ITEM 8.01 OTHER EVENTS

February 11, 2019, Lima, Peru.

Southern Copper Corporation ( SCC or the Company ) announced today that as a result of unprecedented rainfall in the southern region of the country, the Peruvian Government declared a state of emergency in the localities of Tacna, Moquegua and Arequipa, Peru on February 8, 2019. The heavy rains caused several massive landslides engulfing structures in their path and causing serious damage to the areas. One of the landslides occurred near the Company's Quebrada Honda tailings dam in Toquepala resulting in the disappearance of a Company employee. SCC is making every effort to locate the employee and provide relief and support to the family.

The Company has implemented its emergency response plan and as a precautionary measure, temporarily stopped production at the Cuajone and Toquepala operations until February 11, 2019. SCC has followed procedures to ensure the integrity of the Quebrada Honda tailings dam and is confident that no tailing spills have occurred. The Peruvian Environmental Agency (Organismo de Evaluación y Fiscalización Ambiental-OEFA) is currently assessing the events arising from the forces of nature with the Company's full cooperation. Additionally, SCC is supplying heavy machinery, drinking water and other supplies to regional governments and local municipalities in the most affected areas. The southern region of Peru has suffered the highest levels of rainfall in last two decades.
