**Item 7.01. Regulation FD Disclosure.**

David W. Honeyfield, President and Chief Financial Officer of Intrepid Potash, Inc. ( *Intrepid*, *we*, *us*, or *our* ), today repeated Intrepid's views relating to its East facility in Carlsbad, New Mexico. He stated that Intrepid continues to implement its previously disclosed long-term improvement plan that was established in response to the production challenges at the East facility. The improvement plan is expected to continue through 2012 and into 2013. This plan includes the ongoing commissioning process of the Langbeinite Recovery Improvement Project ( *LRIP* ), which is designed to increase Trio® recovery and result in an increase in estimated Trio® production capacity of up to 120,000 additional tons per year. Achievement of the designed production capacity gain is dependent on a number of factors, including the successful completion of the LRIP commissioning process, operating throughput rates, recoveries, mining rates, and the amount of development work we perform. Intrepid has not determined its production outlook for 2013 and expects to release that information in the first quarter of 2013.

In addition, Intrepid updated its investor presentation materials. A copy of these materials is furnished as Exhibit 99.1 to this report. We use these materials from time to time in our conversations with investors, analysts, and other interested parties.

We routinely post important information about our business, including information about upcoming investor presentations, on our website under the Investor Relations tab. We encourage investors and other interested parties to enroll on our website to receive automatic email alerts or Really Simple Syndication (RSS) feeds regarding new postings.
