Washington, D.C. 20549

**Form 6-K**

**REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13a-16 OR 15d-16  
UNDER THE SECURITIES EXCHANGE ACT OF 1934**

For the month of July 2010

Commission File Number 001-16429

**ABB Ltd**

(Translation of registrant's name into English)

**P.O. Box 1831, Affolternstrasse 44, CH-8050, Zurich, Switzerland**

(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F  x

Form 40-F  o

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):  o

Edgar Filing: ABB LTD - Form 6-K

**Note:** Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indication by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

**Note:** Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's home country), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes

No

If  Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-

Edgar Filing: ABB LTD - Form 6-K

This Form 6-K consists of the following:

1. Press release issued by ABB Ltd dated July 22, 2010.
2. Announcements regarding transactions in ABB Ltd's securities made by the directors or members of the Executive Committee.

The information provided by Item I above is deemed filed for all purposes under the Securities Exchange Act of 1934, including by reference in the Registration Statement on Form S-8 (Registration No. 333-129271).

**Press Release**

**Short-cycle recovery, cost take-out lift ABB's Q2 results**

- **Orders up 5%(1), base orders 15% higher**
- **Revenues down 5%, pace of decline slows versus previous quarter**
- **Operational performance lifted by more than \$400 million savings in the quarter**

Zurich, Switzerland, July 22, 2010 ABB's orders grew 5 percent in the second quarter of 2010, led by increases of more than 20 percent in each of the company's automation divisions on the strength of the global economic recovery.

Industrial customers continued to invest in energy-efficient automation and power solutions to increase productivity and quality. Investments by utilities in large power transmission projects, however, remained cautious in most regions. As a result, base orders (below \$15 million) grew 15 percent in local currencies while large orders (above \$15 million) declined by 37-percent. The order backlog has grown 5 percent since the beginning of the year.

Revenues were 5 percent lower than the year-earlier period, mainly due to order declines in 2009 and the beginning of 2010 that flowed through to sales in the second quarter.

Earnings before interest and taxes (EBIT) decreased to \$975 million, resulting in an EBIT margin of 12.9 percent. Included in EBIT are additional project costs in the Power Systems division of \$80 million. Excluding net losses on derivative transactions and restructuring-related costs, the EBIT margin was 14.6 percent(2). Savings in the quarter of more than \$400 million from the company's cost take-out program played a key role in maintaining profitability.

Cash from operations in the quarter was \$649 million, down versus the same quarter a year earlier, while net income amounted to \$623 million.

The strong second quarter results show how we are using our improved cost base and leading position in key industrial markets to take maximum advantage of the global economic recovery, said Joe Hogan, ABB's CEO. It's the great strength of ABB's portfolio that automation can drive profitable growth during a period of lower power demand.

We feel more confident about the recovery in most of our markets than three months ago and believe that our short-cycle businesses will continue to perform well over the rest of 2010. After the severe industrial recession of the last two years, customers have started again to invest

## Edgar Filing: ABB LTD - Form 6-K

in technologies for energy efficiency and productivity. We expect customer capital expenditures, especially on the power side, to recover later in 2010 and into 2011, Hogan said.

(1) Management discussion of orders and revenues focuses on local currency changes. U.S. dollar changes are reported in the results tables.

(2) Please refer to Appendix I

## Summary of Q2 2010 results

### Orders received and revenues

Demand for ABB's industrial products and solutions continued to improve in the second quarter, reflecting the ongoing economic recovery in most regions. Capital spending by power utilities remained cautious. In both power and automation, most customer investments focused on improving the productivity and efficiency of their existing operations. Large capital expenditures to build new capacity remained at low levels.

Regionally, the largest order increase came in the Middle East and Africa (up 27 percent in local currencies) on higher demand mainly in the minerals and oil and gas sectors. Orders were also higher in Europe, led by a 7-percent increase in western Europe. Asia orders were higher, driven mainly by the need for industrial automation equipment. Orders in China were up 8 percent but declined 41 percent in India. Orders decreased in the Americas, where a 21-percent order increase in the U.S. led by a 52-percent increase in Discrete Automation and Motion was more than offset by lower power orders, mainly in Mexico and Brazil.

Orders in emerging markets were unchanged in local currencies in the second quarter compared to the same quarter a year ago and comprised 51 percent of total orders received.

Large orders as a share of total orders amounted to 11 percent, compared to 19 percent in the year-earlier period. Service orders grew in line with total orders and were up 6 percent in local currencies.

The order backlog at the end of June was \$24 billion, a local-currency increase of 5 percent since the beginning of the year and unchanged compared to the end of the previous quarter.

Revenues decreased by 5 percent in local currencies as lower orders received during 2009 and the beginning of 2010, especially in ABB's longer cycle businesses, were converted into sales. Compared to the first quarter of 2010, revenues increased 13 percent. Revenues were up 15 percent in Low-Voltage Products, reflecting the stronger recovery in its short-cycle end markets. Delays in the execution of some large projects contributed to the revenue decrease in the two power divisions. Service revenues were 5 percent higher in the quarter in local currencies compared to the second quarter of 2009.

### Earnings before interest and taxes and net income

Included in EBIT in the second quarter is a negative impact of approximately \$60 million from losses on derivatives and foreign exchange movements on receivables and payables. Restructuring-related costs amounted to approximately \$70 million in the quarter.

## Edgar Filing: ABB LTD - Form 6-K

Excluding these impacts in the respective periods, the EBIT margin in the second quarter of 2010 increased to 14.6 percent.

The improvement was driven primarily by higher margins in the automation businesses on a combination of volume growth, a favorable product mix and cost reduction benefits. Successful cost take-out measures allowed the Power Products division to maintain its EBIT margin excluding net losses on derivative transactions and restructuring-related costs at the same level as the year before. Power Systems EBIT margin was lower as the result of project costs related to a small number of subsea cable orders.

Net income for the quarter developed in line with EBIT and resulted in basic earnings per share of \$0.27 compared to \$0.30 in the year-earlier period.

### **Cost reductions**

ABB continues to implement a cost take-out plan aimed at sustainably reducing ABB's costs comprising both cost of sales as well as general and administrative expenses from 2008 levels by a total of \$3 billion by the end of 2010. The program focuses on optimizing global sourcing, improving internal processes and adjusting ABB's global manufacturing and engineering footprint to reduce costs, increase our competitiveness and better match shifts in customer demand.

Savings in the second quarter exceeded \$400 million, bringing the total for the program to date to approximately \$2.3 billion. Costs for the full year 2010 are now expected to reach \$350-400 million, compared to earlier estimates of \$500 million. Costs associated with the program in the second quarter of 2010 amounted to approximately \$70 million and total program costs to date amount to approximately \$700 million.

### **Balance sheet and cash flow**

Net cash at the end of the second quarter was \$5.9 billion compared to \$7.1 billion at the end of the previous quarter and \$5.7 billion at the end of the second quarter of 2009. Cash from operating activities decreased in the quarter but was slightly higher for the first six months compared to the previous year. Cash payments in the quarter related to the company's cost take-out program amounted to approximately \$60 million.

Net cash used in investing activities includes a payment of more than \$1 billion for the acquisition during the second quarter of Ventyx, a U.S.-based software provider to global energy, utility, communications, and other asset-intensive businesses.

In May, ABB also announced an offer to shareholders of ABB Limited, its publicly-listed subsidiary in India, of Rs. 900 per share in order to increase its stake in the company from approximately 52 percent to 75 percent. The potential total value of the transaction, if accepted, is approximately Rs. 44 billion (\$965 million based on foreign exchange rates at the time of the announcement). The offer began on July 8, 2010 and is expected to end on July 27, 2010, with payment for the shares expected to take place on August 10, 2010.

On April 26, ABB's Annual General Meeting approved the payment of a dividend in the form of a nominal value reduction of Sfr. 0.51 per share. The dividend payment date was July 15 for shares purchased through the SIX Swiss Exchange, July 19 for shares purchased through the NASDAQ OMX Stockholm Exchange and July 22 for American Depositary Shares purchased through the New York Stock Exchange.

Also as approved at the Annual General Meeting, approximately 23 million shares were cancelled in July following the end of the share repurchase program launched in 2008.

## Compliance

As previously announced, ABB has disclosed to the US Department of Justice and the US Securities and Exchange Commission various suspect payments. Also as previously announced, ABB has been cooperating with various antitrust authorities regarding their investigations into certain alleged anti-competitive practices. With respect to these matters, there could be adverse outcomes beyond our provisions.

## Management changes

In June, ABB announced the retirement of Anders Jonsson, a member of the ABB Executive Committee since 2006, effective as of the end of July 2010, after 34 years with the company. In his current position, Jonsson has been responsible for monitoring and coordinating ABB's overall cost reduction and global footprint programs. These responsibilities will be assumed by the company's head of quality and operational excellence who reports directly to ABB's CEO.

## Outlook

The sequential quarterly growth of base orders since the middle of 2009 appears to confirm that ABB has seen the bottom of its short-cycle businesses. Industrial customers are spending more on automation and power equipment and solutions to increase the efficiency and productivity of their existing assets. Assuming a continuation of the current economic recovery in most regions, the company is confident that its short-cycle business will continue to support both top and bottom line growth over the remainder of the year.

For ABB's late-cycle businesses, which make up the majority of the portfolio and which are driven by customer capital expenditure, the outlook for the remainder of 2010 remains mixed.

Upgrades and expansions of existing power infrastructure are needed in all regions, including renewables and smart grids. This is reflected in a near-record level of tendering activity in the Power Systems business. At the same time, lower electricity consumption in some regions has slowed the pace of power project awards in the short term. Furthermore, increased competition in the power sector continues to weigh on demand.

On the industrial side, ABB saw higher demand in the second quarter from some later-cycle sectors, such as minerals, pulp and paper and marine. Most customer spending in these industries, however, is focused on equipment upgrades, replacement and service rather than capital expenditures for new capacity.

The company believes it is well positioned to benefit from a sustained economic recovery. Growth initiatives are under way in selected business and countries, mainly in emerging markets. Significant fixed costs have been eliminated since the end of 2008, increasing the potential for incremental margin expansion as demand returns. Spending on research and development has remained steady through the downturn in order to secure the company's technological leadership, and will continue.

Therefore, in the remainder of 2010 management will continue to focus both on adjusting costs and taking advantage of its global footprint, strong balance sheet and leading technologies to tap further opportunities for profitable growth.

**Divisional performance Q2 2010****Power Products**

| \$ millions unless otherwise indicated | Q2 10 | Q2 09 | Change |       |
|--|-------|-------|--------|-------|
|  |       |       | US\$   | Local |
| Orders                                 | 2,480 | 2,760 | -10%   | -11%  |
| Order backlog (end June)               | 7,796 | 8,664 | -10%   | -9%   |
| Revenues                               | 2,528 | 2,839 | -11%   | -12%  |
| EBIT                                   | 417   | 555   | -25%   |       |
| as % of revenues                       | 16.5% | 19.5% |        |       |
| Cash flow from operating activities    | 384   | 534   |        |       |

Orders declined due to continued low spending by utilities on transmission projects, resulting in a decrease of more than 70 percent in large orders. This more than offset increased demand from industrial end-markets and some recovery in power distribution. Base orders decreased 5 percent versus the same period a year ago. Compared to the first quarter of 2010, however, base orders grew by 11 percent in local currencies.

Orders were lower in all regions, although early signs of recovery from low levels in the power distribution business supported steady order intake in western Europe and North America. Orders decreased in China as a result of lower utility spending on large projects and increased local competition.

Revenues decreased in the quarter, primarily as a result of lower order intake in the preceding quarters and continued delays by customers in accepting product delivery.

EBIT was lower than the same period a year earlier, reflecting lower revenues and a negative impact from net losses on derivatives. EBIT margin, adjusted for both derivatives and restructuring, was roughly the same in both years, as cost savings compensated for under absorption and price declines.

**Power Systems**

| \$ millions unless otherwise indicated | Q2 10(1) | Q2 09 | Change |       |
|--|----------|-------|--------|-------|
|  |          |       | US\$   | Local |

## Edgar Filing: ABB LTD - Form 6-K

(1) Power Systems Q2 2010 results reflect the contribution from the Ventyx acquisition as of June 1, 2010

Increased base orders on higher demand from industrial customers in the quarter was offset by lower large orders, reflecting the timing of project awards. Project tendering activity in power transmission achieved new record levels, as the need remains in all regions for new grid capacity and upgrades, regional interconnections and the integration of renewable energies.

Revenues were stable compared to the same quarter a year ago, supported by the execution of the large order backlog.

EBIT was negatively impacted by costs of approximately \$80 million associated with installation issues in a small number of cable projects. These charges more than offset savings from cost reduction measures.

The reduction in cash from operations primarily reflects the timing of customer payments.

ABB completed its acquisition of Ventyx in the second quarter and consolidated its financial results into the divisional results effective June 1, 2010. The impact of the acquisition on orders, revenues and EBIT in the quarter was not significant.

(1) Appendix II provides historical results for all divisions following the previously announced realignment of ABB's automation business

Orders increased substantially in the quarter reflecting the industrial recovery in early cycle businesses across all regions. Base orders were almost 40 percent higher in local currencies versus the same quarter a year earlier, while large orders declined. Order growth was strongest in robotics and low-voltage drives and motors. Orders grew in all regions, led by strong double-digit local-currency growth in China, the U.S. and Germany.

Revenues declined in the quarter, although at a slower pace than in the first quarter of the year. This mainly reflects the low opening order backlog in the machines business, which serves later cycle markets. Revenues in most other businesses were close to the previous year's level.

The improvement in EBIT and EBIT margin is mainly the result of a breakeven result in the robotics business compared to a loss in the same quarter of 2009. The EBIT margin also benefited from cost saving measures and a favorable product mix.

**Low-Voltage Products(1)**

| \$ millions unless otherwise indicated | Q2 10 | Q2 09 | US\$ | Change |     |

(1) Appendix II provides historical results for all divisions following the previously announced realignment of ABB's automation business

## Edgar Filing: ABB LTD - Form 6-K

The strong improvement in orders received in the quarter reflects continuing demand growth from both construction and industry customers across all regions. Orders were up in all product businesses. Orders grew at a double-digit pace in all regions, with the largest increase in the Americas. Orders were up more than 30 percent in Asia, including a strong double-digit increase in China in local currencies. Orders also grew at a strong double-digit pace in Italy, South Korea and Saudi Arabia.

Revenues grew in line with orders, as most sales are booked in the same quarter in which orders are placed. Service revenues grew by 30 percent in local currencies in the second quarter versus the second quarter in 2009.

EBIT and EBIT margin increased on higher revenues, a positive product mix and the impact of cost saving measures. The increase also reflects the non-recurrence of restructuring-related charges taken in the prior-year period of approximately \$40 million. Excluding net losses on

derivative transactions and restructuring-related costs in both periods, the EBIT margin in the second quarter of 2010 was approximately 6 percentage-points higher than in the year-earlier quarter.

### Process Automation

| \$ millions unless otherwise indicated | Q2 10 | Q2 09(1) | Change |       |
|--|-------|----------|--------|-------|
|  |       |          | US\$   | Local |
| Orders                                 | 1,825 | 1,452    | 26%    | 25%   |
| Order backlog (end June)               | 5,585 | 6,565    | -15%   | -12%  |
| Revenues                               | 1,737 | 1,981    | -12%   | -12%  |

| Cash flow from operating activities    | 143   | 53       |        |       |

(1) Q2 2009 results include the instrumentation business transferred to Process Automation as part of the previously-announced realignment of ABB's automation business

Orders increased in the quarter as demand improved, driven primarily by the developing economies. Base orders grew by more than 20 percent in local currencies while large orders increased by more than 30 percent from the low levels of the year-earlier period.

The strongest order growth was recorded in minerals, pulp and paper, marine and turbocharging. Oil, gas and petrochemicals orders remained at the same high level as the second quarter of 2009. Orders from the Middle East and Africa more than tripled in the quarter due to large customer investments in minerals and oil and gas. Asia grew by almost 40 percent on higher orders from metals, minerals and marine customers. Orders in the Americas increased by more than 10 percent in local currencies on higher demand from the minerals and oil and gas sectors.

Lower revenues reflect the decrease in orders in 2009. Lower revenues in the system business were partly offset by a double digit increase in turbocharging and industrial service revenues. EBIT and EBIT margin improved due to the cost take-out program and a larger proportion of higher-margin service and product sales in total revenues compared to the same quarter a year earlier.

**More information**

The 2010 Q2 results press release is available from July 22, 2010, on the ABB News Center at [www.abb.com/news](http://www.abb.com/news) and on the Investor Relations homepage at [www.abb.com/investorrelations](http://www.abb.com/investorrelations), where a presentation for investors will also be published.

ABB will host a media conference call starting at 10:00 a.m. Central European Time (CET). U.K. callers should dial +44 20 7107 0611. From Sweden, +46 8 5069 2105, and from the rest of Europe, +41 91 610 56 00. Lines will be open 15 minutes before the start of the conference. Audio playback of the call will start one hour after the call ends and will be available for 96 hours: Playback numbers: +44 20 7108 6233 (U.K.), +41 91 612 4330 (rest of Europe) or +1 (1) 866 416 2558 (U.S./Canada). The code is 10133, followed by the # key.

A conference call for analysts and investors is scheduled to begin today at 3:00 p.m. CET (2:00 p.m. in the UK, 9:00 a.m. EDT). Callers should dial +1 412 858 4600 (from the U.S./Canada) or +41 91 610 56 00 (Europe and the rest of the world). Callers are requested to phone in 15 minutes before the start of the call. The audio playback of the call will start one hour after the end of the call and be available for 24 hours commencing one hour after the conference call. Playback numbers: +1 866 416 2558 (U.S./Canada) or +41 91 612 4330 (Europe and the rest of the world). The code is 15754, followed by the # key.

ABB ([www.abb.com](http://www.abb.com)) is a leader in power and automation technologies that enable utility and industry customers to improve performance while lowering environmental impact. The ABB Group of companies operates in around 100 countries and employs about 117,000 people.

Zurich, July 22, 2010

Joe Hogan, CEO

**Important notice about forward-looking information**

This press release includes forward-looking information and statements including the sections entitled Cost reductions, Compliance, and Outlook, as well as other statements concerning the outlook for our business. These statements are based on current expectations, estimates and projections about the factors that may affect our future performance, including global economic conditions, the economic conditions of the regions and industries that are major markets for ABB Ltd. These expectations, estimates and projections are generally identifiable by statements containing words such as expects, believes, estimates, targets, plans or similar expressions. However, there are many risks and uncertainties, many of which are beyond our control, that could cause our actual results to differ materially from the forward-looking information and statements made in this press release and which could affect our ability to achieve any or all of our stated targets. The important factors that could cause such differences include, among others, business risks associated with the weakened global economy and political conditions, costs associated with compliance activities, raw materials availability and prices, changes in governmental regulations and currency exchange rates and such other factors as may be discussed from time to time in ABB Ltd's filings with the U.S. Securities and Exchange Commission, including its Annual Reports on Form 20-F. Although ABB Ltd believes that its expectations reflected in any such forward-looking statement are based upon reasonable assumptions, it can give no assurance that those expectations will be achieved.

**Notes to the Interim Consolidated Financial Information (unaudited)**

**Note 1. The Company and basis of presentation**

ABB Ltd and its subsidiaries (collectively, the Company) together form a leading global company specializing in power and automation technologies that improve the performance of utility and industry customers, while lowering environmental impact. The Company works with customers to engineer and install networks, facilities and plants with particular emphasis on enhancing efficiency, reliability and productivity for customers who generate, convert, transmit, distribute and consume energy.

The Company's Interim Consolidated Financial Information is prepared in accordance with United States of America generally accepted accounting principles (U.S. GAAP) for interim financial reporting. As such, the Interim Consolidated Financial Information does not include all the information and notes required under U.S. GAAP for annual consolidated financial statements. Therefore, such financial information should be read in conjunction with the audited consolidated financial statements in the Company's Annual Report for the year ended December 31, 2009.

The preparation of financial information in conformity with U.S. GAAP requires management to make assumptions and estimates that directly affect the amounts reported in the Interim Consolidated Financial Information. The accounting estimates that require the Company's most significant, difficult and subjective judgments include:

- assumptions and projections, principally related to future material, labor and project-related overhead costs, used in determining the percentage-of-completion on projects,
- estimates of loss contingencies associated with litigation or threatened litigation and other claims and inquires, environmental damages, product warranties, regulatory and other proceedings,
- assumptions used in the calculation of pension and postretirement benefits and the fair value of pension plan assets,
- recognition and measurement of current and deferred income tax assets and liabilities (including the measurement of uncertain tax positions),
- growth rates, discount rates and other assumptions used in the Company's annual goodwill impairment test,
- assumptions used in determining inventory obsolescence and net realizable value,

- growth rates, discount rates and other assumptions used to determine impairment of long-lived assets, and
- assessment of the allowance for doubtful accounts.

The actual results and outcomes may differ from the Company's estimates and assumptions.

In the opinion of management, the unaudited Interim Consolidated Financial Information contains all necessary adjustments to present fairly the financial position, results of operations and cash flows for the reported interim periods.

The Interim Consolidated Financial Information is presented in United States dollars (\$) unless otherwise stated. Certain amounts reported for prior periods in the Interim Consolidated Financial Information have been reclassified to conform to the current year's presentation.

## **Note 2. Recent accounting pronouncements**

### *Applicable in current period*

#### *Fair value measurements*

As of January 1, 2010, the Company adopted an accounting standard update that requires additional disclosure for fair value measurements. The update requires that significant transfers in and out of fair value Level 1 (observable quoted prices) and Level 2 (observable inputs other than Level 1 inputs) be disclosed together with a description of the reasons for the transfers. Adoption of this update did not result in additional disclosure for the six-month and three-month periods ended June 30, 2010, as there were no significant transfers between Level 1 and Level 2.

**Notes to the Interim Consolidated Financial Information (unaudited)**

*Applicable for future periods*

*Fair value measurements*

In January 2010, an accounting standard update was issued that requires additional disclosure for fair value measurements. The update requires disclosure, on a gross basis, about purchases, sales, issuances, and settlements of level 3 (significant unobservable inputs) instruments when reconciling the fair value measurements. This disclosure requirement is effective for the Company for periods beginning January 1, 2011. The Company does not believe that this new disclosure requirement will have a material impact on its consolidated financial statements.

*Revenue recognition with multiple deliverable arrangements*

In October 2009, an accounting standard update on revenue recognition with multiple deliverable arrangements was issued which amends the criteria for allocating consideration in multiple-deliverable revenue arrangements. It establishes a hierarchy of selling prices to determine the selling price of each specific deliverable that includes vendor-specific objective evidence (if available), third-party evidence (if vendor-specific evidence is not available), or estimated selling price if neither of the first two are available. This update also:

- eliminates the residual method for allocating revenue between the elements of an arrangement and requires that arrangement consideration be allocated at the inception of the arrangement, and
- expands the disclosure requirements regarding a vendor's multiple-deliverable revenue arrangements.

This update is effective for arrangements entered into by the Company or materially modified on or after January 1, 2011. The Company is currently evaluating the impact of this update.

*Revenue arrangements that include software elements*

In October 2009, an accounting standard update for the accounting of certain revenue arrangements that include software elements was issued. This update amends the existing guidance on revenue arrangements that contain both hardware and software elements. This update modifies the existing rules to exclude from the software revenue guidance (i) non-software components of tangible products and (ii) software components of tangible products that are sold, licensed, or leased with tangible products when the software components and non-software components of the tangible product function together to deliver the tangible product's essential functionality. Undelivered elements in the arrangement related to the non-software components also are excluded from this guidance. This update is effective for arrangements entered into by the Company or materially modified on or after January 1, 2011. The Company is currently evaluating the impact of this update.

**Note 3. Acquisitions**

Edgar Filing: ABB LTD - Form 6-K

Acquisitions in the six months and three months ended June 30, 2010 and 2009, were:

| (\$ in millions, except number of acquired businesses)                          | Six months ended<br>June 30, |      | Three months ended<br>June 30, |      |

---

(1) Recorded as goodwill

\$1,074 million of the Acquisitions above and \$1,011 million of the Aggregate excess of purchase price over fair value of net assets acquired above relate to the acquisition of Ventyx, as described below.

Acquisitions of controlling interests have been accounted for under the acquisition method and have been included in the Company's Interim Consolidated Financial Information since the date of acquisition. The

**Notes to the Interim Consolidated Financial Information (unaudited)**

Company has not presented pro forma results of operations of the acquired businesses as the results are not significant to the Interim Consolidated Financial Information.

On June 1, 2010 the Company acquired all of the shares of Ventyx Inc., Ventyx Software Inc. and Ventyx Dutch Holding B.V., representing substantially all of the revenues, assets and liabilities of the Ventyx group. Ventyx provides software solutions to global energy, utility, communications and other asset-intensive businesses and was integrated into the network management business within the Power Systems segment to form a single unit for energy management software solutions. The preliminary purchase price amounted to \$1,074 million (net of \$31 million cash acquired).

The Company has not yet finalized the purchase price allocation which is expected to be completed within 12 months of the acquisition date. The main items still to be finalized are: (i) the fair value of acquired intangible assets, (ii) the purchase price, (iii) income and non-income based taxes, (iv) the fair values of certain tangible assets acquired and liabilities assumed, and (v) the residual goodwill.

The preliminary purchase price, settled in cash, has been allocated based on management's estimates of fair values as follows:

| (\$ in millions)                     | Allocated amount | Weighted-average useful life |
|--------------------------------------|------------------|------------------------------|
| Capitalized software for sale        | 134              | 5 years                      |
| Customer relationships               | 131              | 12 years                     |
| Trade name                           | 23               | 10 years                     |
| In-process research and development  | 14               | 5 years                      |
| Order backlog                        | 12               | 6 years                      |
| Deferred tax liabilities             | (117)            |                              |
| Other assets and liabilities, net(1) | (134)            |                              |
| Goodwill(2)                          | 1,011            |                              |
| <b>Total</b>                         | <b>1,074</b>     |                              |

(1) Including debt assumed upon acquisition

(2) The Company does not expect the goodwill recognized to be deductible for income tax purposes

Changes in total goodwill in 2009 and the six months ended June 30, 2010 were as follows:

| (\$ in millions)                  | Total        |
|-----------------------------------|--------------|
| <b>Balance at January 1, 2009</b> | <b>2,817</b> |
| Goodwill acquired during the year | 147          |
| Exchange rate differences         | 59           |
| Other                             | 3            |

|  |              |
|--|--------------|
| <b>Balance at December 31, 2009</b>    | <b>3,026</b> |
| Goodwill acquired during the period(1) | 1,058        |
| Exchange rate differences              | (143)        |
| Other                                  | (1)          |
| <b>Balance at June 30, 2010</b>        | <b>3,940</b> |

---

(1) Includes \$1,011 million in respect of Ventyx, which has been allocated to the Power Systems segment

#### **Pending Offer**

##### *ABB Limited, India*

In May 2010, the Company announced that it will offer shareholders of ABB Limited, India, its publicly-listed subsidiary in India, 900 rupees per share in order to increase its stake from approximately 52 percent to 75 percent. The aim of the investment is to facilitate the long-term development of the Company's business in India.

## Notes to the Interim Consolidated Financial Information (unaudited)

## Note 4. Cash and equivalents and marketable securities and short-term investments

At June 30, 2010, and December 31, 2009, cash and equivalents and marketable securities and short-term investments consisted of the following:

| June 30, 2010                                  |              |                              |                               |              |                         |  |

**Note 5. Financial instruments**

The Company is exposed to certain currency, commodity, interest rate and equity risks arising from its global operating, financing and investing activities. The Company uses derivative instruments to reduce and manage the economic impact of these exposures.

**Currency risk**

Due to the global nature of the Company's operations, many of its subsidiaries are exposed to currency risk in their operating activities from entering into transactions in currencies other than their functional currency. To manage such currency risks, the Company's policies require the subsidiaries to hedge their foreign currency exposures from binding sales and purchase contracts denominated in foreign currencies, as well as at least fifty percent of the anticipated foreign currency denominated sales volume of standard products and related foreign currency denominated purchases over the next twelve months. Forward

**Notes to the Interim Consolidated Financial Information (unaudited)**

foreign exchange contracts are the main instrument used to protect the Company against the volatility of future cash flows (caused by changes in exchange rates) of contracted and forecasted sales and purchases denominated in foreign currencies.

**Commodity risk**

Various commodity products are used in the Company's manufacturing activities. Consequently it is exposed to volatility in future cash flows arising from changes in commodity prices. To manage such commodity price risk, the Company's policies require that the subsidiaries hedge commodity price risk exposures from binding purchase contracts, as well as at least fifty percent of the anticipated commodity purchases over the next twelve months. Swap contracts on various commodities (primarily copper) are used to manage the associated price risks.

**Interest rate risk**

The Company has issued bonds at fixed rates and in currencies other than the issuing entity's functional currency. Interest rate swaps and cross-currency swaps are used to manage the interest rate and foreign currency risk associated with such debt. In addition, from time to time, the Company uses instruments such as interest rate swaps, bond futures or forward rate agreements to manage interest rate risk arising from the Company's balance sheet structure but does not designate such instruments as hedges.

**Equity risk**

The Company is exposed to fluctuations in the fair value of its warrant appreciation rights (WARs) issued under its management incentive plan. A WAR gives its holder the right to receive cash equal to the market price of an equivalent listed warrant on the date of exercise. To eliminate such risk, the Company has purchased cash-settled call options which entitle the Company to receive amounts equivalent to its obligations under the outstanding WARs.

In general, while the Company's primary objective in its use of derivatives is to minimize exposures arising from its business, certain derivatives are designated and qualify for hedge accounting treatment while others either are not designated or do not qualify for hedge accounting.

**Volume of derivative activity**

The gross notional amounts of outstanding derivatives (whether designated as hedges or not) were as follows:

*Foreign exchange and interest rate derivatives:*

| Type of derivative<br>(\$ in millions) | Total notional amounts |                   |               |

*Equity derivatives:*

At June 30, 2010, December 31, 2009, and June 30, 2009, the Company held 64 million, 64 million and 73 million cash-settled call options on ABB Ltd shares with a total fair value of \$41 million, \$64 million and \$65 million respectively.

**Notes to the Interim Consolidated Financial Information (unaudited)****Cash flow hedges**

As noted above, the Company mainly uses forward foreign exchange contracts to manage the foreign exchange risk of its operations, commodity swaps to manage its commodity risks and cash-settled call options to hedge its WAR liabilities. Where such instruments are designated and qualify as cash flow hedges, the effective portion of the changes in their fair value is recorded in Accumulated other comprehensive loss and subsequently reclassified into earnings in the same line item and in the same period as the underlying hedged transaction affects earnings. Any ineffectiveness in the hedge relationship, or hedge component excluded from the assessment of effectiveness, is recognized in earnings during the current period.

At June 30, 2010 and December 31, 2009, Accumulated other comprehensive loss included net unrealized losses of \$4 million, net of tax, and net unrealized gains of \$20 million, net of tax, respectively, on derivatives designated as cash flow hedges. Of the amount at June 30, 2010, net losses of \$4 million are expected to be reclassified to earnings in the following twelve months. At June 30, 2010, the longest maturity of a derivative classified as a cash flow hedge was 68 months.

During the six and three months ended June 30, 2010, no amounts were reclassified into earnings as a result of the discontinuance of cash flow hedge accounting or due to ineffectiveness in cash flow hedge relationships. In each of the six and three months ended June 30, 2009, net of tax losses of \$1 million were reclassified into earnings as a result of the discontinuance of cash flow hedge accounting. Net of tax gains of \$4 million and \$3 million for the six and three months ending June 30, 2009, respectively, were included in earnings due to ineffectiveness in cash flow hedge relationships.

The pre-tax effects of derivative instruments, designated and qualifying as cash flow hedges, on Accumulated other comprehensive loss and the Consolidated Income Statements were as follows:

| Type of derivative designated as a cash flow hedge | Six months ended June 30, 2010   |   |                  |  |
|--|--|---|------------------|--|
|  | Gains (losses) recognized in OCI(1) on derivatives (effective portion) | Gains (losses) reclassified from OCI(1) into income (effective portion) |                  | Gains (losses) recognized in income (ineffective portion and amount excluded from effectiveness testing) |

(1) OCI represents Accumulated other comprehensive loss

Derivative gains of \$4 million and derivative losses of \$65 million, both net of tax, were reclassified from Accumulated other comprehensive loss to earnings during the six months ended June 30, 2010 and 2009. During the three months ended June 30, 2010 and 2009, derivative losses of \$7 million and \$30 million, both net of tax, were reclassified to earnings, respectively.

### Fair value hedges

To reduce its interest rate and foreign currency exposures arising primarily from its debt issuance activities, the Company uses interest rate and cross-currency swaps. Where such instruments are designated as fair value hedges, the changes in fair value of these instruments, as well as the changes in fair value of the risk component of the underlying debt being hedged, are recorded as offsetting gains and losses in Interest and other finance expense. Hedge ineffectiveness in the six and three months ended June 30, 2010 and 2009, was not significant.

The effect of derivative instruments, designated and qualifying as fair value hedges, on the Consolidated Income Statements was as follows:

| Type of derivative<br>designated as a<br>fair value hedge | Six months ended June 30, 2010   |                  |   |                  |
|---|--|------------------|---|------------------|
|   | Gains (losses) recognized in income<br>on derivatives designated as<br>fair value hedges |                  | Gains (losses) recognized in<br>income on hedged item |                  |

## Derivatives not designated in hedge relationships

Derivative instruments that are not designated as hedges or do not qualify as either cash flow or fair value hedges are economic hedges used for risk management purposes. Gains and losses from changes in the fair values of such derivatives are recognized in the same line in the income statement as the economically hedged transaction.

Furthermore, under certain circumstances, the Company is required to split and account separately for foreign currency derivatives that are embedded within certain binding sales or purchase contracts denominated in a currency other than the functional currency of the subsidiary and the counterparty.

The gains (losses) recognized in the Consolidated Income Statements on derivatives not designated in hedging relationships are included in the table below:
