**First Financial Fund, Inc.**

**December 31, 2004 (Unaudited)**

**Note 1. Valuation and Investment Practices**

*Securities Valuation:* Securities for which market quotations are readily available-including securities listed on national securities exchanges and those traded over-the-counter- are valued at the last quoted sales price on the valuation date on which the security is traded. If such securities were not traded on the valuation date, but market quotations are readily available, they are valued at the most recently quoted bid price provided by an independent pricing service or by principal market makers. Securities traded via NASDAQ are valued at the NASDAQ Official Close Price ( NOCP ). Securities for which market quotations are not readily available or for which the pricing agent or market maker does not provide a valuation or methodology, or provides a valuation or methodology that, in the judgment of the adviser, does not represent fair value ( Fair Value Securities ), are valued at fair value by a Pricing Committee appointed by the Board of Directors, in consultation with the adviser. In such circumstances, the adviser makes an initial written recommendation to the Pricing Committee regarding valuation methodology for each Fair Value Security. Thereafter, the adviser conducts periodic reviews of each Fair Value Security to consider whether the respective methodology and its application is appropriate and recommends methodology changes when appropriate. Prior to implementation, the Pricing Committee reviews and makes a determination regarding each initial methodology recommendation and any subsequent methodology changes. All methodology recommendations and any changes are reviewed by the entire Board of Directors on a quarterly basis.

Short-term securities which mature in more than 60 days are valued at current market quotations. Short-term securities which mature in 60 days or less are valued at amortized cost, which approximates fair value.

*Repurchase Agreements:* In connection with the repurchase agreement transactions with United States financial institutions, it is the Fund's policy that its custodian take possession of the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market on a daily basis to maintain the adequacy of the collateral. If the seller defaults, and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

*Securities Transactions and Net Investment Income:* Securities transactions are recorded on the trade date. Realized gains or losses on sales of securities are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date; interest income including amortization of premium and accretion of discount on debt securities, as required is recorded on the accrual basis, which may require the use of certain estimates by management.

**Note 2. Unrealized Appreciation/(Depreciation)**

On December 31, 2004, net unrealized appreciation for Federal tax purposes was \$130,313,359, consisting of \$139,499,617 aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost and \$9,186,258 aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value.
