#### Ares Dynamic Credit Allocation Fund, Inc. (NYSE: ARDC)

#### **Annual Report**

#### October 31, 2018

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund or your financial intermediary electronically at any time by (i) calling 877-855-3434 toll-free or by sending an e-mail request to Ares Dynamic Credit Allocation Fund, Inc. Investor Relations Department at ARDCInvestorRelations@aresmgmt.com, if you invest directly with the Fund, or (ii) contacting your financial intermediary (such as a broker-dealer or bank), if you invest through your financial intermediary. You may elect to receive all future reports in paper free of charge. You can inform the Fund or your financial intermediary that you wish to continue receiving paper copies of your shareholder reports by (i) calling 877-855-3434 toll-free or by sending an e-mail request to Ares Dynamic Credit Allocation Fund, Inc. Investor Relations Department at ARDCInvestorRelations@aresmgmt.com, if you invest directly with the Fund, or (ii) contacting your financial intermediary. Your election to receive reports in paper will apply to all funds held in your account, if you invest through your financial intermediary, or all funds held with the fund complex if you invest directly with the Fund.

### Letter to Shareholders

October 31, 2018 (Unaudited)

### Dear Shareholders,

We would like to start by thanking you for your interest and participation in the Ares Dynamic Credit Allocation Fund, Inc. ("ARDC" or the "Fund"). We appreciate the trust and confidence that you have demonstrated in Ares through your investment in ARDC.

### Economic Conditions and Leveraged Finance Market Update

Global corporate credit markets delivered steady returns in September, closing out a decent quarter for both the loan and high yield asset classes and bringing calendar year-to-date returns through September 30, 2018 to a healthy 2.52% and 4.36%, respectively, for the ICE BofAML High Yield Master II Index ("H0A0") and Credit Suisse Leveraged Loan Index ("CSLLI"). During the third quarter, credit spreads continued to grind tighter against a backdrop of rising U.S. Treasury yields, easing pressure on Emerging Market currencies, positive developments on trade (excluding China) and climbing oil prices. However, volatility returned to global corporate credit markets in October and has accelerated throughout November. Due to a significant drop in WTI crude oil prices, a mixed beginning to third quarter earnings season, continuing trade and geopolitical headlines, and rising rates (i.e., 10-year U.S. Treasury reaching 3.25% intramonth in October), the global high yield markets came under pressure in October and posted negative returns of -1.64%, as measured by the H0A0, alongside sharp declines for global equities, which were down -6.84% as measured by the S&P 500 Index. Meanwhile, loans were resilient and managed to return 0.01% for the month of October as measured by the CSLLI, making loans one of the best performing asset classes calendar year-to-date through October month-end. Following a brief rally at the beginning of the month, selling intensified mid-November across equities and high yield bonds, eventually bleeding into the loan market as well. What began as a sell-off in technology stocks was exacerbated by an alarming decline in oil prices due to over-supply fears and reports that global economic growth showed signs of slowing as economic output in Japan and Germany contracted in the third quarter, while in October consumer spending in China hit its slowest pace in five months and bank lending fell<sup>1</sup>. The volatility experienced in November has sent high yield returns slightly negative on a year-to-date basis at -0.07% for the H0A0, while loan and equity returns remain positive at 3.51% and 5.11% for the CSLLI and S&P 500 Index, respectively, through November 30, 2018.

After stabilizing somewhat during the summer, interest rates have become a persistent headline concern once again this fall. Domestically, following a slow and quiet climb to the recent psychological barrier of 3.0%, the U.S. 10-year Treasury yield spiked approximately 18 bps in early October to 3.23%, the highest level since 2011. While the U.S. Federal Reserve ("Fed") was the first central bank to tighten monetary policy, the European Central Bank ("ECB") is not far behind and is expected to conclude its quantitative easing initiative at the end of 2018. The ECB has indicated its initial plans are to keep the lending rate at record lows until further into 2019, but this still foreshadows an environment in the foreseeable future where most of the world's major economic powers will be tightening their monetary policy regimes. The confluence of negative headlines and events that spooked the markets in October continued into early November with the highly anticipated mid-term elections threatening further volatility. The angst generated by the current Trump administration had led pundits to call for a "blue wave" to pass over both legislative houses of the U.S. government. While the election results didn't necessarily live up to the hype, Democrats were able to capture a majority within the House of Representatives. The new bipartisan government, as the Senate remains a Republican held majority, is widely expected to cause more gridlock in Washington. However, this may not pose a significant risk to U.S. markets as bipartisanship tends to curb excesses and unsound ambition by one party, thereby reducing political turmoil. Following the outcome of the elections, markets refocused on third quarter corporate

earnings. While fundamentals overall remain healthy, there is an increasing focus on forward guidance due to heightened trade war tensions, cost pressures, and a general late-cycle mentality. We have witnessed with increasing ferocity credit markets punishing earnings misses more than they reward better-than-expected performance, and we expect this trend to continue.

In regard to the CLO market, difficult arbitrage conditions have slowed the pace of new issue supply in recent months. While year-to-date 2018 global issuance of \$140.6 billion is tracking in line with full-year 2014 issuance of \$143.0 billion (a record year), there exists today something of a "buyers strike" on primary issue CLO equity. The proximate cause of all the trouble is the CLO debt spread widening stemming from heavy refinancing and reset activity, which stood at \$161.1 billion across 326 deals year-to-date as of October 31st. This supply has weighed heavily on primary issue spreads, making arbitrage conditions persistently difficult. Triple-A spreads have also been affected by higher hedging costs for non-U.S. investors, especially Japanese investors who have seen deteriorating relative value in U.S. CLOs vs. European CLOs as a result. Until and unless CLO debt spreads contract, we expect relatively modest new issue activity through year-end defined largely

## Letter to Shareholders (continued)

### October 31, 2018 (Unaudited)

by captive risk-retention funds (facing different economics), off-market fees (banks and managers) and unsophisticated new entrants. We've seen this phenomenon begin to play out in October, with moderate global primary supply of ~\$11.9 billion and ~\$18.6 billion of refinancing and reset activity.<sup>2</sup> With a slow-down in refinancing and reset activity anticipated as the vast majority of "in-the-money" CLOs ripe for refinancing have been postponed until better debt execution markets appear, we expect CLO debt spreads to crest, if they haven't already, with a bias toward tightening heading into year-end. That said, we note the re-appearance of volatility generally across risk markets; the CLO market is almost never fully immune to this. To the extent volatility impacts the loan market in a more meaningful way, we see many scenarios that could lead to weaker markets in the near-term, creating some interesting trading opportunities. We have been active in positioning our portfolios into higher spread, higher yielding assets in response to supply-driven weakness. We are selectively participating in new issue and reset junior CLO debt tranches with expected returns in many cases close to where we saw secondary equity trading earlier this year. We continue to work selectively on new issue control equity with quality credit managers at attractive levels. We are starting to see some value again in secondary equity, and we continue to evaluate secondary equity opportunities with a bias toward longer deals with plenty of flexibility to take advantage of any future loan market volatility.

### Portfolio Performance and Positioning

For the calendar year-to-date period ending October 31, 2018, ARDC has returned 3.03% based on Net Asset Value ("NAV"), which compares to 4.36% for the CSLLI and 0.84% for the H0A0. On a last twelve months basis through October 31, 2018, ARDC has returned 4.47% based on NAV, which compares to 4.89% for the CSLLI and 0.86% for the H0A0. However, it is important to note that given its flexible mandate and focus on senior secured bank loans, high yield bonds and CLOs, we believe there is no single established benchmark that reasonably lends itself to comparison with ARDC<sup>3</sup>.

Over the last year, we have increased ARDC's exposure to bonds by 236bps owing to the Fund's focus on income generation. The periodic bouts of rate volatility that we have seen over the last 12 months have allowed the Fund to pick up both longer-dated, higher-quality bonds that sold off as a result as well as shorter-dated, yield-to-call paper. Despite the 118bps increase in three-month LIBOR over the last year, ARDC has decreased its exposure to senior loans by 521bps as the preponderance of the loan market was trading above par until October and the potential for loan repricings reduced the value proposition of loans relative to bonds, particularly those that have sold-off on rate movements. The Fund's exposure to CLO debt and equity also increased by 139bps and 221bps, respectively, over the last year as we have been opportunistically adding double-B tranches and secondary equity positions as those widened during the third quarter of 2018. From a credit quality perspective, the Fund has moved up in quality, increasing double-BB exposure by 413bps and decreasing single-B and triple C exposure by 244bps and 309bps, respectively, over the last year, largely as a result of picking up double-B bonds opportunistically. Duration has remained relatively constant at 1.59 years as of October 31, 2018.

Into November, market sentiment continued to be negative. Investor apprehension remains elevated due to a combination of factors including a Fed that is in tightening mode while its balance sheet shrinks, slowing economic growth, trade tensions and political turmoil in the U.S. and abroad, declining oil prices, and multiple credit-specific events affecting the market over the past few weeks. While the Fed is poised to continue its rate hike campaign by likely raising interest rates for the fourth time this year in December, the number of anticipated Fed hikes in 2019 has been declining in the last few weeks, particularly following Fed Chairman Jerome Powell's more dovish comments on November 28th which spurred a temporary rally in the equity and credit markets. Despite a weaker-than-expected start

to earnings season, corporate cash flow remains robust and consumer demand remains strong as we approach the end of the year. Unemployment remains low and is expected to fall below 3.5% next year. Looking ahead, we expect to capitalize on the opportunity to buy attractive loans modestly under par and to have more negotiating leverage in both credit documentation and pricing in the primary loan market. In the high yield market, we believe spreads now more accurately reflect the balance between supportive issuer fundamentals and macroeconomic headwinds. As noted earlier, the re-appearance of volatility generally across risk markets could spill over to the CLO market and could create some interesting trading opportunities. Given these factors, we remain focused on maintaining a portfolio of high-quality of securities through careful credit selection as we look to stay ahead of negative headlines.

In conclusion, we maintain strong conviction in the ARDC portfolio and believe the Fund continues to be well positioned to take advantage of buying opportunities in both the new issue and secondary markets. We continue to believe that the ability to dynamically allocate is critical to successfully navigating an evolving market environment with headline and interest rate driven volatility. The increasing importance of credit selection (and avoidance) has become the primary driver of generating alpha, not only to avoid mistakes, but to uncover value in names that still possess total return potential. Looking ahead, we

## Letter to Shareholders (continued)

October 31, 2018 (Unaudited)

will remain focused on performing solid fundamental credit analysis and in depth due diligence in an effort to deliver attractive risk adjusted returns to our investors.

## Ares Dynamic Credit Allocation Fund, Inc.

ARDC is a closed-end fund that trades on the New York Stock Exchange under the symbol "ARDC" and is externally managed by Ares Capital Management II LLC (the "Advisor"), a subsidiary of Ares Management Corporation. ARDC's investment objective is to provide an attractive level of total return, primarily through current income and, secondarily, through capital appreciation by investing in a broad, dynamically-managed portfolio of below investment grade senior secured loans, high yield corporate bonds and collateralized loan obligation securities.

On November 6, 2015, the Board of Directors (the "Board") of ARDC authorized the repurchase of shares of common stock of the Fund (the "Common Shares") on the open market when the Common Shares are trading on the New York Stock Exchange at a discount of 10% or more (or such other percentage as the Board may determine from time to time) from the net asset value ("NAV") of the Common Shares. The Fund may repurchase its outstanding Common Shares in open-market transactions at the Fund management's discretion. The Fund is not required to effect share repurchases. Any future purchases of Common Shares may not materially impact the discount of the market price of the Common Shares relative to their NAV and any narrowing of this discount that does result may not be maintained. Since inception of the program through October 31, 2018, we have repurchased 518,717 shares at an average price of \$13.08, representing an average discount of -15.2%.

On March 23, 2018, ARDC amended its non-fundamental investment policy to increase the Fund's ability to invest in CLO securities to 40% of managed assets from 30% previously, while also increasing the Fund's ability to invest in subordinated or residual tranches of CLO securities to 10% of managed assets from 7.5% previously.

Thank you again for your continued support of ARDC. If you have any questions about the Fund, please call 1-877-855-3434, or visit the Fund's website at www.arespublicfunds.com.

Best Regards,

Ares Capital Management II LLC

Actual events or conditions are unlikely to be consistent with, and may differ materially from, those assumed. Past performance is not indicative of future results. Ares does not undertake any obligation to publicly update or review any forward?looking information, whether as a result of new information, future developments or otherwise, except as required by law

This may contain information sourced from BofA Merrill Lynch, used with permission. BofA Merrill Lynch's Global Research division's fixed income index platform is licensing the ICE BofAML Indices and related

data "as is," makes no warranties regarding same, does not guarantee the suitability, quality, accuracy, timeliness, and/or completeness of the ICE BofAML Indices or any data included in, related to, or derived therefrom, assumes no liability in connection with their use and does not sponsor, endorse, or recommend Ares Management, or any of its products or services.

The Credit Suisse Leveraged Loan Index ("CSLLI") is designed to mirror the investable universe of the \$US-denominated leveraged loan market. The index inception is January 1992. The index frequency is daily, weekly and monthly. New loans are added to the index on their effective date if they qualify according to the following criteria: 1) Loan facilities must be rated "5B" or lower. That is, the highest Moody's/S&P ratings are Baa1/BB+ or Ba1/BBB+. If unrated, the initial spread level must be Libor plus 125 basis points or higher. 2) Only fully-funded term loan facilities are included. 3) The tenor must be at least one year. 4) Issuers must be domiciled in developed countries; issuers from developing countries are excluded.

The ICE BofAML US High Yield Index tracks the performance of US dollar denominated below investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have a below investment grade rating (based on an average of Moody's, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and a minimum amount outstanding of \$250 million. In addition, gualifying securities must have risk exposure to countries that are members of the FX-G10, Western Europe or territories of the US and Western Europe. The FX-G10 includes all Euro members, the US, Japan, the UK, Canada, Australia, New Zealand, Switzerland, Norway and Sweden. Original issue zero coupon bonds, 144a securities (both with and without registration rights), and pay-in-kind securities (including toggle notes) are included in the index. Callable perpetual securities are included provided they are at least one year from the first call date. Fixed-to-floating rate securities are included provided they are callable within the fixed rate period and are at least one year from the last call prior to the date the bond transitions from a fixed to a floating rate security. Contingent capital securities ("cocos") are excluded, but capital securities where conversion can be mandated by a regulatory authority, but which have no specified trigger, are included. Other hybrid capital securities, such as those issues that potentially convert into preference shares, those with both cumulative and non-cumulative coupon deferral provisions, and those with alternative coupon satisfaction mechanisms, are also included in the index. Securities issued or marketed primarily to retail investors, equity-linked securities, securities in legal default, hybrid securitized corporates, Eurodollar bonds (USD securities not issued in the US domestic market), taxable and tax-exempt US municipal securities and DRD-eligible securities are excluded from the index.
