UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

---

Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2015

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number 000-03683

Trustmark Corporation  
(Exact name of registrant as specified in its charter)

Mississippi 64-0471500  
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

248 East Capitol Street, Jackson, Mississippi 39201  
(Address of principal executive offices) (Zip Code)

(601) 208-5111  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  
No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: TRUSTMARK CORP - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b of the Exchange Act.

Large accelerated filer	Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company)	Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  
Yes            No

As of July 31, 2015, there were 67,557,395 shares outstanding of the registrant’s common stock (no par value).

## Forward-Looking Statements

Certain statements contained in this Quarterly Report on Form 10-Q constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. You can identify forward-looking statements by words such as “may,” “hope,” “will,” “should,” “expect,” “plan,” “anticipate,” “intend,” “believe,” “estimate,” “predict,” “potential,” “could,” “future” or the negative of those terms or other words of similar meaning. You should read statements that contain these words carefully because they discuss our future expectations or state other “forward-looking” information. These forward-looking statements include, but are not limited to, statements relating to anticipated future operating and financial performance measures, including net interest margin, credit quality, business initiatives, growth opportunities and growth rates, among other things, and encompass any estimate, prediction, expectation, projection, opinion, anticipation, outlook or statement of belief included therein as well as the management assumptions underlying these forward-looking statements. You should be aware that the occurrence of the events described under the caption “Risk Factors” in Trustmark’s filings with the Securities and Exchange Commission could have an adverse effect on our business, results of operations and financial condition. Should one or more of these risks materialize, or should any such underlying assumptions prove to be significantly different, actual results may vary significantly from those anticipated, estimated, projected or expected.

Risks that could cause actual results to differ materially from current expectations of Management include, but are not limited to, changes in the level of nonperforming assets and charge-offs, local, state and national economic and market conditions, including the extent and duration of the current volatility in the credit and financial markets as well as crude oil prices, changes in our ability to measure the fair value of assets in our portfolio, material changes in the level and/or volatility of market interest rates, the performance and demand for the products and services we offer, including the level and timing of withdrawals from our deposit accounts, the costs and effects of litigation and of unexpected or adverse outcomes in such litigation, our ability to attract noninterest-bearing deposits and other low-cost funds, competition in loan and deposit pricing, as well as the entry of new competitors into our markets through de novo expansion and acquisitions, economic conditions, including the potential impact of issues relating to the European financial system, and monetary and other governmental actions designed to address the level and volatility of interest rates and the volatility of securities, currency and other markets, the enactment of legislation and changes in existing regulations, or enforcement practices, or the adoption of new regulations, changes in accounting standards and practices, including changes in the interpretation of existing standards, that affect our consolidated financial statements, changes in consumer spending, borrowings and savings habits, technological changes, changes in the financial performance or condition of our borrowers, changes in our ability to control expenses, changes in our compensation and benefit plans, greater than expected costs or difficulties related to the integration of acquisitions or new products and lines of business, natural disasters, environmental disasters, acts of war or terrorism, and other risks described in our filings with the Securities and Exchange Commission.

Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. Except as required by law, we undertake no obligation to update or revise any of this information, whether as the result of new information, future events or developments or otherwise.

Trustmark Corporation and Subsidiaries  
Notes to Consolidated Financial Statements  
(Unaudited)

Note 1 – Business, Basis of Financial Statement Presentation and Principles of Consolidation

Trustmark Corporation (Trustmark) is a bank holding company headquartered in Jackson, Mississippi. Through its subsidiaries, Trustmark operates as a financial services organization providing banking and financial solutions to corporate institutions and individual customers through 201 offices in Alabama, Florida, Mississippi, Tennessee and Texas.

The consolidated financial statements include the accounts of Trustmark and all other entities in which Trustmark has a controlling financial interest. All significant intercompany accounts and transactions have been eliminated in consolidation. Certain reclassifications have been made to prior period amounts to conform to the current period presentation.

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements and should be read in conjunction with the consolidated financial statements, and notes thereto, included in Trustmark's 2014 Annual Report on Form 10-K.

Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period. In the opinion of Management, all adjustments (consisting of normal recurring accruals) considered necessary for the fair presentation of these consolidated financial statements have been included. The preparation of financial statements in conformity with these accounting principles requires Management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and income and expense during the reporting periods and the related disclosures. Although Management's estimates contemplate current conditions and how they are expected to change in the future, it is reasonably possible that in 2015 actual conditions could vary from those anticipated, which could affect Trustmark's results of operations and financial condition. The allowance for loan losses, the amount and timing of expected cash flows from acquired loans and the Federal Deposit Insurance Corporation (FDIC) indemnification asset, the valuation of other real estate, the fair value of mortgage servicing rights, the valuation of goodwill and other identifiable intangibles, the status of contingencies and the fair values of financial instruments are particularly subject to change. Actual results could differ from those estimates.

Edgar Filing: TRUSTMARK CORP - Form 10-Q

Total	\$2,352,013	\$34,131	\$(11,577)	\$2,374,567	\$1,170,685	\$15,156	\$(2,995)	\$1,182,846

During the fourth quarter of 2013, Trustmark reclassified approximately \$1.099 billion of securities available for sale to securities held to maturity. The securities were transferred at fair value, which became the cost basis for the securities held to maturity. At the date of transfer, the net unrealized holding loss on the available for sale securities totaled approximately \$46.6 million (\$28.8 million, net of tax). The net unrealized holding loss is amortized over the remaining life of the securities as a yield adjustment in a manner consistent with the amortization or accretion of the original purchase premium or discount on the associated security. There were no gains or losses recognized as a result of the transfer. At June 30, 2015, the net unamortized, unrealized loss on the transferred securities included in accumulated other comprehensive loss in the accompanying balance sheet totaled approximately \$37.3 million (\$23.0 million, net of tax).

## Temporarily Impaired Securities

Total	\$590,965	\$(2,663 )	\$522,230	\$(11,909 )	\$1,113,195	\$(14,572 )

The unrealized losses shown above are due to increases in market rates over the yields available at the time of purchase of the underlying securities and not credit quality. Because Trustmark does not intend to sell these securities and it is more likely than not that Trustmark will not be required to sell the investments before recovery of their amortized cost bases, which may be maturity, Trustmark does not consider these investments to be other-than-temporarily impaired at June 30, 2015. There were no other-than-temporary impairments for the six months ended June 30, 2015 and 2014.

## Security Gains and Losses

Gains and losses as a result of calls and dispositions of securities, as well as any associated proceeds, were as follows for the periods presented (\$ in thousands):

	Three Months Ended June 30, 2015	2014	Six Months Ended June 30, 2015	2014
Available for Sale				
Proceeds from calls and sales of securities	\$ -	\$ -	\$ -	\$26,274
Gross realized gains	-	-	-	389

Realized gains and losses are determined using the specific identification method and are included in noninterest income as security gains, net.

## Contractual Maturities

The amortized cost and estimated fair value of securities available for sale and held to maturity at June 30, 2015, by contractual maturity, are shown below (\$ in thousands). Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Securities Available for Sale		Securities Held to Maturity	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Due in one year or less	\$17,167	\$17,315	\$956	\$966
Due after one year through five years	154,905	159,763	9,751	10,195
Due after five years through ten years	32,638	33,349	135,818	140,986
Due after ten years	76,685	76,780	11,827	12,455
	281,395	287,207	158,352	164,602
Mortgage-backed securities	2,146,588	2,159,176	1,031,809	1,035,615
Total	\$2,427,983	\$2,446,383	\$1,190,161	\$1,200,217

## Note 3 – Loans Held for Investment (LHFI) and Allowance for Loan Losses, LHFI

At June 30, 2015 and December 31, 2014, LHFI consisted of the following (\$ in thousands):

	June 30, 2015	December 31, 2014
Loans secured by real estate:		
Construction, land development and other land	\$682,444	\$619,877
Secured by 1-4 family residential properties	1,637,933	1,634,397
Secured by nonfarm, nonresidential properties	1,567,035	1,553,193
Other real estate secured	240,056	253,787
Commercial and industrial loans	1,219,684	1,270,350
Consumer loans	165,215	167,964
State and other political subdivision loans	574,265	602,727
Other loans	360,441	347,174
LHFI	6,447,073	6,449,469
Less allowance for loan losses, LHFI	71,166	69,616
Net LHFI	\$6,375,907	\$6,379,853

## Loan Concentrations

Trustmark does not have any loan concentrations other than those reflected in the preceding table, which exceed 10% of total LHFI. At June 30, 2015, Trustmark's geographic loan distribution was concentrated primarily in its five key market regions, Alabama, Florida, Mississippi, Tennessee and Texas. Accordingly, the ultimate collectability of a substantial portion of these loans and the recovery of a substantial portion of the carrying amount of other real estate are susceptible to changes in market conditions in these areas.

## Nonaccrual/Impaired LHFI

At June 30, 2015 and December 31, 2014, the carrying amounts of nonaccrual LHFI, which are individually evaluated for impairment, were \$68.4 million and \$79.3 million, respectively. Of this total, all commercial nonaccrual LHFI over \$500 thousand were specifically evaluated for impairment (specifically evaluated impaired LHFI) using a fair value approach. The remaining nonaccrual LHFI were not specifically reviewed and not written down to fair value

less cost to sell. No material interest income was recognized in the income statement on impaired or nonaccrual LHFI for each of the periods ended June 30, 2015 and 2014.

All of Trustmark's specifically evaluated impaired LHFI are collateral dependent loans. At June 30, 2015 and December 31, 2014, specifically evaluated impaired LHFI totaled \$37.9 million and \$47.1 million, respectively. These specifically evaluated impaired LHFI had a related allowance of \$12.4 million and \$11.3 million at the end of the respective periods. For collateral dependent loans, when a loan is deemed impaired the full difference between the carrying amount of the loan and the most likely estimate of the collateral's fair value less cost to sell is charged off. Charge-offs related to specifically evaluated impaired LHFI totaled \$1.3 million and \$55 thousand for the first six months of 2015 and 2014, respectively. Provision expense on specifically evaluated impaired LHFI totaled \$1.9 million for the first six months of 2015 compared to provision recapture of \$1.4 million for the first six months of 2014.

Fair value estimates for specifically evaluated impaired LHFI are derived from appraised values based on the current market value or as is value of the collateral, normally from recently received and reviewed appraisals. Current appraisals are ordered on an annual basis based on the inspection date. Appraisals are obtained from state-certified appraisers and are based on certain assumptions, which may include construction or development status and the highest and best use of the property. These appraisals are reviewed by Trustmark's Appraisal Review Department to ensure they are acceptable, and values are adjusted down for costs associated with asset disposal. Once this estimated net realizable value has been determined, the value used in the impairment assessment is updated. At the time a specifically evaluated impaired LHFI is deemed to be impaired, the full difference between book value and the most likely estimate of the collateral's net realizable value is charged off. As subsequent events dictate and estimated net realizable values decline, required reserves may be established or further adjustments recorded.

At June 30, 2015 and December 31, 2014, nonaccrual LHFI not specifically reviewed for impairment and not written down to fair value less cost to sell, totaled \$30.5 million and \$32.2 million, respectively. In addition, these nonaccrual LHFI had allocated allowance for loan losses of \$1.8 million and \$1.5 million at the end of the respective periods.

The following tables detail LHFI individually and collectively evaluated for impairment at June 30, 2015 and December 31, 2014 (\$ in thousands):

	June 30, 2015		
	LHFI Evaluated for Impairment		
	Individual	Collectively	Total
Loans secured by real estate:			
Construction, land development and other land	\$10,888	\$671,556	\$682,444

A troubled debt restructuring (TDR) occurs when a borrower is experiencing financial difficulties, and for related economic or legal reasons, a concession is granted to the borrower that Trustmark would not otherwise consider. Whatever the form of concession that might be granted by Trustmark, Management's objective is to enhance collectability by obtaining more cash or other value from the borrower or by increasing the probability of receipt by granting the concession than by not granting it. Other concessions may arise from court proceedings or may be imposed by law. In addition, TDRs also include those credits that are extended or renewed to a borrower who is not able to obtain funds from sources other than Trustmark at a market interest rate for new debt with similar risk.

All loans whose terms have been modified in a troubled debt restructuring are evaluated for impairment under FASB ASC Topic 310. Accordingly, Trustmark measures any loss on the restructuring in accordance with that guidance. A

TDR in which Trustmark receives physical possession of the borrower's assets, regardless of whether formal foreclosure or repossession proceedings take place, is accounted for in accordance with FASB ASC Subtopic 310-40, "Troubled Debt Restructurings by Creditors." Thus, the loan is treated as if assets have been received in satisfaction of the loan and reported as a foreclosed asset. At June 30, 2015, Trustmark held \$736 thousand of foreclosed residential real estate as a result of foreclosure or in substance repossession of consumer mortgage LHFI classified as TDRs. Consumer mortgage LHFI classified as TDRs in the process of formal foreclosure proceedings at June 30, 2015 totaled \$149 thousand.

A TDR may be returned to accrual status if Trustmark is reasonably assured of repayment of principal and interest under the modified terms and the borrower has demonstrated sustained performance under those terms for a period of at least six months. Otherwise, the restructured loan must remain on nonaccrual.

At June 30, 2015 and 2014, LHFI classified as TDRs totaled \$12.1 million and \$12.6 million, respectively, and were primarily comprised of credits with interest-only payments for an extended period of time which totaled \$8.3 million and \$8.4 million, respectively. The remaining TDRs at June 30, 2015 and 2014, resulted from real estate loans discharged through Chapter 7 bankruptcy that were not reaffirmed or from payment or maturity extensions.

Edgar Filing: TRUSTMARK CORP - Form 10-Q

For TDRs, Trustmark had a related loan loss allowance of \$1.9 million and \$1.5 million at June 30, 2015 and 2014, respectively. LHFIs classified as TDRs are charged down to the most likely fair value estimate less an estimated cost to sell for collateral dependent loans, which would approximate net realizable value. Specific charge-offs related to TDRs totaled \$806 thousand and \$55 thousand for the six months ended June 30, 2015 and 2014, respectively.

The following tables illustrate the impact of modifications classified as TDRs as well as those TDRs modified within the last 12 months for which there was a payment default during the period for the periods presented (\$ in thousands):

	Three Months Ended June 30, 2015		2014	
	Pre-Modification Number of Contracts	Post-Modification Outstanding Recorded Investment	Pre-Modification Number of Contracts	Post-Modification Outstanding Recorded Investment
	Troubled Debt Restructurings Secured by 1-4 family residential properties Secured by nonfarm, nonresidential properties Total	2 \$ 82 4 3,512 6 \$ 3,594	\$ 82 3,512 \$ 3,594	4 \$ 278 - - 4 \$ 278

	Six Months Ended June 30, 2015		2014	
	Pre-Modification Number of Contracts	Post-Modification Outstanding Recorded Investment	Pre-Modification Number of Contracts	Post-Modification Outstanding Recorded Investment
	Troubled Debt Restructurings Secured by 1-4 family residential properties Secured by nonfarm, nonresidential properties Total	8 \$ 460 4 3,512 12 \$ 3,972	\$ 460 3,512 \$ 3,972	14 \$ 981 - - 14 \$ 981

	Six Months Ended June 30, 2015		2014	
	Number of Recorded Contracts	Investment	Number of Recorded Contracts	Investment
Troubled Debt Restructurings that Subsequently Defaulted Secured by 1-4 family residential properties	4	\$ 245	1	\$ 108

Trustmark's TDRs have resulted primarily from allowing the borrower to pay interest-only for an extended period of time rather than from forgiveness. Accordingly, as shown above, these TDRs have a similar recorded investment for both the pre-modification and post-modification disclosure. Trustmark has utilized loans 90 days or more past due to define payment default in determining TDRs that have subsequently defaulted.

## Edgar Filing: TRUSTMARK CORP - Form 10-Q

The following tables detail LHFI classified as TDRs by loan type at June 30, 2015 and 2014 (\$ in thousands):

	June 30, 2015		
	Accruing	Nonaccrual	Total
Construction, land development and other land loans	\$-	\$ 1,664	\$1,664

Commercial and industrial	-	531	531
Total Troubled Debt Restructurings by Type	\$1,543	\$ 11,063	\$12,606

### Credit Quality Indicators

Trustmark's loan portfolio credit quality indicators focus on six key quality ratios that are compared against bank tolerances. The loan indicators are total classified outstanding, total criticized outstanding, nonperforming loans, nonperforming assets, delinquencies and net loan losses. Due to the homogenous nature of consumer loans, Trustmark does not assign a formal internal risk rating to each credit and therefore the criticized and classified measures are unique to commercial loans.

In addition to monitoring portfolio credit quality indicators, Trustmark also measures how effectively the lending process is being managed and risks are being identified. As part of an ongoing monitoring process, Trustmark grades the commercial portfolio as it relates to credit file completion and financial statement exceptions, underwriting, collateral documentation and compliance with law as shown below:

**Credit File Completeness and Financial Statement Exceptions** – evaluates the quality and condition of credit files in terms of content, completeness and organization and focuses on efforts to obtain and document sufficient information to determine the quality and status of credits. Also included is an evaluation of the systems/procedures used to insure compliance with policy.

**Underwriting** – evaluates whether credits are adequately analyzed, appropriately structured and properly approved within loan policy requirements. A properly approved credit is approved by adequate authority in a timely manner with all conditions of approval fulfilled. Total policy exceptions measure the level of underwriting and other policy exceptions within a loan portfolio.

**Collateral Documentation** – focuses on the adequacy of documentation to perfect Trustmark's collateral position and substantiate collateral value. Collateral exceptions measure the level of documentation exceptions within a loan portfolio. Collateral exceptions occur when certain collateral documentation is either not present, is not considered current or has expired.

**Compliance with Law** – focuses on underwriting, documentation, approval and reporting in compliance with banking laws and regulations. Primary emphasis is directed to the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA) and Regulation O requirements.

### Commercial Credits

Trustmark has established a loan grading system that consists of ten individual credit risk grades (risk ratings) that encompass a range from loans where the expectation of loss is negligible to loans where loss has been established. The model is based on the risk of default for an individual credit and establishes certain criteria to delineate the level of risk across the ten unique credit risk grades. Credit risk grade definitions are as follows:

Risk Rate (RR) 1 through RR 6 – Grades one through six represent groups of loans that are not subject to adverse criticism as defined in regulatory guidance. Loans in these groups exhibit characteristics that represent low to moderate risk measured by using a variety of credit risk criteria such as cash flow coverage, debt service coverage, balance sheet leverage, liquidity, management experience, industry position, prevailing economic conditions, support from secondary sources of repayment and other credit factors that may be relevant to a specific loan. In general, these loans are supported by properly margined collateral and guarantees of principal parties.

Other Assets Especially Mentioned (Special Mention) - (RR 7) – a loan that has a potential weakness that if not corrected will lead to a more severe rating. This rating is for credits that are currently protected but potentially weak because of an adverse feature or condition that if not corrected will lead to a further downgrade.

Substandard (RR 8) – a loan that has at least one identified weakness that is well defined. This rating is for credits where the primary sources of repayment are not viable at the time of evaluation or where either the capital or collateral is not adequate to support the loan and the secondary means of repayment do not provide a sufficient level of support to offset the identified weakness. Loss potential exists in the aggregate amount of substandard loans but does not necessarily exist in individual loans.

Doubtful (RR 9) – a loan with an identified weakness that does not have a valid secondary source of repayment. Generally these credits have an impaired primary source of repayment and secondary sources are not sufficient to prevent a loss in the credit. The exact amount of the loss has not been determined at this time.

Loss (RR 10) – a loan or a portion of a loan that is deemed to be uncollectible.

By definition, credit risk grades special mention (RR 7), substandard (RR 8), doubtful (RR 9) and loss (RR 10) are criticized loans while substandard (RR 8), doubtful (RR 9) and loss (RR 10) are classified loans. These definitions are standardized by all bank regulatory agencies and are generally equally applied to each individual lending institution. The remaining credit risk grades are considered pass credits and are solely defined by Trustmark.

Each commercial loan is assigned a credit risk grade that is an indication for the likelihood of default and is not a direct indication of loss at default. The loss at default aspect of the subject risk ratings is neither uniform across the nine primary commercial loan groups or constant between the geographic areas. To account for the variance in the loss at default aspects of the risk rating system, the loss expectations for each risk rating is integrated into the allowance for loan loss methodology where the calculated loss at default is allotted for each individual risk rating with respect to the individual loan group and unique geographic area. The loss at default aspect of the reserve methodology is calculated each quarter as a component of the overall reserve factor for each risk grade by loan group and geographic area.

To enhance this process, loans of a certain size that are rated in one of the criticized categories are routinely reviewed to establish an expectation of loss, if any, and if such examination indicates that the level of reserve is not adequate to cover the expectation of loss, a special reserve or impairment is generally applied.

The distribution of the losses is accomplished by means of a loss distribution model that assigns a loss factor to each risk rating (1 to 9) in each commercial loan pool. A factor is not applied to risk rate 10 as loans classified as Losses are not carried on Trustmark's books over quarter-end as they are charged off within the period that the loss is determined.

The expected loss distribution is spread across the various risk ratings by the perceived level of risk for loss. The nine grade scale described above ranges from a negligible risk of loss to an identified loss across its breadth. The loss distribution factors are graduated through the scale on a basis proportional to the degree of risk that appears manifest in each individual rating and assumes that migration through the loan grading system will occur.

Each loan officer assesses the appropriateness of the internal risk rating assigned to their credits on an ongoing basis. Trustmark's Asset Review area conducts independent credit quality reviews of the majority of Trustmark's commercial loan portfolio concentrations both on the underlying credit quality of each individual loan portfolio as well as the adherence to Trustmark's loan policy and the loan administration process. In general, Asset Review conducts reviews of each lending area within a six to eighteen month window depending on the overall credit quality results of the individual area.

In addition to the ongoing internal risk rate monitoring described above, Trustmark's Credit Quality Review Committee meets monthly and performs a review of all loans of \$100 thousand or more that are either delinquent thirty days or more or on nonaccrual. This review includes recommendations regarding risk ratings, accrual status,

charge-offs and appropriate servicing officer as well as evaluation of problem credits for determination of TDRs. Quarterly, the Credit Quality Review Committee reviews and modifies continuous action plans for all credits risk rated seven or worse for relationships of \$100 thousand or more. In addition, the Credit Quality Review Committee performs the following reviews on an annual basis:

Residential real estate developments - a development project analysis is performed on all projects regardless of size. Performance of the development is assessed through an evaluation of the number of lots remaining, payout ratios, and loan-to-value ratios. Results are stress tested as to the capacity to absorb losses and price of lots. This analysis is reviewed by each senior credit officer for the respective market to determine the need for any risk rate or accrual status changes.

Edgar Filing: TRUSTMARK CORP - Form 10-Q

Non-owner occupied commercial real estate - a cash flow analysis is performed on all projects with an outstanding balance of \$1.0 million or more. In addition, credits are stress tested for vacancies and rate sensitivity. Confirmation is obtained that guarantor financial statements are current, taxes have been paid and there are no other issues that need to be addressed. This analysis is reviewed by each senior credit officer in the respective market to determine the need for any risk rate or accrual status changes.

Consumer Credits

Consumer LHFI that do not meet a minimum custom credit score are reviewed quarterly by Management. The Retail Credit Review Committee reviews the volume and percentage of approvals that did not meet the minimum passing custom score by region, individual location, and officer. To assure that Trustmark continues to originate quality loans, this process allows Management to make necessary changes such as revisions to underwriting procedures and credit policies, or changes in loan authority to Trustmark personnel.

Trustmark monitors the levels and severity of past due consumer LHFI on a daily basis through its collection activities. A detailed assessment of consumer LHFI delinquencies is performed monthly at both a product and market level by delivery channel, which incorporates the perceived level of risk at time of underwriting. Trustmark also monitors its consumer LHFI delinquency trends by comparing them to quarterly industry averages.

The tables below illustrate the carrying amount of LHFI by credit quality indicator at June 30, 2015 and December 31, 2014 (\$ in thousands):

	June 30, 2015					
	Commercial LHFI					
	Pass - Categories 1-6	Special Mention Category 7	Substandard - Category 8	Doubtful - Category 9	Subtotal	
Loans secured by real estate:

Past Due Loans Held for Sale (LHFS)

LHFS past due 90 days or more totaled \$12.0 million and \$25.9 million at June 30, 2015 and December 31, 2014, respectively. LHFS past due 90 days or more are serviced loans eligible for repurchase, which are fully guaranteed by the Government National Mortgage Association (GNMA). GNMA optional repurchase programs allow financial institutions to buy back individual delinquent mortgage loans that meet certain criteria from the securitized loan pool for which the institution provides servicing. At the servicer's option and without GNMA's prior authorization, the servicer may repurchase such a delinquent loan for an amount equal to 100 percent of the remaining principal balance of the loan. This buy-back option is considered a conditional option until the delinquency criteria are met, at which time the option becomes unconditional. When Trustmark is deemed to have regained effective control over these loans under the unconditional buy-back option, the loans can no longer be reported as sold and must be brought back onto the balance sheet as loans held for sale, regardless of whether Trustmark intends to exercise the buy-back option. These loans are reported as held for sale with the offsetting liability being reported as short-term borrowings.

During the first quarter of 2015, Trustmark exercised its option to repurchase approximately \$28.5 million of delinquent loans serviced for GNMA. These loans were subsequently sold to a third party under different repurchase provisions. Trustmark retained the servicing for these loans, which are subject to guarantees by FHA/VA. As a result of this repurchase and sale, the loans are no longer carried as LHFS. The transaction resulted in a gain of \$304 thousand, which is included in mortgage banking, net for the first six months of 2015. Trustmark did not exercise its buy-back option on any delinquent loans serviced for GNMA during the second quarter of 2015 or the first six months of 2014.

Allowance for Loan Losses, LHFI

Trustmark's allowance for loan loss methodology for commercial LHFI is based upon regulatory guidance from its primary regulator and GAAP. The methodology segregates the commercial purpose and commercial construction LHFI portfolios into nine separate loan types (or pools) which have similar characteristics such as repayment,

collateral and risk profiles. The nine basic loan pools are further segregated into Trustmark's five key market regions, Alabama, Florida, Mississippi, Tennessee and Texas, to take into consideration the uniqueness of each market. A 10-point risk rating system is utilized for each separate loan pool to apply a reserve factor consisting of quantitative and qualitative components to determine the needed allowance by each loan type. As a result, there are 450 risk rate factors for commercial loan types. The nine separate pools are shown below:

Commercial Purpose LHF1

- Real Estate – Owner-Occupied
- Real Estate – Non-Owner Occupied
- Working Capital
- Non-Working Capital
- Land
- Lots and Development
- Political Subdivisions

Commercial Construction LHFI

- 1 to 4 Family
- Non-1 to 4 Family

The quantitative factors of the allowance methodology reflect a twelve-quarter rolling average of net charge-offs by loan type within each key market region. This allows for a greater sensitivity to current trends, such as economic changes, as well as current loss profiles and creates a more accurate depiction of historical losses.

During the first quarter of 2015, the Loss Emergence Period (LEP), a component of the quantitative portion of the allowance for loan loss methodology for commercial LHFI, was revised to reflect a 1.5 year period rather than a one year period. The LEP refers to the period of time between the events that trigger a loss and a charge-off of that loss. Losses are usually not immediately known, and determining the loss event can be challenging. It takes time for the borrower and extent of loss to be identified and determined. Trustmark may not be aware that the loss event has occurred until the borrower exhibits the inability to pay or other evidence of credit deterioration. Trustmark considers the loss event to have occurred within a one year period prior to the event of default and the charge-off of the loss within a six month period after the event of default, resulting in a 1.5 year LEP. An additional provision of approximately \$2.3 million was recorded in the first quarter of 2015 as result of this revision to the quantitative portion of the allowance for loan loss methodology for commercial LHFI.

Qualitative factors used in the allowance methodology include the following:

- National and regional economic trends and conditions
- Impact of recent performance trends
- Experience, ability and effectiveness of management
- Adherence to Trustmark's loan policies, procedures and internal controls
- Collateral, financial and underwriting exception trends
- Credit concentrations
- Loan facility risk
- Acquisitions
- Catastrophe

Each qualitative factor is converted to a scale ranging from 0 (No risk) to 100 (High Risk), other than the last two factors, which are applied on a dollar-for-dollar basis to ensure that the combination of such factors is proportional. The resulting ratings from the individual factors are weighted and summed to establish the weighted-average qualitative factor of a specific loan portfolio within each key market region. This weighted-average qualitative factor is then distributed over the nine primary loan pools within each key market region based on the ranking by risk of each.

During the first quarter of 2015, Trustmark eliminated caps and floors from the criticized risk grades in the qualitative portion and adjusted the Florida market region's distribution factors in the qualitative and quantitative portions of the allowance for loan loss methodology for commercial LHFI. The caps and floors for criticized risk ratings were eliminated in order to allow the risk associated with those credits to be reflected without constraint of pre-existing limits (caps or floors) on the risk ratings. When the current allowance for loan loss methodology was originally established, the vast majority of the reserve for the Florida market region's assets was covered by the quantitative features of the allowance for loan loss methodology due to the amount of gross charge-offs at that time and captured the vast majority of the embedded risk in the portfolio. The distribution for the Florida market region was adjusted to be the same as Trustmark's other key market regions since the credit metrics in the Florida market region now more closely resemble Trustmark as a whole. The elimination of the caps and floors for criticized risk ratings in the qualitative portion of the allowance for loan loss methodology for commercial LHFI resulted in a provision recapture of \$1.8 million in the first quarter of 2015. The change in the Florida market region distribution resulted in an additional provision expense of \$2.1 million related to the qualitative portion and an additional provision expense of

\$785 thousand related to the quantitative portion of the allowance for loan loss methodology for commercial LHFI in the first quarter of 2015. Combined, these revisions to the allowance for loan loss methodology for commercial LHFI resulted in an additional provision of approximately \$1.1 million recorded during the first quarter of 2015.

During the third quarter of 2014, Trustmark revised the qualitative portion of the allowance for loan loss methodology for commercial LHFI to incorporate an additional reserve component for commercial nonaccrual loans under \$500 thousand. A LHFI is considered impaired when, based on current information and events, it is probable that Trustmark will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. A formal impairment analysis is performed on all commercial nonaccrual LHFI with an outstanding balance of \$500 thousand or more, and based upon this analysis LHFI are written down to net realizable value. The implementation of this commercial qualitative factor will allow Trustmark to address additional credit risk and loss potential due to inadequate source of repayment and collateral for commercial nonaccrual LHFI below the \$500 thousand threshold. For such loans, it is currently unlikely that full repayment of both principal and interest will be realized. An additional provision of approximately \$822 thousand was recorded in the third quarter of 2014 as result of this revision to the qualitative portion of the allowance for loan loss methodology for commercial LHFI.

## Edgar Filing: TRUSTMARK CORP - Form 10-Q

The allowance for loan loss methodology segregates the consumer LHFI portfolio into homogeneous pools of loans that contain similar structure, repayment, collateral and risk profiles. These homogeneous pools of loans are shown below:

- Residential Mortgage
- Direct Consumer
- Auto Finance
- Junior Lien on 1-4 Family Residential Properties
- Credit Cards
- Overdrafts

The historical loss experience for these pools is determined by calculating a 12-quarter rolling average of net charge-offs, which is applied to each pool to establish the quantitative aspect of the methodology. Where, in Management's estimation, the calculated loss experience does not fully cover the anticipated loss for a pool, an estimate is also applied to each pool to establish the qualitative aspect of the methodology, which represents the perceived risks across the loan portfolio at the current point in time. This qualitative methodology utilizes five separate factors made up of unique components that when weighted and combined produce an estimated level of reserve for each of the loan pools. The five qualitative factors include the following:

- Economic indicators
- Performance trends
- Management experience
- Lending policy measures
- Credit concentrations

The risk measure for each factor is converted to a scale ranging from 0 (No risk) to 100 (High Risk) to ensure that the combination of such factors is proportional. The determination of the risk measurement for each qualitative factor is done for all markets combined. The resulting estimated reserve factor is then applied to each pool.

During the second quarter of 2014, Trustmark revised the qualitative portion of the allowance for loan loss methodology for consumer LHFI to incorporate the use of consumer credit bureau scores developed and provided by an independent third party. The credit bureau scores reflect the customer's historical willingness and ability to service their debt. These credit bureau scores are monitored on an ongoing basis and represent a consumer's credit payment history with all of their creditors including their repayment performance with Trustmark. The implementation of this consumer qualitative factor will allow Trustmark to better monitor shifts in risk that are represented in the retail portfolio and ensure that it is reflective in the allowance for loan loss calculation. An additional provision of approximately \$1.4 million was recorded in the second quarter of 2014 as a result of this revision to the qualitative portion of the allowance for loan loss methodology for consumer LHFI.

The resulting ratings from the individual factors are weighted and summed to establish the weighted-average qualitative factor of a specific loan portfolio. This weighted-average qualitative factor is then applied over the six loan pools.

Changes in the allowance for loan losses, LHFI were as follows for the periods presented (\$ in thousands):

	Six Months Ended	
	June 30,	
	2015	2014
Balance at beginning of period	\$69,616	\$66,448

## Note 4 – Acquired Loans

At June 30, 2015 and December 31, 2014, acquired loans consisted of the following (\$ in thousands):

	June 30, 2015		December 31, 2014	
	Noncovered	Covered	Noncovered	Covered
Loans secured by real estate:				
Construction, land development and other land	\$50,867	\$904	\$58,309	\$1,197
Secured by 1-4 family residential properties	101,027	11,080	116,920	13,180
Secured by nonfarm, nonresidential properties	168,698	5,206	202,323	7,672
Other real estate secured	25,666	1,622	27,813	1,096
Commercial and industrial loans	73,732	371	88,256	277
Consumer loans	7,273	-	9,772	-
Other loans	19,897	56	22,390	204
Acquired loans	447,160	19,239	525,783	23,626
Less allowance for loan losses, acquired loans	11,927	702	10,541	1,518
Net acquired loans	\$435,233	\$18,537	\$515,242	\$22,108

The following table presents changes in the net carrying value of the acquired loans for the periods presented (\$ in thousands):

	Noncovered		Covered	
	Acquired Impaired	Acquired Not ASC	Acquired Impaired	Acquired Not ASC
		310-30 (1)		310-30 (1)
Carrying value, net at January 1, 2014	\$639,656	\$123,085	\$30,166	\$1,663
Accretion to interest income	44,575	1,706	4,052	1
Payments received, net	(216,378)	(42,284)	(12,396)	(30)
Other (2)	(29,724)	(2,102)	(1,733)	(484)
Less change in allowance for loan losses, acquired loans	(3,978)	686	415	454
Carrying value, net at December 31, 2014	434,151	81,091	20,504	1,604
Accretion to interest income	17,140	453	1,309	-
Payments received, net	(89,149)	(7,635)	(5,638)	(72)
Other (2)	568	-	14	-
Less change in allowance for loan losses, acquired loans	(1,386)	-	816	-
Carrying value, net at June 30, 2015	\$361,324	\$73,909	\$17,005	\$1,532

(1) "Acquired Not ASC 310-30" loans consist of revolving credit agreements and commercial leases that are not in scope for FASB ASC Topic 310-30, "Loans and Debt Securities Acquired with Deteriorated Credit Quality."

(2) Includes miscellaneous timing adjustments as well as acquired loan terminations through foreclosure, charge-off, pool recovery and other terminations.

Under FASB ASC Topic 310-30, the accretible yield is the excess of expected cash flows at acquisition over the initial fair value of acquired impaired loans and is recorded as interest income over the estimated life of the loans using the effective yield method if the timing and amount of the future cash flows is reasonably estimable. The following table presents changes in the accretible yield for the periods presented (\$ in thousands):

Six Months Ended	
June 30,	
2015	2014

Edgar Filing: TRUSTMARK CORP - Form 10-Q

Accretable yield at beginning of period	\$ (77,149)	\$ (109,006)
Accretion to interest income	18,449	25,518
Disposals	4,700	10,791
Reclassification to / (from) nonaccretable difference (1)	(9,943 )	(20,094 )
Accretable yield at end of period	\$ (63,943)	\$ (92,791 )

(1) Reclassifications from nonaccretable difference are due to lower loss expectations and improvements in expected cash flows.

Edgar Filing: TRUSTMARK CORP - Form 10-Q

The following tables present the components of the allowance for loan losses on acquired loans for the six months ended June 30, 2015 and 2014 (\$ in thousands):

	Noncovered	Covered	Total
Balance at January 1, 2015	\$ 10,541	\$ 1,518	\$ 12,059
Provision for loan losses, acquired loans	1,576	(404 )	1,172
Loans charged-off	(2,568 )	(450 )	(3,018 )

Net charge-offs	(1,378 )	(926 )	(2,304 )
Balance at June 30, 2014	\$ 9,770	\$ 1,409	\$ 11,179

As discussed in Note 3 - Loans Held for Investment (LHFI) and Allowance for Loan Losses, LHFI, Trustmark has established a loan grading system that consists of ten individual credit risk grades (risk ratings) that encompass a range from loans where the expectation of loss is negligible to loans where loss has been established. The model is based on the risk of default for an individual credit and establishes certain criteria to segregate the level of risk across the ten unique risk ratings. These credit quality measures are unique to commercial loans. Credit quality for consumer loans is based on individual credit scores, aging status of the loan and payment activity.

Edgar Filing: TRUSTMARK CORP - Form 10-Q

The tables below illustrate the carrying amount of acquired loans by credit quality indicator at June 30, 2015 and December 31, 2014 (\$ in thousands):

## Note 5 – Mortgage Banking

The activity in mortgage servicing rights (MSR) is detailed in the table below for the periods presented (\$ in thousands):

	Six Months Ended	
	June 30,	
	2015	2014
Balance at beginning of period	\$64,358	\$67,834
Origination of servicing assets	8,157	5,179
Change in fair value:		
Due to market changes	3,708	(3,761)
Due to runoff	(4,801)	(4,203)
Balance at end of period	\$71,422	\$65,049

During the first six months of 2015 and 2014, Trustmark sold \$579.9 million and \$397.9 million, respectively, of residential mortgage loans. Pretax gains on these sales were recorded to noninterest income in mortgage banking, net and totaled \$8.8 million for the first six months of 2015 compared to \$4.6 million for the first six months of 2014. Trustmark's mortgage loans serviced for others totaled \$5.732 billion at June 30, 2015, compared with \$5.636 billion at December 31, 2014. The table below details the mortgage loans sold and serviced for others at June 30, 2015 and December 31, 2014 (\$ in thousands):

	June 30, 2015	December 31, 2014
Federal National Mortgage Association	\$3,642,950	\$3,579,987
Government National Mortgage Association	1,971,315	1,948,565
Federal Home Loan Mortgage Corporation	71,890	80,551
Other	46,032	27,146
Total mortgage loans sold and serviced for others	\$5,732,187	\$5,636,249

Trustmark is subject to losses in its loan servicing portfolio due to loan foreclosures. Trustmark has obligations to either repurchase the outstanding principal balance of a loan or make the purchaser whole for the economic benefits of a loan if it is determined that the loan sold was in violation of representations or warranties made by Trustmark at the time of the sale, herein referred to as mortgage loan servicing putback expenses. Such representations and warranties typically include those made regarding loans that had missing or insufficient file documentation, loans that do not meet investor guidelines, loans in which the appraisal does not support the value and/or loans obtained through fraud by the borrowers or other third parties. Generally, putback requests may be made until the loan is paid in full. However, mortgage loans delivered to Federal National Mortgage Association (FNMA) and Federal Home Loan Mortgage Corporation (FHLMC) on or after January 1, 2013 are subject to the Lending and Selling Representations and Warranties Framework updated in May 2014, which provides certain instances in which FNMA and FHLMC will not exercise their remedies, including a putback request, for breaches of certain selling representations and warranties, such as payment history and quality control review.

When a putback request is received, Trustmark evaluates the request and takes appropriate actions based on the nature of the request. Effective January 1, 2013, Trustmark was required by FNMA and FHLMC to provide a response to putback requests within 60 days of the date of receipt. Currently, putback requests primarily relate to 2009 through 2013 vintage mortgage loans. The total mortgage loan servicing putback expenses incurred by Trustmark during the first six months of 2015 and 2014 were \$105 thousand and \$300 thousand, respectively.

Changes in the reserve for mortgage loan servicing putback expense for mortgage loans delivered to FNMA in periods not covered by the November 2013 Resolution Agreement between Trustmark and FNMA and to other entities were

as follows for the periods presented (\$ in thousands):

	Six Months	
	Ended June 30,	
	2015	2014
Balance at beginning of period	\$1,170	\$1,050
Provision for putback expenses	105	300
Losses	126	(403 )
Balance at end of period	\$1,401	\$947

Mortgage loans covered by Trustmark's Resolution Agreement executed with FNMA in November 2013 are only subject to putback risk due to borrower fraud or systemic risk. Trustmark's exposure to putback requests for loans sold to FNMA, which were originated after 2008, has improved as a result of industry-wide guidelines and process enhancements implemented since that time. Trustmark's exposure to putback requests for loans sold to GNMA has improved as a result of declining delinquency ratios. Please refer to the "Past Due LHFS" section included in Note 3 – Loans Held for Investment (LHFI) and Allowance for Loan Losses, LHFI for additional information regarding mortgage loans sold to GNMA.

There is inherent uncertainty in reasonably estimating the requirement for reserves against potential future mortgage loan servicing putback expenses. Future putback expenses are dependent on many subjective factors, including the review procedures of the purchasers and the potential refinance activity on loans sold with servicing released and the subsequent consequences under the representations and warranties. Trustmark believes that it has appropriately reserved for potential mortgage loan servicing putback requests.

Note 6 –Other Real Estate and Covered Other Real Estate

Other Real Estate, excluding Covered Other Real Estate

At June 30, 2015, Trustmark’s geographic other real estate distribution was concentrated primarily in its five key market regions: Alabama, Florida, Mississippi, Tennessee and Texas. The ultimate recovery of a substantial portion of the carrying amount of other real estate, excluding covered other real estate, is susceptible to changes in market conditions in these areas.

For the periods presented, changes and gains, net on other real estate, excluding covered other real estate, were as follows (\$ in thousands):

	Six Months Ended June 30,	
	2015	2014
Balance at beginning of period	\$92,509	\$106,539
Additions	20,532	24,601
Disposals	(21,300)	(20,827)
Write-downs	(993)	(3,343)
Balance at end of period	\$90,748	\$106,970
Gain, net on the sale of other real estate included in ORE/Foreclosure expense	\$2,268	\$636

At June 30, 2015 and December 31, 2014, other real estate, excluding covered other real estate, by type of property consisted of the following (\$ in thousands):

	June 30, 2015	December 31, 2014
Construction, land development and other land properties	\$64,829	\$61,015
1-4 family residential properties	7,990	10,150
Nonfarm, nonresidential properties	16,434	19,696
Other real estate properties	1,495	1,648
Total other real estate, excluding covered other real estate	\$90,748	\$92,509

At June 30, 2015 and December 31, 2014, other real estate, excluding covered other real estate, by geographic location consisted of the following (\$ in thousands):

	June 30, 2015	December 31, 2014
Alabama	\$21,849	\$21,196
Florida	31,059	35,324
Mississippi (1)	14,094	17,397
Tennessee (2)	9,707	10,292
Texas	14,039	8,300
Total other real estate, excluding covered other real estate	\$90,748	\$92,509

- (1) - Mississippi includes Central and Southern Mississippi Regions
- (2) - Tennessee includes Memphis, Tennessee and Northern Mississippi Regions

29

---

## Covered Other Real Estate

For the periods presented, changes and losses, net on covered other real estate were as follows (\$ in thousands):

	Six Months	
	Ended June 30,	
	2015	2014
Balance at beginning of period	\$6,060	\$5,108
Transfers from covered loans	177	218
FASB ASC 310-30 adjustment for the residual recorded investment	(917 )	(39 )
Net transfers from covered loans	(740 )	179
Disposals	(1,188)	(632 )
Write-downs	(377 )	(783 )
Balance at end of period	\$3,755	\$3,872
Loss, net on the sale of covered other real estate included in ORE/Foreclosure expense	\$(99 )	\$(109 )

At June 30, 2015 and December 31, 2014, covered other real estate by type of property consisted of the following (\$ in thousands):

	June 30, 2015	December 31, 2014
Construction, land development and other land properties	\$768	\$ 1,917
1-4 family residential properties	296	1,103
Nonfarm, nonresidential properties	1,963	2,296
Other real estate properties	728	744
Total covered other real estate	\$3,755	\$ 6,060

## Note 7 – FDIC Indemnification Asset

On April 15, 2011, the Mississippi Department of Banking and Consumer Finance closed the Heritage Banking Group (Heritage) and appointed the FDIC as receiver. On the same date, Trustmark National Bank (TNB), Trustmark's principal subsidiary, entered into a purchase and assumption agreement with the FDIC in which TNB agreed to assume all of the deposits and purchase essentially all of the assets of Heritage. The FDIC and TNB also entered into a loss-share agreement covering substantially all loans and all other real estate acquired. Under the loss-share agreement, the FDIC will cover 80% of covered loan and other real estate losses incurred. Pursuant to the provisions of the loss-share agreement, TNB may be required to make a true-up payment to the FDIC at the termination of the loss-share agreement should actual losses be less than certain thresholds established in the agreement. TNB calculates the projected true-up payable to the FDIC quarterly and records a FDIC true-up provision for the present value of the projected true-up payable to the FDIC at the termination of the loss-share agreement. TNB's FDIC true-up provision totaled \$2.4 million and \$2.1 million at June 30, 2015 and December 31, 2014, respectively.

Trustmark periodically re-estimates the expected cash flows on the acquired covered loans as required by FASB ASC Topic 310-30. For the first six months of 2015 and 2014, this analysis resulted in improvements in the estimated future cash flows of the acquired covered loans that remain outstanding as well as lower expected remaining losses on those loans, primarily due to pay-offs of acquired covered loans. The pay-offs and improvements in the estimated expected cash flows of the acquired covered loans resulted in a reduction of the expected loss-share receivable from the FDIC. Reductions of the FDIC indemnification asset resulting from improvements in expected cash flows and covered losses based on the re-estimation of acquired covered loans are amortized over the lesser of the remaining life

or contractual period of the acquired covered loan as a yield adjustment consistent with the associated acquired covered loan. Other noninterest income for the first six months of 2015 and 2014 included \$844 thousand and \$1.1 million, respectively, of amortization of the FDIC indemnification asset. Amortization of the FDIC indemnification asset resulted from improvements in the expected cash flows and lower loss expectations. During the first six months of 2015 and 2014, other noninterest income included a reduction of the FDIC indemnification asset of \$1.3 million and \$561 thousand, respectively, primarily resulting from loan pay-offs partially offset by loan pools of acquired covered loans with increased loss expectations. Noninterest income also included a reduction of the FDIC indemnification asset of \$621 thousand during the first six months of 2015 due to sales and valuation adjustments of covered other real estate.

Edgar Filing: TRUSTMARK CORP - Form 10-Q

For the periods presented, changes in the FDIC indemnification asset were as follows (\$ in thousands):

	Six Months Ended	
	June 30,	
	2015	2014
Balance at beginning of period	\$6,997	\$14,347
Amortization	(844 )	(1,127 )
Transfers to FDIC claims	(1,583)	(1,761 )
Change in expected cash flows	(1,638)	(293 )
Change in FDIC true-up provision	(300 )	(300 )
Balance at end of period	\$2,632	\$10,866

Note 8 – Deposits

At June 30, 2015 and December 31, 2014, deposits consisted of the following (\$ in thousands):

	June 30,	December
	2015	31, 2014
Noninterest-bearing demand	\$2,819,171	\$2,748,635
Interest-bearing demand	2,066,943	1,722,581
Savings	3,085,717	3,280,060
Time	1,820,343	1,947,082
Total	\$9,792,174	\$9,698,358

Note 9 – Securities Sold Under Repurchase Agreements

Trustmark utilizes securities sold under repurchase agreements as a source of borrowing in connection with overnight repurchase agreements offered to commercial deposit customers by using its unencumbered investment securities as collateral. Trustmark accounts for its securities sold under repurchase agreements as secured borrowings in accordance with FASB ASC Topic 860-30, “Transfers and Servicing – Secured Borrowing and Collateral.” Securities sold under repurchase agreements are stated at the amount of cash received in connection with the transaction. Trustmark monitors collateral levels on a continual basis and may be required to provide additional collateral based on the fair value of the underlying securities. Trustmark’s repurchase agreements are transacted under master repurchase agreements that give Trustmark, in the event of default by the counterparty, the right of offset with the same counterparty. As of June 30, 2015, all repurchase agreements were short-term and consisted primarily of sweep repurchase arrangements, under which excess deposits are “swept” into overnight repurchase agreements with Trustmark. The following table presents the securities sold under repurchase agreements by collateral pledged as of June 30, 2015 (\$ in thousands):

	June 30,
	2015
U.S. Government agency obligations	
Issued by U.S. Government sponsored agencies	\$26,280
Obligations of states and political subdivisions	1,332
Mortgage-backed securities	
Other residential mortgage-backed securities	
Issued or guaranteed by FNMA, FHLMC or GNMA	127,242
Commercial mortgage-backed securities	
Issued or guaranteed by FNMA, FHLMC or GNMA	1,871
Total securities sold under repurchase agreements	\$156,725

Note 10 – Defined Benefit and Other Postretirement Benefits

Qualified Pension Plans

Trustmark maintains a noncontributory tax-qualified defined benefit pension plan (Trustmark Capital Accumulation Plan), in which substantially all associates employed prior to 2007 participate. The plan provides retirement benefits that are based on the length of credited service and final average compensation, as defined in the plan, and vest upon three years of service. Benefit accruals under the plan have been frozen since 2009, with the exception of certain associates covered through plans obtained by acquisitions that were subsequently merged into the Trustmark plan. Other than the associates covered through acquired plans that were merged into the Trustmark plan, associates have not earned additional benefits, except for interest as required by law, since the plan was frozen. Current and former associates who participate in the plan retain their right to receive benefits that accrued before the plan was frozen.

Edgar Filing: TRUSTMARK CORP - Form 10-Q

As a result of the merger with BancTrust Financial Group, Inc. (BancTrust) on February 15, 2013, Trustmark became the sponsor of the Retirement Plan for Employees of BancTrust Financial Group, Inc. (BancTrust Pension Plan), a tax-qualified defined benefit pension plan, which was frozen prior to the merger date. On January 28, 2014, Trustmark's Board of Directors authorized the termination of the BancTrust Pension Plan effective as of April 15, 2014. The Internal Revenue Service (IRS) has been asked to review the BancTrust Pension Plan's tax qualification at its termination, and it is anticipated that the IRS will issue a favorable determination letter with respect to the plan's termination once its review is complete. In addition, as required by law, a termination notice has been filed with the Pension Benefit Guaranty Corporation (PBGC), and it is not anticipated that the PBGC will raise any issues with respect to the plan's termination. During 2014, the assets of the BancTrust Pension plan were held in trust and distributed in conjunction with the plan termination. All assets of the BancTrust Pension Plan were distributed as of December 31, 2014. Benefits that were not paid to participants were annuitized under annuity contracts.

The following table presents information regarding the net periodic benefit cost for Trustmark's qualified defined benefit pension plans for the periods presented (\$ in thousands):

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2015	2014	2015	2014
Service cost	\$129	\$125	\$260	\$249
Interest cost	864	1,322	1,726	2,643
Expected return on plan assets	(1,297)	(1,560)	(2,593)	(3,118)
Recognized net loss due to lump sum settlements	479	375	896	750
Recognized net actuarial loss	971	736	1,938	1,472
Net periodic benefit cost	\$1,146	\$998	\$2,227	\$1,996

The range of potential contributions to the Trustmark Capital Accumulation Plan is determined annually by the plan's actuary in accordance with applicable IRS rules and regulations. Trustmark's policy is to fund amounts that are sufficient to satisfy the annual minimum funding requirements and are deductible for federal income tax purposes. The actual amount of the contribution is determined annually based on the plan's funded status and return on plan assets as of the measurement date, which is December 31. For the plan year ending December 31, 2015, Trustmark's minimum required contribution to the Trustmark Capital Accumulation Plan is expected to be zero; however, Management and the Board of Directors will monitor the plan throughout 2015 to determine any additional funding requirements by the plan's measurement date.

#### Supplemental Retirement Plans

Trustmark maintains a nonqualified supplemental retirement plan covering key executive officers and senior officers as well as directors who have elected to defer fees. The plan provides for defined death benefits and/or retirement benefits based on a participant's covered salary or deferred fees. Trustmark has purchased life insurance contracts on the participants covered under the plan, which may be used to fund future payments under the plan. The measurement date for the plan is December 31. As a result of the BancTrust merger on February 15, 2013, Trustmark became the administrator of an additional nonqualified supplemental retirement plan, for which the plan benefits were frozen prior to the merger date.

The following table presents information regarding the net periodic benefit cost for Trustmark's nonqualified supplemental retirement plans for the periods presented (\$ in thousands):

	Three	Six Months
	Months	
	Ended June	Ended June 30,
	30,	

	2015	2014	2015	2014
Service cost	\$108	\$75	\$216	\$148
Interest cost	519	548	1,043	1,102
Amortization of prior service cost	62	62	125	125
Recognized net actuarial loss	246	163	499	333
Net periodic benefit cost	\$935	\$848	\$1,883	\$1,708

#### Note 11 – Stock and Incentive Compensation Plans

Trustmark has granted stock and incentive compensation awards subject to the provisions of the Stock and Incentive Compensation Plan (the Plan). On April 28, 2015, Trustmark shareholders approved an amended and restated version of the Plan, which was originally scheduled to expire on May 9, 2015. The amended and restated provisions of the Plan are essentially the same as the previous version of the Plan with the exception of a reduction in shares available for issuance. Current outstanding and future grants of stock and incentive compensation awards are subject to the provisions of the Plan, which is designed to provide flexibility to Trustmark regarding its ability to motivate, attract and retain the services of key associates and directors. The Plan also allows Trustmark to make grants of nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock, restricted stock units and performance units to key associates and directors.

## Restricted Stock Grants

## Performance Awards

Trustmark's performance awards are granted to Trustmark's executive and senior management teams. Performance awards granted vest based on performance goals of return on average tangible equity and total shareholder return compared to a defined peer group. Performance awards are valued utilizing a Monte Carlo simulation model to estimate fair value of the awards at the grant date. These awards are recognized using the straight-line method over the requisite service period. These awards provide for achievement shares if performance measures exceed 100%. The restricted share agreement provides for voting rights and dividend privileges.

## Time-Vested Awards

Trustmark's time-vested awards are granted to members of Trustmark's Board of Directors as well as Trustmark's executive and senior management teams. Time-vested awards are valued utilizing the fair value of Trustmark's stock at the grant date. These awards are recognized on the straight-line method over the requisite service period.

The following table summarizes the vesting periods for awards granted under the Plan (in years):

	Vesting Period
Performance awards (includes achievement shares for grants after 2013)	3
Achievement shares from performance grants prior to 2013	3
Time-vested awards	3

The following tables summarize the stock and incentive plan activity for the periods presented:

	Three Months Ended June 30, 2015	
	Performance Awards	Time-Vested Awards
Outstanding/Nonvested shares, beginning of period	212,309	318,333
Granted	-	500
Exercised or released from restriction	-	(1,299 )
Forfeited	-	(4,456 )
Outstanding/Nonvested shares, end of period	212,309	313,078
	Six Months Ended June 30, 2015	
	Performance Awards	Time-Vested Awards
Outstanding/Nonvested shares, beginning of period	181,195	263,905
Granted	84,899	120,814
Exercised or released from restriction	(47,360 )	(64,508 )
Forfeited	(6,425 )	(7,133 )
Outstanding/Nonvested shares, end of period	212,309	313,078

The following table presents information regarding compensation expense for awards under the Plan for the periods presented (\$ in thousands):

Edgar Filing: TRUSTMARK CORP - Form 10-Q

	Three Months		Six Months	
	Ended June		Ended June 30,	
	2015	2014	2015	2014
Performance awards	\$318	\$267	\$564	\$530
Time-vested awards	612	777	1,217	1,705
Total compensation expense	\$930	\$1,044	\$1,781	\$2,235

## Note 12 – Contingencies

### Lending Related

Trustmark makes commitments to extend credit and issues standby and commercial letters of credit (letters of credit) in the normal course of business in order to fulfill the financing needs of its customers. The carrying amount of commitments to extend credit and letters of credit approximates the fair value of such financial instruments. These amounts are not material to Trustmark's financial statements.

Commitments to extend credit are agreements to lend money to customers pursuant to certain specified conditions. Commitments generally have fixed expiration dates or other termination clauses. Because many of these commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The exposure to credit loss in the event of nonperformance by the other party to the commitments to extend credit is represented by the contract amount of those instruments. Trustmark applies the same credit policies and standards as it does in the lending process when making these commitments. The collateral obtained is based upon the assessed creditworthiness of the borrower. At June 30, 2015 and 2014, Trustmark had unused commitments to extend credit of \$2.540 billion and \$2.223 billion, respectively.

Letters of credit are conditional commitments issued by Trustmark to insure the performance of a customer to a third-party. A financial standby letter of credit irrevocably obligates Trustmark to pay a third-party beneficiary when a customer fails to repay an outstanding loan or debt instrument. A performance standby letter of credit irrevocably obligates Trustmark to pay a third-party beneficiary when a customer fails to perform some contractual, nonfinancial obligation. When issuing letters of credit, Trustmark uses essentially the same policies regarding credit risk and collateral, which are followed in the lending process. At June 30, 2015 and 2014, Trustmark's maximum exposure to credit loss in the event of nonperformance by the other party for letters of credit was \$134.0 million and \$147.5 million, respectively. These amounts consist primarily of commitments with maturities of less than three years, which have an immaterial carrying value. Trustmark holds collateral to support standby letters of credit when deemed necessary. As of June 30, 2015, the fair value of collateral held was \$28.7 million.

### Legal Proceedings

Trustmark's wholly-owned subsidiary, TNB, has been named as a defendant in two lawsuits related to the collapse of the Stanford Financial Group. The first is a purported class action complaint that was filed on August 23, 2009 in the District Court of Harris County, Texas, by Peggy Roif Rotstain, Guthrie Abbott, Catherine Burnell, Steven Queyrouze, Jaime Alexis Arroyo Bornstein and Juan C. Olano (collectively, "Class Plaintiffs"), on behalf of themselves and all others similarly situated, naming TNB and four other financial institutions unaffiliated with Trustmark as defendants. The complaint seeks to recover (i) alleged fraudulent transfers from each of the defendants in the amount of fees and other monies received by each defendant from entities controlled by R. Allen Stanford (collectively, the "Stanford Financial Group") and (ii) damages allegedly attributable to alleged conspiracies by one or more of the defendants with the Stanford Financial Group to commit fraud and/or aid and abet fraud on the asserted grounds that defendants knew or should have known the Stanford Financial Group was conducting an illegal and fraudulent scheme. Plaintiffs have demanded a jury trial. Plaintiffs did not quantify damages. In November 2009, the lawsuit was removed to federal court by certain defendants and then transferred by the United States Panel on Multidistrict Litigation to federal court in the Northern District of Texas (Dallas) where multiple Stanford related matters are being consolidated for pre-trial proceedings. In May 2010, all defendants (including TNB) filed motions to dismiss the lawsuit. In August 2010, the court authorized and approved the formation of an Official Stanford Investors Committee ("OSIC") to represent the interests of Stanford investors and, under certain circumstances, to file legal actions for the benefit of Stanford investors. In December 2011, the OSIC filed a motion to intervene in this action. In September 2012, the district court referred the case to a magistrate judge for hearing and determination of certain pretrial issues. In December 2012, the court granted the OSIC's motion to intervene, and the OSIC filed an Intervenor Complaint against one of the other defendant financial institutions. In February 2013, the OSIC filed an additional

Intervenor Complaint that asserts claims against TNB and the remaining defendant financial institutions. The OSIC seeks to recover: (i) alleged fraudulent transfers in the amount of the fees each of the defendants allegedly received from Stanford Financial Group, the profits each of the defendants allegedly made from Stanford Financial Group deposits, and other monies each of the defendants allegedly received from Stanford Financial Group; (ii) damages attributable to alleged conspiracies by each of the defendants with the Stanford Financial Group to commit fraud and/or aid and abet fraud and conversion on the asserted grounds that the defendants knew or should have known the Stanford Financial Group was conducting an illegal and fraudulent scheme; and (iii) punitive damages. The OSIC did not quantify damages. In July 2013, all defendants (including TNB) filed motions to dismiss the OSIC's claims. In March 2015, the court entered an order authorizing the parties to conduct discovery regarding class certification and setting a deadline of October 5, 2015 for the parties to complete briefing on class certification issues. In April 2015, the court granted in part and denied in part the defendants' motions to dismiss the Class Plaintiffs' claims and the OSIC's claims. The court dismissed all of the Class Plaintiffs' fraudulent transfer claims and dismissed certain of the OSIC's fraudulent transfer claims. The court denied the defendants' motions to dismiss in all other regards. On June 23, 2015, the court allowed the Class Plaintiffs to file a Second Amended Class Action Complaint ("SAC"), which asserted new claims against TNB and certain of the other defendants for aiding, abetting, and participating in (i) violations of the Texas Securities Act and (ii) breaches of fiduciary duty. On July 14, 2015, the defendants (including TNB) filed motions to dismiss the SAC. The Court has not yet ruled on the defendants' motions to dismiss the SAC.

The second Stanford-related lawsuit was filed on December 14, 2009 in the District Court of Ascension Parish, Louisiana, individually by Harold Jackson, Paul Blaine, Carolyn Bass Smith, Christine Nichols, and Ronald and Ramona Hebert naming TNB (misnamed as Trust National Bank) and other individuals and entities not affiliated with Trustmark as defendants. The complaint seeks to recover the money lost by these individual plaintiffs as a result of the collapse of the Stanford Financial Group (in addition to other damages) under various theories and causes of action, including negligence, breach of contract, breach of fiduciary duty, negligent misrepresentation, detrimental reliance, conspiracy, and violation of Louisiana’s uniform fiduciary, securities, and racketeering laws. The complaint does not quantify the amount of money the plaintiffs seek to recover. In January 2010, the lawsuit was removed to federal court by certain defendants and then transferred by the United States Panel on Multidistrict Litigation to federal court in the Northern District of Texas (Dallas) where multiple Stanford related matters are being consolidated for pre-trial proceedings. On March 29, 2010, the court stayed the case. TNB filed a motion to lift the stay, which was denied on February 28, 2012. In September 2012, the district court referred the case to a magistrate judge for hearing and determination of certain pretrial issues.

TNB’s relationship with the Stanford Financial Group began as a result of Trustmark’s acquisition of a Houston-based bank in August 2006, and consisted of correspondent banking and other traditional banking services in the ordinary course of business. Both Stanford-related lawsuits are in their preliminary stages and have been previously disclosed by Trustmark.

Trustmark and its subsidiaries are also parties to other lawsuits and other claims that arise in the ordinary course of business. Some of the lawsuits assert claims related to the lending, collection, servicing, investment, trust and other business activities, and some of the lawsuits allege substantial claims for damages.

All pending legal proceedings described above are being vigorously contested. In the regular course of business, Management evaluates estimated losses or costs related to litigation, and provision is made for anticipated losses whenever Management believes that such losses are probable and can be reasonably estimated. At the present time, Management believes, based on the advice of legal counsel and Management’s evaluation, that (i) the final resolution of pending legal proceedings described above will not, individually or in the aggregate, have a material impact on Trustmark’s consolidated financial position or results of operations and (ii) a loss in any such case is not probable at this time, and thus no accrual is required under FASB ASC Topic 450-20, “Loss Contingencies.”

Note 13 – Earnings Per Share (EPS)

The following table reflects weighted-average shares used to calculate basic and diluted EPS for the periods presented (in thousands):

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2015	2014	2015	2014
Basic shares	67,557	67,440	67,541	67,425
Dilutive shares	128	143	122	142
Diluted shares	67,685	67,583	67,663	67,567

Weighted-average antidilutive stock awards were excluded in determining diluted EPS. The following table reflects weighted-average antidilutive stock awards for the periods presented (in thousands):

Three	Six
Months	Months
Ended	Ended
June 30,	June 30,
2015	2014
2015	2014

Weighted-average antidilutive stock awards - 21 - 63

35

## Note 14 – Statements of Cash Flows

The following table reflects specific transaction amounts for the periods presented (\$ in thousands):

	Six Months Ended	
	June 30,	
	2015	2014
Income taxes paid	\$10,286	\$12,915
Interest expense paid on deposits and borrowings	10,185	11,780
Noncash transfers from loans to other real estate (1)	19,792	24,780

(1)Includes transfers from covered loans to covered other real estate.

## Note 15 – Shareholders’ Equity

## Regulatory Capital

As of January 1, 2015, Trustmark and TNB were subject to revised capital requirements as described in the section captioned “Recent Legislative and Regulatory Developments” included in Part I. Item 2. – Management’s Discussion and Analysis of Financial Condition and Results of Operations, located elsewhere in this report. Trustmark and TNB are subject to minimum risk-based capital and leverage capital requirements, which are administered by the federal bank regulatory agencies. These capital requirements, as defined by federal regulations, involve quantitative and qualitative measures of assets, liabilities and certain off-balance sheet instruments. Failure to meet minimum capital requirements can result in certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the financial statements of Trustmark and TNB and limit Trustmark’s and TNB’s ability to pay dividends. As of June 30, 2015, Trustmark and TNB exceeded all applicable minimum capital standards for the parent company and its primary banking subsidiary. In addition, Trustmark and TNB met applicable regulatory guidelines to be considered well-capitalized at June 30, 2015. To be categorized in this manner, Trustmark and TNB maintained minimum common equity Tier 1 risk-based capital, Tier 1 risk-based capital, total risk-based capital and Tier 1 leverage ratios as set forth in the accompanying table. There are no significant conditions or events that have occurred since June 30, 2015, which Management believes have affected Trustmark’s or TNB’s present classification.

Edgar Filing: TRUSTMARK CORP - Form 10-Q

The following table provides Trustmark's and TNB's actual regulatory capital amounts and ratios under regulatory capital standards in effect at June 30, 2015 (Basel III) and December 31, 2014 (Basel I) (\$ in thousands):

	Actual Regulatory Capital Amount	Capital Ratio	Minimum Requirement	To Be Well Capitalized		
At June 30, 2015:						
Common Equity Tier 1 Capital (to Risk Weighted Assets)						
Trustmark Corporation	\$1,133,094	13.28%	4.50	%	n/a	
Trustmark National Bank	1,172,108	13.74%	4.50	%	6.50	%
Tier 1 Capital (to Risk Weighted Assets)						
Trustmark Corporation	\$1,191,523	13.97%	6.00	%	n/a	
Trustmark National Bank	1,172,108	13.74%	6.00	%	8.00	%
Total Capital (to Risk Weighted Assets)						
Trustmark Corporation	\$1,285,309	15.07%	8.00	%	n/a	
Trustmark National Bank	1,265,894	14.84%	8.00	%	10.00	%
Tier 1 Leverage (to Average Assets)						
Trustmark Corporation	\$1,191,523	10.14%	4.00	%	n/a	
Trustmark National Bank	1,172,108	9.99%	4.00	%	5.00	%
At December 31, 2014:						
Common Equity Tier 1 Capital (to Risk Weighted Assets)						
Trustmark Corporation	\$1,069,630	12.75%	n/a		n/a	
Trustmark National Bank	1,108,399	13.24%	n/a		n/a	
Tier 1 Capital (to Risk Weighted Assets)						
Trustmark Corporation	\$1,129,630	13.47%	4.00	%	n/a

Total Capital (to Risk Weighted Assets)						
Trustmark Corporation	\$1,221,292	14.56%	8.00	%	n/a	
Trustmark National Bank	1,198,697	14.32%	8.00	%	10.00	%
Tier 1 Leverage (to Average Assets)						
Trustmark Corporation	\$1,129,630	9.63%	4.00	%	n/a	
Trustmark National Bank	1,108,399	9.46%	4.00	%	5.00	%

Accumulated Other Comprehensive Loss

The following table presents the components of accumulated other comprehensive loss and the related tax effects allocated to each component for the six months ended June 30, 2015 and 2014 (\$ in thousands). Reclassification adjustments related to securities available for sale are included in securities gains, net in the accompanying consolidated statements of income. The amortization of prior service cost, recognized net loss due to lump sum settlements and change in net actuarial loss on pension and other postretirement benefit plans are included in the computation of net periodic benefit cost (see Note 10 – Defined Benefit and Other Postretirement Benefits for additional details). Reclassification adjustments related to the cash flow hedge derivative are included in other interest expense in the accompanying consolidated statements of income.

Edgar Filing: TRUSTMARK CORP - Form 10-Q

	Before Tax Amount	Tax (Expense) Benefit	Net of Tax Amount
Six Months Ended June 30, 2015:			
Securities available for sale and transferred securities:			
Unrealized holding losses arising during the period	\$(4,154 )	\$ 1,589	\$(2,565 )
Reclassification adjustment for net gains realized in net income	-	-	-
Change in net unrealized holding loss on securities transferred to held to maturity	3,069	(1,174 )	1,895
Total securities available for sale and transferred securities	(1,085 )	415	(670 )
Pension and other postretirement benefit plans:			
Net change in prior service costs	125	(48 )	77
Recognized net loss due to lump sum settlements	896	(343 )	553
Change in net actuarial loss	2,437	(932 )	1,505
Total pension and other postretirement benefit plans	3,458	(1,323 )	2,135
Cash Flow Hedge Derivatives:			
Change in accumulated loss on effective cash flow hedge derivatives	(703 )	269	(434 )
Reclassification adjustment for loss realized in net income	421	(161 )	260
Total cash flow hedge derivatives	(282 )	108	(174 )
Total other comprehensive income	\$2,091	\$ (800 )	\$1,291
Six Months Ended June 30, 2014:			
Securities available for sale and transferred securities:			
Unrealized holding gains arising during the period	\$17,807	\$ (6,811 )	\$10,996
Reclassification adjustment for net gains realized in net income	(389 )	149	(240 )
Change in net unrealized holding loss on securities transferred to held to maturity	2,806	(1,073 )	1,733
Total securities available for sale and transferred securities	20,224	(7,735 )	12,489
Pension and other postretirement benefit plans:			
Net change in prior service costs	125	(48 )	77
Recognized net loss due to lump sum settlements	750	(287 )	463
Change in net actuarial loss	1,805	(690 )	1,115
Total pension and other postretirement benefit plans	2,680	(1,025 )	1,655
Cash Flow Hedge Derivatives:			
Change in accumulated gain on effective cash flow hedge derivatives	(1,571 )	601	(970 )
Total other comprehensive income	\$21,333	\$ (8,159 )	\$13,174

Edgar Filing: TRUSTMARK CORP - Form 10-Q

The following table presents the changes in the balances of each component of accumulated other comprehensive loss for the six months ended June 30, 2015 and 2014 (\$ in thousands). All amounts are presented net of tax.

	Securities Available for Sale and Transferred Securities	Defined Benefit Pension Items	Cash Flow Hedge Derivatives	Total
Balance at January 1, 2015	\$ (11,003 )	\$ (31,617)	\$ 136	\$(42,484)
Other comprehensive (loss) income before reclassification	(670 )	2,135	(434 )	1,031
Amounts reclassified from accumulated other comprehensive loss	-	-	260	260
Net other comprehensive (loss) income	(670 )	2,135	(174 )	1,291
Balance at June 30, 2015	\$ (11,673 )	\$ (29,482)	\$ (38 )	\$(41,193)
Balance at January 1, 2014	\$ (25,462 )	\$ (19,793)	\$ 1,524	\$(43,731)
Other comprehensive income (loss) before reclassification	12,729	1,655	(970 )	13,414
Amounts reclassified from accumulated other comprehensive loss	(240 )	-	-	(240 )
Net other comprehensive income (loss)	12,489	1,655	(970 )	13,174
Balance at June 30, 2014	\$ (12,973 )	\$ (18,138)	\$ 554	\$(30,557)

Note 16 – Fair Value

Financial Instruments Measured at Fair Value

The methodologies Trustmark uses in determining the fair values are based primarily on the use of independent, market-based data to reflect a value that would be reasonably expected upon exchange of the position in an orderly transaction between market participants at the measurement date. The predominant portion of assets that are stated at fair value are of a nature that can be valued using prices or inputs that are readily observable through a variety of independent data providers. The providers selected by Trustmark for fair valuation data are widely recognized and accepted vendors whose evaluations support the pricing functions of financial institutions, investment and mutual funds, and portfolio managers. Trustmark has documented and evaluated the pricing methodologies used by the vendors and maintains internal processes that regularly test valuations for anomalies.

Trustmark utilizes an independent pricing service to advise it on the carrying value of the securities available for sale portfolio. As part of Trustmark’s procedures, the price provided from the service is evaluated for reasonableness given market changes. When a questionable price exists, Trustmark investigates further to determine if the price is valid. If needed, other market participants may be utilized to determine the correct fair value. Trustmark has also reviewed and confirmed its determinations in thorough discussions with the pricing source regarding their methods of price discovery.

Mortgage loan commitments are valued based on the securities prices of similar collateral, term, rate and delivery for which the loan is eligible to deliver in place of the particular security. Trustmark acquires a broad array of mortgage security prices that are supplied by a market data vendor, which in turn accumulates prices from a broad list of securities dealers. Prices are processed through a mortgage pipeline management system that accumulates and segregates all loan commitment and forward-sale transactions according to the similarity of various characteristics (maturity, term, rate, and collateral). Prices are matched to those positions that are deemed to be an eligible substitute or offset (i.e., “deliverable”) for a corresponding security observed in the market place.

Trustmark estimates fair value of MSR through the use of prevailing market participant assumptions and market participant valuation processes. This valuation is periodically tested and validated against other third-party firm

valuations.

Trustmark obtains the fair value of interest rate swaps from a third-party pricing service that uses an industry standard discounted cash flow methodology. In addition, credit valuation adjustments are incorporated in the fair values to account for potential nonperformance risk. In adjusting the fair value of its interest rate swap contracts for the effect of nonperformance risk, Trustmark has considered any applicable credit enhancements such as collateral postings, thresholds, mutual puts, and guarantees. In conjunction with the FASB's fair value measurement guidance, Trustmark made an accounting policy election to measure the credit risk of these derivative financial instruments, which are subject to master netting agreements, on a net basis by counterparty portfolio.

---

Edgar Filing: TRUSTMARK CORP - Form 10-Q

Trustmark has determined that the majority of the inputs used to value its interest rate swaps offered to qualified commercial borrowers fall within Level 2 of the fair value hierarchy, while the credit valuation adjustments associated with these derivatives utilize Level 3 inputs, such as estimates of current credit spreads. Trustmark has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its interest rate swaps and has determined that the credit valuation adjustment is not significant to the overall valuation of these derivatives. As a result, Trustmark classifies its interest rate swap valuations in Level 2 of the fair value hierarchy.

Trustmark also utilizes exchange-traded derivative instruments such as Treasury note futures contracts and option contracts to achieve a fair value return that offsets the changes in fair value of MSR attributable to interest rates. Fair values of these derivative instruments are determined from quoted prices in active markets for identical assets therefore allowing them to be classified within Level 1 of the fair value hierarchy. In addition, Trustmark utilizes derivative instruments such as interest rate lock commitments in its mortgage banking area which lack observable inputs for valuation purposes resulting in their inclusion in Level 3 of the fair value hierarchy.

At this time, Trustmark presents no fair values that are derived through internal modeling. Should positions requiring fair valuation arise that are not relevant to existing methodologies, Trustmark will make every reasonable effort to obtain market participant assumptions, or independent evaluation.

#### Financial Assets and Liabilities

The following tables summarize financial assets and financial liabilities measured at fair value on a recurring basis as of June 30, 2015 and December 31, 2014, segregated by the level of valuation inputs within the fair value hierarchy utilized to measure fair value (\$ in thousands). There were no transfers between fair value levels for the six months ended June 30, 2015 and the year ended December 31, 2014.

	June 30, 2015			
	Total	Level 1	Level 2	Level 3
U.S. Government agency obligations	\$107,418	\$-	\$107,418	\$-

Edgar Filing: TRUSTMARK CORP - Form 10-Q

The changes in Level 3 assets measured at fair value on a recurring basis for the six months ended June 30, 2015 and 2014 are summarized as follows (\$ in thousands):

	MSR	Other Assets - Derivatives
Balance, January 1, 2015	\$64,358	\$ 1,299
Total net (loss) gain included in Mortgage banking, net (1)	(1,093 )	3,715
Additions	8,157	-
Sales	-	(3,393 )
Balance, June 30, 2015	\$71,422	\$ 1,621

The amount of total gains (losses) for the period included in earnings that are attributable to the change in unrealized gains or losses still held at June 30, 2015	\$3,708	\$ (564 )
--	---------	-----------

Balance, January 1, 2014	\$67,834	\$ 126
Total net (loss) gain included in Mortgage banking, net (1)	(7,964 )	2,493
Additions	5,179	-
Sales	-	(410 )
Balance, June 30, 2014	\$65,049	\$ 2,209

The amount of total losses for the period included in earnings that are attributable to the change in unrealized gains or losses still held at June 30, 2014	\$(3,761 )	\$ (594 )
--	------------	-----------

(1) Total net (loss) gain included in Mortgage banking, net relating to MSR includes changes in fair value due to market changes and due to run-off.

Trustmark may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with GAAP. Assets at June 30, 2015, which have been measured at fair value on a nonrecurring basis, include impaired LHFI. Loans for which it is probable Trustmark will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement are considered impaired. Impaired LHFI have been determined to be collateral dependent and assessed using a fair value approach. Specific allowances for impaired LHFI are based on comparisons of the recorded carrying values of the loans to the present value of the estimated cash flows of these loans at each loan's original effective interest rate, the fair value of the collateral or the observable market prices of the loans. Fair value estimates begin with appraised values based on the current market value or as-is value of the property being appraised, normally from recently received and reviewed appraisals. Appraisals are obtained from state-certified appraisers and are based on certain assumptions, which may include construction or development status and the highest and best use of the property. These appraisals are reviewed by Trustmark's Appraisal Review Department to ensure they are acceptable. Appraised values are adjusted down for costs associated with asset disposal. At June 30, 2015, Trustmark had outstanding balances of \$37.9 million in impaired LHFI that were specifically identified for evaluation and written down to the fair value of the underlying collateral less cost to sell based on the fair value of the collateral or other unobservable input compared to \$47.1 million at December 31, 2014. These specifically evaluated impaired LHFI are classified as Level 3 in the fair value hierarchy. Impaired LHFI are periodically reviewed and evaluated for additional impairment and adjusted accordingly based on the same factors identified above.

Nonfinancial Assets and Liabilities

Certain nonfinancial assets measured at fair value on a nonrecurring basis include foreclosed assets (upon initial recognition or subsequent impairment), nonfinancial assets and nonfinancial liabilities measured at fair value in the second step of a goodwill impairment test, and intangible assets and other nonfinancial long-lived assets measured at fair value for impairment assessment.

Other real estate, excluding covered other real estate, includes assets that have been acquired in satisfaction of debt through foreclosure and is recorded at the lower of cost or estimated fair value less the estimated cost of disposition. Fair value is based on independent appraisals and other relevant factors. In the determination of fair value subsequent to foreclosure, Management also considers other factors or recent developments, such as changes in market conditions from the time of valuation and anticipated sales values considering plans for disposition, which could result in an adjustment to lower the collateral value estimates indicated in the appraisals. At June 30, 2015, Trustmark's geographic other real estate distribution was concentrated primarily in its five key market regions: Alabama, Florida, Mississippi, Tennessee and Texas. The ultimate recovery of a substantial portion of the carrying amount of other real estate, excluding covered other real estate, is susceptible to changes in market conditions in these areas. Periodic revaluations are classified as Level 3 in the fair value hierarchy since assumptions are used that may not be observable in the market.

Certain foreclosed assets, upon initial recognition, are remeasured and reported at fair value through a charge-off to the allowance for loan losses based upon the fair value of the foreclosed asset. The fair value of a foreclosed asset, upon initial recognition, is estimated using Level 3 inputs based on adjusted observable market data. Foreclosed assets measured at fair value upon initial recognition totaled \$20.5 million (utilizing Level 3 valuation inputs) during the six months ended June 30, 2015 compared with \$24.6 million for the same period in 2014. In connection with the measurement and initial recognition of the foregoing foreclosed assets, Trustmark recognized charge-offs of the allowance for loan losses totaling \$3.9 million and \$6.7 million for the first six months of 2015 and 2014, respectively. Other than foreclosed assets measured at fair value upon initial recognition, \$25.7 million of foreclosed assets were remeasured during the first six months of 2015, requiring write-downs of \$993 thousand to reach their current fair values compared to \$25.9 million of foreclosed assets that were remeasured during the first six months of 2014, requiring write-downs of \$3.3 million.

#### Fair Value of Financial Instruments

FASB ASC Topic 825, "Financial Instruments," requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. A detailed description of the valuation methodologies used in estimating the fair value of financial instruments can be found in Note 19 – Fair Value included in Item 8 of Trustmark's Annual Report on Form 10-K for the year ended December 31, 2014.

The carrying amounts and estimated fair values of financial instruments at June 30, 2015 and December 31, 2014, are as follows (\$ in thousands):

	June 30, 2015		December 31, 2014	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
<b>Financial Assets:</b>				
<b>Level 2 Inputs:</b>				
Cash and short-term investments	\$255,050	\$255,050	\$317,858	\$317,858
Securities held to maturity	1,190,161	1,200,217	1,170,685	1,182,846
<b>Level 3 Inputs:</b>				
Net LHFI	6,375,907	6,431,470	6,379,853	6,453,618
Net acquired loans	453,770	453,770	537,350	537,350
FDIC indemnification asset	2,632	2,632	6,997	6,997
<b>Financial Liabilities:</b>				
<b>Level 2 Inputs:</b>				
Deposits	9,792,174	9,797,257	9,698,358	9,702,864
Short-term liabilities	679,206	679,206	868,620	868,620
Long-term FHLB advances	1,204	1,211	1,253	1,263
Subordinated notes	49,953	52,626	49,936	53,504
Junior subordinated debt securities	61,856	46,392	61,856	46,392

In cases where quoted market prices are not available, fair values are generally based on estimates using present value techniques. Trustmark's premise in present value techniques is to represent the fair values on a basis of replacement value of the existing instrument given observed market rates on the measurement date. These techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates for those assets or liabilities cannot necessarily be substantiated by comparison to independent markets and, in many cases, may not be realizable in immediate settlement of the instruments. The estimated fair value of financial instruments with immediate and shorter-term maturities (generally 90 days or less) is assumed to be the same as the recorded book value. All nonfinancial instruments, by definition, have been excluded

from these disclosure requirements. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of Trustmark.

The fair values of net LHFI are estimated for portfolios of loans with similar financial characteristics. For variable rate LHFI that reprice frequently with no significant change in credit risk, fair values are based on carrying values. The fair values of certain mortgage LHFI, such as 1-4 family residential properties, are based on quoted market prices of similar loans sold in conjunction with securitization transactions, adjusted for differences in loan characteristics. The fair values of other types of LHFI are estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. The processes for estimating the fair value of net LHFI described above does not represent an exit price under FASB ASC Topic 820, "Fair Value Measurements and Disclosures," and such an exit price could potentially produce a different fair value estimate at June 30, 2015 and December 31, 2014.

## Fair Value Option

Trustmark has elected to account for its mortgage LHFS purchased or originated on or after October 1, 2014 under the fair value option, with interest income on these mortgage LHFS reported in interest and fees on LHFS and LHFI. The fair value of the mortgage LHFS is determined using quoted prices for a similar asset, adjusted for specific attributes of that loan. The mortgage LHFS are actively managed and monitored and certain market risks of the loans may be mitigated through the use of derivatives. These derivative instruments are carried at fair value with changes in fair value recorded in noninterest income in mortgage banking, net. The changes in the fair value of the LHFS are largely offset by changes in the fair value of the derivative instruments. For the three and six months ended June 30, 2015, a net loss of \$2.2 million and \$1.8 million was recorded in noninterest income in mortgage banking, net for changes in the fair value of the LHFS accounted for under the fair value option. Interest and fees on LHFS and LHFI for the three and six months ended June 30, 2015 included \$1.3 million and \$2.3 million, respectively, of interest earned on the LHFS accounted for under the fair value option. Election of the fair value option allows Trustmark to reduce the accounting volatility that would otherwise result from the asymmetry created by accounting for the financial instruments at the lower of cost or fair value and the derivatives at fair value. The fair value option election does not apply to the GNMA optional repurchase loans.

The following table provides information about the fair value and the contractual principal outstanding of the LHFS accounted for under the fair value option as of June 30, 2015 and December 31, 2014 (\$ in thousands):

	June 30, 2015	December 31, 2014
Fair value of LHFS	\$ 128,329	\$ 91,182
LHFS contractual principal outstanding	126,627	88,106
Fair value less unpaid principal	\$ 1,702	\$ 3,076

## Note 17 – Derivative Financial Instruments

## Derivatives Designated as Hedging Instruments

On April 4, 2013, Trustmark entered into a forward interest rate swap contract on junior subordinated debentures with a total notional amount of \$60.0 million. The interest rate swap contract was designated as a derivative instrument in a cash flow hedge under FASB ASC Topic 815, “Derivatives and Hedging,” with the objective of protecting the quarterly interest payments on Trustmark’s \$60.0 million of junior subordinated debentures issued to Trustmark Preferred Capital Trust I throughout the five-year period beginning December 31, 2014 and ending December 31, 2019 from the risk of variability of those payments resulting from changes in the three-month LIBOR interest rate. Under the swap, which became effective on December 31, 2014, Trustmark will pay a fixed interest rate of 1.66% and receive a variable interest rate based on three-month LIBOR on a total notional amount of \$60.0 million, with quarterly net settlements.

No ineffectiveness related to the interest rate swap designated as a cash flow hedge was recognized in the consolidated statements of income for the six months ended June 30, 2015 and 2014. The accumulated net after-tax loss related to the effective cash flow hedge included in accumulated other comprehensive loss totaled \$37 thousand at June 30, 2015 compared to an accumulated net after-tax gain of \$136 thousand at December 31, 2014. Amounts reported in accumulated other comprehensive loss related to this derivative are reclassified to other interest expense as interest payments are made on Trustmark’s variable rate junior subordinated debentures. During the next twelve months, Trustmark estimates that \$704 thousand will be reclassified as an increase to other interest expense.

## Derivatives not Designated as Hedging Instruments

Trustmark utilizes a portfolio of exchange-traded derivative instruments, such as Treasury note futures contracts and option contracts, to achieve a fair value return that economically hedges changes in the fair value of MSR attributable to interest rates. These transactions are considered freestanding derivatives that do not otherwise qualify for hedge accounting. Changes in the fair value of these exchange-traded derivative instruments are recorded in noninterest income in mortgage banking, net and are offset by changes in the fair value of MSR. The impact of this strategy resulted in a net positive ineffectiveness of \$2.1 million and \$546 thousand for the three months ended June 30, 2015 and 2014, respectively. For the six months ended June 30, 2015 and 2014, the impact was a net positive ineffectiveness of \$3.4 million and \$2.4 million, respectively.

As part of Trustmark's risk management strategy in the mortgage banking area, derivative instruments such as forward sales contracts are utilized. Trustmark's obligations under forward sales contracts consist of commitments to deliver mortgage loans, originated and/or purchased, in the secondary market at a future date. On October 1, 2014, Trustmark elected to account for its mortgage LHFS under the fair value option in order to reduce the accounting volatility of related hedges. As a result of this election, the forward sales contracts no longer qualify as derivative instruments designated as fair value hedges under FASB ASC Topic 815. Changes in the fair value of these derivative instruments are recorded in noninterest income in mortgage banking, net and are offset by changes in the fair value of LHFS. Trustmark's off-balance sheet obligations under these derivative instruments totaled \$248.0 million at June 30, 2015, with a positive valuation adjustment of \$2.0 million, compared to \$142.0 million, with a negative valuation adjustment of \$1.0 million as of December 31, 2014.

Trustmark also utilizes derivative instruments such as interest rate lock commitments in its mortgage banking area. Interest rate lock commitments are residential mortgage loan commitments with customers, which guarantee a specified interest rate for a specified time period. Changes in the fair value of these derivative instruments are recorded in noninterest income in mortgage banking, net and are offset by the changes in the fair value of forward sales contracts. Trustmark's off-balance sheet obligations under these derivative instruments totaled \$187.4 million at June 30, 2015, with a positive valuation adjustment of \$1.6 million, compared to \$88.4 million, with a positive valuation adjustment of \$1.3 million as of December 31, 2014.

Trustmark offers certain derivatives products directly to qualified commercial lending clients seeking to manage their interest rate risk. Trustmark economically hedges interest rate swap transactions executed with commercial lending clients by entering into offsetting interest rate swap transactions with institutional derivatives market participants. Derivatives transactions executed as part of this program are not designated as qualifying hedging relationships and are, therefore, carried at fair value with the change in fair value recorded in noninterest income in bank card and other fees. Because these derivatives have mirror-image contractual terms, in addition to collateral provisions which mitigate the impact of non-performance risk, the changes in fair value are expected to substantially offset. As of June 30, 2015, Trustmark had interest rate swaps with an aggregate notional amount of \$348.0 million related to this program, compared to \$349.4 million as of December 31, 2014.

#### Credit-risk-related Contingent Features

Trustmark has agreements with its financial institution counterparties that contain provisions where if Trustmark defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then Trustmark could also be declared in default on its derivatives obligations.

As of June 30, 2015 and December 31, 2014, the termination value of interest rate swaps in a liability position, which includes accrued interest but excludes any adjustment for nonperformance risk, related to these agreements was \$1.9 million. As of June 30, 2015, Trustmark had posted collateral of \$2.0 million against its obligations because of negotiated thresholds and minimum transfer amounts under these agreements. If Trustmark had breached any of these triggering provisions at June 30, 2015, it could have been required to settle its obligations under the agreements at the termination value.

Credit risk participation agreements arise when Trustmark contracts with other financial institutions, as a guarantor or beneficiary, to share credit risk associated with certain interest rate swaps. These agreements provide for reimbursement of losses resulting from a third party default on the underlying swap. As of June 30, 2015 and December 31, 2014, Trustmark had entered into three risk participation agreements as a beneficiary with an aggregate notional amount of \$18.8 million and \$19.1 million, respectively. As of June 30, 2015 and December 31, 2014, Trustmark had entered into one risk participation agreement as a guarantor with an aggregate notional amount of \$6.0 million and \$6.2 million, respectively. The fair values of these risk participation agreements were immaterial at June 30, 2015 and December 31, 2014.

## Tabular Disclosures

The following tables disclose the fair value of derivative instruments in Trustmark's balance sheets as of June 30, 2015 and December 31, 2014 as well as the effect of these derivative instruments on Trustmark's results of operations for the periods presented (\$ in thousands):

	June 30, 2015	December 31, 2014

The following table discloses the amount included in other comprehensive (loss) income for derivative instruments designated as cash flow hedges for the periods presented (\$ in thousands):

	Three Months Ended June 30, 2015	2014	Six Months Ended June 30, 2015	2014
Derivatives in cash flow hedging relationship				
Amount of gain (loss) recognized in other comprehensive income	\$ 174	\$(562)	\$(434)	\$(970)

Edgar Filing: TRUSTMARK CORP - Form 10-Q

Trustmark's interest rate swap derivative instruments are subject to master netting agreements, and therefore, eligible for offsetting in the consolidated balance sheet. Trustmark has elected to not offset any derivative instruments in its consolidated balance sheets. Information about financial instruments that are eligible for offset in the consolidated balance sheets as of June 30, 2015 and December 31, 2014 is presented in the following tables (\$ in thousands):

Offsetting of Derivative Assets  
As of June 30, 2015

---

Note 18 – Segment Information

Trustmark’s management reporting structure includes three segments: General Banking, Wealth Management and Insurance. General Banking is primarily responsible for all traditional banking products and services, including loans and deposits. General Banking also consists of internal operations such as Human Resources, Executive Administration, Treasury, Funds Management, Public Affairs and Corporate Finance. Wealth Management provides customized solutions for customers by integrating financial services with traditional banking products and services such as money management, full-service brokerage, financial planning, personal and institutional trust and retirement services. Through Fisher Brown Bottrell Insurance, Inc. (FBBI), a wholly owned subsidiary of TNB, Trustmark’s Insurance Division provides a full range of retail insurance products including commercial risk management products, bonding, group benefits and personal lines coverage. During the second quarter of 2014, Trustmark revised the composition of its operating segments by moving the Private Banking group from the Wealth Management Division to the General Banking Division as the result of a change in supervision of this group for segment reporting purposes.

The accounting policies of each reportable segment are the same as those of Trustmark except for its internal allocations. Noninterest expenses for back-office operations support are allocated to segments based on estimated uses of those services. Trustmark measures the net interest income of its business segments with a process that assigns cost of funds or earnings credit on a matched-term basis. This process, called “funds transfer pricing”, charges an appropriate cost of funds to assets held by a business unit, or credits the business unit for potential earnings for carrying liabilities. The net of these charges and credits flows through to the General Banking segment, which contains the management team responsible for determining TNB’s funding and interest rate risk strategies.

Note 19 – Accounting Policies Recently Adopted and Pending Accounting Pronouncements

ASU 2015-03, “Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs.” Issued in April 2015, ASU 2015-03 addresses the different balance sheet presentation requirements for debt issuance cost and debt discount and premiums, which creates unnecessary complexity. ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of the debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments of ASU 2015-03. The amendments of ASU 2015-03 are effective for interim and annual periods beginning after December 15, 2015. The adoption of ASU 2015-03 is not expected to have a material impact on Trustmark’s consolidated financial statements.

ASU 2015-02, “Consolidation (Subtopic 810): Amendments to the Consolidation Analysis.” Issued in February 2015, ASU 2015-02 eliminates the indefinite deferral allowed under ASU 2009-17, “Consolidation (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities,” for investments in certain investment funds, and significantly changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. The changes include, among others, modification of the evaluation of whether limited partnerships and similar legal entities are variable interest entities (VIEs) or voting interest entities and elimination of the presumption that a general partner should consolidate a limited partnership. ASU 2015-02 is expected to result in the deconsolidation of many entities; however, reporting entities will need to reevaluate all previous consolidation conclusions. The amendments of ASU 2015-02 are effective for interim and annual periods beginning after December 15, 2015. The adoption of ASU 2015-02 is not expected to have a material impact on Trustmark’s consolidated financial statements.

ASU 2014-14, “Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40): Classification of Certain Government-Guaranteed Residential Mortgage Loans upon Foreclosure (a consensus of the FASB Emerging Issues Task Force).” Issued in August 2014, ASU 2014-14 requires that a mortgage loan be derecognized and that a separate other receivable be recognized upon foreclosure if (1) the loan has a government guarantee that is not separable from the loan before foreclosure; (2) at the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under the claim; and (3) at the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. ASU 2014-14 also provides that upon foreclosure, the separate other receivable would be measured based on the current amount of the loan balance (principal and interest) expected to be recovered under the guarantee. ASU 2014-14 became effective for Trustmark on January 1, 2015, and was applied using the prospective transition method as described in ASU 2014-14. The adoption of ASU 2014-14 did not have a material impact on Trustmark’s consolidated financial statements.

ASU 2014-11, “Transfers and Servicing (Topic 860) – Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures.” Issued in June 2014, ASU 2014-11 changes the accounting for repurchase-to-maturity transactions to secured borrowing accounting, and for repurchase financing arrangements requires separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty, which will result in secured borrowing accounting for the repurchase agreement. ASU 2014-11 also requires disclosures for certain transactions comprising a transfer of a financial asset accounted for as a sale and an agreement with the same transferee entered into in contemplation of the initial transfer that results in the transferor retaining substantially all of the exposure to the economic return on the transferred financial asset throughout the term of the transaction. ASU 2014-11 requires interim and annual disclosures for repurchase agreements, securities lending transactions and repurchase-to-maturity transactions that are accounted for as secured borrowings, which include a disaggregation of the gross obligation by class of collateral pledged; the remaining contractual tenor of the agreements; and a discussion of the potential risks associated with the agreements and the related collateral pledged, including obligations arising from a decline in the fair value of the collateral pledged and how those risks are managed. The accounting changes and disclosure requirements for certain transactions accounted for as a sale in ASU 2014-11 became effective for Trustmark’s on January 1, 2014 and had no impact on Trustmark’s consolidated financial statements due to Trustmark’s

existing policy of accounting for its repurchase agreements as secured borrowings. The disclosures requirements for transactions accounted for as secured borrowings in ASU 2014-11 became effective for Trustmark on April 1, 2015. For Trustmark, the adoption of ASU 2014-11 resulted in a change in presentation only for the newly required disclosures, which are included in Note 9 – Securities Sold Under Repurchase Agreements, and had no impact on Trustmark’s consolidated financial statements.

ASU 2014-09, “Revenue from Contracts with Customers (Topic 606).” Issued in May 2014, ASU 2014-09 will add FASB ASC Topic 606, “Revenue from Contracts with Customers,” and will supersede revenue recognition requirements in FASB ASC Topic 605, “Revenue Recognition,” as well as certain cost guidance in FASB ASC Topic 605-35, “Revenue Recognition – Construction-Type and Production-Type Contracts.” ASU 2014-09 provides a framework for revenue recognition that replaces the existing industry and transaction specific requirements under the existing standards. ASU 2014-09 requires an entity to apply a five-step model to determine when to recognize revenue and at what amount. The model specifies that revenue should be recognized when (or as) an entity transfers control of goods or services to a customer at the amount in which the entity expects to be entitled. Depending on whether certain criteria are met, revenue should be recognized either over time, in a manner that depicts the entity’s performance, or at a point in time, when control of the goods or services are transferred to the customer. ASU 2014-09 provides that an entity should apply the following steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; and (5) recognize revenue when, or as, the entity satisfies a performance obligation. In addition, the existing requirements for the recognition of a gain or loss on the transfer of non-financial assets that are not in a contract with a customer are amended to be consistent with the guidance on recognition and measurement in ASU 2014-09. The amendments of ASU 2014-09 are effective for interim and annual periods beginning after December 15, 2016, and may be applied either retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying ASU 2014-09 recognized at the date of initial application. If the transition method of application is elected, the entity should also provide the additional disclosures in reporting periods that include the date of initial application of (1) the amount by which each financial statement line item is affected in the current reporting period, as compared to the guidance that was in effect before the change, and (2) an explanation of the reasons for significant changes. Management is currently evaluating the impact this ASU will have on Trustmark’s consolidated financial statements as well as the most appropriate method of application; however, regardless of the method of application selected, the adoption of ASU 2014-09 is not expected to have a material impact on Trustmark’s consolidated financial statements.

ASU 2014-04, “Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure (a consensus of the FASB Emerging Issues Task Force).” Issued in January 2014, ASU 2014-04 clarifies when an “in substance repossession or foreclosure” occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loans, such that all or a portion of the loan should be derecognized and the real estate property recognized. ASU 2014-04 states that a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure, or the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. The amendments of ASU 2014-04 also require interim and annual disclosure of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. The amendments of ASU 2014-04 may be applied using either a modified retrospective transition method or a prospective transition method. ASU 2014-04 became effective for Trustmark’s financial statements on January 1, 2015 and was applied using the prospective transition method. For Trustmark, the adoption of ASU 2014-04 resulted in a change in presentation only for the newly required disclosures, which are included in Note 3 – Loans Held for Investment (LHFI) and Allowance for Loan Losses, LHFI, and had no impact on Trustmark’s consolidated financial statements.

ASU 2014-01, “Investments – Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects (a consensus of the FASB Emerging Issues Task Force).” Issued in January 2014, ASU 2014-01 permits reporting entities that invest in qualified affordable housing projects to elect to account for those investments using the “proportional amortization method” if certain conditions are met. Under this method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense (benefit).

The decision to apply the proportional amortization method of accounting is an accounting policy decision and should be applied consistently to all qualifying affordable housing project investments. ASU 2014-01 should be applied retrospectively to all periods presented, and became effective for Trustmark's financial statements on January 1, 2015. Trustmark currently accounts for its tax credit investments utilizing the equity method of accounting and does not have a significant amount of investments in qualified affordable housing projects that qualify for the low income housing tax credit. Trustmark did not elect the proportional amortization method of accounting for its investments in low income housing tax credits; however, management will review any future investments in qualified affordable housing projects to determine if the investments meet the conditions required for using the proportional amortization method of accounting and make a decision regarding the accounting policy. The adoption of ASU 2014-01 had no impact on Trustmark's consolidated financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following provides a narrative discussion and analysis of Trustmark Corporation's (Trustmark) financial condition and results of operations. This discussion should be read in conjunction with the unaudited consolidated financial statements and the supplemental financial data included elsewhere in this report.

Description of Business

Trustmark, a Mississippi business corporation incorporated in 1968, is a bank holding company headquartered in Jackson, Mississippi. Trustmark's principal subsidiary is Trustmark National Bank (TNB), initially chartered by the State of Mississippi in 1889. At June 30, 2015, TNB had total assets of \$12.180 billion, which represented approximately 99.98% of the consolidated assets of Trustmark.

Through TNB and its other subsidiaries, Trustmark operates as a financial services organization providing banking and other financial solutions through 201 offices and 2,989 full-time equivalent associates (measured at June 30, 2015) located in the states of Alabama (primarily in the central and southern regions of that state, which are collectively referred to herein as Trustmark's Alabama market), Florida (primarily in the northwest or "Panhandle" region of that state, which is referred to herein as Trustmark's Florida market), Mississippi, Tennessee (in Memphis and the Northern Mississippi regions, which are collectively referred to herein as Trustmark's Tennessee market), and Texas (primarily in Houston, which is referred to herein as Trustmark's Texas market). The principal products produced and services rendered by TNB and Trustmark's other subsidiaries are as follows:

Trustmark National Bank

Commercial Banking – TNB provides a full range of commercial banking services to corporations and other business customers. Loans are provided for a variety of general corporate purposes, including financing for commercial and industrial projects, income producing commercial real estate, owner-occupied real estate and construction and land development. TNB also provides deposit services, including checking, savings and money market accounts and certificates of deposit as well as treasury management services.

Consumer Banking – TNB provides banking services to consumers, including checking, savings, and money market accounts as well as certificates of deposit and individual retirement accounts. In addition, TNB provides consumer customers with installment and real estate loans and lines of credit.

Mortgage Banking – TNB provides mortgage banking services, including construction financing, production of conventional and government insured mortgages, secondary marketing and mortgage servicing. At June 30, 2015, TNB's mortgage loan portfolio totaled approximately \$1.087 billion, while its portfolio of mortgage loans serviced for others, including Federal National Mortgage Association (FNMA), Federal Home Loan Mortgage Corporation (FHLMC) and Government National Mortgage Association (GNMA), totaled approximately \$5.732 billion.

Insurance – TNB provides a competitive array of insurance solutions for business and individual risk management needs. Business insurance offerings include services and specialized products for medical professionals, construction, manufacturing, hospitality, real estate and group life and health plans. Individual customers are also provided life and health insurance, and personal line policies. TNB provides these services through Fisher Brown Bottrell Insurance, Inc. (FBBI), a Mississippi corporation which is based in Jackson, Mississippi.

Wealth Management and Trust Services – TNB offers specialized services and expertise in the areas of wealth management, trust, investment and custodial services for corporate and individual customers. These services include the administration of personal trusts and estates as well as the management of investment accounts for individuals, employee benefit plans and charitable foundations. TNB also provides corporate trust and institutional custody,

securities brokerage, financial and estate planning, retirement plan services as well as life insurance and other risk management services provided by FBBI. TNB's Wealth Management Division is also assisted by Trustmark Investment Advisors, Inc. (TIA), a Securities and Exchange Commission (SEC)-registered investment adviser. TIA provides customized investment management services to TNB's Wealth Management Division, which in turn relies upon that advice to provide investment management services to TNB's wealth management customers. During the second quarter of 2014, TNB moved the administration of Private Banking, previously reported in the Wealth Management Division, to the General Banking Division, which encompasses TNB's commercial, consumer and mortgage banking products and services. At June 30, 2015, Trustmark held assets under management and administration of \$11.082 billion and brokerage assets of \$1.607 billion.

New Market Tax Credits (NMTC) – TNB provides an intermediary vehicle for the provision of loans or investments in Low-Income Communities (LICs) through its subsidiary Southern Community Capital, LLC (SCC). SCC is a Mississippi single member limited liability company and a certified Community Development Entity (CDE). The primary mission of SCC is to provide investment capital for LICs, as defined by Section 45D of the Internal Revenue Code, or Low-Income Persons (LIPs). As a certified CDE, SCC is able to apply to the Community Development Financial Institutions Fund (CDFI Fund) to receive NMTC allocations to offer investors in exchange for equity investments in qualified projects.

#### Capital Trust

Trustmark Preferred Capital Trust I (the Trust) is a Delaware trust affiliate formed in 2006 to facilitate a private placement of \$60.0 million in trust preferred securities. As defined in applicable accounting standards, the Trust is considered a variable interest entity for which Trustmark is not the primary beneficiary. Accordingly, the accounts of the Trust are not included in Trustmark's consolidated financial statements.

#### Executive Overview

Trustmark continued to achieve solid financial results with total revenues of \$142.5 million and \$282.2 million for the three and six months ended June 30, 2015, respectively. Trustmark experienced growth during the second quarter of 2015 in the loans held for investment (LHFI) portfolio in the Alabama and Texas market regions, in addition to growth in its mortgage banking and insurance businesses. Credit quality remained strong and continued to be an important contributor to Trustmark's financial success. Noninterest income increased 7.5% from the prior quarter and 3.2% from one year earlier, resulting from strong growth across Trustmark's fee-income businesses, and noninterest expense remained well-controlled. Trustmark's capital position remained solid, reflecting the consistent profitability of its diversified financial services businesses. Trustmark also continued the realignment of its retail delivery channels to enhance productivity and efficiency as well as promote additional revenue growth. Trustmark's investments in remote deposit ATMs and myTrustmark<sup>SM</sup>, Trustmark's new online consumer-banking solution introduced during the second quarter of 2015, have been well-received by its customers. Trustmark is committed to investments to support profitable revenue growth as well as reengineering and efficiency opportunities to enhance shareholder value. Trustmark's Board of Directors declared a quarterly cash dividend of \$0.23 per share. The dividend is payable September 15, 2015, to shareholders of record on September 1, 2015.

#### Recent Economic and Industry Developments

The economy has continued to show moderate signs of improvement; however, lingering economic concerns remain as a result of the cumulative weight of soft labor markets in the United States, volatility in crude oil prices, slowing growth in markets in Western Europe, as well as in China and other emerging markets, combined with uncertainty regarding the timing of the anticipated tightening of the monetary policy by the Federal Reserve Board (FRB), and the continued instability of the Russian and Greek economies. Doubts surrounding the near-term direction of global markets are expected to persist for some time. While Trustmark's customer base is wholly domestic, international economic conditions can affect domestic conditions, and thus may have an impact upon Trustmark's financial condition or results of operations.

Notwithstanding the various issues affecting European and Asian economies, the economy in the United States improved slightly during the six months of 2015. Estimated employment growth in the United States for the first six months of 2015 was reported to average approximately 208,000 jobs created per month compared to approximately 228,000 jobs created per month during the first six months of 2014, while the unemployment rate declined to 5.3% as of June 2015 compared to 5.6% as of December 2014. Consumer confidence in the United States rose by approximately 9.5% in the first six months of 2015, which reportedly reflected consumers' increased optimism about the current state of business and employment conditions as well as the short-term outlook for both business conditions and the labor market. In the July 2015 "Summary of Commentary on Current Economic Conditions by Federal

Reserve Districts,” the twelve Federal Reserve Districts’ reports suggested national economic activity continued to expand at a moderate to modest pace during the reporting period, and noted growth in lending activity, with real estate lending increased in half the districts and consumer lending, auto loans in particular, up in several districts. Reports by the three Federal Reserve Districts covering the southeast United States, which include Trustmark’s five key market regions, suggested that economic activity increased at a moderate pace, with most businesses reporting improved sales and positive outlooks for the near term, with the exception of the energy sector. These three Federal Reserve Districts also reported increased loan demand, improvements in residential and commercial real estate activity and increased commercial construction.

The FRB has recently signaled its intent to begin increasing interest rates during the second half of 2015, depending upon the performance of the economy in the coming months. It is, however, not possible to predict the timing or amount of any such increase in the coming year. Low interest rates will continue to place pressure on net interest margins, as older, higher-yielding assets continue to mature or default and can only be replaced with lower-yielding instruments.

In the Federal Deposit Insurance Corporation's (FDIC's) first quarter 2015 "Quarterly Banking Profile" (published May 27, 2015), insured institutions reported an aggregate increase in net income for the first quarter of 2015 compared to that of 2014, principally due to an increase in reported net operating revenue (the sum of net interest income and total noninterest income). The reported increase in net operating revenue for the first quarter of 2015 compared to that of 2014 was attributed to an aggregate increase in net interest income as well as noninterest income, which was principally due to higher trading revenue and income from the sale, securitization and servicing of mortgage loans. Insured institutions reported an aggregate decrease in the average net interest margin for the first quarter of 2015 compared to that of 2014, as higher-yielding assets matured and were replaced by lower-yielding investments in a low interest-rate environment. These institutions also reported (i) an aggregate increase in quarterly loan loss provisions for the third consecutive quarter; (ii) the lowest quarterly charge-off rate since the third quarter of 2006; (iii) improved noncurrent levels as the percentage of total loans and leases that were noncurrent declined to a seven-year low; (iv) declines in loan loss reserves for the twentieth consecutive quarter; and (v) increased equity capital.

Management has continued to carefully monitor the impact of liquidity in the financial markets, changes in values of securities and other assets, loan performance, default rates and other financial and macro economic indicators, in order to navigate the challenging economic environment. Managing credit risks resulting from current economic and real estate market conditions also continues to be a primary focus for Trustmark. Trustmark did not make significant changes to its loan underwriting standards during the first six months of 2015. Trustmark's willingness to make loans to qualified applicants that meet its traditional, prudent lending standards has not changed. Trustmark adheres to interagency guidelines regarding concentration limits of commercial real estate loans. As a result of the continued economic uncertainty, Trustmark remains cautious in granting credit involving certain categories of real estate as well as in making exceptions to its loan policy.

#### Financial Highlights

Trustmark reported net income of \$30.6 million, or basic and diluted earnings per share of \$0.45 in the second quarter of 2015, compared to \$32.9 million, or basic and diluted earnings per share of \$0.49 in the second quarter of 2014. Trustmark's performance during the quarter ended June 30, 2015, produced a return on average tangible equity of 12.05% and a return on average assets of 1.01% compared to a return on average tangible equity of 13.90% and a return on average assets of 1.10% during the quarter ended June 30, 2014. For the six months ending June 30, 2015, Trustmark reported net income of \$59.8 million, or basic and diluted earnings per share of \$0.88, compared to \$61.9 million, or basic and diluted earnings per share of \$0.92, for the six months ending June 30, 2014. Trustmark's performance for the six months ended June 30, 2015, produced a return on average tangible equity of 11.96% and a return on average assets of 0.99% compared to a return on average tangible equity of 13.43% and a return on average assets of 1.05% for the six months ended June 30, 2014. Revenue totaled \$142.5 million and \$282.2 million for the quarter and six months ended June 30, 2015, respectively, compared to \$149.4 million and \$288.4 million for the quarter and six months ended June 30, 2014, respectively. Revenue is defined as net interest income plus noninterest income. See the highlights discussed below as well as the section captioned "Results of Operations" located elsewhere in this report, for information regarding the decrease in revenue.

Net income for the second quarter of 2015 declined \$2.3 million, or 7.0%, when compared to the same time period in 2014 as declines in provision for loan losses, acquired loans and noninterest expense and gains in noninterest income were more than offset by declines in net interest income. The provision for loan losses, acquired loans for the second quarter of 2015 decreased \$3.0 million, or 78.2%, compared to the same time period in 2014. Noninterest expense for the second quarter of 2015 declined \$2.5 million, or 2.4%, when compared to the same time period in 2014. The decline in noninterest expenses was primarily due to declines in ORE/foreclosure expense and other noninterest expense. Total noninterest income increased \$1.4 million, or 3.2%, as gains in mortgage banking, net and insurance commissions were partially offset by declines in bank card and other fees and other noninterest income. Net interest income decreased \$8.3 million, or 7.9%, when the second quarter of 2015 is compared to the same time period in 2014, primarily due to the decline in interest and fees on acquired loans of \$10.7 million, or 46.0%, which was partially offset by an increase in interest and fees on loans held for sale (LHFS) and LHF1 of \$1.8 million, or 2.7%.

Net income for the first six months of 2015 decreased \$2.2 million, or 3.5%, compared to the same time period in 2014 as declines in noninterest expense and provision for loan losses, acquired loans were more than offset by declines in net interest income and increased provision for loan losses, LHFI. Noninterest expense for the first six months of 2015 declined \$4.9 million, or 2.4%, when compared to the same time period in 2014. The decline in noninterest expenses was primarily due to declines in ORE/foreclosure expense and other noninterest expense, which was partially offset by increases in salaries and employee benefits and services and fees expense. The provision for loan losses, acquired loans for the first six months of 2015 decreased \$2.7 million, or 69.5%, compared to the same time period in 2014. Net interest income decreased \$5.9 million, or 2.9%, when the first six months of 2015 are compared to the same time period in 2014, primarily due to declines in interest and fees on acquired loans of \$12.4 million, or 31.0%, which was partially offset by an increase in interest and fees on LHFS and LHFI of \$5.0 million, or 3.8%, and a decrease in interest expense on deposits of \$1.9 million, or 22.6%. The provision for loan losses, LHFI for the first six months of 2015 increased \$3.3 million compared to the same time period in 2014. Please see the section captioned “Results of Operations” below for a more complete overview of Trustmark’s financial performance for the first six months of 2015.

Trustmark's provision for loan losses, LHFI, for the six months ended June 30, 2015 totaled \$2.8 million, an increase of \$3.3 million when compared to a negative provision for loan losses, LHFI of \$454 thousand for the six months ended June 30, 2014. The increase in the provision for loan losses, LHFI for the first six months of 2015 resulted primarily from declines in recoveries and the amount of reserves released, principally in the Florida market region, revisions to the quantitative and qualitative reserve factors of the allowance for loan loss methodology and growth in LHFI balances compared to the first six months of 2014. Please see the section captioned "Provision for Loan Losses, LHFI," for additional information regarding the provision for loan losses, LHFI.

At June 30, 2015, nonperforming assets, excluding acquired loans and covered other real estate, totaled \$159.2 million, a decrease of \$12.7 million, or 7.4%, compared to December 31, 2014 due to declines in both nonaccrual LHFI and other real estate, excluding covered other real estate. Total nonaccrual LHFI were \$68.4 million at June 30, 2015, representing a decrease of \$10.9 million, or 13.7%, relative to December 31, 2014 principally due to substandard credits in Trustmark's Mississippi, Florida, Texas and Tennessee market regions that were paid off, paid down or foreclosed partially offset by LHFI migrating to nonaccrual status during the first six months of 2015. Other real estate, excluding covered other real estate, declined \$1.8 million, or 1.9%, during the first six months of 2015 primarily due to properties sold in Trustmark's Florida and Mississippi market regions partially offset by a property foreclosed in the Texas market region. Total net charge-offs of LHFI for the six months ended June 30, 2015 were \$1.3 million, an increase of \$1.9 million when compared to net recoveries of LHFI of \$654 thousand for the six months ended June 30, 2014, principally due to the decline in recoveries in Trustmark's Florida market region.

LHFI totaled \$6.447 billion at June 30, 2015, a decrease of \$2.4 million compared to December 31, 2014 and an increase of \$260.1 million, or 4.2%, compared to June 30, 2014. The slight decline in LHFI during the first six months of 2015 was principally due to pay-downs in commercial and industrial loans and state and other political subdivision loans, primarily in the Mississippi market region, which were largely offset by growth in the Alabama, Texas and Tennessee market regions. For additional information regarding changes in LHFI and comparative balances by loan category, see the section captioned "LHFI" located elsewhere in this report.

Trustmark has continued to experience improvements in credit quality on LHFI. As of June 30, 2015, classified LHFI balances decreased \$22.4 million, or 11.0%, while criticized LHFI balances decreased \$43.9 million, or 17.9%, when compared to balances at June 30, 2014. The volume of classified and criticized LHFI decreased year-over-year primarily as a result of improvement in repayment capacity of borrowers and subsequent upgrade of those credits to a pass category as well as repayment of several credits of significant size.

Management has continued its practice of maintaining excess funding capacity to provide Trustmark with adequate liquidity for its ongoing operations. In this regard, Trustmark benefits from its strong deposit base, its highly liquid investment portfolio and its access to funding from a variety of external funding sources such as upstream federal funds lines, Federal Home Loan Bank (FHLB) advances and, on a limited basis, brokered deposits.

Total deposits were \$9.792 billion at June 30, 2015, compared with \$9.698 billion at December 31, 2014, an increase of \$93.8 million, or 1.0%. Growth in noninterest-bearing and interest-bearing deposits totaled \$70.5 million, or 2.6%, and \$23.3 million, or 0.3%, respectively, during the first six months of 2015. Other short-term borrowings totaled \$679.2 million at June 30, 2015, a decrease of \$189.4 million, or 21.8%, when compared with \$868.6 million at December 31, 2014. The decrease in other short-term borrowings was principally due to the \$200.0 million decline in outstanding short-term FHLB advances with the FHLB of Dallas.

#### Critical Accounting Policies

Trustmark's consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP) and follow general practices within the financial services industry. Application of these accounting principles requires Management to make estimates, assumptions and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates, assumptions and

judgments are based on information available as of the date of the consolidated financial statements; accordingly, as this information changes, actual financial results could differ from those estimates.

Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments and, as such, have a greater possibility of producing results that could be materially different than originally reported. There have been no significant changes in Trustmark's critical accounting policies during the first six months of 2015.

## Recent Legislative and Regulatory Developments

In 2013, the FRB, FDIC and the Office of the Comptroller of the Currency (OCC) jointly promulgated final rules revising regulatory capital requirements to address perceived shortcomings in the existing regulatory capital requirements that became evident during the recent financial crisis by implementing capital requirements in the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) and international capital regulatory standards by the Basel Committee on Banking Supervision (Basel III). The new capital rules adopt a new common equity Tier 1 requirement, increase the minimum Tier 1 capital ratio, introduce a new capital conservation buffer, adopt new risk-weight calculation methods for the “standardized” denominator and revise the regulatory components and calculations of capital. Trustmark and TNB were required to comply with the new capital rules beginning January 1, 2015. Certain of the requirements of the capital rules, such as the capital conservation buffer, will be phased in until January 1, 2019. Once the new capital requirements are fully phased in, it is expected that Trustmark and TNB will be required to hold a greater amount of capital and a greater amount of common equity than they were previously required to hold. Management does not expect the new capital rules to have a significant impact on Trustmark or TNB; however, Management will continue to evaluate the impact of the capital rules on Trustmark and TNB as they are phased in.

In 2012, the FRB, FDIC and OCC published final rules implementing the company-run stress test requirements mandated by the Dodd-Frank Act. The final rules require institutions with average total consolidated assets between \$10 billion and \$50 billion to conduct an annual company-run stress test using data as of September 30 of each year under one base and at least two stress scenarios as provided by the agencies. Stress test results must be provided to the agencies by March 31 of the following year. Trustmark has been subject to these stress test requirements since September 2014, and was required to make its first filing with regulators during March 2015. On October 17, 2014, the FRB issued a notice of final rulemaking to switch the testing dates to match the calendar year so that stress tests would use year-end data and capital planning would follow for the next calendar year. The FRB’s final rule, beginning with the January 1, 2016 annual stress test cycle, requires institutions with total consolidated assets between \$10 billion and \$50 billion to conduct an annual company-run stress test using data as of December 31 of the preceding year, provide results to the agencies by July 31 of each year and publicly disclose results in October of each year. Trustmark anticipates that the capital ratios, as reflected in the stress test calculations under the required stress test scenarios, will be an important factor considered by the agencies in evaluating the capital adequacy of Trustmark and TNB and whether proposed payments of dividends or stock repurchases are consistent with prudential expectations.

## Selected Financial Data

The following table presents financial data derived from Trustmark's consolidated financial statements as of and for the periods presented (\$ in thousands, except per share data):

	Three Months Ended		Six Months Ended	
	June 30, 2015	2014	June 30, 2015	2014

(1) Consistent with Trustmark's audited annual financial statements, revenue is defined as net interest income plus noninterest income.

(2) Excludes Acquired Loans and Covered Other Real Estate.

\*LHFS is Loans Held for Sale.

\*\*ORE is Other Real Estate.

## Non-GAAP Financial Measures

In addition to capital ratios defined by GAAP and banking regulators, Trustmark utilizes various tangible common equity measures when evaluating capital utilization and adequacy. Tangible common equity, as defined by Trustmark, represents common equity less goodwill and identifiable intangible assets.

Trustmark believes these measures are important because they reflect the level of capital available to withstand unexpected market conditions. Additionally, presentation of these measures allows readers to compare certain aspects of Trustmark's capitalization to other organizations. These ratios differ from capital measures defined by banking regulators principally in that the numerator excludes shareholders' equity associated with preferred securities, the nature and extent of which varies across organizations.

These calculations are intended to complement the capital ratios defined by GAAP and banking regulators. Because GAAP does not include these capital ratio measures, Trustmark believes there are no comparable GAAP financial measures to these tangible common equity ratios. Despite the importance of these measures to Trustmark, there are no standardized definitions for them and, as a result, Trustmark's calculations may not be comparable with other organizations. Also there may be limits in the usefulness of these measures to investors. As a result, Trustmark encourages readers to consider its consolidated financial statements and the notes related thereto in their entirety and not to rely on any single financial measure. The following table reconciles Trustmark's calculation of these measures to amounts reported under GAAP for the periods presented (\$ in thousands, except per share data):

## Results of Operations

## Net Interest Income

Net interest income is the principal component of Trustmark's income stream and represents the difference, or spread, between interest and fee income generated from earning assets and the interest expense paid on deposits and borrowed funds. Fluctuations in interest rates, as well as volume and mix changes in earning assets and interest-bearing liabilities, can materially impact net interest income. The net interest margin is computed by dividing fully taxable equivalent (FTE) net interest income by average interest-earning assets and measures how effectively Trustmark utilizes its interest-earning assets in relationship to the interest cost of funding them. The accompanying Yield/Rate Analysis Table shows the average balances for all assets and liabilities of Trustmark and the interest income or expense associated with earning assets and interest-bearing liabilities. The yields and rates have been computed based upon interest income and expense adjusted to a FTE basis using a 35% federal marginal tax rate for all periods shown. Loans on nonaccrual have been included in the average loan balances, and interest collected prior to these loans having been placed on nonaccrual has been included in interest income. Loan fees included in interest associated with the average loan balances are immaterial.

Net interest income-FTE for the six months ended June 30, 2015 decreased \$5.5 million, or 2.7%, when compared with the same period in 2014. The net interest margin decreased 23 basis points to 3.84% for the first six months of 2015, compared with the same time period in 2014. The decrease in the net interest margin reflected the prolonged low interest rate environment in the United States, and was primarily the result of a downward repricing of LHFI in response to increased competitive pricing pressures, which was partially offset by lower deposit and short-term borrowing costs and increases in the yield on acquired loans. The net interest margin excluding acquired loans, which equals the reported net interest income-FTE excluding interest and fees on acquired loans, as a percentage of average earning assets excluding average acquired loans, for the first six months of 2015 was 3.48%, a decrease of 6 basis points when compared to the same time period in 2014, due to similar factors as discussed above.

Average interest-earning assets for the first six months of 2015 were \$10.625 billion compared to \$10.309 billion for the same time period in 2014, an increase of \$316.5 million, or 3.1%. The growth in average earning assets during the first six months of 2015 was primarily due to an increase in average loans (LHFS and LHFI) of \$501.7 million, or 8.3%, and average securities-taxable of \$64.1 million, or 1.9%, partially offset by a decrease in average acquired loans of \$236.0 million, or 31.9%. The increase in average loans (LHFS and LHFI) was primarily attributable to increases in the LHFI portfolio when compared to June 30, 2014. The increase in average securities-taxable was primarily attributable to purchases of U.S Government-sponsored agency (GSE) guaranteed securities, partially offset by maturities and pay-downs of the loans underlying these securities.

During the first six months of 2015, interest and fees on LHFS and LHFI-FTE increased \$5.4 million, or 4.0%, when compared to the same time period in 2014, due to growth in LHFI, while the yield on loans (LHFS and LHFI) fell 18 basis points to 4.34% due to downward repricing of LHFI due to the current interest rate environment and related competitive pressures. During the first six months of 2015, interest and fees on acquired loans decreased \$12.4 million, or 31.0%, compared to the first six months of 2014, due to declines in accretion income as acquired loans continue to pay-down and recoveries on loan pay-offs of loans acquired in connection with the February 2013 merger with BancTrust Financial Group, Inc. (BancTrust), while the yield on acquired loans increased to 11.05% compared to 10.90% during the same time period in 2014. The increase in the yield on acquired loans was attributable to increases in accretion income as a percentage of average acquired loans for loans acquired in the BancTrust merger, increases in recoveries on loans acquired in the April 2011 acquisition of Heritage Banking Group (Heritage) and the March 2012 merger with Bay Bank and Trust Company (Bay Bank) and increases in other interest and fees earned on all acquired loans. As a result of these factors, interest income-FTE decreased \$6.8 million, or 3.1%, in the first six months of 2015 compared to the same time period in 2014. The impact of these changes is also illustrated by the decline in the yield on total earning assets, which fell from 4.29% for the first six months of 2014 to 4.03% for the same time period in 2015, a decrease of 26 basis points.

Average interest-bearing liabilities for the first six months of 2015 totaled \$7.779 billion compared to \$7.790 billion for the same time period in 2014, a decrease of \$10.7 million, or 0.1%. Average interest-bearing deposits for the first six months of 2015 decreased \$258.0 million, or 3.5%, compared to the same time period in 2014, principally due to declines in certificates of deposits, reflecting Trustmark's continued efforts to reduce high-cost deposit balances and customers continued movement away from longer-term commitments as a result of the low interest rate environment. The combination of federal funds purchased, securities sold under repurchase agreements and other borrowings increased \$247.4 million, or 47.8%, when the first six months of 2015 are compared to the same time period in 2014, which was primarily attributable to increased balances of federal funds purchased and securities sold under repurchase agreements as well as short-term FHLB advances obtained from the FHLB of Dallas as Trustmark chose to utilize these less costly sources of funding. Total interest expense for the first six months of 2015 decreased \$1.2 million, or 10.9%, when compared with the same time period in 2014, principally due to the \$1.9 million, or 22.6%, decrease in interest expense on deposit accounts as a result of the decline in interest-bearing deposits. As a result of these factors, the overall yield on interest-bearing liabilities declined 3 basis points to 0.26% when the first six months of 2015 is compared with the same time period in 2014.

Provision for Loan Losses, LHFI

The provision for loan losses, LHFI is determined by Management as the amount necessary to adjust the allowance for loan losses, LHFI to a level, which, in Management's best estimate, is necessary to absorb probable losses within the existing loan portfolio. The provision for loan losses, LHFI reflects loan quality trends, including the levels of and trends related to nonaccrual LHFI, past due LHFI, potential problem LHFI, criticized LHFI, net charge-offs or recoveries and growth in the LHFI portfolio among other factors. Accordingly, the amount of the provision reflects the necessary increases in the allowance for loan losses, LHFI related to newly identified criticized LHFI, as well as the actions taken related to other LHFI including, among other things, any necessary increases or decreases in required allowances for specific loans or loan pools. The provision for loan losses, LHFI for the first six months of 2015 totaled 0.09% of average loans (LHFS and LHFI), compared with -0.02% of average loans (LHFS and LHFI) for the same time period in 2014. The increase in the provision during the first six months of 2015 when compared to the

same time period in 2014 was primarily a result of declines in recoveries and reserves released, principally in the Florida market region due to loans that were charged down in previous periods, changes in the quantitative and qualitative reserve factors and growth in LHFH balances when compared to balances at June 30, 2014.

During the first quarter of 2015, Trustmark revised the quantitative portion of the allowance for loan loss methodology for commercial LHFI to reflect a Loss Emergence Period (LEP) of 1.5 years rather than a one year period. The LEP refers to the period of time between the events that trigger a loss and a charge-off of that loss. Losses are usually not immediately known, and determining the loss event can be challenging. It takes time for the borrower and extent of loss to be identified and determined. Trustmark may not be aware that the loss event has occurred until the borrower exhibits the inability to pay or other evidence of credit deterioration. Trustmark considers the loss event to have occurred within a one year period prior to the event of default and the charge-off of the loss within a six month period after the event of default, resulting in a 1.5 year LEP. An additional provision of approximately \$2.3 million was recorded in the first quarter of 2015 as result of this revision to the quantitative portion of the allowance for loan loss methodology for commercial LHFI.

During the first quarter of 2015, Trustmark revised the qualitative portion of the allowance for loan loss methodology for commercial LHFI by eliminating caps and floors from the criticized risk grades. The caps and floors for criticized risk ratings were eliminated in order to allow the risk associated with those credits to be reflected without constraint of pre-existing limits (caps and floors) on the risk ratings. The elimination of the caps and floors for criticized risk ratings in the qualitative portion of the allowance for loan loss methodology for commercial LHFI resulted in a provision recapture of \$1.8 million in the first quarter of 2015. Trustmark also revised the qualitative and quantitative portions of the allowance for loan loss methodology for commercial LHFI by adjusting the Florida market region's distribution factors. When the current allowance for loan loss methodology was originally established, the vast majority of the reserve for the Florida market region's assets was covered by the quantitative features of the allowance for loan loss methodology due to the amount of gross charge-offs at that time and captured the vast majority of the embedded risk in the portfolio. The distribution for the Florida market region was adjusted to be the same as Trustmark's other key market regions since the credit metrics in the Florida market region now more closely resemble Trustmark as a whole. The change in the Florida market region distribution resulted in an additional provision expense of \$2.1 million related to the qualitative portion and an additional provision expense of \$785 thousand related to the quantitative portion of the allowance for loan loss methodology for commercial LHFI in the first quarter of 2015. Combined, these revisions to the allowance for loan loss methodology for commercial LHFI resulted in an additional provision of approximately \$1.1 million during the first quarter of 2015. For additional information on changes to Trustmark's allowance for loan loss methodology for LHFI, please see Note 3 – Loans Held for Investment (LHFI) and Allowance for Loan Losses, LHFI located elsewhere in this report.

The following table presents the provision for loan losses, LHFI, by geographic market region for the periods presented (\$ in thousands):

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2015	2014	2015	2014
Alabama	\$623	\$696	\$1,384	\$1,168
Florida	(1,168)	(2,014)	665	(5,513)
Mississippi (1)	2,046	2,877	(683 )	4,860
Tennessee (2)	(483 )	(277 )	949	(1,192)
Texas	15	(931 )	503	223
Total provision for loan losses, LHFI	\$1,033	\$351	\$2,818	\$(454 )

(1)Mississippi includes Central and Southern Mississippi Regions

(2)Tennessee includes Memphis, Tennessee and Northern Mississippi Regions

Net changes to the provision for loan losses, LHFI were highest in Trustmark's Florida, Mississippi and Tennessee market regions when the first six months of 2015 are compared to the same time period in 2014. The \$6.2 million increase in provision for the Florida market region was primarily due to a decline in recoveries, principally resulting from pay-downs during the first six months of 2014 of loans previously charged down, and the additional provision

expense recorded during the first quarter of 2015 for the change in the Florida market region distribution discussed above. The provision for loan losses, LHFI for the Mississippi market region declined \$5.5 million primarily due to a decline in the amount of reserves required based on the qualitative reserve factor calculation, lower net charge-offs of nonimpaired LHFI, and changes in the allowance for loan loss methodology during the first six months of 2014 and 2015. The provision for loan losses, LHFI for the Tennessee market region increased \$2.1 million when the first six months of 2015 are compared to the same time period in 2014 primarily due to increases in reserves required based on balance and risk rate changes of LHFI and the additional provision expense recorded during the first quarter of 2015 due to the changes in the allowance for loan loss methodology discussed above.

Trustmark continues to devote significant resources to managing credit risks resulting from the slowdown in residential real estate developments. Management believes that the construction and land development portfolio is appropriately risk rated and adequately reserved based on current conditions.

See the sections captioned “Allowance for Loan Losses, LHFI” and “Nonperforming Assets, Excluding Acquired Loans and Covered Other Real Estate” elsewhere in this discussion for further analysis of the provision for loan losses, LHFI.

## Provision for Loan Losses, Acquired Loans

The provision for loan losses, acquired loans is recognized subsequent to acquisition to the extent it is probable that Trustmark will be unable to collect all cash flows expected at acquisition plus additional cash flows expected to be collected arising from changes in estimates after acquisition, considering both the timing and amount of those expected cash flows. Provisions may be required when actual losses of unpaid principal incurred exceed previous loss expectations to date, or future cash flows previously expected to be collectible are no longer probable of collection. The provision for loan losses, acquired loans is reflected as a valuation allowance netted against the carrying value of the acquired loans accounted for under Federal Accounting Standards Board (FASB) Accounting Standard Codification (ASC) Topic 310-30, "Loans and Debt Securities Acquired with Deteriorated Credit Quality." The decrease in the provision for loan losses, acquired loans during the first six months of 2015 when compared to the same time period in 2014 was principally due to an increase in recoveries of acquired loans and changes in expectations based on the periodic re-estimations performed during the period, primarily related to loans acquired from BancTrust.

The following table presents the provision for loan losses, acquired loans, by acquisition for the periods presented (\$ in thousands):

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2015	2014	2015	2014
BancTrust	\$1,022	\$3,092	\$1,707	\$3,244
Bay Bank	(93 )	261	(111 )	643
Heritage	(104 )	431	(424 )	(40 )
Total provision for loan losses, acquired loans	\$825	\$3,784	\$1,172	\$3,847

## Noninterest Income

Noninterest income represented 32.0% and 31.1% of total revenue, before securities gains, net, for the three and six months ended June 30, 2015, respectively, compared to 29.5% and 30.5% of total revenue, before securities gains, net, for the three and six months ended June 30, 2014, respectively. The following table provides the comparative components of noninterest income for the periods presented (\$ in thousands):

	Three Months Ended June 30,				Six Months Ended June 30,			
	2015	2014	\$ Change	% Change	2015	2014	\$ Change	% Change
Service charges on deposit accounts	\$11,920	\$11,846	\$74	0.6 %	\$23,005	\$23,414	\$(409 )	-1.7 %
Bank card and other fees	7,416	9,894	(2,478 )	-25.0 %	14,178	18,975	(4,797 )	-25.3 %
Mortgage banking, net	9,481	6,191	3,290	53.1 %	18,446	13,020	5,426	41.7 %
Insurance commissions	9,401	8,300	1,101	13.3 %	18,017	16,397	1,620	9.9 %
Wealth management	7,758	7,710	48	0.6 %	15,748	15,845	(97 )	-0.6 %
Other, net	(433 )	199	(632 )	n/m	(1,488 )	178	(1,666 )	n/m
Total Noninterest Income before securities gains, net	45,543	44,140	1,403	3.2 %	87,906	87,829	77	0.1 %
Security gains, net	-	-	-	0.0 %	-	389	(389 )	-100.0 %
Total Noninterest Income	\$45,543	\$44,140	\$1,403	3.2 %	\$87,906	\$88,218	\$(312 )	-0.4 %

n/m - percentage changes greater than +/- 100% are not considered meaningful

The increase in noninterest income during the three months ended June 30, 2015 when compared to the same time periods in 2014 was primarily the result of growth in mortgage banking revenues due principally to higher gains on secondary marketing loan sales resulting from higher spreads and volumes and growth in insurance commissions, which were partially offset by declines in bank card and other fees resulting from lower interchange income and declines in other, net resulting from decreases in other miscellaneous income and the cash surrender value of bank-owned life insurance policies and an increase in the net reduction of the FDIC indemnification asset. The decline in noninterest income during the six months ended June 30, 2015 when compared to the same time periods in 2014 was primarily the result of declines in bank card and other fees resulting from lower interchange income and declines in other, net resulting from decreases in other miscellaneous income and the cash surrender value of bank-owned life insurance policies and an increase in the net reduction of the FDIC indemnification asset. These declines were partially offset by growth in mortgage banking revenues due principally to higher gains on secondary marketing loan sales resulting from higher spreads and volumes and growth in insurance commissions. For analysis of Trustmark's insurance commissions and wealth management income, please see the section captioned "Segment Information" located elsewhere in this report.

## Bank Card and Other Fees

Bank card and other fees consist primarily of fees earned on bank card products as well as fees on various bank products and services and safe deposit box fees. The decrease in bank card and other fees for the three and six months ended June 30, 2015 when compared to the same time periods in 2014 was primarily the result of declines in interchange income.

On June 29, 2011, the FRB issued a final rule (Regulation II - Debit Card Interchange Fees and Routing) establishing standards for debit card interchange fees, which limited the maximum permissible interchange fee that an issuer may receive for an electronic debit transaction to the sum of 21 cents per transaction and five basis points multiplied by the value of the transaction. In addition, the FRB also approved a final rule on July 27, 2012 that allows for an upward adjustment of no more than one cent to an issuer's debit card interchange fee if the issuer develops and implements policies and procedures reasonably designed to achieve the fraud-prevention standards set out in the rule. The provisions regarding debit card interchange fees became effective October 1, 2011, and the fraud prevention adjustment became effective October 1, 2012.

In accordance with the FRB final rule, issuers that, together with their affiliates, have assets of less than \$10.0 billion on the annual measurement date (December 31) are exempt from the debit card interchange fee standards. At December 31, 2013, the annual measurement date, Trustmark had assets greater than \$10.0 billion; and, therefore, was required to comply with the debit card interchange fee standards by July 1, 2014. Trustmark's noninterest income declined \$5.6 million during the first six months of 2015 as a result of the FRB final rule. The full impact of the FRB final rule is expected to reduce noninterest income by an estimated \$10.0 to \$11.0 million for 2015 based on current transaction volume.

Management has identified a number of strategic priorities, such as process improvements, expense management and continued realignment of Trustmark's branch network, that when combined with current fee improvement options being evaluated within various areas of Trustmark's retail banking section are expected to offset, in part, the impact of the FRB final rule. Trustmark has implemented multiple initiatives during the first six months of 2015, such as investments to augment delivery channels and infrastructure to accommodate customers' changing banking needs, including the investment in myTrustmark<sup>SM</sup>, Trustmark's new online consumer banking solution; the addition of ten mortgage producers and two mortgage loan production offices throughout the Alabama and Florida market regions as well as the addition of several insurance production staff members to support fee income growth in these areas; the opening of two new banking offices in markets with promising growth opportunities and the consolidation of six banking offices with limited growth opportunities with plans to consolidate an additional two banking offices during the third quarter of 2015; and the continued control over noninterest expenses, which have declined 2.4% so far in 2015.

## Mortgage Banking, Net
