**Description of effects.**

In connection with the preparation of its first-time adoption of audited International Financial Reporting Standards (IFRS) consolidated financial statements as of December 31, 2003, 2004 and 2005, Deutsche Telekom determined that certain adjustments should be made to its IFRS opening balance sheet as of January 1, 2003, and to the quarterly information previously published in 2005. Overall, there was no significant impact on the results of operations, financial position or cash flows of the prior periods. These adjustments primarily relate to corrections of accounting entries as follows:

**Deferred Revenues**

Although not material (individually or in the aggregate), Deutsche Telekom had identified several items relating to the years ended December 31, 2003, 2004 and 2005, that it has also determined should be corrected. These corrections have now been reflected in the quarterly periods in which such items should have been recorded. The most significant of these corrections relates to the allocation of revenues related to multiple-element arrangements. These corrections have now been reflected in each of the quarterly periods of 2004 and 2005.

**Rating Changes**

In 2002, in connection with certain previously issued financial instruments, an interest rate step-up provision was triggered as a result of a downgrade in Deutsche Telekom's credit rating by certain rating agencies. It was subsequently determined that pursuant to International Accounting Standard (IAS) 39 Financial Instruments: Recognition and Measurement, Deutsche Telekom should adjust the book value of these financial instruments to reflect the present value of the estimated future payments at the time of the interest rate change in 2002. This adjustment has now been reflected in the IFRS opening balance sheet as of January 1, 2003. Subsequently, in April 2005, these rating agencies upgraded Deutsche Telekom's credit rating, which triggered a corresponding downward adjustment in the interest rate on these financial instruments. Pursuant to IAS 39, Deutsche Telekom was required to adjust the book value of these financial instruments to reflect the present value of the associated estimated future payments as a result of this upward adjustment. Accordingly, certain financial information, namely, net income and financial income (expense), net, has been adjusted to reflect the change in interest rates.
