Notes to Condensed Consolidated Financial Statements

(Unaudited)

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 8-03 of Regulation S-X. Accordingly, they do not include all of the information or notes required for complete annual financial statements and should be read in conjunction with the AdCare Health Systems, Inc.'s audited consolidated financial statements and notes included in AdCare Health Systems, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2011 (the Annual Report). These statements include the accounts of AdCare Health Systems, Inc. (AdCare) and its controlled subsidiaries (collectively with AdCare, the Company or we). Controlled subsidiaries include AdCare's majority owned subsidiaries and variable interest entities (VIE) in which AdCare has control as primary beneficiary.

All inter-company accounts and transactions were eliminated in the consolidation. In the opinion of the Company's management, all adjustments considered for a fair presentation are included and are of a normal recurring nature. The preparation of interim financial statements requires management to make estimates and assumptions that affect certain reported amounts. Operating results for the three and nine months ended September 30, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012. Certain prior year amounts have been reclassified to conform to the current year presentation.

Earnings per Share

Basic earnings per share is computed by dividing net income or loss by the weighted-average number of common shares outstanding during the period.

Diluted earnings per share is similar to basic earnings per share except net income or loss is adjusted by the impact of the assumed issuance of common shares upon conversion or exercise of convertible or exercisable securities and the weighted-average number of common shares outstanding includes potentially dilutive securities, such as options, warrants, non-vested shares, and additional shares issuable under convertible notes outstanding during the period when such potentially dilutive securities are not anti-dilutive. Potentially dilutive securities from options, warrants and non-vested shares are calculated in accordance with the treasury stock method, which assumes that proceeds from the exercise of all options and warrants with exercise prices exceeding the average market value are used to repurchase common stock at market value. The incremental shares remaining after the proceeds are exhausted represent the potentially dilutive effect of the securities. Potentially dilutive

Edgar Filing: ADCARE HEALTH SYSTEMS INC - Form 10-Q

securities from convertible debt are calculated based on the assumed issuance at the beginning of the period, as well as any adjustment to income that would result from their assumed issuance.

Intangible Assets and Goodwill

There have been no required impairment adjustments to intangible assets and goodwill during the nine months ended September 30, 2012.

Compensated Absences

In 2012, the Company removed the ability for employees to accumulate earned but unused vacation beyond the current calendar year. As a result, vacation time previously accumulated must be used by the employee by December 31, 2012 or it will be forfeited. Management has estimated the potential forfeitures and has adjusted the vacation accrual accordingly.

NOTE 2. LIQUIDITY AND PROFITABILITY

The Company had operating income of approximately \$4.0 million and \$10.6 million for the three and nine months ended September 30, 2012, respectively, compared to operating income of approximately \$1.8 million and \$3.0 million for the three and nine months ended September 30, 2011, respectively. The Company had a net loss of approximately \$1.7 million and \$1.2 million for the three and nine months ended September 30, 2012, respectively, and net income of \$3.5 million and a net loss of \$1.6 million for the three and nine months ended September 30, 2011, respectively. The Company had negative working capital of approximately \$2.3 million at September 30, 2012. Approximately \$3.0 million of the negative working capital ratio is related to short term debt under a VIE which the Company does not guarantee. (See Note 12). The Company's ability to sustain profitable operations is dependent on continued growth in revenue and controlling costs.

Management's plans for increasing liquidity and profitability in future years include the following:

- increasing facility occupancy and improving the quality mix by increasing Medicare patients and further optimizing our newly acquired facilities;
- acquiring additional long term care facilities with existing cash flowing operations to expand our operations; and
- refinancing debt where possible on longer terms to obtain more favorable terms.

Management believes that the foregoing actions, if taken by the Company, should provide the opportunity for the Company to improve liquidity and profitability; however, there is no assurance that such actions will occur or, if they do occur, that they will result in improved liquidity or profitability. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOTE 3. DISCONTINUED OPERATIONS

As part of the Company's strategy to focus on the growth of its skilled nursing segment, the Company decided in the fourth quarter of 2011 to exit the home health segment of the business. This segment represents less than 2% of total revenues for the Company over the past year. During the quarter ended September 30, 2012, the Company sold all the equipment of the home health segment for approximately \$50,000 and discontinued providing services resulting in an immaterial gain on sale.

NOTE 4. SEGMENTS

The Company reports its operations in three segments: Skilled Nursing Facility (SNF), Assisted Living Facility (ALF), and Corporate & Other. The SNF and ALF segments provide services to individuals needing long-term care in a nursing home or assisted living setting, and the management of those facilities. The Corporate & Other segment engages in the management of facilities and accounting and IT services. We evaluate financial performance and allocate resources primarily based upon segment operating income (loss). Segment operating results excludes interest expense and other non-operating income and expenses. The table below sets forth our segment information for the three and nine months ended September 30, 2012 and 2011.

Table of Contents**NOTE 12. VARIABLE INTEREST ENTITIES**

As further described in Note 19 to the consolidated financial statements in the Annual Report, the Company has certain variable interest entities that are required to be consolidated because AdCare has control as primary beneficiary. A primary beneficiary is the party in a VIE that has both of the following characteristics: (a.) The power to direct the activities of the VIE that most significantly impact the VIE's economic performance and (b.) The obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE.

In June 2012, the Company amended the Option Agreement to purchase Riverchase Village Facility to extend the option exercise period to June 22, 2013. There have been no significant changes in these relationships in 2012. The following summarizes the assets and liabilities of the variable interest entities included in the consolidated balance sheets:

In March 2012, a wholly owned subsidiary of AdCare entered into a purchase agreement for a skilled nursing home facility in Tulsa, Oklahoma and agreed to provide back office services for the facility until the earlier of its acquisition by the Company or the termination of the purchase agreement. It was determined that in this arrangement, the Company had a variable interest. The current owner of the facility was obligated for the outstanding debt of the facility and the Company did not provided any guarantee of the debt. The Company can terminate the current arrangement without any requirement to provide future financial support. As such, it was determined that under this arrangement the Company was not the primary beneficiary and, consolidation was not required. The arrangement terminated on August 17, 2012 when the Company acquired effective control of Companion Specialized Care Center (See Note 9).

Table of Contents**NOTE 13. FAIR VALUE MEASUREMENTS**

The following are the major categories of assets and liabilities measured at fair value on a recurring basis during the nine months ended September 30, 2012, using quoted prices in active markets for identical assets (Level 1); significant other observable inputs (Level 2); and significant unobservable inputs (Level 3).

				Total at September 30,
	Level 1:	Level 2:	Level 3:	2012
Derivative Liability	\$	\$	\$ 3.2 million	\$ 3.2 million

Set forth below is a reconciliation of the beginning and ending balances for the derivative liability measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the nine months ended September 30, 2012:

(Amounts in 000s)	Derivative Liability
Beginning Balance	\$ 1.9 million
Total loss	1.3 million
Ending Balance	\$ 3.2 million

The derivative liability is the result of the Company issuing subordinated convertible notes in 2010. The notes are convertible into shares of common stock of the Company at a current conversion price of \$3.73 (adjusted for various stock dividends) that is subject to future reductions if the Company issues equity instruments at a lower price. Because there is no minimum conversion price, an indeterminate number of shares may be issued in the future. Accordingly, the Company determined an embedded derivative existed that was required to be bifurcated from the subordinated convertible notes and accounted for separately as a derivative liability recorded at fair value. The Company estimates the fair value of the derivative liability using the Black-Scholes Merton option-pricing model with changes in fair value being reported in the condensed consolidated statement of operations. This model requires certain key inputs that are significant unobservable inputs (Level 3).

The Company currently has no plans to issue equity instruments at a price lower than the conversion price of \$3.73, the current conversion price of the subordinated convertible notes issued in 2010. The derivative liability is a non-cash item. Upon conversion to common stock, the debt and derivative liability will be extinguished, the current fair market value of the common stock will be reflected as common stock and additional paid-in capital, and there may be a resulting gain or loss on the debt extinguishment. If not converted to common stock, upon settlement at the date of maturity, the debt and derivative liability will result in a gain on debt extinguishment for the remaining fair value of the derivative.

NOTE 14. COMMITMENTS AND CONTINGENCIES*Legal Matters*

Edgar Filing: ADCARE HEALTH SYSTEMS INC - Form 10-Q

The skilled nursing and assisted living business involves a significant risk of liability given the age and health of the Company's patients and residents and the services the Company provides. The Company and others in the industry are subject to an increasing number of claims and lawsuits, including professional liability claims, which may allege that services have resulted in personal injury, elder abuse, wrongful death or other related claims. The defense of these lawsuits may result in significant legal costs, regardless of the outcome, and can result in large settlement amounts or damage awards.

In addition to the potential lawsuits and claims described above, the Company and others in the industry are also subject to potential lawsuits under the Federal False Claims Act and comparable state laws alleging submission of fraudulent claims for services to any healthcare program (such as Medicare) or payor. A violation may provide the basis for exclusion from federally-funded healthcare programs. As of September 30, 2012, the Company does not have any material loss contingencies recorded based on management's evaluation of the probability of loss from known claims.

In 2012, the Company was named as a defendant in two related lawsuits asserting breach of contract claims arising out of consulting agreements executed in 2010 in connection with the Company's becoming the operator of certain leased facilities that were previously operated by a third-party. The same transaction was already the subject of litigation commenced by the Company in 2011 against several entities which had previously operated the leased facilities. After becoming the operator of the lease facilities, the Company incurred certain losses for pre-closing activities for which the Company was entitled to indemnification. The Company sought to enforce its rights to indemnity by filing a lawsuit

Table of Contents

against the former operators of the leased facilities for breach of contract and related tort claims, and the Company proceeded to set off its losses against payment due under the consulting agreements referenced above. The defendants filed counterclaims against the Company. In the third quarter of 2012, a settlement was reached with respect to the three lawsuits that permitted the Company to eliminate a previously accrued liability in light of the lower than expected settlement amount of approximately \$1.0 million resulting in a non-cash settlement gain of approximately \$0.4 million recognized in the third quarter. During the third quarter, approximately \$0.3 million of the settlement was paid and the majority of the remaining balance will be paid within one year.

The Company has recorded an obligation based on an estimated amount of approximately \$0.1 million. The Company is pursuing remedial actions under the Voluntary Correction Programs (VCP). The Internal Revenue Service and the Federal Department of Labor may not accept the Company's VCP proposal. Thus the obligation may be adjusted in the future. However, management does not believe the ultimate impact of the resolution will be material to its results of operations and expects this issue to be resolved before the end of 2012.

The Company is currently evaluating potential acquisition opportunities in addition to those described above, and we continue to seek new opportunities to further our growth strategy. No assurance is made that any of these potential acquisition opportunities will be determined to be appropriate for us or that we will complete any of such acquisitions on terms acceptable to us, or at all.

Segments

The Company reports its operations in three segments: SNF, ALF and Corporate & Other. The Company delivers services through wholly owned separate operating subsidiaries. The SNF and ALF segments provide services to individuals needing long-term care in a nursing home or assisted living setting and management of those facilities. The Corporate & Other segment engages in the management of facilities and accounting and IT services. We evaluate financial performance and allocate resources primarily based on segment operating income (loss). Segment operating results excludes interest expense and other non-operating income and expenses. See Note 4 in the Notes to Condensed Consolidated Financial Statements section of Part I, Item 1 of this Quarterly Report.

Skilled Nursing Facilities

We focus on two primary indicators in evaluating the financial performance in this segment. Those indicators are facility occupancy and patient mix. Facility occupancy is important because higher occupancy generally leads to higher revenues. In addition, concentrating on increasing the number of Medicare covered admissions (the patient mix) helps in increasing revenues. We continue our work towards maximizing the number of patients covered by Medicare where, typically, our operating margins are higher. We include commercial insurance covered admissions that are reimbursed at the same level as those covered by Medicare in our Medicare utilization percentages and analysis.

For the three and nine months ended September 30, 2012, revenue in our skilled nursing segment increased approximately \$ 20.2 million and \$58.4 million, respectively, compared to September 30, 2011, as a result of acquisition growth. For the three and nine months ended September 30, 2012, this segment had income from operations of \$4.5 million and \$13.0 million respectively, as a result of optimization of

Edgar Filing: ADCARE HEALTH SYSTEMS INC - Form 10-Q

occupancy and quality mix as well as expense controls. We expect to continue to implement and refine strategies designed to sustain these goals. Total assets increased \$63.9 million due to acquisitions made since September 30, 2011 and other building improvements.

Assisted Living Facilities

For the three and nine months ended September 30, 2012, revenue in our ALF segment increased approximately \$ 0.9 million and \$ 2.8 million, respectively, compared to September 30, 2011 as a result of increased revenue from acquisitions, an annual increase in rates charged to privately paying residents and increasing occupancy. For the three and nine months ended September 30, 2012, this segment had income from operations of approximately \$0.7 million and \$2.0 million, respectively. Total assets increased \$ 7.7 million primarily due to acquisitions since September 30, 2011 and other building improvements made during the last twelve months.

Residents of our assisted living facilities rely on their personal investments and wealth to pay for their stay. Although many of the risks still remain, such as declines in market values of investments, depressed market for the sale of private homes, and adult children caring for their elderly at home, we have seen an increase in census.

In October 2012, the Company entered into a an Agreement of Sale pursuant to which the Company may sell ALFs in Ohio (the Ohio ALFs). Management expects the sale to close on or before December 31, 2012. We estimate the cash proceeds from the sale will be approximately \$6.7 million. For the nine months ended September 30, 2012, the Ohio ALF s had revenues of approximately \$6.8 million and operating income of approximately \$1.7 million. At September 30, 2012, the Ohio ALFs had approximately \$15.4 million in assets that will likely be sold and \$12.6 million in debt that will likely be extinguished as a result of the sale.

Corporate & Other

We manage three skilled nursing facilities and one independent living campus for third party owners under management agreements that either are for a fixed monthly fee or for a percentage of revenue generated by the managed facility. Depending on the type of management agreement, our revenues increase annually according to inflationary adjustments stipulated in our management agreements or they increase as the facility s revenue increases for the management agreements that are based on a percentage of revenue. This segment includes our corporate overhead expenses, which are made up of salaries of our senior management team members and various other corporate expenses, including, but not limited to, corporate office operating expenses, audit fees, legal fees and board activities. Additionally, non-cash charges for compensation

Edgar Filing: ADCARE HEALTH SYSTEMS INC - Form 10-Q

expense related to warrants, restricted stock and stock options are included in corporate overhead. We do not allocate these expenses to the divisions or separate them from the management business for management review purposes.

Comparison for the three months ended September 30, 2012 and 2011

Patient Care Revenues - For the periods presented, total patient care revenues increased \$21.2 million, or 53%.

Revenue in our SNF segment increased approximately \$20.2 million when compared to the three months ended September 30, 2011, primarily as a result of additional facilities acquired since September 2011. This segment had net income from operations of approximately \$4.5 million which is \$2.2 million higher compared to the three months ended September 30, 2011 as a result of higher revenue due to acquisitions and improved reimbursement. We are seeking to increase facility occupancy and to increase the number of patients covered by Medicare. We seek to continue to implement and refine strategies designed to achieve these goals.

Revenue in our ALF segment increased approximately \$0.9 million when compared to the three months ended September 30, 2011, as a result of increased census and levels of care as well as the addition of one new facility in 2012 and one new facility in the fourth quarter of 2011. This segment had income from operations of \$0.7 million which is \$0.3 million more than the same period in 2011 from an annual increase in rates charged to residents of the facilities.

Management Revenue - For the periods presented, management revenues (net of eliminations) increased \$0.1 million, or 30%, as a result of a net increase of one managed facility.

Cost of Services - For the periods presented, cost of services was approximately \$49.2 million or 80% of patient care revenue compared to \$32.6 million or 81% of patient care revenue for the same period a year ago. This increase in overall cost is the result of numerous acquisitions over the past 12 months.

General and Administrative - For the three months ended September 30, 2012, general and administrative expenses were approximately \$4.3 million in 2012 compared to \$3.3 million in 2011, an increase of \$1.0 million, or 32%. As a percent of total revenues, general and administration expenses were approximately 7.0% for the three months ended September 30, 2012 compared to 8.0% for the three months ended September 30, 2011. Our performance-based incentive expense increased by \$0.5 million reflecting the improvement in the Company's financial results. Wage and other employee related costs increased \$0.2 million as a result of additional staffing needed to support the growth in operations. Investor relations expenses increased by approximately \$0.1 million. Datacenter cost has increased by \$0.2 million as a result of outsourcing our IT department.

Facility Rent Expense - For the periods presented, lease expenses increased \$0.1 million due to annual increases and the addition of the one new leased facility in the fourth quarter of 2011.

Depreciation and Amortization - For the periods presented, depreciation and amortization increased \$1.3 million. The depreciation increase is directly related to acquisition activity that was not included in the 2011 results as it occurred in later periods. In addition, the acquisitions resulted in intangibles that are being amortized during the period.

Interest Expense, net - For the periods presented, interest expense, net increased \$1.8 million, or 80%. We have entered into numerous debt instruments in relation to our growth strategy for the acquisition of the facilities which began in the third quarter of 2010. In addition, several of the arrangements are short term in nature resulting in higher interest rates than previously experienced and an increase in the amortization of deferred loan costs associated with the new debt agreements.

Acquisition Costs, net of Gains - For the three months ended September 30, 2012, acquisition costs, net of gains was an expense of \$0.3 million, compared to \$1.1 million for the comparative period. For the three months ended September 30, 2012, the total acquisition costs were legal fees directly related to acquisitions and other costs incurred on potential future acquisitions.

Derivative Gain/Loss - For the three months ended September 30, 2012, the derivative loss was \$2.1 million, compared to a gain of \$4.7 million for the same period in 2011. The derivative results from the subordinated notes issued in the third quarter of 2010. The expense associated with the derivative increases as the stock price climbs, and conversely decreases as the stock price declines. The price of the common stock increased during the three-month period ended September 30, 2012, from June 30, 2012 to September 30, 2012.

Comparison for the nine months ended September 30, 2012 and 2011

Patient Care Revenues - For the periods presented, total patient care revenues increased \$61.2 million, or 59%.

Revenue in our SNF segment increased approximately \$58.4 million when compared to the nine months ended September 30, 2011, primarily as a result of additional facilities acquired since September, 2011. We are seeking to increase facility occupancy and to increase the number of patients covered by Medicare. We seek to continue to implement and refine strategies designed to achieve these goals.

Table of Contents

Revenue in our ALF segment increased approximately \$2.8 million when compared to the nine months ended September 30, 2011, as a result one new facility in 2012 and one new facility in the fourth quarter of 2011. This segment had income from operations of \$2.0 million which is \$1.0 million more than the same period in 2011.

Management Revenue - For the periods presented, management revenues (net of eliminations) decreased \$0.2 million, or 12%, as a result of fewer managed facilities.

Cost of Services For the periods presented, cost of services was approximately \$131.5 million or 79% of patient care revenue compared to \$84.9 million or 81% of patient care revenue for the same period a year ago. This increase in overall cost is the result of numerous acquisitions over the past 12 months. The improvement as a percent of patient care revenue reflects the implementation of consolidated purchasing programs and other cost reduction efforts. In 2012, the Company eliminated the ability for employees to accumulate earned but unused vacation beyond the current calendar year. As a result, vacation time previously accumulated must be used by the employee by December 31, 2012 or it will be forfeited. Management has estimated the potential forfeitures and has adjusted the vacation accrual accordingly.

General and Administrative - For the nine month period ended September 30, 2012, general and administrative expenses were approximately \$13.2 million in 2012 compared to \$9.4 million in 2011, an increase of \$3.8 million, or 41%. Critical Accounting Policies and Use of Estimates

There have been no significant changes during the nine months ended September 30, 2012 to the items that we disclosed as our critical accounting policies and use of estimates in our discussion and analysis of financial condition and results of operation contained in the Annual Report.

Table of Contents**Liquidity and Capital Resources***Overview*

Liquidity is the measure of the Company's ability to have adequate cash or access to cash at all times in order to meet financial obligations when due, as well as to fund corporate expansion and other activities. Historically, the Company has met its liquidity requirements through a combination of net cash flow from operations, debt from third party lenders and issuances of other debt and equity securities.

We have negative working capital of approximately \$2.3 million at September 30, 2012. Our ability to sustain profitable operations is dependent on continued growth in revenues and controlling costs. Approximately \$3.0 million of the negative working capital ratio is related to short term debt under a VIE which the Company does not guarantee. (See Note 12 in the Notes to Condensed Consolidated Financial Statements section of Part I, Item 1 of this Quarterly Report).

During the next twelve months, the Company believes it will require additional financing to satisfy its financial obligations and implement its expansion strategy. The Company is currently exploring several financing alternatives and may seek to raise additional capital through the sale of additional debt or equity securities, although there is no assurance that the Company will be able to raise additional capital through the issuance of debt or equity securities on terms acceptable to it, or at all. If the Company is unable to secure such additional financing, then the Company may be required to restructure its outstanding indebtedness and delay or modify its expansion plans.

Adjusted EBITDA from continuing operations and Adjusted EBITDAR from continuing operations

Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization from continuing operations (Adjusted EBITDA from continuing operations) and adjusted Earnings Before Interest, Taxes, Depreciation, Amortization and Rent from continuing operations (Adjusted EBITDAR from continuing operations) are measures of operating performance that are not calculated in accordance with U.S. generally accepted accounting principles (GAAP). The Company believes these non-GAAP measures reflect an additional way of viewing aspects of our operations that, when viewed with our GAAP results and the accompanying quantitative reconciliations to net income (loss) (the most directly comparable GAAP financial measures), provide a more complete understanding of factors or trends affecting our business.

The Company defines: (i) Adjusted EBITDA from continuing operations as net income (loss) from continuing operations before interest expense, income tax expense; depreciation and amortization (including amortization of non-cash stock-based compensation), acquisition costs (net of gains), loss on extinguishment of debt, derivative loss or gain, other non-routine adjustments (primarily a recovery of a receivable and a non-cash settlement gain), and retirement and salary continuation costs; and (ii) Adjusted EBITDAR from continuing operations as net income (loss) from continuing operations before interest expense; income tax expense, depreciation and amortization (including amortization of non-cash stock-based compensation), acquisition costs (net of gains), loss on extinguishment of debt, derivative loss; other non-routine adjustments (primarily a recovery of a receivable and a non-cash settlement gain), retirement and salary continuation costs and rent cost.

Adjusted EBITDA from continuing operations and Adjusted EBITDAR from continuing operations should not be considered in isolation or as a substitute for net income, income from operations or cash flows provided by, or used in, operations as determined in accordance with GAAP. Adjusted EBITDA from continuing operations and Adjusted EBITDAR from continuing operations are used by management to focus on operating performance and management without mixing in items of income and expense that relate to the financing and capitalization of the business, fixed rent or lease payments of facilities, derivative loss or gain, and certain

acquisition related charges.

The Company believes these measures are useful to investors in evaluating the Company's performance, results of operations and financial position for the following reasons:

- They are helpful in identifying trends in the Company's day-to-day performance because the items excluded have little or no significance to the Company's day-to-day operations;
- They provide an assessment of controllable expenses and afford management the ability to make decisions which are expected to facilitate meeting current financial goals as well as achieve optimal financial performance; and
- They are an indication to determine whether or not adjustments to current spending decisions are needed.

AdCare believes that the use of the measures provides a meaningful and consistent comparison of the Company's underlying business between periods by eliminating certain items required by GAAP, which have little or no significance in the Company's day-to-day operations.

Part II. Other Information

Item 1. Legal Proceedings

We are party to various legal actions and administrative proceedings and are subject to various claims arising in the ordinary course of business, including claims that our services have resulted in injury or death to the residents of our facilities and claims related to employment, staffing requirements and commercial matters. Although we intend to vigorously defend ourselves in these matters, there can be no assurance that the outcomes of these matters will not have a material adverse effect on our results of operations and financial condition.

We operate in an industry that is extremely regulated. As such, in the ordinary course of business, we are continuously subject to state and federal regulatory scrutiny, supervision and control. Such regulatory scrutiny often includes inquiries, investigations, examinations, audits, site visits and surveys, some of which are non-routine. In addition to being subject to direct regulatory oversight of state and federal regulatory agencies, our industry is frequently subject to the regulatory practices, which could subject us to civil, administrative or criminal fines, penalties or restitutionary relief, and reimbursement authorities could also seek the suspension or exclusion of the provider or individual from participation in their program. We believe that there has been, and will continue to be, an increase in governmental investigations of long-term care providers, particularly in the area of Medicare/Medicaid false claims, as well as an increase in enforcement actions resulting from these investigations. Adverse determinations in legal proceedings or governmental investigations against or involving us, whether currently asserted or arising in the future, could have a material adverse effect on our financial position, results of operations and cash flows.

The Company relied on this exemption based upon the private nature of the transaction and representations made by the vendor as to its sophistication and intent to hold the securities for its own account and without a view to distribute, among other things. The warrant has a three-year term and may be exercised on a cashless basis.
