- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01. Other Events

Grant of New Exploration Permits - NT/P71 and NT/P72

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 8-K

Australian Oil & Gas Corporation (AOGC) is please to advise that on August 11, 2006, our wholly owned subsidiary Nations Natural Gas Pty Ltd (Nations) was informed by the Designated Authority of the grant of petroleum exploration permits NT/P71 and NT/P72 for an initial 6-year term, effective from August 8, 2006. Nations holds a 30% interest in the permits. The new permits are held by the National Gas Consortium, which holds the contiguous NT/P62, NT/P63 and NT/P64 permits.

The new Permits are located in the Australian sector of the Timor Sea, offshore from the Northern Territory, and cover a total area of approximately 17,380km(2) (4,294,772 acres) . The National Gas Consortium now holds approximately 32,255km(2) (7,970,533 acres) including the new permits and the four permits already held, namely, NT/P62, NT/P63, NT/P64 and NT/P65. The Timor Sea covers a huge area underlain by sedimentary basins with potential for new hydrocarbon discoveries. The region has a long history of discovery and has now become the focus for domestic and international petroleum exploration and development activities. There have been numerous oil and wet gas discoveries to the north west of the permits, including the Laminaria, Corallina and Bayu-Undan fields, and the giant gas fields of Greater Sunrise, Evans Shoal, Caldita and Lyndoch are to the north east of the permits.

The Timor Sea is a major emerging oil and gas province, with a developing emphasis in gas processing for the export market. Discoveries made over the past few years are expected to lead to the area providing substantial production and revenue, through value-added gas projects covering a wide spectrum of gas to liquids processes and technologies.

In the first three year term of the Permits, the National Gas Consortium has committed to shoot 400 km of new 2D seismic in NT/P71 and 250km in NT/P72.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
