Note: Percentages indicated are based on the net assets of the Fund.

- (a) Fair valued security. This security has been valued at its fair value as determined in good faith under procedures established by and under the general supervision of the Fund s Board of Directors. Aggregate fair valued securities represent 42.5% of the net assets of the Fund, 42.4% of which have been fair valued pursuant to foreign equity fair value pricing procedures approved by the Board of Directors.
- (b) All or a portion of the security is pledged as collateral in connection with the Fund s revolving credit agreement. \$139,726,114 in aggregate has been pledged as collateral.
- (c) Non-income producing security.
- (d) All or a portion of the security is pledged in connection with written option contracts. \$35,471,556 in aggregate has been pledged as collateral.
- (e) Resale is restricted to qualified institutional investors. Aggregate holdings equal 1.0% of the net assets of the Fund, of which 0.0% are illiquid.
- (f) Rate quoted represents the annualized seven-day yield of the Fund.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited)

Note 1. Portfolio Valuation

Investments in securities that are listed on the New York Stock Exchange (NYSE) are valued, except as indicated below, at the last sale price reflected at the close of the NYSE on the business day as of which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the closing bid and ask prices on such day or, if no ask price is available, at the bid price. Exchange traded options are valued at their last sale price as of the close of options trading on applicable exchanges on the valuation date. In the absence of a last sale price on such day, options are valued at the average of the quoted bid and ask prices as of the close of business. Over-the-counter options are valued based upon prices provided by the respective counterparty.

Securities not listed on the NYSE but listed on other domestic or foreign securities exchanges are valued in a similar manner. Securities traded on more than one securities exchange are valued at the last sale price reflected at the close of the exchange representing the principal market for such securities on the business day as of which such value is being determined. If after the close of a foreign market, but prior to the close of business on the day the securities are being valued, market conditions change significantly, certain non-U.S. equity holdings may be fair valued pursuant to procedures established by the Board of Directors.

Readily marketable securities traded in the over-the-counter market, including listed securities whose primary market is believed by Cohen & Steers Capital Management, Inc. (the investment manager) to be over-the-counter, are valued at the last sale price on the valuation date as reported by sources deemed appropriate by the Board of Directors to reflect their fair market value. If there has been no sale on such day, the securities are valued at the mean of the closing bid and ask prices on such day or, if no ask price is available, at the bid price. However, certain fixed-income securities may be valued on the basis of prices provided by a third-party pricing service or third-party broker-dealers when such prices are believed by the investment manager, pursuant to delegation by the Board of Directors, to reflect the fair market value of such securities. The pricing services or broker-dealers use multiple valuation techniques to determine fair value. In instances where sufficient market activity exists, the pricing services or broker-dealers may utilize a market-based approach through which quotes from market makers are used to determine fair value. In instances where sufficient market activity may not exist or is limited, the pricing services or broker-dealers also utilize proprietary valuation models which may consider market transactions in comparable securities and the various relationships between securities in determining fair value and/or characteristics such as benchmark yield curves, option-adjusted spreads, credit spreads, estimated default rates, coupon rates, anticipated timing of principal repayments, underlying collateral, and other unique security features which are used to calculate the fair values.

Short-term debt securities with a maturity date of 60 days or less are valued at amortized cost, which approximates fair value. Investments in open-end mutual funds are valued at their closing net asset value.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) (Continued)

The policies and procedures approved by the Fund s Board of Directors delegate authority to make fair value determinations to the investment manager, subject to the oversight of the Board of Directors. The investment manager has established a valuation committee (Valuation Committee) to administer, implement and oversee the fair valuation process according to the policies and procedures approved annually by the Board of Directors. Among other things, these procedures allow the Fund to utilize independent pricing services, quotations from securities and financial instrument dealers and other market sources to determine fair value.

Securities for which market prices are unavailable, or securities for which the investment manager determines that the bid and/or ask price or a counterparty valuation does not reflect market value, will be valued at fair value, as determined in good faith by the Valuation Committee, pursuant to procedures approved by the Fund s Board of Directors. Circumstances in which market prices may be unavailable include, but are not limited to, when trading in a security is suspended, the exchange on which the security is traded is subject to an unscheduled close or disruption or material events occur after the close of the exchange on which the security is principally traded. In these circumstances, the Fund determines fair value in a manner that fairly reflects the market value of the security on the valuation date based on consideration of any information or factors it deems appropriate. These may include, but are not limited to, recent transactions in comparable securities, information relating to the specific security and developments in the markets.

Foreign equity fair value pricing procedures utilized by the Fund may cause certain non-U.S. equity holdings to be fair valued on the basis of fair value factors provided by a pricing service to reflect any significant market movements between the time the Fund values such securities and the earlier closing of foreign markets.

The Fund s use of fair value pricing may cause the net asset value of Fund shares to differ from the net asset value that would be calculated using market quotations. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security.

Fair value is defined as the price that the Fund would expect to receive upon the sale of an investment or expect to pay to transfer a liability in an orderly transaction with an independent buyer in the principal market or, in the absence of a principal market, the most advantageous market for the investment or liability. The hierarchy of inputs that are used in determining the fair value of the Fund s investments is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The inputs or methodology	used for valuing seci	irities are not necessarily	y an indication of the risk	associated with investing	in those securities.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) (Continued)

For movements between the levels within the fair value hierarchy, the Fund has adopted a policy of recognizing the transfer at the end of the period in which the underlying event causing the movement occurred. Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. As of September 30, 2015, there were \$911,760 of securities transferred between Level 1 and Level 2, which resulted from the Fund utilizing foreign equity fair value pricing procedures as of September 30, 2015.

The following is a summary of the inputs used as of September 30, 2015 in valuing the Fund s investments carried at value:

	Total	Quoted Prices In Active Markets for Identical Investments (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Written Option Contracts	\$ (799,500) \$	(799,500) \$	\$
Total Depreciation in Other Financial Instruments(a)	\$ (799,500) \$	(799,500) \$	\$

⁽a) Portfolio holdings are disclosed individually on the Schedule of Investments.

Following is a reconciliation of investments for which significant unobservable inputs (Level 3) were used in determining fair value:

	Common Stock- Japan
Balance as of December 31, 2014	\$
Purchases	398,965
Sales	(236,612)
Realized loss	(11,883)
Change in unrealized appreciation	11,330
Balance as of September 30, 2015	\$ 161,800

The change in unrealized appreciation (depreciation) attributable to securities owned on September 30, 2015 which were valued using significant unobservable inputs (Level 3) amounted to \$11,330.

The following table summarizes the quantitative inputs and assumptions used for investments categorized in Level 3 of the fair value hierarchy.

	Fair Value at September 30, 2015	Valuation Technique	Unobservable Inputs	Input Values
Common Stock:				
Japan	\$ 161,800	Market Approach	Last Traded Price Market Index Adjustment	152,800 JPY -0.76%

The significant unobservable inputs utilized in the fair value measurement of the Fund s Level 3 equity investments in Common Stock Japan is the last traded price and market index adjustment. Significant changes in these inputs may result in a materially higher or lower fair value measurement.

⁽b) Fair valued, pursuant to the Fund s fair value procedures utilizing significant unobservable inputs and assumptions. A change in the significant unobservable inputs could result in a significantly lower or higher value in such Level 3 investments.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) (Continued)

Note 2. Derivative Instruments

The following summarizes the volume of the Fund s forward foreign currency exchange contracts activity during the nine months ended September 30, 2015:

Forward foreign currency exchange contracts Average Notional Balance 698,963

Ending Notional Balance

Forward Foreign Currency Exchange Contracts: The Fund enters into forward foreign currency exchange contracts to hedge the currency exposure associated with certain of its non-U.S. dollar denominated securities. A forward foreign currency exchange contract is a commitment between two parties to purchase or sell foreign currency at a set price on a future date. The market value of a foreign forward currency exchange contract fluctuates with changes in foreign currency exchange rates. These contracts are marked to market daily and the change in value is recorded by the Fund as unrealized appreciation and/or depreciation on foreign currency translations. Realized gains or losses equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed are included in net realized gain or loss on foreign currency transactions. For federal income tax purposes, the Fund has made an election to treat gains and losses from forward foreign currency exchange contracts as capital gains and losses.

Forward foreign currency exchange contracts involve elements of market risk in excess of the amounts reflected on the Schedule of Investments. The Fund bears the risk of an unfavorable change in the foreign exchange rate underlying the contract. Risks may also arise upon entering these contracts from the potential inability of the counterparties to meet the terms of their contracts. In connection with these contracts, securities may be identified as collateral in accordance with the terms of the respective contracts.

Options: The Fund may purchase and write exchange-listed and over-the-counter put or call options on securities, stock indices and other financial instruments to enhance portfolio returns and reduce overall volatility.

When the Fund writes (sells) an option, an amount equal to the premium received by the Fund is recorded as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When an option expires, the Fund realizes a gain on the option to the extent of the premium received. Premiums received from writing options which are exercised or closed are added to or offset against the proceeds or amount paid on the transaction to determine the realized gain or loss. If a put option on a security is exercised, the

premium reduces the cost basis of the security purchased by the Fund. If a call option is exercised, the premium is added to the proceeds of the security sold to determine the realized gain or loss. The Fund, as writer of an option, bears the market risk of an unfavorable change in the price of the

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) (Continued)

underlying index or security. Other risks include the possibility of an illiquid options market or the inability of the counterparties to fulfill their obligations under the contracts.

Put and call options purchased are accounted for in the same manner as portfolio securities. Premiums paid for purchasing options which expire are treated as realized losses. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying investment transaction to determine the realized gain or loss when the underlying transaction is executed. The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and change in market value should the counterparty not perform under the contract.

Transactions in written option contracts during the nine months ended September 30, 2015, were as follows:

	Number	
	of Contracts	Premium
Written option contracts outstanding at December 31, 2014	920 \$	2,529,623
Option contracts written	9,784	26,441,337
Option contracts expired	(4,575)	(10,975,480)
Option contracts terminated in closing transactions	(1,900)	(4,951,146)
Option contracts exercised	(3,254)	(10,094,268)
Written option contracts outstanding at September 30, 2015	975 \$	2,950,066
