual compensation of \$700,000 in fiscal 2010.

There are various claims, lawsuits, and pending actions against the Company and its subsidiaries in the normal course of the operation of their businesses with respect to cargo, auto liability, or income taxes.

On August 8, 2007, the 384th District Court of the State of Texas situated in El Paso, Texas, rendered a judgment against CTSI, for approximately \$3.4 million in the case of *Martinez v. Celadon Trucking Services, Inc.*, which was originally filed on September 4, 2002. The case involves a workers' compensation claim of a former employee of CTSI who suffered a back injury as a result of a traffic accident. CTSI and the Company believe all actions taken were proper and legal and contend that the proper and exclusive place for resolution of this dispute was before the Indiana Workers' Compensation Board. While there can be no certainty as to the outcome, the Company believes that the ultimate resolution of this dispute will not have a materially adverse effect on its consolidated financial position, cash flows, or results of operations. CTSI filed an appeal of the decision to the Texas Court of Appeals in October 2007. Appellate briefs have been filed by Celadon and the plaintiff and the ATA Litigation Center has filed an amicus curiae brief in support of Celadon's position. We are waiting to hear if the Court of Appeals will entertain oral

argument on the briefs or simply render a decision on the briefs alone.

(Unaudited)

10. Fair Value Measurements

The Company adopted SFAS No. 157, which was primarily codified into Topic 820 in the ASC, effective October 1, 2008. Under this standard, the definition of fair value focuses on the price that would be received to sell an asset or paid to transfer a liability (i.e., the "exit price") in an orderly transaction between market participants at the measurement date. As permitted by FSP No. FAS 157-2, Effective Date of FASB Statement No. 157, we deferred the adoption of SFAS No. 157 until October 1, 2010 for all non-financial assets and non-financial liabilities, except those that are recognized or disclosed at fair value in the consolidated financial statements on a recurring basis (at least annually). The full adoption of SFAS No. 157 is not expected to have a material effect on our consolidated financial statements.

SFAS No. 157 establishes a fair value hierarchy that prioritizes the valuation approaches, based on reliability of inputs, as follows:

Level 1 inputs are quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include: quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates and yield curves observable at commonly quoted intervals or current market) and contractual prices for the underlying financial instrument, as well as other relevant economic measures.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs shall be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. Unobservable inputs shall reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

As of September 30, 2009, the only significant assets or liabilities that were carried at fair value within our consolidated financial statements (other than cash equivalents) were derivative instruments (\$68,000), which were valued based upon Level 2 inputs.

11. Reclassifications and Adjustments

Certain items in the prior year's consolidated financial statements have been reclassified to conform to the current presentation. In addition, during the quarter, the Company recorded a \$0.5 million reduction to Accumulated other comprehensive loss related to foreign currency translations from a discontinued operation in Fiscal 1996. The Company determined that the amounts that related to prior periods were immaterial to all prior periods and therefore recognized the reduction to retained earnings during the first quarter of fiscal 2010 as an immaterial error correction.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Disclosure Regarding Forward Looking Statements

This Quarterly Report contains certain statements that may be considered forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, events, performance, or achievements of the Company to be materially different from any future results, events, performance, or achievements expressed in or implied by such forward-looking statements. Such statements may be identified by the fact that they do not relate strictly to historical or current facts. These statements generally use words such as "believe," "expect," "anticipate," "project," "forecast," "should," "estimate," "plan," "outlook," "goal," and similar expressions. While it is impossible to identify all factors that may cause actual results to differ from those expressed in or implied by forward-looking statements, the risks and uncertainties that may affect the Company's business, include, but are not limited to, those discussed in the section entitled Item 1A. Risk Factors set forth below.

All such forward-looking statements speak only as of the date of this Form 10-Q. You are cautioned not to place undue reliance on such forward-looking statements. The Company expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in the Company's expectations with regard thereto or any change in the events, conditions, or circumstances on which any such statement is based.

References to the "Company," "we," "us," "our," and words of similar import refer to Celadon Group, Inc. and its consolidated subsidiaries.

Business Overview

We are one of North America's twenty largest truckload carriers as measured by revenue. We generated \$490.3 million in operating revenue during our fiscal year ended June 30, 2009. We have grown significantly since our incorporation in 1986 through internal growth and a series of acquisitions since 1995. As a dry van truckload carrier, we generally transport full trailer loads of freight from origin to destination without intermediate stops or handling. Our customer base includes many Fortune 500 shippers.

In our international operations, we offer time-sensitive transportation in and between the United States and two of its largest trading partners, Mexico and Canada. We generated approximately one-half of our revenue in fiscal 2009 from international movements, and we believe our annual border crossings make us the largest provider of international truckload movements in North America. We believe that our strategically located terminals and experience with the language, culture, and border crossing requirements of each North American country provide a competitive advantage in the international trucking marketplace.

We believe our international operations, particularly those involving Mexico, offer an attractive business niche. The additional complexity of and need to establish cross-border business partners and to develop strong organization and adequate infrastructure in Mexico affords some barriers to competition that are not present in traditional U.S. truckload services.

Our success is partially dependent upon the success of our operations in Mexico and Canada, and we are subject to risks of doing business internationally, including fluctuations in foreign currencies, changes in the economic strength of the countries in which we do business, difficulties in enforcing contractual obligations and intellectual property rights, burdens of complying with a wide variety of international and United States export and import laws, and social,

political, and economic instability. Additional risks associated with our foreign operations, including restrictive trade policies and imposition of duties, taxes, or government royalties by foreign governments, are present but largely mitigated by the terms of NAFTA.

In addition to our international business, we offer a broad range of truckload transportation services within the United States, including long-haul, regional, dedicated, intermodal, and logistics. With six different asset-based acquisitions from 2003 to 2008, we expanded our operations and service offerings within the United States and significantly improved our lane density, freight mix, and customer diversity.

Table of Contents

We also operate TruckersB2B, a profitable marketing business that affords volume purchasing power for items such as fuel, tires, and equipment to approximately 21,000 trucking fleets representing approximately 485,000 tractors. TruckersB2B is included in our e-commerce unit, which is a separate operating segment under generally accepted accounting principles.

Recent Results and Financial Condition

For the first quarter of fiscal 2010, total revenue decreased 13.0% to \$127.8 million, compared with \$146.9 million for the first quarter of fiscal 2009. Freight revenue, which excludes revenue from fuel surcharges, increased 1.3% to \$110.7 million for the first quarter of fiscal 2010, compared with \$109.3 million for the first quarter of fiscal 2009. Net income decreased 78.6% to \$0.6 million from \$2.8 million, and diluted earnings per share decreased to \$0.03 from \$0.13.

At September 30, 2009, our total balance sheet debt (including capital lease obligations less cash) was \$46.5 million, and our total stockholders' equity was \$145.6 million, for a total debt to capitalization ratio of 24.2%. At September 30, 2009, we had \$28.9 million of available borrowing capacity under our revolving credit facility and \$1.9 million of cash on hand.

Revenue

We generate substantially all of our revenue by transporting freight for our customers. Generally, we are paid by the mile or by the load for our services. We also derive revenue from fuel surcharges, loading and unloading activities, equipment detention, brokerage, intermodal, less-than-truckload, other trucking related services, and from TruckersB2B. We believe that eliminating the impact of the sometimes volatile fuel surcharge revenue affords a more consistent basis for comparing our results of operations from period to period. The main factors that affect our revenue are the revenue per mile we receive from our customers, the percentage of miles for which we are compensated, the number of tractors operating, and the number of miles we generate with our equipment. These factors relate to, among other things, the U.S. economy, inventory levels, the level of truck capacity in our markets, specific customer demand, the percentage of team-driven tractors in our fleet, driver availability, and our average length of haul.

Expenses and Profitability

The main factors that impact our profitability on the expense side are the variable costs of transporting freight for our customers. These costs include fuel expense, driver-related expenses, such as wages, benefits, training, recruitment, and independent contractor costs, which we record as purchased transportation. Expenses that have both fixed and variable components include maintenance and tire expense and our total cost of insurance and claims. These expenses generally vary with the miles we travel, but also have a controllable component based on safety, fleet age, efficiency, and other factors. Our main fixed cost is the acquisition and financing of long-term assets, primarily revenue equipment. Other mostly fixed costs include our non-driver personnel and facilities expenses. In discussing our expenses as a percentage of revenue, we sometimes discuss changes as a percentage of revenue before fuel surcharges, in addition to absolute dollar changes, because we believe the high variable cost nature of our business makes a comparison of changes in expenses as a percentage of revenue more meaningful at times than absolute dollar changes.

The trucking industry has experienced significant increases in expenses over the past three years, in particular those relating to equipment costs, driver compensation, insurance, and variability in fuel prices. Until recently, many trucking companies had been able to raise freight rates to cover the increased costs based primarily on an industry-wide tight capacity of drivers. As freight demand has softened, carriers have been willing to accept rate decreases to utilize assets in service.

Table of Contents

## Revenue Equipment and Related Financing

For the remainder of fiscal 2010, we expect to obtain tractors primarily for replacement. At September 30, 2009 the average age of our tractor fleet was approximately 1.5 years and the average age of our trailer fleet was approximately 5.0 years. At September 30, 2009, we had future operating lease obligations totaling \$188.7 million, including residual value guarantees of approximately \$78.6 million.

	September 30, 2009		September 30, 2008	
	Tractors	Trailers	Tractors	Trailers
Owned equipment	1,080	2,933	1,635	2,179
Capital leased equipment	---	3,717	---	3,726
Operating leased equipment	1,824	3,333	1,121	2,989
Independent contractors	317	---	191	---
Total	3,221	9,983	2,947	8,894

Independent contractors are utilized through a contract with us to supply one or more tractors and drivers for our use. Independent contractors must pay their own tractor expenses, fuel, maintenance, and driver costs and must meet our specified guidelines with respect to safety. A lease-purchase program that we offer provides independent contractors the opportunity to lease-to-own a tractor from a third party. As of September 30, 2009, there were 317 independent contractors providing a combined 9.8% of our tractor capacity.

## Outlook

Looking forward, our profitability goal is to achieve an operating ratio of approximately 90%. We expect this to require improvements in rate per mile and miles per tractor and decreased non-revenue miles, to overcome expected additional cost increases. Because a large percentage of our costs are variable, changes in revenue per mile affect our profitability to a greater extent than changes in miles per tractor. For the remainder of fiscal 2010, the key factors that we expect to have the greatest effect on our profitability are our freight revenue per tractor per week (which will be affected by the general freight environment, including the balance of freight demand and industry-wide trucking capacity), our compensation of drivers, our cost of revenue equipment (particularly in light of the 2010 EPA engine requirements), our fuel costs, and our insurance and claims. To overcome cost increases and improve our margins, we will need to achieve increases in freight revenue per tractor. Operationally, we will seek improvements in safety, driver recruiting, and retention. Our success in these areas primarily will affect revenue, driver-related expenses, and insurance and claims expense. Given the difficult freight market confronting our industry and the difficult economy, we believe achieving our near term profitability goal will be difficult.

Table of Contents

## Results of Operations

The following table sets forth the percentage relationship of expense items to freight revenue for the periods indicated:

	For the three months ended September 30,			
	2009		2008	
Freight revenue(1)	100.0	%	100.0	%
Operating expenses:				
Salaries, wages, and employee benefits	36.1	%	37.8	%
Fuel(1)	11.4	%	9.6	%
Operations and maintenance	7.8	%	8.6	%
Insurance and claims	3.6	%	3.3	%
Depreciation and amortization	7.2	%	7.3	%
Revenue equipment rentals	8.5	%	5.5	%
Purchased transportation	16.4	%	14.4	%
Costs of products and services sold	1.5	%	1.4	%
Communications and utilities	1.1	%	1.1	%
Operating taxes and licenses	2.1	%	2.2	%
General and other operating	1.8	%	2.4	%
Total operating expenses	97.5	%	93.6	%
Operating income	2.5	%	6.4	%
Other expense:				
Interest expense	0.7	%	1.0	%
Income before income taxes	1.8	%	5.4	%
Provision for income taxes	1.3	%	2.9	%
Net income	0.5	%	2.5	%

(1)Freight revenue is total revenue less fuel surcharges. In this table, fuel surcharges are eliminated from revenue and subtracted from fuel expense. Fuel surcharges were \$17.1 million and \$37.6 million for the first quarter of fiscal 2010 and 2009, respectively.

## Comparison of Three Months Ended September 30, 2009 to Three Months Ended September 30, 2008

Total revenue decreased by \$19.1 million, or 13.0%, to \$127.8 million for the first quarter of fiscal 2010, from \$146.9 million for the first quarter of fiscal 2009. Freight revenue excludes \$17.1 million and \$37.6 million of fuel surcharge revenue for the first quarter of fiscal 2010 and 2009, respectively.

Freight revenue increased by \$1.4 million, or 1.3%, to \$110.7 million for the first quarter of fiscal 2010, from \$109.3 million for the first quarter of fiscal 2009. This marginal increase was attributable to an increase in loaded miles to 66.1 million for the first quarter of fiscal 2010, from 60.5 million for the first quarter of fiscal 2009, offset by average freight revenue per loaded mile decreasing to \$1.407 for the first quarter of fiscal 2010, from \$1.511 for the first

quarter of fiscal 2009. This decrease in revenue per loaded mile was the result of a difficult freight market and aggressive rate environment confronting our industry and a weakened economy. This combination of factors resulted in a decrease in average revenue per tractor per week, which is our primary measure of asset productivity, to \$2,495 in the first quarter of fiscal 2010, from \$2,680 for the first quarter of fiscal 2009.

Revenue for TruckersB2B was flat at \$2.3 million in the first quarter of fiscal 2010, compared to the first quarter of fiscal 2009.

Table of Contents

Salaries, wages, and employee benefits were \$40.0 million, or 36.1% of freight revenue, for the first quarter of fiscal 2010, compared to \$41.3 million, or 37.8% of freight revenue, for the first quarter of fiscal 2009. These decreases were the result of a decrease in administrative payroll due to efforts to consolidate and/or eliminate several functions into Indianapolis from various terminals during fiscal 2009, as well as a decrease in management discretionary bonuses paid in the quarter. Also, as part of the Company's efforts to decrease costs, we had a reduction in driver pay per mile, which was offset by increased company dispatch miles, and we reduced our recruiting costs in advertising and travel in the fiscal 2010 quarter as compared to the fiscal 2009 quarter.

Fuel expenses, net of fuel surcharge revenue of \$17.1 million and \$37.6 million for the first quarter of fiscal 2010 and 2009, respectively, increased to \$12.6 million, or 11.4% of freight revenue, for the first quarter of fiscal 2010, compared to \$10.5 million, or 9.6% of freight revenue, for the first quarter of fiscal 2009. These increases were primarily attributable to an increase in total miles and an increase in non-revenue miles, for which we do not receive fuel surcharges, offset by the company-wide fuel use reduction plan. Also the average fuel price was \$2.32 per gallon in the first quarter of fiscal 2010, compared to \$4.01 per gallon in the first quarter of fiscal 2009. We expect that our continued efforts to reduce idling and operate more fuel efficient tractors will continue to have a positive impact on our miles per gallon; however, we expect this positive impact to be partially offset by lower fuel economy on EPA-mandated new engines and use of ultra-low sulfur diesel fuel.

Operations and maintenance decreased to \$8.7 million, or 7.8% of freight revenue, for the first quarter of fiscal 2010, from \$9.4 million, or 8.6% of freight revenue, for the first quarter of fiscal 2009. Operations and maintenance consist of direct operating expense, maintenance, and tire expense. These decreases in the first quarter of fiscal 2010 are primarily related to decreases in costs associated with tractor maintenance, increased warranty recovery, various direct costs such as driver layover, local spotting services and security, and physical damage expenses compared to the first quarter of fiscal 2009.

Insurance and claims expense increased to \$3.9 million, or 3.6% of freight revenue, for the first quarter of fiscal 2010, from \$3.6 million, or 3.3% of freight revenue, for the first quarter of fiscal 2009. Insurance consists of premiums for liability, physical damage, cargo damage, and workers' compensation insurance, in addition to claims expense. These increases resulted primarily from increases in cargo and workers' compensation claims expense. Our insurance program involves self-insurance at various risk retention levels. Claims in excess of these risk levels are covered by insurance in amounts we consider to be adequate. We accrue for the uninsured portion of claims based on known claims and historical experience. We continually revise and change our insurance program to maintain a balance between premium expense and the risk retention we are willing to assume. Insurance and claims expense will vary based primarily on the frequency and severity of claims, the level of self-retention, and the premium expense.

Depreciation and amortization, consisting primarily of depreciation of revenue equipment, remained relatively unchanged at \$8.0 million, or 7.2% of freight revenue, for the first quarter of fiscal 2010, compared to \$8.0 million, or 7.3% of freight revenue, for the first quarter of fiscal 2009. Tractor depreciation decreased by \$1.6 million, related to a net decrease of approximately 600 tractors out of our owned fleet as compared to the first quarter of fiscal 2009. This decrease was offset by losses on sale of equipment, which include expenses to prepare the equipment for sale, of \$0.4 million during the first quarter of 2010 as compared to gains of \$1.0 million in the first quarter of fiscal 2009. Revenue equipment held under operating leases is not reflected on our balance sheet and the expenses related to such equipment are reflected on our statements of operations in revenue equipment rentals, rather than in depreciation and amortization and interest expense, as is the case for revenue equipment that is financed with borrowings or capital leases.

Revenue equipment rentals increased to \$9.4 million or 8.5% of freight revenue, for the first quarter of fiscal 2010, compared to \$6.1 million, or 5.5% of freight revenue, for the first quarter of fiscal 2009. These increases were attributable to an increase in the number of tractors and trailers financed under operating leases. At September 30,

2009, 1,824 tractors, or 62.8% of our company tractors, were held under operating leases, compared to 1,121 tractors, or 40.7% of our company tractors, at September 30, 2008. At September 30, 2009, 3,333 trailers, or 33.4%, of our trailer fleet were held under operating leases, compared to 2,989, or 33.6% of our trailer fleet, at September 30, 2008. Given that we expect to use operating leases for the acquisition of certain tractors in fiscal 2010, we expect our revenue equipment rental to increase as a percentage of freight revenue going forward.

Table of Contents

Purchased transportation increased to \$18.1 million, or 16.4% of freight revenue, for the first quarter of fiscal 2010, from \$15.8 million or 14.4% of freight revenue, for the first quarter of fiscal 2009. These increases are primarily related to an increase in independent contractor miles to 8.3 million in the first quarter of fiscal 2010 compared to 4.9 million miles in the first quarter of 2009. These increases were partially offset by a decrease in rate per mile, due to a decrease in fuel surcharges. Independent contractors are drivers who cover all their operating expenses (fuel, driver salaries, maintenance, and equipment costs) for a fixed payment per mile. We expect purchase transportation to increase as we increase the number of independent contractors in our fleet and continue to increase our purchase transportation for brokerage and intermodal transportation.

All of our other operating expenses are relatively minor in amount, and there were no significant changes in such expenses. Accordingly, we have not provided a detailed discussion of such expenses.

Our pretax margin, which we believe is a useful measure of our operating performance because it is neutral with regard to the method of revenue equipment financing that a company uses, decreased 360 basis points to 1.8% of freight revenue for the first quarter of fiscal 2010, from 5.4% of freight revenue for the first quarter of fiscal 2009.

In addition to other factors described above, Canadian exchange rate fluctuations principally impacted salaries, wages, and employee benefits and purchased transportation and, therefore, impacted our pretax margin and results of operations.

Income taxes decreased to \$1.4 million, with an effective tax rate of 71.5%, for the first quarter of fiscal 2010, from \$3.1 million, with an effective tax rate of 52.7%, for the first quarter of fiscal 2009. As pre-tax net income decreases, our non-deductible expenses, such as per diem expense, will have a greater impact on our effective rate.

As a result of the factors described above, a net income of \$0.6 million was recorded for the first quarter of fiscal 2010, compared to a net income of \$2.8 million for the first quarter of fiscal 2009.

#### Liquidity and Capital Resources

Trucking is a capital-intensive business. We require cash to fund our operating expenses (other than depreciation and amortization), to make capital expenditures and acquisitions, and to repay debt, including principal and interest payments. Other than ordinary operating expenses, we anticipate that capital expenditures for the acquisition of revenue equipment will constitute our primary cash requirement over the next twelve months. We frequently consider potential acquisitions, and if we were to consummate an acquisition, our cash requirements would increase and we may have to modify our expected financing sources for the purchase of tractors. Subject to any required lender approval, we may make acquisitions in the future. Our principal sources of liquidity are cash generated from operations, bank borrowings, capital and operating lease financing of revenue equipment, and proceeds from the sale of used revenue equipment.

As of September 30, 2009, we had on order 460 tractors for delivery through fiscal 2010. These revenue equipment orders represent a capital commitment of approximately \$43.4 million, before considering the proceeds of equipment dispositions. We are using a mixture of cash and off balance sheet debt to purchase our new tractors and are using off balance sheet debt to acquire most of the new trailers. At September 30, 2009, our total balance sheet debt, including capital lease obligations and current maturities less cash, was \$46.5 million, compared to \$81.0 million at September 30, 2008. Our debt-to-capitalization ratio (total balance sheet debt as a percentage of total balance sheet debt plus total stockholders' equity) was 24.2% at September 30, 2009, and 35.7% at September 30, 2008.

We believe we will be able to fund our operating expenses, as well as our current commitments for the acquisition of revenue equipment over the next twelve months, with a combination of cash generated from operations, borrowings

available under our primary credit facility, and lease financing arrangements. We will continue to have significant capital requirements over the long term, and the availability of the needed capital will depend upon our financial condition and operating results and numerous other factors over which we have limited or no control, including prevailing market conditions and the market price of our common stock. However, based on our operating results, anticipated future cash flows, current availability under our credit facility, and sources of equipment lease financing that we expect will be available to us, we do not expect to experience significant liquidity constraints in the foreseeable future.

Table of Contents

Cash Flows

For the three months ended September 30, 2009, net cash provided by operations was \$9.0 million, compared to cash provided by operations of \$19.3 million for the three months ended September 30, 2008. Cash provided by operations decreased due to an increase in trade receivables and prepaid expenses.

Net cash used in investing activities was \$7.5 million for the three months ended September 30, 2009, compared to net cash used in investing activities of \$0.2 million for the three months ended September 30, 2008. Cash used in investing activities includes the net cash effect of acquisitions and dispositions of revenue equipment during each period. Capital expenditures for equipment totaled \$11.7 million for the three months ended September 30, 2009, and \$10.6 million for the three months ended September 30, 2008. We generated proceeds from the sale of property and equipment of \$4.3 million and \$10.4 million for the three months ended September 30, 2009, and September 30, 2008, respectively.

Net cash used in financing activities was \$0.6 million for the three months ended September 30, 2009, compared to \$21.3 million for the three months ended September 30, 2008. The decrease in cash used for financing activities was primarily due to a decrease in payments of long-term debt. Financing activity represents borrowings (new borrowings, net of repayment) and payments of the principal component of capital lease obligations.

Off-Balance Sheet Arrangements

Operating leases have been an important source of financing for our revenue equipment. Our operating leases include some under which we do not guarantee the value of the asset at the end of the lease term ("walk-away leases") and some under which we do guarantee the value of the asset at the end of the lease term ("residual value"). Therefore, we are subject to the risk that equipment value may decline, in which case we would suffer a loss upon disposition and be required to make cash payments because of the residual value guarantees. We were obligated for residual value guarantees related to operating leases of \$78.6 million at September 30, 2009 compared to \$76.8 million at September 30, 2008. We believe that any residual payment obligations will be satisfied by the value of the related equipment at the end of the lease. To the extent the expected value at the lease termination date is lower than the residual value guarantee, we would accrue for the difference over the remaining lease term. We anticipate that going forward we will use a combination of cash generated from operations and operating leases to finance tractor purchases and operating leases to finance trailer purchases.

Primary Credit Agreement

On September 26, 2005, Celadon Group, Inc., Celadon Trucking Services, Inc., and TruckersB2B entered into an unsecured Credit Agreement (the "Credit Agreement") with LaSalle Bank National Association, as administrative agent, and LaSalle Bank National Association, Fifth Third Bank (Central Indiana), and JPMorgan Chase Bank, N.A., as lenders. The Credit Agreement was amended on December 23, 2005, by the First Amendment to Credit Agreement, pursuant to which Celadon Logistics Services, Inc. was added as a borrower to the Credit Agreement. The Credit Agreement was also amended on June 30, 2007 and January 22, 2008 by the Second Amendment to Credit Agreement and Third Amendment to Credit Agreement, respectively. On August 11, 2009, the Credit Agreement was amended and restated (the "Restatement"). Pursuant to the Restatement, (i) the maximum available borrowing limit under the Credit Agreement was reduced from a \$70 million unsecured line to a \$40 million secured line and (ii) certain financial covenants were adjusted as follows: Minimum Fixed Charge ratio to a minimum of .90, Maximum Lease-Adjusted Total Debt to EBITDAR ratio up to 3.25 to 1, Minimum Tangible Net Worth to \$100 million, and the Minimum Asset Coverage ratio to be no less than 1.25 to 1. The Restatement and the financial covenants included therein were in effect starting June 30, 2009. The Credit Agreement, as amended by the Restatement, matures on January 23, 2013. The Credit Agreement is intended to provide for ongoing working capital

needs and general corporate purposes. Borrowings under the Credit Agreement are based, at the option of the Company, on a base rate equal to the greater of the federal funds rate plus and applicable margin between 0.75% and 1.50% and the administrative agent's prime rate or LIBOR plus an applicable margin between 2.25% and 3.00% that is adjusted quarterly based on cash flow coverage. The Credit Agreement is guaranteed by Celadon E-Commerce, Inc., CelCan, and Jaguar, each of which is a subsidiary of the Company.

Table of Contents

Letters of credit are limited to an aggregate commitment of \$15.0 million and a swing line facility has a limit of \$3.0 million. A commitment fee that is adjusted quarterly between 0.375% and 0.5% per annum based on cash flow coverage is due on the daily unused portion of the Credit Agreement. The Credit Agreement contains certain restrictions and covenants relating to, among other things, dividends, tangible net worth, cash flow, mergers, consolidations, acquisitions and dispositions, and total indebtedness. We were in compliance with these covenants at September 30, 2009, and expect to remain in compliance for the foreseeable future. At September 30, 2009, \$6.8 million of our credit facility was utilized as outstanding borrowings and \$4.2 million was utilized for standby letters of credit.

## Contractual Obligations

As of September 30, 2009, our operating leases, capitalized leases, other debts, and future commitments have stated maturities or minimum annual payments as follows:

	Annual Cash Requirements as of September 30, 2009 (in thousands)				
	Payments Due by Period				
	Total	Less than 1 year	1-3 Years	3-5 Years	More than 5 years
Operating leases	\$110,087	\$38,173	\$49,628	\$12,362	\$9,924
Lease residual value guarantees	78,620	5,053	54,154	12,811	6,602
Capital leases(1)	43,662	8,474	33,506	1,682	---
Long-term debt(1)	8,356	1,264	262	6,830	---
Sub-total	\$240,725	\$52,964	\$137,550	\$33,685	\$16,526
Future purchase of revenue equipment	\$43,401	\$15,130	\$28,271	---	---
Employment and consulting agreements(2)	700	700	---	---	---
Standby letters of credit	4,231	4,231	---	---	---
<b>Total</b>	<b>\$289,057</b>	<b>\$73,025</b>	<b>\$165,821</b>	<b>\$33,685</b>	<b>\$16,526</b>

(1) Includes interest.

(2) The amounts reflected in the table do not include amounts that could become payable to our Chief Executive Officer and Chief Financial Officer under certain circumstances if their employment by the Company is terminated.

## Critical Accounting Policies

The preparation of our financial statements in conformity with U.S. generally accepted accounting principles requires us to make estimates and assumptions that impact the amounts reported in our consolidated financial statements and accompanying notes. Therefore, the reported amounts of assets, liabilities, revenues, expenses, and associated disclosures of contingent assets and liabilities are affected by these estimates and assumptions. We evaluate these estimates and assumptions on an ongoing basis, utilizing historical experience, consultation with experts, and other methods considered reasonable in the particular circumstances. Nevertheless, actual results may differ significantly from our estimates and assumptions, and it is possible that materially different amounts would be reported using differing estimates or assumptions. We consider our critical accounting policies to be those that require us to make more significant judgments and estimates when we prepare our financial statements. Our critical accounting policies

include the following:

Table of Contents

**Depreciation of Property and Equipment.** We depreciate our property and equipment using the straight-line method over the estimated useful life of the asset. We generally use estimated useful lives of two to seven years for tractors and trailers, and estimated salvage values for tractors and trailers generally range from 35% to 50% of the capitalized cost. Gains and losses on the disposal of revenue equipment are included in depreciation expense in our statements of operations.

We review the reasonableness of our estimates regarding useful lives and salvage values of our revenue equipment and other long-lived assets based upon, among other things, our experience with similar assets, conditions in the used equipment market, and prevailing industry practice. Changes in our useful life or salvage value estimates, or fluctuations in market values that are not reflected in our estimates, could have a material effect on our results of operations.

Revenue equipment and other long-lived assets are tested for impairment whenever an event occurs that indicates an impairment may exist. Expected future cash flows are used to analyze whether an impairment has occurred. If the sum of expected undiscounted cash flows is less than the carrying value of the long-lived asset, then an impairment loss is recognized. We measure the impairment loss by comparing the fair value of the asset to its carrying value. Fair value is determined based on a discounted cash flow analysis or the appraised or estimated market value of the asset, as appropriate.

**Operating leases.** We have financed a substantial percentage of our tractors and trailers with operating leases. These leases generally contain residual value guarantees, which provide that the value of equipment returned to the lessor at the end of the lease term will be no lower than a negotiated amount. To the extent that the value of the equipment is below the negotiated amount, we are liable to the lessor for the shortage at the expiration of the lease. For all equipment, we are required to recognize additional rental expense to the extent we believe the fair market value at the lease termination will be less than our obligation to the lessor.

In accordance with ASC Topic 840, Accounting for Leases, property and equipment held under operating leases, and liabilities related thereto, are not reflected on our balance sheet. All expenses related to revenue equipment operating leases are reflected on our statements of operations in the line item entitled "Revenue equipment rentals." As such, financing revenue equipment with operating leases instead of bank borrowings or capital leases effectively moves the interest component of the financing arrangement into operating expenses on our statements of operations.

**Claims Reserves and Estimates.** The primary claims arising for us consist of cargo liability, personal injury, property damage, collision and comprehensive, workers' compensation, and employee medical expenses. We maintain self-insurance levels for these various areas of risk and have established reserves to cover these self-insured liabilities. We also maintain insurance to cover liabilities in excess of these self-insurance amounts. Claims reserves represent accruals for the estimated uninsured portion of reported claims, including adverse development of reported claims, as well as estimates of incurred but not reported claims. Reported claims and related loss reserves are estimated by third party administrators, and we refer to these estimates in establishing our reserves. Claims incurred but not reported are estimated based on our historical experience and industry trends, which are continually monitored, and accruals are adjusted when warranted by changes in facts and circumstances. In establishing our reserves we must take into account and estimate various factors, including, but not limited to, assumptions concerning the nature and severity of the claim, the effect of the jurisdiction on any award or settlement, the length of time until ultimate resolution, inflation rates in health care, and in general interest rates, legal expenses, and other factors. Our actual experience may be different than our estimates, sometimes significantly. Changes in assumptions as well as changes in actual experience could cause these estimates to change in the near term. Insurance and claims expense will vary from period to period based on the severity and frequency of claims incurred in a given period.

Table of Contents

Accounting for Income Taxes. Deferred income taxes represent a substantial liability on our consolidated balance sheet. Deferred income taxes are determined in accordance with SFAS No. 109, Accounting for Income Taxes. Deferred tax assets and liabilities are recognized for the expected future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and operating loss and tax credit carry-forwards. We evaluate our tax assets and liabilities on a periodic basis and adjust these balances as appropriate. We believe that we have adequately provided for our future tax consequences based upon current facts and circumstances and current tax law. However, should our tax positions be challenged and not prevail, different outcomes could result and have a significant impact on the amounts reported in our consolidated financial statements.

The carrying value of our deferred tax assets (tax benefits expected to be realized in the future) assumes that we will be able to generate, based on certain estimates and assumptions, sufficient future taxable income in certain tax jurisdictions to utilize these deferred tax benefits. If these estimates and related assumptions change in the future, we may be required to reduce the value of the deferred tax assets resulting in additional income tax expense. We believe that it is more likely than not that the deferred tax assets, net of valuation allowance, will be realized, based on forecasted income. However, there can be no assurance that we will meet our forecasts of future income. We evaluate the deferred tax assets on a periodic basis and assess the need for additional valuation allowances.

Federal income taxes are provided on that portion of the income of foreign subsidiaries that is expected to be remitted to the United States.

Seasonality

In the trucking industry, revenue generally decreases as customers reduce shipments during the winter holiday season and as inclement weather impedes operations. At the same time, operating expenses generally increase, with fuel efficiency declining because of engine idling and weather, creating more equipment repairs. We have substantial operations in the Midwestern and Eastern United States and Canada. For the reasons stated, in those geographic regions in particular, third quarter net income historically has been lower than net income in each of the other three quarters of the year excluding charges. Our equipment utilization typically improves substantially between May and October of each year because of seasonal increased shipping and better weather. Also, during September and October, business generally increases as a result of increased retail merchandise shipped in anticipation of the holidays.

Inflation

Many of our operating expenses, including fuel costs, revenue equipment, and driver compensation, are sensitive to the effects of inflation, which result in higher operating costs and reduced operating income. The effects of inflation on our business during the past three years were most significant in fuel. The effects of inflation on revenue were not material in the past three years. We have limited the effects of inflation through increases in freight rates and fuel surcharges.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We experience various market risks, including fluctuations in interest rates, variability in currency exchange rates, and fuel prices. We have established policies, procedures and internal processes governing our management of market risks and the use of financial instruments to manage our exposure to such risks.

Interest Rate Risk. We are exposed to interest rate risk principally from our primary credit facility. The credit facility carries a maximum variable interest rate of either the bank's base rate or LIBOR plus 3.00%. At September 30, 2009 the interest rate for revolving borrowings under our credit facility was LIBOR plus 1.500%, an effective rate of

4.75%. At September 30, 2009, we had \$6.8 million variable rate term loan borrowings outstanding under the credit facility. A hypothetical 10% increase in the bank's base rate and LIBOR would be immaterial to our net income.

Table of Contents

Currency Exchange Rate Risk. We are subject to variability in foreign currency exchange rates in our international operations. Exposure to this variability is periodically managed primarily through the use of natural hedges, whereby funding obligations and assets are both managed in the local currency. We, from time-to-time, enter into currency exchange agreements to manage our exposure arising from fluctuating exchange rates related to specific and forecasted transactions. We operate this program pursuant to documented corporate risk management policies and do not enter into derivative transactions for speculative purposes.

Our currency risk consists primarily of foreign currency denominated firm commitments and forecasted foreign currency denominated intercompany and third-party transactions. At September 30, 2009, we had outstanding foreign exchange derivative contracts in notional amounts of \$2.3 million with a fair value of these contracts approximately \$0.1 million less than the original contract value. Derivative gains/(losses), initially reported as a component of other comprehensive income, are reclassified to earnings in the period when the forecasted transaction affects earnings.

Assuming revenue and expenses for our Canadian operations identical to that in the first quarter of fiscal 2010 (both in terms of amount and currency mix), we estimate that a \$0.01 decrease in the Canadian dollar exchange rate would reduce our annual net income by approximately \$32,000. Also, we estimate that a \$0.01 decrease in the Mexican peso exchange rate would reduce our annual net income by approximately \$24,000.

Commodity Price Risk. Shortages of fuel, increases in prices, or rationing of petroleum products can have a materially adverse effect on our operations and profitability. Fuel is subject to economic, political, and market factors that are outside of our control. Historically, we have sought to recover a portion of short-term increases in fuel prices from customers through the collection of fuel surcharges. However, fuel surcharges do not always fully offset increases in fuel prices. As of September 30, 2009, we had no derivative financial instruments in place to reduce our exposure to fuel price fluctuations.

Item 4. Controls and Procedures

As required by Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the Company has carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. This evaluation was carried out under the supervision and with the participation of the Company's management, including our Chief Executive Officer and our Chief Financial Officer. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this Quarterly Report on Form 10-Q. There were no changes in the Company's internal control over financial reporting that occurred during the first quarter of fiscal 2010 that have materially affected, or that are reasonably likely to materially affect, the Company's internal control over financial reporting.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed in Company reports filed under the Exchange Act is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer as appropriate, to allow timely decisions regarding disclosures.

The Company has confidence in its disclosure controls and procedures. Nevertheless, the Company's management, including the Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures will prevent all errors or intentional fraud. An internal control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of such internal controls are

met. Further, the design of an internal control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all internal control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

Part II. Other Information

Item 1. Legal Proceedings

There are various claims, lawsuits, and pending actions against the Company and its subsidiaries which arose in the normal course of the operations of its business. The Company believes many of these proceedings are covered in whole or in part by insurance and that none of these matters will have a material adverse effect on its consolidated financial position or results of operations in any given period.

On August 8, 2007, the 384th District Court of the State of Texas situated in El Paso, Texas, rendered a judgment against CTSI, for approximately \$3.4 million in the case of *Martinez v. Celadon Trucking Services, Inc.*, which was originally filed on September 4, 2002. The case involves a workers' compensation claim of a former employee of CTSI who suffered a back injury as a result of a traffic accident. CTSI and the Company believe all actions taken were proper and legal and contend that the proper and exclusive place for resolution of this dispute was before the Indiana Workers' Compensation Board. While there can be no certainty as to the outcome, the Company believes that the ultimate resolution of this dispute will not have a materially adverse effect on its consolidated financial position, cash flows, or results of operations. CTSI filed an appeal of the decision to the Texas Court of Appeals in October 2007. Appellate briefs have been filed by Celadon and the plaintiff and the ATA Litigation Center has filed an amicus curiae brief in support of Celadon's position. We are waiting to hear if the Court of Appeals will entertain oral argument on the briefs or simply render a decision on the briefs alone.

Item 1A. Risk Factors

While we attempt to identify, manage, and mitigate risks and uncertainties associated with our business, some level of risk and uncertainty will always be present. Our Form 10-K for the year ended June 30, 2009, in the section entitled Item 1A. Risk Factors, describes some of the risks and uncertainties associated with our business. These risks and uncertainties have the potential to materially affect our business, financial condition, results of operations, cash flows, projected results, and future prospects.

Item 6. Exhibits

- 3.1 Amended and Restated Certificate of Incorporation of the Company, effective January 12, 2006. (Incorporated by reference to Exhibit 3.1 to the Company's Quarterly Report on Form 10-Q for the quarterly period ending December 31, 2005, filed with the SEC on January 30, 2006.)
- 3.2 Certificate of Designation for Series A Junior Participating Preferred Stock. (Incorporated by reference to Exhibit 3.3 to the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2000, filed with the SEC on September 28, 2000.)
- 3.3 Amended and Restated By-laws of the Company. (Incorporated by reference to Exhibit 3 to the Company's Current Report on Form 8-K filed with the SEC on July 3, 2006.)
- 4.1 Amended and Restated Certificate of Incorporation of the Company, effective January 12, 2006. (Incorporated by reference to Exhibit 3.1 to the Company's Quarterly Report on Form 10-Q for the quarterly period ending December 31, 2005, filed with the SEC on January 30, 2006.)
- 4.2 Certificate of Designation for Series A Junior Participating Preferred Stock. (Incorporated by reference to Exhibit 3.3 to the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2000, filed with the SEC on

- September 28, 2000.)
- 4.3 Rights Agreement, dated as of July 20, 2000, between Celadon Group, Inc. and Fleet National Bank, as Rights Agent. (Incorporated by reference to Exhibit 4.1 to the Company's Registration Statement on Form 8-A, filed with the SEC on July 20, 2000.)
- 4.4 Amended and Restated By-laws of the Company. (Incorporated by reference to Exhibit 3 to the Company's Current Report on Form 8-K filed with the SEC on July 3, 2006.)
- 10.24 Credit Agreement (amendment and restatement) dated August 11, 2009, among Celadon Group, Inc., Bank of America, N.A., and the other lenders party thereto.\*
- 31.1 Certification pursuant to Item 601(b)(31) of Regulation S-K, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, by Stephen Russell, the Company's Chief Executive Officer.\*
- 31.2 Certification pursuant to Item 601(b)(31) of Regulation S-K, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, by Paul Will, the Company's Chief Financial Officer.\*
- 32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, by Stephen Russell, the Company's Chief Executive Officer.\*
- 32.2 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, by Paul Will, the Company's Chief Financial Officer.\*
