**Letter from the chairman**

**Dear Shareholder,**

We are pleased to provide the semi-annual report of Western Asset Global Corporate Defined Opportunity Fund Inc. for the six-month reporting period ended April 30, 2011. Please read on for Fund performance information and a detailed look at prevailing economic and market conditions during the Fund's reporting period.

As always, we remain committed to providing you with excellent service and a full spectrum of investment choices. We also remain committed to supplementing the support you receive from your financial advisor. One way we accomplish this is through our website, [www.leggmason.com/cef](http://www.leggmason.com/cef). Here you can gain immediate access to market and investment information, including:

- Fund prices and performance,
- Market insights and commentaries from our portfolio managers, and
- A host of educational resources.

We look forward to helping you meet your financial goals.

Sincerely,

R. Jay Gerken, CFA

Chairman, President and Chief Executive Officer

May 27, 2011

## Investment commentary

### Economic review

While economic data remained mixed, the U.S. economy continued to expand over the six months ended April 30, 2011. Beginning in the fourth quarter of 2010 and continuing for most of the remainder of the period, fears regarding moderating economic growth were replaced with optimism for a strengthening economy in 2011. With investor sentiment improving, interest rates generally rose, negatively impacting some sectors of the fixed-income market. All told, investors who took on additional risk in their portfolios during the reporting period were generally rewarded.

Although the U.S. Department of Commerce continued to report positive U.S. gross domestic product ( GDP )<sup>i</sup> growth, the expansion has been less robust than most other periods exiting a severe recession. According to the Commerce Department, GDP growth was 3.7%, 1.7%, 2.6% and 3.1% during the first, second, third and fourth quarters of 2010, respectively. For calendar 2010 as a whole, the economy expanded 2.9%. Based on the Commerce Department's second estimate, first quarter 2011 GDP growth was 1.8%. This moderation in growth in the first quarter was due to a variety of factors, including less robust export activity, a decline in government spending and a deceleration in consumer spending given rising oil and food prices.

Turning to the job market, the unemployment rate moved lower during four of the last five months of the reporting period, though it remained elevated. The rate fell to 8.9% in February 2011, marking the first time the unemployment rate was below 9.0% since April 2009. Unemployment then ticked downward to 8.8% in March, but back up to 9.0% in April. While unemployment in the U.S. declined over the course of the reporting period, hiring has yet to rebound as strongly as in previous recoveries. The U.S. Department of Labor reported in May 2011 that approximately 13.7 million Americans looking for work have yet to find a job, and roughly 43% of these individuals have been out of work for more than six months. In addition, while the Federal Reserve Board ( Fed )<sup>ii</sup> believes that unemployment will continue to decline, it projects that it will remain relatively high, between 7.5% and 8.0% at the end of 2012.

The long-ailing housing market continued to show signs of strain during the reporting period. Looking back, sales increased in the spring of 2010 largely due to the government's \$8,000 tax credit for first-time home buyers. However, this proved to be only a temporary boost, as sales subsequently weakened after the tax credit expired at the end of April. Existing-home sales did rebound somewhat toward the end of 2010 and in January 2011, as mortgage rates remained relatively low. However, according to the National Association of Realtors ( NAR ), existing-home sales then declined a sharp 8.9% in February, before increasing 3.5% in March and then falling 0.8% in April. At the end of April, the inventory of unsold homes was a 9.2 month supply at the current sales level, versus an 8.3 month supply in March. Existing-home prices remained disappointingly low, with the NAR reporting that the median existing-home price for all housing types was \$163,700 in April 2011, down 5.0% from April 2010.

The manufacturing sector was one area of the economy that remained relatively strong during the reporting period. Based on the Institute for Supply Management's PMI<sup>iii</sup>, the manufacturing sector has grown twenty-one consecutive months since it began expanding in

IV Western Asset Global Corporate Defined Opportunity Fund Inc.

**Investment commentary (cont'd)**

August 2009. After reaching a six-year peak of 60.4 in March 2010 (a reading below 50 indicates a contraction, whereas a reading above 50 indicates an expansion), PMI data indicated somewhat more modest growth during the next nine months. However, in January 2011, the manufacturing sector expanded at its fastest pace since May 2004, with a reading of 60.8 versus 58.5 for the previous month. Manufacturing activity remained strong during the next three months and was 60.4 in April. The expansion in the manufacturing sector was broad based in April, with seventeen of eighteen industries tracked by the Institute for Supply Management growing during the month.

Outside of the U.S., economic news was largely dominated by the sovereign debt crisis in Europe, geopolitical events in the Middle East and Northern Africa ( MENA ), and the devastating earthquake and tsunami in Japan. During the reporting period, Ireland joined Greece in requesting financial support from the European Union ( EU ) and International Monetary Fund ( IMF ), and Portugal also requested bailout funds. Political turmoil in the MENA region caused oil prices to rise above \$100 a barrel in February 2011, the first such occurrence in roughly two years. This led to concerns that higher oil prices could temper economic growth in both developed and emerging market countries. The tragedy in Japan also impacted the global economy. According to the World Bank, damage in northeast Japan could reach \$235 billion. However, the World Bank stated, "As a result of the earthquake and tsunami, Japan's real GDP growth will slow, but the slowdown will likely be temporary. Growth should start picking up after mid-2011 as reconstruction efforts get underway."

**Financial market overview**

Although the financial markets were, for the most part, characterized by healthy investor risk appetite and solid results by stocks and lower-quality bonds, there were periods of heightened volatility during the reporting period. The markets experienced sharp sell-offs in mid-November 2010, and again in mid-February and mid-March 2011. During those periods, investors tended to favor the relative safety of U.S. Treasury securities. However, these setbacks proved to be only temporary and, in each case, risk aversion was generally replaced with solid demand for riskier assets.

Due to signs that certain areas of the economy were moderating in the middle of 2010 (prior to the beginning of the reporting period), the Fed took further actions to spur the economy. At its August 10th meeting, the Fed announced an ongoing program that calls for using the proceeds from expiring agency debt and agency mortgage-backed securities to purchase longer-dated Treasury securities.

In addition, the Fed remained cautious given pockets of weakness in the economy. At its meeting in September 2010, the Fed said, "The Committee will continue to monitor the economic outlook and financial developments and is prepared to provide additional accommodation if needed to support the economic recovery. . . ." This led to speculation that the Fed may again move to purchase large amounts of agency and Treasury securities in an attempt to avoid a double-dip recession and ward off deflation.

The Fed then took additional action in early November 2010. Citing that "the pace of recovery in output and employment continues to be slow, the Fed

announced another round of quantitative easing to help stimulate the economy, entailing the purchase of \$600 billion of long-term U.S. Treasury securities by the end of the second quarter of 2011. This, coupled with the Fed's previously announced program to use the proceeds of expiring securities to purchase Treasuries, means it could buy a total of \$850 billion to \$900 billion of Treasury securities by the end of June 2011. At its meeting in April 2011, the Fed said it continues to anticipate that economic conditions, including low rates of resource utilization, subdued inflation trends, and stable inflation expectations, are likely to warrant exceptionally low levels for the federal funds rate for an extended period. The Fed also stated that it would end its program of purchasing \$600 billion of Treasury securities on schedule at the end of June.

Given the economic challenges in the Eurozone, the European Central Bank (ECB) kept interest rates at 1.0% during most of the reporting period. However, in early April 2011, the ECB raised interest rates from 1.00% to 1.25% the first rate hike since July 2008. In other developed countries, the Bank of England kept rates on hold at 0.5% during the period, as did Japan at a range of zero to 0.1%, the lowest level since 2006. Elsewhere, a number of emerging market countries, including China, India and Brazil, raised interest rates during the reporting period in an effort to ward off inflation.

#### **Fixed-income market review**

After rallying in October 2010 (prior to the beginning of the reporting period) in the wake of the Fed indicating the possibility of another round of quantitative easing, the spread sectors (non-Treasuries) started to weaken toward the middle of November. This occurred as financial troubles in Ireland resulted in a re-emergence of the European sovereign debt crisis. While most spread sectors regained their footing during the last five months of the reporting period, others, such as emerging market debt, produced mixed results given ongoing uncertainties in Europe, concerns regarding economic growth in China and its potential impact on the global economy, geopolitical unrest in the Middle East and Libya and the devastating earthquake and tsunami in Japan.

Both short- and long-term Treasury yields fluctuated but, overall, moved higher during the six months ended April 30, 2011. When the period began, two- and ten-year Treasury yields were 0.34% and 2.63%, respectively. Treasury yields initially moved lower, with two- and ten-year Treasury yields hitting their low for the period of 0.33% and 2.53%, respectively, on November 4, 2010. Yields then moved sharply higher given expectations for stronger growth in 2011 and the potential for rising inflation. On February 14, 2011, two-year Treasury yields peaked at 0.87%, while ten-year Treasuries peaked at 3.75% on February 8, 2011. Treasury yields then declined as investor risk aversion increased given the uprising in Libya and, later, given the tragic events in Japan. Yields moved higher toward the end of March as investor risk appetite resumed, but then declined in April given disappointing first quarter 2011 GDP data. When the period ended on April 30, 2011, two-year Treasury yields were 0.61% and ten-year Treasury yields were 3.32%. For the six months ended April 30, 2011, the Barclays Capital U.S. Aggregate Index<sup>v</sup> returned 0.02%. In comparison, the Barclays Capital Global Aggregate Index (Hedged)<sup>vi</sup> returned -0.85% over the same time frame.

VI Western Asset Global Corporate Defined Opportunity Fund Inc.

**Investment commentary (continued)**

The U.S. high-yield bond market produced strong results during the reporting period. The asset class posted positive returns during each month except for November 2010, when risk aversion rose sharply. The high-yield market was supported by generally better-than-expected corporate profits and overall strong investor demand. All told, the Barclays Capital U.S. High Yield  $\text{2\% Issuer Cap Index}$ <sup>vii</sup> returned 6.18% for the six months ended April 30, 2011.

The emerging market debt asset class generated mixed results, with an overall negative return for the six-month reporting period. During the first half of the period, investor concerns regarding interest rate hikes in China and unrest in the MENA region dragged the asset class down. Emerging market debt prices then largely stabilized in February and rallied in March and April. However, this rebound was not enough to overcome the earlier weakness and the JPMorgan Emerging Markets Bond Index Global (  $\text{EMBI Global}$  )<sup>viii</sup> returned -1.17% over the six months ended April 30, 2011.

**Performance review**

For the six months ended April 30, 2011, Western Asset Global Corporate Defined Opportunity Fund Inc. returned 3.54% based on its net asset value (  $\text{NAV}$  )<sup>ix</sup> and 1.03% based on its New York Stock Exchange (  $\text{NYSE}$  ) market price per share. The Fund's unmanaged benchmark, the Barclays Capital Global Aggregate Corporate Index<sup>x</sup>, returned 2.98% for the same period. The Lipper Global Income Closed-End Funds Category Average<sup>xi</sup> returned 5.91% over the same time frame. Please note that Lipper performance returns are based on each fund's NAV.

During this six-month period, the Fund made distributions to shareholders totaling \$0.78 per share, which may have included a return of capital. The performance table shows the Fund's six-month total return based on its NAV and market price as of April 30, 2011. **Past performance is no guarantee of future results.**

**Performance Snapshot as of April 30, 2011 (unaudited)**

	<b>6-Month Total Return*</b>
<b>Price Per Share</b>	
\$20.25 (NAV)	3.54%
\$18.47 (Market Price)	1.03%

**All figures represent past performance and are not a guarantee of future results.**

**\* Total returns are based on changes in NAV or market price, respectively. Total returns assume the reinvestment of all distributions, including returns of capital, if any, in additional shares in accordance with the Fund's Dividend Reinvestment Plan. Performance figures for periods shorter than one year represent cumulative figures and are not annualized.**

**Looking for additional information?**

The Fund is traded under the symbol **GDO** and its closing market price is available in most newspapers under the NYSE listings. The daily NAV is available on-line under the symbol **XGDOX** on most financial websites. *Barron's* and the *Wall Street Journal's* Monday edition both carry closed-end fund tables that provide additional information. In addition, the Fund issues a quarterly press release that can be found on most major financial websites as well as [www.leggmason.com/cef](http://www.leggmason.com/cef).

In a continuing effort to provide information concerning the Fund, shareholders may call 1-888-777-0102 (toll free),

Monday through Friday from 8:00 a.m. to 5:30 p.m. Eastern Time, for the Fund's current NAV, market price and other information.

As always, thank you for your confidence in our stewardship of your assets.

Sincerely,

R. Jay Gerken, CFA

Chairman, President and Chief Executive Officer

May 27, 2011

**RISKS:** *Fixed-income securities are subject to credit risk, inflation risk, call risk and interest rate risk. As interest rates rise, bond prices fall, reducing the value of the Fund's holdings. The Fund may invest in lower-rated high-yield bonds which are subject to greater credit risk (risk of default) than higher-rated obligations. Investments in foreign securities involve risks, including the possibility of losses due to changes in currency exchange rates and negative developments in the political, economic or regulatory structure of specific countries or regions. These risks are magnified in emerging markets. The Fund may make significant investments in derivative instruments. Derivative instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on Fund performance. Leverage may result in greater volatility of NAV and the market price of common shares and increases a shareholder's risk of loss.*

All investments are subject to risk including the possible loss of principal. Past performance is no guarantee of future results. All index performance reflects no deduction for fees, expenses or taxes. Please note that an investor cannot invest directly in an index.

The information provided is not intended to be a forecast of future events, a guarantee of future results or investment advice. Views expressed may differ from those of the firm as a whole. Forecasts and predictions are inherently limited and should not be relied upon as an indication of actual or future performance.

VIII Western Asset Global Corporate Defined Opportunity Fund Inc.

**Investment commentary (continued)**

i Gross domestic product ( GDP ) is the market value of all final goods and services produced within a country in a given period of time.

ii The Federal Reserve Board ( Fed ) is responsible for the formulation of policies designed to promote economic growth, full employment, stable prices and a sustainable pattern of international trade and payments.

iii The Institute for Supply Management's PMI is based on a survey of purchasing executives who buy the raw materials for manufacturing at more than 350 companies. It offers an early reading on the health of the manufacturing sector.

iv The federal funds rate is the rate charged by one depository institution on an overnight sale of immediately available funds (balances at the Federal Reserve) to another depository institution; the rate may vary from depository institution to depository institution and from day to day.

v The Barclays Capital U.S. Aggregate Index is a broad-based bond index comprised of government, corporate, mortgage- and asset-backed issues, rated investment grade or higher, and having at least one year to maturity.

vi The Barclays Capital Global Aggregate Index (Hedged) is a broad-based bond index that measures a wide spectrum of global government, government-related agencies, corporate and securitized fixed-income investments, all with maturities greater than one year.

vii The Barclays Capital U.S. High Yield 2% Issuer Cap Index is an index of the 2% Issuer Cap component of the Barclays Capital U.S. Corporate High Yield Index, which covers the U.S. dollar-denominated, non-investment grade, fixed-rate, taxable corporate bond market.

viii The JPMorgan Emerging Markets Bond Index Global ( EMBI Global ) tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, Eurobonds and local market instruments.

ix Net asset value ( NAV ) is calculated by subtracting total liabilities and outstanding preferred stock (if any) from the closing value of all securities held by the Fund (plus all other assets) and dividing the result (total net assets) by the total number of the common shares outstanding. The NAV fluctuates with changes in the market prices of securities in which the Fund has invested. However, the price at which an investor may

buy or sell shares of the Fund is the Fund's market price as determined by supply of and demand for the Fund's shares.

x The Barclays Capital Global Aggregate Corporate Index is the corporate component of the Barclays Capital Global Aggregate Index, which is comprised of several other Barclays Capital indices that measure fixed-income performance of regions around the world.

xi Lipper, Inc., a wholly-owned subsidiary of Reuters, provides independent insight on global collective investments. Returns are based on the six-month period ended April 30, 2011, including the reinvestment of all distributions, including returns of capital, if any, calculated among the 15 funds in the Fund's Lipper category.

**Fund at a glance (unaudited)**

**Investment breakdown (%) as a percent of total investments**

The bar graph above represents the composition of the Fund's investments as of April 30, 2011 and October 31, 2010 and does not include derivatives, such as futures contracts and forward foreign currency contracts. The Fund is actively managed. As a result, the composition of the Fund's investments is subject to change at any time.

Prior year percentages have been restated to reflect current period classifications.

2 Western Asset Global Corporate Defined Opportunity Fund Inc. 2011 Semi-Annual Report

**Spread duration (unaudited)**

**Economic Exposure April 30, 2011**

Spread duration measures the sensitivity to changes in spreads. The spread over Treasuries is the annual risk-premium demanded by investors to hold non-Treasury securities. Spread duration is quantified as the % change in price resulting from a 100 basis points change in spreads. For a security with positive spread duration, an increase in spreads would result in a price decline and a decline in spreads would result in a price increase. This chart highlights the market sector exposure of the Fund's sectors relative to the selected benchmark sectors as of the end of the reporting period.

**Effective duration (unaudited)****Interest Rate Exposure April 30, 2011**

Effective duration measures the sensitivity to changes in relevant interest rates. Effective duration is quantified as the % change in price resulting from a 100 basis points change in interest rates. For a security with positive effective duration, an increase in interest rates would result in a price decline and a decline in interest rates would result in a price increase. This chart highlights the interest rate exposure of the Fund's sectors relative to the selected benchmark as of the end of the reporting period.

Weighted Average Interest Rate on Loans	1.16%	1.18%

1 For the six months ended April 30, 2011 (unaudited).

2 Per share amounts have been calculated using the average shares method.

3 For the period November 24, 2009 (commencement of operations) through October 31, 2010.

- 4 Initial public offering price of \$20.00 per share less offering costs and sales load totaling \$0.94 per share.
- 5 Performance figures may reflect compensating balance arrangements, fee waivers and/or expense reimbursements. In the absence of compensating balance arrangements, fee waivers and/or expense reimbursements, the total return would have been lower. Past performance is no guarantee of future results. Total returns for periods of less than one year are not annualized.
- 6 The total return calculation assumes that distributions are reinvested in accordance with the Fund's dividend reinvestment plan. Past performance is no guarantee of future results. Total returns for periods of less than one year are not annualized.
- 7 Annualized.
- 8 The impact of compensating balance arrangements, if any, was less than 0.01%.
- 9 The investment manager has agreed to reimburse all organization expenses (Note 2).

See Notes to Financial Statements.

**Notes to financial statements (unaudited)****1. Organization and significant accounting policies**

Western Asset Global Corporate Defined Opportunity Fund Inc. (the Fund) was incorporated in Maryland on September 17, 2009 and is registered as a non-diversified, limited-term, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund's primary investment objective is to provide current income and then to liquidate and distribute substantially all of the Fund's net assets to stockholders on or about December 2, 2024. As a secondary investment objective, the Fund will seek capital appreciation. The Fund seeks to achieve its investment objectives by investing 80% of its managed assets in a portfolio of U.S. and foreign corporate fixed-income securities of varying maturities.

The following are significant accounting policies consistently followed by the Funds and are in conformity with U.S. generally accepted accounting principles (GAAP). Estimates and assumptions are required to be made regarding assets, liabilities and changes in net assets resulting from operations when financial statements are prepared. Changes in the economic environment, financial markets and any other parameters used in determining these estimates could cause actual results to differ. Subsequent events have been evaluated through the date the financial statements were issued.

**(a) Investment valuation.** Debt securities are valued at the mean between the last quoted bid and asked prices provided by an independent pricing service, which are based on transactions in debt obligations, quotations from bond dealers, market transactions in comparable securities and various other relationships between securities. Publicly traded foreign government debt securities are typically traded internationally in the over-the-counter market, and are valued at the mean between the last quoted bid and asked prices as of the close of business of that market. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. When reliable prices are not readily available, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund values these securities as determined in accordance with procedures approved by the Fund's Board of Directors. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates fair value.

The Fund has adopted Financial Accounting Standards Board Codification Topic 820 (ASC Topic 820). ASC Topic 820 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund's investments, and requires

additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to discount estimated future cash flows to present value.

The following is a summary of the inputs used in valuing the Fund's assets and liabilities carried at fair value:

Description	ASSETS			Total
	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Long-term investments :				
Corporate bonds & notes		\$330,150,362	\$932,325	\$331,082,687
Asset-backed securities		13,117,208		13,117,208

See Schedule of Investments for additional detailed categorizations.

24 Western Asset Global Corporate Defined Opportunity Fund Inc. 2011 Semi-Annual Report

**Notes to financial statements (unaudited) (cont d)**

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

	<b>Corporate Bonds &amp; Notes</b>
<b>Investments In Securities</b>	
Balance as of October 31, 2010	\$ 4,275,000
Accrued premiums/discounts	
Realized gain (loss)	
Change in unrealized appreciation (depreciation) <sup>1</sup>	(120,697)
Net purchases (sales)	729,444
Transfers into Level 3	
Transfers out of Level 3	(3,951,422)
<b>Balance as of April 30, 2011</b>	<b>\$ 932,325</b>
<b>Net change in unrealized appreciation (depreciation) for investments in securities still held at April 30, 2011</b>	<b>\$ 2,325</b>

<sup>1</sup> This amount is included in the change in net unrealized appreciation (depreciation) in the accompanying Statement of Operations. Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized.

**(b) Repurchase agreements.** The Fund may enter into repurchase agreements with institutions that its investment adviser has determined are creditworthy. Each repurchase agreement is recorded at cost. Under the terms of a typical repurchase agreement, the Fund acquires a debt security subject to an obligation of the seller to repurchase, and of the Fund to resell, the security at an agreed-upon price and time, thereby determining the yield during the Fund's holding period. When entering into repurchase agreements, it is the Fund's policy that its custodian or a third party custodian, acting on the Fund's behalf, take possession of the underlying collateral securities, the market value of which, at all times, at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction maturity exceeds one business day, the value of the collateral is marked-to-market and measured against the value of the agreement in an effort to ensure the adequacy of the collateral. If the counterparty defaults, the Fund generally has the right to use the collateral to satisfy the terms of the repurchase transaction. However, if the market value of the collateral declines during the period in which the Fund seeks to assert its rights or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

**(c) Reverse repurchase agreements.** The Fund may enter into reverse repurchase agreements. Under the terms of a typical reverse repurchase agreement, a Fund sells a security subject to an obligation to repurchase the security from the buyer at an agreed-upon time and price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the fund's use of the proceeds of the agreement may be restricted pending a determination by the counterparty, or its trustee or

receiver, whether to enforce the Fund's obligation to repurchase the securities. In entering into reverse repurchase agreements, the Fund will maintain cash, U.S. government securities or other liquid debt obligations at least equal in value to its obligations with respect to reverse repurchase agreements or will take other actions permitted by law to cover its obligations.

**(d) Futures contracts.** The Fund uses futures contracts generally to gain exposure to, or hedge against, changes in interest rates. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date.

Upon entering into a futures contract, the Fund is required to deposit cash or cash equivalents with a broker in an amount equal to a certain percentage of the contract amount. This is known as the initial margin and subsequent payments (variation margin) are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. For certain futures, including foreign denominated futures, variation margin is not settled daily, but is recorded as a net variation margin payable or receivable. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. The daily changes in contract value are recorded as unrealized gains or losses in the Statement of Operations and the Fund recognizes a realized gain or loss when the contract is closed.

Futures contracts involve, to varying degrees, risk of loss in excess of the amounts reflected in the financial statements. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

**(e) Forward foreign currency contracts.** The Fund enters into a forward foreign currency contract to hedge against foreign currency exchange rate risk on its non-U.S. dollar denominated securities or to facilitate settlement of a foreign currency denominated portfolio transaction. A forward foreign currency contract is an agreement between two parties to buy and sell a currency at a set price with delivery and settlement at a future date. The contract is marked-to-market daily and the change in value is recorded by the Fund as an unrealized gain or loss. When a forward foreign currency contract is closed, through either delivery or offset by entering into another forward foreign currency contract, the Fund recognizes a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value of the contract at the time it is closed.

Forward foreign currency contracts involve elements of market risk in excess of the amounts reflected on the Statement of Assets and Liabilities. The Fund bears the risk of an unfavorable change in the foreign exchange rate underlying the forward foreign currency contract. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

**Notes to financial statements (unaudited) (cont d)**

**(f) Foreign currency translation.** Investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the respective dates of such transactions.

The Fund does not isolate that portion of the results of operations resulting from fluctuations in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss on investments.

Net realized foreign exchange gains or losses arise from sales of foreign currencies, including gains and losses on forward foreign currency contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the values of assets and liabilities, other than investments in securities, on the date of valuation, resulting from changes in exchange rates.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. dollar denominated transactions as a result of, among other factors, the possibility of lower levels of governmental supervision and regulation of foreign securities markets and the possibility of political or economic instability.

**(g) Stripped securities.** The Fund may invest in Stripped Securities, a term used collectively for components, or strips, of fixed income securities. Stripped securities can be principal only securities ( PO ), which are debt obligations that have been stripped of unmatured interest coupons or, interest only securities ( IO ), which are unmatured interest coupons that have been stripped from debt obligations. The market value of Stripped Securities will fluctuate in response to changes in economic conditions, rates of pre-payment, interest rates and the market's perception of the securities. However, fluctuations in response to interest rates may be greater in Stripped Securities than for debt obligations of comparable maturities that pay interest currently. The amount of fluctuation may increase with a longer period of maturity.

The yield to maturity on IO s is sensitive to the rate of principal repayments (including prepayments) on the related underlying debt obligation and principal payments may have a material effect on yield to maturity. If the underlying debt obligation experiences greater than anticipated prepayments of principal, the Fund may not fully recoup its initial investment in IO s.

## Western Asset Global Corporate Defined Opportunity Fund Inc. 2011 Semi-Annual Report

**(h) Loan participations.** The Fund may invest in loans arranged through private negotiation between one or more financial institutions. The Fund's investment in any such loan may be in the form of a participation in or an assignment of the loan. In connection with purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement related to the loan, or any rights of off-set against the borrower and the Fund may not benefit directly from any collateral supporting the loan in which it has purchased the participation.

The Fund assumes the credit risk of the borrower, the lender that is selling the participation and any other persons interpositioned between the Fund and the borrower. In the event of the insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any off-set between the lender and the borrower.

**(i) Cash flow information.** The Fund invests in securities and distributes dividends from net investment income and net realized gains, which are paid in cash and may be reinvested at the discretion of shareholders. These activities are reported in the Statement of Changes in Net Assets and additional information on cash receipts and cash payments are presented in the Statement of Cash Flows.

**(j) Credit and market risk.** The Fund invests in high-yield and emerging market instruments that are subject to certain credit and market risks. The yields of high-yield and emerging market debt obligations reflect, among other things, perceived credit and market risks. The Fund's investment in securities rated below investment grade typically involve risks not associated with higher rated securities including, among others, greater risk related to timely and ultimate payment of interest and principal, greater market price volatility and less liquid secondary market trading. The consequences of political, social, economic or diplomatic changes may have disruptive effects on the market prices of investments held by the Fund. The Fund's investment in non-U.S. dollar denominated securities may also result in foreign currency losses caused by devaluations and exchange rate fluctuations.

**(k) Security transactions and investment income.** Security transactions are accounted for on a trade date basis. Interest income, adjusted for amortization of premium and accretion of discount, is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date. Foreign dividend income is recorded on the ex-dividend date or as soon as practicable after the Fund determines the existence of a dividend declaration after exercising reasonable due diligence. The cost of investments sold is determined by use of the specific identification method. To the extent any issuer defaults or a credit event occurs that impacts the issuer, the Fund may halt any additional interest income accruals and consider the realizability of interest accrued up to the date of default or credit event.

Western Asset Global Corporate Defined Opportunity Fund Inc. 2011 Semi-Annual Report

**Notes to financial statements (unaudited) (cont d)**

**(l) Distributions to shareholders.** Distributions from net investment income of the Fund, if any, are declared quarterly and are paid on a monthly basis. Distributions of net realized gains, if any, are declared at least annually. Distributions to shareholders of the Fund are recorded on the ex-dividend date and are determined in accordance with income tax regulations, which may differ from GAAP.

**(m) Compensating balance arrangements.** The Fund has an arrangement with its custodian bank whereby a portion of the custodian's fees is paid indirectly by credits earned on the Fund's cash on deposit with the bank.

**(n) Federal and other taxes.** It is the Fund's policy to comply with the federal income and excise tax requirements of the Internal Revenue Code of 1986 (the Code), as amended, applicable to regulated investment companies. Accordingly, the Fund intends to distribute its taxable income and net realized gains, if any, to shareholders in accordance with timing requirements imposed by the Code. Therefore, no federal or state income tax provision is required in the Fund's financial statements. However, due to the timing of when distributions are made, the Fund may be subject to an excise tax of 4% of the amount by which 98% of the Fund's annual taxable income exceeds the distributions from such taxable income for the year. The Fund paid \$120,000 of federal excise tax attributable to calendar year 2010 in March 2011.

Management has analyzed the Fund's tax position and has concluded that as of April 30, 2011, no provision for income tax is required in the Fund's financial statements. The Fund's federal and state income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by Internal Revenue Service and state departments of revenue.

**(o) Reclassification.** GAAP requires that certain components of net assets be reclassified to reflect permanent differences between financial and tax reporting. These reclassifications have no effect on net assets or net asset value per share.

**2. Investment management agreement and other transactions with affiliates**

Legg Mason Partners Fund Advisor, LLC (LMPFA) is the Fund's investment manager. Western Asset Management Company (Western Asset), Western Asset Management Company Pte. Ltd. (Western Singapore), Western Asset Management Company Ltd (Western Japan) and Western Asset Management Company Limited (Western Asset Limited) are the Fund's subadvisers. LMPFA, Western Asset, Western Singapore, Western Japan and Western Asset Limited are wholly-owned subsidiaries of Legg Mason, Inc. (Legg Mason).

LMPFA provides administrative and certain oversight services to the Fund. The Fund pays LMPFA an investment management fee, calculated daily and

## Western Asset Global Corporate Defined Opportunity Fund Inc. 2011 Semi-Annual Report

paid monthly, at an annual rate of 0.80% of the Fund's average daily net assets plus the proceeds of any outstanding borrowings used for leverage.

LMPFA delegates to Western Asset the day-to-day portfolio management of the Fund. Western Singapore, Western Japan and Western Asset Limited provide certain advisory services to the Fund relating to currency transactions and investment in non-U.S. dollar denominated debt securities. For its services, LMPFA pays Western Asset 70% of the net management fee it receives from the Fund. In turn, Western Asset pays Western Singapore, Western Japan and Western Asset Limited a fee for its services at no additional expense to the Fund. Each of Western Singapore, Western Japan and Western Asset Limited receives a fee from Western Asset, payable monthly, in an amount equal to an annual rate of 0.56% of the Fund's daily managed assets related to the Fund's assets that Western Asset allocates to Western Singapore, Western Japan and Western Asset Limited, respectively, to manage.

All officers and one Director of the Fund are employees of Legg Mason or its affiliates and do not receive compensation from the Fund.

### 3. Investments

During the six months ended April 30, 2011, the aggregate cost of purchases and proceeds from sales of investments (excluding short-term investments) were as follows:

Purchases	\$25,240,013
Sales	32,264,240

At April 30, 2011, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

Gross unrealized appreciation	\$26,188,661
Gross unrealized depreciation	(1,711,300)
<b>Net unrealized appreciation</b>	<b>\$24,477,361</b>

At April 30, 2011, the Fund had the following open futures contracts:

	Number of Contracts	Expiration Date	Basis Value	Market Value	Unrealized Gain (Loss)
<b>Contracts to Sell:</b>					

U.S. Treasury 10-Year Notes	8	6/11	\$ 943,833	\$ 969,125	\$(25,292)
U.S. Treasury 30-Year Bonds	11	6/11	1,315,152	1,346,125	(30,973)
<b>Net unrealized loss on open futures contracts</b>					<b>\$(56,265)</b>

Western Asset Global Corporate Defined Opportunity Fund Inc. 2011 Semi-Annual Report

**Notes to financial statements (unaudited) (cont d)**

Transactions in reverse repurchase agreements for the Fund during the six months ended April 30, 2011 were as follows:

<b>Average Daily Balance*</b>	<b>Weighted Average Interest Rate*</b>	<b>Maximum Amount Outstanding</b>
\$30,650,205	0.90%	\$70,000,000

\* Averages based on the number of days that Fund had reverse repurchase agreements outstanding.

Interest rates on reverse repurchase agreements ranged from 0.650% to 1.250% during the six months ended April 30, 2011. Interest expense incurred on reverse repurchase agreements totaled \$138,882.

At April 30, 2011, the Fund had the following open reverse repurchase agreements:

<b>Security</b>	<b>Face Amount</b>
Reverse repurchase agreement with Barclays Capital Inc, dated 4/8/11 bearing a variable rate based on the 3 month Libor plus any applicable margin, to be repurchased at an amount and date to be determined, collateralized by various securities footnoted in the Fund's Schedule of Investments, 5.000% to 12.000%, due 10/1/14 to 12/15/39; Market value (including accrued interest) \$61,761,699	\$50,000,000
Reverse repurchase agreement with Barclays Capital Inc, dated 4/12/11 bearing a variable rate based on the 3 month Libor plus any applicable margin, repurchased at an amount and date to be determined, collateralized by various securities footnoted in the Fund's Schedule of Investments, 5.700% to 11.250%, due 11/15/16 to 11/15/67; Market value (including accrued interest) \$23,603,468	20,000,000
<b>Total reverse repurchase agreement (Proceeds \$70,000,000)</b>	<b>\$70,000,000</b>

At April 30, 2011, the Fund had the following open forward foreign currency contracts:

<b>Foreign Currency Contracts to Buy:</b>	<b>Counterparty</b>	<b>Local Currency</b>	<b>Market Value</b>	<b>Settlement Date</b>	<b>Unrealized Gain (Loss)</b>
British Pound	Morgan Stanley	1,300,000	\$ 2,170,887	5/18/11	\$ 47,848

Edgar Filing: WESTERN ASSET GLOBAL CORPORATE DEFINED OPPORTUNITY FUND INC. - Form N-CSRS

					<b>(7,259,100)</b>
<b>Net unrealized loss on open forward foreign currency contracts</b>					<b>\$(7,003,419)</b>

**4. Derivative instruments and hedging activities**

Financial Accounting Standards Board Codification Topic 815 requires enhanced disclosure about an entity's derivative and hedging activities.

Below is a table, grouped by derivative type that provides information about the fair value and the location of derivatives within the Statement of Assets and Liabilities at April 30, 2011.

<b>ASSET DERIVATIVES<sup>1</sup></b>			
	<b>Foreign Exchange Contracts Risk</b>		
Forward foreign currency contracts			\$255,681
<b>LIABILITY DERIVATIVES<sup>1</sup></b>			
	<b>Interest Rate Contracts Risk</b>	<b>Foreign Exchange Contracts Risk</b>	<b>Total</b>
Futures contracts <sup>2</sup>	\$56,265		\$ 56,265
Forward foreign currency contracts		\$7,259,100	7,259,100
<b>Total</b>	<b>\$56,265</b>	<b>\$7,259,100</b>	<b>\$7,315,365</b>

1 Generally, the balance sheet location for asset derivatives is receivables/net unrealized appreciation (depreciation) and for liability derivatives is payables/net unrealized appreciation (depreciation).

2 Includes cumulative appreciation (depreciation) of futures contracts as reported in the footnotes. Only variation margin is reported within the receivables and/or payables of the Statement of Assets and Liabilities.

The following tables provide information about the effect of derivatives and hedging activities on the Fund's Statement of Operations for the six months ended April 30, 2011. The first table provides additional detail about the amounts and sources of gains (losses) realized on derivatives during the period. The second table provides additional information about the change in unrealized appreciation (depreciation) resulting from the Fund's derivatives and hedging activities during the period.

<b>AMOUNT OF REALIZED GAIN (LOSS) ON DERIVATIVES RECOGNIZED</b>			
	<b>Interest Rate Contracts Risk</b>	<b>Foreign Exchange Contracts Risk</b>	<b>Total</b>
Futures contracts	\$115,808		\$115,808
Forward foreign currency contracts		\$41,131	41,131
<b>Total</b>	<b>\$115,808</b>	<b>\$41,131</b>	<b>\$156,939</b>

32 Western Asset Global Corporate Defined Opportunity Fund Inc. 2011 Semi-Annual Report

**Notes to financial statements (unaudited) (cont d)**

During the six months ended April 30, 2011, the volume of derivative activity for the Fund was as follows:

	<b>Average Market Value</b>
Futures contracts (to sell)	\$ 2,329,911
Forward foreign currency contracts (to buy)	3,943,173
Forward foreign currency contracts (to sell)	97,318,887

**5. Loan**

The Fund had a 364-day revolving credit agreement with a financial institution, which allowed the Fund to borrow up to an aggregate amount of \$100,000,000. Unless renewed, this agreement would have terminated on January 10, 2011. On January 5, 2011, this credit agreement was extended to April 10, 2011. The interest on the loan is calculated at a variable rate based on the one-month LIBOR plus any applicable margin. To the extent of the borrowing outstanding, the Fund is required to maintain collateral in a special custody account at the Fund's custodian on behalf of the financial institution. During the six months ended April 30, 2011, the Fund incurred interest expense on this loan in the amount of \$254,033. For the six months ended April 30, 2011, based on the number of days during the reporting period that the Fund had a loan balance outstanding, the average daily loan balance was \$50,000,000 and the weighted average interest rate was 1.16%. On April 10, 2011, the credit agreement expired.

**6. Distributions subsequent to April 30, 2011**

On February 14, 2011, the Board of Directors (the Board) of the Fund declared a distribution in the amount of \$0.1300 per share payable on May 27, 2011 to shareholders of record on May 20, 2011. On May 16, 2011, the Board declared a distribution in the amount of \$0.1300 per share payable on June 24, 2011, July 29, 2011 and August 26, 2011 to shareholders of record on June 17, 2011, July 22, 2011 and August 19, 2011, respectively.

**7. Other tax information**

On December 22, 2010, President Obama signed into law the Regulated Investment Company Modernization Act of 2010 (the Act). The Act updates certain tax rules applicable to regulated investment companies (Rocs). The various provisions of the Act will generally be effective for Rocs with taxable years beginning after December 22, 2010. Additional information regarding the impact of the Act on the Fund, if any, will be contained within the relevant sections of the notes to the financial statements for the fiscal year ending October 31, 2012.

**Additional shareholder information (unaudited)****Results of annual meeting of shareholders**

The Annual Meeting of Shareholders of Western Asset Global Corporate Defined Opportunity Fund Inc. was held on February 28, 2011 for the purpose of considering and voting upon the election of Directors. The following table provides information concerning the matter voted upon at the Meeting:

**Election of directors**

<b>Nominees</b>	<b>Votes For</b>	<b>Votes Withheld</b>
Carol L. Colman	13,964,390	218,408
Daniel P. Cronin	13,987,730	195,068
Paolo M. Cucchi	13,965,353	217,445

At April 30, 2011, in addition to Carol L. Colman, Daniel P. Cronin and Paolo M. Cucchi, the other Directors of the Fund were as follows:

Leslie H. Gelb  
R. Jay Gerken, CFA  
William R. Hutchinson  
Riordan Roett  
Jeswald W. Salacuse

34 Western Asset Global Corporate Defined Opportunity Fund Inc.

**Dividend reinvestment plan (unaudited)**

Unless you elect to receive distributions in cash (i.e., opt-out), all dividends, including any capital gain dividends, on your Common Stock will be automatically reinvested by American Stock Transfer & Trust Company LLC, as agent for the stockholders (the Plan Agent), in additional shares of Common Stock under the Fund's Dividend Reinvestment Plan (the Plan). You may elect not to participate in the Plan by contacting the Plan Agent. If you do not participate, you will receive all cash distributions paid by check mailed directly to you by American Stock Transfer & Trust Company LLC, as dividend paying agent.

If you participate in the Plan, the number of shares of Common Stock you will receive will be determined as follows:

(1) If the market price of the Common Stock on the record date (or, if the record date is not a NYSE trading day, the immediately preceding trading day) for determining stockholders eligible to receive the relevant dividend or distribution (the determination date) is equal to or exceeds 98% of the net asset value per share of the Common Stock, the Fund will issue new Common Stock at a price equal to the greater of (a) 98% of the net asset value per share at the close of trading on the NYSE on the determination date or (b) 95% of the market price per share of the Common Stock on the determination date.

(2) If 98% of the net asset value per share of the Common Stock exceeds the market price of the Common Stock on the determination date, the Plan Agent will receive the dividend or distribution in cash and will buy Common Stock in the open market, on the NYSE or elsewhere, for your account as soon as practicable commencing on the trading day following the determination date and terminating no later than the earlier of (a) 30 days after the dividend or distribution payment date, or (b) the record date for the next succeeding dividend or distribution to be made to the stockholders; except when necessary to comply with applicable provisions of the federal securities laws. If during this period: (i) the market price rises so that it equals or exceeds 98% of the net asset value per share of the Common Stock at the close of trading on the NYSE on the determination date before the Plan Agent has completed the open market purchases or (ii) if the Plan Agent is unable to invest the full amount eligible to be reinvested in open market purchases, the Plan Agent will cease purchasing Common Stock in the open market and the Fund shall issue the remaining Common Stock at a price per share equal to the greater of (a) 98% of the net asset value per share at the close of trading on the Exchange on the determination date or (b) 95% of the then current market price per share.

Common Stock in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all shares of Common Stock you have received under the Plan.

You may withdraw from the Plan (i.e., opt-out) by notifying the Plan Agent in writing at P.O. Box 922, Wall Street Station, New York, NY 10269-0560 or by calling the Plan Agent at 1-888-888-0151. Such withdrawal will be effective immediately if notice is received by the Plan Agent not less than ten business days prior to any dividend or distribution record date; otherwise such withdrawal will be effective as soon as practicable after the Plan Agent's investment of the most recently declared dividend or distribution on the Common Stock. The Plan may be amended or supplemented by the Fund upon notice in writing mailed to stockholders at least 30 days prior to the record date for the payment of any dividend or distribution by the Fund for which the termination is to be effective.

Upon any termination, you will be sent a certificate or certificates for the full number of shares of Common Stock held for you under the Plan and cash for any fractional share of Common Stock. You may elect to notify the Plan Agent in advance of such termination to have the Plan Agent sell part or all of your Common Stock on your behalf. You will be charged a service charge and the Plan Agent is authorized to deduct brokerage charges actually incurred for this transaction from the proceeds.

There is no service charge for reinvestment of your dividends or distributions in Common Stock. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases. Because all dividends and distributions will be automatically reinvested in additional shares of Common Stock, this allows you to add to your investment through dollar cost averaging, which may lower the average cost of your Common Stock over time. Dollar cost averaging is a technique for lowering the average cost per share over time if the Fund's net asset value declines. While dollar cost averaging has definite advantages, it cannot assure profit or protect against loss in declining markets.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions. Investors will be subject to income tax on amounts reinvested under the Plan.

The Fund reserves the right to amend or terminate the Plan if, in the judgment of the Board of Directors, the change is warranted. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan and your account may be obtained from the Plan Agent at 6201 15th Avenue, Brooklyn, New York 11219 or by calling the Plan Agent at 1-888-888-0151.
