

CANARC RESOURCE CORP
Form 20-F
May 15, 2012

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 20-F

- REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934
OR
- ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For fiscal year ended December 31, 2011
OR
- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from ____ to ____
OR
- SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
Date of event requiring this shell company report:

Commission file number: 0-18860

CANARC RESOURCE CORP.

(Exact name of Registrant as specified in its charter)

Province of British Columbia, Canada

(Jurisdiction of incorporation or organization)

Suite #301 - 700 West Pender Street, Vancouver, British Columbia, Canada, V6C 1G8

(Address of principal executive offices)

Philip Yee, Chief Financial Officer, Phone: (604) 685-9700, Fax: (604) 685-9744, e-mail: philip@canarc.net,
Canarc Resource Corp., Suite #301 - 700 West Pender Street, Vancouver, British Columbia, Canada, V6C 1G8

(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered pursuant to Section 12(b) of the Act: None

Edgar Filing: CANARC RESOURCE CORP - Form 20-F

Securities registered pursuant to Section 12(g) of the Act: Common Stock, without par value

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None

Indicate the number of outstanding shares of each of the Registrant's classes of capital or common stock as of the close of the period covered by the annual report: 94,096,171 common shares as at December 31, 2011

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one)

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the Registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the Registrant has elected to follow: Item 17 Item 18

If this is an annual report, indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

CAUTION – FORWARD-LOOKING STATEMENTS

This annual report on Form 20-F and the exhibits attached hereto contain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward looking statements concern the Registrant’s anticipated results and developments in the Registrant’s operations in future periods, planned exploration and development of its properties, plans related to its business and other matters that may occur in the future. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management.

Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as “expects” or “does not expect”, “is expected”, “anticipates” or “does not anticipate”, “plans”, “estimates” or “intends”) are forward-looking statements, whether or not they are preceded by words or phrases such as “may”, “could”, “might” or “will” be taken, occur or be achieved) are not statements of historical fact and may be forward-looking statements. Forward-looking statements are subject to a variety of known and unknown risks, uncertainties and other factors which could cause actual events or results to differ from those expressed or implied by the forward-looking statements, including, without limitation:

- risks related to our exploration and development activities;
- risks related to the financing needs of our planned operations;
- risks related to estimates of mineral deposits, resources and reserves;
- risks related to fluctuations in mineral prices;
- risks related to the titles of our properties;
- risks related to competition in the mineral exploration and mining industry;
- risks related to potential conflicts of interest with our officers and directors;
- risks related to environmental and regulatory requirements;
- risks related to foreign currency fluctuations;
- risks related to our possible status as a passive foreign investment company;
- risks related to the volatility of our common stock; and
- risks related to the possible dilution of our common stock.

This list is not exhaustive of the factors that may affect our forward-looking statements. Some of the important risks and uncertainties that could affect forward-looking statements are described further under the sections titled “Risk Factors” and “Information on the Company” of this annual report. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, believed, estimated or expected. We caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. We disclaim any obligation subsequently to revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events other than as may be specifically required by applicable securities laws and regulations.

We qualify all the forward-looking statements contained in this annual report by the foregoing cautionary statements.

Unless the context otherwise requires, all references to “we” or “our” or the “Registrant” or the “Company” or “Canarc” refer to Canarc Resource Corp. and/or its subsidiaries. All monetary figures are in terms of United States dollars unless otherwise indicated.

GLOSSARY OF MINING TERMS

The following is a glossary of some of the terms used in the mining industry and referenced herein:

1933 Act - means the United States Securities Act of 1933, as amended.

adit – a horizontal tunnel in an underground mine driven from a hillside surface.

Ag – silver.

alluvial mining - mining of gold bearing stream gravels using gravity methods to recover the gold, also known as placer mining.

andesite - a volcanic rock of intermediate composition, the extrusive equivalent of diorite.

arsenopyrite – an ore mineral of arsenic, iron, and sulphur, often containing gold.

assay – a precise and accurate analysis of the metal contents in an ore or rock sample.

Au - gold.

auger drill – a handheld machine that produces small, continuous core samples in unconsolidated materials.

autoclave – a mineral processing vessel operated at high temperature and pressure in order to oxidize sulfide and carbon compounds, so the contained metals can be leached and concentrated.

Banka drilling - a hand operated drill specifically designed for sampling alluvial deposits. The drill rods (10-12 centimetres in diameter) are forced into the gravel and then the core sample is extracted from the rods.

Commission - United States Securities and Exchange Commission, or S.E.C.

concentrate – a concentrate of minerals produced by crushing, grinding and processing methods such as gravity or flotation.

contained gold – total measurable gold in grams or ounces estimated to be contained within a mineral deposit. Makes no allowance for economic criteria, mining dilution or recovery losses.

Cu – copper.

cut-off grade – deemed grade of mineralization, established by reference to economic factors, above which material is considered ore and below which is considered waste.

diamond drill – a large machine that produces a continuous core sample of the rock or material being drilled.

diorite – a plutonic rock of intermediate composition, the intrusive equivalent of andesite.

dorë – bullion of gold, with minor silver and copper produced by smelting, prior to refining.

epithermal – used to describe hydrothermal mineral deposits, typically in veins, formed at lower temperatures and pressures within 1 km of the earth surface.

Exchange Act – means the United States Securities Exchange Act of 1934, as amended.

feasibility study – a detailed report assessing the feasibility, economics and engineering of placing a mineral deposit into commercial production.

flotation – a mineral recovery process using soapy compounds to float finely ground metallic minerals into a concentrate.

garimpeiros – a Brazilian term used in South America referring to small scale, artisanal miners and prospectors.

gold deposit - means a mineral deposit mineralised with gold.

gold equivalent - a method of presenting combined gold and silver concentrations or weights for comparison purposes. Commonly involves expressing silver as its proportionate value in gold based on the relative values of the two metals.

gold resource – see mineral resource.

gpt - grams per tonne.

grams per cubic meter - alluvial mineralisation measured by grams of gold contained per cubic meter of material, a measure of gold content by volume not by weight.

greenstone - a field term for any compact dark-green altered or metamorphosed basic igneous rock that owes its colour to green minerals such as chlorite, actinolite or epidote.

indicated resource - means that part of a mineral resource for which quantity, grade or quality, densities, shape and physical characteristics, can be estimated with a level of confidence sufficient to allow the appropriate application of technical and economic parameters, to support mine planning and evaluation of the economic viability of the deposit. The estimate is based on detailed and reliable exploration and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes that are spaced closely enough for geological and grade continuity to be reasonably assumed.

inferred resource - means that part of a mineral resource for which quantity and grade or quality can be estimated on the basis of geological evidence and limited sampling and reasonably assumed, but not verified, geological and grade continuity. The estimate is based on limited information and sampling gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes.

laterite - highly weathered residual superficial soils and decomposed rocks, rich in iron and aluminum oxides, that are characteristically developed in tropical climates.

2

Canarc Resource Corp.
Form 20-F

lode mining – mining of ore, typically in the form of veins or stockworks.

measured resource means that part of a mineral resource for which quantity, grade or quality, densities, shape, physical characteristics are so well established that they can be estimated with confidence sufficient to allow the appropriate application of technical and economic parameters, to support production planning and evaluation of the economic viability of the deposit. The estimate is based on detailed and reliable exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes that are spaced closely enough to confirm both geological and grade continuity.

mesothermal – used to describe hydrothermal mineral deposits, typically in veins, formed at higher temperatures and pressures deeper than 1 km of the earth's surface.

mineral reserve means the economically mineable part of a measured or indicated resource demonstrated by at least a preliminary feasibility study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified. A mineral reserve includes diluting materials and allowances for losses that may occur when the material is mined.

mineral resource – a body of mineralized material which has not yet been determined to be ore, and the potential for mining of which has not yet been determined; categorized as possible, probable and proven, according to the degree of certainty with which their grade and tonnage are known; sometimes referred to as a “geological resource” or “mineral inventory”.

net profits interest or NPI – a royalty based on the net profits generated after recovery of all costs.

net smelter royalty or NSR - a royalty based on the gross proceeds received from the sale of minerals less the cost of smelting, refining, freight and other related costs.

nugget effect – an effect of high variability of gold assays, due to the gold occurring in discreet coarse grains such that their content in any given sample is highly variable.

ore – a naturally occurring rock or material from which economic minerals can be extracted at a profit.

ounce or oz. - a troy ounce or 20 pennyweights or 480 grains or 31.103 grams.

opt – troy ounces per ton.

porknockers - a local term used in Guyana and Suriname to refer to small scale artisanal miners and prospectors.

porphyry – an igneous rock containing coarser crystals in a finer matrix.

probable reserve - the economically mineable part of an indicated, and in some circumstances a measured resource demonstrated by at least a preliminary feasibility study. This study must include adequate information on mining, processing, metallurgical, economic, and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified.

professional association, for the purposes of the definition of a Qualified Person below, means a self-regulatory organization of engineers, geoscientists or both engineers and geoscientists that (a) has been given authority or recognition by statute; (b) admits members primarily on the basis of their academic qualifications and experience; (c) requires compliance with the professional standards of competence and ethics established by the organization; and (d) has disciplinary powers, including the power to suspend or expel a member.

prospect – an area prospective for economic minerals based on geological, geophysical, geochemical and other criteria

proven reserve means the economically mineable part of a measured resource demonstrated by at least a preliminary feasibility study. This study must include adequate information on mining, processing, metallurgical, economic, and other relevant factors that demonstrate, at the time of reporting, that economic extraction is justified.

pyrite – an ore mineral of iron and sulphur.

Qualified Person means an individual who (a) is an engineer or geoscientist with at least five years of experience in mineral exploration, mine development or operation or mineral project assessment, or any

combination of these; (b) has experience relevant to the subject matter of the mineral project and the technical report; and (c) is a member in good standing of a professional association.

quartz – a rock-forming mineral of silica and oxygen, often found in veins also.

raise – a vertical or inclined tunnel in an underground mine driven upwards from below.

ramp – an inclined tunnel in an underground mine driven downwards from surface.

reverse circulation drill – a large machine that produces a continuous chip sample of the rock or material being drilled.

saprolite - a soft, earthy, clay rich and thoroughly decomposed rock with its original textures intact, formed in place by chemical weathering of igneous, sedimentary or metamorphic rocks.

scoping study – a conceptual report assessing the scope, economics and engineering of placing a mineral deposit into commercial production.

shaft – a vertical or inclined tunnel in an underground mine driven downward from surface.

shear – a tabular zone of faulting within which the rocks are crushed and flattened.

stibnite – an ore mineral of antimony and sulphur.

stock or pluton – a body of intrusive rock that covers less than 40 square miles, has steep dips and is discordant with surrounding rock.

stockwork – multiple small veins of mineralisation that have so penetrated a rock mass that the whole rock mass can be considered mineralised.

3

Canarc Resource Corp.

Form 20-F

strike length - the longest horizontal dimensions of a body or zone of mineralisation.

stripping ratio - the ratio of waste material to ore that is estimated for or experienced in mining an ore body.

sulphide – an ore mineral compound linking sulphur with one or more metals.

ton - short ton (2,000 pounds).

tonne - metric tonne (2,204.6 pounds).

trenching – the surface excavation of a linear trench to expose mineralization for sampling.

vein – a tabular body of rock typically of narrow thickness and often mineralized occupying a fault, shear, fissure or fracture crosscutting another pre-existing rock.

winze – an internal shaft in an underground mine.

For ease of reference, the following conversion factors are provided:

1 mile	= 1.609 kilometres	1 pound	= 0.4535 kilogram
1 yard	= 0.9144 meter	2,000 pounds/1 short ton	= 0.907 tonne
1 acre	= 0.405 hectare	1 troy ounce	= 31.103 grams

4

Canarc Resource Corp.
Form 20-F

CAUTIONARY NOTE TO U.S. INVESTORS

This annual report on Form 20-F has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ from the requirements of United States securities laws. The terms “mineral reserve”, “proven mineral reserve” and “probable mineral reserve” are Canadian mining terms as defined in accordance with Canadian National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) and the Canadian Institute of Mining, Metallurgy and Petroleum (the “CIM”) - CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended. These definitions differ from the definitions in the United States Securities and Exchange Commission (“SEC”) Industry Guide 7 (“SEC Industry Guide 7”) under the United States Securities Act of 1933, as amended. Under SEC Industry Guide 7 standards, a “final” or “bankable” feasibility study is required to report reserves, the three-year historical average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.

In addition, the terms “mineral resource”, “measured mineral resource”, “indicated mineral resource” and “inferred mineral resource” are defined in and required to be disclosed by NI 43-101; however, these terms are not defined terms under SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves. “Inferred mineral resources” have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. Disclosure of “contained ounces” in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute “reserves” by SEC standards as in place tonnage and grade without reference to unit measures.

Accordingly, information contained in this report and the documents incorporated by reference herein containing descriptions of our mineral deposits may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.

PART I

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS

Not applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3. KEY INFORMATION

3.A Selected Financial Data

The following financial information (stated in United States dollars) with respect to the last two fiscal years ended December 31, 2011 and 2010 have been derived from Canarc's audited consolidated financial statements which are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). International Financial Reporting Standards 1 – First-time Adoption of International Financial Reporting ("IFRS 1") has been applied with an adoption date of January 1, 2011 and a transition date of January 1, 2010, and all dollar amounts are expressed in United States dollars unless otherwise indicated. The consolidated financial statements are set out and included in Item 18 of this annual report on Form 20-F.

The selected financial information for the fiscal years ended December 31, 2009, 2008 and 2007 have been prepared in accordance to Canadian generally accepted accounting principles ("Canadian GAAP").

Number of common shares	94,096,171	90,985,890	81,969,655	72,704,505	71,734,505

(1)

Revenues are comprised of gains from the disposition of marketable securities and investment and other income. Canarc has no sources of operating revenues.

(2) Canarc has no preferred shares.

(3) On June 25, 2008, Canarc did close a Plan of Arrangement (the "Arrangement") with Caza Gold Corp. ("Caza") whereby approximately 83% of Canarc's interest in Caza was distributed to the shareholders of Canarc.

The Company is involved with mineral exploration and does not have any sources of operating revenues.

On April 27, 2012, the Bank of Canada closing rate for the conversion of one United States dollar into Canadian dollars was CAD\$0.9810.

7

Canarc Resource Corp.
Form 20-F

The following table reflects the monthly high and low exchange rates for U.S.\$1.00 to the Canadian dollar for the following periods:

Month	Year	High (CAD\$)	Low (CAD\$)
October	2011	1.0253	1.0149
November	2011	1.0297	1.0219
December	2011	1.0274	1.0197
January	2012	1.0161	1.0099
February	2012	0.9997	0.9950
March	2012	0.9963	0.9915

The following table lists the high, low, average and closing exchange rates for U.S.\$1.00 to the Canadian dollar for the last five years:

Year	High (CAD\$)	Low (CAD\$)	Average Rate (CAD\$)	Close (CAD\$)
2007	1.1878	0.9066	1.0750	0.9913
2008	1.3008	0.9711	1.0660	1.2180
2009	1.3066	1.0251	1.1420	1.0510
2010	1.0848	0.9931	1.0299	0.9946
2011	1.0658	0.9407	0.9891	1.0170

3.B Capitalization and Indebtedness

Not applicable.

3.C Reasons for the Offer and Use of Proceeds

Not applicable.

3.D Risk Factors

The following is a brief discussion of those distinctive or special characteristics of the Registrant's operations and industry that may have a material impact on, or constitute risk factors in respect of, the Registrant's future financial performance.

Risks Related to the Registrant's Business

The Registrant's exploration activities may not be commercially successful, which could lead it to abandon its plans to develop its properties and its investments in exploration and there is no assurance given by the Registrant that its exploration and development programs and properties will result in the discovery, development or production of a commercially viable ore body.

The business of exploration for minerals and mining involves a high degree of risk. Few properties that are explored are ultimately developed into producing mines. There is no assurance that the Registrant's mineral exploration and development activities will result in any discoveries of bodies of commercial ore. Unusual or unexpected geological structures or formations, fires, power outages, labour disruptions, floods, explosions, cave-ins, land slides and the inability to obtain suitable or adequate machinery, equipment or labour are other risks involved in the operation of mines and the conduct of exploration programs. The Registrant has relied and may continue to rely upon consultants

and others for construction and operating expertise. The economics of developing gold and other mineral properties are affected by many factors including capital and operating costs, variations of the grade of ore mined, fluctuating mineral markets, costs of processing equipment and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals and environmental protection. Depending on the price of gold or other minerals produced, the Registrant may determine that it is impractical to commence or continue commercial production. Substantial expenditures are required to establish reserves through drilling, to develop metallurgical processes to extract metal from ore, and to develop the mining and processing facilities and infrastructure at any site chosen for mining. No assurance can be given that funds required for development can be obtained on a timely basis. The marketability of any minerals acquired or discovered may be affected by numerous factors which are beyond the Registrant's control and which cannot be accurately foreseen or predicted, such as market fluctuations, the global marketing conditions for precious and base metals, the proximity and capacity of milling facilities, mineral markets and processing equipment, and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting minerals and environmental protection. In order to commence exploitation of certain properties presently held under exploration concessions, it is necessary for the Registrant to apply for an exploitation concession. There can be no guarantee that such a concession will be granted.

8

Canarc Resource Corp.
Form 20-F

The Registrant's planned operations will require future financing and there is no assurance given by the Registrant that it will be able to secure the financing necessary to explore, develop and produce its mineral properties.

The Registrant does not presently have sufficient financial resources or operating cash flows to undertake by itself all of its planned exploration and development programs. The development of the Registrant's properties may therefore depend on the Registrant's joint venture partners, if any, and on the Registrant's ability to obtain additional required financing. There is no assurance the Registrant will be successful in obtaining the required financing, the lack of which could result in the loss or substantial dilution of its interests (as existing or as proposed to be acquired) in its properties as disclosed herein. In addition, the Registrant does not have sufficient experience in developing mining properties into production and its ability to do so will be dependent upon securing the services of appropriately experienced personnel or entering into agreements with other major mining companies which can provide such expertise.

As noted in its audited consolidated financial statements for the year ended December 31, 2011, the Registrant has incurred significant operating losses and has an accumulated deficit of approximately \$46.8 million at December 31, 2011. Furthermore, the Registrant has working capital deficiency of approximately \$577,000 as at December 31, 2011, and lack sufficient funds to achieve the Registrant's planned business objectives. The Registrant's ability to continue as a going concern is dependent on continued financial support from its shareholders and other related parties, the ability of the Registrant to raise equity financing, and the attainment of profitable operations, external financings and further share issuances to meet the Registrant's liabilities as they become payable.

The report of our independent registered public accounting firm on the December 31, 2011 consolidated financial statements includes an additional paragraph that states that conditions exist that raise substantial doubt about the Registrant's ability to continue as a going concern. The consolidated financial statements do not include adjustments that might result from the outcome of this uncertainty.

The figures for the Registrant's resources are estimates based on interpretation and assumptions and may yield less mineral production under actual conditions than is currently estimated and there is no assurance given by the Registrant that any estimates of mineral deposits herein will not change.

Although all figures with respect to the size and grade of mineralized deposits included herein have been carefully prepared by the Registrant, or, in some instances have been prepared, reviewed or verified by independent mining experts, these amounts are estimates only and no assurance can be given that any identified mineralized deposit will ever qualify as a commercially viable mineable ore body that can be legally and economically exploited. Estimates regarding mineralized deposits can also be affected by many factors such as permitting regulations and requirements, weather, environmental factors, unforeseen technical difficulties, unusual or unexpected geological formations and work interruptions. In addition, the grade of ore ultimately mined may differ from that indicated by drilling results. There can be no assurance that gold recovered in small-scale laboratory tests will be duplicated in large-scale tests under on-site conditions. Material changes in mineralized tonnages, grades, stripping ratios or recovery rates may affect the economic viability of projects. The existence of mineralized deposits should not be interpreted as assurances of the future delineation of ore reserves or the profitability of future operations. The refractory nature of gold mineralization at New Polaris may adversely affect the economic recovery of gold from mining operations.

Changes in the market price of gold, silver and other metals, which in the past have fluctuated widely, will affect the profitability of the Registrant's planned operations and financial condition and there is no assurance given by the Registrant that mineral prices will not change.

The mining industry is competitive and mineral prices fluctuate so that there is no assurance, even if commercial quantities of a mineral resource are discovered, that a profitable market will exist for the sale of same. Factors beyond the control of the Registrant may affect the marketability of any substances discovered. The prices of precious and base metals fluctuate on a daily basis, have experienced volatile and significant price movements over short periods of time, and are affected by numerous factors beyond the control of the Registrant, including international economic and political trends, expectations of inflation, currency exchange fluctuations (specifically, the U.S. dollar relative to other currencies), interest rates, central bank transactions, world supply for precious and base metals, international investments, monetary systems, and global or regional consumption patterns (such as the development of gold coin programs), speculative activities and increased production due to improved mining and production methods. The supply of and demand for gold are affected by various factors, including political events, economic conditions and production costs in major gold producing regions, and governmental policies with respect to gold holdings by a nation or its citizens. The exact effect of these factors cannot be accurately predicted, and the combination of these factors may result in the Registrant not receiving adequate returns on invested capital or the investments retaining their respective values. There is no assurance that the prices of gold and other precious and base metals will be such that the Registrant's properties can be mined at a profit.

There is no assurance given by the Registrant that it owns legal title to its mineral properties.

The acquisition of title to mineral properties is a very detailed and time-consuming process. Title to any of the Registrant's mining concessions may come under dispute. While the Registrant has diligently investigated title considerations to its mineral properties, in certain circumstances, the Registrant has only relied upon representations of property partners and government agencies. There is no guarantee of title to any of the Registrant's properties. The properties may be subject to prior unregistered agreements or transfers, and title may be affected by unidentified and undetected defects. In British Columbia and elsewhere, native land claims or claims of aboriginal title may be asserted over areas in which the Registrant's properties are located. To the best of the knowledge of the Registrant, although the Registrant understands that comprehensive land claims submissions have been received by Indian and Northern Affairs Canada from the Taku Tlingit (Atlin) Band (which encompasses the New Polaris property) and from the Association of United Tahltans and the Nisga'a Tribal Council (which may encompass the Eskay Creek property), no legal actions have been formally served on the Registrant to date asserting such rights with respect to mining properties in which the Registrant has an interest.

The Registrant competes with larger, better capitalized competitors in the mining industry and there is no assurance given by the Registrant that it can compete for mineral properties, future financings and technical expertise.

Significant and increasing competition exists for the limited number of gold acquisition opportunities available in North, South and Central America and elsewhere in the world. As a result of this competition, some of which is with large established mining companies which have greater financial and technical resources than the Registrant, the Registrant may be unable to acquire additional attractive gold mining properties on terms it considers acceptable. Accordingly, there can be no assurance that the Registrant's exploration and acquisition programs will yield any new resources or reserves or result in any commercial mining operation.

The Registrant may also encounter increasing competition from other mining companies in its efforts to hire experienced mining professionals. Competition for exploration resources at all levels is currently very intense, particularly affecting the availability of manpower, drill rigs, mining equipment and production equipment. Increased competition could adversely affect the Registrant's ability to attract necessary capital funding or acquire suitable producing properties or prospects for mineral exploration in the future.

The Registrant's directors and officers may have conflicts of interest as a result of their relationships with other companies and there is no assurance given by the Registrant that its directors and officers will not have conflicts of

interest from time to time.

The Registrant's directors and officers may serve as directors or officers of other public resource companies or have significant shareholdings in other public resource companies and, to the extent that such other companies may participate in ventures in which the Registrant may participate, the directors of the Registrant may have a conflict of interest in negotiating and concluding terms respecting the extent of such participation. In particular, Bradford Cooke is a Director of Aztec Metals Corp. ("Aztec"), Caza Gold Corp. ("Caza") and Endeavour Silver Corp. ("Endeavour"), companies in which the Registrant previously owned or currently owns shares. The interests of these companies may differ from time to time. In the event that such a conflict of interest arises at a meeting of the Registrant's directors, a director who has such a conflict will abstain from voting for or against any resolution involving any such conflict. From time to time several companies may participate in the acquisition, exploration and development of natural resource properties thereby allowing for their participation in larger programs, permitting involvement in a greater number of programs and reducing financial exposure in respect of any one program. It may also occur that a particular company will assign all or a portion of its interest in a particular program to another company due to the financial position of the company making the assignment. In accordance with the laws of the Province of British Columbia, Canada, the directors of the Registrant are required to act honestly, in good faith and in the best interests of the Registrant. In determining whether or not the Registrant will participate in any particular exploration or mining project at any given time, the directors will primarily consider the upside potential for the project to be accretive to shareholders, the degree of risk to which the Registrant may be exposed and its financial position at that time.

10

Canarc Resource Corp.
Form 20-F

The Registrant does not insure against all risks which we may be subject to in our planned operations and there is no assurance given by the Registrant that it is adequately insured against all risks.

The Registrant may become subject to liability for cave-ins, pollution or other hazards against which it cannot insure or against which it has elected not to insure because of high premium costs or other reasons. The payment of such liabilities would reduce the funds available for exploration and mining activities.

The Registrant is subject to significant governmental and environmental regulations and there is no assurance given by the Registrant that it has met all environmental or regulatory requirements.

The current or future operations of the Registrant, including exploration and development activities and commencement of production on its properties, require permits from various foreign, federal, state and local governmental authorities and such operations are and will be governed by laws and regulations governing prospecting, development, mining, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety and other matters. Companies engaged in the development and operation of mines and related facilities generally experience increased costs, and delays in production and other schedules as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance that approvals and permits required in order for the Registrant to commence production on its various properties will be obtained. Additional permits and studies, which may include environmental impact studies conducted before permits can be obtained, are necessary prior to operation of the other properties in which the Registrant has interests and there can be no assurance that the Registrant will be able to obtain or maintain all necessary permits that may be required to commence construction, development or operation of mining facilities at these properties on terms which enable operations to be conducted at economically justifiable costs.

Failure to comply with applicable laws, regulations, and permitting requirements may result in enforcement actions including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations. New laws or regulations or amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation of current laws, regulations or permits, could have a material adverse impact on the Registrant and cause increases in capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new mining properties.

As a prior holder of an interest in a U.S. mineral property, the Registrant may be subject to the Comprehensive Environmental Response Compensation and Liability Act of 1980, as amended ("CERCLA"). CERCLA, along with analogous statutes in certain states, imposes strict, joint and several liability on owners and operators of facilities which release hazardous substances into the environment. CERCLA imposes similar liability upon generators and transporters of hazardous substances disposed of at an off-site facility from which a release has occurred or is threatened. Under CERCLA's strict joint and several liability provisions, the Registrant could potentially be liable for all remedial costs associated with property that it owned or operated regardless of whether the Registrant's activities are the actual cause of the release of hazardous substances. Such liability could include the cost of removal or remediation of the release and damages for injury to the natural resources. The Registrant's one prior property was located in a historic mining district and may include abandoned mining facilities (including waste piles, tailings, portals and associated underground and surface workings). Releases from such facilities or from any of the Registrant's prior U.S. properties due to past or current activities could form the basis for liability under CERCLA and its analogs. In addition, off-site disposal of hazardous substances, including hazardous mining wastes, may subject the Registrant to CERCLA liability. The Registrant's prior U.S. property is not, to the Registrant's knowledge,

currently listed or proposed for listing on the National Priority List and the Registrant is not aware of pending or threatened CERCLA litigation which names the Registrant as a defendant or concerns any of its prior U.S. properties or operations. The Registrant cannot predict the potential for future CERCLA liability with respect to its prior U.S. property, nor can it predict the potential impact or future direction of CERCLA litigation in the area surrounding its prior property.

11

Canarc Resource Corp.
Form 20-F

To the best of the Registrant's knowledge, the Registrant is operating in compliance with all applicable environmental and regulatory regulations.

Land reclamation requirements for the Registrant's properties may be burdensome.

There is a risk that monies allotted for land reclamation may not be sufficient to cover all risks, due to changes in the nature of the waste rock or tailings and/or revisions to government regulations. Therefore additional funds, or reclamation bonds or other forms of financial assurance may be required over the tenure of the project to cover potential risks. These additional costs may have material adverse impact on the financial condition and results of the Registrant.

Mining is inherently dangerous and subject to conditions or events beyond the Registrant's control, which could have a material adverse effect on the Registrant's business.

Mining involves various types of risks and hazards, including:

- environmental hazards,
- power outages,
- metallurgical and other processing problems,
- unusual or unexpected geological formations,
- structural cave-ins or slides,
- flooding, fire, explosions, cave-ins, landslides and rock-bursts,
- inability to obtain suitable or adequate machinery, equipment, or labour,
- metals losses, and
- periodic interruptions due to inclement or hazardous weather conditions.

These risks could result in damage to, or destruction of, mineral properties, production facilities or other properties, personal injury, environmental damage, delays in mining, increased production costs, monetary losses and possible legal liability. The Registrant may not be able to obtain insurance to cover these risks at economically feasible premiums. Insurance against certain environmental risks, including potential liability for pollution or other hazards as a result of the disposal of waste products occurring from production, is not generally available to the Registrant or to other companies within the mining industry. The Registrant may suffer a material adverse effect on its business if it incurs losses related to any significant events that are not covered by its insurance policies.

The Registrant will be required to locate mineral reserves for its long-term success.

Because mines have limited lives based on proven and probable mineral reserves, the Registrant will have to continually replace and expand its mineral reserves, if any. The Registrant's ability to maintain or increase its annual production of gold and other base or precious metals once its current properties are producing, if at all, will be dependent almost entirely on its ability to acquire, explore, and develop new properties and bring new mines into production.

The Registrant's properties may be located in foreign countries and political instability or changes in the regulations in these countries may adversely affect the Registrant's ability to carry on its business.

Certain of the Registrant's properties may be located in countries outside of Canada, and mineral exploration and mining activities may be affected in varying degrees by political stability and government regulations relating to the mining industry. Any changes in regulations or shifts in political attitudes may vary from country to country and are

beyond the control of the Registrant and may adversely affect its business. Such changes have, in the past, included nationalization of foreign owned businesses and properties. Operations may be affected in varying degrees by government regulations with respect to restrictions on production, price controls, export controls, income and other taxes and duties, expropriation of property, environmental legislation and mine safety. These uncertainties may make it more difficult for the Registrant and its joint venture partners to obtain any required production financing for its mineral properties.

12

Canarc Resource Corp.
Form 20-F

Fluctuations in foreign currency exchange rates may adversely affect the Registrant's future profitability.

In addition to CAD dollar currency accounts, the Registrant maintains a portion of its funds in U.S. dollar denominated accounts. Certain of the Registrant's properties and related contracts may be denominated in U.S. dollars. Accordingly, the Registrant may take some steps to reduce its risk to foreign currency fluctuations. However, the Registrant's operations in countries other than Canada are normally carried out in the currency of that country and make the Registrant subject to foreign currency fluctuations and such fluctuations may materially affect the Registrant's financial position and results. In addition future contracts may not be denominated in U.S. dollars and may expose the Registrant to foreign currency fluctuations and such fluctuations may materially affect the Registrant's financial position and results. In addition, the Registrant is or may become subject to foreign exchange restrictions which may severely limit or restrict its ability to repatriate capital or profits from its properties outside of Canada to Canada. Such restrictions have existed in the past in countries in which the Registrant holds property interests and future impositions of such restrictions could have a materially adverse effect on the Registrant's future profitability or ability to pay dividends.

The Registrant is reliant on third parties.

The Registrant's rights to acquire interests in certain mineral properties may have been granted by third parties who themselves hold only an option to acquire such properties. As a result, the Registrant may have no direct contractual relationship with the underlying property holder.

Jurisdiction and Enforcement in U.S. and Canadian Courts.

The enforcement of civil liabilities under the U.S. federal and state securities laws may be affected adversely by the fact that the Registrant is incorporated under the laws of a foreign country, that certain of its officers and directors are residents of a foreign country, that the independent registered public accounting firm and some or all of the experts named in this report may be residents of a foreign country and that all or a substantial portion of the assets of the Registrant and said persons may be located outside the U.S. In particular, uncertainty exists as to whether Canadian courts would entertain claims or enforce judgments based on the civil liability provisions of the U.S. federal and state securities laws.

The Registrant's possible PFIC status may have possible adverse tax consequences for United States Investors.

Potential investors who are United States taxpayers should be aware that Canarc may be classified for United States tax purposes as a passive foreign investment company ("PFIC") for the current fiscal year and may also have been a PFIC in prior years, and may also be a PFIC in subsequent years. This status arises due to the fact that Canarc's excess exploration funds are invested in interest bearing securities creating "passive income" which, while modest and ancillary to the exploration business, has been Canarc's only substantive source of income in the past. If Canarc is a PFIC for any year during a United States taxpayer's holding period, then such a United States taxpayer, generally, will be required to treat any so-called "excess distribution" received on its common shares, or any gain realized upon a disposition of common shares, as ordinary income and to pay an interest charge on a portion of such distribution or gain, unless the taxpayer makes a qualified electing fund ("QEF") election or a mark-to-market election with respect to the shares of Canarc. In certain circumstances, the sum of the tax and the interest charge may exceed the amount of the excess distribution received, or the amount of proceeds of disposition realized, by the taxpayer. A United States taxpayer who makes a QEF election generally must report on a current basis its share of Canarc's net capital gain and ordinary earnings for any year in which Canarc is a PFIC, whether or not Canarc distributes any amounts to its shareholders. A United States taxpayer who makes the mark-to-market election generally must include as ordinary income each year the excess of the fair market value of the common shares over the taxpayer's tax basis therein. Item 10.E provides further details.

While we believe we have adequate internal control over financial reporting, internal controls cannot provide absolute assurance that objectives are met.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, we have furnished a report by management on our internal controls over financial reporting in this annual report on Form 20-F. Such report contains, among other matters, an assessment of the effectiveness of our internal control over financial reporting, including a statement as to whether or not our internal control over financial reporting is effective.

13

Canarc Resource Corp.
Form 20-F

The Registrant's management does not expect that its disclosure controls and procedures or internal controls and procedures will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Registrant have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Risks Related to the Registrant's Common Shares

The volatility of the Registrant's common shares could cause investor loss.

The market price of a publicly traded stock, especially a junior resource issuer like Canarc, is affected by many variables in addition to those directly related to exploration successes or failures. Such factors include the general condition of the market for junior resource stocks, the strength of the economy generally, the availability and attractiveness of alternative investments, and the breadth of the public market for the stock. The effect of these and other factors on the market price of the common shares on the TSX and NASD-OTC suggests that Canarc's shares will continue to be volatile. Therefore, investors could suffer significant losses if Canarc's shares are depressed or illiquid when an investor seeks liquidity and needs to sell Canarc's shares.

Penny stock classification could affect the marketability of the Registrant's common stock and shareholders could find it difficult to sell their stock.

The Registrant's stock may be subject to "penny stock" rules as defined in the Exchange Act rule 3a51-1. The Securities and Exchange Commission has adopted rules which regulate broker-dealer practices in connection with transactions in penny stocks. The Registrant's common shares may be subject to these penny stock rules. Transaction costs associated with purchases and sales of penny stocks are likely to be higher than those for other securities. Penny stocks generally are equity securities with a price of less than U.S.\$5.00 (other than securities registered on certain national securities exchanges or quoted on the NASDAQ system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or system).

The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document that provides information about penny stocks and the nature and level of risks in the penny stock market. The broker-dealer also must provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction, and monthly account statements showing the market value of each penny stock held in the customer's account. The bid and offer quotations, and the broker-dealer and salesperson compensation information, must be given to the customer orally or in writing prior to effecting the transaction and must be given to the customer in writing before or with the customer's confirmation.

Further, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from such rules, the broker-dealer must make a special written determination that the penny stock is a suitable investment for the

purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for the Registrant's common shares in the United States and shareholders may find it more difficult to sell their shares.

14

Canarc Resource Corp.
Form 20-F

Possible dilution to current shareholders based on outstanding options and warrants.

At December 31, 2011, the Company had 94,096,171 common shares and 10,115,000 outstanding share purchase options and 4,250,000 share purchase warrants outstanding. The resale of outstanding shares from the exercise of dilutive securities could have a depressing effect on the market for the Company's shares. At December 31, 2011, securities that could be dilutive represented approximately 15.3% of the Company's issued shares. None of these dilutive securities were exercisable at prices below the December 30, 2011 closing market price of CAD\$0.09 for the Company's shares, which would not accordingly result in dilution to existing shareholders if exercised.

ITEM 4. INFORMATION ON THE COMPANY

The Registrant is a Canadian mineral exploration company and is subject to NI 43-101, a National Instrument adopted by all of the Securities Commissions in Canada that deals with standards of disclosure for mineral projects. It applies to all oral statements and written disclosure of scientific or technical information, including disclosure of a mineral resource or mineral reserve, made by or on behalf of a company in respect of its material mineral projects. In addition to other matters, it sets out strict guidelines for the classification of and use of the terms 'mineral resource' and 'mineral reserve' and it requires all technical disclosure on all material properties to be subject to review by a senior engineer or geoscientist in good standing with a relevant professional association. The full text of NI 43-101 can be found at <http://www.bcsc.bc.ca/policy.asp?id=2884&scat=4&title=4%20-%20Distribution%20Requirements>. While the Registrant believes that its technical disclosure, when made, was accurate, technical disclosure prepared by the Registrant before NI 43-101 came into force in February 2001 has not been updated by the Registrant to be compliant with NI 43-101 other than as specifically disclosed herein.

4.A History and Development of the Company

Incorporation and Reporting Status

The Registrant was incorporated under the laws of British Columbia, Canada, on January 22, 1987 under the name, "Canarc Resource Corp.", by registration of its Memorandum and Articles with the British Columbia Registrar of Companies.

The Company was originally incorporated under the previous Company Act (British Columbia) and transitioned to the Business Corporations Act (British Columbia) in 2005; the Business Corporations Act (British Columbia) replaced the Company Act (British Columbia) on March 29, 2004.

The Registrant is a reporting company in British Columbia, Alberta, Saskatchewan, Ontario and Nova Scotia. The Registrant became a reporting issuer under the United States Securities Exchange Act of 1934, as amended, upon filing its registration statement on Form 20-F dated October 9, 1990 with the Securities and Exchange Commission.

Canarc Resource Corp.
Form 20-F

Introduction

The Registrant commenced operations in 1987 and, since inception, has been engaged in the business of the acquisition, exploration and, if warranted, development of precious metal properties. The Registrant currently owns or holds, directly or indirectly, interests in several precious metal properties which are located in Canada, as follows:

- New Polaris property in British Columbia,
- Tay-LP property in the Yukon,
- Windfall Hills properties, British Columbia,
- Devils' Thumb property, British Columbia, and
- Eskay Creek property in British Columbia,

of which the New Polaris property is the material property of the Registrant.

In its consolidated financial statements prepared in accordance with IFRS, the Registrant has capitalized costs, net of recoveries and write-downs, of approximately \$12.9 million in connection with the acquisition, exploration and development on its currently held properties as at December 31, 2011 and are summarized as follows for the past two fiscal years:

(in terms of \$000s)	2011			2010		
	Acquisition Costs	Exploration/Development	Acquisition Total	Costs	Exploration/Development	Total
British Columbia (Canada):						
New Polaris	\$ 3,900	\$ 8,285	\$ 12,185	\$ 3,605	\$ 8,660	\$ 12,265
Windfall Hills	67	106	173	—	—	—
Devil's Thumb	6	15	21	—	—	—
Yukon (Canada):						
Tay-LP	146	423	569	74	385	459
	\$ 4,119	\$ 8,829	\$ 12,948	\$ 3,679	\$ 9,045	\$ 12,724

Further information and details regarding Canarc's properties are provided in Item 4.D.

Developments over the Last Three Financial Years

Over the course of the past three years ended December 31, 2011 and to the date of this Form 20-F, the Registrant had been engaged in exploration and development of precious metal projects in Canada. The major events in the development of the Registrant's business over the last three years are set out below. Information and details regarding the Registrant's properties are provided in Item 4.D.

In May 2009, Canarc received CAD\$62,030 in demand loans from certain directors and an officer of Canarc. The loans are repayable on demand and bore an interest rate of 9% per annum which was increased to 12% effective September 1, 2010, and were previously secured by Canarc's shareholdings in Caza at CAD\$0.25 per share of Caza which has been replaced by a loan bonus of 12% payable upon repayment effective September 1, 2010. As at December 31, 2011, notes payable includes interest accrual of CAD\$19,800 and loan bonus accrual of CAD\$7,400.

On July 15, 2009, Canarc granted 1,680,000 stock options with an exercise price of CAD\$0.11 and an expiry date of July 15, 2014 and which are subject to a vesting provision in which 20% of the options vest immediately and 20% vest every six months.

On August 24, 2009, Canarc entered into an option agreement with Ross Rivers Minerals Ltd. and Ross River Gold Ltd. (jointly, "Ross River") to acquire a 100% interest in the Tay-LP gold property by paying CAD\$1 million in cash and/or shares and spending CAD\$1.5 million on exploration over a three-year period which can occur in two stages. On March 22, 2010, Canarc entered into an option agreement with Cap-Ex Ventures Ltd. ("Cap-Ex") whereby Cap-Ex can acquire 50% of Canarc's interest in the Tay-LP property. In March 2011, Cap-Ex terminated its option agreement with Canarc. On September 3, 2011, Canarc and Ross River amended the option agreement by increasing the cash payment of CAD\$50,000 to CAD\$75,000 due by October 31, 2011, deferring the exploration expenditures of CAD\$500,000 from October 31, 2011 to October 31, 2012 and exploration expenditures of CAD\$600,000 from October 31, 2012 to October 31, 2013, and including a cash payment of CAD\$25,000 due by October 31, 2012. Item 4.D provides further details.

16

Canarc Resource Corp.
Form 20-F

On October 22, 2009, Canarc closed two private placements:

-One private placement was for 4,000,000 flow through shares at CAD\$0.12 per share for gross proceeds of CAD\$480,000. Finders fees were comprised of CAD\$25,523 in cash and 241,570 warrants, of which 39,410 warrants have an exercise price of CAD\$0.15 and an expiry date of April 22, 2011 and the remaining 202,160 warrants have an exercise price of CAD\$0.15 and an expiry date of October 22, 2011.

-The second private placement was for 4,800,000 units at CAD\$0.10 per unit for gross proceeds of CAD\$480,000. Each unit was comprised of one common share and one-half of a share purchase warrant; each whole share purchase warrant was exercisable to acquire one common share at CAD\$0.15 until April 22, 2011. Finders fees were comprised of CAD\$18,011 in cash and 168,140 warrants which have the same terms as the warrants in the private placement for units.

On November 9, 2009, Canarc closed a private placement for 304,900 units at CAD\$0.1225 per unit for gross proceeds of CAD\$37,350. Each unit was comprised of one common share and one-half of a share purchase warrant; each whole share purchase warrant is exercisable to acquire one common share at CAD\$0.165 until May 9, 2011. Finders fees were comprised of CAD\$240 in cash and 1,960 warrants which have the same terms as the warrants in the private placement for units.

At Canarc's annual general meeting held on June 15, 2010, the stock option plan to grant up to a maximum of 16,335,000 common shares was approved.

Pursuant to an audit by the Canada Revenue Agency (the "CRA") which was completed in June 2010, CRA disallowed approximately CAD\$1.01 million in exploration expenditures incurred in 2007 as Canadian exploration expenditures ("CEE") of which approximately CAD\$795,000 as being disqualified as CEE for flow-through purposes. Canarc accrued liabilities of approximately CAD\$146,300 for estimated indemnities related to the disqualified CEE for flow-through purposes and CAD\$51,700 in accrued interests related to the indemnities. In 2011, Canarc did pay CAD\$37,900 including interest for indemnities relating to ineligible CEE for flow-through purposes

On September 8, 2010, Canarc granted 2,740,000 stock options with an exercise price of CAD\$0.10 and an expiry date of September 8, 2015 and which are subject to a vesting provision in which 20% of the options vest immediately and 20% vest every six months.

On December 13, 2010, Canarc closed a private placement for 8.5 million units at CAD\$0.15 per unit for gross proceeds of CAD\$1,275,000. Each unit was comprised of one common share and one-half of a share purchase warrant; each whole share purchase warrant is exercisable to acquire one common share at CAD\$0.22 until June 13, 2012.

In April 2011, Canarc entered into two option agreements to purchase 100% interests in two adjacent gold properties located in British Columbia. Canarc can acquire a 100% interest in the Atna properties by making \$750,000 in cash payments over a four year period, honouring a pre-existing 1.5% net smelter return ("NSR") production royalty that can be purchased for CAD\$1 million, and granting the vendor a 2% NSR production royalty. Canarc can acquire a 100% interest in the Dunn properties by making CAD\$250,000 in cash payments over a four year period, and a final bonus payment based on all gold resources estimated in an independent NI 43-101 technical report. The formula for the bonus payment is \$30 per oz for measured resources, \$20 per oz for indicated resources, and \$10 per oz for inferred resources. Item 4.D provides further details

In May 2011, Canarc staked three gold properties, known as Devil's Thumb, totalling 17,175 hectares, which is located northeast of its Windfall Hills properties in central British Columbia.

At Canarc's Annual General Meeting held on June 7, 2011, Messrs. Bradford Cooke, William Price, Derek Bullock, Leonard Harris and Bruce Bried were re-elected as Directors of Canarc for the ensuing year. Shareholder approval was also provided for Canarc's Shareholder Rights Plan.

In June 2011, Mr. Gregg Wilson was appointed Vice-President of Investor Relations.

On July 6, 2011, Canarc granted 2,220,000 stock options with an exercise price of CAD\$0.135 and an expiry date of July 6, 2016 which are subject to vesting provisions whereby 20% vest immediately and 20% vest every 6 months thereafter.

17

Canarc Resource Corp.
Form 20-F

In March 2012, Canarc arranged demand loans of CAD\$200,000 from certain directors and an officer of Canarc. The loans are repayable on demand and bear an interest rate of 12% compounded monthly with interest payable semi-annually.

In March 2012, Canarc granted 1,400,000 stock options with an exercise price of CAD\$0.10 and which are exercisable for a period of up to one year and are subject to vesting provisions in which 25% of the options vest immediately on the grant date and 25% vest every three months thereafter.

Relief Canyon project

In December 2010, Canarc was the accepted bidder to acquire an open pit, heap leach gold mine through a bankruptcy court auction held in Reno, Nevada. Canarc agreed to purchase the Relief Canyon gold mine assets from Firstgold Corporation (“Firstgold”) for \$11 million, subject to a due diligence period which expired on February 4, 2011. As a condition of its winning bid, Canarc paid a non-refundable deposit of \$300,000 in December 2010 to Firstgold in trust pending Canarc’s due diligence, and was also obligated to pay \$20,000 bi-weekly to Firstgold for its operating expenses during the due diligence period. If Canarc elected not to proceed with the purchase of the Relief Canyon gold mine assets, Canarc was obligated to pay an additional \$300,000 to Firstgold but in return, Firstgold would transfer ownership of its fully built, permitted and operating commercial assay laboratory located near the Relief Canyon mine-site to Canarc.

To finance the acquisition, Canarc arranged a CAD\$12 million bridge loan with Effisolar Energy Corporation (“Effisolar”), subject to Effisolar’s due diligence, execution of definitive loan documents and regulatory and exchange approvals. The bridge loan was to close on or before February 3, 2011, mature in one year, bear simple annual interest rate of 12%, and secured by a first charge on the Relief Canyon gold mine assets. If Canarc elected not to proceed with the purchase of the Relief Canyon gold mine assets whereby the acquisition of the commercial assay laboratory would then need to be financed, Canarc arranged a separate CAD\$300,000 convertible loan with Effisolar, subject to Effisolar’s due diligence, execution of definitive loan documents and regulatory and exchange approvals. At Canarc’s election, the convertible loan was to close on or before February 3, 2011, mature in one month, bear no interest and automatically convert into common shares of Canarc based on the 10 day average closing price on the Toronto Stock Exchange (“TSX”).

In January 2011, after conducting due diligence, both Canarc and Effisolar decided not to proceed with the Relief Canyon project. In early February 2011, Canarc paid an additional \$300,000 to Firstgold whereby ownership of the commercial assay laboratory was transferred to Canarc. Canarc issued a convertible debenture for CAD\$300,000 to Effisolar for the interest-free loan from Effisolar, which was then converted into 1,282,051 common shares of Canarc on March 2, 2011.

In May 2011, Canarc entered into an agreement for sale of the assay laboratory for \$600,000 plus recovery of out-of-pocket expenses incurred by Canarc.

4.B Business Overview

Nature of operations and principal activities

The Registrant’s principal business activities are the acquisition, exploration and development of mineral resource properties. The Registrant is in the process of exploring and developing its mineral properties and has not yet determined whether these properties contain reserves. The recoverability of amounts capitalized for mineral properties is dependent upon the existence of economically recoverable reserves in its mineral resource properties, the ability of the Registrant to arrange appropriate financing to complete further work on its properties, confirmation of

the Registrant's interest in the underlying properties, the receipt of necessary permitting and upon future profitable activities on the Registrant's properties or proceeds from the disposition thereof. The Registrant has incurred significant operating losses and currently has no operating revenues. The Registrant has financed its activities principally by the issuance of equity securities. The Registrant's ability to continue as a going concern is dependent on continued financial support from its shareholders and other related parties, the ability of the Registrant to raise equity financing, and the attainment of profitable operations to fund its operations.

18

Canarc Resource Corp.
Form 20-F

The Registrant and its management group have previously been actively involved in the evaluation, acquisition and exploration of mineral properties in Canada, U.S.A., and Central and South America. Starting with grass roots exploration prospects, it progressed to more advanced properties. To date, the Registrant has not received any revenues from its mineral property interests. The Registrant plans to continue exploring and developing its properties and, if appropriate, the Registrant intends to seek partners or buyers to purchase or to assist in further advancement (by way of joint venture or otherwise) of its properties. The Registrant seeks to identify properties with significant potential and to acquire those properties on the basis of an option agreement relying on the representations and warranties of the vendor as to the state of title, with limited or no title work being performed by the Registrant. Detailed title work is only undertaken once it has been determined that the property is likely to host a significant body of ore, which may not occur. Consequently, there is a significant risk that adverse claims may arise or be asserted with respect to certain of the Registrant's properties. Items 3.D and 4.A provide further details.

Further information and details regarding the Registrant's properties are provided in Item 4.D.

Sales and revenue distribution, sources and availability of raw materials, and marketing channels

As of the date of this annual report, the Registrant has not generated any operating revenues from its mineral properties.

Competitive conditions

Significant competition exists for natural resource acquisition opportunities. As a result of this competition, some of which is with large, well established mining companies with substantial capabilities and significant financial and technical resources, the Registrant may be unable to compete for nor acquire rights to exploit additional attractive mining properties on terms it considers acceptable. Accordingly, there can be no assurance that the Registrant will be able to acquire any interest in additional projects that would yield reserves or results for commercial mining operations.

Government regulations

The Registrant's operations are subject to governmental regulations in Canada, where the Registrant had interests in mineral properties.

The current and anticipated future operations of the Registrant, including further exploration and/or production activities may require additional permits from governmental authorities. Such operations are subject to various laws governing land use, the protection of the environment, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, mine safety and other matters. Unfavourable amendments to current laws, regulations and permits governing operations and activities of mineral exploration companies, or more stringent implementation thereof, could have a materially adverse impact on the Registrant and could cause increases in capital expenditures which could result in a cessation of operations by the Registrant. To the best of its knowledge, the Registrant is operating in compliance with applicable laws.

Trends

Gold prices continued to show strength as the cumulative annual average increased from \$972 in 2009 to \$1,225 in 2010 and then to \$1,572 in 2011 and closing at \$1,664 on March 23, 2012. Gold prices achieved new highs in each of the past several years. In December 2009, prices reached a high of \$1,213 and then \$1,421 in November 2010 before reaching a high of \$1,895 in September 2011. The high for 2012 was on February 28, 2012 at \$1,781.

Not only has this trend made the gold mining business more profitable, it has attracted investors into the gold equities, driving up the share prices of gold companies and providing a market for capital financing to the gold industry.

During the same period from January 2009 to December 2010, the closing market price for the Registrant's shares increased from CAD\$0.07 to CAD\$0.09 – an increase of 29%, and the high of CAD\$0.30 was in January 2011. On April 27, 2012, the closing market share price was CAD\$0.17. In 2007, the Company elected not to proceed with the development of the New Polaris gold project and with no other significant exploration activity underway, the share price was weak because of a lack of material news. The Company's decision to defer development work at New Polaris was based on the fact that a larger mine development by another mining company immediately adjacent to New Polaris was granted its final environmental permits, raised its capital financing and made a development decision, so the Company could potentially benefit from waiting for the neighbouring mining company to complete building its mine and from both their environmental studies and infrastructure. Unfortunately, that company was negatively impacted in the 2008 financial crisis and filed for bankruptcy protection in 2009, and their mine was never built. Despite these setbacks, management continues to foresee opportunities to finance the mineral exploration and development efforts on Canarc's gold properties, and also to evaluate and consider new acquisitions in the gold arena as a result of rising gold prices.

19

Canarc Resource Corp.
Form 20-F

The Registrant has determined that the policies of the current provincial government in British Columbia have led to increased incentives for mineral resource development in the province. In addition, the price of gold bullion has continued to increase, reflecting in part the ongoing weakness in the United States dollar. These factors should make gold exploration in British Columbia increasingly attractive and should increase the opportunities for its New Polaris property.

Risk factors in Item 3.D provides further details regarding competition and government regulations.

4.C Organizational Structure

The Registrant carries on its business in large part through its subsidiaries. The Registrant has a number of direct or indirect wholly or majority owned subsidiaries of which the active subsidiaries are as follows:

Benzdorp Gold N.V. was incorporated under the laws of Suriname on February 4, 2004 when Suriname presidential assent was received. The Registrant owns 40% of the voting shares of this company.

Canarc (Barbados) Mining Ltd. is a company duly incorporated under the laws of Barbados on July 26, 1993. The Registrant owns 100% of the issued and outstanding shares.

Canarc Suriname (Barbados) Ltd. is a company duly incorporated under the laws of Barbados on January 26, 1994. The Registrant owns 100% of the issued and outstanding shares.

Canarc van Suriname N.V. is a company duly incorporated under the laws of Suriname on November 10, 1995. The Registrant owns 100% of the issued and outstanding shares.

New Polaris Gold Mines Ltd. (“New Polaris”) (formerly Golden Angus Mines Ltd. - name change effective April 21, 1997) is a corporation formed through the amalgamation of 2820684 Canada Inc. (“2820684”), a former wholly-owned subsidiary of the Registrant incorporated under the Canada Business Corporation Act on May 13, 1992, and Suntac Minerals Inc. The Registrant owns 100% of the issued and outstanding shares.

¹ Subject to any royalties or other interests as disclosed below.

² Previously known as "Polaris-Taku".

³ Net of recoveries and write-downs.

⁴ On March 22, 2010, Canarc entered into an option agreement with Cap-Ex whereby Cap-Ex can acquire 50% of Canarc's interest in the Tay-LP property. In March 2011, Cap-Ex terminated its option agreement with the Company. Item 4.D provides further details.

NOTE: All references to U.S.\$ unless otherwise noted. See below for further details on each property.

The following is a more detailed description of some of the more material properties listed above in which the Registrant has an interest.

Material Mineral Projects

Cautionary Note to U.S. Investors concerning estimates of Measured and Indicated Resources. This section and certain related exhibits may use the terms "measured" and "indicated resources". We advise U.S. investors that while those terms are recognized and required by Canadian regulations, the U.S. Securities and Exchange Commission does not recognize them. U.S. investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves. See "Cautionary Note to U.S. Investors" at the beginning of this annual report.

Cautionary Note to U.S. Investors concerning estimates of Inferred Resources. This section and certain related exhibits may use the term "inferred resources". We advise U.S. investors that while this term is recognized and required by Canadian regulations, the U.S. Securities and Exchange Commission does not recognize it. "Inferred resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. U.S. investors are cautioned not to assume that part or all of an inferred resource exists, or is economically or legally minable. See "Cautionary Note to U.S. Investors" at the beginning of this annual report.

New Polaris Gold Project, British Columbia, Canada

Discovered by prospectors in 1929, the original mine was constructed in 1936 and operated from 1937 to 1942 and again from 1946 to 1951. A total of 232,000 oz. of gold was produced. Flotation concentrates were shipped seasonally for refining to the smelter in Tacoma, Washington. The first barge load in 1951 sank in a storm off the B.C. coast, causing the mine to shut down. Cominco upgraded the mill in 1952 and used it to process the nearby Tulsequah Chief ores from 1953 to 1957. New Polaris was then dormant for 30 years until exploration resumed in 1988. Canarc acquired New Polaris in 1992 and has partially cleaned up the original mill site and infrastructure, which had been previously abandoned. Canarc constructed a new office complex at the New Polaris mine site and the camp is now capable of supporting 35 people. The machinery from the mill was removed from the site by previous owners in the 1970's. No remaining equipment from the mine operation was salvaged as it was all inoperable. The only original buildings remaining are one large shed (the former machine shop) and 3 small houses. These existing buildings have been refurbished and serve as both sleeping quarters and the kitchen facility. The former machine shop has also been maintained as a maintenance facility. Current fixed equipment include 10,000 and 25,000 gallon Terra Tanks, and mobile equipment on the property include a D6 Cat, backhoe, grader, electric Alimak machine, pumping equipment, welding machines and several generators. The existing underground workings are accessible, although dewatering is required to access those workings below the 50 foot level. Power to the site is currently supplied by diesel generators.

21

Canarc Resource Corp.
Form 20-F

In 2007, Canarc completed a pre-feasibility program for the New Polaris gold mine project, including dewatering of the underground mine workings, mapping and sampling of the lower mine levels, optimizing metallurgical recoveries, continuing site-related environmental studies, developing a conceptual mine plan and completing a preliminary economic assessment for the project. No additional work is being carried out at this time as Canarc is seeking a strategic partner to advance the project to final feasibility and, if positive, to production.

The New Polaris Gold Project consists of 61 contiguous Crown-granted mineral claims and one modified grid claim covering 2,100 acres. All claims are 100% owned and held by New Polaris Gold Mines Ltd., a wholly owned subsidiary of Canarc Resource Corp., subject to a 15% net profit interest held by Rembrandt Gold Mines Ltd. Canarc can reduce this net profit interest to a 10% net profit. A Table of the claims is set out below.

Canarc Resource Corp.
Form 20-F

James Moors, P.Geo, Vice President Exploration of the Registrant, is the Qualified Person for the purposes of the foregoing technical disclosure on the New Polaris Gold Project. The information in the following summary on the New Polaris Gold Project has been derived in part from and is partially based on the assumptions, qualifications and procedures set out in the Technical Report titled "Resource Potential, New Polaris Project" (the "New Polaris Technical Report") dated March 14, 2007 and prepared by R.J. Morris, MSc, PGeo, of Moose Mountain Technical Services and G.H. Giroux, MAsC, PEng, of Giroux Consultants Limited, who are independent Qualified Persons as defined by National Instrument 43-101 ("NI 43-101") and was prepared in compliance with NI 43-101, to the best of the Registrant's knowledge.

The following extracted from, or are accurate paraphrasing of, the executive summary, or other sections as indicated from the New Polaris Technical Report, the full copy of which is available online at www.sedar.com as filed on March 16, 2007. Defined terms and abbreviations used herein and not otherwise defined shall have the meanings ascribed to such terms in the New Polaris Technical Report.

Summary

New Polaris (formerly Polaris-Taku) is an early Tertiary mesothermal gold mineralized body located in northwestern British Columbia about 100 kilometres south of Atlin, BC and 60 kilometres northeast of Juneau, Alaska. The nearest roads in the area terminate twenty kilometers due south of Atlin and 10 kilometres southeast of Juneau. Access at the present time is by aircraft. A short airstrip for light aircraft exists on the property.

The deposit was mined by underground methods from 1938 to 1942, and from 1946 to early 1951, producing a total of 740,000 tonnes of ore at an average grade of 10.3g/t gold.

The property consists of 61 contiguous Crown-granted mineral claims and one modified grid claim covering 2,100 acres. All claims are 100% owned and held by New Polaris Gold Mines Ltd., a wholly owned subsidiary of Canarc Resource Corp., subject to a 15% net profit interest held by Rembrandt Gold Mines Ltd. Canarc can reduce this net profit interest to a 10% net profit.

The deposit is composed of three sets of veins (quartz-carbonate stringers in altered rock), the "AB" veins are northwest striking and southwest dipping, the "Y" veins are north striking and dipping steeply east and finally the "C" veins are east-west striking and dipping to the south to southeast at 65° to vertical. The "C" veins appear to hook around to the north and south into the other two sets of veins so that their junctions form an arc. The gold is refractory and occurs dominantly in finely disseminated arsenopyrite grains that mineralize the altered wallrock and stockwork veins. The next most abundant mineral is pyrite, followed by minor stibnite and a trace of sphalerite. The zones of mineralization range from 15 to 250 metres in length and 0.3 to 14 metres in width.

Canarc explored the "C" vein system between 1988 and 1997, and carried out infill drilling in 2003 through 2006, to better define the continuity and grade of the vein systems.

The total New Polaris database consists of 1,056 diamond drill holes with a total of 31,514 sample intervals.

The geologic continuity of the C vein has been well established through historic mining and diamond drilling. Grade continuity was quantified using a geostatistical method called the semivariogram, which measures distances (ranges) and directions of maximum continuity. The four principle veins in the semivariogram model produced ranges between 50 and 90 metres, along strike and down plunge.

Sample Method and Approach, Sample Preparation, Analyses and Security, and Data Verification

Sampling of the vein was done by a wire line diamond drills using NQ-size rods. Drill collar locations were surveyed in by total station surveying method. Drilling azimuth and dip were set using a brunton compass and clinometer. Routine down hole measurements of azimuth and dip were not done on the three holes drilled in 2003 and prior. In 2004, three different down hole survey systems were tried before settling on a Reflex system. The Reflex system was also used in 2005. The down hole surveying was operated by the Hytech's drill crew. This information was entered into a GEMCOM program to plot the location of the collar and the pierce point of the veins.

23

Canarc Resource Corp.
Form 20-F

Core recovery was very good and ranged from the low 90% to nearly 100% and is a fair sampling of the mineralization at the point where the drill hole pierced the vein.

The vein mineralization has well marked contacts with the wall rock. The transition from mineralized to non mineralized rock occurs over a few centimeters. Free gold is extremely rare and to the end of 2005 had not been recognized in core samples. The majority of the gold occurs in arsenopyrite and to a lesser extent in pyrite and stibnite. Because there is no visible gold and the host sulphides are very fine grained and disseminated there is little nugget effect and gold values even over short intervals rarely exceed 1 opt. Out of 4700 samples with greater than 0.03 opt gold collected from core and the underground workings, only 185 samples had a value greater than 1 opt, the highest being 3.69 opt. For this reason, no cutting of assays has been done in calculating composites nor are there many cases where a composite sample is carried by a single assay.

Determining intervals of core for sampling was done by the geologist during logging of the core. The mineralized vein structures were marked out. Selections of core intervals for sampling were based in the presences of veining and sulphide mineralization particularly arsenopyrite. Within the defined vein structure sample interval ranged from 1 foot to 5 feet. Divisions were based on intensity of mineralization and veining. Sampling of the core for 10s of feet either side of the mineralized vein structures was also done to the point where hydrothermal alteration disappeared. No sampling of core from the unaltered rock was done.

The core was logged and stored in the camp. Access to the core was only available to the geologists and the core sampler. The core was brought from the drill set up to the logging facility by the geologist at the end of each shift. The core was geologically logged, recoveries calculated and samples marked out in intervals of 0.5 to 1 metre. The core was handed to the sample cutter who cut it with a diamond saw. Each sample was individually wrapped in plastic bags for shipment. The sample intervals were easily identified and correlate well with the drill logs.

The 2006 Quality Assurance, Quality Control program was similar to the previous programs in that samples were collected by employees of Canarc on site and shipped to ALS Chemex in Vancouver. For quality control and quality assurance, core samples were regularly mixed with blanks, duplicates, and standards. The program in the field was run in an efficient and proper manner following accepted engineering standards.

Mr. Morris, one of the authors, spent two days on the New Polaris property. While on the property, he examined underground workings to confirm the nature of mineralization, dimensions and extent of the vein system. He also viewed a selection of core from key holes drilled from the early 1990's to the end of 2006 and compared his observations with those documented in the drill logs. In both the case of the underground workings and the core, the author found that his observations confirmed that recorded in logs and sections. He also confirmed that core had been properly cut and stored. In addition to the site visit, a detailed review of the database was completed. Forty-one drill holes were selected from the C vein area, and the drill logs and assay sheets were compared with the database. Only minor differences were observed between the hard copy material and the database. As well, the input of the database into the modeling program was also checked. The procedures used in the development of the database follow accepted engineering standards.

Location Map

In April 2011, Canarc completed a preliminary economic assessment of the New Polaris property. The report which is dated April 10, 2011 is titled "New Polaris Project - Preliminary Assessment Update". J.H.Gray, P.Eng., R.J. Morris, M.Sc., P.Geo. and G.H. Giroux, M.A.Sc., P. Eng. were the Qualified Persons for that Report. The Qualified Person ("QP") pursuant to NI 43-101 for the updated preliminary economic assessment report is Jim Gray, P. Eng.

The Company has initiated its efforts on the application for an underground development and exploration program at the New Polaris project in 2011 and shall continue with such efforts in 2012 subject to securing a partner for the project and financing.

Other Mineral Projects

The following projects are considered not material by the Registrant and are not compliant with NI 43-101 unless otherwise stated. There is currently no ongoing or proposed exploration or development programs for the properties set out below, other than as specifically stated.

Tay-LP Property, Yukon, Canada

On August 24, 2009, Canarc entered into an option agreement with Ross River to acquire a 100% interest in the Tay-LP gold property, located in Yukon, by paying CAD\$1 million in cash and/or shares and spending CAD\$1.5

million on exploration over a three-year period which can occur in two stages. In the first stage, Canarc can earn a 51% interest by paying CAD\$150,000 in cash and spending CAD\$900,000 on exploration on or before October 31, 2011. In the second stage, Canarc can earn an additional 49%, thereby totalling a 100% interest, by paying CAD\$850,000 in cash or common shares at the Company's discretion and spending CAD\$600,000 on exploration on or before October 31, 2012. If Canarc does not proceed with the second stage, then a joint venture would be formed. Canarc shall pay to the optionors a gold bonus equal to CAD\$1 per ounce ("oz") of gold for all proven and probable gold reserves and measured and indicated gold resources to a maximum of 1 million oz gold. The option agreement is subject to a NSR totalling 3% which can be reduced to 1.5% by payments totalling US\$1.95 million. Commencing on or before October 31, 2009 and continuing on or before October 31 of each subsequent year until the property is put into commercial production, Canarc shall pay to the NSR holders an annual advance NSR royalty payments totalling CAD\$25,000 or that number of common shares of Canarc and which shall be deducted from NSR obligations. The NSR of 3% shall be subject to maximum total payments based on one million payable ounces of gold being mined by commercial production but will be reduced to 500,000 payable ounces of gold if the NSR was reduced to 1.5%.

25

Canarc Resource Corp.
Form 20-F

On September 3, 2011, Canarc and Ross River amended the option agreement by increasing the cash payment of CAD\$50,000 to CAD\$75,000 due by October 31, 2011 (paid), deferring the exploration expenditures of CAD\$500,000 from October 31, 2011 to October 31, 2012 and exploration expenditures of CAD\$600,000 from October 31, 2012 to October 31, 2013, and including a cash payment of CAD\$25,000 due by October 31, 2012.

Cash payments of CAD\$75,000 were paid in 2011 (2010 – CAD\$80,000) for option payments. Canarc issued 215,580 (2010 - 221,235) common shares at a value of CAD\$0.116 (2010 - CAD\$0.113) per common share as the annual advance NSR royalty for CAD\$25,000 for the Tay-LP property.

In late March 2010, Canarc entered into an option agreement with Cap-Ex whereby Cap-Ex can acquire 50% of Canarc's interest in the Tay-LP gold property by paying CAD\$100,000 of which CAD\$25,000 have been received, issuing 200,000 common shares of which 100,000 shares have been issued, incurring exploration expenditures of CAD\$675,000 by October 31, 2011, and maintaining Canarc's underlying option agreement in good standing until October 2011. Cap-Ex terminated the option agreement in March 2011.

Canarc completed a Phase 1 exploration program for 10 holes including 2,000 m of diamond drilling in the third and fourth quarters of 2009. The objective of the program was to extend known mineralization along strike and down-dip of existing gold intercepts in three principle target areas.

David St. C. Dunn, P.Geo., and James Moors, P.Geo, Vice President Exploration of the Registrant, are the Qualified Persons for the purposes of the technical disclosure on the Tay-LP property as set out in the Technical Report titled "2009 Diamond Drilling Program on the Tay-LP Property" dated March 30, 2010, prepared by David St. C. Dunn, P.Geo., and James G. Moors, PGeo (BC), Vice-President, Exploration, of the Registrant (the "Tay-LP Technical Report").

The following information is extracted from, or includes accurate paraphrasings of, the executive summary, or other sections as indicated, from the Tay-LP Technical Report, the full copy of which is available online at www.sedar.com as filed on April 1, 2010. Defined terms and abbreviations used herein and not otherwise defined shall have the meanings ascribed to such terms in the Tay-LP Technical Report.

Property Description

The Tay-LP project of Ross River Gold Ltd. is a gold exploration project, covering an area of approximately 8150 hectares, located in south-central Yukon near the Village of Ross River. The project comprises 413 mineral claims. The Tay-LP area was first staked, following a prospecting discovery in 1984. The property has since been explored intermittently by various companies for intrusion-related gold deposits. Gold is associated with pyrrhotite-dominant, quartz-sulphide veins and replacement zones hosted by folded Paleozoic meta-sedimentary rocks.

The 2009 exploration program was carried out between September 9th and September 25th and comprised 1868 metres of diamond drilling. Personnel included: one of the authors, James Moors, P.Geo., V.P. Exploration, Canarc Resource Corp.; Robin S. Tolbert, Project Geologist; Lyle Hansen, Assistant Geologist; and core cutters Robert Smallwood and John Dicks of Atlin. Diamond drilling was performed by Hy-Tech Diamond Drilling of Smithers, B.C.

A road accessible tent camp located near the centre of the property was the base of operations.

The cost of field work and analysis on the property in 2009 was \$480,000.

Canarc Resource Corp.
Form 20-F

Reserves or resources have not been calculated for the property.

The primary author was part of the 2003 Prospecting and Geochemical surveying program on the Tay-LP claims (Schmidt, U., 2004).

Summary

The Tay-LP project of Canarc Resource Corp. is a gold exploration project, covering an area of approximately 7575 hectares, located in south-central Yukon, approximately 50 km south of the Village of Ross River and 160 kilometres northeast of Whitehorse. The project comprises 410 contiguous mineral claims. Option agreements give Canarc the right to earn 100% of the property. The property is accessible by road during the summer months via the South Canol Road and a 20 km long dirt branch road.

The region surrounding the property is underlain by variably metamorphosed, folded and faulted Paleozoic miogeoclinal rocks of the Pelly-Cassiar Platform. They range in age from Late Proterozoic to Triassic and include miogeoclinal clastic, carbonate and volcanic rocks. They are considered North American in origin and were deformed during Mesozoic arc –continent collision. These rocks have been intruded by mid-Cretaceous intrusions of intermediate composition.

Gold mineralization on the property is hosted by Cambro-Ordovician calcareous phyllite, marble and schist. Mineralization fits the intrusion-related epigenetic gold mineralization model of the "Tintina Gold Belt", based on gold-bismuth-tellurium chemistry, mineralogy, tectonic setting and age of intrusion. Mineralization occurs in structurally controlled veins and in replacement zones which parallel and in some cases cross-cut the dominant foliation. The exploration objective is to define sufficient structurally controlled or skarn style gold mineralization to support a profitable mine.

The 2009 program consisted of 10 drill holes totaling 1868 metres, drilled in 3 target areas. Results confirmed the presence and continuity of gold bearing structures. The total cost of the field program for 2009 was \$480,000.

It is recommended that a first phase of work including an airborne geophysical survey with more advanced systems than those utilized in the 1999 survey should be carried out. This survey will better and more accurately define the geology beneath the glacial overburden that covers the most prospective portions of the property.

Ground Max-Min geophysical surveys should also be carried out to extend the known anomalies and test for mineralization on the peripheries of the known intrusive bodies. This work is estimated to take six weeks to complete at a cost of \$252,328.

Following the interpretation of the surveys recommended in Phase 1, a second phase of work consisting of systematic drilling along strike and down dip of current pierce points that returned significant gold content and along the full range of Max-Min and aerially defined geophysical anomalies. This program should consist of at least 2,500 meters of diamond drilling and is estimated to take eight weeks to complete at a cost of \$504,000.

Location Map

David St. C. Dunn, P.Geo., and James Moors, P.Geo, Vice President Exploration of the Registrant, are the Qualified Persons for the Tay-LP Technical Report.

In 2010, Cap-Ex completed a 470 kilometer airborne geophysical survey at Tay LP which identified several new EM conductors and magnetic anomalies within prospective geological settings. In March 2011, Cap-Ex terminated its option agreement with Canarc.

The new anomalies will require ground follow up and test new targets in 2012 prior to drilling, subject to financing.

Windfall Hills properties, British Columbia, Canada

In April 2011, as amended in March 2012, Canarc entered into two option agreements to purchase 100% interests in two adjacent gold properties located in British Columbia. Canarc can acquire a 100% interest in the Atna properties by making US\$750,000 in cash payments over a 4 year period (US\$58,333 paid), honouring a pre-existing 1.5% NSR production royalty that can be purchased for CAD\$1 million, and granting the vendor a 2% NSR production royalty.

28

Canarc Resource Corp.
Form 20-F

Canarc can acquire a 100% interest in the Dunn properties by making CAD\$250,000 in cash payments over a 4 year period (CAD\$23,333 paid), and a final bonus payment based on all gold resources estimated in an independent NI 43-101 technical report. The formula for the bonus payment is US\$30 per oz for measured resources, US\$20 per oz for indicated resources, and US\$10 per oz for inferred resources.

Canarc completed a Phase 1 exploration program on its Windfall Hills project which included detailed soil and rock geochemical sampling over known target areas in 2011. A total of 340 geochemical soil samples were collected on a 100 meter by 25 meter grid over the main 2.8 sq. km. prospect area. Two anomalies were delineated on the basis of multi-element geochemistry. Results of this work along with preliminary exploration work over the remainder of the claims will help define targets for drilling in 2012, subject to financing.

Devil's Thumb property, British Columbia, Canada

In May 2011, Canarc staked three gold properties, known as Devil's Thumb, totalling 17,175 hectares, which is located northeast of its Windfall Hills properties in central British Columbia.

Eskay Creek property, British Columbia, Canada

Canarc has a one-third carried interest in the Eskay Creek property which is located in the Skeena Mining Division, British Columbia, Canada. In fiscal 2005, Canarc elected to write-off the associated property costs, but continues to have a one-third carried interest in the Eskay Creek property.

Sara Kreek Property, Suriname

Canarc previously held an 80% interest in the shares of Sara Kreek Resource, the company which holds the Sara Kreek concession in Suriname. In April 2006, Canarc agreed to transfer all its interest in Sara Kreek Resource to Wylap Development in exchange for a cash payment of \$400,000 and the greater of \$50,000 per year or 1.5% royalty on annual gross production until December 31, 2011 in settlement of any claims, loans and advances owed to Canarc.

Canarc received royalties of \$50,000 per year from 2006 to 2011.

ITEM 4A. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

Management's discussion and analysis in this Item 5 are intended to provide the reader with a review of factors that affected the Registrant's performance during the years presented and factors reasonably expected to impact on future operations and results. The following discussion of the financial condition, changes in financial condition and results of operations of the Registrant for the two fiscal years ended December 31, 2011 and 2010 should be read in conjunction with the consolidated financial statements of the Registrant and related notes included therein.

The Registrant's consolidated financial statements are prepared in accordance with IFRS as issued by the IASB. IFRS 1 has been applied with an adoption date of January 1, 2011 and a transition date of January 1, 2010, and all dollar amounts are expressed in United States dollars unless otherwise indicated.

5.A Operating Results

Canarc Resource Corp.
Form 20-F

In accordance with an acceptable accounting policy under IFRS, all costs related to investments in mineral properties are capitalized on a property-by-property basis. Such costs include mineral property acquisition costs and exploration expenditures, net of any recoveries and write-downs.

The Registrant's ability to continue as a going concern is dependent on continued financial support from its shareholders and other related parties, the ability of the Registrant to raise equity financing, and the attainment of profitable operations, external financings and further share issuances to meet the Registrant's liabilities as they become payable and for settlement of expenditures.

The Registrant is not aware of any seasonality in the business that has a material effect upon its financial condition, results of operations or cash flows. The Registrant is not aware of any changes in the results of its operations that are other than those normally encountered in its ongoing business.

Fiscal Year 2011 – Year ended December 31, 2011 compared with December 31, 2010

Canarc incurred a net loss of \$1.2 million for the year ended December 31, 2011 which is lower than the net loss of \$1.4 million in fiscal 2010. Operating losses for each fiscal year were comparable, reflecting the continued activities of Canarc in seeking an appropriate joint venture partner for the New Polaris property and in pursuing new projects of merit, as gold prices reached new highs in 2011. Such efforts culminated in the accepted bid for the Relief Canyon project in early December 2010 which resulted in Canarc's acquisition of an assay laboratory and was then subsequently sold for full recovery of all out-of-pocket expenses. Corporate development activities were also successful in the acquisition of option interests in the Windfall Hills properties and the staking of additional properties nearby, as Canarc expanded its portfolio of strategic exploration projects in Canada in 2011.

Corporate development expenses in 2011 were higher primarily in relation to the accepted bid for the Relief Canyon project.

Remuneration for employees was higher in 2011 as Canarc continued to evaluate gold projects for acquisition purposes and to seek possible partners for the New Polaris project. Efforts in the first quarter of fiscal 2011 were also focused on an updated NI 43-101 technical report for the New Polaris gold project, which supported the project's robust economics in the preliminary economic assessment. Higher employee expenses were also attributed to staffing activities for conversion in accounting standards from Canadian generally accepted accounting principles ("Canadian GAAP") to IFRS, the Relief Canyon bid, and the acquisition and subsequent disposition of the commercial assay laboratory.

Effective January 1, 2011, Canarc determined that its functional currency has changed from the United States dollar to the Canadian dollar but continues to maintain its presentation currency in the United States dollar. Canarc recognizes foreign gains and losses on translation to the presentation currency as an equity item which is included in accumulated other comprehensive loss. In 2010, such translation gains and losses were recognized in operations.

General and administrative expenses were comparable for both fiscals 2011 and 2010. In 2011 legal fees were incurred in Canarc's bid for the Relief Canyon project, its acquisition of the assay laboratory in February 2011 including all title and permitting issues and to its subsequent sale in May 2011, and due to the convertible debenture with Effisolar in February 2011 which was converted into common shares in March 2011.

Shareholder relations activities increased in 2011 so as to promote greater awareness of the profile of Canarc and its portfolio of projects, especially the accepted bid for the Relief Canyon project, the New Polaris project with its revised preliminary economic assessment which indicated conceptually the project's stronger financial viability due to heightened gold prices, and property option agreements and staking of additional mineral property interests in British

Columbia.

Share-based payments were higher in 2011 due to the net effects of the input parameters for the stock option pricing model including the vesting provisions, stock volatility, forfeiture rates, risk free interest rates, and expected life. Although more stock options were granted in 2010 than in 2011, the fair values of the stock options granted in 2011 were higher than those granted in 2010.

In April and August 2010, Canarc disposed all of its shareholdings in Caza, a company sharing one common director, which are available-for-sale financial assets and were recorded at cost because such shares did not have a quoted market price at that time.

In 2011, Canarc wrote down good and services tax recoveries by \$25,000 as collectability of the recoveries was uncertain.

30

Canarc Resource Corp.
Form 20-F

Due diligence costs of \$60,000 in 2011 were incurred for Canarc's \$20,000 bi-weekly obligation to Firstgold during the due diligence period for the Relief Canyon project.

Canarc continues to accrue interests on its demand loans which bore interest rates that increased from 9% per annum to 12% per annum effective September 1, 2010, and interests on its estimated flow through indemnity obligation from ineligible Canadian exploration expenditures for flow through purposes.

The flow through financing item in 2010 is for the reduction in the estimated indemnity obligation for ineligible exploration expenditures. In August 2011, Canarc paid indemnifications of CAD\$37,883 including interests.

In 2010, derivative liabilities were recognized for warrants which have exercise prices stated in Canadian dollars whereas Canarc's functional currency was in U.S. dollars, resulting in a variable amount of cash in terms of its functional currency. Any reduction of the fair values of its derivative liability attributable to unexpired warrants would be recognized as unrealized gains. Effective January 1, 2011, Canarc's functional currency changed from the U.S. dollar to the Canadian dollar whereby there were no longer currency differences between Canarc's exercise prices of its warrants and its functional currency, and thus would not recognize any derivatives for its warrants.

The deferred income tax recovery is a provision for the difference between the accounting basis and tax basis of assets and tax pools, and for the recognition at the date of actual renunciation, by a reduction in the amount included in share capital for the flow-through shares for the deferred income taxes related to the deductions foregone by Canarc. In 2009, Canarc raised flow-through equity financing from a private placement for approximately CAD\$480,000 of which CAD\$475,239 were renounced on February 24, 2010. On February 22, 2011, Canarc renounced CAD\$4,761 in exploration expenditures for flow-through purposes, resulting in a deferred income tax expense of \$1,200.

Canarc also recognized an unrealized gain of \$71,000 in fiscal 2011 for its available-for-sale financial assets which were received for its optioned mineral property interest in Tay-LP with Cap-Ex.

Canarc has no sources of operating revenues.

As at December 31, 2011, Canarc has mineral property interests which are comprised of the following:

31

Canarc Resource Corp.
Form 20-F

(in \$000s)	British Columbia (Canada)			Yukon (Canada)	Total
	New Polaris	Windfall Hills	Devil's Thumb	Tay-LP	
Acquisition Costs:					
Balance, January 1, 2010	\$ 3,605	\$ —	—\$	25	\$ 3,630

Balance, December 31, 2010	3,605	—	—	74	3,679
Additions	—	67	6	72	145
Adjustments from change in functional currency	295	—	—	—	295
Balance, December 31, 2011	3,900	67	6	146	4,119
Deferred Exploration Expenditures:					
Balance, January 1, 2010	8,556	—	—	440	8,996
Additions, net of recoveries	104	—	—	(55)	49
Balance, December 31, 2010	8,660	—	—	385	9,045
Additions	166	106	15	48	335
Adjustments from change in functional currency	(541)	—	—	(10)	(551)
Balance, December 31, 2011	8,285	106	15	423	8,829
Mineral property interests, December 31, 2011	\$ 12,185	\$ 173	\$ 21	\$ 569	\$ 12,948

At December 31, 2011, to maintain its interest and/or to fully exercise the options under various property agreements covering its property interests, Canarc must incur exploration expenditures on the properties and/or make payments in the form of cash and/or shares to the optionors as follows:

32

Canarc Resource Corp.
Form 20-F

	Option Payments (CAD\$000s)	Option Payments (US\$000s)	Exploration Commitments (1) (CAD\$000s)	Advance Royalty Payments (CAD\$000s)	Net Smelter Reduction (US\$000s)	Number of Shares
New Polaris:						
Net profit interest reduction or buydown						150,000
Tay-LP:						
October 31, 2012	\$ 25		\$ 215			
October 31, 2013	850		600			
Annual advance royalty payments until commercial production				\$ 25		
Net smelter reduction from 3% to 1.5%					\$ 1,950	
Windfall Hills:						
Atna properties:						
April 12, 2012		\$ 100				
April 12, 2013		150				
April 12, 2014		200				
April 12, 2015		250				
Dunn properties:						
April 20, 2012	25					
April 20, 2013	35					
April 20, 2014	50					
April 20, 2015	125					
	\$ 1,110	\$ 700	\$ 815	\$ 25	\$ 1,950	150,000

(1) Exploration commitments for the Tay-LP property are adjusted for management fees of 5% and 10% and exploration expenditures incurred by Cap-Ex.

These amounts may be reduced in the future as Canarc determines which properties to continue to explore and which to abandon.

Environmental Liabilities

The Registrant's policy is to maintain all operations at North American standards, notwithstanding that certain of the countries within which it may operate may not yet have fully developed such standards in respect to environmental concerns. In accordance with government requirements in Canada, refundable deposits of CAD\$250,000 have been

placed with regulatory agencies in respect to the Registrant's New Polaris gold property in British Columbia. There are no known environmental contingencies in respect to these or any of the other Registrant's mineral property interests.

Critical Accounting Policies

For the Registrant's exploration activities, there is no product, sales or inventory in the conventional sense. The recoverability of costs capitalized to mineral properties and the Registrant's future financial success are dependent upon the extent to which it can discover mineralization and the economic viability of advancing such properties beyond the exploration stage. Such activities may take years to complete and the amount of resulting income, if any, is difficult to determine with any certainty. Many of the key factors are outside of the Registrant's control. The sales value of any mineralization discovered by the Registrant is largely dependent upon factors beyond the Registrant's control such as the market value of the metals.

33

Canarc Resource Corp.
Form 20-F

As the carrying value and amortization of mineral properties and capital assets are, in part, related to the Registrant's mineral reserves, the estimation of such reserves is significant to the Registrant's position and results of operations. As of the date of this annual report, the Registrant has not established any reserves on its property interests.

In accordance with an acceptable accounting policy under IFRS, all costs related to investments in mineral properties are capitalized on a property-by-property basis. Such costs include mineral property acquisition costs and exploration and development expenditures, net of any recoveries. The costs related to a property from which there is production, together with the costs of mining equipment, will be amortized using the unit-of-production method. When there is little prospect of further work on a property being carried out by the Registrant or its partners or when a property is abandoned or when the capitalized costs are not considered to be economically recoverable, the related property costs are written down to the amount recoverable. The amounts for mineral properties as shown in the Registrant's consolidated financial statements represent costs incurred to date, less write-downs, and are not intended to reflect present or future values.

The Registrant accounts for share-based payments using a fair value-based method with respect to all stock-based payments to directors, employees and non-employees. Share-based payments to employees are measured at the fair value of the instruments issued and amortized over the vesting periods. Share-based payments to non-employees are measured at the fair value of the goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The offset to the recorded cost is to the reserve for share-based payments. Consideration received on the exercise of stock options is recorded as share capital and the related reserve for share-based payments is transferred to share capital. Upon expiry, the recorded fair value is transferred from reserve for share-based payments to deficit.

5.B Liquidity and Capital Resources

The Registrant is in the exploration stage and has not yet determined whether its mineral properties contain reserves that are economically recoverable. The recoverability of amounts capitalized for mineral properties is entirely dependent upon the existence of economically recoverable reserves, the ability of the Registrant to obtain the necessary financing to complete the development and upon future profitable production. The Registrant knows of no trends, demands, commitments, events or uncertainties that may result in the Registrant's liquidity either materially increasing or decreasing at the present time or in the foreseeable future. Material increases or decreases in the Registrant's liquidity are substantially determined by the success or failure of the Registrant's exploration programs and overall market conditions for smaller mineral exploration companies. Since its incorporation in 1987, the Registrant has endeavoured to secure mineral properties that in due course could be brought into production to provide the Registrant with cash flow which would be used to undertake work programs on other projects. To that end, the Registrant has expended its funds on mineral properties that it believes have the potential to achieve cash flow within a reasonable time frame. As a result, the Registrant has incurred losses during each of its fiscal years since incorporation. This result is typical of smaller exploration companies and will continue unless positive cash flow is achieved.

The following table contains selected financial information of Canarc's liquidity:

(in \$000s)	December 31,	
	2011	2010
Cash	\$45	\$592
Working capital (deficiency)	\$(577)	\$(1,149)

Ongoing operating expenses continue to reduce Canarc's cash resources and working capital.

In February 2011, Canarc issued a convertible debenture for CAD\$300,000 to Effisolar for the interest free loan from Effisolar, which was then converted into 1,282,051 common shares of Canarc on March 2, 2011. The funds were then used to acquire the assay laboratory for a total of \$600,000 of which \$300,000 were previously advanced in December 2010.

34

Canarc Resource Corp.
Form 20-F

In May 2011, Canarc entered into an agreement for the sale of assay laboratory for \$600,000 plus recovery of out-of-pocket expenses incurred by Canarc and such funds were received in June 2011.

During fiscal 2011, stock options for 299,000 common shares were exercised for proceeds of CAD\$32,125 and warrants for 1,313,650 common shares for CAD\$198,488, all of which contributed to Canarc's working capital needs during the year.

Canarc received \$50,000 in royalties from the Sara Kreek project in fiscal 2011, which is the final year of such royalties from the project.

In fiscal 2011, Canarc recognized an unrealized gain of \$71,000 from its available-for-sale financial assets which were all disposed in January and February 2012 for proceeds of approximately CAD\$92,400.

In May 2009, Canarc received CAD\$62,030 in demand loans from certain directors and an officer of Canarc. The loans are repayable on demand and bear an interest rate of 9% per annum which was increased to 12% effective September 1, 2010, and were previously secured by Canarc's shareholdings in Caza at CAD\$0.25 per share of Caza which has been replaced by a loan bonus of 12% payable upon repayment effective September 1, 2010. As at December 31, 2011, Canarc accrued CAD\$19,800 in interests and CAD\$7,400 in loan bonuses.

At December 31, 2010, a derivative liability of \$1,082,000 for warrants which have exercise prices denominated in Canadian dollars was recognized whereas no derivative liability was recognized due to the change in Canarc's functional currency from U.S. dollars to Canadian dollars effective January 1, 2011. This was a primary factor in the decrease in Canarc's working capital deficiency in 2011.

The working capital deficiency of \$577,000 at December 31, 2011 includes the notes payable with accrued interests and accrued loan bonus totalling \$88,000 due to certain directors and an officer of Canarc and flow-through indemnities of \$195,000. In August 2011, Canarc did pay indemnifications of CAD\$37,883 including interests for ineligible exploration expenditures for flow through purposes which reduced such obligations in 2011 in comparison to 2010.

In March 2012, Canarc arranged demand loans of CAD\$200,000 from certain directors and an officer of Canarc. The loans are repayable on demand and bear an interest rate of 12% compounded monthly with interest payable semi-annually.

In 2012, Canarc received proceeds of CAD\$35,600 from the exercise of stock options for 346,000 common shares.

Canarc has entered into a number of option agreements for mineral properties that involve payments in the form of cash and/or shares of Canarc as well as minimum exploration expenditure requirements. Under Items 5.A and 5.F, further details of contractual obligations are provided as at December 31, 2011. Canarc will continue to rely upon equity financing as its principal source of financing its projects.

5.C Research and Development, Patents and Licenses, etc.

The Registrant does not currently carry out research and development activities.

Items 4.A, 4.D, 5.A and 5.F provide details of the Registrant's mineral property exploration activities, acquisitions and write-downs.

5.D Trend Information

The Registrant knows of no trends, demand, commitments, events or uncertainties that are reasonably likely to have a material effect on the Registrant's net sales or revenues, income from continuing operations, profitability, liquidity or capital resources or that would cause financial information not necessarily to be indicative of future operating results or financial condition.

The Registrant currently has no active business operations that would be affected by recent trends in productions, sales, etc. The Registrant has no material net sales or revenues that would be affected by recent trends other than the general effect of mineral prices on its ability to raise capital and those other general economic items as set out in Item 3.D.

35

Canarc Resource Corp.
Form 20-F

5.E Off-Balance Sheet Arrangements

There are no known significant or material off-balance sheet arrangements other than those disclosed in this Form 20-F and in the Registrant's audited consolidated financial statements for the year ended December 31, 2011.

Shareholder Rights Plan

On May 31, 2005, the shareholders of the Registrant approved a shareholder rights plan (the "Plan"), that became effective on April 30, 2005. The Plan is intended to ensure that any entity seeking to acquire control of the Registrant makes an offer that represents fair value to all shareholders and provides the board of directors with sufficient time to assess and evaluate the offer, to permit competing bids to emerge, and, as appropriate, to explore and develop alternatives to maximize value for shareholders. Under the Plan, each shareholder at the time of the Plan's adoption was issued one Right for each common share of the Registrant held. Each Right entitles the registered holder thereof, except for certain "Acquiring Persons" (as defined in the Plan), to purchase from treasury one common share at a 50% discount to the prevailing market price, subject to certain adjustments intended to prevent dilution. The Rights are exercisable after the occurrence of specified events set out in the Plan generally related to when a person, together with affiliated or associated persons, acquires, or makes a take-over bid to acquire, beneficial ownership of 20% or more of the outstanding common shares of the Registrant. The Rights expire on April 30, 2015. Item 10.B provides further details.

Share Appreciation Rights

At the discretion of the Board, certain option grants provide the option holder the right to receive the number of common shares, valued at the quoted market price at the time of exercise of the stock options, that represent the share appreciation since granting the options.

5.F Tabular Disclosure of Contractual Obligations

As the Registrant performs exploration on its properties, it decides which ones to proceed with and which ones to abandon. Accordingly, the minimum expenditure commitments are reduced as the Registrant narrows its interests. To fully exercise the options under various agreements for the acquisition of interests in properties located in Canada, the Registrant must incur exploration expenditures on the properties and make payments to the optionors as follows as at December 31, 2011:

36

Canarc Resource Corp.
Form 20-F

Edgar Filing: CANARC RESOURCE CORP - Form 20-F

	Payments due by Period (CAD\$ 000s)				Payments due by Period (US\$ 000s)				Others Amount		Number of Shares		
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years		CAD\$ 000s)	US\$ (\$ 000s)
New Polaris :													
Net profit interest reduction or buydown	\$	-\$	-\$	-\$	-\$	-\$	-\$	-\$	-\$	-\$	-\$	-\$	— 150,000
Tay-LP :													
Option payments	875	25	850	—	—	—	—	—	—	—	—	—	—
Exploration expenditures	815	215	600	—	—	—	—	—	—	—	—	—	—
Annual advance royalty payments until commercial production	—	—	—	—	—	—	—	—	—	—	25	—	—

Windfall Hills :													
Atna properties :													
Option payments	—	—	—	—	—	700	75	625	—	—	—	—	—
Dunn properties :													
Option payments	235	25	210	—	—	—	—	—	—	—	—	—	—
Total	\$ 1,925	\$ 265	\$ 1,660	\$	-\$	700	\$ 75	\$ 625	\$	-\$	-\$ 25	\$ 1,950	150,000

These amounts may be reduced in the future as the Registrant determines which properties continue to be of merit and abandons those with which it does not intend to proceed.

5.G Safe Harbor

This document may contain forward-looking statements. See “Caution – Forward-Looking Statements” at the beginning of this annual report. The Registrant desires to take advantage of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and is including this statement for the express purpose of availing itself of the protections of the safe harbor with respect to all forward-looking statements. Several important factors, in addition to the specific factors discussed in connection with such forward-looking statements individually, could affect the future results of the Registrant and could cause those results to differ materially from those expressed in the forward-looking statements contained herein.

The Registrant’s estimated or anticipated future results or other non-historical facts are forward-looking and reflect the Registrant’s current perspective of existing trends and information. These statements involve risks and uncertainties that cannot be predicted or quantified, and consequently actual results may differ materially from those expressed or implied by such forward-looking statements. Such risks and uncertainties include, among others:

- risks related to our exploration and development activities;
- risks related to the ongoing financing of our planned operations;
- risks related estimates of mineral deposits;
- risks related to fluctuations in mineral prices;
- risks related to the title of our properties;
- risks related to the highly competitive mineral exploration and mining industry;
- risks related to potential conflicts of interest with our officers and directors;
- risks related to environmental and regulatory requirements;
- risks related to foreign currency fluctuations;
- risks related to the Registrant’s possible status as a passive foreign investment company;

37

Canarc Resource Corp.
Form 20-F

risks related to the volatility of the Registrant's common stock; and
risks related to the possible dilution of our common stock,

as well as other risks and uncertainties detailed in this report and from time to time in the Registrant's other Securities and Exchange Commission ("SEC") filings.

Therefore, the Registrant cautions each reader of this document to consider carefully these factors as well as the specific factors that may be discussed with each forward-looking statement in this document or disclosed in the Registrant's filings with the SEC as such factors, in some cases, could affect the ability of the Registrant to implement its business strategy and may cause actual results to differ materially from those contemplated by the statements expressed therein. Forward-looking statements are subject to a variety of risks and uncertainties including, but not limited to, the risks referred under the section "Risk Factors" under Item 3.D above.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

6.A Directors and Senior Management

In accordance with the provisions of the Business Corporations Act (British Columbia) the overall control of the business and affairs of the Registrant is vested in its board of directors. The board of directors of the Registrant currently consists of five members elected by the shareholders of the Registrant at each annual meeting of shareholders of the Registrant.

The directors and senior management of the Registrant as of April 27, 2012 are:

Name and Province/State and Country of Residence	Principal Occupation and Occupation during the Past 5 Years (1)	Current Position with the Registrant and Period of Service
COOKE, Bradford British Columbia, Canada	Chief Executive Officer and Director of Canarc Resource Corp. (since January 22, 1987); Chairman of Canarc Resource Corp. (since January 1, 2006); President of Canarc Resource Corp. (from January 22, 1987 to January 1, 2006); Chairman, Chief Executive Officer and Director of Endeavour Silver Corp. (since July 25, 2002).	Chief Executive Officer and Director (since January 22, 1987); Chairman (since January 1, 2006)
BULLOCK, Derek (2) Ontario, Canada	Mining Consultant	Director (since March 12, 1996)
HARRIS, Leonard (2) Colorado, U.S.A.	Retired	Director (since June 5, 2001)
PRICE, William (2) California, U.S.A.	Retired; Chairman of William L. Price Charitable Foundation; Formerly Chairman, CEO and Chief Investment Officer of RCM Capital	Director (since May 31, 2005)

BRIED, Bruce (2)
British Columbia, Canada

Management LLC (formerly Dresdner
RCM Global Investors LLC);
Formerly Global Equity Chief Investment
Officer of Allianz Global Investors AG
President and Chief Operating Officer of Director
Canarc Resource Corp. (since June 1, 2008)
(from February 15, 2007 to May 31,
2008);
Vice-President, Mining, for Endeavour
Silver Corp.
(from March 2005 to February 2007)

38

Canarc Resource Corp.
Form 20-F

Name and Province/State and Country of Residence	Principal Occupation and Occupation during the Past 5 Years (1)	Current Position with the Registrant and Period of Service
BILES, Garry British Columbia, Canada	Vice-President, Mining, of Canarc Resource Corp. (from March 1, 2007 to May 31, 2008); General Manager of Glencairn Gold Corp. (from April 2005 to January 2007)	President and Chief Operating Officer (since June 1, 2008)
MOORS, James British Columbia, Canada	Exploration Manager for Canarc Resource Corp. (from April 2002 to May 2005)	Vice-President, Exploration (since June 2005)
LOCKWOOD, Stewart British Columbia, Canada	Barrister & Solicitor, Vector Corporate Finance Lawyers	Secretary (since 1994)
WILSON, Gregg British Columbia, Canada	Manager (Investor Relations) of Canarc Resource Corp. (from January 2000 to May 2011); Vice-President and/or Manager of Investor Relations of Caza Gold Corp. (since June 2008)	Vice-President (Investor Relations) (since June 2011)
YEE, Philip British Columbia, Canada	Chief Financial Officer, Vice-President (Finance) and Director of Caza Gold Corp. (since November 2007); Chief Financial Officer and Vice-President (Finance) of Parallel Resources Ltd. (since November 2009 to October 2011); Finance Manager and/or Controller for Canarc Resource Corp. (from May 2003 to June 2005); Chief Financial Officer, Finance Manager and/or Controller for Endeavour Silver Corp. (from May 2003 to February 2007)	Chief Financial Officer and Vice-President (Finance) (since June 2005)

(1) Unless otherwise stated above, each of the above-named persons has held the principal occupation or employment indicated for at least five years.

(2) Members of the Audit Committee.

No director or officer has any family relationship with any other director or officer. The term of office of each of the directors will continue until the next annual general meeting, or until his successor is duly elected, unless his office is vacated in accordance with the articles of the Registrant. Officers hold office at the pleasure of the directors.

To the best of the Registrant's knowledge, there are no arrangements or understandings with major shareholders, customers, suppliers or others, pursuant to which any of the Registrant's officers or directors was selected as an officer or director of the Registrant.

6.B Compensation

Statement of Executive Compensation

39

Canarc Resource Corp.
Form 20-F

The Registrant is required, under applicable securities legislation in Canada, to disclose to its shareholders details of compensation paid to its directors and officers. The following fairly reflects all material information regarding compensation paid to the Registrant's directors and officers that has been disclosed to the Registrant's shareholders under applicable Canadian law.

During the fiscal period ended December 31, 2011, the aggregate compensation incurred by the Registrant to all individuals who were directors and officers, at the time of their remuneration, in all capacities as a group was CAD\$801,209.

The table below discloses information with respect to executive compensation paid by the Registrant to its directors and officers for the fiscal year ended December 31, 2011. The following table sets forth, for the periods indicated, the compensation of the directors and officers.

**SUMMARY OF COMPENSATION

Notes:

- (1) Includes the dollar value of cash and non-cash base salary earned during a financial year covered.
- (2) The amount represents the fair value, on the date of grant and on each vesting date, as applicable, of awards made under the Company's Stock Option Plan. The grant date fair value has been calculated using the Black Scholes Option Pricing Model in accordance with IFRS.
- (3) These amounts include annual non-equity incentive plan compensation, such as bonuses and discretionary amounts for the year ended December 31, 2011.
- (4) N/A.
- (5) N/A.
- (6) These amounts cover all compensation other than amounts already set out in the table for the year ended December 31, 2011 and include directors fees, as applicable, and annual bonuses for prior year's performance, if any.

40

Canarc Resource Corp.
Form 20-F

- (7) These amounts include dollar value of total compensation for the covered year. This is the sum of all amounts reported in columns with footnotes 1 to 6 above for each director and officer.
- (8) Legal fees charged to the Company by a law firm in which Mr. Stewart Lockwood is a partner.
- (9) Mr. Gregg Wilson was appointed Vice-President (Investor Relations) in June 2011.

The following table sets forth information concerning outstanding stock options under the Registrant's Stock Option Plan as at December 31, 2011 to each director and officer of the Registrant. No SARs were outstanding.

Options and Stock Appreciation Rights ("SARs")

The following table discloses incentive stock options which were granted to directors and officers during the fiscal year ended December 31, 2011:

**SUMMARY OF STOCK OPTIONS
GRANTED TO DIRECTORS AND OFFICERS
From January 1, 2011 to December 31, 2011**

Name and Principal Position	Date of Grant	Title of Underlying Security	Number of Underlying Security	Exercise Price per Share (CAD\$)	Expiry Date
Bradford J. Cooke Chief Executive Officer, Chairman and Director	July 6, 2011	Common shares	350,000	\$0.135	July 6, 2016
Derek Bullock Director	July 6, 2011	Common shares	175,000	\$0.135	July 6, 2016
Leonard Harris Director	July 6, 2011	Common shares	175,000	\$0.135	July 6, 2016
William Price Director	July 6, 2011	Common shares	175,000	\$0.135	July 6, 2016
Bruce Bried Director	July 6, 2011	Common shares	175,000	\$0.135	July 6, 2016
Garry Biles President and Chief Operating Officer	July 6, 2011	Common shares	275,000	\$0.135	July 6, 2016
James Moors Vice-President, Exploration	July 6, 2011	Common shares	200,000	\$0.135	July 6, 2016
Stewart Lockwood Secretary	July 6, 2011	Common shares	125,000	\$0.135	July 6, 2016
Gregg Wilson Vice-President (Investor Relations)	July 6, 2011	Common shares	175,000	\$0.135	July 6, 2016
Philip Yee Chief Financial Officer and Vice-President (Finance)	July 6, 2011	Common shares	225,000	\$0.135	July 6, 2016

Note: The above stock option grant is subject to a vesting provision in which 20% of the options vest immediately and 20% vest every six months.

41

Canarc Resource Corp.
Form 20-F

At the discretion of the directors, certain option grants provide the holder with the right to receive the number of common shares, valued at the quoted market price at the time of exercise of the stock options, that represent the share appreciation since granting the options. For the 2011 fiscal year, no share appreciation rights for common shares were exercised by option holders who were directors or officers of the Registrant at the time of exercise.

Pension Plan

The Registrant does not have any pension plan arrangements in place.

Report on Executive Compensation

The Registrant's executive compensation program is administered by the board of directors (the "Board").

Compensation of Directors

Bradford J. Cooke, the Chief Executive Officer and a Director of Canarc, receives a cash compensation as consideration for his duties as an operating officer of Canarc as disclosed in the Summary Compensation Table above.

At a Board of Directors' meeting held on June 17, 2004, it was resolved that each director shall earn a remuneration of CAD\$2,000 per quarter as compensation in his capacity as a director effective January 1, 2004.

During the fiscal year ended December 31, 2011, Canarc granted stock options to directors for up to 2,050,000 common shares in which such options have an exercise price of CAD\$0.135 and an expiry date of July 6, 2016 and are subject to vesting provision in which 20% of the options vest immediately and 20% vest every six months.

Executive Compensation Program

The Registrant's executive compensation program is based on a pay for performance philosophy. The executive compensation program is designed to encourage, compensate and reward employees on the basis of individual and corporate performance, both in the short and the long term. Base salaries are set at levels which are competitive with the base salaries paid by companies within the mining industry having comparable capitalization to that of the Registrant, thereby enabling the Registrant to compete for and retain executives critical to the Registrant's long term success. Incentive compensation is directly tied to corporate and individual performance. Share ownership opportunities are provided to align the interests of executive officers with the longer term interests of shareholders.

Compensation for directors and officers, as well as for executive officers as a whole, consists of a base salary, along with annual incentive compensation in the form of an annual bonus, and a longer term incentive in the form of stock options. As an executive officer's level of responsibility increases, a greater percentage of total compensation is based on performance (as opposed to base salary and standard employee benefits) and the mix of total compensation shifts towards stock options, thereby increasing the mutuality of interest between executive officers and shareholders.

No funds were set aside or accrued by the Registrant or its subsidiaries during the year ended December 31, 2011 to provide pension, retirement or similar benefits for directors or officers of the Registrant pursuant to any existing plan provided or contributed to by the Registrant or its subsidiaries under applicable Canadian laws.

Base Salary

The Board approves ranges for base salaries for employees at all levels of the Registrant based on reviews of market data from peer groups and industry in general. The level of base salary for each employee within a specified range is

determined by the level of past performance, as well as by the level of responsibility and the importance of the position to the Registrant.

The Registrant's Chief Executive Officer prepares recommendations for the Board with respect to the base salary to be paid to the CEO and other senior executive officers. The CEO's recommendations for base salaries for the senior executive officers, including the Chief Executive Officer, President and Chief Operating Officer, Vice-President of Exploration, Vice-President of Investor Relations, and the Chief Financial Officer, are then submitted for approval by the Board.

42

Canarc Resource Corp.
Form 20-F

Bonus

The Board annually evaluates performance and allocates an amount for payment of bonuses to executive officers and senior management. The aggregate amount for bonuses to be paid will vary with the degree to which targeted corporate performance was achieved for the year. The individual performance factor allows the Registrant effectively to recognize and reward those individuals whose efforts have assisted the Registrant to attain its corporate performance objective.

The CEO prepares recommendations for the Board with respect to the bonuses to be paid to the executive officers and to senior management.

No bonuses were distributed nor paid to executive officers and senior management of Canarc in the 2010 and 2011 fiscal years.

Stock Options

A Stock Option Plan is administered by the Board. The Stock Option Plan is designed to give each option holder an interest in preserving and maximizing shareholder value in the longer term, to enable the Registrant to attract and retain individuals with experience and ability, and to reward individuals for current performance and expected future performance. The Board considers stock option grants when reviewing executive officer compensation packages as a whole.

Other Compensation

Bradford J. Cooke, CEO, Chairman and Director of the Registrant, is a party to an arrangement with Endeavour Silver Corp. ("Endeavour") whereby Endeavour is reimbursed for time spent by Mr. Cooke on a cost recovery basis. There are no specific terms relating to severance or notice beyond what may be provided by statute or common law. During the financial year ended December 31, 2011, Canarc incurred CAD\$35,843 in salary paid or payable to Endeavour for services rendered by Mr. Cooke.

Directors' and Officers' Liability Insurance

In fiscal 2011, the Registrant acquired an insurance policy for itself and its directors and officers against liability incurred by them in the performance of their duties as directors and officers of the Registrant. The policy has a CAD\$1,000,000 limit of liability, retentions ranging from CAD\$nil to CAD\$50,000, and a policy period from December 31, 2010 to January 1, 2012 for a premium of CAD\$20,450. The insurance was renewed for a term from January 1, 2012 to January 1, 2013 for a premium of CAD\$16,500.

Performance Graph

Shareholder Return Performance Graph

The graph below compares the yearly percentage change in the cumulative total shareholder return on the Registrant's common shares against the cumulative total shareholder return of the Toronto Stock Exchange 300 Total Return Index for the period commencing December 31, 2006 and ending December 31, 2011.

Comparison of Total Shareholder Return on Common Shares
of the Registrant and the Toronto Stock Exchange Indice
(based on Canadian Funds)

The graphs assume that the initial value of the investment on the TSX Toronto Stock Exchange in the Registrant's common shares and in the indice was \$100 on the initial date.

6.C Board Practices

Statement of Corporate Governance Practices

The Registrant is required to report annually to its shareholders on its corporate governance practices and policies with reference to National Policy 58-201, Corporate Governance Guidelines (the "Policy") and National Instrument 58-101, Disclosure of Corporate Governance Practices, as adopted by the Canadian Securities Administrators, and effective June 30, 2005.

The Board of Directors

The Board currently consists of five directors, of which four directors (Bruce Bried, Derek Bullock, Leonard Harris and William Price) are currently "independent" in the context of the Policy. Bradford J. Cooke is not independent because he is the Chief Executive Officer of the Registrant.

Certain directors of the Registrant are presently directors of other issuers that are reporting issuers (or the equivalent) in any jurisdiction including foreign jurisdictions, as follows:

Director Bradford Cooke	Other Reporting Issuers Endeavour Silver Corp. Radius Gold Inc. Caza Gold Corp.
Derek Bullock	IAMGOLD Corporation
Leonard Harris	Cardero Resource Corp. Coronet Metals Inc. Solitario Exploration & Royalty Corp. Sulliden Gold Corporation Ltd. Endeavour Silver Corp. Abzu Gold Ltd. Golden Arrow Resources Corporation Indico Resources Ltd. Wealth Minerals Ltd. Trevali Mining Corporation Golden Alliance Resources Corp.
William Price	n/a
Bruce Bried	International Montoro Resources Inc.

Canarc Resource Corp.
Form 20-F

The independent directors do not hold regularly scheduled meetings at which non-independent directors and members of management are not in attendance. However, during the course of a directors' meeting, if a matter is more effectively dealt with without the presence of members of management, the independent directors ask members of management to leave the meeting, and the independent directors then meet.

Bradford J. Cooke is the Chairman of the Board of Directors of Canarc. William Price, as an independent director, was appointed the Lead Director of the Board, with the mandate to ensure that the Board's Agenda will enable it to successfully carry out its duties and to do so without interference from the Chairman of the Board that could result from potential conflicts from his status as a non-independent Board member.

Since January 1, 2007, the Registrant has held board meetings at least quarterly and at which the majority, if not all, Board members have attended, either in person or by telephone conference call, during the time in which they were directors of the Registrant.

Board Mandate

The Board of Directors is responsible for supervising management in carrying on the business and affairs of the Registrant. Directors are required to act and exercise their powers with reasonable prudence in the best interests of the Registrant. The Board agrees with and confirms its responsibility for overseeing management's performance in the following particular areas:

- the strategic planning process of the Registrant;
- identification and management of the principal risks associated with the business of the Registrant;
- planning for succession of management;
- the Registrant's policies regarding communications with its shareholders and others; and
- the integrity of the internal controls and management information systems of the Registrant.

In carrying out its mandate, the Board relies primarily on management to provide it with regular detailed reports on the operations of the Registrant and its financial position. The Board reviews and assesses these reports and other information provided to it at meetings of the Board and/or of its committees. The Chairman and CEO is a member of the Board, giving the Board direct access to information in his areas of responsibility. Other management personnel regularly attend Board meetings to provide information and answer questions. Directors also consult from time to time with management and have, on occasion, visited the properties of the Registrant. The reports and information provided to the Board include details concerning the monitoring and management of the risks associated with the Registrant's activities, such as compliance with safety standards and legal requirements, environmental issues and the financial position and liquidity of the Registrant. At least annually, the Board reviews management's report on its business and strategic plan and any changes with respect to risk management and succession planning.

Position Descriptions

The Board of Directors has not yet developed written position descriptions for the Chairman, the chairman of any Board committees, the CEO, the President or the CFO. The Board is of the view that given the size of the Registrant, the relatively frequent discussions between Board members, the CEO, the President and the CFO and the experience of the individual members of the Board, the responsibilities of such individuals are known and understood without position descriptions being reduced to writing. The Board will evaluate this position from time to time, and if written position descriptions appear to be justified, they will be prepared.

Canarc Resource Corp.
Form 20-F

Orientation and Continuing Education

The Board does not have a formal policy relating to the orientation of new directors and continuing education for directors. The appointment of a new director is a relatively infrequent event in the Registrant's affairs, and each situation is addressed on its merits on a case-by-case basis. The Registrant has a relatively restricted scope of operations, and most candidates for Board positions will likely have past experience in the mining business; they will likely be familiar therefore with the operations of a resource company of the size and complexity of the Registrant. The Board, with the assistance of counsel, keeps itself apprised of changes in the duties and responsibilities of directors and deals with material changes of those duties and responsibilities as and when the circumstances warrant. The Board will evaluate these positions, and if changes appear to be justified, formal policies will be developed and followed.

Ethical Business Conduct

The Registrant has adopted a whistle blower policy, which is set out in its Charter of the Audit Committee which is available for viewing on SEDAR as a schedule to the Registrant's Annual Information Form dated March 23, 2012.

Nomination of Directors

The Board has neither a formal policy for identifying new candidates for Board nomination. If and when the Board determines that its size should be increased or if a director needs to be replaced, the nomination committee meeting shall be convened. The terms of reference of such a committee will be determined, but are expected to include the determination of the independence of the candidate, his or her experience in the mining business and compatibility with the other directors.

Compensation

Taking into account the Registrant's present status as an exploration-stage enterprise, the Board of Directors reviews the adequacy and form of compensation provided to Directors on a periodic basis to ensure that the compensation is commensurate with the responsibilities and risks undertaken by an effective director.

Other Board Committees

Aside from the Audit Committee which has previously been established, the Board has tentatively established committees for Compensation and Nomination and Technical, Environmental, Social and Safety in 2011 comprised of the following Board members and the proposed mandates:

Committee	Members	Mandate
Nomination	Derek Bullock (Chairman) William Price	The function of the Nominating Committee (the "Committee") is to identify individuals qualified to become board members and to select, or to recommend that the Board of Directors select, the director nominees for the next annual meeting of stockholders, to oversee the selection and composition of committees of the Board of Directors and to oversee management continuity planning processes.
Compensation	L e o n a r d H a r r i s (Chairman) William Price	The Compensation Committee shall advise and make recommendations to the Board of Directors in its oversight role with respect to the Company's strategy,

Technical,
Environmental, Social,
Safety

Bruce Bried

policies and programs on the compensation and development of senior management and directors. The Technical, Environmental, Social and Safety Committee shall advise and make recommendations in its oversight role with respect to technical, environmental, social and safety issues affecting the Company and its advanced mineral exploration projects.

46

Canarc Resource Corp.
Form 20-F

The Board has also tentatively proposed a Disclosure Committee to be comprised of the following management persons and the proposed mandate:

Members	Mandate
Chief Executive Officer or President, and Vice-President or Manager of Investor Relations	<p>A Disclosure Policy Committee oversees corporate disclosure practices and ensures implementation and adherence to this policy. The Disclosure Policy Committee's responsibilities include:</p> <ul style="list-style-type: none"> • maintaining an awareness and understanding of governing disclosure rules and guidelines, including any new or pending developments; • developing and implementing procedures to regularly review; • update and correct corporate disclosure information, including information on the Internet website; • bringing this policy to the attention of directors, management and staff; • monitoring compliance with this policy and undertaking reviews of any violations, including assessment and implementation of appropriate consequences and remedial actions; • reviewing this policy and updating as necessary and appropriate to ensure compliance with prevailing rules and guidelines; and <p style="text-align: center;">ascertaining whether corporate developments constitute material information and, if so, ensuring compliance with the procedures outlined in this policy.</p>

The charters for the above-noted committees have not been fully implemented by the Board of Directors.

Assessments

The Board has no formal process for the assessment of the effectiveness and contribution of the individual directors. Each director has extensive public company experience and is familiar with what is required of him. Frequency of attendance at Board and committee meetings and the quality of participation in such meetings are two of the criteria by which the performance of a director will be assessed.

6.D Employees

The Registrant's business is administered principally from its head office in Vancouver, British Columbia, Canada. As of April 27, 2012, the Registrant had a staff of two full time and six part time employees based in Vancouver, BC, Canada.

6.E Share Ownership

As at April 27, 2012, the share ownership and number of stock options of the directors and officers of the Registrant are as follows:

Stock Option/Share Incentive Plan

The Registrant's directors and shareholders have approved a Share Incentive Plan (the "Plan"). The Plan was initially approved by the TSX in 1996. The principal purposes of the Plan are to promote a proprietary interest in the Registrant among its directors, officers and employees; to retain, attract and motivate the qualified managers of the Registrant; to provide a long-term incentive element in overall compensation; and to promote the long-term profitability of the Registrant.

Incentives to participate under the Plan may be provided by the granting of share options or share appreciation rights (SARs). The share appreciation right entitles the participant in the Plan to elect, subject to approval by the Board of Directors, in lieu of exercising an outstanding share option, to receive the number of common shares of the Registrant equivalent in value to the difference between the option exercise price and the net existing market price of the Registrant's common shares multiplied by the number of common shares over which he could otherwise exercise his option.

Under the Plan, the Board of Directors of the Registrant or its Executive Committee may from time to time grant to directors, officers, consultants and full and part time employees of the Registrant and its associated, affiliated, controlled and subsidiary companies, as the Board or its Executive Committee shall designate, the option to purchase from the Registrant such number of its common shares as the Board or its Executive Committee may designate. The Registrant's Plan allows it to grant options to its employees, directors and consultants to acquire up to 16,335,000 common shares, of which options for 10,115,000 common shares are outstanding as at December 31, 2011, provided that the total number of common shares to be optioned to any one optionee shall not exceed 5% of the issued common shares of the Registrant at the time of grant. The exercise price of each option cannot be lower than the last recorded sale of a board lot on the Toronto Stock Exchange during the trading day immediately preceding the date of granting

or, if there was no such sale, the high/low average price for the common shares on the Toronto Stock Exchange based on the last five trading days before the date of the grant. Pursuant to the Plan, options shall be granted pursuant to an option agreement in a form that complies with the rules and policies of the Toronto Stock Exchange, which provide as follows:

- (a) all options granted shall be non-assignable;
- (b) an option must be exercisable during a period not extending beyond 10 years from the time of grant; and
- (c) no financial assistance will be provided with respect to the exercise of stock options.

50

Canarc Resource Corp.
Form 20-F

At the Registrant's annual general meeting held on June 15, 2010, shareholder approval was provided for the increase in the maximum aggregate number of common shares which may be reserved for issuance under the Plan from 11,696,450 shares to 16,335,000 shares at that time.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

7.A Major Shareholders

To the best of the Registrant's knowledge, the Registrant is not directly or indirectly owned or controlled by another company or by any foreign government or by any other natural or legal person(s) severally or jointly. There are no arrangements, known to the Registrant, the operation of which may at a subsequent date result in a change in its control.

As at April 27, 2012, the only persons or groups known to the Registrant to beneficially own 5% or more of the Registrant's issued and outstanding common shares and the number of common shares owned, directly or indirectly, by officers and directors of the Registrant as a group are as follows:

Title of Class	Identity of Person or Group	Shares Owned (1)	Percentage of Class (2)
Common Shares	CDS & Co. Toronto, Ontario	54,887,485 (3), (4)	59.18%
Common Shares	CEDE & Co. New York, New York, U.S.A.	30,366,390 (3), (4)	32.15%
Common Shares	William Price (5) Atherton, California, U.S.A.	5,556,000 (6)	5.88%
Common Shares	Officers and Directors as a group	10,771,412 (6)	11.40%

(1) Common shares.

(2) As at April 27, 2012, the Registrant had 94,442,171 common shares issued and outstanding.

(3) Owners of record only. CDS & Co. is a clearing agency through which Canadian brokers and dealers hold their securities. CEDE & Co. is a U.S. clearing agency. The Registrant believes that all of these shares are held by the registered holder in a fiduciary, trustee, or nominee capacity, and the identities of the beneficial owners of such shares are not known to the Registrant and, except for named individuals and the officers and directors as a group, the Registrant is not aware of any person or group of persons which beneficially owns more than 5% of the Registrant's outstanding common shares.

(4) Certain of these shares may be held in "street form" and may be included in the shares registered in the name of CDS & Co. or CEDE & Co.

(5) As at April 27, 2012, William Price controlled, either directly or indirectly, 5,556,000 common shares of the Registrant, representing 5.88% of the Registrant at that time; William Price directly controls 4,556,000 common shares and indirectly controls 1,000,000 common shares through The William L Price Charitable Foundation. William Price became a director of the Registrant at May 31, 2005, but exerts no direct control over any board member and is unrelated to any board member and is not active in the operations of the Registrant.

(6)

William Price was elected to the Board of Directors at the Registrant's annual general meeting held on May 31, 2005, and as at April 27, 2012, his shareholdings of 5,556,000 common shares are included in the 10,771,412 common shares held by officers and directors as a group.

51

Canarc Resource Corp.
Form 20-F

All shares of the Registrant, including all those held by any major shareholders, are common shares with similar voting rights. As of April 27, 2012 there were 94,442,171 common shares of the Registrant which were issued and outstanding. Based on the records of the Registrant's registrar and transfer agent, Computershare Investor Services Inc., of 3rd Floor, 510 Burrard Street, Vancouver, British Columbia, Canada, as at such date there were 428 registered holders of the Registrant's common shares resident in the United States (71% of all registered holders) holding 37,716,801 common shares. This number represents approximately 40% of the total issued and outstanding common shares of the Registrant at that date.

Control by Another Corporation, Foreign Government or Other Persons

To the best of the Registrant's knowledge, the Registrant is not directly or indirectly owned or controlled by another corporation(s), by any foreign government or by any other natural or legal person(s) severally or jointly.

Change of Control

As of the date of this Form 20-F, there is no arrangement known to the Registrant which may at a subsequent date result in a change of control of the Registrant.

7.B Related Party Transactions

For the fiscal year ended December 31, 2011, the Registrant had transactions with related parties.

Key management includes directors (executive and non-executive) and senior management. The compensation paid or payable to key management for employee services is disclosed in the table below.

Except as may be disclosed elsewhere in the Form 20-F, general and administrative costs during 2011 and 2010 include:

	Year ended December 31,		Net balance receivable (payable) as at December 31,	
	2011	2010	2011	2010
Key management compensation:				
Executive salaries and remuneration	\$ 473	\$ 291	\$ (14)	\$ -
Directors fees	40	39	(146)	(109)
Share-based payments	212	116	-	-
	\$ 725	\$ 446	\$ (160)	\$ (109)
Legal fees incurred to a law firm in which a senior officer of the Company is a partner	\$ 72	\$ 71	\$ 83	\$ 62
Net office, sundry, rent and salary allocations recovered				

from (incurred to) company(s) \$ 55 \$ 88 \$ 16 \$ (4)
sharing certain common
director(s)

The above transactions were incurred in the normal course of business and are recorded at the exchange amount, being the amount agreed upon by the related parties.

The Company shares common office facilities, employee and administrative support, and office sundry amongst companies with certain common director(s), and such allocations to the Company are on a full cost recovery basis. Any balances due to related parties are payable on demand.

52

Canarc Resource Corp.
Form 20-F

In May 2009, Canarc received CAD\$62,030 in demand loans from certain directors and an officer of Canarc. The loans are repayable on demand and bear an interest rate of 9% per annum which was increased to 12% effective September 1, 2010, and were previously secured by Canarc's shareholdings in Caza at CAD\$0.25 per share of Caza which has been replaced by a loan bonus of 12% payable upon repayment effective September 1, 2010. As at December 31, 2011, Canarc accrued CAD\$19,800 in interests and CAD\$7,400 in loan bonuses.

In March 2012, Canarc arranged demand loans of CAD\$200,000 from certain directors and an officer of Canarc. The loans are repayable on demand and bear an interest rate of 12% compounded monthly with interest payable semi-annually.

Items 5.A and 5.B provide further details of transactions with Caza.

In each case the transactions described below were, in the Registrant's view, completed on terms no less favourable to the Registrant than if they had been entered into with unaffiliated parties.

Compensation to Directors and Senior Officers and Options to Purchase Securities

Item 6 provides further details of compensation paid to, and options granted to and held by, directors and senior officers of the Registrant.

Indebtedness of Directors and Senior Officers

At any time during the Registrant's last completed financial year, no director, executive officer or senior officer of the Registrant, proposed management nominee for election as a director of the Registrant or each associate or affiliate of any such director, executive or senior officer or proposed nominee is or has been indebted to the Registrant or any of its subsidiaries or is and has been indebted to another entity where such indebtedness is or has been the subject of a guarantee, support agreement, letter of credit or other similar arrangement or understanding provided by the Registrant or any of its subsidiaries, other than routine indebtedness and other than as disclosed in the Registrant's audited financial statements and in the Form 20-F.

Interest of Insiders in Material Transactions

Other than as set forth below and in the Form 20-F and in the Registrant's audited financial statements and other than transactions carried out in the ordinary course of business of the Registrant or any of its subsidiaries, none of the directors or senior officers of the Registrant, a proposed management nominee for election as a director of the Registrant, any member beneficially owning shares carrying more than 5% of the voting rights attached to the shares of the Registrant nor an associate or affiliate of any of the foregoing persons had since January 1, 2011 (being the commencement of the Registrant's last audited fiscal period) any material interest, direct or indirect, in any transactions which materially affected or would materially affect the Registrant or any of its subsidiaries.

The Registrant's directors and officers may serve as directors or officers of other public resource companies or have significant shareholdings in other public resource companies and, to the extent that such other companies may participate in ventures in which the Registrant may participate, the directors of the Registrant may have a conflict of interest in negotiating and concluding terms respecting the extent of such participation. Also, certain directors and officers of Canarc Resource Corp. are directors, officers and / or employees of Aztec and Caza. The interests of these companies may differ from time to time. Item 6.C provide further details.

7.C Interests of Experts and Counsel

Not applicable.

ITEM 8. FINANCIAL INFORMATION

8.A Consolidated Statements and Other Financial Information

53

Canarc Resource Corp.
Form 20-F

Canarc's audited consolidated financial statements have been prepared in accordance with IFRS as issued by the IASB. IFRS 1 has been applied with an adoption date of January 1, 2011 and a transition date of January 1, 2010, and all dollar amounts are expressed in United States dollars unless otherwise indicated.

Consolidated financial statements audited by an independent registered public accounting firm and accompanied by an audit report are comprised of the following, which are attached hereto and form a part hereof.

- (a) Consolidated Statements of Financial Position as of December 31, 2011 and 2010;
- (b) Consolidated Statements of Comprehensive (Loss) Income for each of the years ended December 31, 2011 and 2010;
- (c) Consolidated Statements of Shareholders' Equity for each of the years ended December 31, 2011 and 2010;
- (d) Consolidated Statements of Cash Flows for each of the years ended December 31, 2011 and 2010; and
- (e) Notes to the consolidated financial statements.

The Registrant is not involved and has not been involved in the recent past in any legal or arbitration proceedings which may have, or had in the recent past, significant effects on the Registrant's financial position or profitability, including governmental proceedings pending or known to be contemplated other than as disclosed in the Company's continuous disclosure documents, regulatory filings, Form 20-F and consolidated financial statements for the years then ended.

Dividend Policy

During its last three completed financial years, the Registrant has not declared or paid any cash dividends on its common shares and does not currently intend to pay cash dividends. Management intends for earnings, if any, to be retained to finance further growth and activities relating to the business of the Registrant.

The Directors of the Registrant may from time to time declare and authorize payment of such dividends, if any, as they may deem advisable and need not give notice of such declaration to any shareholder. No dividend shall be paid otherwise than out of funds and/or assets properly available for the payment of dividends and a declaration by the Directors as to the amount of such funds or assets available for dividends shall be conclusive. The Registrant may pay any such dividend wholly or in part by the distribution of specific assets and in particular by paid up shares, bonds, debentures or other securities of the Registrant or any other corporation or in any one or more such ways as may be authorized by the Registrant or the Directors and where any difficulty arises with regard to such a distribution the Directors may settle the same as they think expedient, and in particular may fix the value for distribution of such specific assets or any part thereof, and may determine that cash payments in substitution for all or any part of the specific assets to which any shareholders are entitled shall be made to any shareholders on the basis of other value so fixed in order to adjust the rights of all parties and may vest any such specific assets in trustees for the persons entitled to the dividend as may seem expedient to the Directors.

Any dividend declared on shares of any class by the Directors may be made payable on such date as is fixed by the Directors.

Subject to the rights of shareholders (if any) holding shares with special rights as to dividends, all dividends on shares of any class shall be declared and paid according to the number of such shares held.

The Directors may, before declaring any dividend, set aside out of the funds properly available for the payment of dividends such sums as they think proper as a reserve or reserves, which shall, at the discretion of the Directors, be applicable for meeting contingencies, or for equalizing dividends, or for any other purpose to which such funds of the Registrant may be properly applied, and pending such application may, at the like discretion, either be employed in

the business of the Registrant or be invested in such investments as the Directors may from time to time think fit. The Directors may also, without placing the same in reserve, carry forward such funds, which they think prudent not to divide.

If several persons are registered as joint holders of any share, any one of them may give an effective receipt for any dividend, bonuses or other moneys payable in respect of the share.

No dividend shall bear interest against the Registrant. Where the dividend to which a shareholder is entitled includes a fraction of a cent, such fraction shall be disregarded in making payment thereof and such payment shall be deemed to be payment in full.

54

Canarc Resource Corp.
Form 20-F

Any dividend, bonuses or other moneys payable in cash in respect of shares may be paid by cheque or warrant sent through the post directed to the registered address of the holder, or in the case of joint holders, to the registered address of that one of the joint holders who is first named in the register, or to such person and to such address as the holder or joint holders may direct in writing. Every such cheque or warrant shall be made payable to the order of the person to whom it is sent. The mailing of such cheque or warrant shall, to the extent of the sum represented thereby (plus the amount of any tax required by law to be deducted) discharge all liability for the dividend, unless such cheque or warrant shall not be paid on presentation or the amount of tax so deducted shall not be paid to the appropriate taxing authority.

Notwithstanding anything contained in the Registrant's Articles of Incorporation, the Directors may from time to time capitalize any undistributed surplus on hand of the Registrant and may from time to time issue as fully paid and non-assessable any unissued shares, or any bonds, debentures or debt obligations of the Registrant as a dividend representing such undistributed surplus on hand or any part thereof.

Legal Proceedings

The Registrant is not involved in any legal or arbitration proceedings which have, or may have had in the recent past, significant effects on the Registrant's financial position or profitability other than as disclosed in the Registrant's continuous disclosure documents, regulatory filings, Form 20-F and consolidated financial statements for the years then ended.

8.B Significant Changes

There has been no significant change in the financial condition of the Registrant since December 31, 2011 other than as disclosed in this Form 20-F and in the Registrant's continuous disclosure documents.

ITEM 9. THE OFFER AND LISTING

9.A Offer and Listing Details

This Form 20-F is being filed as an annual report under the Exchange Act and does not relate to a new offer of securities, and accordingly, the information called for is not required other than the price history information below.

The Registrant's common shares are traded on The Toronto Stock Exchange in Canada (the "TSX") under the symbol "CCM". The following prices are stated in terms of Canadian dollars.

The following tables set forth the high and low prices of the common shares for the periods indicated.

(Stated in terms of Canadian dollars)

9.B Plan of Distribution

Not applicable.

9.C Markets

Since November 2, 1994, the Registrant's common shares have traded on the TSX. From March 16, 1988 to June 2, 1995 and from September 1996 to February 12, 1999, the Registrant's common shares traded on the Vancouver Stock Exchange ("VSE") (the VSE merged with the Alberta Stock Exchange in 2000, which became known as the Canadian Venture Exchange, and then the Toronto Stock Exchange acquired the Canadian Venture Exchange to form the TSX Venture Exchange). In February 1997, the Registrant was listed for trading on the Berlin Stock Exchanges and has since voluntarily delisted from the exchange. On August 3, 1998, the Registrant was listed on the Frankfurt Exchange. Management of the Registrant is not aware of any trading market for the Registrant's common shares in the United States apart from the United States OTC Bulletin Board, on which the Registrant trades under the symbol CRCUF.

ITEM 10. ADDITIONAL INFORMATION

10.A Share Capital

Not applicable.

10.B Notice of Articles and Articles of Association

The Registrant's Notice of Articles and articles of association, and related matters, are summarized below.

1. The Registrant was incorporated under the laws of British Columbia on January 22, 1987 under the name, "Canarc Resource Corp." by registration of its Memorandum and Articles with the British Columbia Registrar of Companies. At the Registrant's annual and extraordinary general meeting held in May 2005, the shareholders approved the Notice of Articles be altered to remove the application of the "Pre-Existing Company Provisions" as set forth in Table 3 of the Business Corporations Regulations under the B.C. Business Corporations Act, S.B.C. 2002 (the "BCBCA") and the replacement of the Articles with a new set of Articles which comply with the BCBCA. The Registrant no longer has a Memorandum, which has been replaced by, in part, its Notice of Articles.

The Registrant's Memorandum and Articles do not provide for any specific objects or purposes.

2. Set forth below is a summary of provisions contained in the Registrant's Articles with respect to:

(a) Director's power to vote on a proposal, arrangement or contract in which the director is materially interested: A director who holds a disclosable interest in a contract or transaction into which the Registrant has entered or proposes to enter is not entitled to vote on any directors' resolution to approve that contract or transaction, unless all the directors have a disclosable interest in that contract or transaction, in which case any or all of those directors may vote on such resolution.

(b) Directors' power, in the absence of an independent quorum, to vote compensation to themselves or any members of their body:

See (a), above. A director does not hold a disclosable interest in a contract or transaction merely because the contract or transaction relates to the remuneration of the director in that person's capacity as director, officer, employee or agent of the Registrant or of an affiliate of the Registrant.

(c) Borrowing powers exercisable by the directors and how such borrowing powers can be varied:

The Registrant, if authorized by the directors, may:

(i) borrow money in the manner and amount, on the security, from the sources and on the terms and conditions that they consider appropriate;

(ii) issue bonds, debentures and other debt obligations either outright or as security for any liability or obligation of the Registrant or any other person and at such discounts or premiums and on such other terms as they consider appropriate;

57

Canarc Resource Corp.
Form 20-F

- (iii) guarantee the repayment of money by any other person or the performance of any obligation of any other person; and
- (iv) mortgage, charge, whether by way of specific or floating charge, grant a security interest in, or give other security on, the whole or any part of the present and future assets and undertaking of the Registrant.
- (d) Retirement or non-retirement of directors under an age limit requirement:
The directors are not required to retire upon reaching a specific age.
- (e) Number of shares, if any, required for director's qualification:

A director is not required to hold any shares of the Registrant.

3. All common shares of the Registrant rank equally as to dividends, voting powers and participation in assets (in the event of liquidation) and in all other respects. Dividend entitlement is set by way of the shareholders status as a shareholder on the chosen record date and does not lapse over time. Each share carries one vote per share at meetings of the shareholders of the Registrant. Directors do not stand for re-election on staggered terms at present. There are no indentures or agreements limiting the payment of dividends and there are no conversion rights, special liquidation rights, pre-emptive rights or subscription rights attached to the common shares. The shares presently issued are not subject to any calls or assessments. There is a Shareholders Right Plan as detailed in Item 10.B under Summary of Shareholders Rights Plan.

4. The rights of holders of common shares may not be modified other than by vote of 2/3 of the common shares voting on such modification. The quorum for the transaction of business at a meeting of shareholders is two persons who are, or who represent by proxy, shareholders who, in the aggregate, hold at least 5% of the issued shares entitled to be voted at the meeting. Due to the quorum requirements, the rights of holders of common shares may be modified by the votes of less than a majority of the issued common shares of the Registrant.

5. The directors of the Registrant call all annual general meetings and extraordinary general meetings. The directors may set a date as the record date for the purpose of determining shareholders entitled to notice of any meeting of shareholders. The directors, the president (if any), the secretary (if any), the assistant secretary (if any), any solicitor for the Registrant, the auditor of the Registrant and any other persons invited by the directors are entitled to attend any meeting of shareholders, but if any of those persons does attend a meeting of shareholders, that person is not to be counted in the quorum and is not entitled to vote at the meeting unless that person is a shareholder or proxy holder entitled to vote at the meeting.

6. There are no limitations on the rights to own securities.

7. There are no provisions in the Registrant's Articles that would have an effect on delaying, deferring or preventing a change of control other than that the Registrant may remove any director before the expiration of his or her term of office only by way of special resolution. In addition, there is a Shareholders Right Plan as detailed in Item 10.B under Summary of Shareholders Rights Plan.

8. There are no by-law provisions governing the ownership threshold above which shareholder ownership must be disclosed.

9. The law of British Columbia, Canada, relating to Items 2-8 is not significantly different from the law of the United States.

10. There are no conditions in the Memorandum and Articles governing changes in capital that are more stringent than is required by law.
11. The BCBCA permits an unlimited authorized share capital, and shares may be created with or without par value.
12. There are no residency requirements for directors under the BCBCA.
13. Special Resolutions of shareholders can be passed by a minimum of a two-thirds majority at a meeting of shareholders.
14. General meetings can be held outside British Columbia if the location is approved by resolution of the directors.
15. The BCBCA provides for shareholder proposals to be made at general meetings. Generally, shareholders holding at least 1% of the voting shares may submit proposals to the Registrant three months prior to the anniversary of the last annual general meeting of shareholders of the Registrant.

58

Canarc Resource Corp.
Form 20-F

16. Under the BCBCA, dividends may be declared out of profits, capital or otherwise. As well, the BCBCA does not automatically make directors liable to the Registrant for the declaration of dividends while the Registrant is insolvent.
17. The BCBCA does not require that a company's offer to purchase or redeem its own shares be made on a pro-rata basis to all shareholders.
18. The BCBCA permits a company to indemnify its directors without court approval, and may also require reimbursement of expenses in certain cases for claims that are successfully defended. Defense costs may also be advanced by a company in certain cases.
19. All filings with the Registrar under the BCBCA must be made electronically.
20. Directors' and shareholders' meetings may be held by any form of communications medium permitted under the Articles, including internet chat lines and telephones. In addition, directors' consent resolutions may be passed in the manner provided under the Articles, including e-mail.
21. A company may provide financial assistance in connection with the purchase of its shares under the BCBCA.
22. A company may, in limited circumstances, amalgamate with a foreign company under the BCBCA, without the requirement to first continue the second company into British Columbia. Amalgamations do not require court approval, although court approval may still be requested.
23. The requisite majority to pass a special resolution at a meeting of shareholders is a two-thirds majority.
24. General meetings of shareholders may, if the location is approved by directors' resolution, be held outside British Columbia.
25. General Meetings of shareholders of the Registrant are required to be held each calendar year and not more than 15 months after the holding of the last preceding annual general meeting.
26. Any offer by the Registrant to purchase or redeem its own shares, need not be made pro-rata to all the shareholders.
27. Changes to the Registrant's capital structure may be effected by ordinary resolution, including the following changes:
 - creation or cancellation of one or more classes or series of shares;
 - creation or removal of special rights and restrictions attaching to any class or series of shares;
 - changing the authorized capital;
 - consolidating or subdividing all or any of the Registrant's issued or unissued shares; and
 - other alterations to the share capital and authorized capital, where permitted under the BCBCA.
28. The Registrant's name may be changed by ordinary resolution or resolution of the directors.
29. The removal of court approval of any agreement to indemnify a director or officer in most cases, as well as mandatory indemnification on certain eligible cases.

30. The remuneration of the auditor of the Registrant may be set by the directors, without the need of seeking a resolution of the shareholders authorizing the directors to set such remuneration.

31. A director of the Registrant may be removed as a director of the Registrant before the expiration of the director's term of office pursuant to an ordinary resolution of the shareholders.

For further information, refer to the full text of the Notice of Articles and Articles of the Registrant, which are available online at www.sedar.com as part of the Registrant's publicly available filings under the heading "Other", as filed on November 10, 2005.

Canarc Resource Corp.
Form 20-F

Summary of the Shareholder Rights Plan

The following is a summary of the terms of the Shareholder Rights Plan which was approved at the Registrant's annual and extraordinary meeting held in May 2005, and ratified and confirmed at the Registrant's annual general meetings in April 2008 and again in June 2011.

General

The rights will be issued pursuant to a shareholder rights plan agreement dated and effective April 30, 2005, between the Registrant and Computershare Trust Company of Canada as the rights agent. Each right will entitle the holder to purchase from the Registrant one common share at the exercise price of CAD\$50.00 per share, subject to adjustments, at any time after the separation time (defined below). However, if a flip-in event (defined below) occurs, each right will entitle the holder to receive, upon payment of the exercise price, common shares having a market value equal to two-times the exercise price. The rights are non-exercisable until the separation time.

Trading of Rights

Until the separation time, the rights will be evidenced by the outstanding certificates for common shares and the rights will be transferred with, and only with, the common shares. As soon as practicable following the separation time, separate certificates evidencing the rights will be mailed to holders of record of common shares as of the close of business at the separation time and the separate rights certificates will thereafter evidence the rights.

Separation Time and Acquiring Person

The rights will separate and trade apart from the common shares and become exercisable at the separation time. "Separation time" generally means the close of business on the 10th trading day following the commencement or announcement of the intent of any person to commence a take-over bid, other than a permitted bid or a competing bid, but under certain circumstances can mean the eighth trading day after a person becomes an "acquiring person" by acquiring 20% or more of the voting shares of any class.

Flip-in Event

A "flip-in event" will, in general terms, occur when a person becomes an acquiring person. Upon the occurrence of a flip-in event, each right will entitle the holder to acquire, on payment of the exercise price, that number of common shares having a market value equal to two-times the exercise price. However, any rights beneficially owned by an acquiring person or by any direct or indirect transferees of such person, will be void. The term "beneficial ownership" is defined to include, under certain circumstances, shares owned indirectly through affiliates, associates, trusts and partnerships, other situations of ownership deemed by operation of law, shares subject to acquisition or voting agreements and shares owned by persons acting jointly or in concert. There are several exceptions, including exceptions directed towards investment managers, trust companies, and independent managers of pension plans who are not participating in a take-over bid.

Permitted Bids

Permitted bids are exempted from the operation of the Shareholder Rights Plan. In summary, a permitted bid is a take-over bid made by way of take-over bid circular which complies with the following provisions:

- (a) It is made to all holders of voting shares of the Registrant of a particular class and for all those voting shares.
- (b)

No voting shares can be taken up and paid for before the close of business on the “Permitted Bid Expiry Date”, as described below, and unless more than 50% of voting shares held by shareholders independent of the offeror are tendered and not withdrawn.

(c) Voting shares may be tendered at any time until the Permitted Bid Expiry Date and may be withdrawn until taken up and paid for.

(d) If the condition described in (b) above is met, there will be a public announcement and the take-over bid will be open for a further period of 10 business days.

The Shareholder Rights Plan contains provisions designed to ensure that, if considered appropriate, the time for tendering to two or more competing permitted bids will occur on the same date.

60

Canarc Resource Corp.
Form 20-F

Permitted Bid Expiry Date

The Permitted Bid provisions require that for a Take-Over to be a Permitted Bid it must be left open until the Permitted Bid Expiry Date. The “Permitted Bid Expiry Date” means 60 days following the date of the Take-Over Bid.

Exchange Option

Under certain circumstances, the board of directors of the Registrant can, on exercise of a right and payment of the exercise price, issue other securities or assets of the Registrant in lieu of common shares. The board of directors of the Registrant can also determine to issue in exchange for the rights, but without payment of the exercise price, common shares having a value equal to the exercise price or other securities or assets of the Registrant having the same value.

Adjustments

The exercise price, the number and kind of shares subject to purchase upon exercise of each right and the number of rights outstanding are subject to adjustment from time to time to prevent dilution in the event that the Registrant takes certain actions involving the Registrant's share capital which would otherwise have a dilutive effect.

Redemption

At any time before the occurrence of a flip-in event, the board of directors may elect to redeem the rights in whole at a redemption price of \$0.0001 per right.

Waiver

The board of directors may waive the application of the Shareholder Rights Plan to any flip-in event if it determines that a person became an acquiring person by inadvertence, conditional upon such person having, within 10 days after the determination by the board of directors, reduced its beneficial ownership of shares such that it is no longer an acquiring person. The board of directors may also, until a flip-in event has occurred, waive the application of the Shareholder Rights Plan to any particular flip-in event, but in that event, the board of directors shall be deemed to have waived the application of the Shareholder Rights Plan to any other flip-in event which may arise under any take-over bid then in effect.

Amendments

The board of directors may amend the Shareholder Rights Plan to correct clerical or typographical errors, to maintain the validity of the plan as a result of any changes in any applicable legislation or to increase or decrease the exercise price. Any amendments required to maintain the validity of the Shareholder Rights Plan must be submitted to the shareholders of the Registrant or, after the separation time, to the holders of the rights for confirmation.

Other amendments can only be made with the approval of the shareholders of the Registrant or, after the separation time, the holders of the rights. Any supplements or amendments to the Shareholder Rights Plan require the prior written consent of the TSX Toronto Stock Exchange.

Term

The Shareholder Rights Plan has a term of 10 years; however, it is subject to ratification at the Meeting, and also at each of the shareholder meetings following the third and sixth anniversaries of the effective date of the Shareholder

Rights Plan. If the Shareholder Rights Plan is not so ratified at any meeting, the Shareholder Rights Plan shall terminate forthwith.

The text of the ordinary resolution, in substantially the form which was presented to the shareholders, subject to such changes not affecting the general intent of the said resolution as may be required by the regulatory authorities or by counsel for the Registrant, is set forth below:

“BE IT RESOLVED, with or without amendment, as an ordinary resolution, that the Shareholder Rights Plan Agreement, dated for reference April 30, 2005, between the Company and Computershare Trust Company of Canada, as described in the Information Circular of the Company dated as at April 26, 2005, be and it is hereby approved, ratified and confirmed.”

61
Canarc Resource Corp.
Form 20-F

10.C Material Contracts

The following executive employment agreements were signed in 2011:

- An Executive Employment Agreement between Canarc and Mr. Garry Biles was signed on June 1, 2011 in respect of Mr. Biles' capacity as Chief Operating Officer and President for Canarc. The employment agreement provides that Mr. Biles' base remuneration is CAD\$200,000 per annum plus a bonus based upon the achievement of performance targets as determined by the Compensation Committee.
- An Executive Employment Agreement between Canarc and Mr. James Moors was signed on June 1, 2011 in respect of Mr. Moors' capacity as Vice-President of Exploration for Canarc. The employment agreement provides that Mr. Moors' base remuneration is CAD\$120,000 per annum plus a bonus based upon the achievement of performance targets as determined by the Compensation Committee.
- An Executive Employment Agreement between Caza and Mr. Gregg Wilson was signed on June 1, 2011 in respect of Mr. Wilson's capacity as Vice-President of Investor Relations for both Canarc and Caza. The employment agreement provides that Mr. Wilson's base remuneration is CAD\$90,000 per annum plus a bonus based upon the achievement of performance targets as determined by the Compensation Committee. Mr. Wilson's remuneration is allocated between Canarc and Caza.
- An Executive Employment Agreement between Caza and Mr. Philip Yee was signed on June 1, 2011 in respect of Mr. Yee's capacity as Chief Financial Officer and Vice-President of Finance for both Canarc and Caza. The employment agreement provides that Mr. Yee's base remuneration is CAD\$180,000 per annum plus a bonus based upon the achievement of performance targets as determined by the Compensation Committee. Mr. Yee's remuneration is allocated between Canarc and Caza.

For the two years immediately preceding April 27, 2012, there were no other material contracts entered into, other than contracts entered into in the ordinary course of business, to which the Registrant or any member of the group was a party, and other than as disclosed in this Form 20-F. For a description of those contracts entered into in the ordinary course of business refer to Items 4.B and 4.D.

10.D Exchange Controls

There are no governmental laws, decrees or regulations in Canada relating to restrictions on the export or import of capital, or affecting the remittance of interest, dividends or other payments to non-resident holders of the Registrant's common shares. Any remittances of dividends to United States residents are, however, subject to a 15% withholding tax (10% if the shareholder is a corporation owning at least 10% of the outstanding common shares of the Registrant) pursuant to Article X of the reciprocal tax treaty between Canada and the United States.

Except as provided in the Investment Canada Act (the "Act"), there are no limitations under the laws of Canada, the Province of British Columbia or in the charter or any other constituent documents of the Registrant on the right of foreigners to hold or vote the common shares of the Registrant.

Management of the Registrant considers that the following general summary is materially complete and fairly describes those provisions of the Investment Canada Act pertinent to an investment by an American investor in the Registrant.

The following discussion summarizes the principal features of the Investment Canada Act for a non-resident who proposes to acquire the common shares.

The Investment Canada Act generally prohibits implementation of a reviewable investment by an individual, government or agency thereof, corporation, partnership, trust or joint venture (each an "entity") that is not a "Canadian" as defined in the Investment Canada Act (a "non-Canadian"), unless after review, the Director of Investments appointed by the minister responsible for the Investment Canada Act is satisfied that the investment is likely to be of net benefit to Canada. An investment in the common shares by a non-Canadian other than a "WTO Investor" (as that term is defined by the Investment Canada Act, and which term includes entities which are nationals of or are controlled by nationals of member states of the World Trade Organization) when the Company was not controlled by a WTO Investor, would be reviewable under the Investment Canada Act if it was an investment to acquire control of the Registrant and the value of the assets of the Registrant, as determined in accordance with the regulations promulgated under the Investment Canada Act, equals or exceeds \$5 million for direct acquisition and over \$50 million for indirect acquisition, or if an order for review was made by the federal cabinet on the grounds that the investment related to Canada's cultural heritage or national identity, regardless of the value of the assets of the Registrant. An investment in the common shares by a WTO Investor, or by a non-Canadian when the Registrant was controlled by a WTO Investor, would be reviewable under the Investment Canada Act if it was an investment to acquire control of the Registrant and the value of the assets of the Registrant, as determined in accordance with the regulations promulgated under the Investment Canada Act was not less than a specified amount. A non-Canadian would acquire control of the Registrant for the purposes of the Investment Canada Act if the non-Canadian acquired a majority of the common shares. The acquisition of one third or more, but less than a majority of the common shares would be presumed to be an acquisition of control of the Registrant unless it could be established that, on the acquisition, the Registrant was not controlled in fact by the acquirer through the ownership of the common shares.

62

Canarc Resource Corp.
Form 20-F

Certain transactions relating to the common shares would be exempt from the Investment Canada Act, including: (a) an acquisition of the common shares by a person in the ordinary course of that person's business as a trader or dealer in securities; (b) an acquisition of control of the Registrant in connection with the realization of security granted for a loan or other financial assistance and not for a purpose related to the provisions of the Investment Canada Act; and (c) an acquisition of control of the Registrant by reason of an amalgamation, merger, consolidation or corporate reorganization following which the ultimate direct or indirect control in fact of the Registrant, through the ownership of the common shares, remained unchanged.

10.E Taxation

ALL SHAREHOLDERS SHOULD CONSULT THEIR OWN TAX ADVISERS AS TO THE INCOME AND OTHER TAX CONSEQUENCES ARISING IN THEIR PARTICULAR CIRCUMSTANCES. THE FOLLOWING IS A SUMMARY ONLY AND OF A GENERAL NATURE AND IS NOT INTENDED, NOR SHOULD IT BE CONSTRUED, TO BE LEGAL OR TAX ADVICE TO ANY PARTICULAR SHAREHOLDER.

United States Federal Income Tax Consequences

The following is a discussion of material United States federal income tax consequences, under current law, applicable to a US Holder (as hereinafter defined) of common shares of the Registrant. This discussion does not address consequences peculiar to persons subject to special provisions of federal income tax law, such as those described below as excluded from the definition of a US Holder. In addition, this discussion does not cover any state, local or foreign tax consequences. (Refer to "Certain Canadian Federal Income Tax Considerations" for material Canadian federal income tax consequences).

The following discussion is based upon the sections of the Internal Revenue Code of 1986, as amended (the "Code"), Treasury Regulations, published Internal Revenue Service ("IRS") rulings, published administrative positions of the IRS and court decisions that are currently applicable, any or all of which could be materially and adversely changed, possibly on a retroactive basis, at any time and which are subject to differing interpretations. This discussion does not consider the potential effects, both adverse and beneficial, of any proposed legislation that, if enacted, could be applied, possibly on a retroactive basis, at any time. This discussion is for general information only and it is not intended to be, nor should it be construed to be, legal or tax advice to any holder or prospective holder of common shares of the Registrant and no opinion or representation with respect to the United States federal income tax consequences to any such holder or prospective holder is made. Accordingly, holders and prospective holders of common shares of the Registrant should consult their own tax advisors about the federal, state, local, and foreign tax consequences of purchasing, owning and disposing of common shares of the Registrant.

U.S. Holders

As used herein, a "U.S. Holder" means a holder of common shares of the Registrant who is (i) a citizen or individual resident of the United States, (ii) a corporation or partnership created or organized in or under the laws of the United States or of any political subdivision thereof, (iii) an estate whose income is taxable in the United States irrespective of source or (iv) a trust subject to the primary supervision of a court within the United States and control of a United States fiduciary as described Section 7701(a)(30) of the Code. This summary does not address the tax consequences to, and U.S. Holder does not include, persons subject to specific provisions of federal income tax law, such as tax-exempt organizations, qualified retirement plans, individual retirement accounts and other tax-deferred accounts, financial institutions, insurance companies, real estate investment trusts, regulated investment companies, broker-dealers, persons or entities that have a "functional currency" other than the U.S. dollar, shareholders subject to the alternative minimum tax, shareholders who hold common shares as part of a straddle, hedging, conversion transaction, constructive sale or other arrangement involving more than one position, and shareholders who acquired

their common shares through the exercise of employee stock options or otherwise as compensation for services. This summary is limited to U.S. Holders who own common shares as capital assets within the meaning of Section 1221 of the Code. This summary does not address the consequences to a person or entity holding an interest in a shareholder or the consequences to a person of the ownership, exercise or disposition of any options, warrants or other rights to acquire common shares.

63

Canarc Resource Corp.
Form 20-F

Distribution on Common Shares of the Company

U.S. Holders receiving dividend distributions (including constructive dividends) with respect to common shares of the Registrant are required to include in gross income for United States federal income tax purposes the gross amount of such distributions, equal to the U.S. dollar value of such distributions on the date of receipt (based on the exchange rate on such date), to the extent that the Registrant has current or accumulated earnings and profits, without reduction for any Canadian income tax withheld from such distributions. Such Canadian tax withheld may be credited, subject to certain limitations, against the U.S. Holder's federal income tax liability or, alternatively, may be deducted in computing the U.S. Holder's federal taxable income by those who itemize deductions. (The section, "Foreign Tax Credit", below provides more details). To the extent that distributions exceed current or accumulated earnings and profits of the Registrant, they will be treated first as a return of capital up to the U.S. Holder's adjusted basis in the common shares and thereafter as gain from the sale or exchange of the common shares. Preferential tax rates for long-term capital gains are applicable to a U.S. Holder that is an individual, estate or trust. There are currently no preferential tax rates for long-term capital gains for a U.S. Holder that is a corporation.

In the case of foreign currency received as a dividend that is not converted by the recipient into U.S. dollars on the date of receipt, a U.S. Holder will have a tax basis in the foreign currency equal to its U.S. dollar value on the date of receipt. Generally any gain or loss recognized upon a subsequent sale or other disposition of the foreign currency, including the exchange for U.S. dollars, will be ordinary income or loss. However, an individual whose realized gain does not exceed \$200 will not recognize that gain, to the extent that there are no expenses associated with the transaction that meet the requirements for deductibility as a trade or business expense (other than travel expenses in connection with a business trip) or as an expense for the production of income.

Dividends paid on the common shares of the Registrant generally will not be eligible for the dividends received deduction provided to corporations receiving dividends from certain United States corporations. A U.S. Holder which is a corporation and which owns shares representing at least 10% of the voting power and value of the Registrant may, under certain circumstances, be entitled to a 70% (or 80% if the U.S. Holder owns shares representing at least 20% of the voting power and value of the Registrant) deduction of the United States source portion of dividends received from the Registrant (unless the Registrant qualifies as a "passive foreign investment company," as defined below). The availability of this deduction is subject to several complex limitations that are beyond the scope of this discussion.

Certain information reporting and backup withholding rules may apply with respect to the Registrant's common shares. In particular, a payor or middleman within the U.S., or in certain cases outside the U.S., will be required to withhold 31% of any payments to a holder of the Registrant's common shares of dividends on, or proceeds from the sale of, such common shares within the U.S., unless the holder is an exempt recipient, if the holder fails to furnish its correct taxpayer identification number or otherwise fails to comply with, or establish an exemption from, the backup withholding tax requirements. Any amounts withheld under the U.S. backup withholding tax rules will be allowed as a refund or a credit against the U.S. Holder's U.S. federal income tax liability, provided the required information is furnished to the IRS. U.S. Holders are urged to consult their own tax counsel regarding the information reporting and backup withholding rules applicable to the Registrant's common shares.

Foreign Tax Credit

A U.S. Holder who pays (or has withheld from distributions) Canadian income tax with respect to the ownership of common shares of the Registrant may be entitled, at the option of the U.S. Holder, to either receive a deduction or a tax credit for such foreign tax paid or withheld. Generally, it will be more advantageous to claim a credit because a credit reduces United States federal income taxes on a dollar-for-dollar basis, while a deduction merely reduces the taxpayer's income subject to tax. This election is made on a year-by-year basis and applies to all foreign taxes paid by (or withheld from) the U.S. Holder during that year. There are significant and complex limitations that apply to the

credit among which is the general limitation that the credit cannot exceed the proportionate share of the U.S. Holder's United States income tax liability that the U.S. Holder's foreign source income bears to his or its worldwide taxable income. In the determination of the application of this limitation, the various items of income and deduction must be classified into foreign and domestic sources. Complex rules govern this classification process. In addition, this limitation is calculated separately with respect to specific classes of income such as "passive income", "high withholding tax interest," "financial services income," "shipping income," and certain other classifications of income. Dividends distributed by the Registrant will generally constitute "passive income" or, in the case of certain U.S. Holders, "financial services income" for these purposes. In addition, U.S. Holders which are corporations that own 10% or more of the voting stock of the Registrant may be entitled to an "indirect" foreign tax credit under Section 902 with respect to the payment of dividends by the Registrant under certain circumstances and subject to complex rules and limitations. The availability of the foreign tax credit and the application of the limitations on the credit are fact specific, and U.S. Holders of common shares of the Registrant should consult their own tax advisors regarding their particular circumstances.

64

Canarc Resource Corp.
Form 20-F

Disposition of Common Shares of the Company

A U.S. Holder will recognize gain or loss upon the sale of common shares of the Registrant equal to the difference, if any, between (i) the amount of cash plus the fair market value of any property received, and (ii) the shareholder's tax basis in the common shares of the Registrant. Preferential tax rates apply to long-term capital gains of U.S. Holders that are individuals, estates or trusts. This gain or loss will be capital gain or loss if the common shares are a capital asset in the hands of the U.S. Holder, which will be long-term capital gain or loss if the common shares of the Registrant are held for more than one year. Deductions for net capital losses are subject to significant limitations. For U.S. Holders which are not corporations, any unused portion of such net capital loss may be carried over to be used in later tax years until such net capital loss is thereby exhausted. For U.S. Holders that are corporations (other than corporations subject to Subchapter S of the Code), an unused net capital loss may be carried back three years and carried forward five years from the loss year to be offset against capital gains until such net capital loss is thereby exhausted.

Other Considerations

In the following circumstances, the above sections of this discussion may not describe the United States federal income tax consequences resulting from the holding and disposition of common shares:

Foreign Investment Company

If 50% or more of the combined voting power or total value of the Registrant's outstanding shares is held, directly or indirectly, by citizens or residents of the United States, United States domestic partnerships or companies, or estates or trusts other than foreign estates or trusts (as defined by the Code Section 7701(a)(31)), and the Registrant is found to be engaged primarily in the business of investing, reinvesting, or trading in securities, commodities, or any interest therein, it is possible that the Registrant may be treated as a "foreign investment company" as defined in Section 1246 of the Code, causing all or part of any gain realized by a U.S. Holder selling or exchanging common shares to be treated as ordinary income rather than capital gain. The Registrant does not believe that it currently qualifies as a foreign investment company. However, there can be no assurance that the Registrant will not be considered a foreign investment company for the current or any future taxable year.

Passive Foreign Investment Company

As a foreign corporation with U.S. Holders, the Registrant could potentially be treated as a passive foreign investment company ("PFIC"), as defined in Section 1297 of the Code, depending upon the percentage of the Registrant's income which is passive, or the percentage of the Registrant's assets which produce or are held for the production of passive income. U.S. Holders owning common shares of a PFIC are subject to the highest rate of tax on ordinary income in effect for the applicable taxable year and to an interest charge based on the value of deferral of tax for the period during which the common shares of the PFIC are owned with respect to certain "excess distributions" on and dispositions of PFIC stock. However, if the U.S. Holder makes a timely election to treat a PFIC as a qualified electing fund ("QEF") with respect to such shareholder's interest therein, the above-described rules generally will not apply. Instead, the electing U.S. Holder would include annually in his gross income his pro rata share of the PFIC's ordinary earnings and net capital gain regardless of whether such income or gain was actually distributed. A U.S. Holder of a QEF can, however, elect to defer the payment of United States federal income tax on such income inclusions. Special rules apply to U.S. Holders who own their interests in a PFIC through intermediate entities or persons. In addition, subject to certain limitations, U.S. Holders owning, actually or constructively, marketable (as specifically defined) stock in a PFIC will be permitted to elect to mark that stock to market annually, rather than be subject to the excess distribution regime of section 1291 described above. Amounts included in or deducted from income under this alternative (and actual gains and losses realized upon disposition, subject to certain limitations) will

be treated as ordinary gains or losses. This alternative will apply to taxable years of U.S. Holders beginning after 1997 and taxable years of foreign corporations ending with or within such taxable years of U.S. Holders.

65

Canarc Resource Corp.
Form 20-F

Because the PFIC determination is made annually on the basis of income and assets, there can be no assurance that the Registrant will not be classified a PFIC in the current or in a subsequent year. In addition, there can be no assurance that the Registrant's determination concerning its PFIC status will not be challenged by the IRS, or that it will be able to satisfy record keeping requirements which will be imposed on QEFs in the event that it qualifies as a PFIC.

Controlled Foreign Registrant

If more than 50% of the total combined voting power of all classes of shares entitled to vote or the total value of the shares of the Registrant is owned, actually or constructively, by citizens or residents of the United States, United States domestic partnerships or corporations, or estates or trusts other than foreign estates or trusts (as defined by the Code Section 7701(a)(31)), each of which own, actually or constructively, 10% or more of the total combined voting power of all classes of shares entitled to vote of the Registrant ("United States Shareholder"), the Registrant could be treated as a controlled foreign corporation ("CFC") under Subpart F of the Code. This classification would affect many complex results, one of which is the inclusion of certain income of a CFC which is subject to current U.S. tax. The United States generally taxes United States shareholders of a CFC currently on their pro rata shares of the Subpart F income of the CFC. Such United States shareholders are generally treated as having received a current distribution out of the CFC's Subpart F income and are also subject to current U.S. tax on their pro rata shares of the CFC's earnings invested in U.S. property. The foreign tax credit described above may reduce the U.S. tax on these amounts. In addition, under Section 1248 of the Code, gain from the sale or exchange of shares by a U.S. Holder of common shares of the Registrant which is or was a United States Shareholder at any time during the five-year period ending with the sale or exchange is treated as ordinary income to the extent of earnings and profits of the Registrant attributable to the shares sold or exchanged. If a foreign corporation is both a PFIC and a CFC, the foreign corporation generally will not be treated as a PFIC with respect to United States Shareholders of the CFC. This rule generally will be effective for taxable years of United States Shareholders beginning after 1997 and for taxable years of foreign Registrants ending with or within such taxable years of United States Shareholders. Special rules apply to United States Shareholders who are subject to the special taxation rules under Section 1291 discussed above with respect to a PFIC. Because of the complexity of Subpart F, a more detailed review of these rules is outside of the scope of this discussion. The Registrant does not believe that it currently qualifies as a CFC. However, there can be no assurance that the Registrant will not be considered a CFC for the current or any future taxable year.

Certain Canadian Federal Income Tax Considerations

A brief description of certain provisions of the tax treaty between Canada and the United States is included below, together with a brief outline of certain taxes, including withholding provisions, to which United States security holders are subject under existing laws and regulations of Canada. The consequences, if any, of provincial, state and local taxes are not considered.

The following information is general, and security holders should seek the advice of their own tax advisors, tax counsel or accountants with respect to the applicability or effect on their own individual circumstances of the matters referred to herein and of any provincial, state, or local taxes.

The discussion under this heading summarizes the principal Canadian federal income tax consequences of acquiring, holding and disposing of shares of common stock of the Registrant for a shareholder of the Registrant who is not a resident of Canada but is a resident of the United States and who will acquire and hold shares of common stock of the Registrant as capital property for the purposes of the Income Tax Act (Canada) (the "Canadian Tax Act"). This summary does not apply to a shareholder who carries on business in Canada through a "permanent establishment" situated in Canada or performs independent personal services in Canada through a fixed base in Canada if the shareholder's holding in the Registrant is effectively connected with such permanent establishment or fixed base. This summary is based on the provisions of the Canadian Income Tax Act and the regulations thereunder and on an

understanding of the administrative practices of Canada Customs & Revenue Agency, and takes into account all specific proposals to amend the Canadian Tax Act or regulations made by the Minister of Finance of Canada as of the date hereof. It has been assumed that there will be no other relevant amendment of any governing law although no assurance can be given in this respect. This discussion is general only and is not a substitute for independent advice from a shareholder's own Canadian and U.S. tax advisors.

The provisions of the Canadian Tax Act are subject to income tax treaties to which Canada is a party, including the Canada-United States Income Tax Convention (1980), as amended (the "Convention").

66

Canarc Resource Corp.
Form 20-F

Dividends on Common Shares and Other Income

Under the Canadian Tax Act, a non-resident of Canada is generally subject to Canadian withholding tax at the rate of 25 percent on dividends paid or deemed to have been paid to him or her by a corporation resident in Canada. The Convention limits the rate to 15 percent if the shareholder is a resident of the United States and the dividends are beneficially owned by and paid to such shareholder, and to 5 percent if the shareholder is also a corporation that beneficially owns at least 10 percent of the voting stock of the payor corporation.

The amount of a stock dividend (for tax purposes) would generally be equal to the amount by which the paid up or stated capital of the Registrant had increased by reason of the payment of such dividend. The Registrant will furnish additional tax information to shareholders in the event of such a dividend. Interest paid or deemed to be paid on the Registrant's debt securities held by non-Canadian residents may also be subject to Canadian withholding tax, depending upon the terms and provisions of such securities and any applicable tax treaty.

The Convention generally exempts from Canadian income tax dividends paid to a religious, scientific, literary, educational or charitable organization or to an organization operated exclusively to administer or provide pension, retirement or employee benefit fund, if the organization is a resident of the United States and is generally exempt from income tax under the laws of the United States provided it is not carrying on a trade or business.

Dispositions of Common Shares

Under the Canadian Tax Act, subject to certain restrictions, a taxpayer's capital gain or capital loss from a disposition of a share of common stock of the Registrant is the amount, if any, by which his or her proceeds of disposition exceed (or are exceeded by, respectively) the aggregate of his or her adjusted cost base of the share and reasonable expenses of disposition. The capital gain or loss must be computed in Canadian currency using a weighted average adjusted cost base for identical properties. Fifty percent of the capital gains net of losses are included in income. The amount by which a shareholder's capital loss exceeds the capital gain in a year may be deducted from a capital gain realized by the shareholder in the three previous years or any subsequent year, subject to certain restrictions in the case of a corporate shareholder.

Under the Canadian Tax Act, a non-resident of Canada is subject to Canadian tax on taxable capital gains, and may deduct allowable capital losses, realized on a disposition of "taxable Canadian property". Shares of common stock of the Registrant will constitute taxable Canadian property of a shareholder at a particular time if the shareholder used the shares in carrying on business in Canada, or if at any time in the five years immediately preceding the disposition 25% or more of the issued shares of any class or series in the capital stock of the Registrant belonged to one or more persons in a group comprising the shareholder and persons with whom the shareholder and persons with whom the shareholder did not deal at arm's length and in certain other circumstances.

The Convention relieves United States residents from liability for Canadian tax on capital gains derived on a disposition of shares unless:

- (a) the value of the shares is derived principally from "real property" in Canada, including the right to explore for or exploit natural resources and rights to amounts computed by reference to production;
- (b) the shareholder was resident in Canada for 120 months during any period of 20 consecutive years preceding the disposition, and at any time during the 10 years immediately preceding, the disposition and the shares were owned by him or her when he or she ceased to be resident in Canada; or

(c) the shares formed part of the business property of a “permanent establishment” that the holder has or had in Canada within the 12 months preceding the disposition.

10.F Dividends and Paying Agents

10.G Statement by Experts

Not applicable.

10.H Documents on Display

Copies of documents referred to in this Form 20-F may be inspected at the Registrant's corporate office at Suite #301 - 700 West Pender Street, Vancouver, British Columbia, Canada, V6C 1G8. The Registrant may require the payment of a reasonable fee in respect of a request made by a person who is not a security holder of the Registrant.

The Registrant's documents publicly filed with the Securities and Exchange Commission may also be viewed and inspected at the SEC's Public Reference Room located at 100 F St. NE, Washington, DC, USA, 20549. Copies may also be obtained from the SEC at prescribed rates.

10.I Subsidiary Information

Not applicable.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Canarc's audited consolidated financial statements have been prepared in accordance with IFRS as issued by the IASB. IFRS 1 has been applied with an adoption date of January 1, 2011 and a transition date of January 1, 2010, and all dollar amounts are expressed in United States dollars unless otherwise indicated.

Quantitative and qualitative disclosures about market risk are provided in Canarc's audited consolidated financial statements for the year ended December 31, 2011 and the notes thereto.

Item 3.D provides information concerning risk factors.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not applicable.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

14.A - D

None.

14.E Proceeds

Not Applicable.

ITEM 15. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

At the end of the period covered by this report, an evaluation was carried out under the supervision of and with the participation of the Registrant's management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), of the effectiveness of the design and operations of the Company's disclosure controls and procedures (as defined in Rule 13a – 15(e) and Rule 15d – 15(e) under the Exchange Act). Based on that evaluation the CEO and the CFO have concluded that as of the end of the period covered by this report, the Registrant's disclosure controls and procedures were adequately designed and effective at the reasonable assurance level to ensure that: (i) information required to be disclosed by the Registrant in reports that it files or submits to the Securities and Exchange Commission under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms; and (ii) material information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to the Registrant's management, including its CEO and CFO, as appropriate, to allow for accurate and timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

The Registrant's management, including the CEO and CFO, does not expect that its disclosure controls and procedures or internal controls and procedures will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Registrant have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the

inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. The Registrant's controls include policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Registrant;

69

Canarc Resource Corp.
Form 20-F

- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Registrant's assets that could have a material effect on the annual financial statements or interim financial statements.

Management conducted an evaluation of the design and operation of the Registrant's internal control over financial reporting as of December 31, 2011 based on the criteria in a framework developed by the Registrant's management pursuant to and in compliance with the SEC's Guidance Regarding Management's Report on Internal Control Over Financial Reporting Under Section 13(a) or 15(d) of the Securities Exchange Act of 1934, Release No. 33-8810 and based on the criteria set forth in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. This evaluation included review of the documentation of controls, evaluation of the design effectiveness of controls, testing of the operating effectiveness of controls and a conclusion on this evaluation. Based upon its assessment, management, including the Registrant's Chief Executive Officer and Chief Financial Officer, concluded that, as of December 31, 2011, the Registrant's internal control over financial reporting was effective.

The Registrant has insufficient resources to appropriately review increasingly complex areas of accounting within the accounting function such as those in relation to new accounting standards, financial instruments and future income tax. The Registrant shall engage the services of an external accounting firm, which is independent of the Registrant's current auditors, to assist in applying complex areas of accounting as needed. In December 2007, the Registrant has hired a consultant to design and implement internal controls over financial reporting. Management concluded that the financial statements for the year ended December 31, 2011 fairly present the Company's financial position and the results of its operations for the year then ended, and that no material misstatements were identified. Ongoing staff training and development in complex accounting issues and engagement of services of external consultants with knowledge and skills in complex areas of accounting, when needed, shall contribute to reduce the risk of a material weakness in the Registrant's internal control over financial reporting and assist in providing reasonable assurance that its internal control over financial reporting is effective.

The Registrant's independent registered public accounting firm is not required to provide an attestation on management's report on internal control over financial reporting. Therefore, this report does not include an attestation report of the Registrant's independent registered public accounting firm regarding internal controls over financial reporting pursuant to rules of the Securities and Exchange Commission that permit the Registrant to provide only management's report in this annual report.

Changes in Internal Controls over Financial Reporting

There were no changes in the Registrant's internal controls over financial reporting identified in connection with the evaluation described above that occurred during the period covered by this annual report that has materially affected or is reasonably likely to affect the Registrant's internal control over financial reporting.

ITEM 16. AUDIT COMMITTEE FINANCIAL EXPERT, CODE OF ETHICS AND PRINCIPAL ACCOUNTANT FEES AND SERVICES

16.A Audit Committee Financial Expert

The Registrant's audit committee is comprised of four directors, all of whom are independent, as set forth below:

Bruce Bried

Derek Bullock

Leonard Harris

William Price

No one person has been identified as a financial expert given that all of the members of the audit committee are financially literate, meaning that they must be able to read and understand financial statements. The Board of Directors has determined that its members of the Audit Committee have sufficient skills to satisfy its duties given the stage and size of the Registrant.

Relevant Education and Experience

Bruce Bried – Mr. Bried is a professional engineer with over 30 years of management experience in the mining industry in various capacities in Engineering, Operations and Reclamation, specializing in underground vein gold and silver mines. He has a B.Sc.

70

Canarc Resource Corp.
Form 20-F

Mining Engineering, Colorado School of Mines, Golden, CO. His significant experience in the last ten years has been VP Operations for Endeavour Silver Corp. and General Manager for Kinross Gold USA Inc., at the Lupin Mine, General Manager of the Lead Mine in South Dakota and the Snip Mine in British Columbia for Homestake Mining Company.

Derek Bullock - Mr. Bullock has a Masters degree from Queens University and is the past President of Iamgold Corporation. He has been on the audit committee of Iamgold Corporation and Goldcrest Resources Ltd.

Leonard Harris - Mr. Harris is a professional engineer with a metallurgy diploma and 50 years of experience in all aspects of mineral processing and mining operations world-wide, including the construction of the Yanacocha gold mine in Peru. Mr. Harris is currently a director for other small cap mining and exploration public companies including Endeavour Silver Corp.

William Price – Mr. Price has significant experience and expertise in the financial world, having served as the Chairman, CEO and CIO of RCM Capital Management LLC and as Global Chief Investment Officer of Allianz Global Investors AG. Mr. Price was a research analyst in the 1960's for well recognized firms in the US equity markets, taking on the additional responsibility of portfolio manager with Donaldson, Lufkin, Jenrette in 1970. Starting in 1977, Mr. Price became an early partner in RCM Capital Management and ultimately led the Company as CEO. RCM Capital Management had more than US\$30 billion under management upon his retirement in 2003.

16.B Code of Ethics

The Registrant has not adopted a formal written code of ethics given its relatively small size.

Directors, including the director/employee of the Registrant, are subject to the laws of the Province of British Columbia, Canada, whereby they are required to act honestly, in good faith and in the best interests of the Registrant. Also, the corporate secretary who is a securities lawyer is available to the management of the Registrant to provide a high standard of due care in the activities of the Registrant and to provide guidance when needed.

The Registrant expects all directors, officers and employees to abide by the following code of ethics which have been communicated to them:

- act with honesty and integrity and in an ethical manner resolve any actual or apparent conflicts of interest between personal and professional relationships;
- ensure that any public filings or announcements, whether they are statutory or regulatory filings or other documents submitted for public disclosure and communication, are accurate, complete, fair, timely and understandable in all material respects, taking into consideration applicable standards and regulations;
- compliance with applicable laws, rules and regulations; and
- prompt internal reporting of any violations, whether actual or potential, in the code of ethics.

16.C Principal Accountant Fees and Services

The following table discloses accounting fees and services of the Registrant:

(Stated in terms of Canadian dollars)

Edgar Filing: CANARC RESOURCE CORP - Form 20-F

Type of Services Rendered	2011 Fiscal Year (CAD\$)	2010 Fiscal Year (CAD\$)
(a) Audit Fees	\$65,000	\$58,100
(b) Audit-Related Fees	Nil	\$10,000
(c) Tax Fees	\$2,500	Nil
(d) All Other Fees	Nil	Nil

71

Canarc Resource Corp.
Form 20-F

At an Audit Committee meeting held in March 2012, the Audit Committee pre-approved all services to be performed by the auditors including certain non-audit services requested by management for the 2012 fiscal year until the next Audit Committee meeting concerning the financial statements for the year ended December 31, 2012, which services are not prohibited services under the independence requirements of the Securities and Exchange Commission or professional standards in Canada or the United States.

16.D Exemptions from the Listing Standards for Audit Committees

Not applicable.

16.E Purchases of Equity Securities by the Registrant and Affiliated Purchasers

None.

16.F Change in Registrant's Certifying Accountant

In the two most recent fiscal years 2010 and 2011, there was no change in the Registrant's certifying accountant.

16.G Corporate Governance

The Registrant is listed on the Toronto Stock Exchange and, under Canadian security laws and regulations, is required to report annually to its shareholders on its corporate governance practices and policies with reference to National Policy 58-201, Corporate Governance Guidelines and National Instrument 58-101, Disclosure of Corporate Governance Practices. The Registrant's corporate governance practices meet all mandated requirements and are not, in the opinion of management, materially different from other junior resource companies listed on the Toronto Stock Exchange. Item 6.C provides further details.

16.H Mine Safety Disclosure

The Registrant currently does not have any operating mines.

72

Canarc Resource Corp.
Form 20-F

PART III

ITEM 17. FINANCIAL STATEMENTS

Not Applicable

ITEM 18. FINANCIAL STATEMENTS

The consolidated financial statements of the Company have been prepared in accordance with IFRS as issued by the IASB. IFRS 1 has been applied with an adoption date of January 1, 2011 and a transition date of January 1, 2010, and all dollar amounts are expressed in United States dollars unless otherwise indicated. Previously the Company's consolidated financial statements were prepared in accordance with Canadian GAAP. Material measurement differences between Canadian GAAP and the accounting principles in the United States, as applicable to the Company, were described in the Company's previous consolidated financial statements.

The following financial statements and related schedules are included in this Item:

	Financial Statements	Page # in Sequential Numbering System
1.1	Report of Independent Registered Public Accounting Firm dated March 23, 2012	79
1.2	Consolidated statements of financial position as at December 31, 2011 and 2010 together with the consolidated statements of comprehensive loss, shareholders' equity and cash flows for each of the years in the two year period ended December 31, 2011 and 2010.	80

 - c. Evaluated the effectiveness of the Company's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the Company's internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting; and
5. The Company's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Company's auditors and the audit committee of the Company's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Company's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the Company's internal control over financial reporting.

DATED at Vancouver, British Columbia, Canada, as of May 14, 2012.

INDEPENDENT AUDITORS' REPORT
TO THE SHAREHOLDERS OF CANARC RESOURCE CORP.

We have audited the accompanying consolidated financial statements of Canarc Resource Corp., which comprise the consolidated statements of financial position as at December 31, 2011, December 31, 2010 and January 1, 2010, and the consolidated statements of comprehensive loss, shareholders' equity and cash flows for the years ended December 31, 2011 and December 31, 2010, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Canarc Resource Corp. as at December 31, 2011, December 31, 2010 and January 1, 2010, and the results of its operations and its cash flows for the years ended December 31, 2011 and December 31, 2010 in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the consolidated financial statements, which indicates that the Company incurred a net loss of \$1,209,000 during the year ended December 31, 2011 (2010 - \$1,396,000) and, as of that date, the Company's current liabilities exceeded its current assets by \$577,000 (2010 - \$1,149,000). These conditions, along with other matters set forth in Note 1, indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

1. Nature of Operations and Going Concern

Canarc Resource Corp. (the “Company”), a company incorporated under the laws of British Columbia on January 22, 1987, is in the mineral exploration business and has not yet determined whether its mineral properties contain reserves. The recoverability of amounts capitalized for mineral properties is dependent upon the existence of reserves in its mineral properties, the ability of the Company to arrange appropriate financing and receive necessary permitting for the exploration and development of its properties, and upon future profitable production or proceeds from the disposition thereof. The Company’s registered and corporate office is in Vancouver, BC, Canada.

The Company has incurred significant net losses of \$1,209,000 in 2011 (2010 – \$1,396,000), and has a deficit of \$46,815,000 as at December 31, 2011 (December 31, 2010 - \$46,975,000; January 1, 2010 - \$45,777,000). Furthermore, the Company has working capital deficiency of \$577,000 as at December 31, 2011 (December 31, 2010 – \$1,149,000; January 1, 2010 - \$842,000). These consolidated financial statements have been prepared on a going concern basis, which assumes the realization of assets and liquidation of liabilities in the normal course of business. The Company’s ability to continue as a going concern is dependent on the ability of the Company to raise debt or equity financings, and the attainment of profitable operations. Management would need to raise the necessary capital to meet its planned business objectives. There can be no assurance that management’s plans will be successful. These consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary, should the Company be unable to continue as a going concern, and such adjustments could be material.

2. Basis of Presentation

(a) Statement of compliance:

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board. These are the Company’s first annual consolidated financial statements prepared in accordance with IFRS, and IFRS 1 - First-time Adoption of International Financial Reporting (“IFRS 1”) has been applied. Prior consolidated financial statements were prepared in accordance with Canadian generally accepted accounting policies (“Canadian GAAP”).

Subject to certain IFRS 1 transition elections as disclosed in Note 18 the Company has consistently applied the same accounting policies to its opening IFRS consolidated statement of financial position as at January 1, 2010, and for all years as presented. The nature and effects of significant changes in accounting policies on the Company’s financial position and comprehensive loss from the transition from Canadian GAAP to IFRS are disclosed in Note 18.

(b) Approval of consolidated financial statements:

These consolidated financial statements were approved by the Company’s Board of Directors on March 23, 2012.

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

2. Basis of Presentation (continued)

(c) Basis of presentation:

These consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments which are measured at fair value, as disclosed in Note 5.

(d) Functional currency and presentation currency:

Effective January 1, 2011, the Company determined that its functional currency has changed from the United States dollar to the Canadian dollar but continues to maintain its presentation currency in the United States dollar. The change in functional currency was a result of the increased influence of the Canadian dollar on the economic environment in which the Company operates.

Prior to January 1, 2011 when the functional currency was in the United States dollar, accounts denominated in currencies other than the United States dollar have been translated as follows:

- Revenue and expense items at the rate of exchange in effect on the transaction date;
- Non-monetary assets and liabilities at historical exchange rates, unless such items are carried at market, in which case they are translated at the exchange rate in effect on the statement of financial position date; and
- Monetary assets and liabilities at the exchange rate at the statement of financial position date.

Exchange gains and losses are recorded in the consolidated statements of comprehensive loss in the period in which they occur.

Effective January 1, 2011, the functional currency changed to the Canadian dollar, and accounts denominated in currencies other than the Canadian dollar have been translated as follows:

- Revenue and expense items at the rate of exchange in effect on the transaction date;
- Monetary assets and liabilities at the exchange rate at the statement of financial position date;
- Non-monetary assets and liabilities at the historical exchange rates, unless such items are carried at fair value, in which case they are translated at the date when the fair value was determined; and
- Shareholders' equity items at historical exchange rates.

For presentation purposes, all amounts are then translated from the Canadian dollar functional currency to the United States dollar presentation currency for each period using the exchange rate at the end of each reporting period.

Exchange gains and losses arising from the presentation change are recorded as cumulative translation adjustment, which is included in accumulated other comprehensive income (loss).

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

2. Basis of Presentation (continued)

(e) Critical accounting estimates:

The preparation of financial statements in accordance with IFRS requires management to make estimates, assumptions and judgements that affect the application of accounting policies and the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements along with the reported amounts of revenues and expenses during the period. Actual results may differ from these estimates and, as such, estimates and underlying assumptions are reviewed on an ongoing basis. Revisions are recognized in the period in which the estimates are revised and in any future periods affected.

Significant areas requiring the use of management estimates relate to determining the recoverability of mineral property interests; the determination of accrued liabilities; accrued site remediation; flow-through obligations and deferred income tax liability; the variables used in the determination of the fair value of stock options granted, warrants issued and derivative liability for warrants; and the recoverability of deferred tax assets. While management believes the estimates are reasonable, actual results could differ from those estimates and could impact future results of operations and cash flows.

(f) New accounting standards and recent pronouncements:

All of the new and revised standards described below may be early adopted.

(i) IAS 27 Separate Financial Statements (2011)

This amended version of IAS 27 that now only deals with the requirements for separate financial statements, which have been carried over largely unamended from IAS 27 Consolidated and Separate Financial Statements. Requirements for consolidated financial statements are now contained in IFRS 10 Consolidated Financial Statements.

The standard is applicable to annual reporting periods beginning on or after January 1, 2013. If early adopted, it must be adopted together with IFRS 10, IFRS 11, IFRS 12 and IAS 28 (2011).

(ii) IAS 28 Investments in Associates and Joint Ventures (2011)

This standard supersedes IAS 28 Investments in Associates and prescribes the accounting for investments in associates and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures.

The standard defines “significant influence” and provides guidance on how the equity method of accounting is to be applied (including exemptions from applying the equity method in some cases). It also prescribes how investments in associates and joint ventures should be tested for impairment.

The standard is applicable to annual reporting periods beginning on or after January 1, 2013. If early adopted, it must be adopted together with IFRS 10, IFRS 11, IFRS 12 and IAS 27 (2011).

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

2. Basis of Presentation (continued)

(f) New accounting standards and recent pronouncements: (continued)

(iii) IFRS 9 Financial Instruments (2009)

IFRS 9 introduces new requirements for classifying and measuring financial assets, as follows:

- Debt instruments meeting both a “business model” test and a “cash flow characteristics” test are measured at amortized cost (the use of fair value is optional in some limited circumstances).
- Investments in equity instruments can be designated as “fair value through other comprehensive income” with only dividends being recognized in profit or loss.
- All other instruments (including all derivatives) are measured at fair value with changes recognized in the profit or loss.
- The concept of “embedded derivatives” does not apply to financial assets within the scope of the standard and the entire instrument must be classified and measured in accordance with the above guidelines.

This standard is applicable to annual reporting periods beginning on or after January 1, 2013.

(iv) IFRS 9 Financial Instruments (2010)

A revised version of IFRS 9 incorporating revised requirements for the classification and measurement of financial liabilities, and carrying over the existing de-recognition requirements from IAS 39 Financial Instruments: Recognition and Measurement.

The revised financial liability provisions maintain the existing amortized cost measurement basis for most liabilities. New requirements apply where an entity chooses to measure a liability at fair value through profit or loss – in these cases, the portion of the change in fair value related to changes in the entity's own credit risk is presented in other comprehensive income rather than within profit or loss.

The standard applies to annual periods beginning on or after January 1, 2015. This standard supersedes IFRS 9 (2009).

87

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

2. Basis of Presentation (continued)

(f) New accounting standards and recent pronouncements: (continued)

(v) IFRS 10 Consolidated Financial Statements

The standard requires a parent to present consolidated financial statements as those of a single economic entity, replacing the requirements previously contained in IAS 27 Consolidated and Separate Financial Statements and SIC-12 Consolidation - Special Purpose Entities.

The standard identifies the principles of control, determines how to identify whether an investor controls an investee and therefore must consolidate the investee, and sets out the principles for the preparation of consolidated financial statements.

The standard introduces a single consolidation model for all entities based on control, irrespective of the nature of the investee (i.e., whether an entity is controlled through voting rights of investors or through other contractual arrangements as is common in “special purpose entities”). Under IFRS 10, control is based on whether an investor has power over the investee, exposure, or rights, to variable returns from its involvement with the investee, and the ability to use its power over the investee to affect the amount of the returns.

The standard is applicable to annual reporting periods beginning on or after January 1, 2013. If early adopted, it must be adopted together with IFRS 11, IFRS 12, IAS 27 (2011) and IAS 28 (2011).

(vi) IFRS 11 Joint Arrangements

This standard replaces IAS 31 Interests in Joint Ventures, and requires a party to a joint arrangement to determine the type of joint arrangement in which it is involved by assessing its rights and obligations and then account for those rights and obligations in accordance with that type of joint arrangement.

Joint arrangements are either joint operations or joint ventures:

- A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement (joint operators) have rights to the assets, and obligations for the liabilities, relating to the arrangement. Joint operators recognize their assets, liabilities, revenue and expenses in relation to its interest in a joint operation (including their share of any such items arising jointly).
- A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement (joint venturers) have rights to the net assets of the arrangement. A joint venturer applies the equity method of accounting for its investment in a joint venture in accordance with IAS 28 Investments in Associates and Joint Ventures (2011). Unlike IAS 31, the use of “proportionate consolidation” to account for joint ventures is not permitted.

The standard is applicable to annual reporting periods beginning on or after January 1, 2013. If early adopted, it must be adopted together with IFRS 10, IFRS 12, IAS 27 (2011) and IAS 28 (2011).

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

2. Basis of Presentation (continued)

(f) New accounting standards and recent pronouncements: (continued)

(vii) IFRS 12 Disclosure of Interests in Other Entities

The standard requires the extensive disclosure of information that enables users of financial statements to evaluate the nature of, and risks associated with, interests in other entities and the effects of those interests on its financial position, financial performance and cash flows.

In high-level terms, the required disclosures are grouped into the following broad categories:

- Significant judgments and assumptions - such as how control, joint control, significant influence has been determined.
- Interests in subsidiaries - including details of the structure of the group, risks associated with structured entities, changes in control, and so on.
- Interests in joint arrangements and associates - the nature, extent and financial effects of interests in joint arrangements and associates (including names, details and summarized financial information).
- Interests in unconsolidated structured entities - information to allow an understanding of the nature and extent of interests in unconsolidated structured entities and to evaluate the nature of, and changes in, the risks associated with its interests in unconsolidated structured entities.

IFRS 12 lists specific examples and additional disclosures which further expand upon each of these disclosure objectives, and includes other guidance on the extensive disclosures required.

The standard is applicable to annual reporting periods beginning on or after January 1, 2013. If early adopted, it must be adopted together with IFRS 10, IFRS 11, IAS 27 (2011) and IAS 28 (2011).

(viii) IFRS 13 Fair Value Measurement

The standard replaces the guidance on fair value measurement in existing IFRS accounting literature with a single standard.

This IFRS defines fair value, provides guidance on how to determine fair value and requires disclosures about fair value measurements. However, IFRS 13 does not change the requirements regarding which items should be measured or disclosed at fair value.

89

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

2. Basis of Presentation (continued)

(f) New accounting standards and recent pronouncements: (continued)

(viii) IFRS 13 Fair Value Measurement (continued)

IFRS 13 applies when another IFRS requires or permits fair value measurements or disclosures about fair value measurements (and measurements, such as fair value less costs to sell, based on fair value or disclosures about those measurements). With some exceptions, the standard requires entities to classify these measurements into a “fair value hierarchy” based on the nature of the inputs:

- Level 1 - quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2 - inputs other than quoted market prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
 - Level 3 - unobservable inputs for the asset or liability.

Entities are required to make various disclosures depending upon the nature of the fair value measurement (e.g., whether it is recognized in the financial statements or merely disclosed) and the level in which it is classified.

The standard is applicable to annual reporting periods beginning on or after January 1, 2013.

(ix) Amendments to IFRS 7 Financial Instruments: Disclosures

The amendments to IFRS 7 Financial Instruments: Disclosures result from the IASB's comprehensive review of off balance sheet activities.

The amendments introduce additional disclosures, designed to allow users of financial statements to improve their understanding of transfer transactions of financial assets (for example, securitizations), including understanding the possible effects of any risks that may remain with the entity that transferred the assets. The amendments also require additional disclosures if a disproportionate amount of transfer transactions are undertaken around the end of a reporting period.

The amendments apply to annual periods beginning on or after July 1, 2011.

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

2. Basis of Presentation (continued)

(f) New accounting standards and recent pronouncements: (continued)

(x) Deferred Tax: Recovery of Underlying Assets (Amendments to IAS 12)

The amendments applies to IAS 12 Income Taxes to provide a presumption that recovery of the carrying amount of an asset measured using the fair value model in IAS 40 Investment Property will, normally, be through sale.

As a result of the amendments, SIC-21 Income Taxes — Recovery of Revalued Non-Depreciable Assets would no longer apply to investment properties carried at fair value. The amendments also incorporate into IAS 12 the remaining guidance previously contained in SIC-21, which is accordingly withdrawn.

The amendments are applicable to annual periods beginning on or after January 1, 2012.

(xi) Severe Hyperinflation and Removal of Fixed Dates for First-time Adopters (Amendments to IFRS 1)

The amendments apply to IFRS 1 First-time Adoption of International Financial Reporting Standards (IFRSs) to:

- Replace references to a fixed date of “January 1, 2004” with “the date of transition to IFRSs”, thus eliminating the need for companies adopting IFRSs for the first time to restate de-recognition transactions that occurred before the date of transition to IFRSs
- Provide guidance on how an entity should resume presenting financial statements in accordance with IFRSs after a period when the entity was unable to comply with IFRSs because its functional currency was subject to severe hyperinflation.

The amendments are applicable to annual periods beginning on or after July 1, 2011.

2. Basis of Presentation (continued)

91

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

- (f) New accounting standards and recent pronouncements: (continued)
- (xii) Presentation of Items of Other Comprehensive Income (“OCI”) (Amendments to IAS 1)

The amendments apply to IAS 1 Presentation of Financial Statements to revise the way other comprehensive income is presented.

The amendments:

- Preserve the amendments made to IAS 1 in 2007 to require profit or loss and OCI to be presented together, i.e., either as a single “statement of profit or loss and comprehensive income”, or a separate “statement of profit or loss' and a 'statement of comprehensive income” – rather than requiring a single continuous statement as was proposed in the exposure draft.
- Require entities to group items presented in OCI based on whether they are potentially reclassifiable to profit or loss subsequently. i.e., those that might be reclassified and those that will not be reclassified.
- Require tax associated with items presented before tax to be shown separately for each of the two groups of OCI items (without changing the option to present items of OCI either before tax or net of tax).

The amendments are applicable to annual reporting periods beginning on or after July 1, 2012.

- (xiii) IFRIC 20 Stripping Costs in the Production Phase of a Surface Mine

IFRIC 20 clarifies the requirements for accounting for stripping costs associated with waste removal in surface mining, including when production stripping costs should be recognized as an asset, how the asset is initially recognized, and subsequent measurement.

The Interpretation requires stripping activity costs which provide improved access to ore are recognized as a non-current “stripping activity asset” when certain criteria are met. The stripping activity asset is depreciated or amortized on a systematic basis, over the expected useful life of the identified component of the ore body that becomes more accessible as a result of the stripping activity, using the units of production method unless another method is more appropriate.

IFRIC 20 applies to annual periods beginning on or after January 1, 2013.

The Company has not yet assessed the impact of these standards and amendments or determined whether it will early adopt them.

3. Significant Accounting Policies

92

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements and in preparing the opening IFRS consolidated statement of financial position at January 1, 2010 for purposes of the transition to IFRS. IFRS 1 exemptions for first time adopters are disclosed in Note 18.

(a) Basis of consolidation:

These consolidated financial statements include the accounts of the Company and its significant subsidiaries including New Polaris Gold Mines Ltd. (100%). All significant intercompany transactions and balances are eliminated on consolidation.

(b) Financial instruments:

(i) Financial assets:

The Company classifies its financial assets in the following categories: fair value through profit or loss (“FVTPL”), loans and receivables, held-to-maturity (“HTM”) and available-for-sale (“AFS”). The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of financial assets at recognition.

Financial assets at FVTPL

Financial assets at FVTPL are initially recognized at fair value with changes in fair value recorded through profit or loss. Cash and cash equivalents are included in this category of financial assets.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are classified as current assets or non-current assets based on their maturity date. Loans and receivables are carried at amortized cost less any impairment. Loans and receivables comprise trade and other receivables.

Held to maturity

These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company’s management has the positive intention and ability to hold to maturity. HTM investments are initially recognized on their trade-date at fair value, and subsequently are measured at amortized cost using the effective interest rate method. If there is objective evidence that the investment is impaired, determined by reference to external credit ratings and other relevant indicators, the financial asset is measured at the present value of estimated future cash flows. Any changes to the carrying amount of the investment, including impairment losses, are recognized in the statement of comprehensive loss. The Company does not have any assets classified as HTM investments.

3. Significant Accounting Policies (continued)

Canarc Resource Corp.
Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(b) Financial instruments: (continued)

(i) Financial assets: (continued)

Available-for-sale financial assets

AFS financial assets are non-derivatives that are either designated as available-for sale or not classified in any of the other financial asset categories. Changes in the fair value of AFS financial assets are recognized as other comprehensive income and classified as a component of equity. AFS assets include investments in equities of other entities.

Management assesses the carrying value of AFS financial assets at least annually and any impairment charges are also recognized in profit or loss. When financial assets classified as AFS are sold, the accumulated fair value adjustments recognized in other comprehensive income are included in profit and loss.

(ii) Financial liabilities:

The Company classifies its financial liabilities in the following categories: FVTPL, other financial liabilities, and derivative financial liabilities.

Financial liabilities at FVTPL

Financial liabilities at FVTPL are initially recognized at fair value with changes in fair value recorded through profit or loss. The Company has no financial liabilities at FVTPL.

Other financial liabilities

Other financial liabilities are non-derivatives and are recognized initially at fair value, net of transaction costs, and are subsequently measured at amortized cost using the effective interest method. Any difference between the amounts originally received, net of transaction costs, and the redemption value is recognized in profit or loss over the period to maturity using the effective interest method.

Other financial liabilities are classified as current or non-current based on their maturity date. Financial liabilities include trade accounts payable, note payables, other payables, advances from non-controlling interest, deferred credits, and loans.

Derivative financial liabilities

Derivative financial liabilities are initially recognized at their fair value on the date the derivative contract is entered into and are subsequently re-measured at their fair value at each reporting period with changes in the fair value recognized in profit and loss. Derivative financial liabilities include warrants issued by the Company denominated in a currency other than the Company's functional currency.

3. Significant Accounting Policies (continued)

94

Canarc Resource Corp.
Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(b) Financial instruments: (continued)

(iii) Fair value hierarchy:

The Company categorizes financial instruments measured at fair value at one of three levels according to the reliability of the inputs used to estimate fair values. The fair value of financial assets and financial liabilities included in level 1 are determined by reference to quoted prices in active markets for identical assets and liabilities. Financial assets and liabilities in level 2 are valued using inputs other than quoted prices for which all significant inputs are based on observable market data. Level 3 valuations are based on inputs that are not based on observable market data.

(iv) Impairment of financial assets:

The Company assesses at each reporting date whether there is objective evidence that a financial asset or a group of financial assets is impaired. An evaluation is made as to whether a decline in fair value is 'significant' or 'prolonged' based on indicators such as significant adverse changes in the market, economic or legal environment.

Impairment losses on financial assets carried at amortized cost are reversed in subsequent periods if the amount of the loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized.

(v) Derecognition of financial assets and liabilities:

Financial assets are derecognized when the investments mature or are sold, and substantially all the risks and rewards of ownership have been transferred. A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expired. Gains and losses on derecognition are recognized within other income and finance costs respectively.

(c) Mineral properties:

All costs related to investments in mineral properties are capitalized on a property-by-property basis. Such costs include mineral property acquisition costs and exploration and development expenditures, net of any recoveries. The costs related to a property from which there is production, together with the costs of mining equipment, will be amortized using the unit-of-production method. When there is little prospect of further work on a property being carried out by the Company or its partners or when a property is abandoned or when the capitalized costs are not considered to be economically recoverable, the related property costs are written down to the amount recoverable.

From time to time, the Company may acquire or dispose of a mineral property interest pursuant to the terms of an option agreement. As the options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded. Option payments are recorded as property costs or recoveries when the payments are made or received. Proceeds received on the sale or option of the Company's property interest is recorded as a reduction of the mineral property cost. The Company recognizes in income those costs that are recovered on mineral property interests when amounts received or receivable are in excess of the carrying amount.

3. Significant Accounting Policies (continued)

95

Canarc Resource Corp.
Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(c) Mineral properties: (continued)

The amounts shown for mineral properties represent costs incurred to date and include advance net smelter return (“NSR”) royalties, less recoveries and write-downs, and are not intended to reflect present or future values.

(d) Equipment:

Equipment is recorded at cost and, for equipment subject to amortization, the Company uses the declining balance method at rates varying from 10% to 30% annually.

(e) Proceeds on unit offerings:

Proceeds received on the issuance of units, consisting of common shares and warrants, are first allocated to the fair value of the common shares with any residual value then allocated to warrants.

(f) Non-monetary transactions:

Common shares issued for consideration other than cash are valued at their quoted market price at the date of issuance.

(g) Flow-through common shares:

Flow-through common shares entitle a company that incurs certain resource expenditures in Canada to renounce them for tax purposes allowing the expenditures to be deducted for income tax purposes by the investors who purchased the shares. The proceeds from common shares issued under flow-through common share financing agreements are credited to share capital. The tax impact to the Company of the renunciation is recorded on the date that the renunciation is filed with taxation authorities, through a decrease in share capital and the recognition of a deferred tax liability.

A portion of the deferred income tax assets that were not previously recognized are recognized as a recovery of deferred income taxes in the consolidated statements of operations up to the amount of the deferred income tax liability or renouncement.

(h) Share-based payments:

The Company has a stock option plan that is described in Note 13(c). Share-based payments to employees are measured at the fair value of the instruments issued and amortized over the vesting periods. Share-based payments to non-employees are measured at the fair value of the goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The offset to the recorded cost is to the reserve for share-based payments. Consideration received on the exercise of stock options is recorded as share capital and the related reserve for share-based payments is transferred to share capital. Upon expiry, the recorded fair value is transferred from reserve for share-based payments to deficit.

3. Significant Accounting Policies (continued)

96

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(h) Share-based payments: (continued)

The Company has a share appreciation rights plan, which provides option holders the right to receive the number of common shares, valued at the quoted market price at the time of exercise of the stock options, that represent the share appreciation since granting the options. The fair value of the underlying stock option, which is cancelled on the exercise of the share appreciation rights, is transferred from the related reserve for share-based payments to share capital. The difference between the quoted market price, on the date the share appreciation right is exercised, of the shares issued and the fair value of the stock option is recorded as share capital and charged to profit or loss.

(i) Environmental rehabilitation:

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of mineral property interests and equipment, when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future rehabilitation cost estimates arising from the decommissioning of plant and other site preparation work is capitalized to mining assets along with a corresponding increase in the rehabilitation provision in the period incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. The rehabilitation asset is depreciated on the same basis as mining assets.

The Company's estimates of reclamation costs could change as a result of changes in regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to mining assets with a corresponding entry to the rehabilitation provision. The Company's estimates are reviewed annually for changes in regulatory requirements, discount rates, effects of inflation and changes in estimates.

Changes in the net present value, excluding changes in the Company's estimates of reclamation costs, are charged to profit and loss for the period.

The net present value of restoration costs arising from subsequent site damage that is incurred on an ongoing basis during production are charged to profit and loss in the period incurred.

The costs of rehabilitation projects that were included in the rehabilitation provision are recorded against the provision as incurred. The cost of ongoing current programs to prevent and control pollution is charged against profit and loss as incurred.

(j) Earnings (loss) per share:

Basic earnings (loss) per share is computed by dividing the net income (loss) for the period by the weighted average number of common shares outstanding during the period. The treasury stock method is used to calculate diluted earnings (loss) per common share amounts. Under the treasury stock method, the weighted average number of common shares outstanding used for the calculation of the diluted per common share amount assumes that the proceeds to be received on the exercise of dilutive share options and warrants are used to repurchase common shares at the average market price during the period. In the Company's case, diluted loss per common share presented is the same as basic loss per common share as the effect of outstanding options and warrants in the loss per common share calculation would be anti-dilutive.

3. Significant Accounting Policies (continued)

97

Canarc Resource Corp.
Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(k) Provisions:

Provisions are recorded when a present legal or constructive obligation exists as a result of past events where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the statement of financial position date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount receivable can be measured reliably.

(l) Income taxes:

The Company follows the asset and liability method for accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and losses carried forward. Deferred tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in profit or loss in the period that includes the substantive enactment date. Deferred tax assets are recognized to the extent that recovery is considered probable.

4. Management of Capital

The Company is an exploration stage company and this involves a high degree of risk. The Company has not determined whether its properties contain reserves of ore and currently has not earned any revenues from its mineral property interests and, therefore, does not generate cash flows from operations. The Company's primary source of funds comes from the issuance of share capital and proceeds from notes payable. The Company is not subject to any externally imposed capital requirements.

The Company defines its capital as share capital. Capital requirements are driven by the Company's exploration activities on its mineral property interests. To effectively manage the Company's capital requirements, the Company has a planning and budgeting process in place to ensure that adequate funds are available to meet its strategic goals. The Company monitors actual expenses to budget on all exploration projects and overhead to manage costs, commitments and exploration activities.

4. Management of Capital (continued)

98

Canarc Resource Corp.
Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

The Company has in the past invested its capital in liquid investments to obtain adequate returns. The investment decision is based on cash management to ensure working capital is available to meet the Company's short-term obligations while maximizing liquidity and returns of unused capital.

Although the Company has been successful at raising funds in the past through the issuance of share capital, it is uncertain whether it will be able to continue this financing in the future. The Company will continue to rely on debt and equity financings to meet its commitments as they become due, to continue exploration work on its mineral property interests and to meet its administrative overhead costs for the coming periods.

As at December 31, 2011, the Company was not subject to any externally imposed capital requirements.

There were no changes in the Company's approach to capital management during the year ended December 31, 2011.

5. Management of Financial Risk

The Company has classified its cash as financial assets at fair value through profit or loss; marketable securities and long-term investments as available-for-sale financial assets; receivables and prepaids and royalty receivable as loans and receivables; and accounts payable and accrued liabilities, notes payable and flow through obligation as other financial liabilities.

The Company has classified its derivative liability for warrants as derivative financial liabilities and are measured at fair value. All gains and losses are included in profit or loss in the period in which they arise.

The Company's long-term investment in shares of Aztec Metals Corp., a company sharing two common directors, ("Aztec") is classified as AFS but such shares do not have a quoted market price in an active market and are therefore measured at cost.

The fair values of the Company's receivables, accounts payable and accrued liabilities, notes payable, and flow-through obligation approximate their carrying values due to the short terms to maturity. Cash and marketable securities are measured at fair values using level 1 inputs. Disclosure is not made of the fair value of the long-term investments as the shares do not have a quoted market price in an active market. The fair value of the royalty receivable approximates its carrying value as it was initially recognized at fair value and subsequently measured at amortized cost using the effective interest method. The royalty receivable is level 3 in the fair value hierarchy as it is based on unobservable inputs. Derivative liability for warrants is level 2 in the fair value hierarchy as the Company uses the Black-Scholes option pricing model to determine the fair value of the warrants.

5. Management of Financial Risk (continued)

99

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

The Company is exposed in varying degrees to a variety of financial instrument related risks, including credit risk, liquidity risk, and market risk which includes foreign currency risk, interest rate risk and other price risk. The types of risk exposure and the way in which such exposure is managed are provided as follows.

(a) Credit risk:

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations.

The Company's credit risk is primarily attributable to its liquid financial assets including cash. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash with high-credit quality Canadian financial institutions. The royalty receivable is due from an unrelated entity, and the Company has not taken any steps to mitigate the credit risk associated with this receivable (Note 7(b)).

(b) Liquidity risk:

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due.

The Company ensures that there is sufficient capital in order to meet short-term business requirements, after taking into account the Company's holdings of cash and its ability to raise equity financings. The Company will require significant additional funding to meet its short-term liabilities, demand loans, flow through obligations and administrative overhead costs, and to maintain its mineral property interests in 2012.

Accounts payable and accrued liabilities are due in less than 90 days, and the notes payables are due on demand.

(c) Market risk:

The significant market risk exposures to which the Company is exposed are foreign currency risk, interest rate risk and other price risk.

(i) Foreign currency risk:

The Company's mineral properties and operations are in Canada. A certain portion of its operating expenses are incurred in Canadian dollars, and fluctuations in U.S. dollars would impact the cumulative translation adjustment of the Company and the values of its assets and liabilities as its financial statements are stated in U.S. dollars for presentation purposes.

5. Management of Financial Risk (continued)

100

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(c) Market risk: (continued)

(i) Foreign currency risk: (continued)

At December 31, 2011, the Company is exposed to currency risk for its U.S. dollar equivalent of assets and liabilities denominated in currencies other than U.S. dollars as follows:

	Held in Canadian dollars
Cash	\$32
Accounts payable and accrued liabilities	(74)
Net assets (liabilities)	\$(42)

Based upon the above net exposure as at December 31, 2011 and assuming all other variables remain constant, a 10% depreciation or appreciation of the U.S. dollar relative to the Canadian dollar could result in a decrease (increase) of approximately \$4,200 in the cumulative translation adjustment in the Company's shareholders' equity.

The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks at this time.

(ii) Interest rate risk:

In respect of financial assets, the Company's policy is to invest cash at floating rates of interest in cash equivalents, in order to maintain liquidity, while achieving a satisfactory return. Fluctuations in interest rates impact on the value of cash equivalents. Interest rate risk is not significant to the Company as it has no cash equivalents at period-end and the notes payable are stated at a fixed interest rate.

(iii)

Other price risk:

Other price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices.

The Company's other price risk includes equity price risk, whereby the Company's investment in marketable securities is subject to market price fluctuations.

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(a) Canada:

(i) New Polaris:

The New Polaris property, which is located in the Atlin Mining Division, British Columbia, is 100% owned by the Company subject to a 15% net profit interest which may be reduced to a 10% net profit interest within one year of commercial production by issuing 150,000 common shares to Rembrandt Gold Mines Ltd. Acquisition costs at December 31, 2011 include a reclamation bond for CAD\$250,000 (December 31, 2010 – CAD\$250,000; January 1, 2010 – CAD\$250,000).

(ii) Tay-LP:

On August 24, 2009, the Company entered into an option agreement with Ross River Minerals Inc. and Ross River Gold Ltd. (collectively, “Ross River”) to acquire a 100% interest in the Tay-LP gold property, located in Yukon, by paying CAD\$1 million in cash and/or shares and spending CAD\$1.5 million on exploration over a three-year period which can occur in two stages. In the first stage, the Company can earn a 51% interest by paying CAD\$150,000 in cash and spending CAD\$900,000 on exploration on or before October 31, 2011. In the second stage, the Company can earn an additional 49%, thereby totalling a 100% interest, by paying CAD\$850,000 in cash or common shares at the Company’s discretion and spending CAD\$600,000 on exploration on or before October 31, 2012. If the Company does not proceed with the second stage, then a joint venture would be formed. The Company shall pay to the optionors a gold bonus equal to CAD\$1 per ounce (“oz”) of gold for all proven and probable gold reserves and measured and indicated gold resources to a maximum of 1 million oz gold. The option agreement is subject to a NSR totalling 3% which can be reduced to 1.5% by payments totalling US\$1.95 million. Commencing on or before October 31, 2009 and continuing on or before October 31 of each subsequent year until the property is put into commercial production, the Company shall pay to the NSR holders an annual advance NSR royalty payments totalling CAD\$25,000 or that number of common shares of the Company and which shall be deducted from NSR obligations. The NSR of 3% shall be subject to maximum total payments based on one million payable ounces of gold being mined by commercial production but will be reduced to 500,000 payable ounces of gold if the NSR was reduced to 1.5%.

On September 3, 2011, the Company and Ross River amended the option agreement by increasing the cash payment of CAD\$50,000 to CAD\$75,000 due by October 31, 2011 (paid), deferring the exploration expenditures of CAD\$500,000 from October 31, 2011 to October 31, 2012 and exploration expenditures of CAD\$600,000 from October 31, 2012 to October 31, 2013, and including a cash payment of CAD\$25,000 due by October 31, 2012.

Cash payments of CAD\$75,000 were paid in 2011 (2010 – CAD\$80,000) for option payments. The Company issued 215,580 (2010 - 221,235) common shares at a value of CAD\$0.116 (2010 - CAD\$0.113) per common share as the annual advance NSR royalty for CAD\$25,000 for the Tay-LP property.

7. Mineral Properties (continued)

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(a) Canada: (continued)

(ii) Tay-LP: (continued)

In late March 2010, the Company entered into an option agreement with Cap-Ex Ventures Ltd. (“Cap-Ex”) whereby Cap-Ex can acquire 50% of the Company’s interest in the Tay-LP gold property by paying CAD\$100,000 of which CAD\$25,000 have been received, issuing 200,000 common shares of which 100,000 shares have been issued, incurring exploration expenditures of CAD\$675,000 by October 31, 2011, and maintaining the Company’s underlying option agreement in good standing until October 2011. Cap-Ex terminated the option agreement in March 2011.

(iii) Windfall Hills:

In April 2011, the Company entered into two option agreements to purchase 100% interests in two adjacent gold properties located in British Columbia. The Company can acquire a 100% interest in the Atna properties by making \$750,000 in cash payments over a four year period (\$50,000 paid), honouring a pre-existing 1.5% NSR production royalty that can be purchased for CAD\$1 million, and granting the vendor a 2% NSR production royalty.

The Company can acquire a 100% interest in the Dunn properties by making CAD\$250,000 in cash payments over a four year period (CAD\$15,000 paid), and a final bonus payment based on all gold resources estimated in an independent NI 43-101 technical report. The formula for the bonus payment is \$30 per oz for measured resources, \$20 per oz for indicated resources, and \$10 per oz for inferred resources.

(iv) Devil’s Thumb:

In May 2011, the Company staked three gold properties northeast of its Windfall Hills properties in central British Columbia.

(b) Sara Kreek, Suriname:

As at December 31, 2005, the Company held 80% of the shares of Sara Kreek Resource Corporation N.V., the company that holds the Sara Kreek concession. On April 15, 2006, the Company entered into a Settlement and Termination Agreement with Suriname Wylap Development N.V. (“Wylap Development”) to transfer its interest in Sara Kreek Resource to Wylap Development. The Company received a cash payment of \$400,000 in 2006 and shall receive the greater of \$50,000 per year, payable semi-annually, or 1.5% royalty on annual gross production from the Sara Kreek property until December 31, 2011, in settlement of all claims, loans and advances owed to the Company. The Company has received \$50,000 in annual royalties with final royalties of \$50,000 received in 2011.

7. Mineral Properties (continued)

104

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(b) Sara Kreek, Suriname: (continued)

The royalty receivable has been determined using the effective interest rate method. The expected future cash flows have been discounted using the effective interest rate to determine the present value as at December 31, 2011:

Present value of expected cash flows from royalties as at January 1, 2010	\$96	
Add: Accretion for the year	4	
Less: Royalty received during the year	(50)
Present value of expected cash flows from royalties as at December 31, 2010	50	
Less: Royalty received during the year	(50)
Royalty receivable as at December 31, 2011	\$-	

(c) Relief Canyon, United States:

In December 2010, the Company was the accepted bidder to acquire an open pit, heap leach gold mine through a bankruptcy court auction held in Reno, Nevada. The Company agreed to purchase the Relief Canyon gold mine assets from Firstgold Corporation ("Firstgold") for \$11 million, subject to a due diligence period which expired on February 4, 2011. As a condition of its winning bid, the Company paid a non-refundable deposit of \$300,000 in December 2010 to Firstgold in trust pending the Company's due diligence, and was also obligated to pay \$20,000 bi-weekly to Firstgold for its operating expenses during the due diligence period. If the Company elected not to proceed with the purchase of the Relief Canyon gold mine assets, the Company was obligated to pay an additional \$300,000 to Firstgold but in return, Firstgold would transfer ownership of its fully built, permitted and operating commercial assay laboratory located near the Relief Canyon mine-site to the Company.

To finance the acquisition, the Company arranged a CAD\$12 million bridge loan with Effisolar Energy Corporation ("Effisolar"), subject to Effisolar's due diligence, execution of definitive loan documents and regulatory and exchange approvals. The bridge loan was to close on or before February 3, 2011, matured in one year, bore simple annual interest rate of 12%, and was to be secured by a first charge on the Relief Canyon gold mine assets. If the Company elected not to proceed with the purchase of the Relief Canyon gold mine assets whereby the acquisition of the commercial assay laboratory would then need to be financed, the Company arranged a separate CAD\$300,000 convertible loan with Effisolar, subject to Effisolar's due diligence, execution of definitive loan documents and regulatory and exchange approvals. At the Company's election, the convertible loan was to close on or before February 3, 2011, mature in one month, bear no interest and automatically convert into common shares of the Company based on the 10-day average closing price on the Toronto Stock Exchange ("TSX").

(c) Relief Canyon, United States: (continued)

105

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

In January 2011, after conducting due diligence, both the Company and Effisolar decided not to proceed with the Relief Canyon project. In early February 2011, the Company paid an additional \$300,000 to Firstgold whereby ownership of the commercial assay laboratory was transferred to the Company. The Company issued a convertible debenture for CAD\$300,000 to Effisolar for the interest-free loan from Effisolar, which was then converted into 1,282,051 common shares of the Company on March 2, 2011.

In May 2011, the Company disposed of the assay laboratory for \$600,000 plus recovery of out-of-pocket expenses incurred by the Company.

(d) Expenditure options:

As at December 31, 2011, to maintain the Company's interest and/or to fully exercise the options under various property agreements covering its properties, the Company must make payments to the optionors as follows:

	Option Payments (CAD\$000s)	Option Payments (US\$000s)	Exploration Commitments (1) (CAD\$000s)	Advance Royalty Payments (CAD\$000s)	Net Smelter Reduction (US\$000s)	Number of Shares
New Polaris (Note 7(a)(i)):						
Net profit interest reduction or buydown						150,000
Tay-LP (Note 7(a)(ii)):						
October 31, 2012	\$ 25		\$ 215			
October 31, 2013	850		600			
Annual advance royalty payments until commercial production						
				\$ 25		
Net smelter reduction from 3% to 1.5%						
					\$ 1,950	
Windfall Hills (Note 7(a)(iii)):						
Atna properties:						
April 12, 2012		\$ 100				
April 12, 2013		150				
April 12, 2014		200				
April 12, 2015		250				

Dunn properties:

April 20, 2012	25						
April 20, 2013	35						
April 20, 2014	50						
April 20, 2015	125						
		\$ 1,110	\$700	\$ 815	\$ 25	\$1,950	150,000

(1) Exploration commitments for the Tay-LP property are adjusted for management fees of 5% and 10% and exploration expenditures incurred by Cap-Ex.

7. Mineral Properties (continued)

(d) Expenditure options: (continued)

106

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

These amounts may be reduced in the future as the Company determines which properties to continue to explore and which to abandon.

(e) Title to mineral property interests:

The Company has diligently investigated rights of ownership of all of its mineral properties/concessions and, to the best of its knowledge, all agreements relating to such ownership rights are in good standing. However, all properties and concessions may be subject to prior claims, agreements or transfers, and rights of ownership may be affected by undetected defects.

(f) Realization of assets:

The Company's investment in and expenditures on its mineral property interests comprise a significant portion of the Company's assets. Realization of the Company's investment in these assets is dependent on establishing legal ownership of the properties, on the attainment of successful commercial production or from the proceeds of their disposal. The recoverability of the amounts shown for mineral property interests is dependent upon the existence of reserves, the ability of the Company to obtain necessary financing to complete the development of the properties, and upon future profitable production or proceeds from the disposition thereof.

(g) Environmental:

Environmental legislation is becoming increasingly stringent and costs and expenses of regulatory compliance are increasing. The impact of new and future environmental legislation of the Company's operation may cause additional expenses and restrictions.

If the restrictions adversely affect the scope of exploration and development on the mineral properties, the potential for production on the property may be diminished or negated.

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous materials and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties and properties in which it has previously had an interest. The Company is not aware of any existing environmental problems related to any of its current or former properties that may result in material liability to the Company.

Additions	-	3	(3)
Balance, December 31, 2011	\$10	\$ 3	\$7

9. Long-Term Investments

As at December 31, 2011, the Company had an interest of 9% in Aztec (December 31, 2010 and January 1, 2010 – 9%) and Nil% in Caza Gold Corp. (“Caza”) (December 31, 2010 – Nil% and January 1, 2010 – 7%).

There is no separately quoted market value for the Aztec shares and the fair value cannot be reliably determined. Therefore they are recorded at cost.

10. Notes Payable

Balance, January 1, 2010	\$63
Add:	
Accrued interest during the year	7
Loan bonus	7
Currency translation adjustment	4
Balance, December 31, 2010	81
Add: Accrued interest during the year	9
Less: Currency translation adjustment	(2)
Balance, December 31, 2011	\$88

In May 2009, the Company received CAD\$62,030 in demand loans from certain directors and an officer of the Company. The loans are repayable on demand and bore an interest rate of 9% per annum which was increased to 12% effective September 1, 2010, and were previously secured by the Company’s shareholdings in Caza Gold Corp., a company with one common director (“Caza”), at CAD\$0.25 per share of Caza which has been replaced by a loan bonus of 12% payable upon repayment effective September 1, 2010. As at December 31, 2011, notes payable includes interest accrual of CAD\$19,800 (December 31, 2010 - CAD\$10,600; January 1, 2010 - CAD\$3,700) and loan bonus accrual of CAD\$7,400 (December 31, 2010 – CAD\$7,400; January 1, 2010 - \$Nil).

In March 2012, the Company arranged demand loans of CAD\$200,000 from certain directors and an officer of the Company. The loans are repayable on demand and bear an interest rate of 12% compounded monthly with interest payable semi-annually. Demand loans of CAD\$150,000 have been received by the Company.

11. Flow-through Obligation

108
Canarc Resource Corp.
Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

Pursuant to an audit by the Canada Revenue Agency (the "CRA") which was completed in June 2010, CRA disallowed approximately CAD\$1.01 million in exploration expenditures incurred in 2007 as Canadian exploration expenditures ("CEE") of which approximately CAD\$795,000 as being disqualified as CEE for flow-through purposes. The Company accrued liabilities of approximately CAD\$146,300 (December 31, 2010 - CAD\$175,000; January 1, 2010 - \$377,000) for estimated indemnities related to the disqualified CEE for flow-through purposes and CAD\$51,700 (December 31, 2010 - CAD\$50,000; January 1, 2010 - \$Nil) in accrued interests related to the indemnities. Should the estimate change in the future, it may affect future results of operations and cash flows. In 2011, the Company did pay CAD\$37,900 (2010 - \$Nil) including interest for indemnities relating to ineligible CEE for flow-through purposes.

12. Derivative Liability for Warrants

Balance, January 1, 2010	\$ 193
Add: Unrealized gain from derivative warrants	913
Less: Fair value from the exercise of derivative warrants	(24)
Balance, December 31, 2010	1,082
Less: Elimination of derivative liability for warrants due to change in functional currency	(1,082)
Balance, December 31, 2011	\$-

All of the Company's outstanding share purchase warrants have exercise prices which are denominated in Canadian dollars.

Prior to January 1, 2011, the Company's functional currency was the U.S. dollar, which resulted in the warrants being considered a derivative. Accordingly, the Company's share purchase warrants were classified and accounted for as a derivative liability at fair value through profit and loss.

Effective January 1, 2011, the Company's functional currency changed from the U.S. dollar to the Canadian dollar. Accordingly, the outstanding warrants are no longer treated as a derivative liability, and the corresponding recovery of \$1,082,000 has been recognized in deficit.

13. Share Capital

109

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(a) Authorized:

The authorized share capital of the Company is comprised of an unlimited number of common shares without par value.

(b) Issued:

(i) In February 2011, the Company issued a convertible debenture for CAD\$300,000 to Effisolar for the interest-free loan from Effisolar, which was then converted into 1,282,051 common shares of the Company on March 2, 2011. Note 7(c) provides further details.

In February 2011, the Company renounced CAD\$4,760 in exploration expenditures from the proceeds of the flow-through private placements in 2009, resulting in the recognition of a deferred income tax recovery of approximately \$1,200.

On November 1, 2011, the Company issued 215,580 common shares at a price of CAD\$0.116 per share as the annual advance NSR royalty for CAD\$25,000 for the Tay-LP property. Note 7(a)(ii) provides further details.

(ii) In February 2010, the Company renounced CAD\$475,200 in exploration expenditures from the proceeds of the flow-through private placements in 2009, resulting in the recognition of a deferred income tax recovery of approximately \$113,000.

Pursuant to an audit by the CRA in 2009, the Company initially estimated \$661,700 in exploration expenditures which do not qualify as CEE for flow-through purposes. In June 2010, it was determined that CAD\$795,000 as being disqualified for CEE for flow-through purposes, resulting in a deferred income tax expense of \$24,000. Note 11 provides further details.

On October 19, 2010, the Company issued 221,235 common shares at a price of CAD\$0.113 per share as the annual advance NSR royalty for CAD\$25,000 for the Tay-LP property. Note 7(a)(ii) provides further details.

On December 13, 2010, the Company closed a private placement for 8.5 million units at CAD\$0.15 per unit for gross proceeds of CAD\$1,275,000. Each unit was comprised of one common share and one-half of one share purchase warrant; each whole share purchase warrant is exercisable to acquire one common share at CAD\$0.22 until June 13, 2012.

110

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(c) Stock option plan:

The Company has a stock option plan that allows it to grant options to its employees, directors and consultants to acquire up to 16,335,000 common shares, of which options for 10,115,000 common shares are outstanding as at December 31, 2011. The exercise price of each option cannot be lower than the last recorded sale of a board lot on the TSX during the trading day immediately preceding the date of granting or, if there was no such date, the high/low average price for the common shares on the TSX based on the last five trading days before the date of the grant. Options have a maximum term of ten years and terminate 30 days following the termination of the optionee's employment, except in the case of death, in which case they terminate one year after the event. Vesting of options is made at the discretion of the board at the time the options are granted.

At the discretion of the board, certain option grants provide the holder the right to receive the number of common shares, valued at the quoted market price at the time of exercise of the stock options, that represent the share appreciation since granting the options.

The continuity of outstanding stock options for the years ended December 31, 2011 and 2010 is as follows:

	2011		2010	
	Number of Shares	Weighted average exercise price (CAD\$)	Number of Shares	Weighted average exercise price (CAD\$)
Outstanding balance, beginning of year	9,410,000	\$0.31	8,665,000	\$0.38

	10,115,000	2.62	\$0.24	7,267,000	2.00	\$0.28

During the year ended December 31, 2011, the Company recognized share-based payments of \$241,000 (2010 - \$143,000), net of forfeitures, based on the fair value of options that were earned by the provision of services during the period. Share-based payments are segregated between directors and officers, employees and consultants as follows:

	2011	2010
Directors and officers	\$225	\$133
Employees	16	10
	\$241	\$143

13. Share Capital (continued)

(c) Stock option plan: (continued)

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

The weighted average fair value of stock options granted and the weighted average assumptions used to calculate share-based payments for stock option grants are estimated using the Black-Scholes option pricing model as follows:

	2011		2010
Number of stock options granted	2,220,000		2,740,000
Fair value of stock options granted (CAD\$)	\$0.11		\$0.08
Market price of shares on grant date (CAD\$)	\$0.14		\$0.10
Pre-vest forfeiture rate	1.43	%	0.73
Risk-free interest rate	2.22	%	2.16
Expected dividend yield	0	%	0
Expected stock price volatility	108	%	105
Expected option life in years	4.86		4.87

Expected stock price volatility is based on the historical price volatility of the Company's common shares.

Stock options granted in 2011 and 2010 are subject to vesting provisions in which 20% of the options vest immediately on the grant date and 20% vest every six months thereafter.

Stock options for 325,000 common shares expired unexercised in January 2012 and stock options for 220,000 common shares were exercised in March 2012.

In March 2012, the Company granted 1,400,000 stock options with an exercise price of CAD\$0.10 and which are exercisable for a period of up to one year and are subject to vesting provisions in which 25% of the options vest immediately on the grant date and 25% vest every three months thereafter.

(d) Warrants:

At December 31, 2011, the Company had outstanding warrants as follows:

Warrants (Note 13(d))	4,250,000
Balance, December 31, 2011	14,365,000

(f) Shareholder rights plan:

On May 31, 2005, the shareholders of the Company approved a shareholder rights plan (the "Plan") that became effective on April 30, 2005. The Plan is intended to ensure that any entity seeking to acquire control of the Company makes an offer that represents fair value to all shareholders and provides the board of directors with sufficient time to assess and evaluate the offer, to permit competing bids to emerge, and, as appropriate, to explore and develop alternatives to maximize value for shareholders. Under the Plan, each shareholder at the time of the Plan's adoption was issued one Right for each common share of the Company held. Each Right entitles the registered holder thereof, except for certain "Acquiring Persons" (as defined in the Plan), to purchase from treasury one common share at a 50% discount to the prevailing market price, subject to certain adjustments intended to prevent dilution. The Rights are exercisable after the occurrence of specified events set out in the Plan generally related to when a person, together with affiliated or associated persons, acquires, or makes a take-over bid to acquire, beneficial ownership of 20% or more of the outstanding common shares of the Company. The Rights expire on April 30, 2015.

Legal	80	62
Office and sundry	93	121
Regulatory	52	56
	\$296	\$308

15. Related Party Transactions

Key management includes directors (executive and non-executive) and senior management. The compensation paid or payable to key management for employee services is disclosed in the table below.

Except as disclosed elsewhere in the consolidated financial statements, the Company had the following general and administrative costs with related parties during 2011 and 2010:

	Years ended December 31,		Net balance receivable (payable) as at December 31,	
	2011	2010	2011	2010
Key management compensation:				
Executive salaries and remuneration	\$473	\$291	\$(14)	\$-
Directors fees	40	39	(146)	(109)
Share-based payments	212	116	-	-
	\$725	\$446	\$(160)	\$(109)
Legal fees incurred to a law firm in which a senior officer of the Company is a partner	\$72	\$71	\$83	\$62
Net office, sundry, rent and salary allocations recovered from (incurred to) company(s) sharing certain common director(s)	\$55	\$88	\$16	\$(4)

The above transactions are incurred in the normal course of business.

16. Segment Disclosures

115

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands)

The Company has one operating segment, being mineral exploration, with assets located in Canada, as follows:

	2011			2010		
	Canada	U.S.A.	Total	Canada	U.S.A.	Total
Mineral property interests	\$12,910	\$-	\$12,910	\$12,724	\$-	\$12,724
Deposit on asset acquisition	-	-	-	-	300	300
Equipment	7	-	7	10	-	10
Total assets	13,239	-	13,239	13,600	300	13,900

17. Deferred Income Taxes

(a) A reconciliation of income tax provision computed at Canadian statutory rates to the reported income tax provision is provided as follows:

	2011	2010
Loss for the year	\$(1,210)	\$(1,489)
Canadian statutory tax rate	26.5 %	28.5 %
Income tax benefit computed at statutory rates	\$(321)	\$(424)
Temporary differences	17	(74)
Items non-deductible for income tax purposes	70	238
Benefits of tax attributes and other items	14	398
Unused tax losses and tax offsets not recognized in tax asset	206	26
Effect of change in tax rate	13	37
Effect of foreign exchange	-	(294)
Deferred income tax recovery	\$(1)	\$(93)

Effective January 1, 2011, the Canadian federal corporate tax rate decreased from 18.0% to 16.5% and the British Columbia provincial tax rate decreased from 10.5% to 10.0%. The overall reduction in tax rates has resulted in a decrease in the Company's statutory tax rate from 28.5% to 26.5%.

17. Deferred Income Taxes (continued)

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands)

(b) The tax effected items that give rise to significant portions of the deferred income tax assets and deferred income liabilities at December 31, 2011, December 31, 2010 and January 1, 2010 are presented below:

	December 31, 2011	December 31, 2010	January 1, 2010
Deferred tax assets			
Capital losses carried forward	\$7	\$-	\$-
Tax value over book value of equipment	101	102	-
Deferred tax assets	108	102	-
Deferred tax liabilities			
Book value over tax value of marketable securities	(7)	-	-
Book value over tax value of mineral properties	(101)	(102)	-
Deferred tax liabilities	(108)	(102)	
Net deferred tax assets	\$-	\$-	\$-

(c) The Company recognizes tax benefits on losses or other deductible amounts where the probable criteria for the recognition of deferred tax assets have been met. The Company's unrecognized deductible temporary differences and unused tax losses for which no deferred tax asset is recognized consist of the following amounts:

	December 31, 2011	December 31, 2010	January 1, 2010
Non-capital losses	\$7,455	\$6,746	\$6,512
Capital losses	20	49	46
Share issue costs	70	99	213
Tax value over book value of mineral properties	716	732	480
Tax value over book value of equipment	1,226	1,256	1,526
Unrecognized deductible temporary differences	\$9,487	\$8,882	\$8,777

17. Deferred Income Taxes (continued)

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands)

As at December 31, 2011, the Company's unrecognized unused non-capital losses have the following expiry dates:

	2014	\$705
	2015	86
	2026	766
	2027	1,690
	2028	774
	2029	1,645
	2030	932
	2031	857
		\$7,455

Funds raised through the issuance of flow-through shares are required to be expended on qualified Canadian mineral exploration expenditures as defined pursuant to Canadian income tax legislation. In 2011, the Company expended funds of CAD\$Nil (2010 – CAD \$4,761) in mineral exploration expenditures from the private placement of flow-through shares in 2009.

18. Transition to IFRS

118

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands)

The accounting policies as disclosed in Note 3 have been applied in preparing the consolidated financial statements for the year ended December 31, 2011, the comparative information presented in these consolidated financial statements for the year ended December 31, 2010 and the preparation of an opening IFRS balance sheet at January 1, 2010 (the Company's date of transition).

(a) IFRS 1:

In preparing the consolidated financial statements, the Company has applied IFRS 1 which provides guidance for an entity's initial adoption of IFRS. IFRS 1 gives entities adopting IFRS for the first time a number of optional exemptions and mandatory exceptions, in certain areas, to the general requirement for full retrospective application of IFRS. The following are the optional exemptions available under IFRS 1 that the Company has elected to apply:

(i) Business combinations:

The Company has elected to apply IFRS 3 Business Combinations, prospectively to business combinations that occur after the date of transition. The Company has elected this exemption under IFRS 1, which removes the requirement to retrospectively restate all business combinations prior to the date of transition to IFRS.

(ii) Share-based payments:

The Company elected to not apply IFRS 2 Share-based Payments, to equity instruments granted before November 7, 2002 and those granted but fully vested before the date of transition to IFRS. As a result, the Company has applied IFRS 2 for stock options granted after November 7, 2002 that are not fully vested at January 1, 2010.

18. Transition to IFRS (continued)

119

Canarc Resource Corp.

Form 20-F

CANARC RESOURCE CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(b) Adjustments on transition to IFRS:

IFRS has many similarities with Canadian GAAP as it is based on a similar conceptual framework. However, there are important differences with regard to recognition, measurement and disclosure. Although adoption of IFRS did not change the Company's actual cash flows, it did result in changes to the Company's statements of financial position, statements of comprehensive loss and statements of shareholders' equity as set out below:

(i) Warrants:

Under Canadian GAAP, the Company classified warrants which were exercisable in Canadian dollars to purchase common shares (a currency other than the Company's functional currency) as equity instruments. Under IFRS, warrants issued by the Company to purchase common shares at an exercise price which is stated in a currency other than the Company's functional currency are considered derivative financial liabilities. The exercise price is fixed in Canadian dollars but the Company's functional currency prior to January 1, 2011 was the U.S. dollar, resulting in a variable amount of cash when the warrants are exercised. Such warrants are required to be measured and recognized at fair value with changes to initial recognition charged to operations. The Company has determined fair value using the Black-Scholes option pricing model. Effective January 1, 2011, the Company's functional currency changed from U.S. dollars to Canadian dollar, and therefore no further derivative liability was recognized for its warrants.

(ii) Share-based payments:

Under Canadian GAAP, the Company accounts for forfeitures of stock option as they occur. For IFRS, estimates of forfeitures are initially recognized when stock options are granted and subsequently adjusted for actual forfeitures as they occur. The Company has recognized vesting of stock options on an accelerated grading basis which is similar to IFRS.

Under Canadian GAAP, expired unexercised stock options remained in contributed surplus. On transition to IFRS, the Company elected to change its accounting policy for the treatment of share-based payments whereby amounts included in the reserve for share-based payments for expired unexercised stock options are transferred from the reserve for share-based payments to deficit.

(iii) Income tax:

Under Canadian GAAP, deferred tax balances are calculated in the currency in which the taxes are paid and then converted to the accounting presentation currency at the current exchange rate, whereas IFRS requires that deferred taxes be determined in an entity's functional accounting currency by comparing the historic non-monetary accounting basis to the tax basis converted at the current exchange rate. Adjustments arise from this different treatment when an entity's functional currency differs from that in which the entity calculates and pays tax. The Company's adjustments for this difference primarily relate to its mineral properties which were maintained in Canadian dollars while the Company's functional currency prior to January 1, 2011 was the United States dollar.

(tabular dollar amounts expressed in thousands of United States dollars, except per share amounts)

(c) Reconciliation from Canadian GAAP to IFRS:

A reconciliation of the above noted changes is included in these following consolidated statements of financial position and consolidated statements of comprehensive loss for the dates noted below. The effects of transition from Canadian GAAP to IFRS on the cash flow are not material; therefore a reconciliation of cash flows has not been presented.

Transitional Consolidated Statement of Financial Position – January 1, 2010
