UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON D.C. 20549
FORM 10-K
ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2007
Commission file number 1-13004
CITIZENS, INC.
(Exact name of registrant as specified in its charter)

Colorado	**84-0755371**
(State of incorporation)	(IRS Employer Identification No.)
400 East Anderson Lane, Austin, Texas	**78752**
(Address of principal executive offices)	(Zip Code)

Registrant s telephone number, including area code: (512) 837-7100
Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Class A Common Stock	**New York Stock Exchange**

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. o Yes þ No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. o Yes þ No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirement for the past 90 days. þ Yes o No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant s knowledge in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. þ

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o	Accelerated filer þ	Non-accelerated filer o (Do not check if a smaller reporting company)	Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). o Yes þ No

As of the last business day of the registrant s most recently completed second fiscal quarter (June 30, 2007), the aggregate market value of the Class A voting stock held by non-affiliates of the registrant was approximately $242,710,000.

Number of shares of common stock outstanding as of March 1, 2007:
Class A: 43,070,092
Class B: 1,001,714

DOCUMENTS INCORPORATED BY REFERENCE

Part III of this Report incorporates certain portions of the definitive proxy materials of the registrant in respect to its 2008 Annual Meeting of Shareholders.

FORWARD-LOOKING STATEMENTS

Certain statements contained in this Annual Report on Form 10-K are not statements of historical fact and constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act (the Act), including, without limitation, statements specifically identified as forward-looking statements within this document. Many of these statements contain risk factors as well. In addition, certain statements in future filings by the Company with the Securities and Exchange Commission, in press releases, and in oral and written statements made by or with the approval of the Company which are not statements of historical fact constitute forward-looking statements within the meaning of the Act. Examples of forward-looking statements, include, but are not limited to: (i) projections of revenues, income or loss, earnings or loss per share, the payment or non-payment of dividends, capital structure, and other financial items, (ii) statements of our plans and objectives by our management or Board of Directors including those relating to products or services, (iii) statements of future economic performance and (iv) statements of assumptions underlying such statements. Words such as believes, anticipates, expects, intends, targeted, may, will and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements.

Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those contemplated by the forward-looking statements. Factors that could cause the Company s future results to differ materially from expected results include, but are not limited to:

- *Changes in foreign and U.S. general economic conditions, including the performance of financial markets and interest rates;*
- *Changes in consumer behavior, which may affect the Company s ability to sell its products and retain business;*
- *The timely development of and acceptance of new products and perceived overall value of these products and services by existing potential customers;*
- *Fluctuations in experience regarding current mortality, morbidity, persistency and interest rates relative to expected amounts used in pricing the Company s products;*
- *Changes in assumptions related to deferred acquisition costs and the value of business acquired;*
- *Regulatory, accounting or tax changes that may affect the cost of, or the demand for, the Company s products or services;*

A concentration of business from persons residing in Latin America and the Pacific Rim; and, the success of the Company at managing the risks involved in the foregoing. Such forward-looking statements speak only as of the date on which such statements are made, and the Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made to reflect the occurrence of unanticipated events.

We make available, free of charge, through our Internet website (http://www.citizensinc.com), our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Section 16 reports filed by officers and directors, news releases, and, if applicable, amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as soon as reasonably practicable after we electronically file such reports with, or furnish such reports to, the Securities and Exchange Commission. We are not including any of the information contained on our website as part of, or incorporating it by reference into, this Annual Report on Form 10-K.

PART I

ITEM 1. Business

Overview

We are an insurance holding company serving the life insurance needs of individuals in the United States and in more than 35 countries around the world. We pursue a strategy of offering ordinary whole life insurance with a focus on cash accumulation and final expense insurance products in niche markets where we believe we are able to achieve competitive advantages. Our core operations include issuing and servicing:

- U.S. Dollar-denominated ordinary whole life insurance policies predominantly to high net worth, high income foreign residents, principally in Latin America and the Pacific Rim, through approximately 2,600 independent marketing consultants;

Table of Contents

ordinary whole life insurance policies to middle income households in the Midwest and the southern United States through approximately 600 independent marketing consultants; and

final expense and limited liability property policies to middle to lower income households in Louisiana through approximately 300 employee agents in our home service distribution channel.

We have provided our insurance products internationally since 1975 and domestically since 1969. We believe we are one of the leading writers of U.S. Dollar-denominated ordinary whole life insurance outside of the United States. In October 2004, we entered the home service distribution channel in Louisiana through our acquisition of Security Plan Life Insurance Company (SPLIC) and its subsidiary, Security Plan Fire Insurance Company (SPFIC), (collectively referred to as Security Plan), a provider of final expense ordinary whole life insurance and limited liability property insurance.

We believe that the foreign markets we target have a relatively limited number of competitors and that the domestic markets we target are underserved by the life insurance industry, and that these markets therefore offer attractive opportunities for expansion. We capitalize on the experience of our management team in our marketing operations and achieve economies of scale in our administrative operations. We seek to generate above-average returns using knowledge of our niche markets and our well-established distribution channels. We believe that our underwriting processes, policy terms and pricing practices enable us to generate meaningful gross profit margins.

We provide underwriting, investment and administrative functions through approximately 90 employees in our executive offices in Austin, Texas and approximately 65 employees in Louisiana, primarily concentrated in Donaldsonville.

We were formed in 1969 by our Chairman, Harold E. Riley. Prior to our formation, Mr. Riley had many years of experience in the international and domestic life insurance business. Our business has grown significantly, both internationally and domestically, in recent years. Revenues rose from $142.1 million in 2005 to $173.8 million in 2007. During the five years ended December 31, 2007, our assets grew from $390.1 million to $787.9 million. Total stockholders equity increased from $127.0 million at December 31, 2003 to $176.2 million at December 31, 2007. See Item 6. Selected Financial Data in this report.

Our Operating Segments

Our business is comprised of three primary operating business segments:

- Life Insurance;
- Home Service Insurance; and
- Other Non-insurance Enterprises.

See Note 9 of the Notes to Consolidated Financial Statements for operating results of our segments, for each of the years ended December 31, 2007, 2006 and 2005.

Life Insurance

Our Life Insurance segment consists of issuing ordinary whole life insurance in U.S. Dollar-denominated amounts to foreign residents and domestically through independent marketing firms and consultants. For the majority of our business, we retain only the first $100,000 of risk on any one life.

International

We focus on sales of U.S. Dollar-denominated ordinary whole life insurance policies to high net worth, high income residents in Latin America and the Pacific Rim. We have successfully participated in the foreign marketplace since 1975. We believe positive attributes of our international insurance business include:

policies are typically larger face amounts than in our U.S. operations, resulting in lower underwriting and administrative costs per policy;

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

- premiums are paid annually rather than monthly or quarterly, which saves us administrative expenses, accelerates cash flow and results in lower policy lapse rates than premiums with more frequently scheduled payments;
- persistency is generally higher than U.S. policies;
- our mortality rates are as good or better than those in the United States because our foreign insureds are high net worth individuals, with lifestyles less prone to early death than the general population, in the top income brackets in their respective countries; and
- we do not advance commissions, so we do not have financial exposure in the event monies are advanced and insurance revenues do not cover the advances.

We have implemented several policies and procedures to reduce the risks of asset and premium loss in our international operations. We have no offices, employees or assets outside of the United States. All of our premiums must be paid in U.S. Dollars through a U.S. financial institution by check, wire or credit card. The policies we issue contain limitations on benefits for certain causes of death, such as homicide and careless driving. We have also developed disciplined underwriting criteria, which include medical reviews of applicants and background and reference checks. We have a claims policy that requires an investigation of substantially all death claims. Additionally, we perform background reviews and reference checks of prospective marketing firms and consultants.

We accept applications for international insurance policies submitted by independent marketing firms and consultants. These persons specialize in marketing life insurance products and generally have several years of insurance marketing experience. We maintain standard contracts with the independent marketing firms pursuant to which they provide recruitment, training and supervision of their managers and associates in the placement of our products; however, all associates of these firms also contract directly with us as independent contractors and receive their compensation directly from us. Accordingly, should an arrangement between any independent marketing firm and us be terminated for any reason, we believe we would continue with the existing marketing arrangements with the associates of these firms without a material loss of sales. Our standard agreement with independent marketing firms and consultants provides that they are independent contractors responsible for their expenses and they are the representative of the prospective insured. In addition, the marketing firms also guarantee any debts of their associates to us. The marketing firms receive commissions on all new and renewal policies placed by them or their associates. All of these contracts provide that the independent marketing firms and consultants are responsible for compliance with local laws.

We provide training materials to our independent marketing firms and consultants and if they are initially successful in obtaining certain levels of policy sales, we will provide training for them at our facility near Austin, Texas. We also provide selected marketing materials to these firms and consultants.

Insurance policy applications and premium payments in U.S. Dollars are submitted by the independent consultants to us and we review the applications in our home offices in Austin, Texas. We require medical exams of our prospective insureds through a network of physicians we have developed. Approvals for policy issuance are made in our Austin office and policies are issued and delivered to our independent consultants, who deliver the policies to the insureds.

The following table sets forth, by territory, our total percentages of direct collected premiums from our international life insurance business for the periods indicated. The information is presented in accordance with statutory accounting practices prescribed by the state of Colorado, the state of domicile of our subsidiary that writes all of our international business, CICA Life Insurance Company of America (CICA).

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Country	Years ended December 31, 2007		2006 (In thousands)		2005	
Colombia	$ 24,352	26.2%	$ 22,879	28.0%	$ 20,572	30.1%
Taiwan	12,567	13.5	10,077	12.3	7,008	10.2
Venezuela	11,631	12.5	8,907	10.9	7,178	10.5
Ecuador	9,641	10.4	7,410	9.1	5,259	7.7
Argentina	9,099	9.8	8,975	11.0	8,419	12.3
Other Non-U.S.	25,525	27.5	23,500	28.7	20,008	29.2
Total	$ 92,815	100.0%	$ 81,748	100.0%	$ 68,444	100.0%

The ordinary whole life policies issued to residents of foreign countries during 2007 had an average face amount of approximately $64,000.

Domestic

In the Midwest and the southern United States, we seek to serve middle income households through the sale of cash accumulation ordinary whole life insurance products. The majority of this business has been blocks of business of insurance companies we have acquired over the past 15 years.

Our distribution strategy is geared towards attracting marketing consultants, comprised primarily of part-time, second-career sales associates (such as teachers, coaches, community leaders and others), in rural and urban areas. We are increasing recruitment of new consultants in selected markets. In the United States, our domestic sales and marketing is conducted predominantly through independent marketing consultants.

Our product strategy is to introduce our cash accumulation ordinary whole life products to newly appointed independent marketing consultants of companies we have acquired, while continuing to service the needs of acquired policyholders. The average policy size for this market is $25,000 to $50,000, with sales emphasis on the living benefit features embedded in our products.

Over the past three years, new product sales have trended downward as we have tightened underwriting on business that did not meet our profitability objectives.

The following table sets forth our direct collected premiums by state for the periods indicated, in accordance with statutory accounting practices prescribed by the states of domicile of our insurance company subsidiaries.

State	Years ended December 31, 2007		2006 (In thousands)		2005	
Texas	$ 7,481	39.8%	$ 7,962	39.6%	$ 9,172	38.6%
Missouri	2,309	12.3	2,519	12.5	2,648	11.1
Kentucky	2,224	11.8	2,436	12.1	2,936	12.3
Oklahoma	2,136	11.4	2,363	11.8	3,481	14.6
Other States	4,635	24.7	4,829	24.0	5,555	23.4
Total	$ 18,785	100.0%	$ 20,109	100.0%	$ 23,792	100.0%

A number of domestic life insurance companies we have acquired also had issued blocks of accident and health insurance policies, which we did not consider to be a core part of our business. Effective January 1, 2004, we entered into a coinsurance agreement with an unaffiliated insurance company under which it assumed substantially all of our

accident and health policies. The premium amounts ceded under the coinsurance agreement in the years ended December 31, 2007, 2006 and 2005 were $8.2 million, $8.9 million and $10.8 million, respectively.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Home Service Insurance

On October 1, 2004, following our acquisition of Security Plan, we established our Home Service Insurance segment. SPLIC has conducted its operations since 1948. It focuses on the life insurance needs of the middle to lower income market in Louisiana. SPLIC predominantly sells ordinary whole life products to provide a means of funding individuals final expenses, primarily consisting of funeral and other burial costs. The policies are sold and serviced through SPLIC s home service marketing distribution system of approximately 300 employee agents who work full time on a route system to sell policies, collect premiums and service policyholders. Over its history, SPLIC s life insurance sales have been supplemented by the acquisition of numerous home service companies in Louisiana. The face amount of SPLIC s average life insurance policy is relatively small, approximately $7,000 per policy issued in 2007, and therefore the underwriting performed on these applications is limited.

SPLIC s premium income decreased each year from 2001 until we acquired it on October 1, 2004. We replaced SPLIC s marketing leadership in 2005 and believe that our renewed emphasis on sales and marketing have reversed the decline in the premium base and serves as a foundation from which to expand. The new premium growth over the past two years occurred despite the hurricanes in Louisiana in 2005, which significantly disrupted SPLIC s customer base.

We offer limited liability, named peril property coverage to middle to lower income residents of Louisiana through SPFIC, which utilizes many of the same employee agents as SPLIC and functions primarily to generate leads for SPLIC s life insurance sales. SPFIC s policies provide maximum coverage on any one dwelling and contents of $30,000, and content only coverage and dwelling only coverage is limited to $20,000. At December 31, 2007, SPFIC had total assets of approximately $5.8 million and revenues for the year then ended of approximately $5.1 million.

Other Non-Insurance Enterprises

Other Non-insurance Enterprises includes Computing Technology, Inc., which provides data processing services to the Company, Insurance Investors, Inc., which provides aviation transportation to the Company, and Funeral Homes of America, a small Louisiana funeral home. This segment also includes the results of Citizens, the parent Company.

Our Products

Life Insurance

International. We offer several ordinary whole life insurance products designed to meet the needs of our non-U.S. policy owners. These policies have been structured to provide:

- U.S. Dollar-denominated cash values that accumulate, beginning in the first policy year, to a policyholder during his or her lifetime;
- premium rates that are competitive with or better than most foreign local companies;
- a hedge against local currency inflation;
- protection against devaluation of foreign currency;
- capital investment in a more secure economic environment (i.e., the United States); and
- lifetime income guarantees for an insured or for surviving beneficiaries.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Our international products have living benefit features. Every policy contains guaranteed cash values and is participating (i.e., provides an annual cash dividend). The major portion of each premium payment is used to provide insurance protection and build guaranteed cash values, while a lesser portion is used for retirement benefit accumulation. Once a policy owner pays the annual premium and the policy is issued, we immediately pay a cash dividend to the owner. The policy owner has several options with regard to the dividend, including the right to assign dividends to our stock investment plan that is administered in the United States by our unaffiliated transfer agent and is registered under the Securities Act of 1933 (the Securities Act).

Domestic. The life insurance products we sell domestically focus primarily on living needs and provide benefits focused toward accumulating money for the insured. The features of our domestic life insurance products include:

- cash accumulation/living benefits;
- tax-deferred interest earnings;
- guaranteed lifetime income at age 65;
- monthly income for surviving family members;
- accidental death benefit coverage options; and
- an option to waive premium payments in the event of disability.

Our life insurance products are principally designed to address the insured s concern about outliving his or her monthly income, while at the same time providing death benefits in case of an early demise. The primary purpose of our product portfolio is to help the insured create capital for needs such as retirement income, children s higher educational funds, business opportunities, emergencies and healthcare needs.

Home Service Insurance

Our home service insurance products consist primarily of small face amount ordinary whole life policies, which are designed to fund final expenses for the insured, primarily consisting of funeral and burial costs. To a much lesser extent, our Home Service Insurance segment sells limited liability, named peril property policies covering dwellings and contents. We intend to continue emphasis upon growth within this segment via direct sales and acquisitions.

Operations and Technology

Our administrative operations are conducted primarily at our executive offices in Austin, Texas through approximately 90 administrative, operating and underwriting personnel. Operations of Security Plan are conducted to a large degree from our district offices and support center in Donaldsonville, Louisiana through approximately 65 operations personnel. During 2008, continued consolidation of certain administrative functions is expected. At our executive offices, we perform policy design, marketing oversight, underwriting, accounting, customer service and administration of our investment portfolios.

Our senior management has a history in insurance company application system design and implementation. Since the mid-1960 s, our senior management has been leading development of evolving insurance applications. We have a single integrated system for our entire Company, which is a centrally-controlled, mainframe-based administrative system. Since early 2005, we have been converting Security Plan s administrative system to our processing system. The transition was substantially completed at December 31, 2007. Functions of our administrative system include policy set up, administration, billing and collections, commission calculation, valuation, automated audit functions, storage backup and related tasks. Each company we acquire is converted onto our administrative system. This system has been in place for many years, and we believe it is a significant asset to us. We update our administrative system on an ongoing basis. This system is also capable of significant expansion without substantial capital outlay or increase in staff. Therefore, we believe we can achieve additional growth without costly administrative system expenditures, delays or failures or the addition of substantial amounts of staff.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Competition

The life insurance business is highly competitive. We compete with a large number of stock and mutual life companies both internationally and domestically, as well as with financial institutions that offer insurance products. There are more than 1,000 life insurance companies in the United States, some of which also provide insurance to foreign residents.

Given the variety of the foreign markets in which we provide ordinary whole life insurance, it is not possible to ascertain our competitive position. We face competition primarily from companies formed and operated in the country in which the insureds reside, from companies that operate in the same manner as we do and from companies that are foreign to the countries in which policies are sold, but issue insurance policies denominated in the local currency of those countries. Competitors in our international markets who operate in the same manner as we do include National Western Life Insurance Company, Best Meridian Insurance Company and, to a lesser extent, Pan American Life Insurance Company and American International Group, although these companies tend to focus on non-traditional life insurance and annuity products. A substantial amount of companies may be deemed to have a competitive advantage over us due to their significantly greater financial resources, histories of successful operations and larger marketing forces. We believe that our experience, combined with the special features of our policies, allow us to compete effectively in pursuing new business.

Because premiums on our international policies must be paid in U.S. Dollars drawn on U.S. banks, and we pay claims in U.S. Dollars, we provide a product that is different from the products provided by foreign-domiciled companies. Our international policies are usually acquired by significant net worth persons in the top income brackets of their respective countries. The policies sold by our local competitors are generally offered broadly and are priced based on the mortality of the entire population of the geographic region. Because of the predominance of lower incomes in most of these countries, the mortality experience tends to be higher on average compared to the United States, causing mortality charges that are higher than they would be if they were based on the mortality experience of only the local population in the upper net worth and income categories. Additionally, the assets backing the reserves for the foreign company policies must be substantially invested in the respective countries and, therefore, are exposed to the inflationary risks and social or economic crises that tend to impact many foreign countries.

The U.S. life insurance industry is a mature industry that, in recent years, has experienced little to no growth. Competition is intense because the life insurance industry is consolidating, with larger, more efficient and more effective organizations emerging from consolidation. Additionally, legislation became effective in the United States in the year 2000 that permits commercial banks, insurance companies and investment banks to combine. These factors have increased competitive pressures in general.

Many domestic life insurance companies have significantly greater financial, marketing forces and other resources, longer business histories and more diversified lines of insurance products than we do. We also face competition from companies marketing in person as well as with direct mail sales campaigns. Although we may be at a competitive disadvantage to these entities, we believe that our premium rates and policy features are generally competitive with those of other life insurance companies selling similar types of ordinary whole life insurance.

In the Home Service segment, we face competition in Louisiana from other companies that specialize in home service distribution of insurance. Competitors include American General Life Insurance Company, American National Life Insurance Company, Kilpatrick Life Insurance Company, Monumental Life Insurance Company and Union National Life Insurance Company. SPLIC also competes indirectly with other domestic life insurance companies operating in Louisiana. Security Plan competes based upon its emphasis on personal service to its customers.

Investments

State insurance statutes prescribe the quality and percentage of the various types of investments that may be made by insurance companies and generally permit investment in qualified state, municipal, federal and foreign government obligations, high quality corporate bonds, preferred and common stock, real estate and mortgage loans within certain specified percentages.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

The administration of our investment portfolios is handled by our management, pursuant to board-approved investment guidelines, with all trading activity approved by a committee of the respective boards of directors of our insurance company subsidiaries. The guidelines used require that bonds, both government and corporate, are of high quality and comprise a majority of the investment portfolio. The assets selected are intended to mature in accordance with the average maturity of the insurance products and to provide the cash flow for our insurance company subsidiaries to meet their respective policyholder obligations.

Valuation of Investments in Fixed Maturity and Equity Securities

At December 31, 2007, investments in fixed maturity and equity securities were 91.6% of our total investments. All of our fixed maturities were classified as available-for-sale securities at December 31, 2007 and thus are reported on our consolidated financial statements at fair value; equity securities are also reported at fair value. We had no fixed maturity or equity securities that were classified as trading securities at December 31, 2007.

At December 31, 2007, 68.3% of our fixed maturity securities were invested in U.S. Government-sponsored enterprises or securities backed by the U.S. Government. We evaluate the carrying value of our fixed maturity and equity securities at least quarterly. A decline in the fair value of any fixed maturity or equity security below cost that is deemed other-than-temporary is charged to earnings resulting in the establishment of a new cost basis for the security. The new cost basis is not changed for subsequent recoveries in the fair value of the fixed maturity or equity security. With the exception of Security Plan, virtually all of our subsidiaries fixed maturity investments are in U.S. Government or U.S. Government-sponsored enterprises or U.S. Government instruments. Security Plan has significant investments in corporate and municipal bonds. Based upon our emphasis on investing in fixed maturity securities primarily composed of obligations of U.S. Government-sponsored corporations, our intent and ability to hold temporarily impaired fixed maturities until recovery, and our analysis of whether declines in fair value below cost are temporary or other-than-temporary, management believes that our investments in fixed maturity at December 31, 2007 were not impaired, and no other-than-temporary losses needed to be recorded. The Company s equity securities consist of mutual funds acquired in 2007, and thus any declines in value have recently arisen. The Company will continue to monitor these investments. At December 31, 2007, there were no other-than-temporary impairments.

Gross unrealized losses on fixed maturities available-for-sale amounted to $4.7 million as of December 31, 2007 and $10.9 million as of December 31, 2006. The decrease in unrealized losses from year end 2006 to year end 2007 was primarily due to decreases in market interest rates during 2007. Gross unrealized losses on equity securities amounted to $1.2 million at December 31, 2007. Information on unrealized gains and losses by category is set forth in our consolidated financial statements, Note 2 Investments in the Notes to the Consolidated Financial Statements. The following table shows the carrying value of our investments by investment category and cash and cash equivalents, and the percentage of each to total invested assets.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

The following table shows the distribution of the credit ratings of our portfolio of fixed maturity securities by carrying value as of December 31, 2007.

	December 31, 2007	
	Carrying Value	Percent of Total
	(In thousands)	
Fixed maturity securities:		
U.S. Government-sponsored corporations and U.S. Government agencies (1)	$ 292,951	48.3%
Mortgage-backed (2)	54,718	9.0
Corporate	84,051	13.9
Municipal bonds	64,639	10.7
Public utilities	3,942	0.6
Foreign governments	125	
Total fixed maturity securities	500,426	82.5
Cash and cash equivalents	21,123	3.5
Short-term investments	17,650	2.9
Other investments:		
Policy loans	25,490	4.2
Equity securities	35,669	5.9
Mortgage loans	291	
Real estate and other long-term investments	5,770	1.0
Total cash, cash equivalents and investments	$ 606,419	100.0%

(1) Includes U.S. Treasury securities of $12,991 and U.S. Government-sponsored corporations of 279,960.

Reinsurance

As is customary among insurance companies, our insurance company subsidiaries reinsure with other companies portions of the life insurance risks they underwrite. A primary purpose of reinsurance agreements is to enable an insurance company to reduce the amount of risk on any particular policy and, by reinsuring the amount exceeding the maximum amount the insurance company is willing to retain, to write policies in amounts larger than it could without such agreements. Even though a portion of the risk may be reinsured, our insurance company subsidiaries remain liable to perform all the obligations imposed by the policies issued by them and could be liable if their reinsurers were unable to meet their obligations under the reinsurance agreements.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

We believe that we have established appropriate reinsurance coverage based upon our net retained insured liabilities compared to our surplus.

The effect of reinsurance on premiums is as follows:

	Years ended December 31,		
	2007	**2006**	**2005**
		(In thousands)	
Direct premiums	$ 150,566	139,181	129,570
Reinsurance assumed	1,462	1,126	571
Reinsurance ceded	(11,123)	(11,811)	(13,867)
Net premiums	$ 140,905	128,496	116,274

CICA monitors the solvency of its reinsurers in seeking to minimize the risk of loss in the event of a failure by a reinsurer. The primary reinsurers of CICA are large, well capitalized entities.

The effect of reinsurance on life insurance inforce is as follows:

	At December 31,		
	2007	**2006**	**2005**
		(In millions)	
Direct written life insurance inforce	$ 4,168	3,971	3,687
Reinsurance assumed	644	670	593
Reinsurance ceded	(274)	(259)	(222)
Net life insurance inforce	$ 4,538	4,382	4,058

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Virtually all of the Company s on-credit accident and health insurance is reinsured with and administered by Texas International Life Insurance Company (TILIC), an unaffiliated party. The reinsurance recoverable under this agreement are collateralized by assets held in a trust for the benefit of the Company.

The Company monitors the credit ratings of our life and property reinsurers. The ratings by A.M. Best range from B+ to A+.

SPFIC had reinsurance agreements in place to protect it from catastrophic events such as Hurricanes Katrina and Rita that struck Louisiana in 2005. The agreements in place during 2005 provided that SPFIC bore responsibility for the first $250,000 of incurred claims. Reinsurers indemnified SPFIC for losses in excess of $250,000 up to $7.1 million per event. Any amount over that was SPFIC s responsibility. This ceiling proved to be inadequate for the 2005 hurricanes. For calendar year 2006, SPFIC elected to increase the amount of first and second event catastrophe reinsurance to $10.0 million per event and raise the retention level to $500,000 per event. Thus, the first $500,000 of incurred claims and any claims in excess of $10.0 million were SPFIC s responsibility. The same reinsurance levels are in place for 2007. The reinsurance premium for first event catastrophe reinsurance was $840,000 in 2007 and $799,000 in 2006.

Regulation

Our U.S. insurance operations are subject to a wide variety of laws and regulations. State insurance laws establish supervisory agencies with broad regulatory authority to regulate most aspects of our U.S. insurance businesses, and our insurance subsidiaries are regulated by the insurance departments of each of the states in which they are licensed. U.S. laws, such as the U.S.A. Patriot Act of 2001, the Gramm-Leach-Bliley Act of 1999, the International Money Laundering Abatement and Financial Anti-Terrorism Act of 2001, and the Sarbanes-Oxley Act of 2002, are examples of U.S. regulation that affect our business. Our insurance products and thus our businesses also are affected by U.S. federal, state and local tax laws.

The purpose of the laws and regulations that affect our insurance business is primarily to protect our insureds and not our stockholders. Many of the laws and regulations to which we are subject are regularly re-examined, and existing or future laws and regulations may become more restrictive or otherwise adversely affect our operations. In addition, insurance regulatory authorities (including state law enforcement agencies and attorneys general) periodically make inquiries and regularly conduct examinations regarding compliance by us and our subsidiaries with insurance, and other laws and regulations regarding the conduct of our insurance businesses. We cooperate with such inquiries and examinations and take corrective action when warranted.

At the present time, our insurance subsidiaries are collectively licensed to transact business in 32 states. We have insurance subsidiaries domiciled in the states of Colorado, Louisiana and Texas. Our U.S. insurance subsidiaries are licensed and regulated in all jurisdictions in which they conduct insurance business. The extent of this regulation varies, but most jurisdictions have laws and regulations governing the financial condition of insurers, including standards of solvency, types and concentration of investments, establishment and maintenance of reserves, credit for reinsurance and requirements of capital adequacy, and the business conduct of insurers, including marketing and sales practices and claims handling. In addition, statutes and regulations usually require the licensing of insurers and their agents, the approval of policy forms and related materials and the approval of rates for certain types of insurance products.

All U.S. jurisdictions in which our U.S. insurance subsidiaries conduct insurance business have enacted legislation that requires each U.S. insurance company in a holding company system, except captive insurance companies, to register with the insurance regulatory authority of its jurisdiction of domicile and to furnish that regulatory authority financial and other information concerning the operations of, and the interrelationships and transactions among, companies within its holding company system that may materially affect the operations, management or financial condition of the insurers within the system. These laws and regulations also regulate transactions between insurance companies and their parents and affiliates. Generally, these laws and regulations require that all transactions within a holding company system between an insurer and its affiliates be fair and reasonable and that the insurer s statutory capital and surplus following any transaction with an affiliate be both reasonable in relation to its outstanding liabilities and adequate to its financial needs. Statutory surplus is the excess of admitted assets over the sum of

statutory liabilities and capital. For certain types of agreements and transactions between an insurer and its affiliates,

these laws and regulations require prior notification to, and non-disapproval or approval by, the insurance regulatory authority of the insurer s jurisdiction of domicile.

The payment of dividends or other distributions to us by our U.S. insurance subsidiaries is regulated by the insurance laws and regulations of their respective states of domicile. The laws and regulations of some of these jurisdictions also prohibit an insurer from declaring or paying a dividend except out of its earned surplus or require the insurer to obtain regulatory approval before it may do so. In addition, insurance regulators may prohibit the payment of ordinary dividends or other payments by our insurance subsidiaries to us (such as a payment under a tax sharing agreement or for employee or other services) if they determine that such payment could be adverse to our policyholders or contract holders.

The laws and regulations of the jurisdictions in which our U.S. insurance subsidiaries are domiciled require that a controlling party obtain the approval of the insurance commissioner of the insurance company s jurisdiction of domicile prior to acquiring control of the insurer.

Risk-based capital requirements are imposed on life and property and casualty insurance companies. The risk-based capital ratio is determined by dividing an insurance company s total adjusted capital, as defined, by its authorized control level risk-based capital. Companies that do not meet certain minimum standards require specified corrective action. The risk-based capital ratios for CICA, Security Plan and CNLIC exceed such minimum ratios. At December 31, 2007, all of our insurance subsidiaries had total adjusted capital in excess of amounts requiring company or regulatory action at any prescribed RBC action level.

Many of our independent marketing consultants also operate in regulated environments. Changes in the regulations that affect their operations also may affect our business relationships with them and their ability to purchase or to distribute our products.

Item 1A. Risk Factors

Set forth below are risks with respect to our Company. Readers should review these risks, together with the other information contained in this report. The risks and uncertainties we have described in this report are not the only ones we face. Additional risks and uncertainties not presently known to us, or that we currently deem not material, may also adversely affect our business. Any of the risks discussed in this report or that are presently unknown or not material, if they were to actually occur, could result in a significant adverse impact on our business, operating results, prospects or financial condition.

Risks Relating to Our Business

A substantial amount of our revenue comes from foreign residents. This involves risks associated with the possible application of foreign insurance and securities laws and regulations to our business, as well as risks from political and economic instability and currency transfer restrictions.

A substantial part of our insurance policy sales are from foreign countries, primarily those located in Latin America. There is a risk that we may lose a significant portion of these sales should adverse events occur in these countries.

We do not accept insurance applications outside of the United States. All of our assets are in the United States and all policy premiums must be paid to us in U.S. Dollars drawn on U.S. banks. As a result, we have never qualified to do business in any foreign country and have never submitted our insurance policies issued to foreign residents for review by any insurance regulatory agency. We sell our policies to foreign residents using foreign independent marketing firms and consultants, and we rely on those persons to comply with applicable laws in selling our products and offering policyholders the opportunity to participate in our stock investment plan, which is administered in the United States by our transfer agent.

The government of a foreign country could determine that its residents may not buy life insurance from us unless we became qualified to do business in that country or unless our policies purchased by its residents receive prior approval of its insurance regulators. If this were to occur, our policy sales to that country s residents would cease before any such approvals could be obtained. Also, there is no assurance that we

would be able to qualify to do business in any foreign country or that its insurance regulatory authorities would approve our policies. We could also face sanctions, including fines and penalties, if a country s authorities determined any failure to qualify or otherwise comply with its laws was willful or ongoing, and we decided to continue making policy sales through independent marketing consultants to that country s residents. Any of the foregoing could reduce our revenues and materially adversely affect our results of operations and financial condition. Additionally, we do not determine whether the independent marketing consultants are required to be licensed to sell insurance in the countries in which they make insurance sales. If our marketing consultants were not in compliance with applicable laws, including licensing laws, they could be required to cease operations, which would reduce our revenues and materially, adversely affect our results of operations and financial condition. We have not obtained any advice of counsel in any foreign jurisdictions with respect to these matters.

The offer and sale of our class A common stock under our stock investment plan is registered under the Securities Act. Many of our foreign policyholders invest certain cash benefits they receive with respect to their policies in our class A common stock through our investment plan, which is not registered in any foreign jurisdiction. Prior to October 2005, many of our foreign policyholders assigned these cash benefits to two non-U.S. trusts for the purpose of accumulating ownership of our class A common stock. We have not obtained any advice of counsel in any foreign jurisdiction as to whether any such participation by foreign residents is subject to foreign securities laws or regulations or whether the independent marketing consultants are subject to licensing requirements in connection with the foregoing investments. If a securities regulatory authority were to determine the offer and sale of our class A common stock were contrary to applicable laws and regulations, we could be faced with cease and desist orders, fines and penalties.

We are unable to quantify the effect of foreign regulation on our business if regulation were to be imposed on us, but we believe we could expend substantial amounts of time and incur substantial expense in complying with any foreign regulation, and we may decide to avoid a market if regulation were imposed.

Additionally, if economic or political crises were to occur in any of the countries where our foreign policyowners reside, our revenues would likely decline. For example, Argentina underwent a severe recession in the mid 1990s. As a result, the lapse rates of our insureds residing in Argentina increased significantly, and our new insurance business generated there declined dramatically. Also, currency control laws, regulations and decrees in foreign countries, if implemented, could adversely affect our revenues by imposing restrictions on fund transfers outside of a country where our insureds reside.

While our management has more than 30 years of experience in writing life insurance policies for foreign residents without any significant regulatory action or any lengthy currency controls relating to our foreign resident insureds, there can be no assurance that such situations will not occur and that our revenues, results of operations and financial condition will not be materially, adversely affected if they do occur.

Our actual claims losses may exceed our reserves for claims and we may be required to establish additional reserves, which in turn may adversely impact our results of operations and financial condition.

We maintain reserves to cover our estimated exposure for claims relating to our issued insurance policies. Reserves, whether calculated under accounting principles generally accepted in the United States, or GAAP, or statutory accounting practices prescribed by various state insurance regulators, do not represent an exact calculation of exposure, but instead represent our best estimates, generally involving actuarial projections, of what we expect claims will be based on mortality assumptions that are determined by various regulatory entities. Many reserve assumptions are not directly quantifiable, particularly on a prospective basis. In addition, when we acquire other domestic life insurance companies, our assessment of the adequacy of acquired policy liabilities is subject to our estimates and assumptions. Reserve estimates are refined as experience develops, and adjustments to reserves are reflected in our statements of operations for the period in which such estimates are updated. Because establishment of reserves is an inherently uncertain process involving estimates of future losses, future developments may require us to increase claims reserves, which may have a material adverse effect on our results of operations and financial condition in the period in which such increase is made.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

We may be required to accelerate the amortization of deferred acquisition costs and the costs of customer relationships acquired, which would increase our expenses and adversely affect our results of operations and financial condition.

At December 31, 2007, we had $100.7 million of deferred policy acquisition costs, or DAC. DAC represents costs that vary with and are primarily related to the sale and issuance of our insurance policies and are deferred and amortized over the estimated life of the related insurance policies. These costs include commissions in excess of ultimate renewal commissions, solicitation and printing costs, sales material and some support costs, such as underwriting and contract and policy issuance expenses. Under GAAP, DAC is amortized to income over the lives of the underlying policies, in relation to the anticipated recognition of premiums.

In addition, when we acquire a block of insurance policies, we assign a portion of the purchase price to the right to receive future net cash flows from existing insurance and investment contracts and policies. This intangible asset, called the cost of customer relationships acquired, or CCR, represents the actuarially estimated present value of future cash flows from the acquired policies. At December 31, 2007, we had $31.6 million of CCR. We amortize the value of this intangible asset in a manner similar to the amortization of DAC. Our amortization of DAC and CCR generally depends upon anticipated profits from investments, surrender and other policy charges, mortality, morbidity and maintenance expense margins. For example, if our insurance policy lapse and surrender rates were to exceed the assumptions upon which we priced our insurance policies, or if actual persistency proves to be less than our persistency assumptions, especially in the early years of a policy, we would be required to accelerate the amortization of expenses we deferred in connection with the acquisition of the policy. We regularly review the quality of our DAC and CCR to determine if they are recoverable from future income. If these costs are not recoverable, they are charged to expenses in the financial period in which we make this determination. Unfavorable experience with regard to expected expenses, investment returns, surrender and other policy changes, mortality, morbidity, lapses or persistency may cause us to increase the amortization of DAC or CCR, or both, or to record a current period expense to increase benefit reserves, any of which could have a material adverse effect on our results of operations and financial condition.

We may be required to recognize impairment in the value of our goodwill, which would increase our expenses and materially adversely affect our results of operations and financial condition.

Goodwill represents the excess of the amount paid to acquire various life insurance companies over the fair value of their net assets at the date of the acquisition. Under GAAP, we test the carrying value of goodwill for impairment at least annually at the reporting unit level, which is either an operating segment or a business one level below the operating segment. Goodwill is impaired if its carrying value exceeds its implied fair value. This may occur for various reasons, including changes in actual or expected earnings or cash flows of a reporting unit, generation of earnings by a reporting unit at a lower rate than similar businesses or declines in market prices for publicly traded businesses similar to our reporting units. If any portion of our goodwill becomes impaired, we would be required to recognize the amount of the impairment as a current-period expense. We performed assessments of whether goodwill was impaired on December 31, 2006 and wrote off $1.0 million of goodwill in 2006. No impairment of goodwill was identified in 2005 or 2007.

We are a defendant in lawsuits, which may adversely affect our financial condition and detract from the time our management is able to devote to our business, and we are subject to risks related to litigation and regulatory matters.

We and/or certain of our insurance subsidiaries are defendants in five lawsuits described in Item 3 of this report which, if determined adversely to us or our subsidiaries, could expose us to class action damages which could have a material adverse affect on our results of operating and financial condition. These lawsuits are in various stages of discovery and procedural processes, and it is not possible to evaluate potential monetary exposure to us or our subsidiaries. In addition, litigating these cases is costly and can be time consuming for our Company.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Reinsurers with which we do business could increase their premium rates and may not honor their obligations, leaving us liable for the reinsured coverage.

We reinsure certain risks underwritten by our various operating segments. Market conditions beyond our control determine the availability and cost of the reinsurance protection we purchase. The high cost of reinsurance or lack of affordable coverage could adversely affect our results of operations and financial condition.

Our reinsurance facilities are generally subject to annual renewal. We may not be able to maintain our current reinsurance facilities and, even if highly desirable or necessary, we may not be able to obtain replacement reinsurance facilities in adequate amounts or at favorable rates. If we are unable to renew our expiring facilities or to obtain new reinsurance facilities, either our net exposures would increase or, if we are unwilling or unable to bear an increase in net exposures, we may have to reduce the level of our underwriting commitments. In addition, our reinsurance facilities may be cancelled, pursuant to their terms, upon the occurrence of certain specified events, including a change of control of our Company (generally defined as the acquisition of 10% or more of our voting equity securities) or the failure of our insurance company subsidiaries to maintain the minimum required levels of statutory surplus. Any of these potential developments could materially adversely affect our revenues, results of operations and financial condition.

For the majority of our business, we retain only the first $100,000 of risk on any one life and cede the remaining risk to our reinsurers. In 2007, we reinsured $274 million of face amount of our life insurance policies, and in 2006 we reinsured $259 million of face amount of our life insurance policies. Amounts reinsured in 2007 and 2006 represented 5.7% and 5.6%, respectively, of the face amount of life insurance in effect in both years. Although the cost of reinsurance is, in some cases, reflected in premium rates, under certain reinsurance agreements, the reinsurer may increase the rate it charges us for reinsurance. If our cost of reinsurance were to increase, we might not be able to recover these increased costs, and our results of operations and financial condition could be materially and adversely affected.

Although our reinsurers are liable to us to the extent of the ceded reinsurance, we remain liable to our policyholders as the direct insurer with respect to all reinsured risks. As a result, ceded reinsurance arrangements do not eliminate our obligation to pay claims. We are subject to the credit risks of our reinsurers. Our reinsurers may not pay the reinsurance recoverables that they owe to us or they may not pay such recoverables on a timely basis. A reinsurer s insolvency, underwriting results or investment returns may affect its ability to fulfill its reinsurance obligations to us. Our receivable from reinsurers was $16.0 million at December 31, 2006 and $13.5 million at December 31, 2007.

In addition, effective January 1, 2004, we entered into a coinsurance agreement with an unaffiliated company under which the Company assumed substantially all of the accident and health insurance policies issued by the various insurance companies we have acquired since 1987. At December 31, 2007, the coinsurance company had established statutory accounting liabilities for these policies of $6.2 million. We have established trust accounts totaling $6.8 million for payment to the coinsurance company for claims under these policies. To the extent the sums in the trust accounts are not sufficient to cover claims under such policies and the coinsurance company does not meet its obligations under the coinsurance agreement, we remain liable to the policyholders.

We may not be able to continue our past strategy of acquiring other U.S. life insurance companies, and we may not realize improvements to our financial results as a result of our past or any future acquisitions.

We have acquired 14 U.S. life insurance companies since 1987. Our objective in this strategy has been to increase our assets, revenues and capital, improve our competitive position and increase our earnings, in part by realizing certain operating efficiencies associated with economies of scale. Prior to 2004, increases in earnings from the completed acquisitions were not significant.

We evaluate possible acquisitions of other insurance companies on an ongoing basis. While our business model is not dependent primarily upon acquisitions, the time frame for achieving or further improving our market positions can be shortened through acquisitions. There can be no assurance that suitable acquisitions presenting opportunities for continued growth and operating efficiencies will be available to us, or that we will realize the anticipated financial results from the acquisitions we do complete.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Even if we identify and complete insurance company acquisitions, we may be unable to integrate them on an economically favorable basis. Implementation of an acquisition strategy entails a number of risks, including, among others:

- inaccurate assessment of liabilities, contingent liabilities or the adequacy of claims reserves;
- difficulties in realizing projected efficiencies, synergies and cost savings;
- failure to achieve anticipated revenues, earnings or cash flow;
- an increase in indebtedness and a limitation on our ability to access additional capital when needed; and
- adverse changes in the economies of geographic regions in which the businesses of our acquisitions are concentrated, due to natural disasters, changing population demographics, governmental actions and other causes.

The occurrence of any of these events could have a material adverse effect on our results of operations and financial condition.

Our international and domestic operations face significant competition.

Our international marketing plan focuses on making available U.S. Dollar-denominated life insurance products to high net worth, high income individuals residing in more than 35 countries. New competition could cause the supply of insurance to change, which could affect our ability to price our products at attractive rates thereby adversely affecting our revenues, results of operations and financial condition. Although there are some impediments facing potential competitors that wish to enter the foreign markets we serve, the entry of new competitors into these markets may occur, affording our customers reason to change to other insurance providers. We experience competition primarily from the following sources with respect to our business with foreign residents, many of which have substantially greater financial, marketing and other resources than we have:

Foreign operated companies with U.S. Dollar policies. We face direct competition from companies that operate in the same manner as we operate in our international markets. These competitors include National Western Life Insurance Company, Best Meridian Insurance Company and, to a lesser extent, Pan American Life Insurance Company and American International Group.

C*ompanies foreign to the countries in which policies are sold but that issue local currency policies.* Another group of our competitors in the international marketplace consists of companies that are foreign to the countries in which the policies are sold but issue life insurance policies denominated in the local currencies of those countries. Local currency policies provide the benefit of assets located in the country of foreign residents but entail risks of uncertainty due to local currency fluctuations as well as the perceived instability and weakness of local currencies.

Locally operated companies with local currency policies. We compete with companies formed and operated in the country in which our foreign insureds reside. Generally, these companies are subject to risks of currency fluctuations, and they primarily use mortality tables based on experience of the local population as a whole. These mortality tables are typically based on significantly shorter life spans than those we use. As a result, the cost of insurance from these companies tends to be higher than ours. Although these companies typically market their policies to a broader section of the population than do our independent marketing firms and consultants, there can be no assurance that these companies will not endeavor to place a greater emphasis on our target market and compete more directly with us.

In the United States, we compete with more than 1,000 other life insurance companies of various sizes. The life insurance business in the United States is highly competitive, in part because it is a mature industry that, in recent years, has experienced little to no growth in life insurance sales. Many domestic life insurance companies have

substantially greater financial resources, longer business histories and more diversified lines of insurance coverage than we do. These companies also have larger sales forces than we have. Competition

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

in the United States has also increased recently because the life insurance industry is consolidating, with larger, more efficient organizations emerging from the consolidation. In addition, legislation became effective in 2000 that permits commercial banks, insurance companies and investment banks to combine. This legislation permits, for instance, a commercial bank to acquire or form an insurance company. We believe these factors have increased competitive pressures in the life insurance market in general.

In addition, from time to time, companies enter and exit the markets in which we operate, thereby increasing competition at times when there are new entrants. We may lose business to competitors offering competitive products at lower prices, or for other reasons.

There can be no assurance that we will be able to compete effectively in any of our markets. If we do not, our business, results of operations and financial condition will be materially and adversely affected.

Sales of our products may be reduced if we are unable to establish and maintain commercial relationships with independent marketing firms and consultants attract and retain employee agents or develop and maintain our distribution sources.

We distribute our insurance products through several distribution channels, including independent marketing firms and consultants and our employee agents. These relationships are significant for both our revenues and our profits. In our life insurance segment, we depend almost exclusively on the services of independent marketing firms and consultants. In our home service insurance segment, we depend on employee agents whose role in our distribution process is critical in developing and maintaining client relationships. Significant competition exists among insurers to form relationships with marketers of demonstrated ability. Some of our competitors may offer better compensation packages for marketing firms, consultants and agents and broader arrays of products and have a greater diversity of distribution resources, better brand recognition, more competitive pricing, lower cost structures and greater financial strength or claims paying ratings than we do. We compete with other insurers for marketing firms, independent consultants and employee agents primarily on the basis of our compensation and support services. Any reduction in our ability to attract and retain effective sales representatives could materially adversely affect our revenues, results of operations and financial condition.

Loss of the services of our senior management team would likely hinder development of our operating and marketing programs and our strategy for expanding our business.

We rely on the active participation of our Chairman of the Board and Chief Executive Officer, Harold E. Riley (age 79), and our Vice Chairman of the Board and President, Rick D. Riley (age 54), in connection with the development and execution of our operating and marketing plans and strategy for expanding our business. We anticipate that their expertise will continue to be of substantial value in connection with our operations. The loss of the services of either of these individuals could have a significant adverse effect on our business and prospects. We do not have an employment agreement with either of these persons nor do we carry a key-man insurance policy on either of their lives.

We are subject to extensive governmental regulation in the United States, which increases our costs of doing business and could restrict the conduct of our business.

We are subject to extensive regulation and supervision in the U.S. jurisdictions in which we do business as well as anti-money laundering regulations adopted under the U.S. Patriot Act. Insurance company regulation is generally designed to protect the interests of policyholders, as opposed to the stockholders of the regulated insurance companies. To that end, the laws of the various states in which we do business establish insurance regulatory agencies with broad powers with respect to such things as:

- licensing companies to transact business;
- authorizing lines of business;
- mandating capital and surplus requirements;
- imposing dividend limitations;

approving changes in control;

licensing agents and distributors of insurance products;

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

- placing limitations on the minimum size and certain other provisions of life insurance contracts;
- restricting companies ability to enter and exit markets;
- admitting statutory assets;
- mandating certain insurance benefits;
- restricting companies ability to terminate or cancel coverage;
- requiring companies to provide certain types of coverage;
- regulating premium rates, including the ability to increase premium rates;
- approving policy forms;
- regulating trade and claims practices;
- imposing privacy requirements;
- establishing reserve requirements and solvency standards;
- restricting certain transactions between affiliates;
- mandating assessments or other surcharges for guaranty funds;
- regulating market conduct and sales practices of insurers and their marketing agents; and
- restricting contact with consumers, such as the recently created national do not call list, and imposing consumer protection measures.

The capacity for an insurance company s growth in premiums is partially a function of its statutory regulatory surplus. Maintaining appropriate levels of statutory surplus, as measured by statutory accounting practices prescribed or permitted by a company s state of domicile, is considered important by insurance regulatory authorities. Failure to maintain required levels of statutory surplus could result in increased regulatory scrutiny and enforcement action by regulatory authorities.

Most insurance regulatory authorities have relatively broad discretion to grant, renew, suspend and revoke licenses and approvals, and could preclude or temporarily suspend us from carrying on some or all of our activities, including acquisitions of other insurance companies, require us to add capital to our insurance company subsidiaries, or fine us. If we are unable to maintain all required licenses and approvals, or if our U.S. domestic insurance business is determined not to comply fully with the wide variety of applicable laws and regulations, including the U.S. Patriot Act, or a relevant authority s interpretation of the laws and regulations, our revenues, results of operations and financial condition could be materially adversely affected.

Changes in U.S. regulation may adversely affect our results of operations and financial condition and limit our prospective growth.

Currently, the U.S. federal government does not regulate directly the insurance business. However, federal legislation and administrative policies in several areas can materially and adversely affect insurance companies, including our Company. These areas include the U.S. Patriot Act, financial services regulation, securities regulation, including the Sarbanes-Oxley Act of 2002, pension regulation, privacy, tort reform legislation and taxation. In addition, various forms of direct federal regulation of insurance have been proposed from time to time.

Our failure to maintain effective information systems could adversely affect our business.

Our business is dependent upon our ability to keep up to date with technological advances. This is particularly important in our life insurance operations, where our information systems are critical to the operation of our business. Our failure to update these systems to reflect technological advancements or to protect our systems may adversely affect our business.

We must maintain and enhance our existing information systems and develop new information systems in order to keep pace with continuing changes in information processing technology, evolving industry and regulatory standards and changing customer preferences. If we do not maintain adequate systems, we could experience adverse consequences, including:

- inadequate information on which to base pricing, underwriting and reserve decisions;

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

- the loss of existing customers;
- difficulty in attracting new customers;
- disputes with customers and our independent marketing firms, consultants and employee agents;
- regulatory problems, such as failure to meet prompt payment obligations;
- litigation exposure; and
- increases in administrative expenses.

Our failure to maintain effective and efficient information systems, or our failure to efficiently and effectively consolidate our information systems to eliminate redundant or obsolete applications, could have a material adverse effect on our results of operations and financial condition.

We have in the past identified material weaknesses in our disclosure controls and controls over financial reporting. To the extent that we may have not remedied these weaknesses or fail to maintain our current system of internal controls to an effective level with regard to material weaknesses we may identify, we may not be able to report our financial results accurately. As a result, we could be required to restate our financial statements and be exposed to increased regulatory scrutiny and litigation from investors and others.

Effective internal controls are necessary for us to provide reliable financial reports. If we are unable to provide reliable financial reports, we could become subject to SEC and other regulatory review and sanctions, as well as litigation that could result in substantial fines, penalties or liabilities, and our results of operations and financial condition, and the market value of our securities, could be materially and adversely affected as a result. We have in the past discovered, and may in the future discover, areas of our internal controls that need improvement.

Our failure to protect confidential information and privacy could result in the loss of customers, subject us to fines and penalties and adversely affect our results of operations and financial condition.

Our insurance subsidiaries are subject to privacy regulations and to confidentiality obligations. We also have legal obligations to protect certain confidential information we obtain from our existing vendors. These obligations generally include protecting confidential information in the same manner and to the same extent as we protect our own confidential information. The actions we take to protect confidential information include among other things:

- monitoring our record retention plans and policies and any changes in state or federal privacy and compliance requirements;
- maintaining secure storage facilities for tangible records; and
- limiting access to electronic information in order to safeguard certain current information.

In addition, the Gramm-Leach-Bliley Act requires that we deliver a notice regarding our privacy policy both at the delivery of an insurance policy and annually thereafter. Certain exceptions are allowed for sharing of information under joint marketing agreements. However, certain state laws may require us to obtain a policyholder s consent before we share information.

We have, and maintain, a written information security program with appropriate administrative, technical and physical safeguards to protect such confidential information. If we do not comply with privacy regulations and protect confidential information, we could experience adverse consequences, including regulatory sanctions, loss of reputation and litigation, any of which could have a material adverse effect on our business, results of operations and financial condition.

The insurance industry in which we operate may be subject to periodic negative publicity, which may negatively impact our financial results.

We interface with and distribute our products to individual consumers. There may be a perception that these purchasers may be unsophisticated and in need of consumer protection. Accordingly, from time to time, consumer

advocate groups or the media may focus attention on our products, thereby subjecting us to periodic negative publicity. We may also be negatively impacted if another insurance company engages in

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

practices resulting in increased public attention to our businesses. Negative publicity may result in lower sales of insurance, increased regulation and legislative scrutiny of industry practices as well as increased litigation, which may further increase our costs of doing business and impede our ability to market our products. As a result, our business, results of operations and financial condition could be materially and adversely affected.

General economic, financial market and political conditions may materially and adversely affect our results of operations and financial condition.

Our results of operations and financial condition may be materially and adversely affected from time to time by general economic, financial market and political conditions, both in the United States and in the foreign countries where our policy owners reside. These conditions include economic cycles such as:

- insurance industry cycles;
- levels of employment;
- levels of consumer spending;
- levels of inflation;
- movements of the financial markets,
- fluctuations in interest rates, monetary policy, demographics; and
- legislative and competitive changes.

During periods of economic downturn, our insureds may choose not to purchase our insurance products, may terminate existing policies or contracts, permit them to lapse or may choose to reduce the amount of coverage purchased, any of which could have a material adverse effect on our results of operations and financial condition.

Our insurance subsidiaries are restricted by applicable laws and regulations in the amounts of fees, dividends and other distributions they may make to us. The inability of our subsidiaries to make payments to us in sufficient amounts for us to conduct our operations could adversely affect our ability to meet our obligations or expand our business.

As a holding company, our principal asset is the capital stock of our subsidiaries. We rely primarily on statutorily permissible payments from our insurance company subsidiaries, principally through service agreements we have with our subsidiaries, to meet our working capital and other corporate expenses. The ability of our insurance company subsidiaries to make payments to us is subject to regulation by the states in which they are domiciled, and these payments depend primarily on approved service agreements between us and these subsidiaries and, to a lesser extent, the statutory surplus (which is the excess of assets over liabilities as determined under statutory accounting practices prescribed by an insurance company s state of domicile), future statutory earnings (which are earnings as determined in accordance with statutory accounting practices) and regulatory restrictions.

Generally, the net assets of our insurance company subsidiaries available for dividends are limited to the greater of the subsidiary net gain from operations during the preceding year and 10% of the subsidiary s net statutory surplus as of the end of the preceding year as determined in accordance with accounting practices prescribed by insurance regulatory authorities. Total capital and surplus of CICA as of December 31, 2007 was approximately $51.6 million. Based upon statutory net gain from operations and surplus of CICA for the year ended December 31, 2007, approximately $4.8 million of dividends could be paid to us in 2008 without prior regulatory approval. In late 2007, SPLIC paid a $4.6 million dividend to CICA. Also, Funeral Homes of America paid a $255,000 dividend to CICA.

Except to the extent that we are a creditor with recognized claims against our subsidiaries, claims of our subsidiaries creditors, including policyholders, have priority with respect to the assets and earnings of the subsidiaries over the claims of our creditors and stockholders. If any of our subsidiaries becomes insolvent, liquidates or otherwise reorganizes, our creditors and stockholders will have no right to proceed in their own right against the assets of that

subsidiary or to cause the liquidation, bankruptcy or winding-up of the subsidiary under applicable liquidation, bankruptcy or winding-up laws.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Risks Relating to Our Class A Common Stock

The price of our class A common stock may be volatile and may be affected by market conditions beyond our control.

Our class A common stock price is likely to fluctuate in the future and could decline materially because of the volatility of the stock market in general and as a result of a variety of other factors, many of which are beyond our control, including:

- quarterly variations in actual or anticipated results of our operations;
- interest rate fluctuations;
- changes in financial estimates by securities analysts;
- valuations of similarly situated companies in our industry;
- our failure to meet the expectations of securities analysts and investors;
- actions or announcements by our competitors;
- competition and other factors affecting the life insurance business generally; and
- conditions in the U.S. and world economies.

Our class A common stockholders will not control us for the foreseeable future, will have a limited ability to influence our business policies and corporate actions and will not by themselves be able to elect any directors.

It is difficult for our minority stockholders to elect any of our directors or otherwise exert influence over our business. Holders of our outstanding class B common stock are entitled to elect a simple majority of our board of directors and therefore control our Company. All of our class B common stock is currently owned indirectly by the Harold E. Riley Trust of which Harold E. Riley, our Chairman of the Board and Chief Executive Officer, is the sole trustee. Additionally, Harold E. Riley holds approximately 8.9% of the outstanding shares of our class A common stock.

Our articles of incorporation and bylaws, as well as applicable state insurance laws, may discourage takeovers and business combinations that our stockholders might consider to be in their best interests.

Our articles of incorporation and bylaws, as well as various state insurance laws, may delay, deter, render more difficult or prevent a takeover attempt that our stockholders might consider in their best interests. As a result, our stockholders will be prevented from receiving the benefit from any premium to the market price of our class A common stock that may be offered by a bidder in a takeover context. Even in the absence of a takeover attempt, the existence of these provisions may adversely affect the prevailing market price of our class A common stock if they are viewed as discouraging takeover attempts in the future.

The following provisions in our articles of incorporation and bylaws make it difficult for our class A stockholders to replace or remove our directors and have other anti-takeover effects that may delay, deter or prevent a takeover attempt:

- holders of shares of our class B common stock elect a simple majority of our board of directors, and all of these shares are owned by the Harold E. Riley Trust; and
- our board of directors may issue one or more series of preferred stock without the approval of our stockholders.

State insurance laws generally require prior approval of a change in control of an insurance company. Generally, such laws provide that control over an insurer is presumed to exist if any person, directly or indirectly, owns, controls, holds with the power to vote, or holds proxies representing 10% or more of the voting securities of the insurer. In considering an application to acquire control of an insurer, an insurance commissioner generally will consider such factors as the experience, competence and financial strength of the applicant, the integrity of the applicant s board of

directors and executive officers, the acquirer s plans for the management and operation of the insurer, and any anti-competitive results that may arise from the acquisition. In addition, a person seeking to acquire control of an insurance company is required in some states to make filings prior to completing an acquisition if the acquirer and the target insurance company and their affiliates have sufficiently large market shares in particular lines of insurance in those states. These

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

laws may discourage potential acquisition proposals and may delay, deter or prevent a change of control involving us, including through transactions, and in particular unsolicited transactions, that some or most of our stockholders might consider to be desirable and in which our stockholders may receive a premium.

We have never paid any cash dividends on our class A common stock and do not anticipate doing so in the foreseeable future.

We have never paid cash dividends on our class A common stock, as it is our policy to retain earnings for use in the operation and expansion of our business.

There are a substantial number of shares of our class A common stock eligible for future sale in the public market. The sale of a large number of these shares could cause the market price of our class A common stock to fall.

There were 43,070,092 shares of our class A common stock outstanding as of December 31, 2007. Members of our management and other affiliates owned approximately 5,800,000 shares of our class A common stock as of this date, representing approximately 13.5% of our outstanding class A common stock. These shares have been registered for public resale and may be sold freely.

In addition, a total of 3,347,039 shares of our class A common stock are issuable upon the conversion of our series A-1 and series A-2 preferred stock and the exercise of warrants granted in connection therewith. We have a registration statement currently in effect that allows the public resale of all such shares of class A common stock.

If our preferred and common stockholders sell a large number of shares of our class A common stock, the market price of shares of our class A common stock could decline significantly. Moreover, the perception in the public market that our stockholders might sell shares of our class A common stock could depress the market price of our class A common stock.

Holders of our series A preferred stock may obtain the right to require us to redeem their series A preferred stock and we will be required to redeem any shares of series A preferred stock that remain outstanding on July 12, 2009.

We will be required to redeem any shares of our series A preferred stock that remain outstanding on July 12, 2009 at the original investment price, plus all accrued but unpaid dividends.

We can elect to pay the redemption price in shares of our class A common stock if:

- the average closing price of the stock is in excess of $3.50 per share for a period of ten consecutive trading days prior to (but not including) the date that is three trading days prior to the date of redemption;
- the stock is listed on NYSE or other eligible market; and
- the stock to be issued is registered under a registration statement effective with the SEC.

We intend to pay the redemption price of our series A preferred stock in shares of our class A common stock to the extent the conditions described above are satisfied and we are permitted to do so. The number of shares of our class A common stock that we issue to redeem these shares of series A preferred stock could have a dilutive effect on the book value of the shares of class A common stock held by existing holders. However, provisions of our series A preferred stock could require us to pay part or all of the redemption price in cash, rather than in shares of our class A common stock, under certain circumstances, including failure to meet the conditions described above.

The provisions of our series A preferred stock require that if (i) the closing price of our class A common stock for any 42 trading days, including a period not less than five consecutive trading days, is less than $4.80, or (ii) we issue class A common stock or common stock equivalents for less than $6.11 per share, then the holders of our series A preferred stock may require us to redeem their shares of series A preferred stock at a price equal to the amount of the original holder s original investment, plus all accrued but unpaid

Table of Contents

dividends thereon to the date of payment. If we are required, or elect, to redeem shares of our series A preferred stock for cash, we may have to curtail our growth and acquisition plans.

Provisions applicable to our series A preferred stock may make it more difficult or prevent us from raising funds or taking certain other actions.

Provisions applicable to the outstanding shares of our series A preferred stock trigger rights of first refusal or payment provisions and require us to obtain the approval of the holders of such shares to (i) incur debt or allow liens on our property, other than certain permitted debt and liens, (ii) amend our articles of incorporation so as to affect adversely any rights of the preferred shareholders, (iii) authorize or create a new class of stock that will be senior or equal to our series A preferred stock in terms of dividends, redemption or distribution of assets or (iv) take other specified actions. These provisions may make it more difficult for us to take certain corporate actions and could delay, deter or prevent future financings.

In all other offerings of our shares of class A common stock, such as a private placement of shares, unless certain limited exceptions apply, the holders of our series A preferred stock will generally be entitled to purchase up to 50% of the number of shares of our class A common stock offered by us. These preemptive rights could delay, deter or prevent future equity financings.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We own our principal office in Austin, Texas, consisting of an 80,000 square foot office building and approximately one acre of land nearby that house storage facilities. Approximately 50,000 square feet is occupied or reserved for our operations. We also own a training facility at Lake Buchanan, Texas. In addition, we own other properties in Texas and Louisiana that are incidental to our operations.

Item 3. Legal Proceedings

We are a defendant in a lawsuit originally filed on August 6, 1999 in the Texas District Court, Austin, Texas, now styled *Citizens Insurance Company of America, Citizens, Inc., Harold E. Riley and Mark A. Oliver, Petitioners v. Fernando Hakim Daccach*, *Respondent*, in which a class was originally certified by the trial court and affirmed by the Court of Appeals for the Third District of Texas. We appealed the grant of class status to the Texas Supreme Court which, on March 2, 2007, reversed the Court of Appeal s affirmation of the trial court s class certification order, decertified the class and remanded the case to the trial court for further proceedings consistent with the Texas Supreme Court s opinion. As a result, no class action is presently certified, and plaintiffs counsel is seeking to recertify the class. In order to recertify the class, the lead plaintiff must establish that he is qualified to represent the purported class and that the res judicata effect of a class action will not have a deleterious effect on the putative class members. The underlying lawsuit alleges that certain life insurance policies that we made available to non-U.S. residents, when combined with a policy feature that allowed certain cash benefits to be assigned to two non-U.S. trusts for the purpose of accumulating ownership of our class A common stock, along with allowing the policyholders to make additional contributions to the trusts, were actually offers and sales of securities that occurred in Texas by unregistered dealers in violation of the Texas securities laws. The remedy sought was rescission and return of the insurance premium payments. We believe the lawsuit is without merit and intend to continue a vigorous defense in any remaining proceedings, including any class recertification. If the class is recertified, we could be exposed to costly and time consuming litigation, and an adverse judgment could have a material adverse effect on our results of operations and financial condition. The case is now back before the District judge for her performance of an analysis of the evidence presented to see if it warrants recertification of a class.

Our wholly-owned Louisiana property insurer, SPFIC, has been named as a defendant in a lawsuit filed in the United States District Court, Eastern District of Louisiana, in which plaintiff originally asserted allegations on behalf of a purported class. All class allegations were subsequently dismissed. The suit was

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

filed on August 28, 2006, and was initially styled *Connie Abadie, et al v. Aegis Security Insurance Co., et al.,* or *Connie Abadie*. Most of the property and casualty insurers in Louisiana were also named in this lawsuit. The suit sought payments for claims denied by SPFIC and other declaratory relief related to Hurricane Katrina. It was unclear from the petition how many plaintiffs were insureds of SPFIC. In order to expedite the handling of all the litigation related to Hurricane Katrina, the court consolidated *Connie Abadie* into an action styled *In Re: Katrina Canal Breaches Consolidated Litigation*, or the Katrina Consolidated Litigation. On March 15, 2007, a Master Class Action Insurance Complaint was filed in the Katrina Consolidated Litigation. On March 27, 2007, the Katrina Consolidated Litigation was administratively closed by the court and superseded by the Master Class Action Insurance Complaint. Presently, the Master Class Action Insurance Complaint is stayed by order of the court.

One of the defenses that certain defendants in the Master Class Action Insurance Complaint have asserted is that their insurance policies excluded claims for flood damage, even though the floods resulting from Hurricane Katrina may have been caused by negligence. On August 2, 2007, the U.S. Court of Appeals for the Fifth Circuit ruled in the Master Class Action Insurance Complaint that the flood exclusion language in certain property insurance policies was effective to preclude claims for flood damage by policyholders whose policies include such an exclusion. Although SPFIC was not a party to that lawsuit, its policies do exclude flood damage claims. On September 30, 2007, the judge presiding over the Master Class Action Insurance Complaint issued a ruling holding that specific named peril policies that do not list flooding as one of the named perils do not provide coverage for flooding. SPFIC s policies are named peril policies that do not list flooding as one of the named perils. SPFIC intends to continue to vigorously defend any claims resulting from flood damage on the grounds, among others, that its policies do not cover such damage. The deadline for filing claims against insurers arising out of property damage from Hurricane Katrina was August 29, 2007.

SPFIC is also a defendant in a suit styled *The State of Louisiana v. AAA Insurance*, or Road Home Litigation, which was filed in the Civil District Court for the Parish of Orleans on August 23, 2007 by the state of Louisiana as subrogee/assignee of the insureds of more than 200 different insurance companies. The suit was filed to recover money that the state of Louisiana paid to certain insureds under the Louisiana Road Home Program for damages resulting from Hurricanes Katrina and Rita. The suit was removed to the United States District Court for the Eastern District of Louisiana on September 11, 2007 and the removal was appealed by the Plaintiff. Responsive pleadings have not yet been filed on behalf of any of the defendant insurers in this case, nor has any discovery been conducted to date.

SPFIC was also named as a defendant in a lawsuit filed in the Civil District Court for the Parish of Orleans on behalf of Karen Cheneau in August 2006. The *Cheneau* suit stems from damages Ms. Cheneau sustained during Hurricane Katrina. In November 2007, plaintiff filed a Motion for Leave to File First Amended Petition to Assert Class Allegations Against SPFIC. The purported class consists of Louisiana citizens who purchased homeowner s insurance coverage and/or contents insurance coverage from SPFIC, whose homes and/or property covered by said policies were damaged as a result of Hurricane Katrina and who timely submitted claims to SPFIC for their losses, and who either received no recovery or received less than the proper value of their valued policies as a result of their claims. SPFIC has responded to the Amended Petition by filing Exceptions of No Cause of Action, No Right of Action, Vagueness, Prescription and Failure to Meet Class Action Requirements.

The exceptions have not yet been set for hearing. SPFIC intends to vigorously defend this lawsuit. The Master Class Action Insurance Complaint, the Road Home Litigation and *Cheneau* are in the early stages of litigation, and no discovery has yet occurred. Therefore, it is not possible to evaluate how many claims in those cases relate to SPFIC, or the potential exposure to SPFIC. However, in the event of an adverse outcome, the potential exposure to SPFIC could be significant

On November 8, 2005, SPLIC was named as a defendant in a suit filed by Lilac Todd, who alleges that SPLIC failed to pay her claim for medical expenses arising out of the amputation of one of her limbs. On December 20, 2007, a Supplemental and Amended Petition for Damages was filed pursuant to which plaintiff has asserted class action allegations pursuant to La. C.C.P. art. 591. The purported class is defined as all Louisiana insureds of SPLIC, whose policies contained an incontestability provision identical or similar to Ms. Todd s policy, and whose claims were

denied within 10 years of the petition filing on the basis of

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

illnesses, injuries or diseases diagnosed or which occurred at any time preceding the incontestability. SPLIC has responded by filing Exceptions of Vagueness and of Improper Use of the Class Action Procedure, as well as an Answer to the Supplemental and Amended Petition for Damages. The Exceptions have not yet been set for hearing. The Lilac Todd matter is in the early stages of litigation relative to the class allegations and no discovery has yet occurred. Therefore, it is not possible to know how many claims in this case relate to SPLIC, or the potential exposure to SPLIC. SPLIC intends to aggressively defend this action. However, in the event of an adverse outcome, the potential exposure to SPLIC could be significant.

In addition to the legal proceedings described above, we may from time to time be subject to a variety of legal and regulatory actions relating to our future, current and past business operations, including, but not limited to:

- disputes over insurance coverage or claims adjudication;
- regulatory compliance with insurance and securities laws in the United States and in foreign countries;
- disputes with our marketing firms, consultants and employee agents over compensation and termination of contracts and related claims;
- disputes regarding our tax liabilities;
- disputes relative to reinsurance and coinsurance agreements; and
- disputes relating to businesses acquired and operated by us.

In the absence of countervailing considerations, we would expect to defend any such claims vigorously. However, in doing so, we could incur significant defense costs, including not only attorneys fees and other direct litigation costs, but also the expenditure of substantial amounts of management time that otherwise would be devoted to our business. If we suffer an adverse judgment as a result of any claim, it could have a material adverse effect on our business, results of operations and financial condition. We have not established any reserve account on our consolidated financial statements for the adverse financial impact of any of our litigation matters.

Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of our security holders during the fourth quarter of the fiscal year covered by this report.

PART II

Item 5. Market for Registrant s Common Equity, Related Stockholder Matters and Issuer Purchase of Equity Securities

Our Class A common stock is traded on the New York Stock Exchange (NYSE) under the symbol CIA.

As of December 31, 2007, the approximate number of record owners of our Class A common stock was 71,000. Management estimates the number of beneficial owners to be approximately 125,000.

We have not paid cash dividends in any of the past five years and do not expect to pay such in the foreseeable future. For restrictions on our present and future ability to pay dividends, see Note 6 of the Notes to Consolidated Financial Statements.

We did not purchase any of our equity securities during any quarter in 2005, 2006 or 2007.

Securities Authorized for Issuance Under Equity Compensation Plans

We do not maintain any equity compensation plans or arrangements. Thus, we do not have any securities authorized for issuance under these types of plans, nor have we issued any options, warrants or similar instruments to purchase any of our equity securities, except for warrants issued in conjunction with the convertible preferred stock issued in 2005. (See Note 7 of the Notes to Consolidated Financial Statements.)

Item 6. Selected Financial Data

The table below sets forth, in summary form, selected data of the Company. This data, which is not covered in the reports of our independent registered public accounting firms, should be read in conjunction with our consolidated financial statements and notes, which are included elsewhere herein. The net income per share amounts have been adjusted retroactively for all periods presented to reflect the 7% common stock dividends paid on December 31, 2005, 2004, and 2003.

	Years ended December 31,				
	2007	2006	2005	2004	2003
	(In thousands, except per share data)				
Total Revenues	$173,794	158,059	142,113	99,859	92,060
Net Income	16,557	8,677	7,302	7,732	3,126
Basic and Diluted Earnings Per Class A Share	0.35	0.16	0.13	0.17	0.08
Total Assets at December 31	787,909	711,184	661,889	661,212	390,093
Long-term Debt				30,000	
Total Liabilities	597,532	558,690	513,380	520,179	263,066
Total Stockholders Equity	176,157	139,611	136,963	135,131	127,027
Book Value Per Share	4.00	3.38	3.33	3.29	3.10

See Item 1 Business (A) and (B), and Item 7 Management s Discussion and Analysis, for information that may affect the comparability of the financial data contained in the above table.

Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operation

Overview

We conduct operations as an insurance holding company emphasizing ordinary life insurance products in niche markets where we believe we can achieve competitive advantages. Our core operations include issuing:

- U.S. Dollar-denominated ordinary whole life insurance policies predominantly to high net worth, high income foreign residents, located principally in Latin America and the Pacific Rim, through approximately 2,600 independent marketing consultants;

- ordinary whole life insurance policies to middle income households in the Midwest and the southern United States through approximately 600 independent marketing consultants; and

- final expense and limited liability property policies to middle to lower income households in Louisiana through approximately 300 employee agents in our home service distribution channel.

We operate through two segments as follows:

Life Insurance. For the past 30 years, CICA and its predecessors have participated in the foreign marketplace through the issuance of U.S. Dollar-denominated ordinary whole life insurance to foreign nationals. Traditionally, this market has focused on the top 3-5% of the population of a country in terms of income and net worth. In recent years, however, there has been a shift to encompass a broader spectrum of the population, as upper middle classes develop in Latin America and the Pacific Rim. We make our insurance products available using third-party marketing organizations and independent marketing consultants. The number of our producing independent consultants has expanded over the years in this segment to

27

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

approximately 2,600, and we presently receive applications from more than 35 countries outside of the U.S. Historically, the majority of our international business has come from Latin America. However, in 2004 the Pacific Rim began to represent a meaningful and growing source of new business, and in 2007 was one of the leading sources of new premium income.

In 2007, our Life Insurance segment generated revenue of $119.0 million, which accounted for 68.5% of our total revenue. For the year ended December 31, 2006, this segment produced revenue of $105.7 million or 66.9% of our total revenue, compared to 2005 when it produced approximately $90.6 million or 63.8% of total revenue. Our strategy in operating our Life Insurance segment is to increase new business written through our existing marketers as well as expand the number of countries from which we receive policy applications. The development of new markets in the Pacific Rim, particularly Taiwan, and the expansion of existing markets in Latin America were the primary contributors to the growth in this segment.

In 2008, CICA plans introduction of a new set of international products. The Company anticipates the new products will be very well accepted in the international market.

Through the domestic market of our Life Insurance segment, we provide ordinary whole life, credit life insurance, and final expense policies to middle income families or individuals in certain markets in the Midwest and southern U.S. The majority of our revenues in this regard are the result of acquisitions of domestic life insurance companies since 1987.

Citizens National Life Insurance Company (CNLIC), one of our subsidiaries that markets our domestic products, was previously for sale under a contract entered into in 2005. During 2007, the sales contract was terminated.

We also realize revenues from our investment portfolio. Life insurance companies earn profits on the investment float, which reflects the investment income earned on the premiums paid to the insurer between the time of receipt and the time benefits are paid out under policies. Changes in interest rates, changes in economic conditions and volatility in the capital markets can all impact the amount of earnings that we realize from our investment portfolio.

Home Service Insurance. Through a subsidiary, SPLIC, we provide final expense ordinary life insurance to middle to lower income individuals in Louisiana. Our policies in this segment are sold and serviced through the home service marketing distribution system utilizing employee-agents who work on a route system to collect premiums and service policyholders.

During 2007, revenue from this segment was $52.9 million, which accounted for 30.4% of our total revenue. For the year ended December 31, 2006, revenue from this segment was $51.2 million or 32.4% of our total revenue compared to $49.7 million or 34.9% of our total revenue in 2005. Our business strategy in this segment is to continue to serve existing customers in Louisiana as well as expand the business through new marketing management that we put in place in early 2005.

In August and September 2005, Hurricanes Katrina and Rita struck the Louisiana coast, causing significant damage and disruption to the New Orleans area. Management estimates that one-third of SPLIC s premium income was located in the affected area. SPLIC was not significantly impacted by death claims related to the storms (approximately $660,000); however, because of uncertainty regarding the collectibility of future premiums from the area, we wrote down approximately $2.3 million of cost of customer relationships acquired in the SPLIC acquisition during the third quarter of 2005 because of the decrease in collected premiums during the quarter. Ultimately, SPLIC closed the year with only a 4.5% decline in premium income compared to 2004. In 2006, premium income surpassed the 2005 level, reaching $38.0 million, and was $39.5 million in 2007.

SPLIC s property insurance subsidiary, SPFIC, was negatively impacted by Hurricanes Katrina and Rita. Commencing in 2005 and through December 31, 2007, total incurred losses not covered by reinsurance amounted to $4.0 million, resulting in SPLIC infusing $4 million of additional capital into SPFIC. Legislative and judicial decrees had further extended the period for filing claims, for one year, beyond that provided for under the contracts. Due to this extended claims filing period, an incurred but not reported

claim and loss adjustment expense (LAE) liability of $500,000 was recorded at December 31, 2006 to cover any claims filed in 2007. When the extended deadline for filing of claims expired in the third quarter of 2007, SPFIC released approximately $425,000 of liabilities, which SPFIC determined were not payable under the contracts.

Marketplace Conditions and Trends

Described below are some of the significant recent events and trends affecting the life insurance industry and the possible effects they may have on our future operations.

As an increasing percentage of the world population reaches retirement age, we believe we will benefit from increased demand for living products rather than death products, as aging baby boomers will require cash accumulation to provide expenses to meet their lifetime needs. Our ordinary life products are designed for our policyowners to accumulate cash values to provide for living expenses in a policy owner s later years, while continuously providing a death benefit.

We are exposed to a variety of risks, including the current market conditions as well as the credit crisis and corresponding potential changes in the fair value of our investments. In the normal course of business, we employ established policies and procedures to manage our exposure to fluctuations in the current market and changes in the fair value of our investments. We have not experienced any impairments in the value of our securities due to the current credit crisis in world financial markets. We have no subprime or collateralized debt investments.

The volatility in the equity markets over the past few years has posed a number of problems for some companies in the life insurance industry. We historically have had minimal equity holdings, constituting less than 7% of total invested assets as of December 31, 2007 and less than 1% at December 31, 2006.

Corporate bond defaults and credit downgrades, which have resulted in other-than-temporary impairments in the value of some securities, have had a material impact on life insurers in the past few years. We have not incurred significant losses from bond defaults for many years. The majority of our investment portfolio is held in debt instruments carrying the full faith and credit of the U.S. Government, or in U.S. Government-sponsored enterprises. Most of the municipal bonds we own are privately insured. We intend to manage our investment portfolio conservatively in the future in these type of debt instruments.

Because of the trends described above coupled with increasing costs of regulatory compliance such as the Sarbanes-Oxley Act of 2002, we believe there is a trend towards consolidation of domestic life insurance companies. We believe this should be a benefit to our acquisition strategy because there should be more complementary acquisition candidates available for us to consider.

Many of the events and trends affecting the life insurance industry have had an impact on the life reinsurance industry. These events led to a decline in the availability of reinsurance. While we currently cede a limited amount of our primary insurance business to reinsurers, we may find it difficult to obtain reinsurance in the future, forcing us to seek reinsurers who are more expensive to us. If we cannot obtain affordable reinsurance coverage, either our net exposures will increase or we would have to reduce our underwriting commitments.

Significant Transactions

In late 2007, the Company completed an $18.8 million registered direct offering of its Class A common stock, selling approximately 2.7 million shares at a price of $7.00 per share. The net proceeds of the offering were $17.1 million, after underwriter commissions and other offering related expenses. The anticipated use of proceeds from the offering is for general corporate purposes, which could include acquisitions of other insurance companies.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Consolidated Results of Operations

The following table sets forth our net income for the periods indicated:

Years ended December 31,	Net Income (In thousands)	Net Income per Class A Share	Increase (decrease) from Previous Year
2007	$ 16,557	$ 0.35	90.8%
2006	8,677	0.16	18.8
2005	7,302	0.13	(5.6)

As further discussed below, increases in premium income, fueled by the writing of new life insurance premiums and improved persistency, as well as an increase in investment income and lower property claims development, contributed to a 90.8% increase in earnings for 2007.

Total revenues for 2007 were $173.8 million, a 10.0% increase over 2006 revenues of $158.1 million. Total revenues for 2005 were $142.1 million. Total revenues from Home Service were $52.9 million in 2007 and $51.2 million in 2006, compared to $49.7 million in 2005. Total revenues from our Life Insurance segment amounted to $119.0 million during 2007, compared to $105.7 million for 2006 and $90.6 million for 2005, reflecting continued growth in new business.

Premium Income. Premium income during 2007 increased to $140.9 million from $128.5 in 2006, or 9.6%, and $116.3 million in 2005. The 2007 increase was attributable to the new international business written in 2006 and 2007 in the Life Insurance segment, which had $101.4 million of premium income during the year. Additionally, we continue to experience improved persistency in our international life business, which contributed largely to the increase. First year premium in the Life Insurance segment was unchanged from its 2006 level. Additionally, property insurance premiums were up $1.1 million in 2007 over 2006, or 30.4%, as rate increases implemented in the fourth quarter of 2006 and third quarter 2007 materialized.

Net Investment Income. Net investment income increased 14.0% during 2007 to $30.7 million, compared to $27.0 million during 2006 and $23.6 million in 2005. The increase was due primarily to the growth in the investment portfolio during 2007. Additionally, during 2007 the Company invested $36.7 million in equity mutual funds, which added $2.1 million to net investment income from fund distributions. The Company expects to increase this number to 10% of invested assets during 2008. We continue to invest primarily in bonds of U.S. Government-sponsored enterprises, such as FNMA and FHLMC.

Reserves. The change in future policy benefit reserves increased from $30.7 million in 2006 to $36.4 million in 2007, predominantly due to an improvement in persistency on our international life business, as well as a change in product mix, which resulted in larger first year reserves. During 2007 and 2006, a shift in products sold occurred with the addition of sales in the Pacific Rim, which resulted in a more rapid rise in reserves. The change in future policy benefit reserves increased from $23.6 million in 2005 to $30.7 million in 2006, due predominantly to increased persistency on our business and an increase and change in product mix in new business. Sales of certain endowment products in the Taiwanese market, which build reserves at a much higher rate, contributed to the increase.

Policyholder Dividends. Policyholder dividends increased 18.9% during 2007 to $6.4 million from $5.4 million in 2006 and $4.8 million in 2005, due to improved persistency and the continued sale of participating ordinary whole life products in the international market. All of our international policies are participating, and the improvement in persistency and increase in new business on our international business have contributed to the growth in dividends. The dividends are factored into the premiums and have no impact on profitability.

Claims and Surrenders. As noted in the table below, claims and surrenders decreased 2.7% from $56.3 million in 2006 to $54.7 million in 2007. The 2007 decrease primarily related to a decline in claims from Hurricane Katrina in 2007, which were a negative $711,000 because of a release of liabilities related to the expiration of the extended claims filing deadline. Hurricane related claims were $3.0 million in 2006 and $1.6 million in 2005.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

	Years ended December 31,		
	2007	**2006**	**2005**
		(In thousands)	
Death claims	$ 20,720	21,686	22,404
Surrender expenses	17,989	17,205	15,369
Endowments	12,835	10,786	9,021
Property claims	1,090	5,194	3,685
Other policy benefits	1,783	849	780
Accident and health benefits	311	541	446
Total claims and surrenders	$ 54,728	56,261	51,705

Death benefits declined in 2007 compared to 2006, despite the growth in our business written, because of more restrictive underwriting rules, as well as strict claims adjudication procedures that the Company has developed over its history. Death benefits also decreased in 2006 compared to 2005.

Policy surrenders increased 4.6% in 2007 to $18.0 million from $17.2 million in 2006, up from $15.4 million in 2005. The increase in surrender expense is in line with management expectations, considering the inforce business has increased over the last three years. Surrenders as a percent of inforce business were 0.4% in 2007, 2006 and 2005.

Endowment benefits increased 19.0% from $10.8 million in 2006 to $12.8 million in 2007. Endowments totaled $9.0 million in 2005. We have a series of international policies that carry an immediate endowment benefit of an amount elected by the policy owner. This endowment is factored into the premium of the policy and is paid annually. These benefits have been particularly popular in the Pacific Rim, where the Company has experienced increased business in recent years. Like policy dividends, endowments are factored into the premium and, as such, the increase should have no adverse impact on profitability.

Property claims decreased 79.0% in 2007, from $5.2 million in 2006 to $1.1 million in 2007, and were $3.7 million in 2005. In 2007, the Company began to experience a dramatic decline in property claims that adversely affected the business in 2006 and 2005. Hurricane claims in 2007 were a negative $711,000. Of the 2006 property claims, $3.0 million were due to Hurricane Katrina, while in 2005, $1.6 million were due to Hurricanes Katrina and Rita.

Commissions. Commissions decreased slightly during 2007 to $35.6 million from $35.7 million in 2006 and $33.0 million in 2005, primarily due to the new business issued during the period. Commissions were flat in 2007 compared to 2006, even though premiums were up 10.0%, due to the increased amount of renewal premiums, which pay a lower commission.

Underwriting, Acquisition and Insurance Expense. Underwriting, acquisition and insurance expenses were unchanged in 2007 from 2006 at $27.6 million. The 2006 increase to $27.6 million from $25.4 million in 2005 was largely attributable to higher cost of employee benefits, higher accounting fees related to financial statement and Sarbanes-Oxley compliance, and an increased contribution to the Company s profit sharing plan.

Deferred Policy Acquisition Costs. Capitalized deferred policy acquisition costs (DAC) decreased 2.9% from $27.0 million in 2006 to $26.2 million in 2007. These costs were $24.4 million in 2005. The 2007 decrease from 2006 was primarily related to flat new life production discussed above, and tracked consistently with the slight decrease in commissions. Amortization of these costs was $12.5 million, $11.4 million and $10.3 million in 2007, 2006 and 2005, respectively. The write-off of DAC on internal replacements under The American Institute of Certified Public Accountants (AICPA) Statement of Position, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts* (SOP 05-1), added $917,000 to amortization in 2007.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

At our lead Life Insurance segment subsidiary, CICA, deferred acquisition cost assumptions had not been revised in several years. A new GAAP era was created for new issues beginning in 2006 to reflect the better mortality and persistency being experienced in the last few years.

Cost of Customer Relationships Acquired and Other Intangibles. Amortization of cost of customer relationships acquired and other intangibles decreased from $5.9 million in 2005, to $4.7 million in 2006 and $3.2 million in 2007. Amortization of these items related to Security Plan was $3.8 million in 2005, $2.3 million in 2006 and $2.0 million in 2007. The decrease resulted from an increase in amortization of $2.3 million in 2005 related to the Louisiana hurricanes. In conjunction with this loss recognition, we revised our amortization methodology to (i) reduce projections of future collected premiums by approximately 4.0% and (ii) to amortize the acquired paid-up block over inforce balances, which resulted in a $400,000 decrease in amortization expense in 2006. This change also reduced 2007 amortization.

The goodwill of CNLIC, a reporting unit within the Life Insurance segment, showed that it was impaired at December 31, 2006. Due to significant declines in new business issued by CNLIC, the fair value of this reporting unit was below its carrying value. As a result, an impairment loss of $1,016,000 was recognized in the fourth quarter of 2006. The fair value of that reporting unit was estimated using the present value of estimated future cash flows. The remaining goodwill is associated with CICA. At December 31, 2007, there was no impairment of this goodwill.

Federal Income Tax. Federal income tax expense was $4.5 million, $4.7 million and $6.9 million in 2005, 2006 and 2007, respectively. This represents effective tax rates of 38.1%, 35.0% and 29.5%, respectively. In 2005, a valuation allowance in the amount of $1.1 million was established, which added 9.3% to our effective tax rate. The 2005 allowance was due to the anticipated sale of CNLIC, which had a $1.1 million net deferred tax asset at December 31, 2005, primarily related to net operating losses that would not be available in future years as CNLIC would no longer be part of the Company s consolidated group. The 2006 tax rate was higher due to a write-off of $1.0 million of goodwill, which has no tax effect. In 2007, the valuation allowance was released in the amount of $1.1 million as the CNLIC sale agreement was terminated and the Company s plan is to now consolidate CNLIC in the Company s life-nonlife tax return in 2008. CICA should have sufficient life income to absorb the CNLIC net operating losses. This release of the valuation allowance reduced our effective tax rate by 4.7%. (See Note 10 of the Notes to Consolidated Financial Statements for additional information on Federal income tax.)

Liquidity and Capital Resources

Liquidity refers to a company s ability to generate sufficient cash flows to meet the needs of its operations. Liquidity is managed on insurance operations to ensure stable and reliable sources of cash flows to meet obligations and is provided by a variety of sources.

Liquidity requirements of Citizens are met primarily by funds provided from operations. Premium deposits and revenues, investment income and investment maturities are the primary sources of funds, while investment purchases, policy benefits, and operating expenses are the primary uses of funds. We historically have not had to liquidate investments to provide cash flow and did not do so in 2007. During the fourth quarter of 2005 and the first six months of 2006, however, SPFIC sold approximately $3.1 million of bonds in order to meet the cash outflow related to claims from Hurricanes Katrina and Rita. Such sales were not needed in the second half of 2006. Additionally, in early 2005, management chose to pay off the $30 million in debt incurred in the Security Plan transaction. Our investments consist primarily of marketable debt securities that could be readily converted to cash for liquidity needs. See Note 8 of the Notes to Consolidated Financial Statements for a table disclosing our contractual obligations.

A primary liquidity concern is the risk of an extraordinary level of early policyholder withdrawals. We include provisions within our insurance policies, such as surrender charges, that help limit and discourage early withdrawals. Since these contractual withdrawals, as well as the level of surrenders experienced, were largely consistent with our assumptions in asset liability management, our associated cash outflows have, to date, not had an adverse impact on our overall liquidity. Individual life insurance policies are less susceptible to withdrawal than annuity reserves and deposit liabilities because policyholders may incur surrender charges and undergo a new underwriting process in order to obtain a new insurance policy. Cash flow projections

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

and cash flow tests under various market interest rate scenarios are also performed annually to assist in evaluating liquidity needs and adequacy. We currently anticipate that available liquidity sources and future cash flows will be adequate to meet our needs for funds.

In the past, cash flows from our insurance operations have been sufficient to meet current needs. Cash flows from operating activities were $37.9 million, $39.1 million and $34.5 million for the years ended December 31, 2007, 2006, and 2005, respectively. We have traditionally also had significant cash flows from both scheduled and unscheduled investment security maturities, redemptions, and prepayments. These cash flows, for the most part, are reinvested in fixed income securities. Net cash outflows from investment activity totaled $58.8 million, $33.6 million and $22.6 million for the years ended December 31, 2007, 2006 and
2005, respectively. The outflows from investing activities for the year ended December 31, 2007, primarily related to the investment of excess cash and cash equivalents generated from operations during 2007 and the investment of proceeds from our registered direct offering of $18.8 million of Class A common stock completed in late 2007.

Stockholders equity at December 31, 2007 was $176.2 million compared to $139.6 million at December 31, 2006. The 2007 increase was largely due to income earned during the period, a decrease in unrealized investment gains of $4.2 million, and the accretion of deferred issuance costs and discounts on preferred stock of $1.3 million. Also, in the fourth quarter of 2007, the Company completed a registered direct offering of approximately 2.7 million shares of its Class A common stock, netting proceeds of $17.1 million.

Investments increased to $585.3 million at December 31, 2007 from $515.1 million at December 31, 2006. Invested assets grew by 13.6% during 2007. Fixed maturities are categorized into fixed maturities available-for-sale, which are carried in our consolidated financial statements at fair value. Fixed maturities available-for-sale were 85.5% of investments at December 31, 2007.

Policy loans comprised 4.4% of invested assets at December 31, 2007 compared to 4.6% at December 31, 2006. These loans, which are secured by the underlying policy values, have yields ranging from 5% to 12% and maturities that are related to the maturity or termination of the applicable policies. Management believes that we maintain adequate liquidity despite the uncertain maturities of these loans.

Our cash balances at our primary depositories were significantly in excess of Federal Deposit Insurance Corporation coverage at December 31, 2007 and December 31, 2006. Management monitors the solvency of all financial institutions in which we have funds to minimize the exposure for loss. Management does not believe we are at significant risk for such a loss. During 2008, we intend to continue to utilize high grade commercial paper as a cash management tool to minimize excess cash balances and enhance returns.

In the wake of bankruptcy filings by large corporations several years ago, concern was raised regarding the use of certain off-balance sheet special purpose entities such as partnerships to hedge or conceal losses related to investment activity. We do not utilize special purpose entities as investment vehicles, nor are there any such entities in which we have an investment that engage in speculative activities of any nature, and we do not use such investments to hedge our investment positions. The Company has no subprime or collateralized debt obligations.

The NAIC has established minimum capital requirements in the form of Risk-Based Capital (RBC). Risk-based capital factors the type of business written by an insurance company, the quality of its assets, and various other aspects of an insurance company s business to develop a minimum level of capital called authorized control level risk-based capital and compares this level to an adjusted statutory capital that includes capital and surplus as reported under statutory accounting principles, plus certain investment reserves. Should the ratio of adjusted statutory capital to control level risk-based capital fall below 200%, a series of actions by the affected company would begin. At December 31, 2007 and 2006, all of our insurance subsidiaries were above required minimum levels.

In late 2007, the Company did not renew its $75 million line of credit. Management believes that if such borrowing capacity is needed in the future, the Company will be able to secure another line of credit.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Parent Company Liquidity and Capital Resources

We are a holding company and have had minimal operations of our own. Our assets consist of the capital stock of our subsidiaries. Accordingly, our cash flows depend upon the availability of statutorily permissible payments, primarily payments under management agreements from our two primary life insurance subsidiaries, CICA and SPLIC. The ability to make payments is limited by applicable laws and regulations of Colorado, CICA s state of domicile, and Louisiana, Security Plan s state of domicile, which subject insurance operations to significant regulatory restrictions. These laws and regulations require, among other things, that these insurance subsidiaries maintain minimum solvency requirements and limit the amount of dividends these subsidiaries can pay to the holding company. We historically have not relied upon dividends from subsidiaries for our cash flow needs and we do not intend to do so in the future.

Critical Accounting Policies

Our critical accounting policies are as follows:

Policy Liabilities

Future policy benefit reserves have been computed by the net level premium method with assumptions as to investment yields, dividends on participating business, mortality and withdrawals based upon our experience. The preparation of financial statements requires management to make estimates and assumptions that affect the reported amount of policy liabilities and the increase in future policy benefit reserves. Management s judgments and estimates for future policy benefit reserves provide for possible unfavorable deviation.

At December 31, 2007, Security Plan s paid-up policies did not convert to our new policy administration system. Because of this, reserves related to these policies were estimated based on the ratio of statutory reserves at December 31, 2007 compared to September 30, 2007, multiplied by the GAAP reserves at September 30, 2007.

We continue to use the original assumptions (including a provision for the risk of adverse deviation) in subsequent periods to determine the changes in the liability for future policy benefits (the lock-in concept) unless a premium deficiency exists. Management monitors these assumptions and has determined that a premium deficiency does not exist at December 31, 2007. Management believes that our policy liabilities and increase in future policy benefit reserves as of and for the years ended December 31, 2007 and 2006 are based upon assumptions, including a provision for the risk of adverse deviation, that do not warrant revision. The relative stability of these assumptions and management s analysis is discussed below.

Deferred Policy Acquisition Costs

Acquisition costs, consisting of commissions and policy issuance, underwriting and agency expenses that relate to and vary with the production of new business, are deferred. These deferred policy acquisition costs are amortized primarily over the estimated premium paying period of the related policies in proportion to the ratio of the annual premium recognized to the total premium revenue anticipated, using the same assumptions as were used in computing liabilities for future policy benefits.

We utilize the factor method to determine the amount of costs to be capitalized and the ending asset balance. The factor method is based on the ratio of premium revenue recognized for the policies in force at the end of each reporting period compared to the premium revenue recognized for policies in force at the beginning of the reporting period. The factor method ensures that policies that lapsed or surrendered during the reporting period are no longer included in the deferred policy acquisition costs calculation. The factor method limits the amount of deferred costs to its estimated realizable value, provided actual experience is comparable to that contemplated in the factors.

Inherent in the capitalization and amortization of deferred policy acquisition costs are certain management judgments about what acquisition costs are deferred, the ending asset balance and the annual amortization. Approximately 80% of our capitalized deferred acquisition costs are attributed to first year excess commissions. The remaining 20% are attributed to costs that vary with and are directly related to the acquisition of new and renewal insurance business. Those costs generally include costs related to the production, underwriting and issuance of new business.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

A recoverability test that considers, among other things, actual experience and projected future experience is performed at least annually. These annual recoverability tests initially calculate the available premium (gross premium less benefit net premium less percent of premium expense) for the next 30 years. The available premium per policy and the deferred policy acquisition costs per policy are then calculated. The deferred policy acquisition costs are then evaluated over two methods utilizing reasonable assumptions and two other methods using pessimistic assumptions. The two methods using reasonable assumptions illustrate an early-deferred policy acquisition recoverability period. The two methods utilizing pessimistic assumptions still support early recoverability of our aggregate deferred policy acquisition costs. Based upon the analysis performed to only capitalize expenses that vary with and are directly related to the acquisition of new and renewal insurance business, utilization of the factor method and annual recoverability testing, management believes that our deferred policy acquisition costs and related amortization as of and for the years ended December 31, 2007, 2006 and 2005 limits the amount of deferred costs to its estimated realizable value.

The American Institute of Certified Public Accountants (AICPA) issued Statement of Position (SOP) 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts* (SOP 05-1), which defines an internal replacement as a modification in product benefits, features, rights, or coverages that occurs by the exchange of a contract for a new contract, or by amendment, endorsement, or rider to a contract, or by the election of a feature or coverage within a contract. Under SOP 05-1, modifications that result in a substantially unchanged contract will be accounted for as a continuation of the replaced contract. A replacement contract that is substantially changed will be accounted for as an extinguishment of the replaced contract resulting in a release of unamortized deferred acquisition costs and unearned inducements associated with the replaced contract. Also under SOP 05-1, the unamortized deferred acquisition cost is written off when a policy is reinstated that had previously lapsed. We implemented SOP 05-1 in the first quarter of 2007, and as a result, the Company wrote off $917,000 of DAC on reinstated policies during the year ended December 31, 2007.

Valuation of Investments in Fixed Maturity and Equity Securities

Our fixed maturities consist primarily of bonds. Prior to December 31, 2006, fixed maturities that the Company had the ability and intent to hold to maturity were carried at amortized cost. Fixed maturities that may be sold prior to maturity to support the Company s investment strategies are considered held as available-for-sale and carried at fair value as of the balance sheet date. Equity securities (including non-redeemable preferred stock) are considered available-for-sale and are reported at fair value.

At December 31, 2007, 68.3% of our fixed maturity securities were invested in U.S. Government-sponsored enterprises or securities backed by the U.S. Government. We evaluate the carrying value of our fixed maturity and equity securities at least quarterly. A decline in the fair value of any fixed maturity or equity security below cost that is deemed other-than-temporary is charged to earnings resulting in the establishment of a new cost basis for the security. The new cost basis is not changed for subsequent recoveries in the fair value of the fixed maturity or equity security. With the exception of Security Plan, virtually all of our subsidiaries fixed maturity investments are in U.S. Government-sponsored enterprises or U.S. Government instruments. Security Plan has significant investments in corporate and municipal bonds. Based upon our emphasis on investing in fixed maturity securities primarily composed of obligations of U.S. Government-sponsored corporations, our intent and ability to hold temporarily impaired fixed maturities until recovery, and our analysis of whether declines in fair value below cost are temporary or other-than-temporary, management believes that our investments in fixed maturity at December 31, 2007 were not impaired, and no other-than-temporary losses needed to be recorded. The Company s equity securities consist of mutual funds acquired in 2007, and thus any declines in value have recently arisen. The Company will continue to monitor these investments. At December 31, 2007, there were no other-than-temporary impairments.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

General

The nature of our business exposes us to investment market risk. Market risk is the risk of loss that may occur when changes in interest rates and public equity prices adversely affect the value of our invested assets. Interest rate risk is our primary market risk exposure. Substantial and sustained increases and decreases in market interest rates can affect the fair value of our investments. The fair value of our fixed maturity portfolio generally increases when interest rates decrease, and decreases when interest rates increase.

Market Risk Related to Interest Rates

Our exposure to interest rate changes results from our significant holdings of fixed maturity investments, policy loans and mortgage loans on real estate, all of which comprised over 87% of our cash and investment portfolio as of December 31, 2007. These investments are mainly exposed to changes in U.S. Treasury rates. Our fixed maturities investments include U.S. Government-sponsored corporations, U.S. Government bonds, securities issued by government agencies, and corporate bonds. Approximately 68.3% of the fixed maturities we owned at December 31, 2007 are instruments of U.S. Government-sponsored enterprises, or are backed by U.S. Government agencies.

To manage interest rate risk, we perform periodic projections of asset and liability cash flows to evaluate the potential sensitivity of our investments and liabilities. We assess interest rate sensitivity with respect to our available-for-sale fixed maturities investments using hypothetical test scenarios that assume either upward or downward 100 basis point shifts in the prevailing interest rates.

The following tables set forth the potential amount of unrealized gains (losses) that could be caused by 100 basis point upward and downward shifts on our available-for-sale fixed maturities investments as of the dates indicated.

	Decreases in Interest Rates (In thousands)		
	100 Basis Points	200 Basis Points	300 Basis Points
December 31,			
2007	$ 18,594	29,582	42,812
2006	$ 20,429	36,129	55,312

	Increases in Interest Rates (In thousands)		
	100 Basis Points	200 Basis Points	300 Basis Points
December 31,			
2007	$ (22,821)	(51,006)	(79,768)
2006	$ (32,305)	(59,302)	(92,949)

While the test scenario is for illustrative purposes only and does not reflect our expectations regarding future interest rates or the performance of fixed-income markets, it is a near-term change that illustrates the potential impact of such events. Due to the composition of our book of insurance business, we believe it is unlikely that we would encounter large surrender activity due an interest rate increase that would force us to dispose of our fixed maturities at a loss.

There are no fixed maturities or other investments that we classify as trading instruments. At December 31, 2007 and 2006, we had no investments in derivative instruments, nor does the Company have any subprime or CDO (collateralized debt obligation) risk.

Market Risk Related to Equity Prices

Changes in the level or volatility of equity prices affect the value of equity securities we hold as investments. However, our equity investments portfolio was less than 7% of our total investments at December 31, 2007. Thus, we believe that significant decreases in the equity markets would have an immaterial impact on our total investment portfolio. (See also Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operations.)

Item 8. Financial Statements and Supplementary Data

Reference is made to the financial statements, the notes thereto, and the report of our independent registered public accounting firm and predecessor independent registered public accounting firm, as listed on the table of contents.

All other schedules have been omitted as the required information is inapplicable or the information required is presented in the financial statements or the notes thereto filed elsewhere herein.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

During the 24 months preceding the date of the audited financial statements included herein, we have not reported on Form 8-K any disagreements between our independent registered accounting firms and us. On March 23, 2006, we reported the termination of KPMG LLP as our principal independent registered public accounting firm and the engagement of Ernst & Young LLP as our successor independent registered public accounting firm.

Item 9A. Controls and Procedures

(a) Disclosure Controls and Procedures

We have established disclosure controls and procedures to ensure, among other things, that material information relating to our Company, including its consolidated subsidiaries, is made known to our officers who certify our financial reports and to the other members of our senior management and the Board of Directors.

Our Chief Executive Officer (CEO) and our Chief Financial Officer (CFO) are responsible for establishing and maintaining our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)). Based upon an evaluation at the end of the period, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this annual report.

(b) Management Report on Internal Control over Financial Reporting

Management of our Company is responsible for establishing and maintaining adequate internal control over financial reporting. Management assessed our internal control over financial reporting based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management has concluded that we maintained effective internal control over financial reporting as of December 31, 2007.

Our independent registered public accounting firm, Ernst & Young LLP has issued an attestation report on management s assessment of our internal control over financial reporting. The report is included in item 9A(d) of this annual report.

(c) Change in Internal Control over Financial Reporting

As of December 31, 2007, we have implemented certain changes in internal control that remediated the material weakness in our financial statement close process that we reported at December 31, 2006. Such changes included:

Hired a new Vice President of Accounting, with significant statutory accounting and U.S. GAAP experience;

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Hired a new Chief Actuary with a background in U.S. GAAP financial reporting;

Ensured that all of our financial statement closing process journal entries for each of our subsidiaries have been recorded in their general ledgers (previously, many such entries were in Excel only);

Created the position of Vice President of Financial Reporting, committing resources to enable the timely review of supporting work papers for prior and current accounting periods and to prevent and detect misapplications of U.S. GAAP;

Strengthened accounting work paper review by senior members of management, including our VP Financial Reporting and CFO, to ensure completeness and accuracy of supporting work papers and schedules, including formalized sign-off processes;

Implemented additional layers of review at greater levels of precision over our financial statement close process; and

Strengthened our preparation and review of annual accounting and year-end disclose analysis.

These corrective actions have remediated the December 31, 2006 material weakness.

(d) Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting

Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting

The Board of Directors and Shareholders of Citizens, Inc.:

We have audited Citizens, Inc. s internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Citizens, Inc. s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management Report on Internal Control over Financial Reporting under Item 9A of the Index. Our responsibility is to express an opinion on the company s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Citizens, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on the COSO criteria.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial position as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders equity and comprehensive income, and cash flows for each of the two years in the period ended December 31, 2007 of Citizens, Inc. and subsidiaries and our report dated March 14, 2008 expressed an unqualified opinion thereon.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Citizens, Inc.:

We have audited the accompanying consolidated statements of financial position of Citizens, Inc. and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders equity and comprehensive income, and cash flows for each of the two years in the period ended December 31, 2007. Our audit also included the financial statement schedules II, III, and IV under Item 15 of the Index. These financial statements and schedules are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements and schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Citizens, Inc. and subsidiaries at December 31, 2007 and 2006, and the consolidated results of their operations and their cash flows for each of the two years in the period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedules, when considered in relation to the basic financial statements taken as a whole, present fairly in all material respects the information set forth therein.

As described in Note 1(p) to the consolidated financial statements, in 2007 the Company adopted American Institute of Certified Public Accountants Statement of Position 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modification or Exchanges of Insurance Contracts*. Also, as described in Note 1(p) to the consolidated financial statements, during the fourth quarter of 2006, the Company adopted Securities and Exchange Commission Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in the Current Year Financial Statements* (SAB No. 108). In accordance with the transition provisions of SAB No. 108, the Company recorded an adjustment to retained deficit effective January 1, 2006 for the correction of prior period misstatements.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Citizens, Inc. s internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 14, 2008 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Citizens, Inc.:

We have audited the accompanying consolidated statements of operations, stockholders equity and comprehensive income, and cash flows of Citizens, Inc. and subsidiaries (the Company) for the year ended December 31, 2005. In connection with our audit of the consolidated financial statements, we also have audited the amounts related to the year ended December 31, 2005 in financial statement schedules II to IV. These consolidated financial statements and financial statement schedules are the responsibility of the Company s management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedules based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the results of operations and the cash flows of Citizens, Inc. and subsidiaries for the year ended December 31, 2005, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the amounts related to the year ended December 31, 2005 in the related financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

Supplemental disclosures of non-cash investing and financing activities:

The Company recognized accretion of deferrals and discounts on its Convertible Preferred Stock amounting to $1,337,000, $1,337,000 and $1,418,000 in 2007, 2006 and 2005, respectively. These net discounts and deferrals have increased the carrying amount of the Convertible Preferred Stock in the statement of financial position. The annual dividend to the preferred stockholders amounted to $665,000, $686,000 and $558,000 in 2007, 2006 and 2005, respectively.

In 2005, the Company sold real estate and made a mortgage loan for $185,000, in connection therewith. Additionally, an airplane was sold and a note payable for $875,000 was received from the buyer.

See accompanying notes to consolidated financial statements.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements
December 31, 2007, 2006 and 2005

(1) Summary of Significant Accounting Policies

(a) Principles of Consolidation

The consolidated financial statements include the accounts and operations of Citizens, Inc. (Citizens), incorporated in the state of Colorado on November 8, 1977, and its wholly-owned subsidiaries, CICA Life Insurance Company of America (CICA), Computing Technology, Inc. (CTI), Funeral Homes of America, Inc. (FHA), Insurance Investors, Inc. (III), Citizens National Life Insurance Company (CNLIC), Security Plan Life Insurance Company (SPLIC), and Security Plan Fire Insurance Company (SPFIC). All significant inter-company accounts and transactions have been eliminated. Citizens and its wholly owned consolidated subsidiaries are collectively referred to as the Company, we, or our.

Citizens provides life and health insurance policies through three of its subsidiaries - CICA, SPLIC and CNLIC. CICA issues ordinary whole-life policies internationally and domestically, and burial insurance, pre-need policies, and accident and health related policies, throughout the Midwestern and southern United States. SPLIC offers home service life insurance in Louisiana and Mississippi, and SPFIC, a wholly owned subsidiary of SPLIC, writes a limited amount of property insurance in Louisiana.

CTI provides data processing systems and services as well as furniture and equipment to the Company. III provides aviation transportation to the Company. FHA is a funeral home operator.

(b) Basis of Presentation

The accompanying consolidated financial statements of the Company and its wholly owned subsidiaries have been prepared in conformity with U.S. Generally Accepted Accounting Principles (U.S. GAAP).

(c) Investments

Fixed maturities consist primarily of bonds. The Company does not classify any fixed maturities as held-to-maturity. Fixed maturities that may be sold prior to maturity to support the Company s investment strategies are considered held as available-for-sale and carried at fair value. Equity securities (including non-redeemable preferred stock) are considered available-for-sale and are reported at fair value.

Unrealized appreciation (depreciation) of equity securities and fixed maturities held as available-for-sale is shown as a separate component of stockholders equity, net of tax, and is a separate component of comprehensive income.

A decline in the fair value of any available-for-sale security below cost that is deemed other than temporary is charged to earnings. This results in the establishment of a new cost basis for the security.

Mortgage loans on real estate and policy loans are reported at unpaid principal balances.

Real estate and other long-term investments consist primarily of land and buildings that are recorded at the lower of fair value, minus estimated costs to sell, or depreciated cost. If the fair value of the real estate is less than the carrying value, an impairment loss is recognized and charged to earnings.

Premiums and discounts are amortized or accreted over the life of the related security as an adjustment to yield using the effective interest method. Dividend and interest income is recognized when earned. Realized gains and losses for securities classified as available-for-sale are included in earnings and are derived using the specific identification method for determining the cost of securities sold.

The Company had cash equivalents and fixed maturities with an aggregate fair value of $9,607,000 and $6,571,000 at December 31, 2007 and 2006, respectively, on deposit with various state regulatory authorities to fulfill statutory requirements.

Short-term investments are discounted commercial paper with maturities greater than three months, when purchased, and less than one year. They are carried on the balance sheet at amortized cost.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

(d) Premium Revenue and Related Expenses

Beginning in the first quarter of 2006, the Company began accruing premium revenue based on the gross amount due rather than just a portion of that amount, in accordance with Statement of Financial Accounting Standards (FAS) No. 60 *Accounting and Reporting by Insurance Enterprises.* The initial implementation of this accounting treatment, in the amount of $955,000 of income, was recorded in the SAB 108 adjustment discussed in Note 1(p) below.

Premiums on life policies are recognized as earned when due. Due premium on the balance sheet are net of allowances of $1,780,000 in 2007 and $1,440,000 in 2006. Accident and Health policies are recognized as revenue over the contract period on a pro rata basis. Benefits and expenses are associated with earned premiums so as to result in the recognition of profits over the estimated lives of the contracts. This matching is accomplished by means of a provision for future policy benefits and the capitalization and amortization of deferred policy acquisition costs.

Annuity policies, primarily flexible premium fixed annuity products, are accounted for in a manner consistent with accounting for interest bearing financial instruments. Premium receipts are not reported as revenue, rather as deposit liabilities to annuity contracts. The annuity products issued do not include fees or other such charges.

(e) Deferred Policy Acquisition Costs and Cost of Customer Relationships Acquired

Acquisition costs, consisting of commissions and policy issuance, underwriting and agency expenses that relate to and vary with the production of new business, are deferred. These deferred policy acquisition costs are amortized primarily over the estimated premium paying period of the related policies in proportion to the ratio of the annual premium recognized to the total premium revenue anticipated using the same assumptions as were used in computing liabilities for future policy benefits.

The key assumptions used for amortization of deferred policy acquisition costs (DAC) and cost of customer relationships acquired (CCRA) are mortality, persistency and interest earned on investments. In recent years, the Company has experienced better mortality than the previous assumptions presumed. Consequently, management lowered the DAC mortality assumption beginning in 2006, as compared to previous years. Additionally, management changed the DAC persistency assumption beginning in 2006 compared to previous years, due to greater geographic diversity of our business. Specifically, there was an increase of business in the Asian market and a shifting of business within the Latin American markets. Our historical experience reflects that Latin America and Asia behave differently as it relates to persistency. Our historical experience also reflects a difference in behavior among Latin American countries as it relates to persistency. The assumption for interest earned on investments did not materially change between 2007, 2006 and 2005. The CCRA assumptions did not change in 2007 because assumptions are locked in at purchase unless a premium deficiency exists. In the third quarter of 2005, the Company amortized approximately $2.3 million of CCRA in the Home Service segment because of the expected decrease in collected premiums due to Hurricanes Katrina and Rita. Due to the lower life insurance in force amount as reflected in the 2005 write down, the Company adopted a new amortization table dated effective January 1, 2006. The revised amortization table reflects a change in the amount of life insurance in force and not a change in key assumptions.

Due to the reasons mentioned above, the DAC mortality assumption for 2006 and later policy issues was adjusted downward by updating the mortality tables to better reflect improved longevity. However, persistency is the more critical assumption as most policies will lapse before the policyholder dies. Management has seen

an improvement in persistency and has amended the DAC persistency assumption for 2006 and later policy issues to better reflect the actual experience from 1996 to 2005. These changes assume higher persistency through policy year four compared to 2005 but a lower persistency for policy years five and beyond. The consequence of this action was a shift in the amortization of DAC with the net effect being lower amortization in the earlier years. Thus, amortization occurs later in the policy life under the new assumptions.

A new GAAP era was created in 2006 for new CICA policies issued to reflect the better mortality and persistency experienced in the last few years. As a result of using this new GAAP era, DAC amortization was approximately $800,000 lower in 2006, as compared to the amount that would have been calculated using the previous GAAP era. There were no changes in assumptions or new GAAP eras created in 2007.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

The significant majority of the life insurance written by the Company is traditional whole life business. As such, the Company operates under the guidance of FAS 60. In accordance with FAS 60, capitalized acquisition costs are charged to expense using methods that include the same assumptions used in estimating the liability for future policy benefits. Liability assumptions are required under FAS 60 to provide for adverse deviations in experience. Also, original liability assumptions continue to be used in subsequent accounting periods unless a premium deficiency exists. Accordingly, the Company s DAC assumptions also include a provision for adverse deviation, are set at the time of policy issue, and are locked in for the life of the policy unless management concludes that DAC is not recoverable. In such circumstances, DAC is reduced to the amount that is recoverable based on best estimate assumptions and there is a corresponding expense recorded in consolidated results of operations. In selecting the provision for adverse deviation, the Company uses reasonably likely deviations from its best estimate assumptions; thus, in general, a reasonably likely change in the Company s mortality, persistency or interest earned on investments would have minimal effect on DAC amortization.

The Company utilizes the factor method to determine the amount of costs to be capitalized and the ending asset balance. The factor method ensures that policies that lapsed or surrendered during the reporting period are no longer included in DAC or the CCRA calculation. The factor method limits the amount of deferred costs to its estimated realizable value, provided actual experience is comparable to that contemplated in the factors. A recoverability test that considers among other things, actual experience and projected future experience, is performed at least annually.

Deferred policy acquisition costs on universal life contracts are capitalized and amortized over the life of the contract at a constant rate based on the present value of the estimated gross profit amounts expected to be earned over the life of the universal life contracts.

The value of CCRA in the Company s various acquisitions, which is included in cost of customer relationships acquired in the accompanying consolidated financial statements, was determined based on the present value of future profits discounted at rates ranging from 5% to 8.5%. In 2005 the Company recorded additional amortization of $2.3 million related to the Louisiana hurricanes. In conjunction with this loss recognition, management revised the Company s amortization methodology to (a) reduce its projection of future collected premiums by approximately 4% and (b) to amortize the acquired paid up block over in force balances, which resulted in a $400,000 decrease in amortization expense in 2006. As a result, for premium-paying policies, the CCRA is being amortized over the anticipated premium paying period of the related policies. For paid-up policies, amortization is based on the change in in-force balances. Prior to 2006, amortization for premium paying and paid-up policies was amortized over the anticipated premium paying period of the premium paying policies.

(f) Policy Liabilities and Accruals

Future policy benefit reserves for life insurance have been computed by the net level premium method with assumptions as to investment yields, dividends on participating business, mortality and withdrawals based upon the Company s and industry experience, which provide for possible unfavorable deviation.

A new GAAP era was created in 2006 for new CICA policies issued to reflect the better mortality and persistency experienced in the last few years. As a result of using this new GAAP era, reserves were approximately $400,000 lower in 2006, as compared to the amount that would have been calculated using the previous GAAP era. The new GAAP era only affected policies issued beginning in 2006. This prospective change is consistent with FAS 60 guidance. Annuity benefits are carried at accumulated contract values based

on consideration paid by participants and annuity rates of return ranging from 3.0% to 7.5%.

Accident and health reserves are carried based on case-basis estimates for reported claims.

The Company s property business by its nature requires contingencies for loss reserves and claim costs resulting from specific uncertainties that are not considered to be recurring or normal due to their significance or nature. In 2005, Hurricane Katrina devastated the Gulf Coast. The Company suffered losses of $3.7 million in excess of its reinsurance coverage related to this storm. At the end of 2006, the Company was still receiving claims related to Katrina. As a result, loss reserves were increased by $500,000 in anticipation of newly reported or adjusted claims. In 2007, the Company began to experience a significant slowdown in hurricane related claims, and in the third quarter released approximately $425,000 of liabilities related to Hurricane Katrina, as it was determined that no losses were payable on these policies due to the expiration of the August 29, 2007 filing deadline for claims.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

Anticipated investment income is not considered in determining whether a premium deficiency exists with respect to short-duration contracts.

Premium deposits accrue interest at rates ranging from 4.0% to 8.25% per annum. The cost of insurance is included in premium when collected and interest is credited annually to the deposit account.

Policy and contract claims are based on case-basis estimates for reported claims, and on estimates, based on experience, for incurred but unreported claims and loss expenses.

(g) Goodwill and Other Intangible Assets

Goodwill is the difference between the purchase price in a business combination and the fair value of assets and liabilities acquired. Other intangible assets include various state insurance licenses, which have been determined to have an indefinite useful lives. Therefore, these amounts are not amortized. Instead, such assets are subjected to annual impairment analyses, while intangibles with definitive lives are amortized over the life of the respective asset. The Company performed assessments of whether there was an indication that goodwill and intangible assets were impaired on December 31, 2006 and wrote off $1.0 million of goodwill in 2006. No impairments were identified in 2005 or 2007.

(h) Participating Policies

At December 31, 2007 and 2006, participating business approximated 57.6% and 56.4%, respectively, of direct life insurance in force.

Future policy benefits on participating policies are estimated based on net level premium reserves for death and endowment policy benefits ranging from 3% to 8%, and the cash surrender values described in such contract. The average rate of investment yields used in the determination of expected gross margin was 6.0% in 2007, 2006 and 2005. Earnings and dividends on participating policies are allocated based on policies in force.

Policyholder dividends are determined based on the discretion of the Company s Board of Directors. Policyholder dividends are accrued over the premium paying periods of the insurance contract.

(i) Earnings Per Share

Basic earnings per share is computed by dividing income available to common stockholders by the weighted average number of shares of common stock outstanding during each period. Diluted earnings per share is computed under the if-converted method for convertible securities and the treasury stock method for warrants, giving effect to all potential dilutive common stock, including options, warrants and convertible/redeemable preferred stock.

The 2005 stock dividend resulted in the issuance of 2,841,000 Class A shares (including 205,000 treasury shares) and 66,000 Class B shares.

On December 4, 2007, the Company sold approximately 2.7 million shares of Class A common stock in a registered direct public offering. These shares had a very minor effect on weighted average shares, since they were outstanding for such a short period during 2007. The sale resulted in gross proceeds of $18.8 million and net proceeds of $17.1 million, after broker commissions and offering related expenses.

52

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

The following table sets forth the computation of basic and diluted earnings per share:

	Years ended December 31,		
	2007	**2006**	**2005**
	(In thousands, except per share amounts)		
Basic and diluted earnings per share:			
Numerator:			
Net income	$ 16,557	8,677	7,302
Less: Preferred stock dividends	(665)	(686)	(558)
Accretion of deferred issuance costs and discounts on preferred stock	(1,337)	(1,337)	(1,418)
Net income available to common stockholders	$ 14,555	6,654	5,326
Net income allocated to Class A common stock	$ 14,377	6,572	5,260
Net income allocated to Class B common stock	178	82	66
Net income available to common stockholders	$ 14,555	6,654	5,326
Denominator:			
Weighted average shares of Class A outstanding basic	40,519	40,216	40,103
Weighted average shares of Class B outstanding basic and diluted	1,002	1,002	1,002
Total weighted average shares outstanding basic	41,521	41,218	41,105
Basic and diluted earnings per share of Class A common stock	$ 0.35	0.16	0.13
Basic and diluted earnings per share of Class B common stock	$ 0.18	0.08	0.07

In 2007, certain of the warrants on the Convertible Preferred Stock became dilutive. As such, the diluted weighted average shares of Class A stock outstanding for 2007 was 40,574,000. Total diluted weighted average shares was 41,576,000. Diluted earnings per Class A share is unchanged from basic earnings per share at $0.35. The basic and diluted weighted average shares outstanding for the year ended December 31, 2006 were 41,218,000, and were 41,105,000 for the year ended December 31, 2005.

The Series A-1 and A-2 Convertible Preferred Stock is anti-dilutive because the amount of the dividend and accretion of deferred issuance costs and discounts for the years ended December 31, 2007, 2006 and 2005 per Class A common stock share obtainable on conversion exceeds basic income per share available to common stockholders. The warrants were anti-dilutive in 2006 and 2005 because the exercise price was in excess of the average Class A common stock market price for those years.

(j) Income Taxes

Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their

respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered. Valuation allowances are recorded as needed to reduce deferred tax assets to the amounts the Company expects to realize.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

(k) Property and Equipment

Property and equipment, including leasehold improvements, are carried at cost less accumulated depreciation. Depreciation of property and equipment is computed using the straight-line method over the useful lives of the assets, ranging from three to thirty years. We amortize leasehold improvements over the shorter of the related lease term or the estimated life of the improvements. The Company has no capital leases.

Following is a summary of property and equipment:

	At December 31, 2007	2006
	(In thousands)	
Property and equipment		
Home office land and buildings	$ 6,475	6,754
Furniture and equipment	1,719	1,773
Electronic data processing equipment	3,732	4,036
Automobiles and marine assets	445	394
Airplane	3,282	3,166
Total property and equipment	15,653	16,123
Accumulated depreciation	(8,858)	(8,773)
Net property and equipment	$ 6,795	7,350

(l) Reinsurance Recoverable

Reinsurance recoverable includes expected reimbursements for policyholder claim amounts in excess of the Company s retention, as well as profit sharing and experience refund accruals. Reinsurance recoverable is reduced for estimated uncollectible amounts, if any.

Reinsurance premiums, losses and adjustment expenses are accounted for on a basis consistent with those used in accounting for the original policies issued and the terms of the reinsurance contracts. The cost of reinsurance related to long duration contracts is accounted for over the life of the underlying reinsured policies using assumptions consistent with those used to account for the underlying policies. The cost of reinsurance related to short duration contracts is accounted for over the coverage period. Profit-sharing and similar adjustable provisions are accrued based on the experience of the underlying policies.

(m) Cash Equivalents

The Company considers as cash equivalents all securities whose duration does not exceed 90 days at the date of acquisition.

(n) Depreciation

Depreciation is calculated on a straight-line basis using estimated useful lives ranging from three to ten years. Building improvements are depreciated over the estimated lives of thirty years.

(o) Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

(p) Accounting Pronouncements

In September 2005, the American Institute of Certified Public Accountants (AICPA) issued Statement of Position (SOP) 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts* (SOP 05-1). SOP 05-1 provides guidance on accounting by insurance enterprises for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in SFAS No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*. SOP 05-1 defines an internal replacement as a modification in product benefits, features, rights, or coverages that occurs by the exchange of a contract for a new contract, or by amendment, endorsement, or rider to a contract, or by the election of a feature or coverage within a contract. Under SOP 05-1, modifications that result in a substantially unchanged contract will be accounted for as a continuation of the replaced contract. A replacement contract that is substantially changed will be accounted for as an extinguishment of the replaced contract resulting in a release of unamortized deferred acquisition costs and unearned inducements associated with the replaced contract. SOP 05-1 was implemented in the first quarter of 2007. Later clarification from the AICPA on SOP 05-1 implementation addressed reinstatements of previously lapsed policies. The unamortized DAC of lapsed policies should be written off per the clarification. The Company had previously restored the DAC on lapsed policies that were subsequently reinstated. SOP 05-1 is only applied prospectively for reinstatements occurring in quarters beginning after December 31, 2006. The effect of adopting SOP 05-01 has been to increase DAC amortization by $917,000 over what it would have otherwise been.

In September 2006, the FASB issued FAS No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value in GAAP and requires enhanced disclosures about fair value measurements. However, FAS 157 does not require new fair value measurements. The guidance in FAS 157 will be applied prospectively with the exception of certain financial and hybrid instruments measured at initial recognition under FAS No. 133, *Accounting for Derivative Instruments and Hedging Activities,* and for block discounts of financial instruments. Additionally, FAS 157 will increase the disclosures required. The pronouncement is effective for fiscal years beginning after November 15, 2007. The statement will not have a significant effect on the Company s consolidated financial statements, but could result in additional disclosures.

In February 2007, the FASB issued FAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (FAS 159). FAS 159 permits the option to measure most financial instruments and certain other items at fair value at specified election dates. The change in value represents the unrealized gains and losses that will be included in earnings. The fair value option will generally be applied on an instrument-by-instrument basis and is generally an irrevocable election. FAS 159 is effective for fiscal years beginning after November 15, 2007. The Company will not elect the fair value option for any of its financial assets or liabilities.

On July 13, 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109* (FIN 48), which clarifies the accounting for uncertainty in income tax positions. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of an income tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, and additional disclosures. The effective date of this implementation guidance was January 1, 2007, with the cumulative effect of the change in accounting principles recorded as an adjustment to opening retained earnings. The implementation of FIN 48 had no effect on the Company s consolidated financial statements, as the Company has no significant uncertain tax positions.

On September 13, 2006, the SEC released SAB No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. There are two common approaches used to quantify such errors. Under the first approach, the rollover approach, the error(s) are quantified as the amount by which the current year income statement is misstated. The second approach, the iron curtain approach, quantifies the error as the cumulative amount by which the current year balance sheet is misstated. Exclusive reliance on either approach can produce results that are still misleading. This is possible by either accumulating errors on the balance sheet that may not have been material to any individual income statement, but which nonetheless may misstate one or more balance sheet accounts or by disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

SAB 108 requires companies to quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. This quantification is performed using both a balance sheet and an income statement approach, and errors are to be evaluated under each approach. Thus, a company s financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

The Company adopted SAB 108 effective January 1, 2006. As such, the Company evaluated the balance sheet and prior period income statements to determine if any material misstatements had occurred. The Company identified misstatements in several balance sheet accounts, but determined that no errors were material to any prior year; therefore, prior year financial statements were not amended. The Company s SAB 108 adjustment increased the retained deficit by $3.1 million at January 1, 2006.

The adoption was done through a cumulative adjustment comprised of several error corrections, as shown below:

		AMOUNT (In thousands)	NOTE
Errors corrected in 1-1-2006 cumulative adjustment			
Statutory to GAAP accounting technique misstatements	$	(2,633)	A
Due premium		955	B
SPLIC purchase accounting		(266)	C
SPLIC negative reserves		(544)	C
Other intangibles		(952)	D
Reinsurance recoverables		378	E
Pending life claim liability		(225)	F
Miscellaneous liability		184	G
Intercompany payable elimination		162	H
Property and equipment depreciation		(120)	I
Accident and health excess mortality reserve		(67)	J
Mortgage loan allowance reversal		50	K
Net adjustments other than income taxes		(3,078)	
Deferred income tax effect		1,047	M
Adjustments net of tax		(2,031)	
Correction of current taxes payable		(253)	L
Deferred taxes		(863)	M

A.

The Company has historically used a manual technique for converting its statutory insurance accounting trial balances to a GAAP basis. Due to the nature of this method, certain detail supporting various balance sheet account adjustments was lost through the years. During the process of performing account reconciliations during the third and fourth quarters of 2006, misstatements of these balance sheet accounts were identified. The analysis indicated that these errors occurred prior to 2006. The accounts affected and their net effect included in the beginning SAB 108 adjustment are as follows:

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Commissions payable overstated	541
Agent accounts receivable understated	350
Accrued investment income overstated	(14)
Accident and health reserve understated	(5)
Net increase in retained deficit	$ (2,633)

B. Prior to 2006, the Company recognized premium revenue on its traditional SFAS 60 life insurance policies when received, rather than when due. Also, the future policy benefit reserves were reduced by the net due premium, rather than presented at their gross amount. As of December 31, 2005, there was $4,955,000 of unrecorded gross due premiums receivable, and $4,000,000 of net due premiums netted against future policy benefit reserves. The net effect of correcting this accounting was an increase in pre-tax income of $955,000. Although previously corrected in our first quarter 2006 financial statements, this amount has now been reversed out of 2006 income and is included in the SAB 108 adjustment.

C. When the Company acquired SPLIC in 2004, as part of the beginning purchase accounting balance sheet, the Company initially set up a liability for future payments on operating leases for district offices, which were inappropriately capitalized. This liability had a balance of $497,000 at December 31, 2005. A liability was also initially set up in the beginning purchase accounting balance sheet in the amount of $100,000 for general contingencies, which ultimately was not supportable. These liabilities have been eliminated through the SAB 108 adjustment. The correction of these liabilities would have resulted in additional negative goodwill at the time of acquisition, which was recorded as a reduction of the initial CCRA. As a result, CCRA was also reduced by $863,000 as of December 31, 2005 and has been recorded as a part of the SAB 108 adjustment. The net of these items is an increase in the retained deficit of $266,000.

The Company also determined that certain plans of insurance of SPLIC had negative future policy benefit reserves. Accordingly, an adjustment was recorded in the amount of $544,000.

D. While preparing the first quarter of 2006 financial statements, the Company determined that there was $350,000 of other intangible assets related to state insurance licenses of acquired companies which had been merged into CICA in prior years. These intangible assets should have been written off when the companies were merged and were written off in the first quarter of 2006. While preparing the year-end 2006 financial statements, the Company determined that an additional $602,000 of intangible assets of a previously merged company and intangibles with definite lives should have also been written off. The combined $952,000 reduction of other intangibles was included in the SAB 108 adjustment, $350,000 of which was reversed out of 2006 income.

E. During the preparation of quarterly financial statements in 2006, the Company determined that it had certain adjustable reinsurance contract provisions that had been recorded when settled, rather than when earned. CICA s accidental death benefit reinsurance contract had a favorable experience refund of $216,000 for the 2005 contract year, which should have been accrued at December 31, 2005. SPFIC s catastrophe reinsurance contract had a premium refund of $162,000, which should have been accrued at December 31, 2005. Although previously included in our 2006 quarterly financial statements, the total reinsurance receivable of $378,000 has now been reversed out of 2006 income and is a part of the SAB 108 adjustment.

F. A life claim liability in the amount of $225,000 was erroneously eliminated in 2005 while the Company converted its statutory trial balances to GAAP. This adjustment has been corrected through the SAB 108 adjustment.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

G. During its 2006 account reconciliations, the Company identified $75,000 of expense accruals, $60,000 of state tax accruals and $49,000 of miscellaneous payables that were general reserves established in prior years and not based on known specifics; as such, they were not supportable. The $184,000 total for these items is included in the SAB 108 adjustment.

H. While preparing the year-end 2006 financial statements, it was determined that a prior year $162,000 intercompany payable from the insurance company subsidiaries to Citizens was not eliminated. This amount is included in the SAB 108 adjustment.

I. During its 2006 account reconciliations, a prior year entry to reverse excess statutory accounting depreciation was discovered. This entry was not supportable and is included in the SAB 108 adjustment in the amount of $120,000.

J. During its 2006 account reconciliations, the Company identified $67,000 of accident and health morbidity reserves that were general reserves established in a prior year and not based on known specifics; as such, they were not supportable and are included in the SAB 108 adjustment.

K. An allowance for losses on mortgage loans for $50,000, which was not related to a specific loan, and has existed for many years, was reversed and included in the beginning SAB 108 adjustment.

L. As part of its 2006 account reconciliations, current income taxes payable were analyzed and increased by $253,000. This adjustment was to adjust the December 31, 2005 liability to the 2005 tax returns as filed, and is included in the SAB 108 adjustment.

M. Prior to 2006, the Company used the roll forward method to calculate deferred income taxes. During 2006, the Company began using the tax basis balance sheet method, which identified errors that resulted in an increase to deferred taxes payable at December 31, 2005 of $863,000.

2) Investments

The cost, gross unrealized gains and losses and fair value of investments of fixed maturities and equity securities, as of December 31, 2007 and 2006, are as follows:

December 31, 2007
(In thousands)

	Cost	Gross unrealized gains	Gross unrealized (losses)	Fair value
Fixed Maturities Available-for-Sale:				
U.S. Treasury securities and obligations of U.S. Government corporations and agencies	$ 11,678	1,313		12,991

Equity securities	29		(5)	24
Total equity securities available-for-sale	$ 20,563	(1,168)	(5)	19,390

The largest of group fixed maturities available-for-sale in a gross unrealized loss position for more than 12 months are primarily corporate and mortgage-backed securities acquired in the acquisition of Security Plan in 2004, and under purchase GAAP accounting, have a higher cost basis than historical cost. These premiums are being amortized to net investment income. Management has completed its assessment of other-than-temporary impairment of these securities. Based on our evaluation of the credit worthiness of the issuers and the Company s ability and intent to hold these securities to maturity, none of the unrealized losses are considered to be other-than-temporary.

The next largest group of fixed maturities available-for-sale in a gross unrealized loss situation for more than 12 months are investments in callable instruments issued by U.S. Government-sponsored enterprises and the current loss position primarily relates to changes in the current interest rate environment. Given the nature of the securities involved and the Company s intent and ability to hold these securities to full recovery, management does not believe that the unrealized losses on these instruments will result in realized losses.

The amortized cost and fair value of fixed maturities at December 31, 2007 by contractual maturity are shown below. Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

For investments of available-for-sale fixed maturities and equity securities that have unrealized losses as of December 31, 2006, the cost, gross unrealized losses that have been in a continuous unrealized loss position for less than 12 months, gross unrealized losses that have been in a continuous unrealized loss position for 12 months or longer and fair value are as follows:

The securities not due at a single maturity date are mortgage-backed obligations of U.S. Government corporations and agencies.

The Company had no investments in any one entity that exceeded 10% of stockholders equity at December 31, 2007.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

Major categories of net investment income are summarized as follows:

	Years ended December 31,		
	2007	2006	2005
	(In thousands)		
Investment income on:			
Fixed maturities	$ 26,925	25,386	21,572
Equity securities	2,171	6	16
Mortgage loans on real estate	33	46	330
Policy loans	1,919	1,219	1,494
Long-term investments	(47)	479	468
Other	191	255	579
	31,192	27,391	24,459
Investment expenses	(449)	(416)	(891)
Net investment income	$ 30,743	26,975	23,568

Proceeds and gross realized gains (losses) from sales of fixed maturities available-for-sale for 2007, 2006 and 2005 are summarized as follows:

	Years ended December 31,		
	2007	2006	2005
	(In thousands)		
Proceeds	$ 3,844	$ 14,006	14,569
Gross realized gains	$ 18	$ 1,090	324
Gross realized (losses)	$ (141)	$ (122)	(121)

During 2006, the Company sold the remaining three zero coupon fixed maturity securities in its portfolio, as they did not meet the Company s investment criteria. One of the securities was in the held-to-maturity portfolio. The amortized cost of this security was $2,189,000, with a $283,000 realized gain. After this sale, the one security remaining in the held-to-maturity portfolio was transferred to the available-for-sale portfolio as of December 31, 2006, which resulted in an unrealized gain of $484,000, net of tax, and is included in other comprehensive income.

Proceeds and gross realized gains (losses) from sales of equity securities for 2007, 2006 and 2005 are summarized as follows:

	Years ended December 31,		
	2007	2006	2005
	(In thousands)		
Proceeds	$ 248	334	616
Gross realized gains	$ 30	183	322
Gross realized losses	$ (32)		

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

Realized gains (losses) are as follows:

	Years ended December 31,		
	2007	2006	2005
		(In thousands)	
Realized gains (losses):			
Fixed maturities	$ (123)	1,251	203
Equity securities	(2)	183	322
Property and equipment			505
Other long-term investments	31	(148)	(611)
Net realized gains (losses)	$ (94)	1,286	419

(3) Cost of Customer Relationships Acquired and Goodwill

Cost of customer relationships acquired (CCRA) is summarized as follows:

	Years ended December 31,		
	2007	2006	2005
		(In thousands)	
Balance at beginning of period	$ 34,812	39,259	44,904
SAB 108 adjustment		(863)	
Adjusted balance at beginning of period	34,812	38,396	44,904
Amortization	(3,176)	(3,584)	(5,645)
Balance at end of period	$ 31,636	34,812	39,259

Amortization above is net of accrued interest of $1,910,000, $2,094,000, and $2,382,000 in 2007, 2006 and 2005, respectively.

Estimated amortization of cost of customer relationships acquired in each of the next five years and thereafter, is as follows. Actual future amortization will differ from these estimates due to variances from estimated future withdrawal assumptions.

(In thousands)	
Year	**Amount**
2008	$ 2,750
2009	2,500
2010	2,271
2011	2,074
2012	1,905
Thereafter	20,136

In 2005, the Company recorded additional amortization of $2.3 million, in SPLIC, related to the Louisiana hurricanes. In conjunction with this loss recognition, management revised the Company s amortization methodology to (a) reduce the projection of future collected premiums by approximately 4% and (b) to amortize the acquired paid up block over in force balances, which resulted in a decrease in amortization expense in 2006. As a result, for premium-paying policies, the CCRA is being amortized over the anticipated premium paying period of the related policies. For paid-up

policies, amortization is based on the change in in-force balances. Prior to 2006, amortization for paid-up policies was amortized over the anticipated premium paying period of the premium paying policies.

Goodwill is in the Life Insurance segment and is tested for impairment at December 31 of each year. The analysis of goodwill of CNLIC, a reporting unit within the Life Insurance segment, indicated that it was impaired at December 31, 2006. Due to significant declines in new business issued by CNLIC, the fair value of this reporting unit was below its carrying value. As a result, an impairment loss of $1,016,000 was recognized in the fourth quarter of 2006. The fair value of that reporting unit was estimated using the present value of estimated future cash flows. There was no impairment of goodwill in 2007.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

(4) Policy Liabilities

Various assumptions used to determine the future policy benefit reserves of life insurance include the following: a) valuation interest rates from 4% to 9%, b) mortality assumptions are from the 1955 to 1960, 1965 to 1970, 1975 to 1980 and 2001 Select and Ultimate mortality tables and c) withdrawals are based primarily on actual historical termination rates.

The following table presents information on changes in the liability for life, accident and health and property policy and contract claims for the years ended December 31, 2007, 2006 and 2005.

	Years ended December 31,		
	2007	2006	2005
		(In thousands)	
Policy claims payable at January 1	$ 9,448	11,227	8,282
Less: reinsurance recoverable	2,039	4,337	2,714
Net balance at January 1	7,409	6,890	5,568
SAB 108 adjustment (see note 1(q))		292	
Adjusted balance at January 1	7,409	7,182	5,568
Add: claims incurred, related to:			
Current year	22,985	24,790	27,928
Prior years	(883)	2,838	(1,212)
	22,102	27,628	26,716
Deduct: claims paid, related to:			
Current year	18,736	18,731	21,037
Prior years	5,785	8,670	4,357
	24,521	27,401	25,394
Net balance December 31	4,990	7,409	6,890
Plus: reinsurance recoverable	1,918	2,039	4,337
Policy claims payable, December 31	$ 6,908	9,448	11,227

The favorable development of prior year claim reserves in 2005 reflects claims settling at amounts less than actuarial estimates. These settlements, predominantly on accident and health policies, can vary significantly from the actuarially computed expected experience, particularly on a closed block of business, where policies may lapse resulting in a lower incurred claim amount than would otherwise be expected. The adverse development in 2006 occurred because SPFIC continued to receive new claims in excess of those estimated related to Hurricane Katrina that occurred in 2005. Through December 31, 2006, losses in excess of reinsurance on Hurricane Katrina amounted to more than $3.7 million, resulting in SPLIC infusing $4.0 million of additional capital into SPFIC in 2006. The favorable development in 2007 was the result of the expiration of the extended due date for filing of hurricane claims. The Company released approximately $425,000 of liabilities, as it was determined that no amounts were payable on these policies.

(5) Reinsurance

In the normal course of business, the Company reinsures portions of certain policies that it underwrites to limit disproportionate risks. During 2007 and 2006, the Company retained varying amounts of individual insurance up to a maximum retention of $100,000 on any life. The Company also reinsures 100% of its accidental death benefit rider coverage. Catastrophe reinsurance is in place for our property policies. In 2007 and 2006, this reinsurance provided $10,000,000 of coverage above a $500,000 deductible. In 2005, this reinsurance provided $7,100,000 of coverage above $250,000 for the first event and the same coverage for the second event upon payment of a reinstatement premium. Our health insurance policies are substantially all reinsured on a 100% coinsurance basis. The Company remains contingently liable to the extent that the reinsuring companies cannot meet their obligations under these reinsurance treaties.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

Our amounts recoverable from reinsurers represent receivables from and reserves ceded to reinsurers. We obtain reinsurance from multiple reinsurers, and we monitor concentration as well as financial strength ratings of our principal reinsurers. The ratings by A.M. Best range from B+ to A+. To support and protect our position, we have established and funded a trust to support our liabilities related to accident and health reinsurance ceded to Texas International Life Insurance Company, which represents $8.9 million of the $13.5 million of reinsurance recoverable at December 31, 2007.

Assumed and ceded life reinsurance activity as of December 31, 2007 and 2006 is summarized as follows:

	At December 31,	
	2007	2006
	(In thousands)	
Aggregate assumed life insurance in force	$ 644,242	669,787
Aggregate ceded life insurance in force	$ (273,553)	(258,756)
Net life insurance in force	$ 4,538,202	4,382,530

The Company s reinsurance recoveries on ceded reinsurance were $13.5 million in 2007, $16.0 million in 2006, and $19.1 million in 2005. Premiums and claims and surrenders assumed and ceded for all lines of business for these years are summarized as follows:

	Years ended December 31,		
	2007	2006	2005
	(In thousands)		
Premiums from short-duration contracts:			
Direct	$ 6,803	5,747	5,907
Assumed			
Ceded	(843)	(1,025)	(1,131)
Net premiums earned	5,960	4,722	4,776
Premiums from long-duration contracts:			
Direct	143,763	133,434	123,663
Assumed	1,462	1,126	571
Ceded	(10,280)	(10,786)	(12,736)
Net premiums earned	134,945	123,774	111,498
Total premiums earned	$ 140,905	128,496	116,274
Claims and surrenders assumed	$ 1,422	1,056	561
Claims and surrenders ceded	$ (9,338)	(10,448)	(20,433)

SPFIC has reinsurance agreements in place to protect it from catastrophic events such as Hurricanes Katrina and Rita that struck Louisiana in 2005. The agreements in place during 2005 provided that SPFIC bore responsibility for the first $250,000 of incurred claims. Reinsurers indemnified SPFIC for losses in excess of $250,000 up to $7.1 million per event. Any amount over $7.1 million was SPFIC s responsibility. SPFIC incurred claims of approximately $3.7 million in excess of $7.1 million on Hurricane Katrina. Once the maximum coverage was met, SPFIC had an opportunity to pay for 2nd event coverage, upon payment of approximately $400,000 in premium. SPFIC elected to do so and the claims for Hurricane Rita were covered under this second event reinsurance. Through December 31, 2007, claims related to Hurricane Rita were approximately $5.0 million and were 100% reinsured. For calendar year 2007 and 2006, SPFIC elected to increase the amount of 1st event catastrophe reinsurance to $10 million and increase the retention to $500,000 by paying an annual premium of $840,000 and $799,000 in 2007 and 2006 respectively.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

(6) Stockholders Equity and Restrictions

The two classes of common stock of the Company are equal in all respects, except (a) each Class A share receives twice the cash dividends paid on a per share basis to the Class B common stock; and (b) the Class B common stock elects a simple majority of the Board of Directors of Citizens and the Class A common stock elects the remaining directors.

The table below shows the combined total of all insurance subsidiaries capital and surplus and net income (loss) for life insurance operations and property insurance operations, though these amounts are not all available as dividends to the parent company, because only CICA is directly owned by the Company. All other subsidiaries are owned by CICA.

	At December 31,	
	2007	2006
	(In thousands)	
Combined Statutory Stockholders Equity		
Life insurance operations	$ 110,340	99,693
Property insurance operations	4,570	3,393
Total statutory capital and surplus	$ 114,910	103,086

	Years ended December 31,		
	2007	2006	2005
	(In thousands)		
Combined Statutory Net Income (Loss)			
Life insurance operations	$ 14,644	9,104	7,747
Property insurance operations	1,184	(3,783)	(3,812)
Total statutory net income	$ 15,828	5,321	3,935

Generally, the net assets of the insurance subsidiaries available for transfer to the Company are limited to the lesser of the subsidiary net gain from operations during the preceding year or 10% of the subsidiary net statutory surplus as of the end of the preceding year as determined in accordance with accounting practices prescribed or permitted by insurance regulatory authorities. Under these practices, total capital and surplus at December 31, 2007 was $51.6 million for CICA. Based upon statutory net gain from operations and surplus of CICA as of and for the year ended December 31, 2007, approximately $4.8 million of dividends could be paid to the Company without prior regulatory approval in 2007. Payments of dividends in excess of such amounts would generally require approval by regulatory authorities.

CICA, CNLIC and SPLIC have calculated their risk based capital (RBC) in accordance with the National Association of Insurance Commissioners Model Rule and the RBC rules as adopted by their respective state of domicile. The RBC as calculated for CICA, CNLIC and SPLIC as of December 31, 2007 exceeded levels requiring company or regulatory action.

(7) Convertible Preferred Stock

In July 2004, the Company completed a private placement of $12.5 million of Series A-1 Convertible Preferred Stock (Series A-1 Preferred) to four unaffiliated institutional investors. The Company also issued to the investors warrants to

purchase 544,000 shares of Class A common stock, at an exercise price of $6.95 per share, and unit warrants to purchase Series A-2 Convertible Preferred Stock (Series A-2 Preferred). The conversion, exercise and redemption prices set forth in this Note 7, along with the numbers of shares and warrants (except for the 25,000 Series A-1 Preferred shares referenced below), have been adjusted for the respective stock dividends paid December 31, 2004 and December 30, 2005.

The 25,000 shares of Series A-1 Preferred carry a 4% per annum dividend, payable quarterly in cash or, if certain conditions are met, shares of the Company s Class A common stock. The Company has paid all of the preferred dividends through December 31, 2007 with Class A common stock.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

The Company may, at its option, subject to certain conditions, increase the issued Series A-1 Preferred by $12.5 million to $25 million by requiring the investors to make additional payments for their shares of Series A-1 Preferred.

The Series A-1 Preferred and Series A-2 Preferred are convertible at the option of the investors into shares of Class A common stock at a conversion price of $6.33 per share and a range from $6.11 to $7.26 per share, respectively, and each with a mandatory redemption in five years after their issuance if not converted prior to the redemption date. The Series A-1 Preferred can be converted into an aggregate of 1,975,000 Class A common shares. The Series A-2 Preferred can be converted into an aggregate number of shares based on a variable defined price.

The Series A-1 and A-2 Preferred stock is mandatorily redeemable in 2009. Both may also become redeemable at the option of the holder if certain conditions exist, as described below. Under either scenario, the shares may be redeemed in cash or shares of Class A common stock depending on the circumstances. If redeemed in stock, the redemption price is based on a defined formula.

The provisions of the Series A Preferred Stock require that if (i) at any time after the original issue date of the stock, the closing price of our Class A common stock for any 42 trading days, including a period not less than 5 consecutive trading days, is less than $4.80, or (ii) we issue Class A common stock or common stock equivalents for less than $6.11 per share, then the holders of the Series A Preferred Stock may require us to redeem their shares of Series A Preferred Stock at a price equal to the amount of the original holder s original investment, plus all accrued but unpaid dividends thereon to the date of payment and any applicable penalties. The preferred holders right to require a redemption has not been triggered under clause (i) or clause (ii) above. If the right were to be triggered, that right would terminate if the price per share of Class A common stock exceeds certain defined amounts for certain specified periods of time. Another provision of the Series A Preferred Stock allows the preferred holders to require the Company to repurchase in cash (1) any shares of Series A Preferred Stock still held by the preferred shareholders and (2) any shares of Class A common stock still held by the preferred shareholders pursuant to the provisions of the Preferred Stock if certain defined Events or other conditions occur and are not cured within specified time periods. Those Events or conditions generally relate to the preferred holders ability to resell their Class A common shares.

We will be required to redeem any shares of the Series A Preferred Stock that remain outstanding on the fifth anniversary after their issuance at a price equal to the amount of the original holder s original investment, plus all accrued but unpaid dividends thereon to the date of such payment. If the average price is less than $3.50 per common share, the redemption must be in cash.

The unit warrants, which were also issued on in July 2004, entitled the investors to purchase from the Company up to $5 million of Series A-2 Preferred. Three of the four investors exercised their unit warrants, for an exercise price of approximately $3.75 million, before the unit warrants expired in October 2005. The Series A-2 Preferred shares are convertible into Class A common stock at conversion prices equal to 110% of the average market closing prices of the Class A common stock for the 30 trading days before the respective dates of issuance of the Series A-2 Preferred to the three investors. The redemption period for the Series A-2 Preferred expires on July 12, 2009.

On July 7, 2005, the first of the three investors to do so exercised its unit warrant and purchased 1,338 shares of Series A-2 Preferred for $1,250,000, convertible into Class A common stock at $6.11 per common share, and seven year warrants to purchase 56,000 shares of Class A common stock at an exercise price of $6.72 per share. On September 30, 2005, the second investor exercised its unit warrant, purchasing 1,338 shares of Series A-2 Preferred for $1,250,000, convertible into Class A common stock at $7.26 per common share, and seven year warrants to purchase 47,000 shares of Class A common stock at an exercise price of $7.99 per share.

In early October 2005, the third investor exercised its unit warrant, purchasing 1,338 shares of Series A-2 Preferred for $1,250,000, convertible into Class A common stock at $7.20 per common share, and seven year warrants to purchase 48,000 shares of Class A common stock at an exercise price of $7.92 per share. In October 2005, the remaining series A-2 Preferred Stock and associated warrants expired without the fourth investor exercising its option.

In connection with the issuance of Series A-1 Preferred and associated warrants in July 2004, the finders with respect to these transactions received, as part of the finders compensation, warrants to purchase 99,000 shares of Series A common stock at an exercise price of $6.95 per share. In connection with the issuances of Series A-2 Preferred and associated warrants in 2005, the finders received, as part of the finders compensation, warrants to purchase 28,000 shares of Class A common stock at exercise prices ranging from $6.72 to $7.99.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

The Company initially recognized deferred issuance costs in 2004 of $1,486,000, a discount on the beneficial conversion feature of $3,073,000 and discounts on fair values of options and warrants of $2,719,000, respectively, as offsets against the $12.5 million issuance of the Series A-1 Preferred. This feature represents the difference at July 12, 2004 between the fair value of the Citizens Class A common stock and the effective conversion price, taking into account embedded warrants and options based upon the number of shares to be converted. This intrinsic value reduced the carrying value of the Series A-1 Preferred on the statement of financial position with an equal amount credited to the Class A common stock. In 2007 and 2006, these deferred issuance costs and discounts were amortized to the Class A common stock over the period until redemption using the effective interest method. On July 7, 2005, September 30, 2005 and October 6, 2005, three of the four unaffiliated investors exercised their right to purchase the Series A-2 Convertible Preferred Stock. The Company recognized deferred issuance costs of $247,000 and a premium of $721,000 related to the liability for the option recorded at the date of the respective exercises.

At December 31, 2007 and 2006, there was $583,000 and $942,000 in unaccreted deferred issuance costs and $1,449,000 and $2,427,000 in unaccreted net discount costs, respectively. The redemption value of the series A-1 and A-2 convertible stock was $16,251,000 at December 31, 2007.

The initial July 2004 recognition of the beneficial conversion feature and discounts on fair values of options and warrants resulted in $3,073,000 of additional paid-in capital for the Class A common stock and $2,944,000 of liabilities for options and warrants. Changes in the fair value of options and warrants are recognized in the statement of operations with a corresponding change in the liabilities for options and warrants.

(8) Commitments and Contingencies

We have committed to the following contractual obligations as of December 31, 2007 with the payments due by the period indicated below:

Contractual Obligation	Total	Less than 1 Year	1 to 3 Years	3 to 5 Years	More than 5 Years
	(In Thousands)				
Operating leases	$ 1,108	451	551	90	16
Other	44	44			
Total operating and other leases	1,152	495	551	90	16
Future policy benefit reserves:					
Life insurance	508,209	189	1,060	9,952	497,008
Annuities	22,792	11,923	5,344	2,304	3,221
Accident and health	8,293	8,293			
Total future policy benefit reserves	539,294	20,405	6,404	12,256	500,229
Policy claims payable:					
Life insurance	4,704	4,704			
Accident and health	1,545	1,545			
Casualty	659	659			

Total policy claims payable	6,908	6,908			
Convertible Preferred Stock	16,251		16,251		
Total contractual obligations	$ 563,605	27,808	23,206	12,346	500,245

The payments related to the future policy benefits and policy claims payable reflected in the table above have been projected utilizing assumptions based upon our historical experience and anticipated future experience.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

We are a defendant in a lawsuit originally filed on August 6, 1999 in the Texas District Court, Austin, Texas, now styled *Citizens Insurance Company of America, Citizens, Inc., Harold E. Riley and Mark A. Oliver, Petitioners v. Fernando Hakim Daccach*, *Respondent*, in which a class was originally certified by the trial court and affirmed by the Court of Appeals for the Third District of Texas. We appealed the grant of class status to the Texas Supreme Court which, on March 2, 2007, reversed the Court of Appeal s affirmation of the trial court s class certification order, decertified the class and remanded the case to the trial court for further proceedings consistent with the Texas Supreme Court s opinion. As a result, no class action is presently certified, and plaintiffs counsel is seeking to recertify the class. In order to recertify the class, the lead plaintiff must establish that he is qualified to represent the purported class and that the res judicata effect of a class action will not have a deleterious effect on the putative class members. The underlying lawsuit alleges that certain life insurance policies that we made available to non-U.S. residents, when combined with a policy feature that allowed certain cash benefits to be assigned to two non-U.S. trusts for the purpose of accumulating ownership of our class A common stock, along with allowing the policyholders to make additional contributions to the trusts, were actually offers and sales of securities that occurred in Texas by unregistered dealers in violation of the Texas securities laws. The remedy sought was rescission and return of the insurance premium payments. We believe the lawsuit is without merit and intend to continue a vigorous defense in any remaining proceedings, including any class recertification. If the class is recertified, we could be exposed to costly and time consuming litigation, and an adverse judgment could have a material adverse effect on our results of operations and financial condition. The case is now back before the District judge for her performance of an analysis of the evidence presented to see if it warrants recertification of a class.

Our wholly-owned Louisiana property insurer, SPFIC, has been named as a defendant in a lawsuit filed in the United States District Court, Eastern District of Louisiana, in which plaintiff originally asserted allegations on behalf of a purported class. All class allegations were subsequently dismissed. The suit was filed on August 28, 2006, and was initially styled *Connie Abadie, et al v. Aegis Security Insurance Co., et al.,* or *Connie Abadie*. Most of the property and casualty insurers in Louisiana were also named in this lawsuit. The suit sought payments for claims denied by SPFIC and other declaratory relief related to Hurricane Katrina. It was unclear from the petition how many plaintiffs were insureds of SPFIC. In order to expedite the handling of all the litigation related to Hurricane Katrina, the court consolidated *Connie Abadie* into an action styled *In Re: Katrina Canal Breaches Consolidated Litigation*, or the Katrina Consolidated Litigation. On March 15, 2007, a Master Class Action Insurance Complaint was filed in the Katrina Consolidated Litigation. On March 27, 2007, the Katrina Consolidated Litigation was administratively closed by the court and superseded by the Master Class Action Insurance Complaint. Presently, the Master Class Action Insurance Complaint is stayed by order of the court.

One of the defenses that certain defendants in the Master Class Action Insurance Complaint have asserted is that their insurance policies excluded claims for flood damage, even though the floods resulting from Hurricane Katrina may have been caused by negligence. On August 2, 2007, the U.S. Court of Appeals for the Fifth Circuit ruled in the Master Class Action Insurance Complaint that the flood exclusion language in certain property insurance policies was effective to preclude claims for flood damage by policyholders whose policies include such an exclusion. Although SPFIC was not a party to that lawsuit, its policies do exclude flood damage claims. On September 30, 2007, the judge presiding over the Master Class Action Insurance Complaint issued a ruling holding that specific named peril policies that do not list flooding as one of the named perils do not provide coverage for flooding. SPFIC s policies are named peril policies that do not list flooding as one of the named perils. SPFIC intends to continue to vigorously defend any claims resulting from flood damage on the grounds, among others, that its policies do not cover such damage. The deadline for filing claims against insurers arising out of property damage from Hurricane Katrina was August 29, 2007.

SPFIC is also a defendant in a suit styled *The State of Louisiana v. AAA Insurance*, or Road Home Litigation, which was filed in the Civil District Court for the Parish of Orleans on August 23, 2007 by the state of Louisiana as subrogee/assignee of the insureds of more than 200 different insurance companies. The suit was filed to recover

money that the state of Louisiana paid to certain insureds under the Louisiana Road Home Program for damages resulting from Hurricanes Katrina and Rita. The suit was removed to the United States District Court for the Eastern District of Louisiana on September 11, 2007 and the removal was appealed by the Plaintiff. Responsive pleadings have not yet been filed on behalf of any of the defendant insurers in this case, nor has any discovery been conducted to date.

SPFIC was also named as a defendant in a lawsuit filed in the Civil District Court for the Parish of Orleans on behalf of Karen Cheneau in August 2006. The *Cheneau* suit stems from damages Ms. Cheneau sustained during Hurricane Katrina. In November 2007, plaintiff filed a Motion for Leave to File First Amended Petition to Assert Class Allegations Against SPFIC. The purported class consists of Louisiana citizens who purchased homeowner s insurance coverage and/or contents insurance coverage from SPFIC, whose homes and/or property covered by said policies were damaged as a result of Hurricane Katrina

70

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

and who timely submitted claims to SPFIC for their losses, and who either received no recovery or received less than the proper value of their valued policies as a result of their claims. SPFIC has responded to the Amended Petition by filing Exceptions of No Cause of Action, No Right of Action, Vagueness, Prescription and Failure to Meet Class Action Requirements.

The exceptions have not yet been set for hearing. SPFIC intends to vigorously defend this lawsuit. The Master Class Action Insurance Complaint, the Road Home Litigation and *Cheneau* are in the early stages of litigation, and no discovery has yet occurred. Therefore, it is not possible to evaluate how many claims in those cases relate to SPFIC, or the potential exposure to SPFIC. However, in the event of an adverse outcome, the potential exposure to SPFIC could be significant

On November 8, 2005, SPLIC was named as a defendant in a suit filed by Lilac Todd, who alleges that SPLIC failed to pay her claim for medical expenses arising out of the amputation of one of her limbs. On December 20, 2007, a Supplemental and Amended Petition for Damages was filed pursuant to which plaintiff has asserted class action allegations pursuant to La. C.C.P. art. 591. The purported class is defined as all Louisiana insureds of SPLIC, whose policies contained an incontestability provision identical or similar to Ms. Todd s policy, and whose claims were denied within 10 years of the petition filing on the basis of illnesses, injuries or diseases diagnosed or which occurred at any time preceding the incontestability. SPLIC has responded by filing Exceptions of Vagueness and of Improper Use of the Class Action Procedure, as well as an Answer to the Supplemental and Amended Petition for Damages. The Exceptions have not yet been set for hearing. The Lilac Todd matter is in the early stages of litigation relative to the class allegations and no discovery has yet occurred. Therefore, it is not possible to know how many claims in this case relate to SPLIC, or the potential exposure to SPLIC. SPLIC intends to aggressively defend this action. However, in the event of an adverse outcome, the potential exposure to SPLIC could be significant.

In addition to the legal proceedings described above, we may from time to time be subject to a variety of legal and regulatory actions relating to our future, current and past business operations, including, but not limited to:

- disputes over insurance coverage or claims adjudication;
- regulatory compliance with insurance and securities laws in the United States and in foreign countries;
- disputes with our marketing firms, consultants and employee agents over compensation and termination of contracts and related claims;
- disputes regarding our tax liabilities;
- disputes relative to reinsurance and coinsurance agreements; and
- disputes relating to businesses acquired and operated by us.

In the absence of countervailing considerations, we would expect to defend any such claims vigorously. However, in doing so, we could incur significant defense costs, including not only attorneys fees and other direct litigation costs, but also the expenditure of substantial amounts of management time that otherwise would be devoted to our business. If we suffer an adverse judgment as a result of any claim, it could have a material adverse effect on our business, results of operations and financial condition. We have not established any reserve account on our consolidated financial statements for the adverse financial impact of any of our litigation matters.

(9) Segment and Other Operating Information

Operating Segment Information

The Company has three reportable segments: Life Insurance, Home Service Insurance, and Other Non-Insurance Enterprises. The accounting policies of the segments are in accordance with U.S. GAAP and are the same as those described in the summary of significant accounting policies. The Company evaluates profit and loss performance

based on U.S. GAAP net income before federal income taxes for its three reportable segments.

The measurement of segment profit and loss and segment assets do not include material transactions between segments. The Company has no reportable differences between segments and consolidated operations.

Prior to 2006, the Company operated separate segments for domestic and international life insurance. The Company has determined these segments should be combined as the operations have become less diversified, the marketing philosophies are similar and operations are under common management control. Additionally, internal analysis and reporting is based on total life insurance operations.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities at December 31, 2007 and 2006 are presented below:

	At December 31,	
	2007	2006
	(In thousands)	
Deferred tax assets:		
Future policy benefit reserves	$ 22,918	21,309
Net operating loss carryforwards	6,741	6,768
Due and accrued dividends and expenses	1,122	935
Investments available-for-sale	1,132	3,259
State income tax credits	149	
Other	712	915
Total gross deferred tax assets	32,774	33,186
Valuation allowance		(1,177)
Total gross deferred tax assets net of valuation allowance	32,774	32,009
Deferred tax liabilities:		
Deferred policy acquisition costs, cost of customer relationships acquired and intangible assets	(35,324)	(31,064)
Investments amortization	(1,751)	(1,956)
Other	(509)	(487)
Total gross deferred tax liabilities	(37,584)	(33,507)
Net deferred tax liability	$ (4,810)	(1,498)

A summary of the changes in the components of deferred federal income taxes is as follows:

	At December 31,	
	2007	2006
	(In thousands)	
Deferred tax liabilities:		
Balance January 1	$ (1,498)	(1,621)
SAB 108 adjustment (see note 1(q))		184
Adjusted balance at January 1	(1,498)	(1,437)
Deferred tax expense	(1,202)	(829)
Investments available-for-sale	(2,110)	768
Balance December 31	$ (4,810)	(1,498)

The Company and its subsidiaries had net operating losses at December 31, 2007 available to offset future taxable income of approximately $19.3 million for Federal income tax, expiring at various times through 2027. A portion of

the net operating loss carryforward is subject to limitations under Section 382 of the Internal Revenue Code. At December 31, 2007 and 2006, the Company determined that as a result of the Company s income, projected future income, tax planning strategies, and the nature of the items from which its deferred tax assets are derived, it is more likely than not that its deferred tax assets would be realized. The valuation allowance originally established in 2005 related to net operating losses of CNLIC, due to the proposed sale of CNLIC, was released in 2007, as the sales contract was terminated. In 2008, CNLIC will be eligible to be included in the life-nonlife consolidated tax return of the Company. CICA, the parent of CNLIC is expected to have sufficient taxable income in 2008 to absorb the net operating loss carryovers of CNLIC.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

At December 31, 2007, the Company had accumulated approximately $3,291,000 in its policyholders surplus account. This is a special memorandum tax account into which certain amounts not previously taxed, under prior tax laws, were accumulated. No new additions will be made to this account. Federal income taxes will become payable thereon at the then current tax rate (a) when and if distributions to the shareholder, other than stock dividends and other limited exceptions, are made in excess of the accumulated previously taxed income; or (b) when a company ceases to be a life insurance company as defined by the Internal Revenue Code and such termination is not due to another life insurance company acquiring its assets in a nontaxable transaction. The Company does not anticipate any transactions that would cause any part of this amount to become taxable. However, should the balance at December 31, 2007 become taxable, the tax computed at present rates would be approximately $1,152,000.

The Company implemented SAB 108 as of January 1, 2006 and increased federal income taxes payable by $253,000, from $448,000 to $701,000 as of that date.

The Company implemented FIN 48 during the first quarter of 2007. One provision of FIN 48 requires accruing interest and/or penalties on potential tax deficiencies resulting from unsustainable tax positions. The Company did not accrue any interest or penalties related to uncertain tax positions during year ended December 31, 2007, because such positions are immaterial.

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction and various U.S. states. Most of the Company and its subsidiaries are not subject to examination by U.S. tax authorities for years prior to 2004. Several subsidiaries have open tax years going back as far as 1994 due to net operating loss carry-forwards. Most state tax authorities cannot examine tax years prior to 2002.

(11) Fair Value of Financial Instruments

Estimates of fair values are made at a specific point in time, based on relevant market prices and information about the financial instrument. The estimated fair values of financial instruments presented below are not necessarily indicative of the amounts the Company might realize in actual market transactions. The carrying amount and fair value for the financial assets and liabilities on the consolidated balance sheets at each year-end were as follows:

	At December 31,			
	2007		2006	
	Carrying amount	Fair value	Carrying amount	Fair value
	(In thousands)			
Financial assets:				
Fixed maturities	$ 500,426	500,426	488,318	488,318
Equity securities	35,669	35,669	312	312
Mortgage loans	291	334	456	469
Policy loans	25,490	25,490	23,542	23,542
Cash and cash equivalents	21,123	21,123	24,521	24,521
Short-term investments	17,650	17,650		
Financial liabilities:				
Annuities	22,792	22,792	20,761	20,761

Fair values for fixed income securities and equity securities are based on quoted market prices. In cases where quoted market prices are not available, fair values are based on estimates using present value or other assumptions, including the discount rate and estimates of future cash flows.

Mortgage loans are secured principally by residential properties. Weighted average interest rates for these loans were approximately 8.9% and 8.4%, as of December 31, 2007 and 2006, respectively, with maturities ranging from one to fifteen years. Management estimated the fair value using an interest rate of 6.25% at December 31, 2007 and 2006.

The carrying value and fair values for the Company s liabilities under annuity contract policies are the same and represent the policyholder s account balance, which is available upon surrender of the contract. Surrender charges are minimal. The fair value of liabilities under all insurance contracts are taken into consideration in the overall management of interest rate risk, which minimizes exposure to changing interest rates through the matching of investment maturities with amounts due under insurance contracts.

Table of Contents

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

Policy loans have a weighted average interest rate of 7.5% as of December 31, 2007 and 2006, and have no specified maturity dates. The aggregate fair value of policy loans approximates the carrying value reflected on the consolidated balance sheet. These loans typically carry an interest rate that is tied to the crediting rate applied to the related policy and contract reserves. Policy loans are an integral part of the life insurance policies that the Company has in force and cannot be valued separately and is not marketable, therefore a fair value is not calculated.

For cash and cash equivalents, accrued investment income, amounts recoverable from reinsurers, other assets, federal income tax payable and receivable, dividend accumulations, commissions payable, amounts held on deposit, and other liabilities, the carrying amounts approximate fair value because of the short maturity of such financial instruments.

(12) Other Comprehensive Income (Loss)

The changes in the components of other comprehensive income (loss) are reported net of the effects of income taxes of 35% in 2007 and 34% in 2006 and 2005, for the periods indicated as follows:

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES

Add: reclassification adjustment for gains included in net income	(525)	178	(347)
Other comprehensive loss	$ (6,139)	2,087	(4,052)

(13) Profit-Sharing Plan

The Company sponsors a defined contribution profit-sharing plan. Employees with one year of service can participate. Contributions are made at the Company s discretion and are subject to a tiered vesting schedule. Employer contributions to the plan were $650,000, $750,000 and $500,000 in 2007, 2006 and 2005, respectively. The plan does not permit employee contributions.

(14) Related Party Transactions

The Company sponsors the Citizens, Inc. Stock Investment Plan (the Plan), which is administered by an independent third party. The Plan is a means for new and existing investors in Citizens, Inc. Class A Common Stock to purchase and sell shares at market prices. Each share purchased through the Plan is registered in the name of the investing shareholder. The Company offers the Plan to the Company s policyholders for automatic investment of policy benefits, including policyholder dividends. The Company does not have possession of, or control over, any amounts invested through the Plan.

CITIZENS, INC. AND CONSOLIDATED SUBSIDIARIES
Notes to Consolidated Financial Statements, Continued
December 31, 2007, 2006 and 2005

The differences above between the amounts as reported on Form 10-Q and the amounts as adjusted consist of (1) corrections of prior year errors initially recorded during 2006 but subsequently moved to the beginning-of-year cumulative retained deficit adjustment pursuant to SAB 108 and (2) items initially recorded during 2006 in a quarter other than the quarter(s) in which they arose. These differences consist of the following:

A. Accrual of $955,000 due premium originally recorded in the first quarter, and then transferred to the SAB 108 adjustment in the fourth quarter. See note 1(p) B.

B. Accrual of $162,000 catastrophe reinsurance premium refund originally recorded in the first quarter, and then transferred to the SAB 108 adjustment in the fourth quarter. See note 1 (p) E.

C. Accrual of $216,000 in reinsurance recoverables originally recorded in the second and third quarters, and then transferred to the SAB 108 adjustment in the fourth quarter. See note 1 (p) E.

D. Impairment of $350,000 of intangibles originally recorded in the first quarter, and then transferred to the SAB 108 adjustment in the fourth quarter. See note 1 (p) D.

E. Additional $589,000 amortization of cost of customer relationships recorded in the fourth quarter, but pertaining to the first, second, and third quarters.

F. $195,000 workers compensation insurance premium expensed in the first quarter, but pertaining to the second, third, and fourth quarters.

G. $180,000 impairment of an other long-term investment recorded in the third quarter, but pertaining to the first quarter.

H. Accrual of $225,000 interest expense on policyholder dividends recorded in the third quarter, but pertaining to the first and second quarters.

I. Correction of purchased lease accounting recorded in the third quarter, but pertaining to errors originating in the first and second quarters. See note 1 (p) B.

All adjustments have been tax effected at 34%.
