A MESSAGE FROM THE PRESIDENT

Regarding economic trends overseas during the interim period ended September 30, 2003, the United States showed a gradual recovery trend supported by upward trends in personal consumption and private capital investment and firmness in housing investment. In Europe, domestic demand in the principal eurozone countries was weak and this, together with other factors, led to a virtual standstill in the economies of the region. On the other hand, in Asia, the pace of economic recovery has been gradual, owing to the influence of SARS and other factors.

In the Japanese economy, although personal consumption and employment conditions continued to be weak, private capital investment and corporate profits showed signs of recovery, leading to a sense that the economy was beginning to bottom out.

Against this backdrop, Makita has moved forward with the expansion of production at its operations in China, taken measures to reduce manufacturing costs through the use of parts manufactured in China as well as other measures, and also continued its ongoing efforts to develop new product to meet user needs.

In the United States, Makita focused especially on strengthening its marketing position in the professional-use market with the aim of enhancing its brand image. The Company also continued to take steps to improve profitability, including reducing inventories and realigning its logistics centers to reduce distribution costs.

Turning to interim business results, interim net sales declined 0.8% from the same period of the previous fiscal year, to 42,326 million yen. Of this total, domestic sales amounted to 18,920 million yen, almost the same amount as the previous interim period; although sales of new products, especially those linked to home remodeling, expanded, the number of new housing starts was stagnant. On the other hand, exports decreased 1.4%, to 23,406 million yen owing to the shifting of production to Makita's subsidiary in China, and the export ratio was 55.3%.

Profitability was positively affected by such developments as an improvement in the cost of sales ratio, owing to the depreciation of yen and the use of parts manufactured in China, as well as the significant decrease in exchange losses on foreign currency transactions for the period under review compared to the same period of the previous year. As a result, ordinary profit was up 28.6% from the previous interim period, to 4,328 million yen. Interim net income showed a sharp increase of 180.9% from the same period of the previous year, to 3,877 million yen, due to gains from the sale of the Company's No. 3 Headquarters Plant.

Table of Contents

At the 91st Annual General Meeting of Shareholders held on June 27, 2003, a proposal was approved to repurchase a maximum of 5 million of the Company's shares (with a maximum value of 5 billion yen). Through the end of the first six months of the fiscal year, the Company repurchased a total of 2,002 thousand of its outstanding shares (with a value of 2,142 million yen). In addition, as a result of the retiring of 5 million treasury stock held by the Company on August 20, 2003, the number of treasury stock still held by the Company stood at 4,076 thousand at the end of period.

Looking forward, as a significant number of uncertainties remain, including the possibility of sharp movements in foreign currency rates, the operating environment for the Company's activities is therefore expected to continue to be harsh.

In view of these conditions, as a result of the shortening of its product development period, Makita is well positioned to respond nimbly to market needs and will continue to work to expand its marketing channels through the strengthening of our networks and Group companies in various regions of the world as well as substantially reduce costs with the objective of becoming a Strong Company winning and holding the top share of the market for power tools for professional users in regions throughout the world.

In closing, we would like to ask our shareholders for their continuing support and cooperation as we work toward our objectives.

November 2003

Masahiko Goto
President and Representative Director
