Disclaimer

Certain statements and estimates in this material may represent expectations about future events or results that are subject to risks and uncertainties that may be known or unknown. There is no guarantee that the events or results will take place as referred to in these expectations.

These expectations are based on: the present assumptions and analyses from the point of view of our management, in accordance with their experience and other factors such as the macroeconomic environment, and market conditions in the electricity sector; and on expected future results, many of which are not under Cemig's control.

Important factors that could lead to significant differences between actual results and the projections about future events or results include Cemig's business strategy, Brazilian and international economic conditions, technology, Cemig's financial strategy, changes in the electricity sector, hydrological conditions, conditions in the financial and energy markets, uncertainty on our results from future operations, plans and objectives, and other factors. Because of these and other factors, the real results of Cemig may differ significantly from those indicated in or implied by such statements.

The information and opinions herein should not be understood as a

recommendation to potential investors and no investment decision should be based on the veracity, currentness or

completeness of this information or these opinions. None of Cemig's professionals nor any of their related parties or representatives shall have any liability for any losses that may result from the use of the content of this material.

To evaluate the risks and uncertainties as they relate to Cemig, and to obtain additional information about factors that could give rise to different results from those estimated by Cemig, please consult the section on Risk Factors included in the *Formulário de Referência* filed with the Brazilian Securities Commission (CVM) and in the 20-F form filed with the U.S. Securities and Exchange Commission (SEC).

Figures are in R\$ 000, except where otherwise indicated.

Table of Contents

From the CEO and CFO

Cemig's CEO, Mr. **Djalma Bastos de Moraes**, said:

The results we are presenting for the third quarter of 2011 clearly reflect the success of our Long-term Strategic Plan, and of the strategy linked to it, of focusing on the long term, which provide the propitious context for Cemig to earn increasing profits, with a balanced portfolio of businesses that have low risk. As always, we never cease to do our homework, and this enables us to grow in all sectors in a balanced fashion, and with focus on operational excellence. Finally, the results show that we are on the right path: that the decisions we have taken in recent years are constantly adding value to our business and that this is making Cemig stronger and more solid every day, with efficient corporate management.

Mr. **Luiz Fernando Rolla**, Chief Finance and Investor Relations Officer of Cemig, commented:

In the third quarter we continued to present cash flow that is consistent, and robust, as a result of our operations, which aim to add value for our shareholders. Our Ebitda in this quarter (3Q11) was R\$ 1.5 billion, 21% more than in the same period of last year (third quarter 2010 - 3Q10). These results continue to reflect the correctness of our strategy of growing through acquisitions and new projects, within the process of consolidation of the sector. The operations of the Cemig Group have mutual synergy, and are increasingly profitable, in a position with lower risk,

greater stability and results that grow over the long term. Our solid cash position of R\$ 3.9 billion makes execution of our Strategic Plan

Table of Contents

possible, guaranteeing our dividend policy, our debt management, and execution of the planned investments, including those associated with acquisition opportunities. The excellent results that we are presenting today show that we continue to add value, in a continuous and sustainable manner, for all our shareholders and all our other stakeholders.

On the following pages, we present the highlights of our results for 3Q11.

Table of Contents

The economic context summary

In the third quarter Brazil continued to be a major investment destination, due to its favorable economic outlook in the context of the situation of the central economies. In this period, the highlights were the European fiscal crisis, low growth in the United States and the difficulties faced by Japan.

However, the world is now being driven by new economic forces, and the emerging nations are becoming the agents responsible for the resumption in world growth. They include Brazil, which is expected to grow by 3.8% in 2011 and 5% in 2012¹.

The fundamentals of the Brazilian economy now have significant strength, generating good conditions for the country to enjoy sustained growth. Highlights are the measures to reduce the weight on the public accounts, the solid financial system, the strong entry of foreign investment, and important structural features of the economy that can enable good performance in the coming years.

The Brazilian fiscal situation is under control, achieving, by the end of the third quarter, 82% of the target primary surplus for the end of the year. These figures show that in 2011 the fiscal target

¹ According to an estimate by the Finance Ministry

Table of Contents

will be achieved relatively easily. Also, the net public sector debt has been declining each year, and the Central Bank now estimates that it will be only 38.5% of GDP at the end of 2011. These figures are evidence of the fiscal solidity of Brazil in the context of the international environment.

This view is corroborated by Brazil's low country risk, as measured by the EMBI₊₂, which has fallen significantly in recent years, to below the average now observed for Europe and Latin America. This indicator is evidence of very positive investor perception in relation to the Brazilian public accounts.

Another important aspect of the current economic context is the low risk assumed by the Brazilian financial system. The Basel ratio, which measures the proportion between the capital of financial institutions and the value of their assets weighted by the corresponding risks, was 16.9% in June, well above the minimum limit stipulated by the Central Bank (11.0%) and by the Basel Committee (8.0%). The fixed assets

ratio of the system, which gives an idea of the degree of financial commitment of the institutions in the Brazilian financial system, was only 24.7%, while the maximum permitted by law is 50.0%. Further, the volume of lending to the private sector in Brazil

2 The Emerging Markets Bond Index Plus, calculated by JP Morgan. This index includes 93 securities in 21 emerging economies, comparing their implicit interest rates with those of US securities, which are considered to be the most secure worldwide.

Table of Contents

is low (54.0% of GDP), which is evidence of the low risk exposure of the Brazilian credit system, indicating lower probability of formation of bubbles.

With the robustness of its financial system, its large consumer market and an economy strongly based on the services sector (67.4% of GDP in 2010), Brazil has good conditions to maintain a significant economic performance in the context of the current cooling of the economy worldwide. This scenario has strengthened the labor market, significantly reducing the unemployment rate (which was 6.0% in the third quarter), and leading to high average real income from employment, of R\$ 1,607.60 in September.

To support this growth, the forecasts for total investment in infrastructure in 2011 are R\$ 160.0 billion, 9.2% more than in 2010.³ Additionally, the Second Accelerated Growth Program (PAC 2) will invest R\$ 955 billion over the period 2011 through 2014 a total of R\$ 86.4 billion of this was invested in the first half of 2011. Planned investment for the electricity sector for this period is R\$ 461.6 billion, of which R\$ 11.3 billion has been engaged so far in 2011.⁴

As well as the favorable economic scenario, the government also still has a large margin for instrumentation of fiscal and monetary policies in the short term, as means of protecting the country from international shocks. These margins relate to growing surpluses, a solid financial system, high international reserves (with strong entry of foreign direct investment), high reserve requirements, high interest rates, capacity for reduction of fiscal burden, and return of credits. As measures in this direction, the Central Bank has implemented expansionary policies to ensure the continuation of the

 - 4 According to federal government figures.
-

Table of Contents

country's economic growth, and also to signal that it is working in a way that is aligned to compliance with the inflation target for 2011 and 2012.

Activity in Brazil's electricity sector continues to be very strong, with expansion of 4.1% year-on-year in the third quarter of 2011. The highest increase was in the third quarter of 2011. The highest increase was in the Commercial consumer category, which includes the services sector, with very strong growth in consumption of 8%, year-on-year, in the period. Year-on-year growth was also significantly high, at 6.4%, in residential consumption.

It is important to point out that there is a rising trend in the total consumption of electricity in successive periods.

The *Residential* and *Commercial* user categories are the leading engines of this growth, which in turn is fostered by the economic context. Industry, although showing the lowest growth rate among the various consumer categories, has a positive outlook for growth in the medium and long term, being widely based on exports of basic products.

In Minas Gerais, the state where Cemig has its strongest presence and which has Brazil's second-highest total electricity

Table of Contents

consumption production of commodities for export, such as steel and mined ores, plays a dominant role in the economy. This situation gives the state of Minas Gerais a relative advantage in that it produces goods that are indispensable inputs for various sectors of the world economy. Another highlight is the automobile industry, which continues to be highly active, although slightly less so in the last month, due to the strong Brazilian consumer market.

Table of Contents

Adoption of international accounting standards

The results presented in this release are reported under the new Brazilian accounting practices, resulting from the process of harmonization of Brazilian accounting rules with International Financial Reporting Standards (IFRS). Accordingly, the results for 3rd quarter of 2010 (3Q10) have been restated to reflect these changes and to allow comparability with those of 3Q11.

Cemig s consolidated electricity market

Cemig s market is the sum of the sales of electricity by **Cemig D**, **Cemig GT consolidated** (Cemig GT, plus *Cachoeirão*, *Pipoca* and the proportionate holdings in the *Parajuru*, *Morgado* and *Volta do Rio* wind farms), the **subsidiaries and affiliates** (*Horizontes*, *Ipatinga*, *Sá Carvalho*, *Barreiro*, *Cemig PCH*, *Rosal* and *Capim Branco*) and **Light** (in proportion to Cemig s holding).

This includes: the sales of electricity to both captive consumers and free clients, in the concession area of Minas Gerais and outside the State; the sales of electricity to other agents of the electricity sector in the Free and Regulated Markets; the sales under the *Proinfa* program to encourage alternative electricity sources; and the sales on the CCEE (the wholesale market) eliminating transactions between companies of the Cemig group.

A total of 11.38 million clients were invoiced in September 2011, 3.0% more than in September 2010. Of this total, **Cemig D** served 7.26 million, 3.7% more than in September 2010, **Light** served 4.12 million, 1.8% more than in September 2010, and **Cemig**

Table of Contents

GT and the subsidiaries and affiliated companies had 312 clients an increase of 16.0%.

In spite of the tendency of reduction in the growth rate of economic activity, the results arising from this macroeconomic situation had not yet been perceived; electricity invoiced in the third quarter of 2011 was 6% more than in the third quarter of 2010, reflecting the strong performance of the economy in Cemig's concession area.

The quantity of electricity sold to final consumers was up 5.38%, at 12,828GWh, in 3Q11, from 12,173GWh in 3Q10, with the average sale price of electricity 13.99% lower, at R\$ 99.97/MWh in 3Q11, compared to R\$ 116.23/MWh in 3Q10.

The main factors affecting revenue in 2011 were:

§ The tariff increase for Cemig D, with average effect on consumer tariffs of 7.24%, starting from April 8, 2011.

§ Volume of energy invoiced to final consumers 5.38% higher (this excludes Cemig's own internal consumption).

Accordingly, revenue from wholesale supply to other concession holders was 13.82% lower year-on-year, at R\$ 367,750 in 3Q11, than in 3Q10 (R\$ 426,723):

Table of Contents

	3Q11	MWh (*) 3Q10	Change, %

Sales under the Proinfra program	39,465	21,709	81.79
Total	17,413,162	16,478,003	5.68

These charts show the breakdown of the Cemig Group's sales to final consumers:

Table of Contents

The electricity market of Cemig GT

The consolidated total of electricity sold by Cemig GT is the total of: sales to Free Clients both in the state of Minas Gerais and outside it; sales under the *Proinfa* program; and wholesale sales in the regulated and free markets, and on the CCE.

The increase in sales of electricity by Cemig GT reflects the growth in consumption of the *Industrial* consumer category not only in Minas Gerais but in other states of Brazil, and also the increase in sales to industrial clients of electricity from sources that carry incentive benefits.

The growth of sales under Proinfa – the Program to Encourage Alternative Energy Sources – is due to the start of operation of the *Morgado* and *Volta do Rio* wind farms, in May and September 2010 respectively, in both of which Cemig has an equity interest of 49%.

Revenue from supply of electricity in 3Q11 was R\$ 1,103,491, 14.30% higher than in 3Q10 (R\$ 965,474).

The increase mainly reflects the volume of electricity supplied to Free Consumers being 5.06% higher year-on-year, due to higher sales activity in 2011.

Another factor that contributed to the increased revenue is the adjustment of contracts for sale of electricity, most of which are indexed to the IGP-M inflation index.

This table shows supply of electricity by type of consumer:

Table of Contents

	MWh (**)			R\$

(*) Includes Regulated Market Electricity Sale Contracts (CCEARs) and bilateral contracts with other agents.

(**) The information in MWh has not been reviewed by the external auditors.

The electricity market of Cemig D

The concession area of Cemig Distribuição S.A. (Cemig D) covers 567,740 km², approximately 96% of the territory of Minas Gerais State. Cemig D has four electricity distribution concessions in Minas Gerais, represented by four concession contracts for the Western, Eastern, Northern and Southern areas of the State. These contracts have an expiry date of February 18, 2016, and a clause providing for their extension by the concession-granting power for a further 20 (twenty) years,

upon application by the concession holder.

The increase in sales of electricity to Cemig D's final consumers reflects the expansion of 5.6% in the captive market, with the highlight on the *Residential* and *Commercial* consumer categories, in which growth was, respectively, 6.1%, and 12.2%.

Table of ContentsRevenue from supply of electricity

Revenue from supply of electricity in 3Q11 was R\$ 2,571,956, 8.18% higher than in 3Q10 (R\$ 2,377,401).

The main factors affecting this revenue in 2011 were:

§ The Tariff Adjustment, resulting in average increase in consumer tariffs of 7.24%, which came into effect April 8, 2011.

§ Volume of energy invoiced to final consumers 5.37% higher (this excludes the company's own internal consumption).

Table of Contents

Revenue from use of the network

This is revenue from the TUSD, the Tariff for Use of the Distribution System, made to Free Consumers on energy sold (principally by Cemig's primary generation company, Cemig GT). The total was 4.34% higher year-on-year in 3Q11 (R\$ 458,356 in 3Q11, vs. R\$ 439,283 in 3Q10). The increase mainly reflects a higher volume of electricity transported, due to the migration of captive consumers to the status of Free Consumers.

Consolidated operational revenue

Revenue from supply of electricity

Revenue from supply of electricity in 3Q11 was R\$ 4,327,548, 11.43% higher than in 3Q10 (R\$ 3,883,719).

The main factors affecting revenue in 2011 were:

§ The Tariff Adjustment for Cemig D, with an average effect increasing consumer tariffs by 7.24%, in effect from April 8, 2011.

§ Volume of energy invoiced to final consumers 5.37% higher (this excludes the company's own internal consumption).

Final consumers

The revenue from electricity sold to final consumers in 3Q11, excluding the group's own consumption, was R\$ 3,821,219, compared to R\$ 3,359,999 in the third quarter of 3Q10.

Revenue from use of the electricity distribution systems (TUSD)

The revenue from the TUSD (Tariff for Use of the Distribution System) received by Cemig D and Light in 3Q11 was 33.96% higher, at R\$ 561,196, compared to

R\$ 418,935 in 3Q10. This

Table of Contents

revenue comes principally from charges to free consumers on the electricity sold by other agents of the electricity sector.

Revenue from use of the transmission grid

The Revenue from Use of the Transmission Grid in 3Q11 was 27.67% higher than in 3Q10:

R\$ 447,811 in 3Q11, compared to R\$ 350,750 in 3Q10. The increase is mainly due to monetary updating of the transmission assets of Taesa, providing a gain in Cemig's income statement of R\$ 177,981. This updating arises from publication of the updating index for the tariffs of Taesa as from July 2011, a percentage of 9.77%.

Deductions and charges applied to operational revenues

The deductions and charges applicable to revenue in 3Q11 totaled R\$ 1,791,149, an increase of 13.25% in comparison to their total of R\$ 1,581,523 in 3Q10. The main variations in these deductions from revenue, between the two years, are as

follows:

Fuel Consumption Account CCC

The deduction from revenue for the CCC in 3Q11 was R\$ 190,141, 28.21% more than in 3Q10 (R\$ 148,300). This charge is for the costs of operation of the thermal plants in the national grid

Table of Contents

and in the isolated systems. It is shared (prorated) between electricity concession holders, on a basis set by an Aneel Resolution. The variation in this cost arises, principally, from the change in the method of calculation of charge, which now makes good the difference between the total cost of generation of electricity in the isolated systems and the average cost of electricity sold in the Regulated Market.

Energy Development Account CDE

The payments of the CDE are set by a resolution issued by the regulator, Aneel, and were 28.17% higher in 3Q11 than in 3Q10. The deduction from revenue for the CDE from January to September 2011 was R\$ 138,123, compared to R\$ 107,769 in the same period of 2010.

The other deductions from revenue are taxes, calculated as a percentage of amounts invoiced. Hence their variations are substantially proportional to the changes in revenue.

Net Income for the quarter

Cemig reported 3Q11 Net Income of R\$ 657,247, 0.37% less than the Net Income of R\$ 659,670 reported for 3Q10.

Ebitda

Cemig's Ebitda in 3Q11 was 20.82% higher than its Ebitda for 3Q10.

Table of Contents

EBITDA R\$ 000	3Q11	3Q10	Change, %
Profit (loss) for the period	657,247	659,670	(0.37)
+ Expense on income tax and Social Contribution tax	311,407	169,243	84.00
- Net financial revenue (expenses)	293,753	167,171	75.72
+ Depreciation and amortization	238,376	246,055	1.26
Ebitda	1,500,783	1,242,140	20.82
Non-recurring items:			
+ The PPD Permanent Voluntary Retirement Program	2,313	(3,386)	
= ADJUSTED EBITDA	1,503,096	1,238,754	21.34

(Method of calculation not reviewed by our external auditors.)

The higher Ebitda in 9M11 than in 9M10 mainly reflects Net operational revenue 10.75% higher, partially offset by Operational costs and expenses (excluding Depreciation and amortization) 5.56% higher. Higher Ebitda was reflected in Ebitda margin, which was 37.08% in 3Q11, increased from 33.99 in 3Q10.

Ebitda and Net Income by principal company, and by business, in 3Q11

Company	Net Income	Ebitda

Cemig D Distribution	221	425
Light	-	63
Gasmig Gas	13	23
TBE Transmission	46	66
Taesa Transmission	157	250
Others	-100	47
Total	657	1,501

* Does not include Taesa.

Business	Net Income	Ebitda
----------	------------	--------

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Generation	380	689
Transmission	182	304
Distribution	217	500
Other	-122	8
Total	657	1,501

Table of Contents

Net income for the period

Cemig reports Consolidated Net Income for 3Q11 of R\$ 657 million, 0.37% lower than the Net Income of R\$ 660 million reported for 3Q10.

Operational costs and expenses (excluding Financial revenue/expenses)

Operational costs and expenses (excluding Financial revenue/expenses) totaled R\$ 2,784,936 in 3Q11, 4.76% more than in 3Q10 (R\$ 2,658,443). This mainly reflects the variation in operational provisions: in 3Q10 there was a reversal of provisions of R\$ 33,272, while in 3Q11 new provisions were made totaling R\$ 100,359.

These are the main variations in expenses:

Operational provisions

Operational provisions made in 3Q11 totaling R\$ 100,359 contrast with a reversal of provisions of R\$ 33,272 in 3Q10. The main factor is a higher provision for losses in civil lawsuits in 2011. In 3Q11 Cemig added provisions of R\$ 37,485 for civil lawsuits, which compares with a reversal of provisions, of R\$ 40,395, in 3Q10. The

provision in 2011 arises from review of the amounts provisioned up to the previous quarter.

Table of Contents

Charges for use of the transmission grid

The expense on Charges for Use of the Transmission Grid was 18.29% higher, at R\$ 226,293, in 3Q11, than in 3Q10 (R\$ 191,304).

Gas purchased for resale

The expense on gas bought for resale in 3Q11 was R\$ 92,954, 50.89% more than the expense of R\$ 61,603 in 3Q10. The change basically reflects the higher quantity bought in 3Q11 than in 3Q10, reflecting a higher quantity of gas sold by Gasmig in 2011, due to greater industrial activity.

Financial revenues (expenses)

Cemig reports net financial expenses in 3Q11 of R\$ 293,753, 75.72% more than in 3Q10 (R\$ 167,171). The main factors in the difference between financial expenses in 3Q11 and 3Q10 are:

§ Higher expenses on costs of loans: R\$ 357,496 in 3Q11, compared to R\$ 293,987 in 3Q10. The higher figure is basically due to the higher variation in the CDI rate in 3Q11 than in 3Q10. In 3Q11 the variation resulting from the CDI rate was 3.01%, while in 3Q10 it was 2.61%.

§ A net loss on foreign exchange variations of R\$ 23,182 in 3Q11, compared to a net gain of R\$ 23,318 in 3Q10, basically reflecting effects on foreign currency loans and financings indexed to the US dollar. Hence this difference basically reflects the differing variations in the exchange rates for the US dollar in the two periods. In 3Q11 the dollar appreciated by 18.79% against the Real, while in 3Q10 it depreciated by 1.65%.

Table of Contents

Income tax and Social Contribution tax

In 3Q11, Cemig's expenses on income tax and the Social Contribution tax totaled R\$ 311,407, on profit of R\$ 968,654, before tax effects, a percentage of 32.15%.

In 3Q10 the expense on income tax and the Social Contribution tax was R\$ 169,243, on profit of R\$ 828,914, before tax effects a percentage of 20.42%.

Table of Contents

Light Highlights of 3rd Quarter 2011

§ Consumption in **Light** s concession area was 3.0% higher in 3Q11 than 3Q10.

§ The acquisitions of holdings in *Renova* and *Belo Monte* put into concrete effect the strategy of growth in generation.

§ Total electricity consumption in 3Q11 was 3.0% higher than in 3Q10.

§ Consolidated Ebitda in the quarter was R\$ 239.8 million, 38.2% less than in 3Q10, reflecting the behavior of revenue in 3Q11.

§ Losses of electricity were reduced for the sixth consecutive quarter, as a result of the Company s continued efforts.

For more information, see:

http://www.mzweb.com.br/light/web/arquivos/Light_Release_3T11.pdf

Table of Contents

Taesá Highlights of 3rd Quarter 2011

§ Non-adjusted Ebitda was R\$ 202.4 million, 7.1% higher than in 2010, as the company continued to improve its operational performance. Non-adjusted Ebitda margin remained above 90%, for the third consecutive quarter.

§ 3Q11 non-adjusted Net Income was R\$ 93 million, 0.9% higher than in the same period of 2010, and 3Q11 Net Income adjusted for IFRS was R\$ 276.9 million. Net Income in the first nine months of 2011, adjusted for IFRS, was R\$ 422.5 million.

§ The impact of the inflation adjustment on financial assets caused a significant increase in the results adjusted for IFRS in the third quarter. This is an effect without impact on the Company's cash flow, and it takes place only in the third quarter.

MARKET ANNOUNCEMENT

Non-binding proposal for interest in EDP

CEMIG (*Companhia Energética de Minas Gerais*), a listed company with share securities traded on the stock exchanges of São Paulo, New York and Madrid, in accordance with CVM Instruction 358/02, as amended, and its commitment to best corporate governance practices, hereby informs its shareholders in particular and the market in general as follows:

On October 21 Cemig presented a **non-binding** proposal for acquisition of the 21.35% stockholding interest in **Energias de Portugal S.A. (EDP)**, held by Parpública – Participações Públicas (SGPS), S.A.

This non-binding proposal is in accordance with the development strategy set out in Cemig's Long-Term Strategic Plan, which specifies the aim of balanced growth in electricity generation, transmission and distribution, through organic growth in the form of new projects and also through mergers and acquisitions. EDP operates assets that have great strategic importance and in which a partnership with Cemig could be of mutual interest to both companies.

The principal commitment of the Long-Term Strategic Plan is sustainable growth, with the aim of delivering assured growth in value for shareholders over the long term. Compliance with this principle has always been ensured by strong financial discipline, which aims to preserve Cemig's solid economic and financial solidity, without affecting its indicators nor its capacity for payment and distribution of dividends.

Cemig reiterates its commitment to seek investment opportunities that comply with the requirements for profitability and returns established by its shareholders, and to disclose all and any information on material events, as and when they take place.

Table of Contents

COMPANHIA ENERGÉTICA DE MINAS GERAIS CEMIG

LISTED COMPANY

CNPJ 17.155.730/0001-64 --- NIRE 31300040127

MATERIAL ANNOUNCEMENT

Acquisition of interest in the Belo Monte Hydroelectric Plant

CEMIG (*Companhia Energética de Minas Gerais*), a listed company with share securities traded on the stock exchanges of São Paulo, New York and Madrid, in accordance with CVM Instruction 358/02, as amended, and its commitment to best corporate governance practices, hereby informs its shareholders and the market in general as follows:

On today's date Cemig's affiliated company Amazônia Energia Participações S.A. (**Amazônia Energia**) signed share purchase agreements with six companies holding equity interests amounting, in aggregate, to 9.77% of the share capital of Norte Energia S.A. (**Norte Energia**), a Brazilian corporation that holds the concession for construction and commercial operation of the Belo Monte Hydroelectric Plant, on the Xingu River, in the Brazilian State of Pará (the **Belo Monte Plant**).

Amazônia Energia was formed as a special-purpose company by its present shareholders, which are: **Light S.A.**, with ownership of 51% of the voting stock and 25.5% of the total stock; and **Cemig Geração e Transmissão S.A.** (**Cemig GT**), a wholly-owned subsidiary of **Cemig**, owning 49% of the voting stock and 74.5% of the total stock.

Amazônia Energia will acquire equity interests in **Norte Energia** from the vendors, as follows: (i) Construtora Queiroz Galvão S.A.: 2.51%; (ii) Construtora OAS Ltda.: 2.51%; (iii) Contern Construções e Comércio Ltda.: 1.25%; (iv) Cetenco Engenharia S.A.: 1.25%; (v) Galvão Engenharia S.A.: 1.25%; and (vi) J. Malucelli Construtora de Obras S.A.: 1%.

For the acquisition of this aggregate stockholding of 9.77%, **Amazônia Energia** will pay, in up to 5 (five) business days after signature of the contracts, a total of R\$ 118,691,102.79 (one hundred and eighteen million six hundred and ninety one thousand one hundred and two Reais and seventy nine centavos). The acquisition price corresponds to the value of the injections of capital made by the vendors, adjusted by the IPCA Inflation Index up to October 26, 2011.

The entry of **Amazônia Energia** as a shareholder of **Norte Energia**, replacing the vendors, was approved by an Extraordinary General Meeting of Shareholders of **Norte Energia** on today's date.

The Brazilian electricity regulator, Aneel, will be duly informed of the transaction, and it will also be submitted to the Brazilian monopolies authority, CADE, in accordance with Law 8884/94.

BOARD OF DIRECTORS

SUMMARY OF MINUTES OF THE 520TH MEETING

Date, time and place: Opened at 5 p.m. on October 24, 2011; adjourned; resumed on October 25, 2011, at 9:30 a.m.; and closed on the same day, at the company's head office, Av. Barbacena 1200, 21th Floor, Belo Horizonte, Minas Gerais, Brazil.

Meeting Committee: Chairman: Dorothea Fonseca Furquim Werneck;
Secretary: Alexandre de Queiroz Rodrigues.

Summary of proceedings:

I **The Chair asked** the Board Members present whether any of them had **conflict of interest** in relation to the matters on the agenda of this meeting, and all stated there was no such conflict of interest, with the exception of the Board Members Paulo Roberto Reckziegel Guedes, Saulo Alves Pereira Junior, Newton Brandão Ferraz Ramos and Tarcísio Augusto Carneiro, who declared a conflict of interest in relation to the proposal for signing of Share Purchase Agreements by the affiliated company Amazônia Energia Participações S.A.

II **The Chair reported** that the Committee for Business Development and Corporate Control of Subsidiaries and Affiliates had examined the matters on the agenda, and recommended their approval.

III The Board approved the minutes of this meeting.

IV The Board authorized its affiliated company **Amazônia Energia** Participações S.A. to sign, on the same day, Share Purchase Agreements with six companies holding equity interests amounting, in aggregate, to 9.77% of the share capital of **Norte Energia S.A.**, a corporation holding the concession for construction and commercial operation of the **Belo Monte Hydroelectric Plant**, on the Xingu River, in the Brazilian State of Pará.

V Conflict of interest: The Board Members Paulo Roberto Reckziegel Guedes, Saulo Alves Pereira Junior, Newton Brandão Ferraz Ramos and Tarcísio Augusto Carneiro withdrew from the meeting room at the time of the discussion on the matter on the agenda referred to in item IV above, since they believed that there was conflict of interest in relation to the subject, and returned only after the decision on the matter by the other Board Members.

VI Debate: The Chair, Board Members and the general manager Gilberto José Cardoso spoke on general matters and business of interest to the Company.

The following were present:

Board members:	Dorothea Fonseca Furquim Werneck, Djalma Bastos de Moraes, Antônio Adriano Silva, Arcângelo Eustáquio Torres Queiroz, Francelino Pereira dos Santos, Guy Maria Villela Paschoal, João Camilo Penna, Luiz Carlos Costeira Urquiza,	Paulo Roberto Reckziegel Guedes, Saulo Alves Pereira Junior, Fernando Henrique Schüffner Neto, Adriano Magalhães Chaves, Cezar Manoel de Medeiros, Franklin Moreira Gonçalves, Marco Antonio Rodrigues da Cunha, Newton Brandão Ferraz Ramos, Tarcísio Augusto Carneiro;
General Manager:	Gilberto José Cardoso;	
Secretary:	Alexandre de Queiroz Rodrigues.

7. Press Release Cemig and Light Acquiring 9.77% of Belo Monte Hydro Plant, October 25, 2011

October 25, 2011

Media release

CEMIG AND LIGHT ACQUIRING 9.77% OF BELO MONTE HYDRO PLANT

Acquisition via 75%/25%-owned joint vehicle Amazônia Energia

- *Cemig and Light announce a strategic acquisition: a stake in the Belo Monte Hydroelectric Plant, through their joint special-purpose company Amazônia Energia*
- *Amazônia Energia has contracted to buy 9.77% of the share capital of Norte Energia S.A. (NESA), holder of the concession to operate Belo Monte.*
- *Amazônia Energia Participações S.A. is owned 74.5% by Cemig, 25.5% by Light S.A.*

Belo Horizonte, and Rio de Janeiro, October 25, 2011

The two leading Brazilian electricity companies **Cemig** and **Light** announce today to their shareholders and the public that the Boards of Directors of both companies have approved the acquisition of **9.77%** of the share capital of **Norte Energia S.A.**, holder of the concession to build and operate the **Belo Monte Hydroelectric Plant**. The acquisition will be made by **Amazônia Energia**, in which **Light** holds 51% of the common (ON) shares and **Cemig GT** holds 49% of the ON shares and 100% of the preferred (PN) shares. The price to be paid for the acquisition of the shares in **NESA** is **R\$ 118,691,102.79** (one hundred and eighteen million six hundred and ninety one thousand one hundred and two Reais and seventy nine centavos). The sum represents a reimbursement of the total amount injected into the company by the vendors, adjusted by the IPCA index to October 16, 2011.

Belo Monte is the largest electricity generation plant currently under construction in the world: when completed it will have installed capacity of **11,233 MW**, with Assured Energy of 4,571 average MW. Start of commercial operation is scheduled for **February 2015**. The concession to

operate the plant, for 35 years, is held by NESA, which won it in the auction of April 2010.

Objectives of the transaction

The main reason behind the acquisition in line with Cemig's Long-term Strategic Plan is sustainable growth for the **Cemig Group** in the three operational segments of the electricity market: generation, transmission and distribution. Under its Long-term Plan, Cemig has a final target of 20% Brazilian market share in each one of the three segments.

For **Light**, the holding in the Belo Monte Hydro Plant increases the contribution of generation to its consolidated results, an objective specified in its strategic planning.

Brazil's Northern Regions the main frontier for expansion of hydroelectric generation in Brazil the region has more than 60% of the potential for hydroelectric expansion still available. Thus, participation in these projects is of strategic importance. The **Belo Monte** Hydro Plant is the second project in the region in which Cemig GT has an interest: it already has a 10% stake in the consortium building the **Santo Antônio** Hydro Plant, in the State of Rondônia, also in the Amazon region.

Table of Contents

October 25, 2011

The transaction will add 818 MW to Cemig's total generation capacity, increasing its Brazilian generation market share from 7% to 8%, and increasing Light's generation capacity by 280 MW.

Acquisition of the interest in the plant at this stage has several advantages:

- Ø The key contracts for building works and equipment have been signed.
- Ø There are already considerable mitigating factors for the main risks associated with the project.
- Ø Injections of capital diluted over 9 years, and using the project's own cash flow in the last three years
- Ø The environmental costs have already been defined.
- Ø Contracts for sale of the plant's entire output have already been made.

Corporate governance

Under the Shareholders' Agreement of **NESA Amazônia Energia** will have the right to appoint one sitting member of the Board of Directors (and his/her substitute member), one member of each of the Committees of the Board of Directors, the Chief Corporate Management Officer, and one member of the Fiscal Council, in a rotating system with other shareholders.

Importantly, this acquisition will not affect the policy of either Cemig or Light for payment of dividends to shareholders.

About Cemig

Cemig *Companhia Energética de Minas Gerais (CMIG3, CMIG4, CIG)* is one of the largest companies in the Brazilian electricity sector, and a benchmark, both in Brazil and worldwide, for sustainability. The Cemig Group comprises 62 companies and 10 consortia, operating in electricity generation, transmission and distribution, and energy solutions. It also has investments in distribution of natural gas, data transmission, and energy efficiency consultancy, and an equity interest in a transmission line in Chile.

About Light

Light S.A. (LIGT3), based in Rio de Janeiro, operates in generation, transmission, distribution, and complementary services. It is a holding company with 100% interests in subsidiaries operating in three segments: distribution (*Light SESA*), generation (*Light Energia*), and energy trading and services (*Light Esco, Lightcom*).

MARKET ANNOUNCEMENT

REPLY TO BM&FBOVESPA INQUIRY

GAE/CAEM-2368/11, OF NOVEMBER 10, 2011

Question asked by BM&F BOVESPA

In a report in the newspaper *Folha de São Paulo* of November 10, 2011 entitled "Electricity rate will fall by 2.4% in 2012", it is stated that Cemig:

- estimates that the Ebitda of the distribution company will be reduced by R\$ 300 million, and that this, in Cemig's results, will be less than 10%; and
- is currently investing R\$ 1.8 billion, including projects for the 2014 World Cup, but the post-revision investment is expected to be R\$ 600 million.

We request explanations about this report, and any other information considered to be important.

Answer by CEMIG

Dear Sirs:

In reply to your request made in BM&FBovespa Official Letter GAE/CAEM-2368/11, of November 10, 2011, we would inform you that

The newspaper item in the *Folha de São Paulo* newspaper of November 10, 2011, transcribed above, reports statements made by Cemig's Chief Finance and Investor Relations Officer, Luiz Fernando Rolla, during the 42nd Ordinary Public Meeting of Aneel, which was held on November 8, 2011, in which a proposal for the methodology to be applied in the third Tariff Review of the holders of electricity distribution concessions was being discussed.

BOARD OF DIRECTORS

522nd MEETING, HELD ON NOVEMBER 18, 2011

SUMMARY OF PRINCIPAL DECISIONS

At its 522nd meeting, held on November 18, 2011, the Board of Directors of Companhia Energética de Minas Gerais - Cemig, made the following decisions:

- 1- Submission to the EGM of a proposal for:

A- Changes to the Bylaws, to:

- a. adapt them to the minimum clause requirements published by the BM&FBovespa;
- b. change the wording of Subclause c of Clause 17, to improve the drafting, to provide it with greater clarity and scope, in accordance with the principle of transparency in Corporate Governance;
- c. change the wording of §1° of Clause 17, to improve the drafting, relating to delegation of powers by the Board of Directors to the Executive Board in relation to signature of contracts and other legal transactions with related parties.

B- Orientation of votes by the representative of Cemig in the Annual General Meetings of Stockholders of Cemig D and Cemig GT to:

- a. change the composition of the Board of Directors, if there is alteration in the composition of the Board of Directors of Cemig;
- b. change the wording of the Bylaws, by improving the drafting of Subclause c of Clause 12, to provide it with greater clarity and scope, in accordance with the principle of transparency in Corporate Governance; and of §2° of Clause 12, relating to delegation of powers by the Board of Directors to the Executive Board in relation to signature of contracts and other legal transactions with related parties.

2- Calling of an EGM to:

MARKET ANNOUNCEMENT

Approved the acquisition of Abengoa s assets by Taesa

Cemig (*Companhia Energética de Minas Gerais*), a listed company with securities traded on the stock exchanges of São Paulo, New York and Madrid, hereby publicly informs the Brazilian Securities Commission (CVM), the São Paulo Stock, Commodities and Futures Exchange (BM&FBovespa S.A.) and the market in general in accordance with CVM Instruction 358 of January 3, 2002, as amended as follows:

As of November 23, 2011 the Cemig affiliated company *Transmissora Aliança de Energia Elétrica S.A.* (**Taesa**) **has obtained all the approvals necessary for completion** of the transaction to acquire assets of **Abengoa** (the Acquisition) described in the Material

Announcement published on June 2, 2011.

Taesa now expects to complete the Acquisition on November 30, 2011.

As approved by the Extraordinary General Meeting of Stockholders held on October 10, 2011, **Taesa** will make the payment for the Acquisition with the proceeds of its 4th issue of promissory notes, in the total amount of R\$ 1.17 billion. Settlement in this issue is scheduled for November 29, 2011.

The company will keep the market appropriately and opportunely informed of the progress of this matter.

MARKET ANNOUNCEMENT

Cemig selected for Brazil's Corporate Sustainability Index (ISE) for 7th year running

Cemig (*Companhia Energética de Minas Gerais*), a listed company with securities traded on the stock exchanges of São Paulo, New York and Madrid, in accordance with its commitment to best corporate government practices, hereby publicly informs its stockholders and the market in general as follows:

Cemig has been selected for inclusion in the **Corporate Sustainability Index (ISE)** of the São Paulo Stock, Commodity and Futures Exchange (BM&FBovespa) for the seventh successive year. Cemig has been included in this index since it was created in 2005.

The new portfolio of the index includes 51 shares of 38 companies. These companies are in 18 sectors and have aggregate market capitalization of R\$ 961 billion, equivalent to 43.72% of the total market capitalization of the companies with shares traded on the BM&FBovespa on November 23, 2011.

The shares included in the new portfolio of the ISE were selected from among the 182 companies that have the 200 most liquid shares on the exchange, and which answered a questionnaire with 400 questions reflecting, as well as the characteristics of the companies and their products and services, their activity in the environmental and social, as well as the economic, dimensions, in Corporate Governance and in relation to climate change.

For more on the ISE, see: <http://www.isebvmf.com.br/>
