NOTES TO FINANCIAL STATEMENTS (Unaudited)

1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION

Nature of Operations

Effective July 9, 2003, Zion Oil & Gas, Inc., a Florida corporation ("Zion Florida") was merged into its wholly owned Delaware subsidiary, Zion Oil & Gas, Inc. (the Company), the purpose of which was solely to reincorporate from Florida to Delaware in anticipation of a public offering. Upon the reincorporation, all the outstanding shares of common stock in Zion Florida were converted into common stock of the Company on a one-to-one basis and all the outstanding shares of preferred stock in Zion Florida were converted into common stock of the Company at the ratio of twelve shares of common for each share of preferred stock. All of the outstanding warrants and options of Zion Florida were converted into equivalent warrants and options of the Company.

The Company holds a petroleum exploration license on approximately 98,100 acres of unproved properties in north-central Israel called the "Ma'anit-Joseph License", issued to the Company by the State of Israel. The term on the license expires April 30, 2007 and it contained a commitment to drill or reenter a well on or before April 30, 2005.

On April 10, 2005 the Company commenced the reentry of the Ma'anit #1 and deepening of the well. On July 19, 2005 the well reached a depth of 15,509 feet and testing and completion began thereafter. During drilling and completion operations, the well had numerous significant oil and gas shows in different zones. At present, completion operations on the Ma'anit #1 well have been temporarily suspended and the drilling rig has been released. On March 15, 2006 the terms of the license were amended to provide that the Company commence the drilling of a new well to a depth of at least 4,400 meters or reenter the Ma'anit #1 well on or before March 1, 2007. The Company's engineers are designing a comprehensive completion procedure using a smaller and less expensive completion rig for the purpose of reentering the Ma'anit #1 well.

Declaration of a commercial discovery on the Ma'anit-Joseph License prior to the end of the license term, as may in certain circumstances be extended, will entitle the Company to receive a 30-year lease (extendable on certain conditions for an additional 20 years) subject to compliance with a field development work program and production.

Effective August 1, 2005, the Company received formal notification and documentation from the Minister of National Infrastructures and the Petroleum Commissioner granting the Company's application for a Preliminary Permit with Priority Rights for an area covering approximately 121,100 acres abutting on and immediately to the north of the

Ma'anit-Joseph License. The permit is designated the "Asher" Permit and covers lands on Israel's coastal plain and Mt. Carmel range. The Asher Permit is for an 18-month period and is subject to a work program, with an estimated total cost as adjusted for the amended work program of \$265,000, which requires the Company to perform certain geological and geophysical work. Upon satisfactory performance in accordance with the work program, as may be amended, on May 16, 2006, the Company will have priority rights for the grant of an exploration license for a period of up to seven years for a portion of the Asher Permit area not to exceed 400,000 dunam (approximately 98,800 acres), subject to the fulfillment of the requirements of the Petroleum Law. Work on the program is in progress.

Operations in Israel are conducted through a branch office and the License and Permit are each held directly in the name of the Company. At present it is expected that all future income will be derived from Israeli operations.

Basis of Presentation

The unaudited interim financial statements have been prepared on a going concern basis, which contemplates realization of assets and liquidation of liabilities in the ordinary course of business. Since the Company is in the development stage, it has limited capital resources, no revenue, and a loss from operations. The appropriateness of using the going concern basis is dependent upon the Company's ability to obtain additional financing or equity capital to finance its current operations and, ultimately, to achieve profitable operations. The uncertainty of these conditions has created substantial doubt about the Company's ability to continue as a going concern. The unaudited interim financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOTES TO FINANCIAL STATEMENTS (Unaudited)

1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION (CONTINUED)

Basis of Presentation (Continued)

The accompanying unaudited interim financial statements were prepared in accordance with generally accepted accounting principles for the preparation of interim financial statements and, therefore, do not include all disclosures necessary for a complete presentation of financial condition, results of operations, and cash flows in conformity with generally accepted accounting principles used in annual financial statements. All adjustments, which are, in the opinion of management, of a normal recurring nature and are necessary for a fair presentation of the interim financial statements, have been included. Nevertheless, these financial statements should be read in conjunction with the financial statements and related notes included in the Company's annual financial statements for the year ended December 31, 2005. The results of operations for the period ended March 31, 2006 are not necessarily indicative of the results that may be expected for the entire fiscal year or any other interim period.

Management Presentation and Liquidity

On February 17, 2004, the registration statement with the Securities and Exchange Commission was declared effective to offer 7,000,000 shares of the Company's common stock to the public. The minimum offering requirement of \$6,500,000 was not subscribed by the offering termination date of August 30, 2004. As a result, no securities were sold to the public, all escrow subscription funds (approximately \$3.7 million) that had been received relating to the offering were sent back to the subscribers by the escrow agent, and the Company removed from registration the 7,000,000 shares of the Company's common stock. Since then Management raised capital through debt and private

offerings and on January 25, 2006 filed a registration statement for a public offering with a lower minimum of \$2,450,000. In the opinion of management, all adjustments considered necessary for a fair presentation of financial position, results of operations, and changes in financial position have been included.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Financial Statements in United States Dollars

The currency of the primary economic environment in which the operations of the Company are conducted is the United States dollar ("dollar"). Therefore, the dollar has been determined to be the Company's functional currency. Non-dollar transactions and balances have been translated into dollars in accordance with the principles set forth in Statement of Financial Accounting Standards (SFAS) No. 52 "Foreign Currency Translation" (SFAS No. 52).

Transactions in foreign currency (primarily in New Israeli Shekels - "NIS") are recorded at the exchange rate as of the transaction date except for activities relating to balance sheet items which are recorded at the appropriate exchange rate of the corresponding balance sheet item. Monetary assets and liabilities denominated in foreign currency are translated on the basis of the representative rate of exchange at the balance sheet date. Non monetary assets and liabilities denominated in foreign currency are stated at historical exchange rates. All exchange gains and losses from remeasurement of monetary balance sheet items denominated in non-dollar currencies are reflected in the statement of operations as they arise.

Cash

The Company maintains its cash balance at two banks with one bank located in the United States and one bank located in Israel. For purposes of the statement of cash flows, the Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

Inventories

Inventories include equipment and materials to be used in future drilling and completion operations and are stated at the lower of cost or market value. Cost is determined by the weighted average method.

ZION OIL & GAS, INC.

(A Development Stage Company)

NOTES TO FINANCIAL STATEMENTS (Unaudited)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Oil and Gas Properties

The Company follows the full-cost method of accounting for oil and gas properties. Accordingly, all costs associated with acquisition, exploration and development of oil and gas reserves, including directly related overhead costs, are capitalized.

All capitalized costs of oil and gas properties, including the estimated future costs to develop proved reserves, are amortized on the unit-of-production method using estimates of proved reserves. Investments in unproved properties and major development projects are not amortized until proved reserves associated with the projects can be

determined or until impairment occurs. If the results of an assessment indicate that the properties are impaired, the amount of the impairment is included in income from continuing operations before income taxes and the adjusted carrying amount of the unproved properties is amortized on the unit-of-production method.

Abandonment of properties are accounted for as adjustments to capitalized costs with no loss recognized. During the quarter ended March 31, 2006 and the year ended December 31, 2005 no unproved property was found to be impaired. The net capitalized costs are subject to a "ceiling test" which limits such costs to the aggregate of the estimated present value of future net revenues from proved reserves discounted at ten percent based on current economic and operating conditions, plus the lower of cost or fair market value of unproved properties. The recoverability of amounts capitalized for oil and gas properties is dependent upon the identification of economically recoverable reserves, together with obtaining the necessary financing to exploit such reserves and the achievement of profitable operations.

The company has no economically recoverable reserves and no amortization base. Unproved oil and gas properties consist of capitalized exploration costs (all of which are excluded from the amortization base) of \$237,297 for the three month period ended March 31, 2006, \$6,296,291 for the year ended December 31, 2005, \$598,475 for the year ended December 31, 2004 and \$797,734 from inception (April 6, 2000) to December 31, 2003.

Property and Equipment

Property and equipment other than oil and gas property and equipment is recorded at cost and depreciated over their estimated useful lives of three to fourteen years.

Costs Associated With Public Offering

Costs associated with each specific private or public offering are accumulated until either the closing of the offering or its abandonment. If the offering is abandoned, the costs are expensed in the period the offering is abandoned. If the offering is completed and funds are raised, the accumulated costs are recorded as a reduction to the paid-in capital attributable to the offering. Financing costs not attributable to any specific offering are charged to expense as incurred.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting year. Actual results could differ from those estimates.

Adoption of Recently Issued Accounting Standards

SFAS 123R - Share Based Payments: Prior to January 1, 2006, the Company applied the fair-value based method of accounting for all of its stock-based compensation plan in accordance with the provisions of Financial Accounting Standards Board's Statement No. 123, "Accounting for Stock-Based Compensation" (Statement 123")

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Adoption of Recently Issued Accounting Standards (Continued)

SFAS 123R-Share Based Payments (Continued): The fair value of stock-based compensation granted to employees and directors prior to July 15, 2003, the date of the Company's first filing with the U.S. Securities and Exchange Commission, in connection with its IPO, was estimated on the date of grant using the minimum-value method as

permitted for private entities under Statement No. 123.

The fair value of stock-based compensation granted to employees and directors subsequent to July 15, 2003, is measured according to the Black Scholes option-pricing model and recognized over the requisite service period.

Non-employees

Non-employee grants have been recorded in accordance with the provisions of SFAS 123 and EITF 96-18. Compensation costs fully vested non-forfeitable equity instruments have been reflected at their fair value on the date of grant.

The fair value of options and warrants granted to non-employees prior to January 1, 2006, has been computed and accounted for in accordance with SFAS 123 and Emerging Issues Task Force (EITF) 96-18 *"Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services"*, and was measured according to the Black Scholes option-pricing model.

As of January 1, 2006, the Company adopted SFAS No. 123 (revised 2004) *"Share-Based Payments"* (SFAS 123R) using the modified prospective method, which requires measurement of compensation cost for all stock-based awards based upon the fair value on date of grant and recognition of compensation over the service period for awards expected to vest. Under this method, the Company will recognize compensation cost for awards granted beginning January 1, 2006, based on the Black Scholes option-pricing model. Furthermore, with the exception of stock options granted to employees prior to July 15, 2003, the date of the first filing with the U.S. Securities and Exchange Commission (SEC) in connection with the Initial Public Offering (IPO), the Company will recognize cost for unvested share-based awards as of January 1, 2006 based on the grant date fair value of those awards, adjusted for estimated forfeitures, if any, as previously calculated and reported for pro-forma disclosure purposes.

The value of stock options, as noted, is recognized as compensation expense on a straight-line basis, over the requisite service period of the entire award, net of estimated forfeitures. On adoption of the modified prospective method in adopting SFAS 123R, the Company did not need to adjust the corresponding 2005 amounts included in these financial statements.

The adoption of SFAS 123R has had no effect on the Company's balance sheet or results of operations.

SFAS 151 - Inventory Costs, an Amendment of Accounting Research Bulletin ("ARB") No. 43:

In November 2004, the FASB issued SFAS No. 151, *"Inventory Costs - an amendment of Accounting Research Bulletin No. 43, Chapter 4"* ("SFAS 151"). The amendments made by SFAS 151 clarify that abnormal amounts of idle facility expense, freight, handling costs and wasted materials (spoilage) should be recognized as current-period charges and require the allocation of fixed production overheads to inventory based on the normal capacity of the production facilities. The guidance is effective for inventory costs incurred during fiscal years beginning after June 15, 2005.

The adoption of this SFAS 151 has had no effect on the Company's balance sheet and results of operations.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Adoption of Recently Issued Accounting Standards (Continued)

SFAS 153 - Exchanges of Nonmonetary Assets, an Amendment of Accounting Principles Bulletin (APB) Opinion No. 29, "Accounting for Nonmonetary Transaction":

Edgar Filing: ZION OIL & GAS INC - Form 10-Q

In December 2004, the FASB issued SFAS No. 153, "Exchanges of Nonmonetary Assets - an amendment of Accounting Principles Bulletin (APB) Opinion No. 29, Accounting for Nonmonetary Transactions" ("SFAS 153"). The guidance in APB Opinion No. 29 is based on the principle that exchanges of nonmonetary assets should be measured based on the fair value of the assets exchanged. The guidance in Opinion No. 29, however, included certain exceptions to that principle. SFAS 153 amends Opinion No. 29 to eliminate the exception for nonmonetary assets exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. A nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange.

The adoption of SFAS 153 has had no effect on the Company's financial position and results of operations.

SFAS 154 - Accounting Changes and Errors Corrections:

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Errors Corrections" ("SFAS 154"). SFAS 154 replaces APB Opinion No. 20, "Accounting Changes", and FASB Statement No. 3, "Reporting Accounting Changes in Interim Financial Statements", although it carries forward some of their provisions. SFAS 154 requires retrospective application to prior periods' financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. A change in depreciation, amortization, or depletion method for long-lived, nonfinancial assets will be accounted for as a change in accounting estimate effected by a change in accounting principle. SFAS 154 is effective for changes in accounting principle made in fiscal years beginning after December 15, 2005.

The adoption of SFAS 154 has had no effect on the Company's balance sheet or results of operations.

3. RESTATEMENT OF PRIOR FINANCIAL STATEMENTS

The financial statements for the period ended March 31, 2006 and for the period from inception (April 6, 2000) until March 31, 2006 have been restated to reflect additional expenses related to stock warrants issued to employees and non-employees during the above mentioned periods and compensation cost with respect to equity awards provided with new debt issuances and/or debt modification.

The following tables present the impact of the financial statements adjustments on the Company's previously announced statements of operations for the year ended December 31, 2005 and/or the period from inception (April 6, 2000) until December 31, 2005 and on the balance sheet as of December 31, 2005 and the impact of the financial statements adjustments on the Company's previously announced unaudited statements of operations for the period ended March 31, 2006 and/or the period from inception (April 6, 2000) until March 31, 2006 and on the balance sheet as of March 31, 2006.

NOTES TO FINANCIAL STATEMENTS

4. PROVISION FOR SEVERANCE PAY

Israeli law generally requires payment of severance pay upon dismissal of an employee or upon termination of employment in certain other circumstances. The following principal plans relate to the employees in Israel:

- The liability in respect of certain of the company's employees is discharged in part by participating in a defined contribution pension plan and making regular deposits with recognized pension funds. The deposits are based on certain components of the salaries of the said employees. The custody and management of the amounts so deposited are independent of the company's control and accordingly such amounts funded (included in expenses on an accrual basis) and related liabilities are not reflected in the balance sheet.
- Part of the liability is discharged by deposits made with severance pay funds.
- The liability for severance pay is calculated on the basis of the latest salary paid to each employee multiplied by the number of years of employment. The liability is covered by the amounts deposited including accumulated income thereon as well as by the unfunded provision.
- The expenses in respect of severance pay for the three month period ended March 31, 2006 and for the year ended December 31, 2005 and the period from April 6, 2000 to March 31, 2006 amounted to \$2,134, \$7,096, \$43,908 respectively.
- Withdrawals from the funds may be made only upon termination of employment.
- As of March 31, 2006 and December 31, 2005, the Company has a provision for severance pay of \$51,359 and \$48,318, respectively. As of March 31, 2006 and December 31, 2005 the Company has \$7,451 and \$6,544 respectively, deposited in funds managed by major Israeli banks which are earmarked to cover severance pay liability. Such deposits are not considered to be "plan assets" and are therefore included in other assets.

The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant for periods corresponding with the expected life of the options.

The expected life represents the weighted average period of time that options granted are expected to be outstanding. The expected life of the options granted to employees and directors during the first quarter of 2006 is calculated based on the Simplified Method as allowed under Staff Accounting Bulletin No. 107 (SAB 107), giving consideration to the contractual term of the options and their vesting schedules. The expected life of the option granted to non-employees equals their contractual term.

Due to the lack of sufficient history of the Company's own stock volatility, the Company estimates its own expected stock volatility based on the historic volatility for other oil exploration companies.

9. COMMITMENTS AND CONTINGENCIES (CONTINUED)

Environmental Matters (Continued)

Should it be determined that a liability exists with respect to any environmental clean up or restoration, the liability to cure such a violation could fall upon the Company. ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

Introduction

The following discussion and analysis should be read in conjunction with our accompanying financial statements and the notes to those financial statements included elsewhere in this Quarterly Report. The following discussion includes forward-looking statements that reflect our plans, estimates and beliefs and involve risks and uncertainties. Our actual results could differ materially from those discussed in these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed below and elsewhere in this Quarterly Report.

Overview

We are engaged in oil and natural gas exploration upon 219,000 acres of preliminary permit and exploration license areas in the State of Israel. During the six years between our formation and March 31, 2006, we have issued equity securities in the amount of \$12,560,284 and have incurred an accumulated liability of \$1,650,394 in order to operate our company and satisfy our work commitments under our agreements with the State of Israel. All of our officers and

key employees have deferred the majority of their salaries and other compensation during this period. They have all exchanged portions of the deferred compensation from time to time for our equity securities, which (with four exceptions relating to employment stock options) have all been priced at the same price as the sales of our private equity capital.

On January 25, 2006, we filed a Registration Statement with the Securities and Exchange Commission on Form SB-2 and have since filed five amendments to that Statement for the registration of 2,672,000 shares of our common stock. This Registration Statement has not yet been declared effective by the Commission.

Neither our common stock nor our warrants are listed or traded on any stock exchange or organized market, and there is therefore no market for them.

Going Concern Basis

Our unaudited interim financial statements for the period ended March 31, 2006 have been prepared on a going concern basis, which contemplates realization of assets and liquidation of liabilities in the ordinary course of business. Since Zion is in the development stage, we have limited capital resources, insignificant revenue, and a loss from operations. The appropriateness of using the going concern basis is dependent upon our ability to obtain additional financing or equity capital and, ultimately, to achieve profitable operations. The uncertainty of these conditions raises substantial doubt about our ability to continue as a going concern. The unaudited financial statements do not include any adjustments that might result from the outcome of this uncertainty. Uncertainties about our ability to continue as a going concern would be significantly reduced upon the closing of the initial public offering, if successful.

Restatement of Prior Period Financial Statements

The financial statements for the period ended March 31, 2006 and for the period from inception (April 6, 2000) until March 31, 2006 have been restated to reflect additional expenses related to stock warrants issued to employees and non-employees during the above mentioned periods and compensation cost with respect to equity awards provided with new debt issuances and/or debt modification.

Liquidity and Capital Resources

Working capital (current assets minus current liabilities) was \$470,398 and \$499,094 at March 31, 2006 and December 31, 2005, respectively.

Net cash provided by financing activities was \$376,260 and \$2,400,691 for the three months ended March 31, 2006 and 2005, respectively, of which \$368,320 in 2006 and \$2,426,691 in 2005 was from the sale of equity securities, net of equity sales costs. The remainder was provided by loans (less repayments of loans). Net cash used in investing activities was \$247,586 and \$759,482 for the three months ended March 31, 2006 and 2005, respectively, virtually all of which was used for capitalized exploration costs on the license.

On March 31, 2006, we had cash and cash equivalents in the amount of \$500,000 and accounts payable within the next 90 days of approximately \$125,000 for a net of approximately \$375,000. If we are not successful in completing the minimum offering, we will not have sufficient liquidity to meet our cash requirements for the next year and may be forced to seek buyers for portions of our petroleum interests. If the minimum amount is raised in the offering described above and we are able to raise an additional approximate amount of \$1,250,000 from additional sources (including the exercise of warrants expiring December 31, 2006), we should have sufficient funds to satisfy our cash requirements through June 2007.

Results of Operations

We have no revenue generating operations as we are still an exploration stage company; however, drilling operations on the Ma'anit #1 commenced on April 10, 2005 and the rig was released seven months later. Almost all of our net loss for the three months ended March 31, 2006, comes from general and administrative expenses. Such expenses totaled \$476,897, consisting of \$142,101 for legal and professional costs, \$233,836 for salaries, most of which is deferred compensation (a non-cash expense) of our directors, officers and key employees, and other costs in the amount of \$100,960.

ITEM 3. CONTROLS AND PROCEDURES

We maintain controls and procedures designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Based upon their evaluation of those controls and procedures as of the end of the period covered by this Quarterly Report, our Chief Executive Officer and our principal financial officer concluded that our disclosure controls and procedures were adequate.

We made no changes in our internal controls over financial reporting that occurred subsequent to the date of the evaluation of those controls by our Chief Executive Officer and principal financial officer that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
