Item 5. Other Events.

On July 8, 2004, EPIX Medical, Inc. issued a press release announcing the initiation of its post-NDA clinical program with the first injection in a multi-center trial of MS-325 for high resolution vessel imaging. MS-325 is a novel Magnetic Resonance Imaging (MRI) blood pool contrast agent designed specifically for vascular imaging. The goal of the study is to optimize high resolution imaging with MS-325 as the first step in the characterization of vascular wall structures and vulnerable plaque. A copy of the press release is attached to this Current Report on Form 8-K as Exhibit 99.1.

In addition, on July 12, 2004, EPIX Medical, Inc. issued a press release announcing that the initiation of a multi-center Phase IIa clinical trial of MS-325 for imaging both the coronary arteries and myocardial perfusion. MS-325 is a novel Magnetic Resonance Imaging (MRI) blood pool contrast agent designed specifically for vascular imaging. The goal of the study is to assess the feasibility of using MS-325-enhanced-MRA for coronary angiography and cardiac perfusion imaging. A New Drug Application (NDA) for MS-325 vascular imaging was accepted for filing by the Food and Drug Administration (FDA) in February 2004. A copy of the press release is attached to this Current Report on Form 8-K as Exhibit 99.2.

On July 15, 2004, EPIX Medical, Inc. also issued a press release announcing that it has appointed Andrew Uprichard, MD to the position of President and Chief Operating Officer. Dr. Uprichard brings to EPIX more than 15 years experience in drug development. A copy of the press release is attached to this Current Report on Form 8-K as Exhibit 99.3.
