

PETROCHINA CO LTD
Form 20-F
June 29, 2005

Table of Contents

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

**FORM 20-F
ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2004
Commission File Number 1-15006**

(Exact name of Registrant as specified in its charter)
PetroChina Company Limited
(Translation of Registrant's name into English)

The People's Republic of China
(Jurisdiction of incorporation or organization)

16 Andelu
Dongcheng District, Beijing, 100011
The People's Republic of China
(Address of principal executive offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of Each class	Name of each exchange on which registered
American Depositary Shares, each representing 100 H Shares, par value RMB 1.00 per share*	New York Stock Exchange, Inc.
H Shares, par value RMB 1.00 per share	New York Stock Exchange, Inc.**

Securities registered or to be registered pursuant to Section 12(g) of the Act.

None
(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None
(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report:

State-owned shares, par value RMB 1.00 per share	158,241,758,000
H Shares, par value RMB 1.00 per share	17,582,418,000***

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) or the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Edgar Filing: PETROCHINA CO LTD - Form 20-F

Indicate by check mark which financial statement item the Registrant has elected to follow.

Item 17 Item 18

- * PetroChina's H Shares are listed and traded on The Stock Exchange of Hong Kong Limited.
 - ** Not for trading, but only in connection with the registration of American Depository Shares.
 - *** Include 2,424,087,400 H Shares represented by American Depository Shares.
-

CERTAIN TERMS AND CONVENTIONS
Conventions Which Apply to this Annual Report

Unless the context otherwise requires, references in this annual report to:

CNPC or CNPC group are to our parent, China National Petroleum Corporation and its affiliates and subsidiaries, excluding PetroChina, its subsidiaries and its interests in long-term investments, and where the context refers to any time prior to the establishment of CNPC, those entities and businesses which were contributed to CNPC upon its establishment.

PetroChina, we, our, our company and us are to:

PetroChina Company Limited, a joint stock company incorporated in the People's Republic of China with limited liability and its subsidiaries and branch companies, or

the CNPC group's domestic crude oil and natural gas exploration and production, refining and marketing, chemicals and natural gas businesses that were transferred to us in the restructuring of the CNPC group in 1999.

PRC or China are to the People's Republic of China, but do not apply to Hong Kong, Macau or Taiwan for purposes of this annual report.

We publish our consolidated financial statements in Renminbi. The audited consolidated financial statements included in this annual report have been prepared as if the operations and businesses transferred to us from CNPC were transferred as of the earliest period presented or from the date of establishment of the relevant unit, whichever is later, and conducted by us throughout the period. In this annual report, IFRS refers to International Financial Reporting Standards.

Conversion Table

1 barrel-of-oil equivalent	= 1 barrel of crude oil	= 6,000 cubic feet of natural gas
1 cubic meter	= 35.315 cubic feet	
1 ton of crude oil	= 1 metric ton of crude oil	= 7.389 barrels of crude oil (assuming an API gravity of 34 degrees)

Certain Oil and Gas Terms

Unless the context indicates otherwise, the following terms have the meanings shown below:

acreage	The total area, expressed in acres, over which an entity has interests in exploration or production. Net acreage is the entity's interest, expressed in acres, in the relevant exploration or production area.
API gravity	An indication of the density of crude oil or other liquid hydrocarbons as measured by a system recommended by the American Petroleum Institute (API), measured in degrees. The lower the API gravity, the heavier the compound.
condensate	Light hydrocarbon substances produced with natural gas that condense into liquid at normal temperatures and pressures associated with surface production equipment.
crude oil	Crude oil, including condensate and natural gas liquids.

Table of Contents

development cost	For a given period, costs incurred to obtain access to proved reserves and to provide facilities for extracting, treating, gathering and storing the oil and gas.
finding cost	For a given period, costs incurred in identifying areas that may warrant examination and in examining specific areas that are considered to have prospects of containing oil and gas reserves, including costs of drilling exploratory wells and exploratory-type stratigraphic test wells. Finding cost is also known as exploration cost.
lifting cost	For a given period, costs incurred to operate and maintain wells and related equipment and facilities, including applicable operating costs of support equipment and facilities and other costs of operating and maintaining those wells and related equipment and facilities. Lifting cost is also known as production cost.
natural gas liquids	Hydrocarbons that can be extracted in liquid form together with natural gas production. Ethane and pentanes are the predominant components, with other heavier hydrocarbons also present in limited quantities.
offshore	Areas under water with a depth of five meters or greater.
onshore	Areas of land and areas under water with a depth of less than five meters.
primary distillation capacity	At a given point in time, the maximum volume of crude oil a refinery is able to process in its basic distilling units.
proved developed reserves	Reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. Additional oil and gas expected to be obtained through the application of fluid injection or other improved recovery techniques for supplementing the natural forces and mechanisms of primary recovery are included as proved developed reserves only after testing by a pilot project or after the operation of an installed program has confirmed through production response that increased recovery will be achieved.
proved reserves	Estimated quantities of crude oil and natural gas which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, <i>i.e.</i> , prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not of escalations based upon future conditions.
proved undeveloped reserves	Reserves that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for recompletion. Reserves on undrilled acreage shall be limited to those drilling units offsetting productive units that are reasonably certain of production when drilled. Proved reserves for other undrilled units can be claimed only where it can be demonstrated with certainty that there is

Table of Contents

continuity of production from the existing productive formation. Under no circumstances should estimates for proved undeveloped reserves be attributable to any acreage for which an application of fluid injection or other improved recovery technique is contemplated, unless such techniques have been proved effective by actual tests in the area and in the same reservoir.

reserve-to-production ratio For any given well, field or country, the ratio of proved reserves to annual production of crude oil or, with respect to natural gas, to wellhead production excluding flared gas.

sales gas Marketable production of gas on an as sold basis, excluding flared gas, injected gas and gas consumed in operations.

water cut For a given oil region, the percentage that water constitutes of all fluids extracted from all wells in that region.

References to:

BOE are to barrels-of-oil equivalent,

Mcf are to thousand cubic feet, and

Bcf are to billion cubic feet.

FORWARD-LOOKING STATEMENTS

This annual report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities and Exchange Act of 1934, as amended. These forward-looking statements are, by their nature, subject to significant risks and uncertainties. These forward-looking statements include, without limitation, statements relating to:

- the amounts and nature of future exploration, development and other capital expenditures;
- future prices and demand for crude oil, natural gas, refined products and chemical products;
- development projects;
- exploration prospects;
- reserves potential;
- production of oil and gas and refined and chemical products;
- development and drilling potential;
- expansion and other development trends of the oil and gas industry;
- the planned development of our natural gas operations;
- the planned expansion of our refined product marketing network;
- the planned expansion of our natural gas infrastructure;
- the anticipated benefit from our proposed acquisition of certain overseas assets from CNPC, our parent company;
- the plan to continue to pursue attractive business opportunities outside China;
- our future overall business development and economic performance;
- our anticipated financial and operating information regarding, and the future development and economic performance of, our business;
- our anticipated market risk exposure arising from future changes in interest rates, foreign exchange rates and commodity prices; and
- other prospects of our business and operations.

The words anticipate, believe, could, estimate, expect, intend, may, plan, seek, will and would expressions, as they related to us, are intended to identify a number of these forward-looking statements.

By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that will occur in the future and are beyond our control. The forward-looking statements reflect our current views with respect to future events and are not a guarantee of future performance. Actual results may differ materially from information contained in the forward-looking statements as a result of a number of factors, including, without limitation, the risk factors set forth in this annual report and the following:

- fluctuations in crude oil and natural gas prices;

failure to achieve continued exploration success;

failures or delays in achieving production from development projects;

continued availability of capital and financing;

acquisitions and other business opportunities that we may pursue;

6

Table of Contents

general economic, market and business conditions, including volatility in interest rates, changes in foreign exchange rates and volatility in commodity markets;

liability for remedial actions under environmental regulations;

impact of the PRC's entry into the World Trade Organization;

the actions of competitors;

wars and acts of terrorism or sabotage;

changes in policies, laws or regulations of the PRC;

the other changes in global economic and political conditions affecting the production, supply and demand and pricing of crude oil, refined products, petrochemical products and natural gas; and

the other risk factors discussed in this annual report, and other factors beyond our control.

You should not place undue reliance on any forward-looking statement.

Table of Contents**PART I****ITEM 1 IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISORS**

Not applicable. However, see Item 6 Directors, Senior Management and Employees Directors, Senior Management and Supervisors.

ITEM 2 OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3 KEY INFORMATION**Exchange Rates**

Translations of amounts in this annual report from Renminbi into U.S. dollars and vice versa have been made at the rate of RMB 8.2765 to US\$1.00, which was the noon buying rate in New York City on December 31, 2004 for cable transfers in Renminbi per U.S. dollar as certified for customs purposes by the Federal Reserve Bank of New York. You should not construe these translations as representations that the RMB amounts could be converted into U.S. dollar amounts at that rate, or at all.

The noon buying rate in New York City for cable transfers as certified for customs purposes by the Federal Reserve Bank of New York was US\$1.00=RMB 8.2765 on June 24, 2005. The following table sets forth the high and low noon buying rates between Renminbi and U.S. dollars for each month during the previous six months:

	Noon buying rate	
	High	Low
	(RMB per US\$)	
December 2004	8.2767	8.2765
January 2005	8.2765	8.2765
February 2005	8.2765	8.2765
March 2005	8.2765	8.2765
April 2005	8.2765	8.2765
May 2005	8.2765	8.2735
June 2005 (through June 24)	8.2765	8.2765

The following table sets forth the average noon buying rates between Renminbi and U.S. dollars for each of 2000, 2001, 2002, 2003 and 2004, calculated by averaging the noon buying rates on the last day of each month during the relevant year:

	Average noon buying rate	
	(RMB per US\$)	
2000	8.2784	
2001	8.2770	
2002	8.2772	
2003	8.2772	
2004	8.2768	

Table of Contents

Selected Financial Data

Historical Financial Information

You should read the selected historical financial data set forth below in conjunction with the consolidated financial statements of PetroChina and their notes and Item 5 Operating and Financial Review and Prospects included elsewhere in this annual report. In 2002, we retroactively restated our prior years consolidated financial statements to reflect the effect as if the operations of CNPC's refined products marketing enterprises we acquired from CNPC had always been combined since inception as a result of the application of the accounting treatment to the acquisition discussed below. The selected historical income statement and cashflow data for the years ended December 31, 2002, 2003 and 2004 and the selected historical balance sheet data as of December 31, 2003 and 2004 set forth below are derived from our audited consolidated financial statements included elsewhere in this annual report. The selected historical income statement data and cashflow data for the years ended December 31, 2000 and 2001 and the selected historical balance sheet data as of December 31, 2001 and 2002 set forth below are derived from our audited financial statements, not included in this annual report. The selected historical balance sheet data as of December 31, 2000 set forth below are derived from our unaudited financial statements, not included in this annual report. The financial information included in this section may not necessarily reflect our results of operations, financial position and cash flows in the future.

We have prepared our consolidated financial statements in accordance with IFRS. IFRS differ materially from the generally accepted accounting principals in the U.S., or US GAAP. For a discussion of significant differences between IFRS and US GAAP, see Note 35 to our consolidated financial statements included elsewhere in this annual report and Item 5 Operating and Financial Review and Prospects Other Information US GAAP Reconciliation .

In accordance with an acquisition agreement between CNPC and us dated September 26, 2002, we acquired from CNPC the assets, liabilities and interests related to CNPC's refined products marketing enterprises consisting primarily of service stations and related facilities. Under IFRS, the acquisition is a combination of entities under common control since the CNPC's refined products marketing enterprises and we are under the common control of CNPC. As a result, we have accounted for the acquisition in a manner similar to a uniting of interests, whereby the assets and liabilities of the marketing enterprises acquired are accounted for at historical cost to CNPC with net liabilities of RMB 2,956 million at the effective date. In 2002, our prior years consolidated financial statements were restated to give effect to the acquisition in these periods as if the operations of our company and these marketing enterprises had always been combined in these periods. See Item 5 Operating and Financial Review and Prospects General Acquisitions Acquisition of Certain Refined Products Marketing Enterprises from CNPC .

- (2) Certain financial data for these periods and as of these dates are derived from our audited consolidated financial statements, not included in this annual report, and were retroactively restated in 2002. See the paragraphs preceding these tables for a detailed description.
- (3) Historical income per share for the years ended December 31, 2001, 2002, 2003 and 2004 has been calculated by dividing the net profit by the number of 175,824 million shares issued and outstanding for the periods presented. Historical income per share for the year ended December 31, 2000 has been calculated by dividing the net profit by the weighted average number of 171,630 million shares issued and outstanding for the period presented.
- (4) Historical income per ADS for the years ended December 31, 2001, 2002, 2003 and 2004 has been calculated by dividing the net profit by the number of 175,824 million shares issued and outstanding for the periods presented, assuming each ADS representing 100 H shares. Historical income per ADS for the year ended December 31, 2000 has been calculated by dividing the net profit by the weighted average number of 171,630 million shares issued and outstanding for the period presented, assuming each ADS representing 100 H shares.

Table of Contents

Risk Factors

Our business is subject to various changing competitive, economic and social conditions in the PRC. Such changing conditions entail certain risks, which are described below.

Our operations are affected by the volatility of prices for crude oil and refined products. We and China Petroleum and Chemical Corporation, or Sinopec, set our crude oil median prices monthly based on the Singapore trading prices for crude oil. The PRC government publishes the retail median guidance prices for gasoline and diesel based on the FOB Singapore, Rotterdam and New York gasoline and diesel trading prices. Historically, international prices for crude oil and refined products have fluctuated widely in response to changes in many factors, such as global and regional economic and political developments and global and regional supply and demand for crude oil and refined products. We do not have, and will not have, control over the factors affecting international prices for crude oil and refined products. We expect continued volatility and uncertainty in international prices for crude oil and refined products. Declines in crude oil prices may adversely affect our business, results of operations and financial condition, our capital expenditure plans and the value of our proved reserves.

The crude oil and natural gas reserve data in this annual report are only estimates. The reliability of reserve estimates depend on a number of factors, assumptions and variables, such as the quality and quantity of our technical and economic data and the prevailing oil and gas prices applicable to our production, many of which are beyond our control and may prove to be incorrect over time. Results of drilling, testing and production after the date of the estimates may require substantial upward or downward revisions in our reserve data. Our actual production, revenues and expenditures with respect to our reserves may differ materially from these estimates because of these revisions.

Our proved crude oil reserves decreased gradually and modestly from 2001 to 2003 because the decrease in the crude oil reserves in our Daqing and Liaohe oil regions could not be offset by the increase in the crude oil reserves in our oil regions in northwestern China, such as the Xinjiang oil region, the Changqing oil and gas region and the Tarim oil region. Although our proved crude oil reserves increased slightly in 2004 mainly as a result of the increases in the crude oil reserves in our Xinjiang and Changqing oil regions, we cannot assure you that we will be able to increase or maintain our crude oil reserves in the future by our exploration activities in China. We are actively pursuing business opportunities outside China to supplement our domestic resources. For instance, in June 2005, we entered into an agreement to acquire certain overseas crude oil and natural gas assets from CNPC. We cannot assure you, however, that we can successfully locate sufficient alternative sources of crude oil supply or at all due to the complexity of the international political, economic and other conditions. If we fail to obtain sufficient alternative sources of crude oil supply, our results of operations and financial condition may be materially and adversely affected.

The United States Securities and Exchange Commission, as required by Section 404 of the Sarbanes-Oxley Act of 2002, adopted rules requiring every public company in the United States to include a management report on such company's internal controls over financial reporting in its annual report, which contains management's assessment of the effectiveness of the company's internal controls over financial reporting. In addition, an independent registered public accounting firm must attest to and report on management's assessment of the effectiveness of the company's internal controls over financial reporting. These requirements will first apply to our annual report on Form 20-F for the fiscal year ending December 31, 2006. Our management may conclude that our internal controls over our financial reporting are not effective. Moreover, even if our management concludes that our internal controls over financial reporting are effective, our independent registered public accounting firm may still be unable to attest to our management's assessment or may issue a report that concludes that our internal controls over financial reporting are not effective. In

Table of Contents

preparation for the implementation of the requirements of Section 404, we are undertaking company-wide documentation of internal controls, performing the system and process evaluation and testing required. During the course of our evaluation, documentation and attestation, we have identified certain deficiencies that could adversely affect our ability to record, process, summarize and report financial data consistent with our management's assertions in our financial statements. Although we have commenced planning for remedial measures to make necessary improvements, we cannot assure you that we will be able to remedy those identified deficiencies in time to meet the deadline imposed by the Sarbanes-Oxley Act for compliance with the requirements of Section 404. We are also in the process of conducting further evaluation of our internal control over financial reporting and may identify other deficiencies that we may not be able to remedy in time by the deadline for compliance with Section 404. If we fail to achieve and maintain the adequacy of our internal controls, we may not be able to conclude that we have effective internal controls, on an ongoing basis, over financial reporting in accordance with the Sarbanes-Oxley Act. Moreover, effective internal controls, particularly those related to revenue recognition, are necessary for us to produce reliable financial reports and are important to help prevent fraud. As a result, our failure to achieve and maintain effective internal controls over financial reporting could result in the loss of investor confidence in the reliability of our financial statements, which in turn could harm our business and negatively impact the trading prices of our ADSs or H shares. Furthermore, we have already incurred considerable costs and spent significant management time and other resources in an effort to comply with Section 404 and other requirements of the Sarbanes-Oxley Act. We anticipate that we will continue to incur considerable costs and use significant resources for compliance with Section 404.

Exploring for, producing and transporting crude oil and natural gas and producing and transporting refined products and chemical products involve many hazards. These hazards may result in:

fires;

explosions;

spills;

blow-outs; and

other unexpected or dangerous conditions causing personal injuries or death, property damage, environmental damage and interruption of operations.

Some of our oil and natural gas fields are surrounded by residential areas or located in areas where natural disasters, such as earthquakes, floods and sandstorms, tend to occur more frequently than in other areas. As with many other companies around the world that conduct similar businesses, we have experienced accidents that have caused property damage and personal injuries and death.

Significant operating hazards and natural disasters may cause partial interruptions to our operations and property and environmental damage that could have an adverse impact on our financial condition.

Except limited insurance coverage for vehicles and certain assets that we consider to be subject to significant operating risks, we do not carry any other insurance for our property, facilities or equipment in respect of our business operations. We do not currently carry any third party liability insurance against claims relating to personal injury or death, property or environmental damage arising from accidents on our property or relating to our operations. We also do not currently carry any business interruption insurance. The limited insurance coverage of our assets exposes us to substantial risks and will not cover most losses.

Table of Contents

CNPC owns approximately 90% of our share capital. This ownership percentage enables CNPC to elect our entire board of directors without the concurrence of any of our other shareholders. Accordingly, CNPC is in a position to:

control our policies, management and affairs;

subject to applicable PRC laws and regulations and provisions of our articles of association, determine the timing and amount of dividend payments and adopt amendments to certain of the provisions of our articles of association; and

otherwise determine the outcome of most corporate actions and, subject to the requirements of the Listing Rules of the Hong Kong Stock Exchange, cause our company to effect corporate transactions without the approval of minority shareholders.

CNPC's interests may sometimes conflict with those of some or all of our minority shareholders. We cannot assure you that CNPC, as controlling shareholder, will always vote its shares in a way that benefits our minority shareholders.

In addition to its relationship with us as our controlling shareholder, CNPC by itself or through its affiliates also provides us with certain services and products necessary for our business activities, such as construction and technical services, production services and supply of material services. The interests of CNPC and its affiliates as providers of these services and products to us may conflict with our interests. Although we have entered into a Comprehensive Products and Services Agreement with CNPC and our transactions with CNPC over the past three years have been conducted on open, fair and competitive commercial terms, we have only limited leverage in negotiating with CNPC and its affiliates over the specific terms of the agreements for the provision of these services and products.

The eastern and southern regions of China have a higher demand for refined products and chemical products than the western and northern regions. Most of our refineries and chemical plants are located in the western and northern regions of China. While we continue to expand the sales of these products in the eastern and southern regions of China, we face strong competition from Sinopec. In addition, we incur relatively higher transportation costs for delivery of our refined products and chemical products to certain areas of these regions from our refineries and chemical plants in western and northern China. As a result, we expect that we will continue to encounter difficulty in increasing our sales of refined products and chemical products in these regions.

We are currently constructing and renovating several natural gas pipelines and plan to construct and renovate other natural gas pipelines. In addition, we may, subject to obtaining requisite licenses from the relevant authority, commence offshore crude oil and natural gas exploration and production activities, which could require substantial capital expenditures and investments. We cannot assure you that the cash generated by our operations will be sufficient to fund these development plans or that our actual future capital expenditures and investments will not significantly exceed our current planned amounts. If either of these conditions arises, we may have to seek external financing to satisfy our capital needs. Under such circumstance, our inability to obtain sufficient funding for our development plans could adversely affect our business, financial condition and results of operations.

We are also subject to a number of risks relating to the PRC and the PRC oil and gas industry. These risks are described as follows:

Our operations, like those of other PRC oil and gas companies, are subject to extensive regulations and control by the PRC government. These regulations and control affect many material aspects of our operations, such as exploration and production licensing, industry-specific taxes and fees and environmental and safety standards. As a result, we may face significant constraints on our ability to implement our business strategies, to develop or

Table of Contents

expand our business operations or to maximize our profitability. Our business may also be adversely affected by future changes in certain policies of the PRC government with respect to the oil and gas industry.

Currently, the PRC government must approve the construction and major renovation of significant refining and petrochemical facilities as well as the construction of significant natural gas and refined product pipelines and storage facilities. We presently have several significant projects pending approval from the relevant government authorities and will need approvals from the relevant government authorities in connection with several other significant projects. We do not have control over the timing and outcome of the final project approvals.

We receive most of our revenues in Renminbi. A portion of our Renminbi revenues must be converted into other currencies to meet our foreign currency obligations. The existing foreign exchange limitations under the PRC laws and regulations could affect our ability to obtain foreign exchange through debt financing, or to obtain foreign exchange for capital expenditures.

Because PRC laws, regulations and legal requirements dealing with economic matters are relatively new and continue to evolve, and because of the limited volume of published judicial interpretations and the non-binding nature of prior court decisions, the interpretation and enforcement of these laws, regulations and legal requirements involve some uncertainty. We have included the Mandatory Provisions and certain additional requirements that are imposed by the Hong Kong Stock Exchange Listing Rules in our Articles of Association for the purpose of reducing the scope of difference between the Hong Kong company law and the PRC Company Law. However, because the PRC Company Law is different in certain important aspects from company laws in the United States, Hong Kong and other common law jurisdictions and because the PRC securities laws and regulations are still at an early stage of development, you may not enjoy shareholders' protections that you may be entitled to in other jurisdictions.

In addition to the adverse effect on our revenues, margins and profitability from any future fall in oil and natural gas prices, a prolonged period of low prices or other indicators would lead to a review for impairment of our oil and natural gas properties. This review would reflect management's view of long-term oil and natural gas prices. Such a review could result in a charge for impairment which could have a significant effect on our results of operations in the period in which it occurs.

ITEM 4 INFORMATION ON THE COMPANY

Introduction

History and Development of the Company

Overview of Our Operations

We are one of the largest companies in China in terms of sales. We are engaged in a broad range of petroleum and natural gas related activities, including:

the exploration, development, production and sale of crude oil and natural gas;

the refining, transportation, storage and marketing of crude oil and petroleum products;

the production and marketing of basic petrochemical products, derivative chemical products and other chemical products; and

the transmission and storage of crude oil, refined products and natural gas as well as sale of natural gas.

We are China's largest producer of crude oil and natural gas. Currently, substantially all of our crude oil and natural gas reserves and production-related assets are located in China. In the year ended December 31, 2004, we had total revenue of RMB 388,633 million (US\$46,956 million) and net income of RMB 102,927 million (US\$12,436 million).

Our exploration, development and production activities commenced in the early 1950s, when we conducted exploration activities in the Yumen oil region in northwestern China. The discovery of crude oil in 1959 in northeastern China's Daqing oil region, one of the world's largest oil regions in terms of proved crude oil reserves, marked the beginning of our large-scale upstream activities. Over the past four decades, we have conducted crude oil and natural gas exploration activities in many regions of China. As of December 31, 2004, we had estimated proved reserves of approximately 10,940.5 million barrels of crude oil and approximately 44,553.6 billion cubic feet of natural gas. We believe that we hold production licenses for a majority of China's proved crude oil reserves and proved natural gas reserves. In the year ended December 31, 2004, we produced 777.4 million barrels of crude oil and 837.5 billion cubic feet of natural gas for sale, representing an average production of 2.1 million barrels of crude oil and 2.3 billion cubic feet of sales natural gas per day. In 2004, we sold 730.2 million barrels of crude oil and 781.4 billion cubic feet of natural gas. Approximately 82% of the crude oil we sold in the year ended December 31, 2004 was supplied to our refineries.

We commenced limited refining activities in the mid-1950s, when we began producing gasoline and diesel at refineries in the Yumen oil region. We now operate 25 refineries located in eight provinces, three autonomous regions and one municipality. In 2004, our refineries processed approximately 697.8 million barrels of crude oil or an average of 1.9 million barrels per day. In the year ended December 31, 2004, we produced approximately 60.2 million tons of gasoline, diesel and kerosene and sold approximately 67.0 million tons of these products. In the year ended December 31, 2004, approximately 84% of the crude oil processed in our refineries was provided by our exploration and production segment and approximately 15% of the crude oil processed in our refineries was imported. As of December 31, 2004, our retail distribution network consisted of 14,039 service stations that we own and operate, 427 service stations wholly owned by CNPC or jointly owned by CNPC and third parties to which we provide supervisory support and 2,937 franchise service stations.

Our chemicals operations commenced in the early 1950s, when we began producing urea at our first petrochemical plant in Lanzhou in northwestern China. In the early 1960s, we began producing ethylene. We currently produce a wide range of basic and derivative petrochemical products and other chemical products at 12 chemical plants located in five provinces and three autonomous

Table of Contents

regions in China. Our other segments supply substantially all of the hydrocarbon feedstock requirements of our chemicals operations.

We are China's largest natural gas transporter and seller in terms of sales volume. Our natural gas transmission and marketing activities commenced in Sichuan in southwestern China in the 1950s. In 2004, our sales of natural gas totaled 781.4 billion cubic feet, of which 657.3 billion cubic feet was sold through our natural gas and pipeline segment. As of December 31, 2004, we owned and operated regional natural gas pipeline networks consisting of 18,995 kilometers of pipelines, of which 17,868 kilometers were operated by our natural gas and pipeline segment. As of December 31, 2004, we owned and operated a crude oil pipeline network consisting of 9,167 kilometers of pipelines with an average daily throughput of approximately 2.0 million barrels of crude oil. As of December 31, 2004, we also had a refined product pipeline network consisting of 2,460 kilometers of pipelines with an average daily throughput of approximately 28,243 tons of refined products.

We have increased our efforts to pursue attractive business opportunities outside China as part of our business growth strategy to utilize both domestic and international resources to strengthen our competitiveness. In connection with this objective, we established PetroChina International Limited, a wholly owned subsidiary, to focus on international oil and gas exploration and development. In April 2002, we acquired Devon Energy Indonesia Limited from Devon Energy Corporation for a price of RMB 2,068 million (US\$250 million). Devon Energy Indonesia Limited holds interests in a number of crude oil and natural gas exploration and production projects in Indonesia, including a 30% interest in an oil and gas production sharing contract relating to the Jabung block located in Sumatra, Indonesia. In April 2003, we acquired a 50% equity interest in Amerada Hess Indonesia Holdings Limited, which holds a 30% interest in the oil and gas production sharing contract relating to the Jabung block, for a price of RMB 679 million (US\$82 million). In connection with these acquisitions, we have entered into several take-or-pay agreements with a number of Singaporean customers to supply them with natural gas produced in Indonesia. In the year ended December 31, 2004, our revenue generated from our acquired interests in these crude oil and natural gas exploration and production companies in Indonesia was RMB 994 million (US\$120 million). In addition to our reserves in the Jabung block as a result of our acquisition of Devon Energy Indonesia Limited, we had a share of the reserves of approximately 15.2 million barrels of crude oil and approximately 76.5 billion cubic feet of natural gas in the Jabung block, totaling approximately 28.0 million barrel-of-oil equivalent, as of December 31, 2004, as a result of our acquisition of a 50% interest in Amerada Hess Indonesia Holdings Co. Our share of the production in the Jabung block in 2004 derived from our 50% interest in Amerada Hess Indonesia Holdings Co. was approximately 1.07 million barrels of crude oil and approximately 3.67 billion cubic feet of natural gas for sale, totalling approximately 1.68 million barrels-of-oil equivalent.

In June 2005, we entered into a capital contribution agreement with China National Oil and Gas Exploration and Development Corporation, or CNODC, Central Asia Petroleum Company Limited and Zhong You Kan Tan Kai Fa Company Limited, or Newco, to acquire a 50% interest in Newco, one of CNODC's subsidiaries, for a consideration of RMB 20,741 million (US\$2,506 million) which will be paid to Newco as our capital contribution. Under this agreement, CNODC, a wholly owned subsidiary of CNPC, will transfer certain of its overseas oil and natural gas assets to Newco by December 2005. By the completion of the transactions contemplated by this agreement, each of CNODC and us will own a 50% interest in Newco. We will have the right to appoint four of the seven directors of Newco, which will enable us to maintain effective control over Newco. We also entered into a transfer agreement with Newco at the same time to transfer all of our interest in PetroChina International Limited, the operating entity of our oil and natural gas assets in Indonesia, to Newco for a consideration of RMB 579 million (US\$70 million).

Upon its completion, the acquisition of Newco through capital contribution will allow us to have a 50% share of the oil and natural gas assets currently held by CNPC and located in ten countries, including, among others, Kazakhstan, Venezuela and Peru. Upon consummation of the transactions

Table of Contents

described above, we expect to significantly expand our overseas operations, increase the level of our oil and gas reserves and production volumes effectively and streamline our existing overseas business in Indonesia with the acquired businesses.

We currently expect to complete the acquisition and the transfer by December 2005 and February 2006, respectively, subject to completion of all necessary procedures for transferring the target assets to Newco, applicable government approvals, approval by our minority shareholders and certain other conditions set out in the capital contribution agreement and the transfer agreement. After completion of the acquisition and the transfer, CNODC plans to transfer its 50% interest in Newco to CNPC, which will result in CNPC holding the 50% interest in Newco directly.

In addition, we are currently assessing the feasibility of making further investments in international oil and gas markets.

In the year ended December 31, 2004, we imported approximately 175.1 million barrels of crude oil, as compared to 123.9 million and 72.3 million barrels of crude oil in the years ended December 31, 2003 and 2002, respectively. A substantial portion of our import crude oil in 2004 was processed in our refineries. We plan to continue to increase the import volume of crude oil in the future.

Our Corporate Organization and Shareholding Structure

PetroChina was established as a joint stock company with limited liability under the Company Law of the PRC on November 5, 1999 as part of a restructuring in which CNPC transferred to us most of the assets, liabilities and interests of CNPC relating to its exploration and production, refining and marketing, chemicals and natural gas businesses. CNPC retained the assets and liabilities relating to its remaining businesses and operations, including assets and liabilities relating to international exploration and production and refining and pipeline operations. CNPC is our primary provider of a wide range of services and products. On April 7, 2000, PetroChina completed a global offering of H shares and ADSs. Currently, CNPC owns an approximate 90% interest in PetroChina.

General Information

Our legal name is , and its English translation is PetroChina Company Limited. Our headquarters are located at 16 Andelu, Dongcheng District, Beijing, China, 100011, and our telephone number at this address is (86-10) 8488-6270. Our website address is www.petrochina.com.cn. The information on our website is not part of this annual report.

Launch of New Logo

Effective December 26, 2004, we began using a new logo that is jointly owned by us and CNPC. We have filed an application to register the new logo as a trademark with the State Trademark Bureau of the PRC.

Table of Contents

Table of Contents**Exploration and Production**

We are engaged in crude oil and natural gas exploration, development and production in China. Substantially all of our total estimated proved crude oil and natural gas reserves are located in China, principally in northeastern, northern, southwestern and northwestern China. The Songliao basin, located in Heilongjiang and Jilin provinces in northeastern China, including the Daqing and Jilin oil regions, accounted for 48% of our proved crude oil reserves as of December 31, 2004 and 49% of our crude oil production in 2004. We also have significant crude oil reserves and operations in the area around the Bohai Bay. The Bohai Bay basin includes the Liaohe, Dagang, Huabei and Jidong oil regions and accounted for 20% of our proved crude oil reserves as of December 31, 2004 and 22% of our crude oil production in 2004. Our proved natural gas reserves and production are generally concentrated in northwestern and southwestern China, specifically in the Erdos, Tarim and Sichuan basins.

We currently hold exploration licenses covering a total area of approximately 445 million acres and production licenses covering a total area of approximately 15.7 million acres. In 2004, our exploration and production segment had income from operations of RMB 125,571 million (US\$15,172 million).

To further develop our crude oil and natural gas businesses, we have applied to the Ministry of Land and Resources for oil and gas exploration and production licenses covering the southern part of the South China Sea to commence offshore crude oil and natural gas exploration and production. We cannot assure you that we will ultimately obtain these licenses or that we will have sufficient capital to fund these activities.

Reserves

Our estimated proved reserves as of December 31, 2004 totaled approximately 10,940.5 million barrels of crude oil and approximately 44,553.6 billion cubic feet of natural gas. As of December 31, 2004, proved developed reserves accounted for 80.0% and 37.7% of our total proved crude oil and natural gas reserves, respectively. Total proved hydrocarbon reserves on a barrels-of-oil equivalent basis increased by 3.4% from approximately 17,764.2 million barrels-of-oil equivalent as of the end of 2003 to approximately 18,366.1 million barrels-of-oil equivalent as of the end of 2004. Natural gas as a percentage of total proved hydrocarbon reserves increased from 38.5% as of December 31, 2003 to 40.4% as of December 31, 2004.

In addition to our reserves in the Jabung block as a result of our acquisition of Devon Energy Indonesia Limited, we had a share of the reserves of approximately 15.2 million barrels of crude oil and approximately 76.5 billion cubic feet of natural gas in the Jabung block, totaling approximately 28.0 million barrel-of-oil equivalent, as of December 31, 2004, as a result of our acquisition of a 50% interest in Amerada Hess Indonesia Holdings Co.

The following table sets forth our estimated proved reserves and proved developed reserves of crude oil and natural gas as of December 31, 2002, 2003 and 2004. We prepared our reserve estimates as of December 31, 2002, 2003 and 2004 on the basis of a report prepared by DeGolyer and MacNaughton, independent engineering consultants, in accordance with Statement of Financial Accounting Standards No. 69, or SFAS No. 69. Our reserve estimates include only crude oil and natural gas which we believe can be reasonably produced within the current terms of our production licenses. See **Regulatory Matters** **Exploration Licenses and Production Licenses** for a discussion

Table of Contents

of our production licenses. Also see Item 3 Key Information Risk Factors for a discussion of the uncertainty inherent in the estimation of proved reserves.

	Crude oil (millions of barrels)	Natural gas ⁽¹⁾ (Bcf)	Combined ⁽¹⁾ (BOE, in millions)

As of December 31, 2004 ⁽⁷⁾	8,748.1	16,787.1	11,546.0

- (1) Represents natural gas remaining after field separation for condensate removal and reduction for flared gas.
- (2) Excludes our share of the purchased reserves of approximately 16.8 million barrels of crude oil and approximately 76.6 billion cubic feet of natural gas in the Jabung block in Indonesia, totaling approximately 29.6 million barrel-of-oil equivalent, as a result of our acquisition of a 50% interest in Amerada Hess Indonesia Holdings Co. in April 2003.
- (3) Excludes our share of the production of approximately 1.2 million barrels of crude oil and approximately 1.0 billion cubic feet of natural gas in the Jabung block in Indonesia, totaling approximately 1.4 million barrels-of-oil equivalent, as a result of our acquisition of a 50% interest in Amerada Hess Indonesia Holdings Co. in April 2003.
- (4) Excludes our share of the reserve extensions and discoveries of approximately 0.69 million barrels of crude oil and approximately 4.60 billion cubic feet of natural gas in the Jabung block in Indonesia, totaling approximately 1.45 million barrels-of-oil equivalent, as a result of our acquisition of a 50% interest in Amerada Hess Indonesia Holdings Co. in April 2003.
- (5) Excludes our share of the production of approximately 1.07 million barrels of crude oil and approximately 3.67 billion cubic feet of natural gas in the Jabung block in Indonesia, totaling approximately 1.68 million barrels-of-oil equivalent, as a result of our acquisition of a 50% interest in Amerada Hess Indonesia Holdings Co.

in April 2003.

- (6) Excludes our share of the proved developed reserves of approximately 4.1 million barrels of crude oil and approximately 21.3 billion cubic feet of natural gas in the Jabung block in Indonesia, totalling approximately 7.7 million barrel-of-oil equivalent, as a result of our acquisition of a 50% interest in Amerada Hess Indonesia Holdings Co. in April 2003.
- (7) Excludes our share of the proved developed reserves of approximately 2.9 million barrels of crude oil and approximately 19.2 billion cubic feet of natural gas in the Jabung block in Indonesia, totalling approximately 6.1 million barrel-of-oil equivalent, as a result of our acquisition of a 50% interest in Amerada Hess Indonesia Holdings Co. in April 2003.

Table of Contents

The following tables set forth our crude oil and natural gas proved reserves and proved developed reserves by region as of December 31, 2002, 2003 and 2004.

	As of December 31,					
	2002		2003		2004

(2) Represents natural gas remaining after field separation for condensate removal and reduction for flared gas.

Table of Contents**Exploration and Development**

We are currently conducting exploration and development efforts in 11 provinces, two municipalities under the direct administration of the central government and three autonomous regions in China. In September 2002, the State Development Planning Commission, the predecessor of the National Development and Reform Commission, approved our proposal to explore, in cooperation with foreign companies, fifteen additional crude oil and natural gas fields with an aggregate area of 75,071 square kilometers located in Qaidam basin, Erdos basin, Sichuan basin and Xinjiang basin. We believe that we have more extensive experience in the exploration and development of crude oil and natural gas than any of our principal competitors in China. Since early 1950s, we have worked for nearly five decades to develop exploration and recovery technologies and methods tailored to the specific geological conditions in China.

The following table sets forth the number of wells we drilled, or in which we participated, and the results thereof, for the periods indicated.

Year		Daqing	Xinjiang	Liaoh	Changqing	Huabei	Dagang	Sichuan	Others ⁽¹⁾	Total	
2002	Net exploratory wells drilled⁽²⁾	67	84	61	170	67	30	28	149	656

⁽¹⁾ Represents the Jilin, Tarim, Tuha, Qinghai, Jidong and Yumen oil regions.

- (2) Net wells refer to the wells after deducting interests of others. No third parties own any interests in any of our wells.
- (3) Dry wells are wells with insufficient reserves to sustain commercial production.

Table of Contents**Properties**

The following table sets forth our interests in developed and undeveloped acreage by oil region and in productive crude oil and natural gas wells as of December 31, 2004.

Oil region	Acreage ⁽¹⁾ (thousands of acres)					
	Productive wells ⁽¹⁾		Developed		Undeveloped	
	Crude oil	Natural gas	Crude oil	Natural gas	Crude oil	Natural gas
Daqing	37,833	145	625.7	41.2	615.4	79.6
Liaohe	16,577	587	167.9	28.2	117.6	11.1
Xinjiang	15,182	70	317.6	39.1	53.4	8.8
Jilin	12,623	42	267.6	19.5	248.2	25.4
Changqing	9,864	514	271.7	632.0	386.6	2,143.0
Huabei	4,833	78	100.1	9.5	101.8	6.6
Dagang	3,181	53	86.4	15.3	75.5	23.5
Tuha	1,142	43	33.6	11.4	19.7	16.5
Tarim	565	79	113.1	72.2	47.3	84.8
Sichuan	396	987	324.0	372.6	8.2	87.9
Other regions ⁽²⁾	2,942	167	65.8	10.9	16.1	25.4
Total	105,138	2,765	2,373.5	1,251.9	1,689.8	2,512.6

(1) Includes all wells and acreage in which we have an interest. No third parties own any interests in any of our wells or acreage.

(2) Represents the Qinghai, Jidong and Yumen oil regions.

Approximately 74.6% of our proved crude oil reserves are concentrated in the Daqing, Liaohe and Xinjiang oil regions and the Changqing oil and gas region, and approximately 87.9% of our proved natural gas reserves are concentrated in the Changqing oil and gas region, the Tarim oil region, the Sichuan gas region and the Qinghai oil region. We believe that the Erdos, Junggar, and Songliao basins and Bohai Bay have the highest potential for increasing our crude oil reserve base through future exploration and development, and that the Erdos, Sichuan and Qaidam basins have the highest potential for increasing our natural gas reserve base through future exploration and development.

Production

The following table sets forth our historical average net daily crude oil and natural gas production by region and our average sales price for the periods ended December 31, 2002, 2003 and 2004.

	For the year ended December 31,			% of 2004 total
	2002	2003	2004	
Crude oil production⁽¹⁾				

(thousands of barrels per day, except percentages or otherwise indicated)

(1) Production volumes for each region include our share of the production from all of our cooperative projects with foreign companies in that region.

(2) Represents production from the Qinghai, Jidong and Yumen oil regions, the Sichuan gas region and our share of production from the oil and gas fields in Indonesia as a result of our acquisition of Devon Energy Indonesia Limited in April 2002.

- (3) Represents production of natural gas for sale.
- (4) Represents production from the Jilin, Jidong and Yumen oil regions and our share of production the oil and gas fields in Indonesia as a result of our acquisition of Devon Energy Indonesia Limited in April 2002.

In 2004, we supplied approximately 82.0%, 11.2%, 4.2% and 0.5% of our total crude oil sales to our refineries, Sinopec's refineries, regional refineries controlled by unrelated third parties in China and companies or entities outside China, respectively. We entered into a crude oil mutual supply framework agreement with Sinopec on December 1, 2004 for the supply of crude oil to each other's

Table of Contents

refineries in 2005. Under this agreement, we agreed in principle to supply 59.1 million barrels of crude oil to Sinopec, and Sinopec agreed in principle to supply to us approximately 10.3 million barrels of crude oil in 2005 at negotiated prices based on the Singapore market FOB prices for crude oil. See Item 5 Operating and Financial Review and Prospects General Factors Affecting Results of Operations Crude Oil Prices for a detailed discussion of the crude oil premium and discount calculation agreement and its supplemental agreement. For the years ended December 31, 2002, 2003 and 2004, the average lifting costs of our crude oil and natural production were US\$4.34 per barrel-of-oil equivalent, US\$4.39 per barrel-of-oil equivalent and US\$4.61 per barrel-of-oil equivalent, respectively.

Principal Oil and Gas Regions***Daqing Oil Region***

The Daqing oil region, our largest oil and gas producing property, is located in the Songliao basin and covers an area of approximately one million acres. The successful discovery and development of the oil fields in the Daqing oil region marked a critical breakthrough in the history of both our company and the PRC oil and gas industry. In terms of proved hydrocarbon reserves and annual production, the Daqing oil region is the largest oil region in China and one of the most prolific oil and gas properties in the world. We commenced exploration activities in the Daqing oil region in 1955 and discovered oil in the region in 1959. Annual crude oil production volume in the Daqing oil region reached one million barrels per day in 1976 and remained relatively stable until 2002. In 2003 and 2004, our crude oil production volume in the Daqing oil region fell below one million barrels per day to 985.3 thousand barrels per day and 942.0 thousand barrels per day, respectively. As of December 31, 2004, we produced crude oil from 20 fields in the Daqing oil region.

As of December 31, 2004, our proved crude oil reserves in the Daqing oil region were 4,615.0 million barrels, representing 42.2% of our total proved crude oil reserves. The proved crude oil reserves in our Daqing oil region have gradually decreased since 1996 because the crude oil production exceeded the crude oil reserve additions in our Daqing oil region in each year since 1996. As of December 31, 2002, 2003 and 2004, the proved crude oil reserves in our Daqing oil region were 5,073.8 million barrels, 4,832.3 million barrels and 4,615.0 million barrels, respectively. As a result, we decreased the crude oil production in our Daqing oil region over past years, and plan to continue to decrease the crude oil production in our Daqing oil region each year in the next few years. In 2004, our oil fields in the Daqing oil region produced an average of 942.0 thousand barrels of crude oil per day, representing approximately 44.4% of our total daily crude oil production. The crude oil production in our Daqing oil region decreased by 4.1% from 359.6 million barrels in 2003 to 344.8 million barrels in 2004. In 2004, the crude oil reserve-to-production ratio of the Daqing oil region was 13.4 years, similar to that in 2003.

The crude oil we produce in the Daqing oil region has an average API gravity of 35.7 degrees. In 2004, the crude oil we produced in the Daqing oil region had an average water cut of 89.1%, increased from the average water cut of 88.4% in 2003.

Because the crude oil in the Daqing oil region is primarily located in large reservoirs with relatively moderate depths of approximately 900 meters to 1,500 meters and with relatively simple geological structures and most of the crude oil produced at Daqing is medium viscosity oil, lifting costs in the Daqing oil region are relatively low among our oil regions. Crude oil produced using enhanced recovery techniques accounted for 22.6%, 25.1% and 29.9% of our crude oil production from the Daqing oil region in 2002, 2003 and 2004, respectively.

Because our oil fields in the Daqing oil region are relatively mature, the difficulty of extracting crude oil from these fields has increased in recent years and is likely to continue to increase gradually in the future. As a result, our lifting costs at these fields increased by 9.76% from US\$3.79 per barrel for the year ended December 31, 2003 to US\$4.16 per barrel for the year ended

Table of Contents

December 31, 2004. However, we have adopted a number of measures to contain the increase in our lifting costs at these fields. Those measures include:

- terminating unprofitable or marginally profitable exploration and production activities;
- reducing expenditures on ancillary ground facilities in the outer areas of the Daqing oil region;
- increasing preventive maintenance to prolong the useful life of our production facilities; and
- applying new technologies to reduce energy consumption.

Although we plan to continue to carry out these measures to contain the increase in our lifting costs, we expect our lifting costs at these fields will continue to increase gradually in the future.

We have an extensive transportation infrastructure network to transport crude oil produced in the Daqing oil region to internal and external customers in northeastern China and beyond. Crude oil pipelines link our oil fields in the Daqing oil region to the port of Dalian and the port of Qinhuangdao in Bohai Bay, providing efficient transportation for selling Daqing crude oil. These crude oil pipelines have an aggregate length of 2,590 kilometers and an aggregate throughput capacity of approximately 900 thousand barrels per day.

Daqing's crude oil has a low sulfur and high paraffin content. As many refineries in China, particularly those in northeastern China, are configured to refine Daqing crude oil, we have a stable market for the crude oil we produce in the Daqing oil region. In 2004, we refined approximately 75.1% of Daqing crude oil in our own refineries, exported approximately 1.1% and sold the remaining portion to Sinopec or local refineries.

Liaohe Oil Region

The Liaohe oil region is our second largest crude oil producing property and is located in the northern part of the Bohai Bay basin. We began commercial production in the Liaohe oil region in 1971. The Liaohe oil region covers a total area of approximately 580,000 acres. The Liaohe oil region is China's third largest oil region in terms of production in 2004.

As of December 31, 2004, proved crude oil reserves in the Liaohe oil region were 1,123.1 million barrels, representing 10.3% of our total proved oil reserves. In 2004, our oil fields in the Liaohe oil region produced an average of 245.4 thousand barrels of crude oil per day, representing approximately 11.6% of our total daily crude oil production. In 2004, the crude oil reserve-to-production ratio in the Liaohe oil region was 12.5 years. In 2004, the crude oil we produced in the Liaohe oil region had an average API gravity of 26 degrees and an average water cut of 74.2%. We have proved crude oil reserves in 37 fields in the Liaohe oil region, all of which are currently in production. We produce several varieties of crude oil in the Liaohe oil region, ranging from light crude oil to heavy crude oil and high pour point crude oil.

We have easy access to crude oil pipelines for Liaohe crude oil. The pipelines linking Daqing to Dalian port and Qinhuangdao port pass through the Liaohe oil region. In 2004, we sold about approximately 83.7% of the crude oil we produced at the Liaohe oil region to our own refineries.

Xinjiang Oil Region

The Xinjiang oil region is located in the Junggar basin in northwestern China. We commenced our operations in the Xinjiang oil region in 1951. The Xinjiang oil region covers a total area of approximately 900 thousand acres. As of December 31, 2004, our proved crude oil reserves in the Xinjiang oil region were 1,232.1 million barrels, representing 11.3% of our total proved crude oil reserves. In 2004, our oil fields in the Xinjiang oil region produced an average of 227.1 thousand barrels of crude oil per day, representing approximately 10.7% of our total crude oil production. In 2004, the crude oil reserve-to-production ratio at the Xinjiang oil region was 14.8 years. In 2004, the

Table of Contents

crude oil we produced in the Xinjiang oil region had an average API gravity of 36.8 degrees and an average water cut of 72.6%.

Sichuan Gas Region

The Sichuan gas region is the largest natural gas region in China in terms of annual natural gas production. We began natural gas exploration and production in Sichuan in the 1950s. The Sichuan gas region covers a total area of approximately 2.3 million acres. The natural gas reserve-to-production ratio in the Sichuan gas region was 26.3 years in 2004. As of December 31, 2004, we had 90 natural gas fields under development in the Sichuan gas region.

As of December 31, 2004, our proved natural gas reserves in the Sichuan gas region were 8,729.8 billion cubic feet, representing 19.6% of our total proved natural gas reserves and an increase of 7.4% from 8,131.4 billion cubic feet as of December 31, 2003. In 2004, our natural gas production for sale in the Sichuan gas region reached 331.5 billion cubic feet, representing 39.6% of our total natural gas production for sale and an increase of 7.0% from 309.9 billion cubic feet in 2003.

In 2002, we discovered and proved significant natural gas reserves in Luojiashai gas field in the Sichuan gas region. As of December 31, 2004, Luojiashai gas field had a total proved natural gas reserve of 1,143.5 billion cubic feet. Currently, Luojiashai gas field is the largest gas field in the Sichuan basin. We have developed a broad range of technologies relating to natural gas exploration, production, pipeline systems and marketing activities tailored to local conditions in Sichuan. We intend to continue to increase our natural gas reserves, annual natural gas production and revenues in the Sichuan gas region by adopting advanced technologies.

In November 2002, we obtained approval from the State Development Planning Commission, the predecessor of the National Development and Reform Commission, to construct pipelines to transmit natural gas produced in the Sichuan gas region to major cities in central China. This is known as the Zhong County to Wuhan City natural gas pipeline project. By the end of 2004, we completed the construction and commenced commercial operation of the main line of the Zhong County to Wuhan City natural gas pipeline and its Xiangfan branch pipeline and Huangshi branch pipeline. In addition, we completed the welding of the main part of the Xiangtan branch pipeline and expect to complete the construction and commence the commercial operation of this branch pipeline by the end of June 2005. See *Natural Gas and Pipeline Expansion of Our Natural Gas Transmission and Marketing Business* for a discussion of the Zhong County to Wuhan City natural gas pipeline project.

Changqing Oil and Gas Region

The Changqing oil and gas region covers parts of Shaanxi Province and Gansu Province and the Ningxia and Inner Mongolia Autonomous Regions. We commenced operations in the Changqing oil and gas region in 1970. In 2004, we produced 60.3 million barrels of crude oil in the Changqing oil and gas region.

In the early 1990s, we discovered the Changqing gas field, which had total estimated proved natural gas reserves of 14,932.7 billion cubic feet as of December 31, 2004, representing 33.5% of our total proved natural gas reserves. In January 2001, we discovered the Sulige gas field with total proved natural gas reserves of 2,500.2 billion cubic feet. In 2004 we produced 238.4 billion cubic feet of natural gas for sale in the Changqing oil and gas region, representing an increase of 48.4% from 160.7 billion cubic feet in 2003. The establishment of a natural gas pipeline from Shaanxi to Beijing in 1997 has significantly expanded the range of target markets for natural gas produced in the Changqing oil and gas region over the years. In the eight years following the establishment of the pipeline, we significantly increased daily natural gas production for sale in the Changqing oil and gas region. We are constructing an additional natural gas pipeline from Shaanxi to Beijing, which is designed to have an annual throughput capacity of 423.8 billion cubic feet of natural gas upon its

Table of Contents

completion, and expect to complete the construction of this pipeline in 2005. See Natural Gas and Pipeline Expansion of Our Natural Gas Transmission and Marketing Business for a discussion of this additional Shaanxi to Beijing natural gas pipeline project.

Tarim Oil and Gas Region

The Tarim oil and gas region is located in the Tarim basin in northwestern China with a total area of approximately 590 thousand acres. As of December 31, 2004, our proved crude oil reserves in the Tarim oil region were 507.6 million barrels. The Kela 2 natural gas field, which we discovered in 1998 in the Tarim oil and gas region, had estimated proved natural gas reserves of approximately 6,320.5 billion cubic feet as of December 31, 2004. As of December 31, 2004, the proved natural gas reserves in the Tarim oil and gas region reached 10,897.8 billion cubic feet, representing 24.5% of our total proved natural gas reserves. Currently, the Kela 2 natural gas field is the largest natural gas field in China in terms of proved natural gas reserves.

In 2004, we produced 32.6 billion cubic feet of natural gas for sale in the Tarim oil and gas region. We have completed the construction of the pipelines to deliver natural gas in the Tarim oil and gas region to the central and eastern regions of China where there is strong demand for natural gas transmitted through our West to East natural gas pipeline project. See Natural Gas and Pipeline Expansion of Our Natural Gas Transmission and Marketing Business for a discussion of our West to East natural gas pipeline project. We plan to significantly increase our natural gas production in the Tarim oil and gas region as a result of the commencement of the operation of this West to East natural gas pipeline.

Table of Contents

Table of Contents**Refining and Marketing**

We engage in refining and marketing operations in China through 25 refineries, 22 regional sales and distribution branch companies and one lubricants branch company. These operations include crude oil refining and the transportation, storage and marketing of refined products, including gasoline, diesel, kerosene and lubricant, in wholesale, retail and export markets. In 2004, our refining and marketing segment had income from operations of RMB 11,981 million (US\$1,448 million).

The following sets forth the highlights of our refining and marketing segment in 2004:

as of December 31, 2004, our refineries' annual primary distillation capacity totaled 771.4 million barrels of crude oil per year, or 2,113.5 thousand barrels per day;

we processed 697.8 million barrels of crude oil, or 1.9 million barrels per day;

we produced approximately 60.2 million tons of gasoline, diesel and kerosene and sold approximately 67.0 million tons of these products;

as of December 31, 2004, our retail distribution network consisted of:

14,039 service stations owned and operated by us,

427 service stations wholly owned by CNPC or jointly owned by CNPC and third parties and to which we provide supervisory support, and

2,937 franchise service stations owned and operated by third parties with which we have long-term refined product supply agreements; and

in 2004, our service stations, which are located throughout China, sold approximately 30.2 million tons of gasoline and diesel, representing 46.5% of the total of these products sold through our marketing operations.

Refining

Our refineries are located in eight provinces, three autonomous regions and one municipality in the northeastern, northwestern and northern regions of China.

Refined Products

We produce a wide range of refined products at our refineries. Some of our refined products are consumed internally as feedstocks for our chemical operations. The table below sets forth production volume for our principal refined products for each of the three years ended December 31, 2002, 2003 and 2004.

Product	Year ended December 31,		
	2002	2003	2004
	(in thousands of tons)		
Diesel	29,229.2	32,778.3	38,185.6
Gasoline	16,646.4	18,255.4	20,049.8
Fuel oil	6,176.8	4,546.1	4,256.8
Naphtha	3,066.0	3,602.8	4,942.8
Asphalt	1,653.5	1,870.5	1,946.8
Kerosene	1,774.7	1,759.3	1,961.8
Lubricants	1,358.9	1,192.5	1,467.8
Paraffin	856.4	984.9	1,140.0
Total	60,761.9	64,989.8	73,951.4

Table of Contents

We generally adjust our product mix to reflect market demand and to focus on the production of high margin products. This has resulted in an overall modest increase in the production of lighter refined products which generally are higher margin products, such as gasoline. Our production volume of lubricants, a high margin product, decreased 12.2% from 1,358.9 thousand tons in 2002 to 1,192.5 thousand tons in 2003, due primarily to the shutting down of inefficient lubricant production facilities in Jilin Petrochemical and Daqing Petrochemical and the maintenance of lubricant production facilities in Daqing Refinery and Daqing Petrochemical. In 2004, we increased our production volume of lubricants to 1,467.8 thousand tons to meet the growing market demands for lubricants. We have decreased our production of low margin products, such as fuel oil.

In recent years, we have made significant capital investments in facility expansions and upgrades to improve product quality to meet evolving market demand and environmental requirements in China. In each of the three years ended December 31, 2002, 2003 and 2004, our capital expenditures for our refining and marketing segment were RMB 10,503 million, RMB 12,650 million, and RMB 17,467 million (US\$2,110 million), respectively. These capital expenditures were incurred primarily in connection with our refining facility upgrades and expansion of our refined product retail marketing network and storage infrastructure. We built or renovated 19 refining facilities in 2004, including, among others, the hydrocracking unit at Daqing Petrochemical with a designed annual capacity of 1,200 thousand tons and the delayed coking unit at Karamy Petrochemical with an annual capacity of 1,200 thousand tons. In 2004, we acquired or constructed an aggregate of 2,276 service stations that are owned and operated by us. In addition, we have also focused on enhancing our processing technologies and methods. These efforts have enabled us to improve the quality of refined products at our refineries, particularly that of gasoline and diesel. We believe that our refined products generally meet product specification and environmental protection requirements as set by the PRC government, including the specification limiting the olefin and sulfur content in gasoline.

Our Refineries

Most of our refineries are strategically located close to our crude oil storage facilities, along our crude oil and refined product transmission pipelines and/or railways. These systems provide our refineries with secure supplies of crude oil and facilitate our distribution of refined products to the domestic markets. In each of the three years ended December 31, 2002, 2003 and 2004, our exploration and production operations supplied approximately 94%, 86% and 84% respectively, of the crude oil processed in our refineries.

The table below sets forth certain operating statistics regarding our refineries as of December 31, 2002, 2003 and 2004.

	As of December 31,		
	2002	2003	2004
Primary distillation capacity⁽¹⁾ (thousand barrels per day)			
Lanzhou Petrochemical ⁽²⁾	151.8	222.7	212.6
Dalian Petrochemical	212.6	212.6	212.6
Fushun Petrochemical	162.0	162.0	186.2
Daqing Petrochemical	121.5	121.5	121.5
Jinzhou Petrochemical ⁽³⁾	113.3	113.3	127.5
Jinxi Petrochemical	111.3	111.3	131.6
Jilin Petrochemical ⁽⁴⁾	101.2	101.2	107.3
Urumqi Petrochemical	101.2	101.2	101.2
Other refineries	911.1	844.1	913.0
Total	1,986.0	1,989.9	2,113.5

Table of Contents

	As of December 31,		
	2002	2003	2004
Refining throughput (thousand barrels per day)			
Lanzhou Petrochemical ⁽²⁾	128.6	140.5	166.4
Dalian Petrochemical	136.6	187.7	242.3
Fushun Petrochemical	166.3	172.2	181.7
Daqing Petrochemical	108.2	115.5	119.2
Jinzhou Petrochemical ⁽³⁾	101.3	105.7	120.8
Jinxi Petrochemical	97.2	108.2	123.9
Jilin Petrochemical ⁽⁴⁾	92.3	114.6	129.6

Jinxi Petrochemical	67.3	70.9	60.0
Jilin Petrochemical ⁽⁴⁾	54.0	69.8	75.5
Urumqi Petrochemical	50.0	50.0	62.0
Average of other refineries	43.7	39.5	62.4

(1) Represents the primary distillation capacity of crude oil and condensate.

(2) Includes Lanzhou Refinery, which was merged into Lanzhou Petrochemical in October 2000 as part of our ongoing restructuring.

(3) Includes a 19.05% minority interest held by unrelated third parties in Jinzhou Petrochemical Company Limited in the relevant periods.

(4) Includes Jilin Chemical Industrial Company Limited, in which we held a 67.29% equity interest in the relevant periods. Data regarding the primary distillation capacity, refining throughput and conversion equivalent of Jilin Petrochemical includes a 32.71% minority interest held by unrelated third parties in Jilin Chemical Industrial Company Limited in the relevant periods.

(5) Stated in fluid catalytic cracking, delayed coking and hydrocracking equivalent/ topping (percentage by weight), based on 100% of balanced distillation capacity.

In each of the three years ended December 31, 2002, 2003 and 2004, the average utilization rate of the primary distillation capacity at our refineries was 79.1%, 85.6% and 93.2%, respectively. The average yield for our four principal refined products (gasoline, kerosene, diesel and lubricants) at our refineries was 63.7%, 64.2% and 65.3%

respectively, in the same periods. Yield represents the number of tons of a refined product expressed as a percentage of the number of tons of crude oil from which that product is processed. In each of the three years ended December 31, 2002, 2003 and 2004, the yield for all refined products at our refineries was 91.3%, 91.4% and 91.5% respectively.

Dalian Petrochemical, Fushun Petrochemical and Lanzhou Petrochemical were our leading refineries in terms of both primary distillation capacity and throughput in 2004. They are all located close to our major oil fields in the northeast and northwest regions of China and produce a wide

Table of Contents

range of refined products. In October 2000, we consolidate Lanzhou Refinery into Lanzhou Petrochemical as part of our ongoing restructuring. Lanzhou Petrochemical has a strategic position in our plan to expand our markets in refined product sales in the southwestern and central regions of China. It is located in the northwestern part of China, providing easy access to markets in the southwestern and central regions in China. In 2002, we increased the primary distillation capacity at Dalian Petrochemical by 34.5 thousand barrels per day. In 2002, 2003 and 2004, we increased the throughput of Dalian Petrochemical by 15.0 thousand barrels per day, 51.1 thousand barrels per day and 54.6 thousand barrels per day, respectively. We expect the throughput of Dalian Petrochemical to continue to increase in the future. As of December 31, 2004, these four refineries had an aggregate primary distillation capacity of 267.5 million barrels per year, or 732.9 thousand barrels per day, representing approximately 34.7% of the total primary distillation capacity of all our refineries as of the same date. In 2004, these four refineries processed an aggregate of 259.7 million barrels of crude oil, or 709.6 thousand barrels per day, representing approximately 37.2% of our total throughput in the same period.

Marketing

We market a wide range of refined products, including gasoline, diesel, kerosene and lubricants, through an extensive network of sales personnel and independent distributors and a broad wholesale and retail distribution system across China. As of December 31, 2004, our marketing network consisted of:

approximately 790 regional wholesale distribution outlets nationwide. Substantially all of these outlets are located in high demand areas such as economic centers across China, particularly in the coastal areas, along major railways and along the Yangtze River; and

14,039 service stations owned and operated by us, 427 service stations wholly owned by CNPC or jointly owned by CNPC and third parties that exclusively sell refined products produced or supplied by us and to which we provide supervisory support under contractual arrangement, and 2,937 franchise service stations owned and operated by third parties.

In September 2002, we acquired from CNPC all of the assets and liabilities of 686 refined products marketing enterprises. These assets consist primarily of 2,994 service stations and 478 storage facilities located in more than 500 counties in 15 provinces and autonomous regions in the PRC. We believe that the addition of these service stations and storage facilities has provided us with an important platform to further expand and develop our refined product sales and distribution network and develop our retail distribution channels.

In 2004, we sold approximately 64.9 million tons of gasoline and diesel. The PRC government and other institutional customers, including railway, transportation and fishery operators, are our long-term purchasers of the gasoline and diesel that we produce. We sell gasoline and diesel to these customers at the ex-factory median prices published by the PRC government with an 8% floating range. See Regulatory Matters Pricing Refined Products for a discussion of refined product pricing. In 2004, sales of gasoline and diesel to these customers accounted for approximately 1% and 10% of our total sales of gasoline and diesel, respectively. The following table

Table of Contents

sets forth our refined product sales volumes by principal product category for each of the three years ended December 31, 2002, 2003 and 2004.

Product	Year ended December 31,		
	2002	2003	2004
	(in thousands of tons)		
Diesel	33,167.1	36,680.7	43,178.3
Gasoline	19,001.3	19,872.5	21,714.2
Fuel oil	4,327.8	5,748.7	5,747.4
Naphtha	4,142.5	4,836.2	5,325.9
Kerosene	1,884.5	1,789.1	2,116.2
Lubricants	1,997.0	1,774.5	1,974.0
Asphalt	1,344.0	1,711.3	2,348.7
Paraffin	868.7	1,055.5	1,138.1
Total	66,732.9	73,468.5	83,542.8

Wholesale Marketing

We sell refined products both directly and through independent distributors into various wholesale markets, as well as to utility, commercial, petrochemical, aviation, agricultural, fishery and transportation companies in China. We sold approximately 64.9 million tons of gasoline and diesel through our wholesale operations in 2004, including transfers to our retail operations. We sold approximately 1.0 million tons of gasoline and diesel through our wholesale operations to Sinopec in 2004, representing approximately 2% of our total sales of these products in the same period. In 2004, we sold approximately 18.7 million tons of our other principal refined products.

As part of the restructuring of the CNPC group in 1999, we completed the implementation of a plan to consolidate our wholesale operations and reduce distribution layers and the number of wholesale outlets. In 2001, we completed a series of initiatives to change the business scope, adjust the business functions or shut down operations in respect of 558 county level outlets. In addition, we merged 18 municipal level outlets in 2001. In 2002, we continued these initiatives by integrating our markets in Shandong Province and Anhui Province, enhancing our logistics system and shutting down a number of inefficient oil storage facilities. In 2003, we further consolidated our wholesale operations. In 2004, we consolidated our sales operations in the southern and central regions of China, respectively, by establishing a branch company in each area which is fully engaged in sales and marketing. We believe the implementation of this strategy has increased the overall efficiency of our marketing operations.

Retail Marketing

In 2004, we sold approximately 30.2 million tons of gasoline and diesel through our service station network, accounting for 46.5% of the total of these products sold through our marketing operations in the same period. Although sales volumes vary significantly by geographic region, the weighted average sales volume of gasoline and diesel per business day at our service station network in 2002, 2003 and 2004 was 4.8 tons, 4.9 tons and 5.5 tons per service station, respectively.

We sell our refined products to service stations owned and operated by CNPC. These service stations sell exclusively refined products produced or supplied by us in accordance with contractual arrangements between CNPC and us. Under these contractual arrangements, we also provide supervisory support to these service stations.

We currently operate a majority of our service stations under the tradename of **PetroChina**. We intend to gradually adopt our new logo for all our service stations in the next few years.

Table of Contents

Most of the service stations in our service station network are concentrated in the northern, northeastern and northwestern regions of China where we have a dominant wholesale market position. However, the eastern and southern regions of China have a higher demand for gasoline and diesel. We have made significant efforts in recent years to expand our sales and market share in those regions through expanding the number of our service stations and storage facilities in those regions. As part of our expansion initiatives, in 2001, we commenced negotiations with BP Amoco p.l.c. with the purposes of establishing a Sino-foreign equity joint venture to engage in the development and operation of service stations in Guangdong Province. On May 14, 2004, we entered into the Joint Venture Contract and the Articles of Association with BP Global Investments Limited, a subsidiary of BP Amoco p.l.c., to form BP PetroChina Petroleum Company Limited in Guangdong Province. We and BP Global Investments Limited hold 51% and 49% equity interests in BP PetroChina Petroleum Company Limited, respectively. We expect that BP PetroChina Petroleum Company Limited will build, acquire and manage approximately 500 service stations in Guangdong Province within three years from its establishment. As of December 31, 2004, BP PetroChina Petroleum Company Limited owned and operated 395 service stations in the eastern and northern regions of Guangdong Province.

We invested a total of RMB 10,117 million in expanding our service station network in 2004, of which 71% was invested in the eastern and southern regions of China. In 2004, we sold approximately 13,130 thousand tons of gasoline and diesel through our owned and franchised service stations in these regions, as compared to approximately 8,280 thousand tons and approximately 9,916 thousand tons we sold in 2002 and 2003, respectively.

In 2004, we acquired or constructed an aggregate of 2,276 service stations that are owned and operated by us, of which 1,423 are in the eastern and southern regions of China. We plan to further increase our retail market share and improve the efficiency of our retail operations, with a continued focus on the eastern and southern regions of China. We plan to invest approximately RMB 7,300 million in 2005 to expand our service station network by adding approximately 1,500 new service stations.

The following table sets forth the number of the service stations in our marketing network as of December 31, 2004:

Owned and operated by us ⁽¹⁾	14,039
Wholly owned by CNPC or jointly owned by CNPC and third parties ⁽²⁾	427
Franchised	2,937
 Total	 17,403

(1) Includes 395 service stations owned and operated by BP PetroChina Petroleum Company Limited.

(2) These service stations exclusively sell refined products produced or supplied by us. We also provide supervisory support to these service stations.

In order to improve the efficiency and profitability of our existing service station network, we standardize the interior and exterior of our service stations, our service procedures, staff uniforms and the product quality of all our service stations. We are in the process of promoting the use of pre-paid gasoline/ diesel filling cards at our service stations. We have equipped 620 service stations located in 14 municipalities with facilities that allow customers to purchase gasoline or diesel with their pre-paid filling cards. In addition to selling gasoline and diesel, we have gradually increased the sale of lubricants and other non-fuel products at our service stations.

40

Table of Contents**Chemicals and Marketing**

Through 12 chemical plants, we produce basic petrochemical products, derivative petrochemical products, and other chemical products. In 2004, our chemicals and marketing segment had income from operations of RMB 7,655 million (US\$925 million).

Our chemical plants are located in five provinces and three autonomous regions in China. Most of our chemical plants are co-located with our refineries and are also connected with the refineries by pipelines, providing additional production flexibility and opportunities for cost competitiveness. Our exploration and production, refining and natural gas operations supply substantially all of the hydrocarbon feedstock requirements for our chemicals operations. We believe that the proximity of our refineries to our chemical plants promotes efficiency in production, secures feedstock supply and minimizes the risk of production interruption. Our production capacity and our market share in China for chemical products allow us to solidify our dominant position in the northern and western regions of China. In addition, our stable customer base in the eastern and southern regions of China provides us with the opportunity to expand our market share in these regions.

Our Chemical Products

The table below sets forth the production volumes of our principal chemical products for each of the three years ended December 31, 2002, 2003 and 2004.

	Year ended December 31,		
	2002	2003	2004
	(in thousand tons)		
Basic petrochemicals			
Propylene	1,523.9	1,833.7	1,969.1
Ethylene	1,582.0	1,817.9	1,845.6
Benzene	558.7	683.8	712.7
Derivative petrochemicals			
Synthetic resin			
Polyethylene	1,014.4	1,208.0	1,309.5
Polypropylene	759.0	917.1	961.6
ABS	166.7	208.7	228.1
Other synthetic resin products	27.3	35.1	27.6
Synthetic fiber			
Polyacrylic fiber	78.6	83.7	108.1
Terylene fiber	173.0	116.6	94.3
Other synthetic fiber products	15.5	11.4	7.4
Synthetic rubber			
Butadiene styrene rubber	134.9	147.3	190.2
Other synthetic rubber products	79.1	98.8	95.6
Intermediates			
Alkylbenzene	175.3	204.7	194.9
Other chemicals			
Urea	3,411.2	3,579.6	3,652.3
Ammonium nitrate	143.2	46.5	32.0

We are one of the major producers of ethylene in China. We use the bulk of the ethylene we produce as a principal feedstock for the production of many chemical products, such as polyethylene. In 2001, we implemented a five-year plan to invest RMB 10,000 million to upgrade our ethylene production facilities at Daqing Petrochemical, Jilin Petrochemical, Liaoyang Petrochemical,

Table of Contents

Dushanzi Petrochemical and Lanzhou Petrochemical. As of December 31, 2004, we had invested approximately RMB 4,187 million (US\$506 million) for these upgrade projects. Except for the on-going project at Lanzhou Petrochemical, we have completed all of the other upgrading projects we implemented in 2001. As of December 31, 2004, we had a total ethylene production capacity of 1,850 thousand tons per year, as compared to 1,730 thousand tons of ethylene production capacity as of December 31, 2003. In 2004, the production volume of ethylene increased by 1.5% from 1,818 thousand tons in 2003 to 1,846 thousand tons. We are currently conducting further upgrading of our ethylene production facilities. We expect to complete the further upgrading of the ethylene production facilities at Daqing Petrochemical, Lanzhou Petrochemical, Jilin Petrochemical and Liaoyang Petrochemical prior to 2007, and the ethylene production facilities at Dushanzi Petrochemical by 2008. The petrochemical ethylene projects at Fushun Petrochemical and Sichuan Petrochemical are pending for approval of the National Development and Reform Commission. We expect to have a total ethylene production capacity of 2,960 thousand tons per year in 2007.

In 2004, the monthly average capacity utilization rate at our ethylene production facilities was 99.6%. The cost of ethylene production is an important component of our overall chemical production costs. Reduction of energy consumption and raw material loss is a key factor in reducing ethylene production costs. After we implemented a series of measures in 2003 and 2004 to reduce energy consumption, the average energy consumption of our ethylene production facilities decreased from 794.6 kilograms of standard oil per ton in 2002 to 754.1 kilograms in 2003 and 734.3 kilograms in 2004. However, this is still significantly higher than the world average of 500 to 690 kilograms of standard oil per ton. We plan to continue to implement measures to reduce our energy consumption.

In addition, high ethylene percentage loss has also contributed to the relative high cost of our ethylene production. In order to reduce high ethylene percentage loss in our ethylene production, we have implemented a series of measures at our chemical plants in the past two years, such as improving our process management of key units for ethylene production, reducing unplanned temporary interruptions of our chemical facilities and enhancing pyrolysis material composition and production plans. As a result, the average ethylene percentage loss at our chemical plants decreased from 0.83% in 2002 to 0.57% in 2003 and to 0.54% in 2004. We believe that these measures will enable us to continue to reduce the cost of our ethylene production without incurring significant capital expenditures.

We produce a number of synthetic resin products, including polyethylene, polypropylene and ABS. As of December 31, 2004, our production capacities for polyethylene, polypropylene and ABS were 1,212.5 thousand tons, 988.5 thousand tons and 220 thousand tons, respectively. In 2004, we produced 1,309.5 thousand tons, 961.6 thousand tons and 228.1 thousand tons of polyethylene, polypropylene and ABS, respectively. Currently, China imports significant volumes of these products to meet the domestic demand due to an inadequate supply of high-quality domestically produced polyethylene, polypropylene and ABS. We intend to increase the production, and improve the quality, of these products. We are currently building new production facilities with new technology for the production of these products in Daqing Petrochemical, Daqing Refining and Chemical, Jilin Petrochemical, Lanzhou Petrochemical and other branch companies. We experienced a decrease in the production volume of ABS in 2002. This decrease was due primarily to the termination of the lease for a major ABS production line at Daqing Petrochemical Company in 2002. Since 2002, we have implemented a number of measures to upgrade our ABS production facilities at our petrochemical companies in order to replace the lost ABS production capacity at Daqing Petrochemical Company. In 2003, Jilin Petrochemical Company increased its ABS production capacity to 170.0 thousand tons per year by upgrading its ABS production facilities. Primarily as a result of this, the production volume of ABS increased by 25.2% to 208.7 thousand tons in 2003. In 2004, our production volume of ABS was 228.1 thousand tons, representing an increase of 9.3% from 2003. Our production volume of polyethylene and polypropylene in 2004 increased by 8.4% and 4.9%, respectively, as compared with 2003.

Table of Contents**Sales and Marketing**

Our chemical products are distributed to a number of industries that manufacture components used in a wide range of applications, including automotive, construction, electronics, medical manufacturing, printing, electrical appliances, household products, insulation, packaging, paper, textile, paint, footwear, agriculture and furniture industries.

The following table sets forth the sales volumes of our chemical products by principal product category for each of the three years ended December 31, 2002, 2003 and 2004.

Product	Year ended December 31,		
	2002	2003	2004
	(in thousands of tons)		
Derivative petrochemicals			
Synthetic resin			
Polyethylene	1,008.3	1,205.0	1,423.6
Polypropylene	589.2	717.2	793.3
ABS	210.5	204.5	231.8
Synthetic fiber			
Terylene fiber	172.2	132.9	103.6
Polyacrylic fiber	84.9	81.2	115.8
Synthetic rubber			
Butadiene styrene rubber	136.5	144.7	187.8
Intermediates			
Alkylbenzene	135.3	110.1	110.9
Other chemicals			
Urea	2,967.5	3,766.8	3,662.8
Ammonium nitrate	145.5	51.1	32.8

Table of Contents

Table of Contents**Natural Gas and Pipeline**

We are China's largest natural gas transporter and seller in terms of sales volume, with revenues of RMB 18,255 million (US\$2,206 million) and total sales volume of 781.4 billion cubic feet in 2004, of which 657.3 billion cubic feet was sold by our natural gas and pipeline segment. In 2004, our natural gas and pipeline segment had income from operations of RMB 2,535 million (US\$306 million). We sell natural gas primarily to fertilizer and chemical companies, commercial users and municipal utilities owned by local governments.

The following table sets forth the length of our natural gas pipelines as of December 31, 2002, 2003 and 2004 and the volume of natural gas sold by us in each of the three years ended December 31, 2002, 2003 and 2004.

	As of December 31 or year ended December 31,		
	2002	2003	2004
Length of natural gas pipelines used by our natural gas segment (km)	12,299	14,017	17,868
Total length of natural gas pipelines (km)	13,391	15,144	18,995
Volume of natural gas sold by our natural gas segment (Bcf)	486.3	543.4	657.3
Total volume of natural gas sold ⁽¹⁾ (Bcf)	588.4	651.0	781.4

⁽¹⁾ Represents the aggregate volume of natural gas sold by our natural gas and pipeline segment and our exploration and production segment, including the sales to our natural gas and pipeline segment by our exploration and production segment.

Currently, natural gas consumption in China represents 2.6% of China's total primary energy consumption. The PRC government has forecast that natural gas consumption in China will represent 6% of China's total primary energy consumption in 2010. We believe this growth will provide us with the opportunity to expand our natural gas business.

In addition, we also conduct the operation of crude oil and refined product transmission and storage infrastructure in the natural gas and pipeline segment.

Our Principal Markets for Natural Gas

In 2004, 50.7%, 21.4%, 17.8%, 3.0%, 2.3% and 4.8% of our natural gas sales were to the southwestern, northern, northwestern, northeastern, central, and eastern regions of the PRC, respectively.

Currently, Sichuan Province and Chongqing Municipality in southwest China are two of our principal markets for natural gas. We sold 296.4 billion cubic feet of natural gas to Sichuan Province and Chongqing Municipality in 2004, as compared to 276.2 billion cubic feet in 2003, representing approximately 37.9% of our total natural gas sales in 2004. We supply natural gas to Sichuan Province and Chongqing Municipality from our exploration and production operations in the Sichuan oil region. Our natural gas pipelines in these areas are well developed, consisting of a natural gas transmission network with a total length of approximately 6,644 kilometers. As these areas lack adequate supply of alternative energy resources, such as coal, we believe that we can further expand our natural gas sales as energy demand increases in these areas.

Beijing Municipality, Tianjin Municipality, Hebei Province and Shandong Province in northern China have high energy consumption levels. These areas are also important markets for our natural gas transmission and marketing business. We sold an aggregate of 140.2 billion cubic feet of natural gas to these areas in 2004, as compared to 122.2 billion cubic feet in 2003. Our natural gas sales to Beijing Municipality increased 12.2% from 83.1 billion cubic feet in 2003 to 93.2 billion cubic feet in 2004. We supply natural gas to Beijing Municipality, Tianjin Municipality and Hebei Province primarily from the Changqing oil region through the Shaanxi to Beijing natural gas pipeline, which is one of

Table of Contents

our natural gas trunk pipelines, and from the Huabei and Dagang oil regions. Currently, we have 2,046 kilometers of natural gas pipelines in these areas.

Henan Province, Anhui Province, Shanghai Municipality and other provinces and cities in the Yangtze River Delta, Wuhan City and other regions in Hubei Province, Hunan Province, Lanzhou City and other areas in Gansu Province, Qinghai Province and Shanxi Province are also natural gas markets we are developing. In 2004, we completed the construction and commenced commercial operation of the mainlines of the West to East natural gas pipeline and the Zhong County to Wuhan City natural gas pipeline, which link our Xinjiang, Changqing and Sichuan gas fields with these areas.

Each year, we must supply natural gas to customers subject to the government-formulated guidance supply plan first as required by the PRC government. We enter into natural gas supply contracts with those customers on the basis of the amount of natural gas to be supplied according to the guidance supply plan for the following year's supply.

We have entered into long-term take-or-pay contracts with 16 municipalities and enterprises in Qinghai Province, Gangsu Province, Shanxi Province and Tianjin Municipality, 25 municipalities and enterprises in Hubei Province and Hunan Province, 12 municipalities in Shandong Province and 40 municipalities and enterprises in Henan Province, Anhui Province, Shanghai Municipality and other provinces located in the Yangtze River Delta. Under these take-or-pay contracts, we have agreed in principle to supply natural gas to these customers in the next 20 to 25 years at prices determined based on the ex-factory prices published by the National Development and Reform Commission, formerly the State Development Planning Commission, supplemented by the pipeline transportation tariffs. See

Regulatory Matters Pricing Natural Gas for a discussion of natural gas pricing.

In 2004, we sold 583 billion cubic feet, or 88.7% of the natural gas sales volume of our natural gas and pipeline segment, to customers not subject to the government-formulated guidance supply plan, such as commercial end users and municipal utilities, representing a 26.4% increase over 2003. We believe that sales volume of our natural gas to customers not subject to the government-formulated guidance supply plan as a percentage of our total sales will continue to increase. See Regulatory Matters Pricing Natural Gas for a discussion of the government-formulated guidance supply plan.

Driven by environmental and efficiency concerns, the PRC government is increasingly encouraging industrial and residential use of natural gas to meet primary energy and environmental protection needs. The PRC government has adopted a number of laws and regulations to require municipal governments to increase the use of clean energy, such as natural gas and liquefied petroleum gas, to replace the use of raw coal. Several municipal governments, including that of Beijing, have adopted policies to facilitate natural gas consumption in order to reduce the air pollution level. The PRC government has also adopted a preferential value-added tax rate of 13% for natural gas production as compared to a 17% value-added tax rate for crude oil production.

We believe that these policies have had a positive effect on the development and consumption of natural gas in many municipalities that are our existing or potential markets for natural gas. We believe that these favorable policies will continue to benefit our natural gas business.

Natural Gas Transmission Infrastructure

As of December 31, 2004, our natural gas and pipeline segment owned and operated approximately 17,868 kilometers of natural gas pipelines in China, which represented the vast majority of China's onshore natural gas pipelines. Our existing natural gas pipelines form regional natural gas supply networks in southwestern and northern China. Our experience in the design, construction management and operation of our existing natural gas pipelines has enabled us to develop relatively advanced technologies and skills in China in long distance pipeline design, construction and automated operational communications. We believe that we will continue to benefit

Table of Contents

from those technologies and skills in the future expansion of our natural gas pipeline networks and their ancillary facilities.

Expansion of Our Natural Gas Transmission and Marketing Business

In September 2001, we completed the construction of a natural gas pipeline from Sebei, Qinghai Province, to Xining City, Qinghai Province and Lanzhou City, Gansu Province, of which the total length of the main line is approximately 930 kilometers. The capital investment for this project was RMB 2,220 million, which was funded by cash generated by our operations.

In March 2002, we completed the construction, and commenced the operation, of a natural gas pipeline from Cangzhou City to Zibo City with a total length of 213.5 kilometers. We own a 70% interest in this project. An unrelated natural gas company in Shandong Province holds the remaining interest in this project.

In October 2004, we completed the construction of the main line of our West to East natural gas pipeline and commenced commercial operation in December 2004. Our West to East natural gas pipeline project is designed to link our natural gas fields in Xinjiang and Changqing with Henan Province, Anhui Province, Shanghai Municipality and other areas in the Yangtze River Delta. The total length of the main line for the West to East natural gas pipeline project is 3,786 kilometers. As of December 31, 2004, we had invested RMB 25,300 million in this project. We are currently constructing and will continue in the next few years the construction of the branch pipelines and connecting pipelines for the West to East natural gas pipeline project, including the pipeline connecting our West to East natural gas pipeline with the second Shaanxi to Beijing natural gas pipeline. This connecting pipeline starts at Qingshan in Jiangsu Province and ends at Anping in Hebei Province with a total length of 910 kilometers. We commenced the construction of this connecting pipeline at the end of 2004 and expect to complete the construction and commence commercial operation by the end of 2005. As of May 31, 2005, we had entered into take-or-pay contracts with 40 subscribers and distributors to supply them with natural gas through the West to East natural gas pipeline. We believe that the successful completion of this natural gas pipeline and associated storage facilities will substantially enhance our ability to capitalize on anticipated growth in demand for natural gas in these regions.

The Zhong County to Wuhan City natural gas pipeline is designed to link the Sichuan gas region with Wuhan City, the other areas in Hubei province and Hunan Province, and has a designed annual throughput capacity of 105.9 billion cubic feet of natural gas. We commenced the construction of the pipeline in August 2003. In December 2004, we completed the construction and commenced commercial operation of the main line of the Zhong County to Wuhan City natural gas pipeline and its Xiangfan branch pipeline and Huangshi branch pipeline. We expect to complete the construction and commence commercial operation of the Xiangtan branch line by the end of June 2005. As of May 31, 2005, we had entered into take-or-pay contracts with 25 municipalities and enterprises in Hubei Province and Hunan Province to supply them with natural gas to be transmitted through the main line and branch lines of the Zhong County to Wuhan City pipeline.

We are in the process of constructing the second natural gas pipeline from Shaanxi to Beijing Municipality with a total length of 860 kilometers. This second Shaanxi to Beijing natural gas pipeline will deliver natural gas from our Changqing oil and gas region to Shaanxi Province, Shanxi Province, Hebei Province and Beijing Municipality with a designed annual throughput capacity of 423.8 billion cubic feet of natural gas. We expect to complete the construction of the second Shaanxi to Beijing natural gas pipeline in 2005.

On July 4, 2002, we, Sinopec and an international investment consortium, which consists of six multinational energy companies including Shell International Gas Limited, OAO Gazprom and ExxonMobil China Gas Pipeline Limited, entered into a West to East Joint Venture Framework Agreement. This agreement contemplates a number of structural and operation principles relating to the West to East project. However, the parties to the agreement failed to, after thorough discussions

Table of Contents

among all parties, reach a consensus with respect to the construction and operation of the West to East pipeline project. As a result, all parties agreed to terminate the agreement. Upon the termination of the agreement, we expect to independently construct and operate this pipeline. All of the parties to the agreement hope that they will have other cooperation opportunities in the future.

Crude Oil and Refined Product Transportation and Storage Infrastructure

In order to improve management effectiveness, operating efficiency and safety of our crude oil and refined product transportation and storage businesses, we transferred the pipeline operations and some storage infrastructure related to the pipeline operations for our crude oil and refined products from the refining and marketing segment to the natural gas segment in January 2001, which was then renamed the natural gas and pipeline segment. See Item 5 Operating and Financial Review and Prospects General Overview .

We have an extensive network for the transportation, storage and distribution of both crude oil and refined products, which covers many regions of China. Our goal is to exploit and optimize our existing infrastructure to further consolidate our presence as the leading integrated oil and gas company in China.

As of December 31, 2004, our crude oil transportation and storage infrastructure consisted of:

9,167 kilometers of crude oil pipelines with an average daily throughput of approximately 2.0 million barrels; and

crude oil storage facilities with an aggregate storage capacity of approximately 13.9 million cubic meters.

We deliver crude oil to customers through our pipeline and storage facility network, through crude oil storage facilities that we lease from third parties and by ships leased by customers. In 2004, approximately 86.1% of our crude oil production was delivered to our refineries through our crude oil pipeline network. We believe that our crude oil pipeline network is sufficient for our current and anticipated transportation needs. During the past three years, we have not experienced any delays in delivering crude oil due to pipeline capacity constraints.

Our transportation and storage infrastructure also includes:

2,460 kilometers of refined product pipelines with an average daily throughput of approximately 28,243 tons; and

refined product storage facilities with a total storage capacity of approximately 16.6 million cubic meters.

Most of our refineries are located in the northeastern and northwestern regions of China. Our ability to distribute products through our own product distribution infrastructure to the eastern and southern regions will provide us with greater flexibility in supplying refined products to the domestic markets across China. We plan to continue to enhance our product distribution infrastructure in the northeastern, northwestern, northern and southwestern regions where we already have a significant market share, and to expand our product distribution infrastructure in the eastern and southern regions by acquiring and constructing transportation storage facilities and distribution storage facilities in these regions.

In October 2002, we completed the construction, and commenced the operation, of a refined product pipeline from Lanzhou, Gansu Province, to Chengdu, Sichuan Province and Chongqing Municipality. This pipeline connects Lanzhou Petrochemical Company directly with the southwestern region of China. In this region, there is a lack of crude oil resources and refining capacity, which has resulted in the demand for refined products significantly exceeding supply. This pipeline has a total length of 1,250 kilometers and a throughput capacity of five million tons of refined products per year.

Table of Contents

Together with the expansion of our service stations, we expect that our pipelines, primary storage and secondary distribution storage facilities will significantly enhance our existing distribution infrastructure for refined products. We believe that our enhanced distribution infrastructure will help us increase the sales of our refined products.

Competition

As an oil and gas company operating in a competitive industry, we compete in each of our business segments in both China and international markets for desirable business prospects and for customers. Our principal competitors in China are Sinopec, including its subsidiary China National Star Petroleum Corporation, or CNSPC, and China National Offshore Oil Corporation, or CNOOC.

Exploration and Production Operations

We are the largest onshore oil and gas company in China in terms of proved crude oil and natural gas reserves as well as crude oil and natural gas production and sales. However, we compete with Sinopec for the acquisition of desirable crude oil and natural gas prospects. We believe that our experience in crude oil and natural gas exploration and production and our advanced exploration technologies that are suitable for diverse geological conditions in China will enable us to maintain our dominant position in discovering and acquiring desirable crude oil and natural gas prospects in China.

Refining and Marketing and Chemicals and Marketing Operations

We compete directly with Sinopec in our refining and marketing and chemicals and marketing operations on the basis of price, quality and customer service. Most of our refineries and chemical plants are located in the northeastern, northwestern and northern regions of China where we have the dominant market share for refined products and chemical products. We also sell our refined products and chemical products in the eastern, southern, southwestern and central-southern regions of China, where our products have a considerable market share. The eastern and southern regions of China, where refined products and chemical products are in higher demand, are important markets for our refined products and chemical products. Sinopec has a strong presence in the eastern and southern regions of China in competition with us, and most of Sinopec's refineries, chemical plants and distribution networks are located in these regions in close proximity to these markets. We expect that we will continue to face competition from, among other competitors, Sinopec in increasing our refined products and chemical products sales in these regions. See Item 3 Key Information Risk Factors .

We also face competition from imported refined products and chemical products on the basis of price and quality. As a result of China's entry into the WTO, we expect that competition from foreign producers of refined products and chemical products may increase as tariff and non-tariff barriers for imported refined products and chemical products will be reduced or eliminated over time, including the opening over time of retail and wholesale markets in China for refined products and chemical products to foreign competition. Our ability to compete with foreign producers of refined products and chemical products will depend on our ability to reduce our production costs and improve the quality of our products. See Item 3 Key Information Risk Factors .

Natural Gas and Pipeline Operations

We are the largest supplier of natural gas in terms of volume of natural gas supplied. Currently, we face very limited competition in the supply of natural gas in Beijing Municipality, Tianjin Municipality, Hebei Province, Shanghai Municipality, Jiangsu Province, Zhejiang Province, Anhui Province, Henan Province, Hubei Province, Hunan Province and the northwestern regions of China, our existing principal markets for natural gas. Currently, Sinopec has natural gas fields in Sichuan Province and sells natural gas to users in that province. We, therefore, have limited competition from

Table of Contents

Sinopec in our markets in Sichuan Province. Further, we intend to expand our markets for natural gas into the coastal regions in eastern China where we may face competition from CNOOC and, to a lesser extent, Sinopec. We believe that our dominant natural gas resources base, our relatively advanced technologies and skills in managing long distance pipelines will enable us to continue to be a dominant player in the natural gas markets in China.

Environmental Matters

Together with other companies in the industries in which we operate, we are subject to numerous national, regional and local environmental laws and regulations concerning our oil and gas exploration and production operations, petroleum and petrochemical products and other activities. In particular, these laws and regulations:

require an environmental evaluation report to be submitted and approved prior to the commencement of exploration, production, refining and chemical projects;

restrict the type, quantities, and concentration of various substances that can be released into the environment in connection with drilling and production activities;

limit or prohibit drilling activities on certain lands lying within protected areas; and

impose criminal and civil liabilities for pollution resulting from oil, natural gas and petrochemical operations.

These laws and regulations may also restrict air emissions and discharges to surface and subsurface water resulting from the operation of natural gas processing plants, chemical plants, refineries, pipeline systems and other facilities that we own. In addition, our operations may be subject to laws and regulations relating to the generation, handling, storage, transportation, disposal and treatment of waste materials.

We anticipate that the environmental laws and regulations to which we are subject will become increasingly strict and are therefore likely to have an increasing impact on our operations. It is difficult, however, to predict accurately the effect of future developments in such laws and regulations on our future earnings and operations. Some risk of environmental costs and liabilities is inherent in certain of our operations and products, as it is with other companies engaged in similar businesses. We cannot assure you that material costs and liabilities will not be incurred. However, we do not currently expect any material adverse effect on our financial condition or results of operations as a result of compliance with such laws and regulations. We paid pollutant discharge fees of approximately RMB 113 million and RMB 155 million and RMB 182 million (US\$22 million) in 2002, 2003 and 2004, respectively.

To meet future environmental obligations, we are engaged in a continuous program to develop effective environmental protection measures. This program includes research on:

reducing sulphur levels in heavy fuel oil and diesel fuel;

reducing olefin and benzene content in gasoline and the quantity of emissions and effluents from our refineries and petrochemical plants; and

developing and installing monitoring systems at our facilities and developing environmental impact assessments for major projects.

Our capital expenditures on environmental programs in 2002, 2003 and 2004 were approximately RMB 1,363 million, RMB 1,076 million and RMB 1,345 million (US\$163 million), respectively.

On December 23, 2003, a gas blow-out incident occurred at our Luojia No. 16H gas well located in Kaixian County, Chongqing Municipality. The gas blow-out caused the leakage of a large quantity of sulfurated hydrogen, resulting in injuries and death to many residents living in the surrounding areas. The PRC government investigated this gas blow-out and found CNPC, who had provided

Table of Contents

drilling services to us for the Luojia No. 16H gas well, liable. This incident has not had, and we do not believe it will have, a material adverse effect on our results of operations and financial condition. Because a number of our production facilities are located in populated areas, we have established a series of preventative measures to improve the safety of our employees and surrounding residents and minimize disruptions or other adverse effects on our business. These measures include:

providing each household in areas surrounding our production facilities with printed materials to explain and illustrate safety and protection knowledge and skills; and

enhancing the implementation of various safety production measures we have adopted previously.

We believe that these preventative measures have helped minimize the possibility of similar incidents resulting in serious casualties and environmental consequences. In addition, the adoption of these preventative measures has not required significant capital expenditures to date, and therefore, will not have a material adverse effect on our results of operations and financial condition.

Legal Proceedings

We are not involved in any judicial and arbitral proceedings, the results of which, in the aggregate, would have a material adverse impact on our financial condition.

Properties

Under a restructuring agreement we entered into with CNPC on March 10, 2000 in connection with the restructuring of the CNPC group and the establishment of our company, CNPC undertook to us the following:

CNPC would use its best endeavours to obtain formal land use right certificates to replace the entitlement certificates in relation to the 28,649 parcels of land, which were leased or transferred to us from CNPC, within one year from August, September and October 1999 when the relevant entitlement certificates were issued;

CNPC would complete, within one year from November 5, 1999, the necessary governmental procedures for the requisition of the collectively owned land on which 116 service stations owned by us are located; and

CNPC would obtain individual building ownership certificates in our name for all of the 57,482 buildings transferred to the Company by CNPC, before November 5, 2000.

As of December 31, 2004, CNPC obtained formal land use right certificates for 26,549 of the 28,649 parcels of land and ownership certificates for some buildings. The necessary governmental procedures for the above-mentioned service stations located on collectively owned land have not been completed to date. Our directors confirm that the use of and the conduct of relevant activities at the above-mentioned parcels of land, service stations and buildings are not affected by the fact that the relevant land use right certificates or individual building ownership certificates have not been obtained or the fact that the relevant governmental procedures have not been completed. Our directors believe that this will not have any material adverse effect on our results of operations and financial condition.

We own substantially all of the equipment and production facilities relating to the business activities of all our segments. We hold production licenses covering all of our interests in developed and undeveloped acreage and productive crude oil and natural gas wells. See Exploration and Production Properties .

Table of Contents

Regulatory Matters

Overview

China's oil and gas industry is subject to extensive regulation by the PRC government with respect to a number of aspects of exploration, production, transmission and marketing of crude oil and natural gas as well as production, transportation and marketing of refined products and chemical products. The following central government authorities exercise control over various aspects of China's oil and gas industry:

The Ministry of Land and Resources has the authority for granting, examining and approving oil and gas exploration and production licenses, the administration of registration and transfer of exploration and production licenses.

The Ministry of Commerce, which was established in March 2003 to consolidate the authorities and functions of the former State Economic and Trade Commission and the former Ministry of Foreign Trade and Economic Cooperation:

sets the import and export volume quotas for crude oil and refined products according to the overall supply and demand for crude oil and refined products in China as well as the WTO requirements for China;

issues import and export licenses for crude oil and refined products to oil and gas companies that have obtained import and export quotas; and

examines and approves production sharing contracts and Sino-foreign equity and cooperative joint venture contracts.

The National Development and Reform Commission, which was established in March 2003 to consolidate the authorities and functions of the former State Development Planning Commission and the former State Economic and Trade Commission:

has the industry administration and policy coordination authority over China's oil and gas industry;

determines mandatory minimum volumes and applicable prices of natural gas to be supplied to certain fertilizer producers;

publishes guidance prices for natural gas and retail median guidance prices for certain refined products, including gasoline and diesel;

approves significant petroleum, natural gas, oil refinery and chemical projects set forth under the Catalogues of Investment Projects Approved by the Central Government; and

approves Sino-foreign equity and cooperative projects exceeding certain capital amounts.

Exploration Licenses and Production Licenses

The Mineral Resources Law authorizes the Ministry of Land and Resources to exercise administrative authority over the exploration and production of mineral resources within the PRC. The Mineral Resources Law and its supplementary regulations provide the basic legal framework under which exploration licenses and production licenses are granted. The Ministry of Land and Resources has the authority to issue exploration licenses and production licenses. Applicants must be companies approved by the State Council to engage in oil and gas exploration and production activities.

Applicants for exploration licenses must first register with the Ministry of Land and Resources blocks in which they intend to engage in exploration activities. The holder of an exploration license is obligated to make a progressively increasing annual minimum exploration investment relating to the exploration blocks in respect of which the license is issued. Investments range from RMB 2,000 per

Table of Contents

square kilometer for the initial year to RMB 5,000 per square kilometer for the second year, and to RMB 10,000 per square kilometer for the third and subsequent years. Additionally, the holder has to pay an annual exploration license fee that starts at RMB 100 per square kilometer for each of the first three years and increases by an additional RMB 100 per square kilometer per year for subsequent years up to a maximum of RMB 500 per square kilometer. The maximum term of an exploration license is seven years, subject to twice renewal upon expiration of the original term, with each renewal being for a two-year term. At the exploration stage, an applicant can also apply for a progressive exploration and production license that allows the holder to test and develop reserves not yet fully proven. The progressive exploration and production license has a maximum term of 15 years. Upon the reserves becoming proved for a block, the holder must apply for a full production license in order to begin production. In addition, the holder needs to obtain the right to use that block of land. Generally, the holder of a full production license must obtain a land use rights certificate for industrial land use covering that block of land.

The Ministry of Land and Resources issues production licenses to applicants on the basis of the reserve reports approved by the relevant authorities. Production license holders are required to pay an annual production right usage fee of RMB 1,000 per square kilometer. Administrative rules issued by the State Council provide that the maximum term of a production license is 30 years. However, in accordance with a special approval from the State Council, the Ministry of Land and Resources has issued production licenses effective March 2000 to PetroChina for all of its crude oil and natural gas reservoirs with terms coextensive with the projected productive life of those reservoirs, ranging up to 55 years. Production licenses to be issued to us in the future will be subject to the 30-year maximum unless we obtain additional special approvals from the State Council. Each of our production licenses is renewable upon our application 30 days prior to expiration. Oil and gas price increases may extend the productive life of our crude oil and natural gas reservoirs beyond the current terms of the relevant production licenses.

Among the major PRC oil and gas companies, PetroChina and Sinopec have exploration licenses and production licenses for the exploration and production of onshore crude oil and natural gas in China. CNOOC and Sinopec (through its subsidiary CNSPC) have exploration licenses and production licenses for the exploration and production of offshore crude oil and natural gas in China.

Pricing***Crude Oil***

PetroChina and Sinopec set their crude oil median prices each month based on the average Singapore market FOB prices for crude oil of different grades in the previous month. In addition, PetroChina and Sinopec negotiate a premium or discount to reflect transportation costs, the differences in oil quality and market supply and demand. The National Development and Reform Commission will mediate if PetroChina and Sinopec cannot agree on the amount of premium or discount.

Refined Products

Prior to October 2001, PetroChina set its retail prices based on the published retail median guidance prices of gasoline and diesel published by the State Development Planning Commission, the predecessor of the National Development and Reform Commission, with an allowable upward or downward adjustment of up to 5%. Since October 2001, PetroChina has set its retail prices within an 8% floating range of the published retail median guidance prices of gasoline and diesel. These retail median guidance prices of gasoline and diesel vary in each provincial level distribution region. Since October 2001, the National Development and Reform Commission has published the retail median guidance prices of gasoline and diesel from time to time based on the weighted average FOB Singapore, Rotterdam and New York trading prices for diesel and gasoline plus transportation costs

Table of Contents

and taxes. Generally, adjustments will be made only if the weighted average prices fluctuate beyond 8% of the previously published retail median guidance price.

PetroChina sets the wholesale prices for its gasoline and diesel on the basis of its retail prices and a discount to its retail prices of at least 5.5% as required by the National Development and Reform Commission.

In addition, the National Development and Reform Commission sets the ex-factory median prices for gasoline and diesel sold to the PRC government and other institutional customers, including airlines and railway operators. These ex-factory median prices are calculated with reference to the average FOB Singapore, Rotterdam and New York trading prices for gasoline and diesel in the previous month. PetroChina may set the prices it charges its customers on the basis of the ex-factory median prices set by the National Development and Reform Commission, which may be adjusted upward or downward up to 8%.

Chemical Products

PetroChina determines the prices of all of its chemical products.

Natural Gas

The price of natural gas has two components:

ex-factory price; and

pipeline transportation tariff.

Prior to January 2002, our natural gas price was comprised of wellhead price, pipeline transportation tariff and purification fee. In January 2002, the State Development Planning Commission, the predecessor of the National Development and Reform Commission, merged the purification fee into the wellhead price to establish a unified natural gas ex-factory price.

Ex-factory prices vary depending on whether or not the natural gas sold is within the government-formulated natural gas supply plan. For natural gas sold within the government-formulated supply plan, the National Development and Reform Commission fixes ex-factory prices according to the nature of the customers. Most of these customers are fertilizer producers.

For natural gas sold above the government-formulated natural gas supply plan, the National Development and Reform Commission publishes the median guidance ex-factory price with permissible upward or downward adjustments of 10% by the natural gas producer.

PetroChina negotiates the actual ex-factory price with commercial natural gas users and municipal governments within the adjustment range.

The National Development and Reform Commission sets the pipeline transportation tariff for the natural gas transported by pipelines constructed prior to 1991. For the natural gas transported by pipelines constructed after 1991, PetroChina submits to the National Development and Reform Commission for examination and approval proposed pipeline transmission tariffs based on the capital investment made in the pipeline, the depreciation period for the pipeline, the ability of end users to pay and PetroChina's profit margin.

Production and Marketing

Crude Oil

Each year, the National Development and Reform Commission publishes the projected target for the production and sale of crude oil by PetroChina, Sinopec and CNOOC, based on the domestic consumption estimates submitted by domestic producers, including PetroChina, Sinopec and CNOOC, the production capacity of these companies as well as the forecast of international crude

Table of Contents

oil prices. The actual production levels are determined by the producers themselves and may vary from the submitted estimates.

Refined Products

Previously, only PetroChina, Sinopec and joint ventures established by the two companies had the right to conduct gasoline and diesel wholesale business. Other companies, including foreign invested companies, were not allowed to engage in wholesale of gasoline and diesel in China's domestic market. In general, only domestic companies, including Sino-foreign joint venture companies, were permitted to engage in retail of gasoline and diesel. Since January 1, 2005 when Interim Measures on Administration over the Market of Refined Products became effective, all entities meeting certain requirements are allowed to submit applications to the Ministry of Commerce to conduct gasoline and diesel wholesale and retail businesses. See Item 3 Key Information Risk Factors for a discussion of the likely impact on the distribution of refined products in China after China's admission to the WTO.

Natural Gas

The National Development and Reform Commission publishes in each year the production targets for natural gas producers based on the annual production target prepared on the basis of consumption estimates submitted by all natural gas producers such as PetroChina. The National Development and Reform Commission also formulates the annual natural gas guidance supply plan, which requires natural gas producers to distribute a specified amount of natural gas to specified fertilizer producers. The actual production levels of natural gas, except the amount supplied to the fertilizer producers, are determined by the natural gas producers.

Foreign Investments***Cooperation in Exploration and Production with Foreign Companies***

Currently, only CNPC and Sinopec have the right to cooperate with foreign companies in onshore crude oil and natural gas exploration and production in China. CNOOC and Sinopec (through its subsidiary CNSPC) have the right to cooperate with foreign companies in offshore crude oil and natural gas exploration and production in China.

Sino-foreign cooperation projects and foreign parties in onshore oil and gas exploration and production in China are generally selected through open bids and bilateral negotiations. Those projects are generally conducted through production sharing contracts. The Ministry of Commerce must approve those contracts.

As authorized by the Regulations of the PRC on Exploration of Onshore Petroleum Resources in Cooperation with Foreign Enterprises, CNPC has the right to enter into joint cooperation arrangements with foreign oil and gas companies for onshore crude oil and natural gas exploration and production. PetroChina does not have the capacity to enter into production sharing contracts directly with foreign oil and gas companies under existing PRC law. Accordingly, CNPC will continue to enter into production sharing contracts. After signing a production sharing contract, CNPC will, subject to approval of the Ministry of Commerce, assign to PetroChina most of its commercial and operational rights and obligations under the production sharing contract as required by the Non-competition Agreement between CNPC and PetroChina. See Item 7 Major Shareholders and Related Party Transactions Contract for the Transfer of Rights under Production Sharing Contracts .

Transportation and Refining

The PRC regulations permit foreign minority ownership in pipeline transportation, oil storage facilities and oil jetties. There is no express general restriction on foreign investment in refineries and

Table of Contents

petrochemical facilities. However, construction of new refinery or ethylene facilities, expansion of existing refinery facilities and upgrading of existing ethylene facilities by increasing annual production capacity of more than 200 thousand tons are subject to the approval of relevant government authorities. The production of ethylene with an annual production capacity exceeding 600 thousand tons must be conducted by companies majority-owned by Chinese entities. Furthermore, when appropriate, projects must receive necessary approvals from relevant PRC government agencies. See Item 3 Key Information Risk Factors .

Import and Export

The import and export of crude oil and the export of refined products is subject to automatic filing and quota control in China. Currently, 25 companies are qualified to import crude oil and 120 companies are qualified to export refined products. The import of refined products was subject to quota and licensing control until the end of 2003. Since January 1, 2004, the import of refined products by state-owned entities has been exempted from import quota, licensing control and is subject to automatic filing control. The Ministry of Commerce sets the annual import and export volumes and quotas for crude oil and refined products by taking into account the supply and demand in China as well as the WTO requirements for China. The Ministry of Commerce is also responsible for issuing import and export licenses for products subject to quotas. Upon receiving quota allocation, refining companies or enterprises can import crude oil through State-authorized import companies. See Item 3 Key Information Risk Factors for a discussion of the expected opening of domestic markets to foreign competition in China.

The PRC government authorities have granted PetroChina the right to conduct crude oil and refined product import and export business. PetroChina holds quota to import and export crude oil and refined products, and conducts import and export of crude oil and refined products through its affiliates, China National United Oil Corporation and PetroChina International Co., Ltd., which are qualified to import and export crude oil and refined products.

Capital Investment and Financing

Capital investments in exploration and production of crude oil and natural gas made by Chinese oil and gas companies are subject to approval by or filing with relevant government authorities. The development of new oil field with an annual production capacity equal to or exceeding one million tons and new natural gas field with an annual production capacity equal to or exceeding two billion cubic meters is required to be approved by the National Development and Reform Commission. Any other development project of crude oil and natural gas needs to be filed with the National Development and Reform Commission. Oil and gas companies need to obtain approval from the National Development and Reform Commission and the State Administration of Foreign Exchange to borrow from foreign banks and foreign governments in connection with those capital investments.

Table of Contents**Taxation, Fees and Royalty**

PetroChina is subject to a variety of taxation, fees and royalty. The table below sets forth the various taxation, fees and royalty payable by PetroChina or by Sino-foreign oil and gas exploration and development cooperative projects. Since January 1, 2000, PetroChina and its wholly owned subsidiaries and branch companies have been taxed on a consolidated basis as approved by the Ministry of Finance and the State Taxation Bureau.

Tax item	Tax base	Tax Rate
<i>Corporate income tax</i>	Taxable income	Generally at a rate of 33%. However, our qualified branch companies in the west regions of the PRC are entitled to a rate of 15%. Tax concession or exemption enjoyed by any subsidiary or branch company continues to apply.
<i>Value-added tax</i>	Revenue	13% for liquefied natural gas, natural gas, agricultural film and fertilizers and 17% for other items. PetroChina charges value-added tax from its customers at the time of settlement on top of the selling prices of its products on behalf of the taxation authority. The value-added tax paid by PetroChina for purchasing materials to be consumed during the production process and for charges paid for drilling and other engineering services and labor are deducted from output value-added tax payable by PetroChina. 11% of the value-added tax paid in connection with export of gasoline is subject to rebate.
	Sales volume	5% for the Sino-foreign oil and gas exploration and development cooperative projects. However input value-added tax cannot be deducted.
<i>Business tax</i>	Revenue from transportation services	3%
<i>Consumption tax</i>	Aggregate volume sold or self-consumed	RMB 277.6 per ton for gasoline; since January 1, 1999, RMB 388.64 per ton for leaded gasoline. RMB 117.6 per ton for diesel All consumption taxes paid in connection with export of gasoline are subject to a full rebate.
<i>Resource tax</i>	Aggregate volume sold or self-consumed	RMB 8 to 30 per ton for crude oil RMB 2 to 15 per thousand cubic meter for natural gas The actual applicable rate for each oil field may differ depending on the resource

differences, volume of the exploration and production activities and costs required for the production at the particular oil field.

Table of Contents

Tax item	Tax base	Tax Rate
<i>Compensatory fee for mineral resources</i>	Revenue	1% for crude oil and natural gas
<i>Exploration license fee</i>	Area	RMB 100 to 500 per square kilometer per year
<i>Production license fee</i>	Area	RMB 1,000 per square kilometer per year
<i>Royalty fee⁽¹⁾</i>	Production volume	Progressive rate of 0-12.5% for crude oil and 0-3% for natural gas

⁽¹⁾ Payable only by Sino-foreign oil and gas exploration and development cooperative projects. The project entity of those cooperative projects is not subject to any other resource tax or fee.

The PRC Highway Law, as amended on October 31, 1999, provides that the PRC government will collect funds for highway maintenance by imposing fuel taxes. The State Council will formulate specific implementation methods and procedures for the imposition of fuel tax. The State Council has not yet announced or published any specific rate, implementation method or procedure for the imposition of the tax.

Environmental Regulations

China has adopted extensive environmental laws and regulations that affect the operation of the oil and gas industry. There are national and local standards applicable to emissions control, discharges to surface and subsurface water, and the generation, handling, storage, transportation, treatment and disposal of waste materials.

The environmental regulations require a company, such as us, to register or file an environmental impact report with the relevant environmental bureau for approval before it undertakes any construction of a new production facility or any major expansion or renovation of an existing production facility. The new facility or the expanded or renovated facility will not be permitted to operate unless the relevant environmental bureau has inspected to its satisfaction that environmental equipment that satisfies the environmental protection requirements has been installed for the facility. A company that wishes to discharge pollutants, whether it is in the form of emission, water or materials, must submit a pollutant discharge declaration statement detailing the amount, type, location and method of treatment. After reviewing the pollutant discharge declaration, the relevant environmental bureau will determine the amount of discharge allowable under the law and will issue a pollutant discharge license for that amount of discharge subject to the payment of discharge fees. If a company discharges more than is permitted in the pollutant discharge license, the relevant environmental bureau can fine the company up to several times the discharge fees payable by the offending company for its allowable discharge, or require the offending company to close its operation to remedy the problem.

ITEM 5 OPERATING AND FINANCIAL REVIEW AND PROSPECTS

General

You should read the following discussion together with our consolidated financial statements and their notes included elsewhere in this annual report. Our consolidated financial statements have been prepared in accordance with IFRS, which differ in many material respects from US GAAP. Note 35 to our consolidated financial statements included elsewhere in this annual report and the section headed "Other Information - US GAAP Reconciliation" summarize the significant differences between IFRS and US GAAP as they relate to us.

In accordance with an acquisition agreement between CNPC and us dated September 26, 2002, we acquired from CNPC the assets, liabilities and interests related to CNPC's refined products marketing enterprises consisting primarily of service stations and related facilities for RMB 3,200 million. Under IFRS, the acquisition is a combination of entities under common control since the CNPC's refined products marketing enterprises and us are under the common control of CNPC. As a result, we have accounted for the acquisition in a manner similar to a uniting of interests, whereby the assets and liabilities of the marketing enterprises acquired are accounted for at historical cost to CNPC with net liabilities of RMB 2,956 million at the effective date. Our prior years' consolidated financial statements were restated in 2002 to give effect to the acquisition in such periods as if the operations of our company and these marketing enterprises have always been combined in such periods. The difference between RMB 3,200 million paid and the net liabilities transferred from CNPC has been adjusted against equity. See "Acquisition of Certain Refined Products Marketing Enterprises from CNPC".

Overview

We are engaged in a broad range of petroleum and natural gas related activities, including:

the exploration, development, production and sale of crude oil and natural gas;

the refining, transportation, storage and marketing of crude oil and petroleum products;

the production and marketing of basic petrochemical products, derivative chemical products and other chemical products; and

the transmission and storage of crude oil, refined products and natural gas as well as sale of natural gas.

We are China's largest producer of crude oil and natural gas and are one of the largest companies in China in terms of sales. In the year ended December 31, 2004, we produced approximately 777.4 million barrels of crude oil and approximately 837.5 billion cubic feet of natural gas for sale. Our refineries also processed approximately 697.8 million barrels of crude oil in the year ended December 31, 2004. In the year ended December 31, 2004, we had total revenue of RMB 388,633 million (US\$46,956 million) and net income of RMB 102,927 million (US\$12,436 million).

Effective January 1, 2001, our pipeline operations were transferred from the refining and marketing segment to the natural gas segment, which was subsequently renamed as the natural gas and pipeline segment. Accordingly, our results of operations, together with the corresponding assets and liabilities, of certain pipeline operations are reclassified from the refining and marketing segment to the natural gas and pipeline segment to reflect the changes in the manner under which these operations are managed.

Factors Affecting Results of Operations

Our results of operations and the period-to-period comparability of our financial results are affected by a number of external factors, including changes in the prices of crude oil, refined products, natural gas and chemical products, decrease in our crude oil reserves in China and fluctuations in exchange rates and interest rates.

Table of Contents**Crude Oil Prices**

Our results of operations are substantially affected by crude oil prices. From June 1998 to March 2001, the PRC government published benchmark prices for crude oil in China which were adjusted on a monthly basis to equal Singapore market FOB prices for similar grades of crude oil, supplemented by an amount equal to the customs duty payable on the import of crude oil. Since March 2001, the PRC government has ceased publishing benchmark prices for crude oil in China and we and Sinopec have set our crude oil median prices monthly based on the Singapore market FOB prices for crude oil. Our actual realized crude oil prices include a premium on, or discount from, the median prices which primarily reflects transportation costs, differences in oil quality and market supply and demand conditions.

Prior to September 1, 1999, the premiums and discounts applied to our crude oil sales were largely determined through negotiations between CNPC and Sinopec, our largest customer. Since September 1, 1999, these discounts and premiums have been determined in accordance with a crude oil premium and discount calculation agreement and its supplemental agreement we entered into with Sinopec. These agreements establish premiums and discounts which effect adjustments to the benchmark prices. These agreements do not obligate either party to purchase or sell any crude oil and is thus subject to renegotiation. Under these agreements, the National Development and Reform Commission, formerly the State Development Planning Commission, will mediate if we cannot agree with Sinopec on the premium or discount applicable to a particular crude oil purchase. The table below sets forth the median prices for our principal grades of crude oil in 2002, 2003 and 2004 and the negotiated premiums and discounts applicable to those grades of crude oil since June 2001.

Grade of crude oil	Benchmark	Median prices for principal grades of crude oil (RMB/barrel)			Premium/(discount) (RMB/barrel)			
		Year 2002 average	Year 2003 average	Year 2004 average	June 2001- June 2002	July 2002- December 2002	January 2003- December 2003	Since January 2004
Daqing	Minas	198.7	240.8	300.7	0.9	0	0.3	0
Jidong	Minas	198.7	240.8	300.7	0.9	0	0.3	0
Huabei	Minas	198.7	240.8	300.7	1.6	1.3	1	1.3
Dagang	Cinta	192.6	237.0	290.5	1.7	1.4	1.4	1.4
Tarim	Minas	198.7	240.8	300.7	30.4	34.6	33.7	34.6
Tuha	Tapis	203.9	247.0	329.2	25.1	25.5	25.5	25.5

In 2004, the median prices for our principal grades of crude oil and crude oil produced in our Daqing oil region were RMB 295.8 per barrel and RMB 300.7 per barrel, respectively.

Increases or decreases in the price of crude oil in China have a significant effect on the revenue from our exploration and production segment. In the year ended December 31, 2004, our average realized selling price for crude oil was RMB 280 (US\$33.88) per barrel, increased by 24.4% from RMB 225 per barrel in the year ended December 31, 2003. As a result, the revenue from our exploration and production segment increased 25.4% from RMB 177,271 million in the year ended December 31, 2003 to RMB 222,305 million (US\$26,860 million) in the year

ended December 31, 2004. See Item 4 Information on the Company Regulatory Matters Pricing for a more detailed discussion of current PRC crude oil pricing regulations.

Refined Product Prices

Until June 5, 1998, the State Development Planning Commission, the predecessor of the National Development and Reform Commission, set wholesale and retail prices for our major refined products (gasoline, diesel and kerosene). However, during the first six months of 1998, due to then prevailing market conditions and increased smuggling of refined products, actual wholesale prices in the refined products market were lower than the wholesale prices set by the PRC government. In

Table of Contents

June 1998, the State Development Planning Commission pegged the prices of refined products of gasoline and diesel to the FOB Singapore trading prices, supplemented by transportation costs, customs duties, insurance charges, taxes and retail margins. Prior to October 2001, the State Development Planning Commission published from time to time retail median gasoline and diesel guidance prices for major cities and provinces. Once published, the retail median prices remained unchanged until either we or Sinopec requested an adjustment and demonstrated that the cumulative change of the FOB Singapore gasoline or diesel trading price from the then applicable retail median guidance price exceeded 5%. Since October 2001, the State Development Planning Commission or the National Development and Reform Commission has adjusted such retail median prices from time to time to reflect the FOB Singapore, Rotterdam and New York trading prices for gasoline and diesel, supplemented by transportation costs and taxes. See Item 4 Information on the Company Regulatory Matters Pricing for a more detailed discussion of current PRC refined products pricing regulations.

Prior to October 2001, based on the published median gasoline and diesel guidance prices, we and Sinopec set our respective retail prices with an allowable upward or downward adjustment of up to 5% in individual markets. Since October 2001, we and Sinopec have set our retail prices within an 8% floating range of the published median gasoline and diesel guidance prices. We determine the prices of other refined products with reference to the published median guidance prices of gasoline and diesel. Our retail prices may differ from those of Sinopec within a given market. Our average realized selling prices tend to be higher in the western and northern regions of China, where we dominate the market, as compared to our average realized selling prices in the eastern and southern regions, where Sinopec has a stronger presence.

The following table sets forth the retail median prices for 90(#) gasoline and 0(#) diesel published by the State Development Planning Commission or the National Development and Reform Commission from January 2004 to December 2004 when such adjustments were made.

Date	90(#)	0(#)
	Gasoline	Diesel
	(RMB/ton)	(RMB/ton)
March 31, 2004	4,032	
May 18, 2004		3,590
August 25, 2004	4,272	3,810

Chemical Product Prices

We determine and set the prices of all chemical products produced by our chemicals business segment.

Natural Gas Prices

Prior to January 2002, our natural gas price was comprised of wellhead price, pipeline transportation tariff and purification fee. Since January 2002, the State Development Planning Commission, the predecessor of the National Development and Reform Commission, has merged the purification fee into the wellhead price to establish a unified natural gas ex-factory price. As a result of the price merger, our natural gas price is comprised of the following two components:

Ex-factory Price. We set our ex-factory price within a 10% floating range of the median ex-factory price published by the National Development and Reform Commission, except for natural gas sold within the PRC government's natural gas supply plan, which must be sold at prices determined by the National Development and Reform Commission; and

Pipeline Transportation Tariff. The National Development and Reform Commission sets the pipeline transportation tariff for natural gas transported by pipelines constructed prior to 1991. For natural gas transported by pipelines constructed after 1991, we prepare a tariff schedule

Table of Contents

based on our actual cost plus a profit margin and submit it to the National Development and Reform Commission for approval.

We sell our natural gas at prices which exceed our production and transportation costs.

The results of operations of these segments will be impacted to the extent that our prices do not vary to reflect increases or decreases in our costs. See Item 4 Information on the Company Regulatory Matters Pricing for a further discussion of these pricing controls.

Foreign Currency Exposure

For a discussion of the effect of exchange rate fluctuations on our results of operations, please see Item 11 Quantitative and Qualitative Disclosures About Market Risk Foreign Exchange Rate Risk .

Interest Rate Exposure

For a discussion of the effect of interest rate changes on our results of operations, please see Item 11 Quantitative and Qualitative Disclosures About Market Risk Interest Rate Risk .

Critical Accounting Policies

The preparation of our consolidated financial statements requires our management to select and apply significant accounting policies, the application of which may require management to make judgments and estimates that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities as of the date of our financial statements, and the reported amounts of revenue and expenses during the reporting period. Notwithstanding the presentation of our principal accounting policies in Note 3 to our consolidated financial statements included elsewhere in this annual report, we have identified the accounting policies below as most critical to our business operations and the understanding of our financial condition and results of operations presented in accordance with IFRS. Although these estimates are based on our management's best knowledge of current events and actions, actual results ultimately may differ from those estimates.

Accounting of Oil and Gas Exploration and Development Activities

We use successful efforts method of accounting, with specialized accounting rules that are unique to the oil and gas industry, for oil and gas exploration and production activities. Under this method, geological and seismic costs incurred are expensed prior to the discovery of proved reserves. However, all costs for developmental wells, support equipment and facilities, and mineral interests in oil and gas properties are capitalized. Costs of exploratory wells are capitalized as construction in progress pending determination of whether the wells find proved reserves. The costs of exploratory wells will be further capitalized pending determination of whether the wells find sufficient economically exploitable reserves. For exploratory wells located in regions that do not require substantial capital expenditures before the commencement of production, the evaluation of the economic benefits of the reserves in such wells will be completed within one year following the completion of the exploration drilling. Where such evaluation indicates that no economic benefits can be obtained, the relevant costs of exploratory wells will be converted to dry hole exploration expenses. For exploratory wells that find economically exploitable reserves located in regions that require substantial capital expenditures even before the commencement of production, the costs of such exploratory wells will not be further capitalized until further exploratory work is in progress or a decision is made to commence such explanatory work. Otherwise, the costs of such exploratory wells will be converted to dry hole exploration expenses. We have never capitalized any costs related to our oil and natural assets that incurred prior the proof of relevant reserves.

Table of Contents***Oil and Gas Reserves***

The estimation of the quantities of recoverable oil and gas reserves in oil and gas fields is integral to effective management of our exploration and production operations. Because of the subjective judgments involved in developing and assessing such information, engineering estimates of the quantities of recoverable oil and gas reserves in oil and gas fields are inherently imprecise and represent only approximate amounts.

Before estimated oil and gas reserves are designated as proved, certain engineering criteria must be met in accordance with industry standards and the regulations of the United States Securities and Exchange Commission. Proved oil and gas reserves are the estimated quantities of crude oil, natural gas and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions. Therefore, these estimates do not include probable or possible reserves. Our proved reserve estimates are updated annually by an independent, qualified and experienced oil and gas reserve engineering firm in the United States. Our oil and gas reserve engineering department has policies and procedures in place to ensure that these estimates are consistent with these authoritative guidelines. Among other factors as required by authoritative guidelines, this estimation takes into account recent information about each field, including production and seismic information, estimated recoverable reserves of each well, and oil and gas prices and operating costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not on escalations based upon future conditions. Therefore, as prices and cost levels change from year to year, the estimate of proved reserves also changes. We have no costs of unproved properties capitalized in oil and gas properties.

Despite the inherent imprecision in these engineering estimates, estimated proved oil and gas reserve quantity has a direct impact on certain amounts reported in the financials statements. In addition to the capitalization of costs related to oil and gas properties on the balance sheet discussed earlier, estimated proved reserves also impact the calculation of depreciation, depletion and amortization expenses of oil and gas properties. The cost of oil and gas properties is amortized at the field level on the unit of production method. Unit of production rates are based on the total oil and gas reserves estimated to be recoverable from existing facilities based on the current terms of our production licenses. Our reserve estimates include only crude oil and natural gas which management believes can be reasonably produced within the current terms of the production licenses that are granted by the Ministry of Land and Resources, ranging from 30 years to 55 years from the effective date of issuance in March 2000, renewable upon application 30 days prior to expiration. Consequently, the impact of changes in estimated proved reserves is reflected prospectively by amortizing the remaining book value of the oil and gas property assets over the expected future production. If proved reserve estimates are revised downward, earnings could be effected by higher depreciation expense or an immediate write-down of the property's book value had the downward revisions been significant. See

Property, Plant and Equipment below. Given our large number of producing properties in our portfolio, and the estimated proved reserves, it is unlikely that any changes in reserve estimates will have a significant effect on prospective charges for depreciation, depletion and amortization expenses.

We did not incur and do not anticipate to incur any material dismantlement, restoration or abandonment cost given the nature of our onshore producing activities and current PRC regulations governing such activities.

In addition, due to the importance of these estimates to better understanding the perceived value and future cash flows of a company's oil and gas operations, we have also provided supplemental disclosures of proved oil and gas reserve estimates prepared in accordance with authoritative guidelines elsewhere in this annual report.

Table of Contents***Property, Plant and Equipment***

We record property, plant and equipment, including oil and gas properties, initially at cost less accumulated depreciation, depletion and amortization. Cost represents the purchase price of the asset and other costs incurred to bring the asset into existing use. Subsequent to their initial recognition, property, plant and equipment are carried at revalued amount, being the estimated fair value at the date of the revaluation less accumulated depreciation and impairment losses. Revaluations are performed by independent qualified valuers on a regular basis to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the balance sheet date. Revaluation surpluses pertaining to revalued assets depreciated or disposed of are retained in the revaluation reserve and will not be available to offset against possible future revaluation losses. As disclosed in Note 16 to our consolidated financial statements included elsewhere in this annual report, our property, plant and equipment, excluding oil and gas reserves, were revalued as of June 30, 1999. Subsequently, our refining and chemical production equipment was revalued as of September 30, 2003.

Depreciation, depletion and amortization to write off the cost or valuation of each asset, other than oil and gas properties, to its residual value is calculated using the straight-line method over the estimated useful live of such asset as follows:

Land and buildings	25-50 years
Plant and machinery	10-15 years
Equipment and motor vehicles	3-16 years

We do not provide depreciation for construction in progress until it is completed and ready for use.

The useful lives of non-oil-and-gas properties are estimated at the time these purchases are made after considering future changes, business developments and our strategies. Estimated production lives for oil and gas properties are also made after considering the specific factors discussed under *Oil and Gas Reserves* above. Should there be unexpected adverse changes in these circumstances or events, which include, among others, declines in projected operating results and negative industry or economic trends we would be required to assess the need to shorten the useful lives and/or make impairment provisions.

In performing this impairment assessment, we review internal and external sources of information to identify indications of these unexpected adverse changes. The sources utilized to identify indications of impairment are often subjective in nature and require us to use judgment in applying such information to our businesses. Our interpretation of this information has a direct impact on whether an impairment assessment is performed as at any given balance sheet date. Such information is particularly significant as it relates to our oil and gas properties. If an indication of impairment is identified, the recoverable amount of each cash generating unit is estimated, which is the higher of its net selling price and its value in use, which is the estimated net present value of future cash flows to be derived from the continuing use of the asset and from its ultimate disposal. To the extent the carrying amount of a cash generating unit exceeds the recoverable amount, an impairment loss is recognized in the income statement.

Depending on our assessment of the overall materiality of the asset under review and complexity of deriving reasonable estimates of the recoverable value, we may perform such assessment utilizing internal resources or we may engage external advisors to advise us in making this assessment. Regardless of the resources utilized, we are required to make many assumptions in making this assessment, including our utilization of such asset, plans to continue to produce and develop proved and associated probable or possible reserves, the cash flows to be generated based on assumptions for future commodity prices and development costs, appropriate market discount rates and the projected market and regulatory conditions. Changes in any of these assumptions could result in a material change to future estimates of the recoverable value of any asset.

Table of Contents***Impairment of Accounts Receivable***

Accounts receivables are stated at cost less provision for impairment. Accounts where there are indications that a receivable may be impaired or not collectible, a provision would be recorded based on best estimates to reduce the receivable balance to the amount that is expected to be collected. Factors considered in making a provision include the historical payment and collection experience, debtors' credit worthiness and appropriate discount rates. The recording of provisions requires the application of judgments about the ultimate resolution of these accounts receivable. As a result, provisions are reviewed at each balance sheet date and adjusted to reflect our current best estimates.

Deferred Tax Assets

We are required to exercise considerable judgment in making provisions for deferred tax under the liability method. Under this method, deferred income tax is provided for temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes. Specifically, we must make estimates of projected capital expenditures to be incurred and the resulting incremental timing difference that such capital expenditures would generate for the determination of the amount of temporary difference that will be recovered. We use currently enacted tax rates to determine deferred income tax. If these rates change, we would have to adjust our deferred tax in the period in which these changes happen through the income statement.

The principal temporary differences arise from depreciation on oil and gas properties and equipment and allowances for impairment of receivables, inventories, investments and property, plant and equipment. Deferred tax assets relating to the carry-forward of unused tax losses are recognized to the extent that it is probable that future taxable income will be available against which the unused tax losses can be utilized.

Revenue Recognition

Sales are recognized upon delivery of products and customer acceptance, if any, or performance of services, net of sales taxes and discounts. Revenues are recognized only when we have transferred to the buyer the significant risks and rewards of ownership of the goods, and when the amount of revenue and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

We sell part of the natural gas produced by us under take-or-pay contracts entered into with our customers. Customers who entered into such a take-or-pay contract are required to buy or pay for the minimum amount of natural gas specified in the contract. Revenues from the sale and transportation of natural gas under take-or-pay contracts are recognized under the above accounting policies. Any advance payment for natural gas that has not been consumed will be recorded as deferred revenue until the natural gas has been actually consumed.

We entered into a Crude Oil Mutual Supply Framework Agreement with Sinopec, which can be characterized as a buy/sell contract, and recognized the revenue derived from this agreement in our consolidated statements of income. Since the transactions under the agreement are separately invoiced and settled and cannot be offset with each other, they were not treated as non-monetary transactions as defined in APB Opinion No. 29 Accounting for Non-monetary transactions. In February 2005, the U.S. Securities and Exchange Commission issued a letter to the oil and gas industry requesting additional disclosures regarding buy/sell contracts. Accordingly, we have reviewed such transactions and estimated that, if we are required to report the net amount of such buy/sell contracts, our reported amount in the line items of Sales and other operating revenues and Purchase, services and other for the year ended December 31, 2004 would be reduced by RMB 2,217 million (US\$268 million) and RMB 2,217 million (US\$268 million), respectively. No change will occur to our net income as a result of this.

Table of Contents

In addition to the above significant accounting policies and estimates, in connection with the preparation and reconciliation of our financial statements in accordance with US GAAP, we believe the following additional accounting estimate is also critical.

One-time Remedial Payments for Staff Housing

As disclosed in Note 35(c) to our consolidated financial statements included elsewhere in this annual report, certain of our employees who joined the workforce prior to December 31, 1998 and have housing conditions below local standards are to be reimbursed for such differences. These one-time remedial payments have been borne or are to be borne by our State-owned shareholder, CNPC. Under IFRS, such direct payments to employees or reimbursements will not be recorded in our consolidated income statement. US GAAP contain no such exemption but require this principal shareholder's action on our behalf to be recorded in the consolidated income statement. During the year ended December 31, 2002, we and CNPC completed the process of estimating the amounts payable to qualified employees at the level of the affected business units as a whole. We have reflected this best available estimate of such payments in determining our net income for the year ended December 31, 2002, under US GAAP. Since this amount is borne by our State-owned shareholder, a corresponding amount has been included as an addition to the other reserves in our shareholders' equity. This estimate did not significantly change in 2003 and 2004. The estimation process of such payments down to level of the individual employees is still on going. Actual results may differ from these estimates at the time when more information becomes available.

For detailed discussions of significant differences between IFRS and US GAAP, see Note 35 to our consolidated financial statements included elsewhere in this annual report and the section headed "Other Information - US GAAP Reconciliation" below.

Acquisitions***Acquisitions of Overseas Assets***

In April 2002, we acquired Devon Energy Indonesia Limited from Devon Energy Corporation for a price of RMB 2,068 million (US\$250 million). Devon Energy Indonesia Limited holds interests in a number of crude oil and natural gas exploration and production project in Indonesia, including a 30% interest in an oil and gas production sharing contract relating to the Jabung block located in Sumatra, Indonesia. In April 2003, we acquired a 50% equity interest in Amerada Hess Indonesia Holdings Limited, which holds a 30% interest in the oil and gas production sharing contract relating to the Jabung block, for a price of RMB 679 million (US\$82 million).

In June 2005, we entered into a capital contribution agreement to acquire a 50% interest in Newco, one of CNODC's subsidiaries, for a consideration of RMB 20,741 million (US\$2,506 million) which will be paid to Newco as our capital contribution. Upon consummation of the transaction, we will own a 50% interest in certain overseas oil and gas assets transferred by CNODC to Newco. We expect to complete the acquisition by December 2005, subject to completion of all necessary procedures for transferring the relevant overseas assets of CNODC to Newco, approval by our minority shareholders, applicable government approvals and certain other conditions set out in the capital contribution agreement. We also entered into a transfer agreement to transfer all of our interest in PetroChina International Limited to Newco for a consideration of RMB 579 million (US\$70 million). See "Item 4 - Information on the Company - Introduction - History and Development of the Company - Overview of Our Operations."

Upon completion of the acquisition and transfer, we will obtain control over Newco by having the right to appoint four of the seven directors. Our investment in Newco and the transfer of PetroChina International Limited to Newco will be accounted for in a manner similar to a uniting of interests since these transactions are among entities under common control by CNPC. Our consolidated financial statements will be restated as if operations of PetroChina and Newco had always been combined.

Table of Contents

We plan to continue to pursue attractive opportunities outside China as part of our business growth strategy to utilize both domestic and international resources to strengthen our competitiveness. As we continue to implement this strategy, we expect that acquisitions of overseas assets will over time have a material effect on our results of operations and financial condition.

Acquisition of Certain Refined Products Marketing Enterprises from CNPC

In accordance with an acquisition agreement between CNPC and us dated September 26, 2002, we acquired from CNPC the assets, liabilities and interests related to CNPC's refined products marketing enterprises consisting primarily of service stations and related facilities for RMB 3,200 million. The acquisition price was determined on the basis of independent valuation and appraisals of the assets and liabilities of these marketing enterprises under applicable rules and regulations promulgated in the PRC. Of the RMB 3,200 million in purchase price, RMB 430 million was paid in cash, RMB 1,124 million was set off against receivables from CNPC, and the remaining balance of RMB 1,646 million was included as payables to CNPC as of December 31, 2003.

Under IFRS, the acquisition is a combination of entities under common control since the CNPC's refined products marketing enterprises and us are under the common control of CNPC. As a result, we have accounted for the acquisition in a manner similar to a uniting of interests, whereby the assets and liabilities of the marketing enterprises acquired are accounted for at historical cost to CNPC with net liabilities of RMB 2,956 million at the effective date. Our prior years' consolidated financial statements were restated in 2002 to give effect to the acquisition in these periods as if the operations of our company and these marketing enterprises have always been combined in these periods. The difference between RMB 3,200 million paid and the net liabilities transferred from CNPC has been adjusted against equity.

Operating Results

The following discussion is based on our historical results of operations. As a result of the factors discussed above, such results of operations may not be indicative of our future operating performance.

Our income statement for each of the three years ended December 31, 2002, 2003 and 2004 is summarized in the table below.

	Year ended December 31,			
	2002	2003	2004	2004
	in million RMB	in million RMB	in million RMB	in million US\$
Total revenues	244,424	303,779	388,633	46,956
Operating expenses	(172,083)	(204,593)	(242,047)	(29,245)

Year Ended December 31, 2004 Compared to Year Ended December 31, 2003**Consolidated Results of Operation****Overview**

For the year ended December 31, 2004, our total revenue was RMB 388,633 million (US\$46,956 million), representing an increase of 27.9% from the year ended December 31, 2003. Our net income in the year ended December 31, 2004 was RMB 102,927 million (US\$12,436 million), increased 47.9% from the year ended December 31, 2003. For the first time since our initial public offering in April 2000, we realized a net income of more than RMB100,000 million. Our basic and diluted earnings per share for the year ended December 31, 2004 was

RMB 0.59, representing an increase of 47.9% from RMB 0.40 for the year ended December 31, 2003.

Total Revenue. Total Revenue increased 27.9% from RMB 303,779 million for the year ended December 31, 2003 to 388,633 million (US\$46,956 million) for the year ended December 31, 2004. The increase was due primarily to increases in our realized selling prices of crude oil, gasoline, diesel and chemical products, as well as increases in the sales volume of natural gas, refined products and chemical products. The average realized selling price for crude oil increased 24.6%

Table of Contents

from US\$27.20 per barrel for the year ended December 31, 2003 to US\$33.88 per barrel for the year ended December 31, 2004.

Operating Expenses. Operating expenses increased 18.3% from RMB 204,593 million for the year ended December 31, 2003 to RMB 242,047 million (US\$29,245 million) for the year ended December 31, 2004. This increase was due primarily to (i) a 28.1% increase in purchases, services and other expenses, (ii) a 14.2% increase in employee compensation costs, (iii) a 10.8% increase in exploration expenses, (iv) a 14.5% increase in depreciation, depletion and amortization and (v) a 17.7% increase in taxes other than income tax.

Purchases, Services and Other Expenses. Purchases, services and other expenses increased 28.1% from RMB 90,850 million for the year ended December 31, 2003 to RMB 116,353 million (US\$14,058 million) for the year ended December 31, 2004. This increase was due primarily to increases in our purchase expenses of crude oil, refined products and chemical products associated with increases in the prices and purchase volume of crude oil and refined products as well as increases in the purchase volume of chemical products as we increased our production and sales of these products in 2004. In 2004, we purchased 121.8 million barrels of crude oil, 12.0 million tons of refined products and 990 thousand tons of chemical products, as compared to 89.5 million barrels of crude oil, 9.6 million tons of refined products and 27 thousand tons of chemical products in 2003.

Employee Compensation Costs. Employee compensation costs increased 14.2% from RMB 19,542 million for the year ended December 31, 2003 to RMB 22,309 million (US\$2,695 million) for the year ended December 31, 2004. This increase was due primarily to an increase of RMB 2,033 million in salaries and other benefits and an increase of RMB 691 million in employee compensation costs as a result of the expansion of our retail distribution network.

Depreciation, Depletion and Amortization. Depreciation, depletion and amortization increased 14.5% from RMB 40,531 million for the year ended December 31, 2003 to RMB 46,411 million (US\$5,608 million) for the year ended December 31, 2004. This increase was due primarily to an increase of RMB 4,530 million in depreciation and depletion relating to the newly acquired assets.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased 10.2% from RMB 23,930 million for the year ended December 31, 2003 to RMB 26,377 million (US\$3,187 million) for the year ended December 31, 2004. This increase was due primarily to an increase of RMB 1,230 million in transportation expenses a result of our increased sales volume of refined products and an increase of RMB 760 million in repairment expenses.

Exploration Expenses. Exploration expenses increased 10.8% from RMB 10,577 million for the year ended December 31, 2003 to RMB 11,723 million (US\$1,416 million) for the year ended December 31, 2004. This increase was due primarily to increased expenditures in exploration activities for the purpose of increasing our crude oil and gas reserves.

Expenses Relating to the Shutting Down of Manufacturing Facilities and Units. Expenses relating to shutting down of manufacturing facilities and units decreased by 90.7% from RMB 2,355 million for the year ended December 31, 2003 to RMB 220 million (US\$27 million) for the year ended December 31, 2004. The expenses related to shutting down low efficiency assets in our refining and marketing segment and our chemicals and marketing segment in 2004 amounted to RMB 192 million and RMB 28 million, respectively.

Taxes Other than Income Taxes. Taxes other than income taxes increased 17.7% from RMB 15,879 million for the year ended December 31, 2003 to RMB 18,685 million (US\$2,258 million) for the year ended December 31, 2004. This increase was due primarily to an increase of RMB 1,201 million in consumption tax as a result of increased sales volume of gasoline and diesel and an increase of RMB 272 million in resources compensation fees as a result of increased revenues of crude oil.

Table of Contents

Income From Operations. As a result of the factors discussed above, income from operations increased 47.8% from RMB 99,186 million for the year ended December 31, 2003 to RMB 146,586 million (US\$17,711 million) for the year ended December 31, 2004.

Net Exchange Loss. Net exchange loss decreased 59.4% from RMB 180 million for the year ended December 31, 2003 to RMB 73 million (US\$9 million) for the year ended December 31, 2004. This decrease was due primarily to a decrease in the average outstanding balance of foreign exchange borrowings in 2004.

Net Interest Expense. Net interest expense decreased 28.3% from RMB 1,669 million for the year ended December 31, 2003 to RMB 1,196 million (US\$144 million) for the year ended December 31, 2004. This decrease was due primarily to a decrease in the average outstanding balance of interest-bearing debts as a result of sufficient cashflow derived from operating activities.

Income Before Income Taxes. Income before income taxes increased 49.7% from RMB 98,322 million for the year ended December 31, 2003 to RMB 147,141 million (US\$17,778 million) for the year ended December 31, 2004.

Income Taxes. Income taxes increased 51.6% from RMB 28,072 million for the year ended December 31, 2003 to RMB 42,563 million (US\$5,143 million) for the year ended December 31, 2004, due primarily to an increase in income before income taxes.

Net Income. As a result of the factors discussed above, net income increased 47.9% from RMB 69,614 million for the year ended December 31, 2003 to RMB 102,927 million (US\$12,436 million) for the year ended December 31, 2004.

Exploration and Production

Sales and Other Operating Revenue. Sales and other operating revenue increased 25.4% from RMB 177,271 million for the year ended December 31, 2003 to RMB 222,305 million (US\$26,860 million) for the year ended December 31, 2004. This increase resulted primarily from an increase in the average realized selling price of crude oil and an increase in sales volume of natural gas by our exploration and production segment in 2004. Our average realized selling price of crude oil for the year ended December 31, 2004 was US\$33.88 per barrel, representing an increase of 24.6% from US\$27.20 per barrel for the year ended December 31, 2003. Our exploration and production segment sold 781.4 billion cubic feet of natural gas in the year ended December 31, 2004, as compared to 651.0 billion cubic feet of natural gas in the year ended December 31, 2003.

Intersegment sales increased 36.8% from RMB 128,963 million for the year ended December 31, 2003 to RMB 176,458 million (US\$21,320 million) for the year ended December 31, 2004. This increase resulted primarily from an increase in the average selling price of crude oil and an increase of sales volume of natural gas.

Sales of crude oil to Sinopec decreased 3.8% from RMB 25,008 million for the year ended December 31, 2003 to RMB 24,053 million (US\$2,906 million) for the year ended December 31, 2004. This decrease was due primarily to a decrease in our sales volume to Sinopec.

Operating Expenses. Operating expenses increased 13.9% from RMB 84,901 million for the year ended December 31, 2003 to RMB 96,734 million (US\$11,688 million) for the year ended December 31, 2004. This increase was due primarily to (i) an increase of RMB 3,057 million in purchase expenses for import of crude oil, (ii) an increase of RMB 1,140 million in exploration expenses as a result of increased expenditures in exploration activities for the purpose of improving recovery of crude oil and gas reserves, (iii) an increase of RMB 2,013 million in depletion and depreciation charges and (iii) an increase of RMB 1,246 million in salaries and other benefits.

Income From Operations. As a result of the factors discussed above, income from operations increased 35.9% from RMB 92,370 million for the year ended December 31, 2003 to RMB 125,571 million (US\$15,172 million) for the year ended December 31, 2004.

Table of Contents***Refining and Marketing***

Sales and Other Operating Revenue. Sales and other operating revenue increased 32.2% from RMB 223,584 million for the year ended December 31, 2003 to RMB 295,598 million (US\$35,715 million) for the year ended December 31, 2004. This increase was due primarily to increases in the selling prices and the sales volumes of our principal refined products.

Sales revenue from gasoline increased 28.0% from RMB 60,073 million for the year ended December 31, 2003 to RMB 76,919 million (US\$9,294 million) for the year ended December 31, 2004 due primarily to increases in the selling prices and the sales volume of gasoline. The average realized selling price of gasoline increased 17.2% from RMB 3,023 per ton for the year ended December 31, 2003 to RMB 3,542 (US\$428.0) per ton for the year ended December 31, 2004. We sold approximately 21.7 million tons of gasoline for the year ended December 31, 2004, representing an increase of 9.3% from approximately 19.9 million tons for the year ended December 31, 2003.

Sales revenue from diesel increased 36.2% from RMB 100,336 million for the year ended December 31, 2003 to RMB 136,649 million (US\$16,510 million) for the year ended December 31, 2004 due primarily to increases in the selling prices and the sales volume of diesel. The average realized selling price of diesel increased 15.7% from RMB 2,735 per ton for the year ended December 31, 2003 to RMB 3,165 (US\$382.4) per ton for the year ended December 31, 2004. We sold 43.2 million tons of diesel for the year ended December 31, 2004, representing an increase of 17.7% from 36.7 million tons for the year ended December 31, 2003.

Sales revenue from kerosene increased 42.6% from RMB 4,125 million for the year ended December 31, 2003 to RMB 5,881 million (US\$711 million) for the year ended December 31, 2004 due primarily to increases in the selling prices and sales volume of kerosene. The average realized selling price of kerosene increased 20.5% from RMB 2,306 per ton for the year ended December 31, 2003 to RMB 2,779 (US\$335.8) per ton for the year ended December 31, 2004. The sales volume of kerosene increased 18.4% from approximately 1.8 million tons for the year ended December 31, 2003 to approximately 2.1 million tons for the year ended December 31, 2004.

Intersegment sales revenue increased 29.6% from RMB 16,867 million for the year ended December 31, 2003 to RMB 21,862 million (US\$2,641 million) for the year ended December 31, 2004, due primarily to increases in the selling prices and sales volume of our refined products.

Operating Expenses. Operating expenses increased 29.8% from RMB 218,549 million for the year ended December 31, 2003 to RMB 283,617 million (US\$34,268 million) for the year ended December 31, 2004. This increase was due primarily to (i) increases in purchase prices and purchase volumes of crude oil and refined products, (ii) an increase in employee salary and benefits and (iii) an increase in sales and administrative expenses. Our purchase expenses of direct materials increased by RMB 58,363 million (US\$7,052 million) in 2004, of which RMB 57,629 million (US\$6,963 million) was due to the increases in crude oil purchase prices and purchase volume. Salary and benefits increased by RMB 1,130 million (US\$137 million) and sales and administrative expenses increased by RMB 1,870 million (US\$226 million) in 2004.

Income From Operations. As a result of the factors discussed above, income from operations increased 137.9% from RMB 5,035 million for the year ended December 31, 2003 to RMB 11,981 million (US\$1,448 million) for the year ended December 31, 2004.

Chemicals and Marketing

Sales and Other Operating Revenue. Sales and other operating revenue increased 45.8% from RMB 39,211 million for the year ended December 31, 2003 to RMB 57,179 million (US\$6,909 million) for the year ended December 31, 2004. This increase was due primarily to increases in the selling prices and sales volumes of chemical products. The average realized selling prices of synthetic resin, synthetic fibres, rubber and urea were RMB 8,257, RMB 11,434, RMB 10,703 and RMB 1,274 per ton, respectively, for the year ended December 31, 2004,

Table of Contents

representing increases of 39.1%, 27.6%, 22.3% and 16.6%, respectively, from the year ended December 31, 2003. Our chemicals and marketing segment sold 11,867 thousand tons of chemical products for the year ended December 31, 2004, representing an increase of 9% from the year ended December 31, 2003.

Operating Expenses. Operating expenses increased 29.7% from RMB 38,170 million for the year ended December 31, 2003 to RMB 49,524 million (US\$5,984 million) for the year ended December 31, 2004, due primarily to an increase of RMB 7,464 million (US\$902 million) in the purchase expenses of direct materials and an increase of RMB 1,080 million (US\$130 million) in the sales and administrative expenses.

Income From Operations. As a result of the factors discussed above, income from operations increased by RMB 6,614 million from RMB 1,041 million for the year ended December 31, 2003 to RMB 7,655 million (US\$925 million) for the year ended December 31, 2004.

Natural Gas and Pipeline

Sales and Other Operating Revenue. Sales and other operating revenue increased 21.2% from RMB 15,067 million for the year ended December 31, 2003 to RMB 18,255 million (US\$2,206 million) for the year ended December 31, 2004, due primarily to increases in natural gas sales revenue and pipeline transmission revenue as a result of increases in the sales volume and the pipeline transmission volume of natural gas. Our natural gas and pipeline segment sold 657.3 billion cubic feet natural gas in the year ended December 31, 2004, representing an increase of 21% from 543.4 billion cubic feet in the year ended December 31, 2003, which resulted in an increase in sales revenue of RMB 1,931 million (US\$233 million). The increase of RMB 1,055 million (US\$127 million) in our income from pipeline transmission of natural gas in 2004 was attributable to an increase in the pipeline transmission volume of natural gas from 520.3 billion cubic feet in 2003 to 616.0 billion cubic feet in 2004.

Operating Expenses. Operating expenses increased 19.6% from RMB 13,145 million for the year ended December 31, 2003 to RMB 15,720 million (US\$1,899 million) for the year ended December 31, 2004, due primarily to (i) an increase of RMB 1,402 million (US\$169 million) in purchase expenses of natural gas primarily as a result of the increase of 110.4 billion cubic feet in the natural gas purchase volume and (ii) an increase of RMB 1,102 million (US\$133 million) in depreciation expenses.

Income From Operations. As a result of the factors discussed above, income from operations increased 31.9% from RMB 1,922 million for the year ended December 31, 2003 to RMB 2,535 million (US\$306 million) for the year ended December 31, 2004.

Year Ended December 31, 2003 Compared to Year Ended December 31, 2002***Consolidated Results of Operation******Overview***

For the year ended December 31, 2003, our total revenue was RMB 303,779 million, representing an increase of 24.3% from the year ended December 31, 2002. Our net income in the year ended December 31, 2003 was RMB 69,614 million, increased by 48.4% from the year ended December 31, 2002. For the first time since our initial public offering in April 2000, we achieved profitability in each of our exploration and production, refining and marketing, chemicals and marketing, and natural gas and pipeline segments. Our basic and diluted earnings per share for the year ended December 31, 2003 was RMB 0.40, representing an increase of 48.1% from RMB 0.27 for the year ended December 31, 2002.

Total Revenue. Total Revenue increased 24.3% from RMB 244,424 million for the year ended December 31, 2002 to RMB 303,779 million for the year ended December 31, 2003. The increase

Table of Contents

was due primarily to increases in our realized selling prices of crude oil, gasoline, diesel and chemical products, as well as increases in the sales volume of refined products, chemical products and natural gas. The average realized selling price for crude oil increased 21.0% from US\$22.48 per barrel for the year ended December 31, 2002 to US\$27.20 per barrel for the year ended December 31, 2003.

Operating Expenses. Operating expenses increased 18.9% from RMB 172,083 million for the year ended December 31, 2002 to RMB 204,593 million for the year ended December 31, 2003. This increase was due primarily to a 26.7% increase in purchases, services and other expenses, a 20.3% increase in employee compensation costs, a 30.7% increase in exploration expenses, a 11.0% increase in expenses relating to workforce reduction and the shutting down of manufacturing facilities and units and a 10.2% increase in depreciation, depletion and amortization.

Purchases, Services and Other Expenses. Purchases, services and other expenses increased 26.7% from RMB 71,690 million for the year ended December 31, 2002 to RMB 90,850 million for the year ended December 31, 2003. This increase was due primarily to a RMB 14,380 million increase in the cost of refined product raw materials as a result of increases in the prices and purchase volume of crude oil and a RMB 1,490 million increase in the cost of chemicals raw materials as a result of increases in the prices of principal refined products. In 2003, our refining and marketing segment purchased 89.0 million barrels of crude oil, as compared to 39.8 million barrels in 2002. The average realized prices of our gasoline and diesel increased by 17.6% and 14.7%, respectively, in 2003.

Employee Compensation Costs. Employee compensation costs increased 20.3% from RMB 16,248 million for the year ended December 31, 2002 to RMB 19,542 million for the year ended December 31, 2003. This increase resulted primarily from an increase of RMB 2,262 million in salaries and other benefits and an increase of RMB 326 million in employee compensation costs as a result of the expansion of our retail distribution network in 2003.

Exploration Expenses. Exploration expenses increased 30.7% from RMB 8,095 million for the year ended December 31, 2002 to RMB 10,577 million for the year ended December 31, 2003. This increase was due primarily to increased expenditures in exploration activities for the purpose of increasing our oil and gas reserves.

Depreciation, Depletion and Amortization. Depreciation, depletion and amortization increased 10.2% from RMB 36,782 million for the year ended December 31, 2002 to RMB 40,531 million for the year ended December 31, 2003. This increase was due primarily to an increase of RMB 2,420 million in current depreciation, depletion and amortization expenses relating to the newly acquired assets.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased 6.5% from RMB 22,474 million for the year ended December 31, 2002 to RMB 23,930 million for the year ended December 31, 2003. This increase was due primarily to an increase of RMB 1,150 million in impairment of accounts receivable.

Expenses Relating to Workforce Reduction and the Shutting Down of Manufacturing Facilities and Units. We did not lay off any employees for the year ended December 31, 2003, but we shut down some low efficiency manufacturing facilities and units of our refining and marketing segment and our chemicals and marketing segment. Consequently, expenses relating to work force reduction and the shutting down of manufacturing facilities and units for the year ended December 31, 2003 consisted only of the costs for shutting down of manufacturing facilities and units of RMB 2,355 million, representing an increase of 11.0% from RMB 2,121 million for the year ended December 31, 2002.

Taxes Other than Income Taxes. Taxes other than income taxes increased 8.7% from RMB 14,613 million for the year ended December 31, 2002 to RMB 15,879 million for the year ended December 31, 2003. This increase was due primarily to an increase of RMB 679 million in

Table of Contents

consumption tax and surcharges as a result of increased production volume of gasoline and diesel and an increase of RMB 214 million in resources compensation fees as a result of increased revenues for crude oil and natural gas.

Income From Operations. As a result of the factors discussed above, income from operations increased 37.1% from RMB 72,341 million for the year ended December 31, 2002 to RMB 99,186 million for the year ended December 31, 2003.

Net Exchange Loss. Net exchange loss decreased 43.0% from RMB 316 million for the year ended December 31, 2002 to RMB 180 million for the year ended December 31, 2003. This decrease was due primarily to a decrease in the average proportion of foreign exchange borrowings and an adjustment in the currency mix of foreign exchange borrowings by repaying some of the foreign debts denominated in foreign currencies with relatively high exchange rate risk, such as Euro and British Sterling.

Net Interest Expense. Net interest expense decreased 45.3% from RMB 3,053 million for the year ended December 31, 2002 to RMB 1,669 million for the year ended December 31, 2003. This decrease was due primarily to a decrease in the average proportion of interest-bearing debts and decreases in the average interest rates.

Income Before Income Taxes. Income before income taxes increased 42.0% from RMB 69,240 million for the year ended December 31, 2002 to RMB 98,322 million for the year ended December 31, 2003.

Income Taxes. Income Taxes increased 26.3% from RMB 22,231 million for the year ended December 31, 2002 to RMB 28,072 million for the year ended December 31, 2003, due primarily to an increase in income before income taxes.

Net Income. As a result of the factors discussed above, net income increased 48.4% from RMB 46,910 million for the year ended December 31, 2002 to RMB 69,614 million for the year ended December 31, 2003.

Exploration and Production

Sales and Other Operating Revenue. Sales and other operating revenue increased 20.3% from RMB 147,308 million for the year ended December 31, 2002 to RMB 177,271 million for the year ended December 31, 2003. This increase resulted primarily from an increase in the average realized selling price of crude oil and an increase in sales volume of natural gas by our exploration and production segment in 2003. Our average realized selling price of crude oil for the year ended December 31, 2003 was US\$27.20 per barrel, representing an increase of 21.0% from US\$22.48 per barrel for the year ended December 31, 2002. Our exploration and production segment sold 651.0 billion cubic feet of natural gas for the year ended December 31, 2003, as compared to 588.4 billion cubic feet of natural gas for the year ended December 31, 2002.

Intersegment sales increased 21.4% from RMB 106,266 million for the year ended December 31, 2002 to RMB 128,963 million for the year ended December 31, 2003. Similarly, this increase resulted primarily from an increase in the average selling price of crude oil and an increase of sales volume of natural gas in 2003.

Sales of crude oil to Sinopec increased 9.8% from RMB 22,778 million for the year ended December 31, 2002 to RMB 25,008 million for the year ended December 31, 2003. This increase was due primarily to an increase in the average selling prices of crude oil.

Operating Expenses. Operating expenses increased 12.9% from RMB 75,169 million for the year ended December 31, 2002 to RMB 84,901 million for the year ended December 31, 2003. This increase was due primarily to (i) an increase of RMB 2,482 million in exploration expenses as a result of increased expenditures in exploration activities for the purpose of improving recovery of oil and gas reserves, (ii) an increase of RMB 2,758 million in depletion of oil and gas property as a

Table of Contents

result of newly acquired assets, (iii) an increase of RMB 1,421 million in salaries and other benefits and (iv) an increase of RMB 1,383 million in impairment of receivables.

Income From Operations. As a result of the factors discussed above, income from operations increased 28.0% from RMB 72,139 million for the year ended December 31, 2002 to RMB 92,370 million for the year ended December 31, 2003.

Refining and Marketing

Sales and Other Operating Revenue. Sales and other operating revenue increased 28.0% from RMB 174,621 million for the year ended December 31, 2002 to RMB 223,584 million for the year ended December 31, 2003. This increase was due primarily to increases in the selling prices and the sales volumes of our principal refined products.

Sales revenue from gasoline increased 23.0% from RMB 48,834 million for the year ended December 31, 2002 to RMB 60,073 million for the year ended December 31, 2003 due primarily to increases in the selling prices and the sales volume of gasoline. The average realized selling price of gasoline increased 17.6% from RMB 2,570 per ton for the year ended December 31, 2002 to RMB 3,023 per ton for the year ended December 31, 2003. We sold 19.9 million tons of gasoline for the year ended December 31, 2003, representing an increase of 4.6% from 19.0 million tons for the year ended December 31, 2002.

Sales revenue from diesel increased 26.9% from RMB 79,081 million for the year ended December 31, 2002 to RMB 100,336 million for the year ended December 31, 2003 due primarily to increases in the selling prices and the sales volume of diesel. The average realized selling price of diesel increased 14.7% from RMB 2,384 per ton for the year ended December 31, 2002 to RMB 2,735 per ton for the year ended December 31, 2003. We sold 36.7 million tons of diesel for the year ended December 31, 2003, representing an increase of 10.5% from 33.2 million tons for the year ended December 31, 2002.

Sales revenue from kerosene increased 6.8% from RMB 3,864 million for the year ended December 31, 2002 to RMB 4,125 million for the year ended December 31, 2003 due primarily to increases in the selling price of Kerosene despite a slight decrease of the sales volume of kerosene in 2003. The average realized selling price of kerosene increased 12.5% from RMB 2,050 per ton for the year ended December 31, 2002 to RMB 2,306 per ton for the year ended December 31, 2003.

Intersegment sales revenue increased 68.9% from RMB 9,988 million for the year ended December 31, 2002 to RMB 16,867 million for the year ended December 31, 2003 due primarily to increases in the selling prices and the sales volumes of our principal refined products.

Operating Expenses. Operating expenses increased 27.2% from RMB 171,803 million for the year ended December 31, 2002 to RMB 218,549 million for the year ended December 31, 2003. This increase was due primarily to increases in purchase prices of crude oil and refined products from third parties, as well as an increase in the purchase volume of crude oil from third parties. Our crude oil purchase expenses increased by RMB 36,330 million in 2003, of which RMB 26,480 million was due to the increase in crude oil purchase prices and RMB 9,850 million was due to the increase in crude oil purchase volume. Although our purchase volume of refined products from third parties decreased slightly in 2003, our total purchase expenses of refined products from third parties increased by RMB 1,850 million in the same period due primarily to increases in purchase prices.

Income From Operations. As a result of the factors discussed above, income from operations increased 78.7% from RMB 2,818 million for the year ended December 31, 2002 to RMB 5,035 million for the year ended December 31, 2003.

Table of Contents***Chemicals and Marketing***

Sales and Other Operating Revenue. Sales and other operating revenue increased 32.2% from RMB 29,661 million for the year ended December 31, 2002 to RMB 39,211 million for the year ended December 31, 2003, due primarily to increases in the selling prices and sales volumes of chemical products. The average realized selling prices of synthetic resin, synthetic fibres, rubber and urea were RMB 5,938, RMB 8,959, RMB 8,753 and RMB 1,093, respectively, for the year ended December 31, 2003, representing increases of 14.1%, 15.4%, 32.5% and 6.7%, respectively, from the year ended December 31, 2002. Our chemicals and marketing segment sold 10,880 thousand tons of chemical products for the year ended December 31, 2003, representing an increase of 18.26% from the year ended December 31, 2002.

Operating Expenses. Operating expenses increased 16.3% from RMB 32,823 million for the year ended December 31, 2002 to RMB 38,170 million for the year ended December 31, 2003, due primarily to an increase of RMB 5,855 million in the purchase expenses of direct materials.

Income (Loss) From Operations. As a result of the factors discussed above, we recorded income from operations of RMB 1,041 million for the year ended December 31, 2003. We recorded a loss of RMB 3,162 million for the year ended December 31, 2002.

Natural Gas and Pipeline

Sales and Other Operating Revenue. Sales and other operating revenue increased 18.3% from RMB 12,733 million for the year ended December 31, 2002 to RMB 15,067 million for the year ended December 31, 2003, due primarily to increases in the sales volume of natural gas and the pipeline transmission prices and volume and the addition of the results of a refined product pipeline. Our natural gas and pipeline segment sold 543.4 billion cubic feet natural gas in the year ended December 31, 2003, representing an increase of 11.7% from 486.3 billion cubic feet in the year ended December 31 2002, which resulted in an increase of RMB 937 million. The increase of RMB 1,241 million in our income from pipeline transmission of natural gas, crude oil and refined products in 2003 was attributable to (i) a RMB 686 million increase due to increases in crude oil and natural gas transmission prices and (ii) a RMB 456 million increase due to the addition of the results of the Lanzhou Chengdu Chongqing refined product pipeline.

Operating Expenses. Operating expenses increased 17.6% from RMB 11,181 million for the year ended December 31, 2002 to RMB 13,145 million for the year ended December 31, 2003, due primarily to (i) an increase of RMB 1,402 million in purchase expenses of natural gas primarily as a result of the increase of 1.6 billion cubic feet in the natural gas purchase volume and (ii) an increase of RMB 330 million in depreciation expenses.

Income From Operations. As a result of the factors discussed above, income from operations increased 23.8% from RMB 1,552 million for the year ended December 31, 2002 to RMB 1,922 million for the year ended December 31, 2003.

Liquidity and Capital Resources

Our primary sources of funding include cash generated by operating activities, short-term and long-term borrowings and cash and cash equivalents. Historically, our primary uses of funds were for operating activities, capital expenditures, repayment of short-term and long-term borrowings and distributions of dividends to shareholders. Our payments to CNPC are limited to dividends and payments for services provided to us by CNPC. In the year ended December 31, 2004, we distributed as dividends 45% of our reported net income. We expect that we will continue to distribute as dividends approximately 40% to 50% of our reported net income for all years. See Item 8 Financial Information Dividend Policy for a discussion of factors which may affect the determination by our board of directors of the appropriate level of dividends.

Table of Contents

We finance a significant portion of our business operations with short-term borrowings, including short-term debt obtained from PRC State-owned banks. As of December 31, 2004, short-term debt comprised approximately 5.5% of our capital employed as compared to approximately 6.7% as of December 31, 2003. Our ability to obtain adequate financing to satisfy our capital expenditure and debt servicing requirements may be limited by our financial condition and our results of operations and the liquidity of international and domestic capital markets. Prior to accessing international and domestic capital markets, we must obtain approval from various PRC government authorities. In general, we must obtain PRC government approval for any project involving significant capital investment for our refining and marketing, chemicals and marketing and natural gas and pipeline segments. For a more detailed discussion of factors which may affect our ability to satisfy our financing requirements, see Item 3 Key Information Risk Factors .

We plan to fund the capital and related expenditures described in this annual report principally through cash generated by operating activities, short-term and long-term borrowings and cash and cash equivalents. Net cash generated by operating activities in the year ended December 31, 2004 was RMB 137,299 million (US\$16,589 million). As of December 31, 2004, we had cash and cash equivalents of RMB 11,304 million (US\$1,366 million). While each of the projects described in this annual report for which significant capital expenditures will be required is important to our future development, we do not believe that failure to implement any one of these projects would have a material adverse effect on our financial condition or results of operations. If the price of crude oil undergoes a steep decline in the future, it is likely that we would delay or reduce the scale of the capital expenditures for our exploration and production segment.

Our shareholders approved at our shareholders meeting held on May 28, 2003 the proposed issuances of our corporate bonds in the principal amount of up to RMB 1,500 million and RMB 4,000 million to PRC citizens and enterprises. Upon the grant of PRC government approval, we issued a portion of these corporate bonds in the principal amount of RMB 1,500 million in October 2003. We received RMB 1,500 million in the net proceeds from this issuance. We intend to use the proceeds received from the issuance of these corporate bonds for various crude oil and natural gas exploration projects in a number of our oil and gas regions, as well as for upgrading refining facilities in Daqing Petrochemical and constructing the natural gas pipeline from Zhong County to Wuhan City. However, the issuance of the remaining portion of these corporate bonds will be subject to market conditions. We cannot assure you that we will complete the issuance of the remaining portion of these corporate bonds in accordance with the terms approved by our shareholders. However, we do not believe failure to complete the issuance of the remaining portion of these corporate bonds would have a material adverse effect on our financial condition. In addition, we consider from time to time opportunities to fund our capital needs by accessing into domestic equity capital markets.

We currently do not have any outstanding options, warrants or other rights for any persons to require us to issue any common stock at a price below its market value. We do not currently intend to issue any such rights or to otherwise issue any common stock for a price below its market value.

In addition, we did not have for the year ended December 31, 2004, and do not currently have, any transactions, arrangements or other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect the liquidity or availability of or requirements for our capital resources.

Table of Contents

The table below sets forth our cash flows for each of the three years ended December 31, 2002, 2003 and 2004 and our cash equivalents at the end of each period.

	Year ended December 31,		
	2002	2003	2004
	(RMB in millions)		
Net cash generated by operating activities	97,290	137,236	137,299
Net cash used for investing activities	(70,611)	(96,213)	(98,533)
Net cash provided by (used for) financing activities	(27,829)	(39,769)	(38,693)
Cash and cash equivalents at the end of period	9,977	11,231	11,304

Our cash and cash equivalents increased by RMB 73 million from RMB 11,231 million as of December 31, 2003 to RMB 11,304 million (US\$1,366 million) as of December 31, 2004, representing a 0.6% increase over 2003.

Cash Generated by Operating Activities

Our net cash generated by operating activities was RMB 137,299 million (US\$16,589 million) for the year ended December 31, 2004, representing an increase of RMB 63 million from RMB 137,236 million for the year ended December 31, 2003, due primarily to an increase of RMB 84,854 million in sales revenue which was partially offset by an increase of RMB 25,503 million in our purchase expenses, a decrease of RMB 24,507 million in working capital deficit and an increase of RMB 14,491 million in income tax expense.

We had a working capital deficit of RMB 27,855 million as of December 31, 2003 and RMB 3,348 million (US\$405 million) as of December 31, 2004. This decrease in working capital deficit was due primarily to an increase of RMB 16,899 million in inventory and an increase of RMB 8,993 million in receivables under the resale agreements.

Our net cash generated by operating activities increased 41.1% from RMB 97,290 million for the year ended December 31, 2002 to RMB 137,236 million for the year ended December 31, 2003. This increase was due primarily to an increase of RMB 60,171 million in sales revenue and an increase of RMB 1,370 million in collection of accounts receivable.

We had a working capital deficit of RMB 14,189 million as of December 31, 2002 and RMB 27,855 million as of December 31, 2003. This increase in working capital deficit primarily reflected an increase in long-term borrowings due within a year from RMB 6,143 million as of December 31, 2002 to RMB 19,672 million as of December 31, 2003.

Our notes and other receivables include notes receivable from customers. Other receivables represent advances to employees, non-trade related receivables from other companies, and receivables from government agencies. Allowance for doubtful accounts were primarily related to other receivables which we estimated to be uncollectible. Our notes receivable do not include past due customer amounts and, as a majority portion of our notes receivable are approved by banks, we do not have special arrangements with respect to extended payment terms on notes receivable.

Table of Contents**Cash Provided by (Used for) Financing Activities**

Our net borrowings as of December 31, 2002, 2003 and 2004 were as follows:

	December 31,		
	2002	2003	2004
	(RMB in millions)		
Short-term debt (including current portion of long-term debt)	20,633	28,890	27,276
Long-term debt	60,655	41,959	38,458
Total debt	81,288	70,849	65,734
Less:			
Cash and cash equivalents	9,977	11,231	11,304
Time deposits with term exceeding three months	2,612	2,640	1,400
Receivables under resale agreements	9,786	24,224	33,217
Net debt	58,913	32,754	19,813

See Note 22 to our consolidated financial statements included elsewhere in this annual report for information regarding the maturity profile of debt, currency and interest rate structure.

The debts which were guaranteed by CNPC amounted to RMB 939 million, RMB 853 million and RMB 756 million (US\$91 million) as of December 31, 2002, 2003 and 2004, respectively. As of December 31, 2000, we had repaid all short-term debts guaranteed by CNPC. CNPC and we have undertaken to the Hong Kong Stock Exchange that we will continue to, on a best endeavor basis, approach each lender with respect to these guaranteed debts with a view toward obtaining the unconditional release of such guarantees.

Of the total debts outstanding as of December 31, 2004, approximately 27.1% were fixed-rate loans and approximately 72.9% were floating-rate loans. Of the total debts outstanding as of December 31, 2004, approximately 85.1% were denominated in Renminbi, approximately 13.2% were denominated in the U.S. dollar and approximately 1.7% were denominated in other major foreign currencies.

Our debts included short-term and long-term debts owed to China Petroleum Finance Company Limited of RMB 24,702 million, RMB 25,188 million and RMB 23,168 (US\$2,799 million) as of December 31, 2002, 2003 and 2004, respectively. The amount of such short-term debts as of December 31, 2002, 2003 and 2004 were RMB 570 million, RMB 610 million and RMB 600 million (US\$72 million), respectively. The amount of such long-term debts as of December 31, 2002, 2003 and 2004 were RMB 24,132 million, RMB 24,578 million and RMB 22,568 million (US\$2,727 million), respectively. These debts were unsecured with interest bearing at below the prime rate as published by the People's Bank of China. We also maintain a portion of our deposits at China Petroleum Finance Company Limited at an interest rate of 0.72%.

Our net cash used for financing activities decreased 2.7% from RMB 39,769 million for the year ended December 31, 2003 to RMB 38,693 million (US\$4,675 million) for the year ended December 31, 2004. This decrease resulted primarily from the following:

- an increase in the repayment of long-term loans leading to an increase of RMB 14,832 million in cash outflow;
- an increase in the distribution of dividends leading to an increase of RMB 4,650 million in cash outflow; and
- a decrease in new short-term loans leading to a decrease of RMB 1,339 million in cash inflow;

Table of Contents

This decrease was offset primarily by the following:

an increase in new long-term loans leading to an increase of RMB 12,791 million in cash inflow; and

a decrease in the repayment of short-term loans leading to a decrease of RMB 8,673 million in cash outflow.

Our net cash used for financing activities increased 42.9% from RMB 27,829 million for the year ended December 31, 2002 to RMB 39,769 million for the year ended December 31, 2003. This increase resulted primarily from the following:

an increase in the distribution of dividends leading to an increase of RMB 12,028 million in cash outflow;

a decrease in new long-term loans leading to a decrease of RMB 7,062 million in cash inflow; and

a decrease in new short-term loans leading to a decrease of RMB 3,600 million in cash inflow;

This increase was offset primarily by the following:

a decrease in the repayment of long-term loans leading to a decrease of RMB 5,993 million in cash outflow; and

a decrease in the repayment of short-term loans leading to a decrease of RMB 4,177 million in cash outflow.

As at December 31, 2004, our loans of RMB 50 million were secured loans (including financing leases and bank loans), of which RMB 29 million of bank loans were secured by our plants and equipment in the aggregate value of RMB 218 million. We consider financing leases as secured debts. As at December 31, 2004, the debts incurred by us by way of financing leases amounted to RMB 21 million. The net book value of the properties, plant and equipment under financing leases was RMB 175 million.

Our debt to equity ratio (calculated by dividing interest-bearing debts by the aggregate of interest-bearing debts and shareholder's equity) as of December 31, 2004 was 13.4%, as compared to 16.6% as of December 31, 2003.

Capital Expenditures and Investments

Our net cash used for investing activities includes capital expenditures and investments, offset by proceeds from the sale of assets and dividends received. The table below sets forth our capital expenditures and investments (including non dry hole exploration expenses) by business segment for each of the years ended December 31, 2002, 2003 and 2004 as well as those anticipated for the year ending December 31, 2005. Actual capital expenditures and investments for periods after January 1, 2005 may differ materially from the amounts indicated below.

	2002		2003		2004		2005 anticipated	
	(RMB in millions)	%	(RMB in millions)	%	(RMB in millions)	%	(RMB in millions)	%
Exploration and production	50,646	65.5	58,599	66.0	66,493	65.0	66,660	64.7
Refining and marketing	10,503	13.6	12,650	14.2	17,467	17.0	14,590	14.2
Chemicals and marketing	3,140	4.0	3,898	4.4	4,319	4.2	8,350	8.1
Natural gas and pipeline	12,912	16.7	13,530	15.2	13,901	13.6	12,400	12.0
Corporate and other	133	0.2	138	0.2	174	0.2	1,000	1.0
Total	77,334	100.0	88,815	100.0	102,354	100.0	103,000	100.0

Table of Contents

Our capital expenditures and investments increased 15.2% from RMB 88,815 million for the year ended December 31, 2003 to RMB 102,354 million (US\$12,367 million) for the year ended December 31, 2004. This increase was due primarily to an increase of RMB 7,894 million (US\$954 million) in capital expenditures and investments in exploration activities and an increase of RMB 4,817 million (US\$582 million) in capital expenditures and investments in constructing our sales network of refined products. Taking into account the exclusion of the investments relating to the non-dry hole exploration expenses, our capital expenditures for the years ended 2002, 2003 and 2004 would have been RMB 72,766 million, RMB 82,929 million and RMB 95,349 million, (US\$11,520 million), respectively.

As of December 31, 2004, the capital expenditures contracted for at the balance sheet date but not recognized in our consolidated financial statements were approximately RMB 5,370 million (US\$649 million).

Exploration & Production

A majority of our capital expenditures and investments relate to our exploration and production segment. Our capital expenditures and investments for the segment for the year ended December 31, 2004 totaled RMB 66,493 million (US\$8,034 million), including RMB 18,313 million for exploration activities and RMB 43,217 million for development activities. Our capital expenditures and investments for the year ended December 31, 2003, totaled RMB 58,599 million, including RMB 15,136 million for exploration activities and RMB 39,587 million for development activities. The increase in our capital expenditures and investments from the year ended December 31, 2003 to the year ended December 31, 2004 was due primarily to increased capital expenditures for crude oil exploration activities in our Daqing, Tarim and Changqing oil regions and increased capital expenditures for natural gas exploration activities in our Tarim, Sichuan and Erdos basins. Taking into account the exclusion of the investments relating to the non-dry hole exploration expenses, the capital expenditures of our exploration and production segment for the years ended December 31, 2002, 2003 and 2004 would have been RMB 46,078 million, RMB 52,713 million and RMB 59,488 million (US\$7,188 million), respectively.

Our anticipated capital expenditures and investments for our exploration and production segment for the year ending December 31, 2005 amount to RMB 66,660 million. Approximately RMB 16,460 million is expected to be used for exploration activities and approximately RMB 50,200 million for development activities. We plan to focus our exploration efforts in Erdos, Junggar, Tarim, Songliao, Sichuan and Bohai Bay basins.

Refining and Marketing

Our capital expenditures for our refining and marketing segment for each of the three years ended December 31, 2002, 2003 and 2004 were RMB 10,503 million, RMB 12,650 million and RMB 17,467 (US\$2,110 million), respectively. The increase in 2004 is due primarily to an increase in capital expenditures for further expansion of our sales network of refined products.

Our anticipated capital expenditures for our refining and marketing segment for the year ending December 31, 2005 amount to RMB 14,590 million, which include:

approximately RMB 7,340 million for the construction of the sales network of refined products; and

approximately RMB 7,250 million for the construction and expansion of refining facilities.

Chemicals and Marketing

Our capital expenditures for our chemicals and marketing segment for each of the three years ended December 31, 2002, 2003 and 2004 were RMB 3,140 million, RMB 3,898 million and RMB 4,319 million (US\$522 million), respectively. The increase in 2004 was due primarily to the

Table of Contents

increased capital expenditures for upgrading the ethylene facilities in Daqing Petrochemical, Jilin Petrochemical and Lanzhou Petrochemical.

Our anticipated capital expenditures for our chemicals and marketing segment for the year ending December 31, 2005 amount to RMB 8,350 million, which mainly include capital expenditures for upgrading the ethylene facilities in Daqing Petrochemical, Jilin Petrochemical, Lanzhou Petrochemical and Dushanzi Petrochemical and for the construction of the PTA project at Liaoyang Petrochemical.

Natural Gas and Pipeline

Our capital expenditures for our natural gas and pipeline segment for each of the three years ended December 31, 2002, 2003 and 2004 were RMB 12,912 million, RMB 13,530 million and RMB 13,901 million (US\$1,680 million), respectively. The increase in 2004 resulted primarily from increased capital expenditures for the Zhong County to Wuhan natural gas pipeline and the second Shaanxi-Beijing natural gas pipeline.

Our anticipated capital expenditures for our natural gas and pipeline segment for the year ending December 31, 2005 amount to approximately RMB 12,400 million. Of this amount, approximately RMB 7,000 million is expected to be invested in the West to East natural gas pipeline project, the Zhong County to Wuhan natural gas pipeline and the second Shaanxi-Beijing natural gas pipeline and approximately RMB 5,400 million is expected to be invested in natural gas storage infrastructure projects, other natural gas pipelines and the pipelines for the transmission of crude oil and refined products. See Item 4 Information on the Company Natural Gas and Pipeline Expansion of Our Natural Gas Transmission and Marketing Business for a more detailed discussion of the expansion plans of our natural gas and pipeline segment.

Corporate and Other

Our non-segment-specific capital expenditures and investments for each of the three years ended December 31, 2002, 2003 and 2004 were RMB 133 million and RMB 138 million and RMB 174 million (US\$21 million), respectively. Our non segment-specific capital expenditures and investments related primarily to purchase of non-segment-specific equipment and research and development activities.

Our anticipated non-segment-specific capital expenditures and investments for the year ending December 31, 2005 amount to RMB 1,000 million. These planned capital expenditures and investments mainly include capital expenditures for scientific research and the development of our information system, water and power supply system, transportation system and telecommunication system, which are mutually beneficial to our business segments.

The Restructuring of Our Long-Term Investments

In 2002, we entered into a number of transactions to streamline our long-term investments and to focus our resources on our core business activities. We entered into a share transfer agreement with each of Xian Feitian Science, Industrial and Trading Group Company Limited, or Xi'an Feitian, and Wuhan Luzhou Enterprise (Group) Company Limited, or Wuhan Luzhou, on May 23, 2002. Under the share transfer agreements, we transferred 27% and 8.9% of the state-owned legal person shares in Petroleum Long Champ (Group) Co., Ltd., or Long Champ, to Xi'an Feitian and Wuhan Luzhou, respectively. The share transfer agreements were approved by the Ministry of Finance and became effective on December 31, 2002. We ceased having any interest in Long Champ upon completion of the share transfers.

We entered into a share transfer agreement with China Electronic Information Industrial Group Company, or China Electronic, on July 12, 2002. Under the share transfer agreement, we transferred 51.6% of the state-owned legal person shares in Gansu Tristar Petrochemical (Group) Co., Ltd., or

Table of Contents

Tristar, to China Electronic. On July 25, 2002, the Ministry of Finance granted its approval to the transfer of the state-owned legal person shares in Tristar and the share transfer agreement became effective. We ceased having any interest in Tristar upon completion of the share transfer.

We have used the entire proceeds received from the transfer of shares in Long Champ and cash provided by our cash and cash equivalents to purchase Long Champ's equity interest in three crude oil pipeline transmission enterprises. We have used the entire proceeds received from the transfer of shares in Tristar and cash provided by our cash and cash equivalents to purchase certain Tristar's refining and chemical assets or businesses. We believe that the purchase of these assets and businesses did not have a material adverse impact on our financial condition or results of operations.

Off-Balance Sheet Arrangements

There are no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Long-Term Contractual Obligations and Other Commercial Commitments and Payment Obligations

The tables below set forth certain information in connection with our long-term contractual obligations and other commercial commitments outstanding as of December 31, 2004.

Payment due by period

Contractual obligations	Total	Less than				After 5 years
		1 year	1-3 years	3-5 years		
(RMB in millions)						
Long-term debt	54,445	15,987	24,624	6,467	7,367	
Capital lease obligations	21	21	0	0	0	
Operating leases	95,451	2,701	4,925	4,790	83,035	
Capital commitments	5,370	4,398	972	0	0	
Unconditional purchase obligations	5,108.9	3,992.8	726.4	290.3	99.4	
Other long-term obligations	0	0	0	0	0	
Total contractual cash obligations	160,395.9	27,099.8	31,247.4	11,547.3	90,501.4	

Amount of commitment expiration per period

Other commercial commitments	Total				
	amounts committed	Less than 1 year	1-3 years	3-5 years	Over 5 years
(RMB in millions)					
Lines of credit	0	0	0	0	0
Standby letters of credit	0	0	0	0	0
Guarantees	203	50	3	67	83
Total commercial commitments	203	50	3	67	83

Table of Contents

The table below sets forth the estimated annual payments we are obligated to make with respect to our exploration and production licenses to the Ministry of Land and Resources.

Year	Annual payment (RMB in millions)
2005	618
2006	681
2007 and thereafter	712

We sell a substantial portion of our natural gas under long-term take-or-pay contracts. Under these contracts, the customers are required to take or pay, and we are obligated to deliver, minimum quantities of natural gas annually.

As of December 31, 2004, our future minimum delivery commitments under such take-or-pay contracts are as follows:

	Quantities (billion of cubic feet)
2005	229
2006	443
2007	581
2008	637
2009	701
2010 and thereafter	6,111

Research and Development

We have a research and development management department, directly under which there are three research institutions. Except for our branch companies which are engaged in marketing activities, each of our branch companies has its own research and development management department. Most of our branch companies have their own research institutions. Our research and development management departments are mainly responsible for managing and coordinating the research and development activities conducted by each of the research institutions. As of December 31, 2004, we had 22,182 employees engaged in research and development functions.

In 2004, we applied for 221 patents and 159 trademarks in China. We obtained patent rights for 157 patents in the same period.

In each of the three years ended December 31, 2002, 2003 and 2004, our total expenditures for research and development were approximately RMB 1,806 million, RMB 2,411 million and RMB 2,936 million (US\$355 million), respectively.

Exploration and Production

China's major oil and gas fields are characterized by a broad range of geological conditions, and a majority of China's oil and gas fields are in continental sedimentary basins with complex structures. We have developed effective exploration and production techniques and methods that are suitable for these geological conditions. Our research and development efforts with respect to our exploration and production business focus on:

geological structures of crude oil and natural gas reserves;

oil and gas exploration and development;

oil and gas production and pipeline transportation; and

monitoring of the environment.

Table of Contents

Refining and Chemicals

In order to organize and coordinate our research and development activities related to our refining and chemicals businesses, we established PetroChina Refining & Chemicals Technology Research Center in July 2003, which is responsible for developing research strategies and managing and coordinating major research projects. We have established four research and development centers in Daqing Petrochemical, Liaoyang Petrochemical, Lanzhou Petrochemical and Jilin Petrochemical to carry out the research and development of certain of our major refining and chemicals research projects. In order to enhance our competitiveness and develop core technologies, we plan to integrate the resources of our down-stream scientific research and development system in the near future.

Trend Information

Streamlining of Production Facilities

We plan to continue to streamline our production facilities within the next several years to further improve our operating efficiency and competitiveness by consolidating or shutting down some of our production facilities. We do not believe that the implementation of such plans will have a material adverse impact on our financial position, although we believe that it could have a material adverse effect on our results of operations because we would be required under our accounting policies to recognize in our income statement any impairment loss or impairment provision associated with shutting down our production facilities. See **General Critical Accounting Policies** and **General Factors Affecting Results of Operations** above for a detailed discussion of other trend information.

Other Information

Inflation

Inflation or deflation has not had a significant impact on our results of operations for the year ended December 31, 2004.

Non-Exchange Traded Contracts

We did not engage for the year ended December 31, 2004, and do not currently engage, to a material extent, in any trading activities involving commodity contracts that are accounted for at fair value but for which a lack of market price quotations makes it necessary to apply fair value estimation techniques.

Related Party Transactions

For a discussion of related party transactions, see **Item 7 Major Shareholders and Related Party Transactions Related Party Transactions** and Note 32 to our consolidated financial statements included elsewhere in this annual report.

US GAAP Reconciliation

We prepared our consolidated financial statements in accordance with IFRS. This basis of accounting may differ from US GAAP. Such differences involve methods for measuring the amounts shown in the financial statements, as well as additional disclosures required by US GAAP.

Table of Contents

A summary of the principal differences and additional disclosures applicable to us is set out below:

Revaluation of Property, Plant and Equipment

As described in Note 16 to our consolidated financial statements, the property, plant and equipment, excluding oil and gas reserves, transferred to us by CNPC were appraised as of June 30, 1999, as required by the relevant PRC regulations, by a firm of independent valuers registered in the PRC, China Enterprise Appraisal. As at September 30, 2003, a revaluation of our refining and chemical production equipment was undertaken by a firm of independent valuers registered in the PRC, China United Assets Appraiser Co., Ltd, on a depreciated replacement cost basis.

The June 1999 revaluation resulted in RMB 80,549 million in excess of the prior carrying value and a revaluation loss of RMB 1,122 million on certain property, plant and equipment.

The September 2003 revaluation resulted in RMB 872 million in excess of the carrying value of certain property, plant and equipment immediately prior to the revaluation and a revaluation loss of RMB 1,257 million.

With respect to the RMB 872 million revaluation gain resulting from the 2003 revaluation, RMB 98 million were related to property, plant and equipment that in 1999 experienced revaluation loss, and were credited to the income statement. The remaining RMB 774 million was credited to the revaluation reserve in the shareholders' equity.

With respect to the RMB 1,257 million revaluation loss resulting from the 2003 revaluation, RMB 768 million were related to property, plant and equipment that in 1999 experienced revaluation gain. The remaining RMB 489 million were charged to the income statement.

The depreciation charge, which includes impairment charge, on the revaluation surplus was RMB 8,157 million in 2002, RMB 8,053 million in 2003 and RMB 8,170 million in 2004.

The depreciation charge on the revaluation loss was RMB 112 million in 2002, RMB 144 million in 2003 and RMB 830 million in 2004.

The loss on disposal of property, plant and equipment, which includes shut down of manufacturing assets, was RMB 224 million in 2002, RMB 451 million in 2003 and RMB 523 million in 2004.

For purposes of reconciling to the US GAAP financial data, the effect of the revaluation, the related depreciation charges and loss on disposal is reversed. A deferred tax asset relating to the reversal of the effect of revaluation in 1999 is established, together with a corresponding increase in the shareholders' equity. Under a special approval granted by the Ministry of Finance, the effect of the revaluation in 1999 is available as additional depreciation base for purposes of determining taxable income.

Related Party Transactions

We have disclosed in Note 31 to our consolidated financial statements included elsewhere in this annual report transactions with significant customers and in Notes 13, 15, 21, 22 and 32 to our consolidated financial statements transactions and balances with our immediate parent, CNPC, and related companies. CNPC is owned by the PRC government, which also owns a significant portion of the productive assets in the PRC. IFRS exempts state controlled enterprises from disclosing transactions with other state controlled enterprises. IFRS also excludes from related parties government departments and agencies to the extent that such dealings are in the normal course of business. US GAAP contains no similar exemptions but requires disclosure of material related party transactions. We believe that we have provided meaningful disclosures of related party transactions through the major customer disclosures in Note 31 to our consolidated financial statements included

Table of Contents

elsewhere in this annual report and the transactions with the CNPC Group disclosed in Note 32 to our consolidated financial statements. Although the majority of our activities are conducted with the PRC government authorities and its affiliates and other state controlled enterprises, none individually constitutes a major customer or supplier other than those disclosed.

One-time Remedial Payments for Staff Housing

The Ministry of Finance of the PRC issued several public notices and regulations during 2000 and 2001 with respect to the one-time remedial payments for staff housing payable to certain employees who joined the workforce prior to December 31, 1998 and have housing conditions below local standards as determined in accordance with government regulations and guidelines. These Ministry of Finance notices and regulations also provided that the portion of remedial payments attributable to the periods prior to a restructuring of the employer enterprise from a wholly state-owned status to a less than wholly state-owned status is to be borne by the state shareholder of the enterprise.

The restructuring that resulted in our formation took place in November 1999. As such, the one-time remedial housing payments payable to our eligible employees have been born or are to be borne by CNPC, our principal shareholder.

Under IFRS, such direct payments to employees or reimbursements will not be recorded through our consolidated income statement. US GAAP contains no such exemption but requires this principal shareholder's action on our behalf to be recorded in the consolidated income statement. In the last quarter of year 2002, we and CNPC completed the process of estimating the amount that are payable to our qualified employees. This amount, RMB 2,553 million, was reflected in determining our net income for the year ended December 31, 2002, under US GAAP. Since this amount is borne by CNPC, a corresponding amount has been included as an addition to the other reserves in our shareholders equity.

Recent US Accounting Pronouncements

In December 2004, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 123 (revised 2004), *Share-Based Payment*, or FAS 123(R), which is a revision of FASB Statement No. 123, *Accounting for Stock-Based Compensation*. FAS 123(R) supersedes APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and amends FASB Statement No. 95, *Statement of Cash Flows*. Generally, the approach in FAS 123(R) is similar to the approach described in Statement No. 123. However, FAS 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative. FAS 123(R) is effective as of the start of the first fiscal year commencing after June 15, 2005, and thus, will apply to us beginning in the year ending December 31, 2006. We are evaluating the transition provisions allowed by FAS 123(R) and do not expect the adoption of FAS 123(R) will have a material impact on our financial condition and results of operations.

On November 24, 2004, the FASB issued Statement No. 151, *Inventory Costs*, an amendment of ARB No. 43, Chapter 4 (FAS 151). FAS 151 requires that abnormal amounts of idle capacity and spoilage costs be excluded from the cost of inventory and expensed when incurred. The provisions of FAS 151 are applicable to inventory costs incurred during fiscal years beginning after June 15, 2005. We do not expect the adoption of FAS 151 will have a material impact on our financial condition or results of operations.

On December 15, 2004, the FASB issued Statement No. 153, *Exchanges of Nonmonetary Assets*, an amendment of APB Opinion No. 29 (FAS 153). FAS 153 requires exchanges of productive assets to be accounted for at fair value, rather than at carryover basis, unless (1) neither the asset received nor the asset surrendered has a fair value that is determinable within reasonable limits or (2) the transactions lack commercial substance. FAS 153 is effective for nonmonetary asset

Table of Contents

exchanges occurring in fiscal periods beginning after June 15, 2005. We do not expect the adoption of FAS 153 will have a material impact on our financial condition or results of operations.

Quantitative Disclosure Relating to US GAAP and IFRS***Year Ended December 31, 2004 Compared to Year Ended December 31, 2003***

Net income. Net income under US GAAP increased 43.4% from RMB 75,419 million for the year ended December 31, 2003 to RMB 108,135 million (US\$13,065 million) for the year ended December 31, 2004. This increase was due primarily to an increase of RMB 33,313 million (US\$4,025 million) in the net income under IFRS as discussed in Item 5 Operating and Financial Review and Prospects Operating Results .

Shareholders equity. Shareholders equity under US GAAP increased 22.4% from RMB 329,205 million as of December 31, 2003 to RMB 403,012 million (US\$48,693 million) as of December 31, 2004. This increase was due primarily to the net income of RMB 108,135 million (US\$13,065 million) under US GAAP, which was partially offset by the payment of (i) the final dividend of RMB 13,947 million (US\$1,685 million) for the year ended December 31, 2003 and (ii) the interim dividend of RMB 20,381 million (US\$2,463 million) for the year ended December 31, 2004.

Year Ended December 31, 2003 Compared to Year Ended December 31, 2002

Net income. Net income under US GAAP increased 51.3% from RMB 49,837 million for the year ended December 31, 2002 to RMB 75,419 million for the year ended December 31, 2003. This increase was due primarily to (i) the increase of RMB 22,704 million in the increase of net income under IFRS as discussed in Item 5 Operating and Financial Review and Prospects Operating Results and (ii) the decrease in the year ended December 31, 2003 of RMB 2,553 million in one-time remedial payments for staff housing.

Shareholders equity. Shareholders equity under US GAAP increased 16.1% from RMB 283,464 million as of December 31, 2002 to RMB 329,205 million as of December 31, 2003. This increase was due primarily to the net income under US GAAP for the year ended December 31, 2003 of RMB 75,419 million (US\$9,112 million), which was partially offset by the payment of (i) the final dividend for the year ended December 31, 2002 of RMB 12,299 million and (ii) the interim dividend for the year ended December 31, 2003 of RMB 17,379 million.

Environmental Expenses and Capital Expenditures

We paid pollutant discharge fees of approximately RMB 113 million, RMB 155 million and RMB 182 million (US\$22 million), respectively, in 2002, 2003 and 2004. Our capital expenditures on environmental programs in 2002, 2003 and 2004 were approximately RMB 1,363 million, RMB 1,076 million and RMB 1,345 million (US\$163 million), respectively. There were no material environmental liabilities accrued as of December 31, 2004.

Table of Contents

ITEM 6 DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES
Directors, Senior Management and Supervisors

Our board of directors consists of thirteen directors, three of whom are independent non-executive directors. The directors are elected at a meeting of our shareholders for a term of three years, renewable upon re-election and re-appointment. The functions and duties conferred on the board of directors include:

convening shareholders meetings and reporting its work to the shareholders meetings;

implementing the resolutions of the shareholders meetings;

determining our business plans and investment plans;

formulating our annual budget and final accounts;

formulating our proposals for dividend and bonus distributions and for the increase or reduction of capital; and

exercising other powers, functions and duties as conferred by our articles of association.

Five of the directors are currently affiliated with CNPC or an affiliate of CNPC.

The PRC Company Law requires a joint stock company with limited liability to establish a supervisory committee. This requirement is reflected in our articles of association. The supervisory committee is responsible for monitoring our financial matters and overseeing the actions of our board of directors and our management personnel. The supervisory committee consists of seven supervisors, six of whom are elected, including four shareholders representatives and two independent supervisors, and may be removed, by the shareholders in a general meeting and one of whom is an employees representative who is elected by our staff, and may be removed, by our staff. Three of our supervisors are affiliated with CNPC. The term of office of our supervisors is three years, renewable upon re-election and re-appointment. An elected supervisor cannot concurrently hold the position of a director, manager or financial controller. The functions and powers conferred on the supervisory committee include:

attending board meetings;

examining our financial affairs;

examining balance sheets, profit and loss accounts, business reports, dividend distribution proposals and other financial information proposed at shareholders general meetings by the directors from time to time; and

overseeing the actions of our board of directors and our senior management personnel in carrying out their duties.

In the event that any action of our directors adversely affects our interests, supervisors shall confer with or initiate legal proceedings against such directors on our behalf. A resolution proposed at any meeting of the supervisory committee shall be adopted only if it is approved by two-thirds or more of our supervisors.

Our senior management is elected by and serve at the discretion of our board of directors.

Table of Contents

The following table sets forth certain information concerning our current directors, supervisors and executive officers.

Name	Age	Position	Date of election⁽¹⁾
Chen Geng	58	Chairman of the board of directors	May 18, 2004

Directors

Chen Geng, aged 58, is Chairman of the board of directors of PetroChina and President of CNPC. Mr. Chen is a senior economist. Mr. Chen graduated from Beijing Economics Institute (currently Capital University of Economics and Business), majoring in Labor Economics, and has over 30 years' experience in China's oil and gas industry. From October 1983, Mr. Chen was Deputy Director of Changqing Petroleum Exploration Bureau. From April 1985, he was Deputy Director of the Labour Department under the Ministry of Petroleum Industry. From August 1988, he was Director of the Labour Bureau of CNPC. From December 1993, he was Assistant President of CNPC. From

September 1997, he was Vice President of CNPC and from March 1998, he was Deputy Director of the State Petroleum and Chemical Industry Bureau. In February 2001, Mr. Chen was appointed as a Vice President of CNPC. He has been a director of PetroChina since June 8, 2001 and was President of PetroChina from December 3, 2002 to May 2004. He was appointed as President of CNPC in April 2004 and Chairman of the board of directors of PetroChina in May 2004.

Jiang Jiemin, aged 49, is a Vice Chairman of the board of directors of PetroChina and President of PetroChina. Mr. Jiang is a senior economist. Mr. Jiang graduated from the University of Shandong in industrial economics management. He has almost 30 years' experience in China's oil

Table of Contents

and gas industry. Mr. Jiang was a Deputy Director of Shengli Petroleum Administration Bureau from March, 1993 and Director of Qinghai Petroleum Administration Bureau from November 1994. Mr. Jiang was an Assistant President of CNPC and the Head of the Preparation Committee of the Restructuring and Listing of CNPC from February 1999 to November 1999 when he was appointed a director and Vice President of PetroChina. In June 2000, Mr. Jiang became a Vice Governor of Qinghai Province, a position he held until April 2004 when he was appointed as a Vice President of CNPC. Mr. Jiang has been a Vice Chairman and President of PetroChina since May 2004.

Ren Chuanjun, aged 60, is a Vice Chairman of the board of directors of PetroChina. Mr. Ren is a Vice President of CNPC. Mr. Ren is a senior economist. Mr. Ren graduated from Hefei Industry University and has over 30 years experience in China's oil and gas and chemical fibers industries. Mr. Ren became a Deputy General Manager and General Manager of China Yizheng Fiber Industrial United Corporation in 1983. From 1994, he worked as a Vice Minister of China National Textile Council as well as a Vice Chairman of the board of directors of Yizheng Fiber United Corporation and Yizheng Fiber Company Limited. Mr. Ren acted as a Vice President of CNPC from April 1998. Mr. Ren worked as Senior Vice President of PetroChina from November 5, 1999 to November 2002. He has been a director of PetroChina since November 5, 1999 and a Vice Chairman of PetroChina since December 3, 2002.

Su Shulin, aged 42, is a director and Senior Vice President of PetroChina. Mr. Su is a senior engineer. Mr. Su graduated from Daqing Petroleum Institute and received a master's degree at Harbin Institute of Technology. Mr. Su has many years' experience in China's oil and gas industry. Since 1996, Mr. Su had worked as a Director Assistant, Director of the First Oil and Natural Gas Development Department, a Standing Deputy Director and Director of Daqing Petroleum Administration Bureau until November 5, 1999 when he was appointed as a Vice President of PetroChina and General Manager and Chairman of Daqing Oilfield Company, a subsidiary of PetroChina. Mr. Su held his positions as General Manager and Chairman of Daqing Oilfield Company until December 2003. Mr. Su has been a director of PetroChina since November 19, 2002 and Senior Vice President of PetroChina since December 3, 2002.

Duan Wende, aged 53, is a director and a Vice President of PetroChina. Mr. Duan is a senior engineer. He graduated from the University of Nankai, majoring in economics management and pursued post master's degree studies at the Postgraduate School of the Chinese Academy of Social Sciences in investment economics while working. He has over 30 years' experience in China's petrochemical industry. From April 1975 to June 1999, he held a number of positions, including the Deputy Factory Manager of Fushun Factory No. 628 and a chemical fibres factory, Commander of Command Office of Fushun Petrochemical Corporation ethylene project, Deputy Factory Manager of an ethylene petrochemical factory, the Factory Manager of an acrylic fibres petrochemical factory and a detergent factory. From May 1999, Mr. Duan was Deputy Manager of Fushun Petrochemical Corporation and from October 1999, Mr. Duan was Manager of Fushun Petrochemical Branch Company. From October 1999, he was General Manager of Fushun Petrochemical Branch Company. He has been an Assistant President of CNPC since August 2001. He has been a director and Vice President of PetroChina since May 2004 and March 2002, respectively, and a Vice President of CNPC since December 2003.

Wang Fucheng, aged 54, is a director and Vice President of PetroChina. Mr. Wang is a senior economist. Mr. Wang graduated from the Shandong Normal University and has over 30 years' experience in China's oil and gas industry. Mr. Wang worked in the Shengli Oil Field, Zhongyuan Oil Field and Liaohe Oil Field. From 1986 to 1999, Mr. Wang worked as Senior Executive of the Shengli Oil Field, Deputy Director of the Liaohe Oil Exploration Bureau, Director of the Liaohe Oil Exploration Bureau and General Manager of the Branch Office of Liaohe Oil Field. Mr. Wang has been a director of PetroChina since June 30, 2000 and a Vice President of PetroChina since July 12, 2000.

Zheng Hu, aged 58, is a director of PetroChina and a Vice President of CNPC. Mr. Zheng is a senior engineer. He graduated from the Beijing Petroleum Institute and has over 30 years

Table of Contents

experience in China's oil and gas industry. From 1990 to 1992, Mr. Zheng acted as vice director of Beijing Petroleum Managers Training Institute. From 1992 to 1999, Mr. Zheng worked as Deputy General Manager and General Manager of China Petroleum Technology & Development Corporation, as Deputy General Manager and General Manager of China Petroleum Materials and Equipment (Group) Corporation, Director of Personnel and Labour Department of CNPC. He has been a director of PetroChina since June 30, 2000 and a Vice President of CNPC since August 2000.

Zhou Jiping, aged 52, is a director of PetroChina and a Vice President of CNPC. Mr. Zhou is a senior engineer, and holds a master's degree in marine geologic structure from the Nanhai Marine Research Institute of the China Academy of Sciences. He has over 30 years' experience in China's oil and gas industry. Mr. Zhou was the Exploration Manager of the Exploration and Development Department of China National Offshore Oil Corporation, Manager of the Overseas Department of the International Cooperation Bureau of CNPC, President of China National Oil & Gas Exploration and Development Corporation in Vanuatu and President of China National Oil & Gas Exploration and Development Corporation in Papua New Guinea. Mr. Zhou has also worked as Vice Director of the International Exploration and Development Cooperation Bureau of CNPC, Vice President of China National Oil & Gas Exploration and Development Corporation from November 1996. He has been President of China National Oil & Gas Exploration and Development Corporation and concurrently Deputy Director of the International Exploration and Development Cooperation Bureau of CNPC since December 1997, President of China National Oil & Gas Exploration and Development Corporation since October 1998, Assistant to the President of CNPC and concurrently President of China National Oil & Gas Exploration and Development Corporation since August 2001 and Vice President of CNPC since December 2003. Mr. Zhou has been a director of PetroChina since May 2004.

Gong Huazhang, aged 58, is a director of PetroChina. Mr. Gong is General Accountant of CNPC. Mr. Gong is a senior accountant. Mr. Gong graduated from Yangzhou Business School and has over 30 years' experience in China's oil and gas industry. Mr. Gong worked as Chief Accountant, Deputy Director and Director of the Finance Bureau of CNPC from 1991. Mr. Gong has been Director of the Finance and Assets Department of CNPC since October 1998 and has been General Accountant of CNPC since February 1999. Mr. Gong has been a director of PetroChina since November 5, 1999.

Zou Haifeng, aged 58, is a director of PetroChina. Mr. Zou is a Deputy Manager of Jilin Petrochemical Branch Company and the Chairman of the Supervisory Committee of Jilin Chemical Industrial Company Limited. Mr. Zou is a senior engineer. Mr. Zou graduated from Northeastern Industry Institute and has nearly 30 years' experience in the petrochemical industry. Since 1994, Mr. Zou has been a Deputy Manager of Jilin Petrochemical Group Corporation and a Director and Deputy Manager of Jilin Chemical Industrial Company Limited. Mr. Zou has been a Deputy Manager of Jilin Petrochemical Branch Company, a subsidiary of PetroChina since July, 1999 and a director of PetroChina since November 5, 1999.

Independent Non-executive Directors

Chee-Chen Tung, aged 62, is an independent non-executive director of PetroChina. Mr. Tung is Chairman and Chief Executive Officer of Orient Overseas (International) Limited (OOIL). He was educated at the University of Liverpool, England, where he received his Bachelor of Science degree. He later acquired a Master's degree in Mechanical Engineering at the Massachusetts Institute of Technology in the United States. Mr. Tung served as Chairman of Hong Kong Shipowner's Association between 1993 and 1995. From 1999 to 2001, Mr. Tung served as Chairman of the Hong Kong General Chamber of Commerce, an independent non-executive Director of Zhejiang Expressway Company Limited, Bank of China (Hong Kong) Limited, Sing Tao News Corporation Limited, Wing Hang Bank and Cathay Pacific Airways, a member of the Hong Kong Port Development Board. Mr. Tung is also Chairman of the Institute for Shipboard Education Foundation, Chairman of the Court of the International Academics Center of the Hong Kong Polytechnic

Table of Contents

University, a member of the Board of Trustees of the University of Pittsburgh, and a member of the Board of Visitors of the School of Foreign Service, Georgetown University. Mr. Tung has been an independent non-executive director of PetroChina since November 5, 1999.

Liu Hongru, aged 74, is an independent non-executive director of PetroChina. Mr. Liu graduated from the Economics Department of the University of Moscow in 1959 with an associate doctor's degree. Mr. Liu worked as a Vice Governor of the Agricultural Bank of China, a Vice Governor of the People's Bank of China, a Deputy Director of the State Economic Restructuring Committee and Chairman of China Securities Regulatory Commission. Mr. Liu is currently a Deputy Director of the Economic Committee under the Chinese People's Political Consultative Conference, and concurrently serves as a Vice President of China Finance and Banking Society, a Vice President of China National Debt Association and Director of Shanghai Finance and Law Research Institute. Mr. Liu is also a professor at each of Beijing University, the Graduate School of People's Bank of China and the City University of Hong Kong. Mr. Liu also acts as independent non-executive director or non-executive director for other four companies listed in Hong Kong Stock Exchange and has the relevant accounting and financial management expertise required by the Hong Kong Stock Exchange Listing Rules. Mr. Liu served as an independent supervisor of PetroChina from December 1999 to November 2002. Mr. Liu has been an independent non-executive director of PetroChina since November 19, 2002.

Franco Bernabè, aged 56, is an independent non-executive director of PetroChina. Mr. Bernabè is the Chairman of the Franco Bernabè Group and Vice Chairman of H3G. He is also Vice Chairman of Rothschild Europe. He used to serve as the executive president of ENI and Telecom Italia. He also serves as a special representative of the Italian government for the reconstruction of the Balkan region. Mr. Bernabè joined ENI in 1983 to become the assistant to the chairman; in 1986 he became director for development, planning and control; and between 1992 and 1998 was the Chief Executive Officer of ENI. Mr. Bernabè led the restructuring program of the ENI Group, making it one of the world's most profitable oil companies. Between 1998 and 1999, Mr. Bernabè was the Chief Executive Officer of Telecom Italia. Prior to his joining ENI, Mr. Bernabè was the head of economic studies at FIAT. He was also a senior economist at the OECD Department of Economics and Statistics in Paris. Earlier, he was a professor of economic politics at the School of Industrial Administration, Turin University. Mr. Bernabè has been an independent non-executive director of PetroChina since June 30, 2000.

Secretary to the Board of Directors

Li Huaiqi, aged 55, is the secretary to the board of directors of PetroChina. Mr. Li is a senior economist. He has over 30 years' experience in China's oil and gas industry. Mr. Li worked with Daqing, Liaohe, Nanhai and Huabei oil and gas companies. From 1992 to 1996, Mr. Li worked as Deputy Director of Foreign Affairs Bureau and Chairman of the Foreign Service Company of CNPC and as Director of Foreign Affairs Bureau of CNPC. In 1999, Mr. Li was appointed as Director of the International Co-operation Department (Foreign Affairs Bureau) of CNPC. Mr. Li has been the secretary to the board of directors of PetroChina since August 29, 2001.

Other Senior Management Personnel

Wang Guoliang, aged 52, is Chief Financial Officer of PetroChina. Mr. Wang has a master's degree and is a senior accountant. He graduated from Heilongjiang Business College and Hebei University. He has over 20 years' experience in China's oil and gas industry. Mr. Wang worked as a Vice President of CNPC Finance Co., Ltd. from 1995 to 1997 and as a Deputy General Manager and General Accountant of China National Oil & Gas Exploration and Exploitation Corporation from 1998 to November 5, 1999 when he was appointed as Chief Financial Officer of PetroChina. He was also General Manager of PetroChina's Financial Department from November 1999 to March 2002.

Table of Contents

Liu Baohe, aged 58, is a Vice President of PetroChina. Mr. Liu is a senior engineer. Mr. Liu graduated from Beijing Petroleum Institute and has over 30 years' experience in China's oil and gas industry. From 1994 to 1997, Mr. Liu worked as Vice Director and Director of the Exploration and Production Bureau of CNPC. Mr. Liu was Director of the Department of Oil and Gas Exploitation of CNPC from 1998 to 1999. From 1999 to August 2001, Mr. Liu worked as Deputy General Manager of the exploration and production segment of PetroChina. From September 2001, Mr. Liu was a Vice President of PetroChina. From September 2001 to December 2002, he was also General Manager of the Exploration and Production Branch Company of PetroChina.

Jia Chengzao, aged 56, is Chief Geologist of PetroChina. Mr. Jia is a doctor degree holder, a senior engineer and a Fellow of China Scientific Institute. He graduated from Nanjing University and has over 25 years' experience in China's oil and geological industry. From 1994, Mr. Jia held several senior management positions at Tarim Oil Exploration and Exploitation Headquarters, including Deputy Chief Geologist, Chief Geologist and Deputy Commander. Since 1998, he has been a Vice Director of the Oil Exploration and Exploitation Scientific Research Institute of CNPC. From 1999, Mr. Jia worked as a Deputy General Manager of China Petroleum Tarim Oil Field Branch Company and a Vice Director of China Oil Exploration and Exploitation Research Institute. Mr. Jia has been Chief Geologist of PetroChina since July 2000. Since December 2002, Mr. Jia has also been Director of China Oil Exploration and Exploitation Research Institute.

Supervisors

Li Kecheng, aged 61, is Chairman of PetroChina's supervisory committee. Mr. Li is a senior engineer. Mr. Li graduated from Beijing Science and Technology University and has over 30 years' experience in China's oil and gas industry. From 1986 to 1992, Mr. Li was the head of the Petroleum Pipeline Bureau and a senior executive of the Northeastern Oil Transmission Administration Bureau. Since November 1992, Mr. Li has been taking several senior administrative positions at CNPC. Mr. Li has been Chairman of PetroChina's supervisory committee since November 5, 1999.

Wen Qingshan, aged 46, is a supervisor of PetroChina. Mr. Wen is a senior accountant. Mr. Wen graduated from Jilin Yanbian University. He served as Deputy Chief Accountant of the Finance and Assets Department of CNPC from November 1998 to May 1999, when he was appointed as a Deputy Director of the Finance and Assets Department of CNPC. Mr. Wen has been Director of the Finance and Assets Department of CNPC since May 2002. Mr. Wen has been a supervisor of PetroChina since November 19, 2002.

Sun Xianfeng, aged 52, is a supervisor of PetroChina. Mr. Sun graduated from Huadong Petroleum Institute in September 1977. Mr. Sun worked as Deputy Director of the Supervisory Bureau of CNPC from November 1996, before being transferred to the Eighth Office of the State Council Compliance Inspectors' General Office (Supervisory Committee of Central Enterprises Working Commission) as its temporary head in June 1998. He has been Deputy Director of the Audit Department of CNPC since October 2000, and has worked concurrently as Director of the Audit Services Center of CNPC since December 2000. Mr. Sun has been a supervisor of PetroChina since May 2004.

Xu Fengli, aged 57, is a supervisor of PetroChina. Mr. Xu is a senior accountant. Mr. Xu graduated from Xi'an Petroleum Institute in July 1985. Mr. Xu has been Chief Accountant of Fushun Petrochemical Corporation since November 1995, Deputy Director of Finance and Assets Department of CNPC since November 1998, Deputy General Manager of the Finance Department of PetroChina since December 1999 and Director of the Administrative Office of the Supervisory Committee of PetroChina since October 2003. Mr. Xu has been a supervisor of PetroChina since May 2004.

Sun Chongren, aged 54, is a supervisor of PetroChina and an employee representative of PetroChina's supervisory committee. Mr. Sun graduated from Huadong Petroleum Institute and has 30 years' experience in China's oil and gas industry. Mr. Sun has been working at Liaohe Petroleum

Table of Contents

Administration Bureau for 30 years. Since 1996, he has been a senior executive and Chairman of the workers' union of Liaohé Petroleum Administration Bureau. Mr. Sun has been a supervisor of PetroChina since November 5, 1999.

Zhang Youcai, aged 63, is an independent supervisor of PetroChina. Mr. Zhang is a professor. Mr. Zhang graduated from Nanjing Industrial University and has over 30 years' experience in enterprise management and financing. Mr. Zhang worked as Chief Manager of Nantong Fertilizer Factory, Deputy Director of Nantong Municipal Industrial Bureau, Vice Chairman of Nantong Municipal Development and Planning Committee and Vice Mayor of Nantong city, until his appointment as Mayor of Nantong city in April 1984. Mr. Zhang was a Vice Minister of the Ministry of Finance from December 1989 to July 2002. He also served as General Director of the State Asset Administration Bureau from May 1994 to July 1998. Mr. Zhang has been an independent supervisor of PetroChina since November 19, 2002.

Wu Zhipan, aged 48, is an independent supervisor of PetroChina. Mr. Wu acquired a Doctor in Laws from Beijing University School of Law in 1988, and was a visiting scholar at Harvard Law School from 1991 to 1992. Mr. Wu is a Vice President of Beijing University. He is concurrently an expert consultant of the Supreme People's Court, an arbitrator on the Arbitrator Panel of the China International Economic and Trade Arbitration Commission and a Director of China and Economic Law Society. Mr. Wu is the author of a number of legal publications and has rich experience in law practice. Mr. Wu has been an independent supervisor of PetroChina since December 3, 1999.

Compensation**Senior Management Compensation System**

Our senior management compensation system links our senior management members' financial interests, including those of our executive directors and our supervisors, with our results of operations and the performance of our shares. All of our senior management members have entered into performance contracts with us. Under this system, the senior management members' compensation system has three components, namely, fixed salaries, performance bonuses and stock appreciation rights. The variable components in their compensation account for approximately 70% to 75% of our senior management officers' total potential compensation, including up to 25% forming the performance bonus component and approximately 50% to 70% forming the stock appreciation rights component. Variable compensation rewards are linked to the attainment of specific performance targets, such as net income, return on capital and cost reduction targets. The chart below sets forth the components of the total potential compensation for key officers.

	% Fixed salary	% Stock appreciation rights	% Performance bonus
Chairman	30	70	0
President	25	60	15
Vice President	25	60	15
Department GM	25	50	25

We have granted stock appreciation rights to 300 persons, including members of the board of directors and the supervisory committee, president, vice presidents and departmental managers, general managers and deputy general managers of specialized companies and local subsidiaries. Upon exercise of these stock appreciation rights, members of the senior management will not receive any of our shares, but will, by way of stock appreciation rights, receive a monetary sum that is calculated on the basis of the price of our H shares. In 2004, none of the directors and senior management exercised any of the stock appreciation rights granted to them. Since companies are not permitted to repurchase and hold their own shares for offering stock options under current PRC law, we expect to calculate our book gains and losses on the basis of share prices and in

Table of Contents

accordance with stock appreciation rights measures and make cash payment of such compensations.

Directors and Supervisors Compensation

Our directors and supervisors, who hold senior management positions or are otherwise employed by us, receive compensation in the form of salaries, housing allowances, other allowances and benefits in kind, including our contribution to the pension plans for these directors and supervisors.

The aggregate amount of salaries, housing allowances, other allowances and benefits in kind paid by us to the five highest paid individuals of PetroChina during the year ended December 31, 2004 was RMB 1,645,118. We paid RMB 39,683 as our contribution to the pension plans in respect of those individuals in the year ended December 31, 2004.

The aggregate amount of salaries or other compensation, housing allowances, other allowances and benefits in kind paid by us to our directors, who hold senior management positions or are otherwise employed by us, during the year ended December 31, 2004 was RMB 1,594,932.

Save as disclosed, no other payments have been paid or are payable, in respect of the year ended December 31, 2004, by us or any of our subsidiaries to our directors. In addition, we have no service contracts with our directors that provide for benefits to our directors upon the termination of their employment with us.

In 2004, we paid RMB 43,063 as our contribution to the pension plans in respect of our directors and supervisors, who hold senior management positions or are otherwise employed by us. The aggregate amount of salaries or other compensation, housing allowances, other allowances and benefits in kind paid by us to our supervisors, who hold senior management positions or are otherwise employed by us, during the year ended December 31, 2004 was RMB 417,411.

Board Practices

Our board of directors has four principal committees: an audit committee, an investment and development committee, an evaluation and remuneration committee and a health, safety and environment committee.

Audit Committee

Our audit committee is currently composed of three non-executive independent directors, Mr. Franco Bernabè, Mr. Chee-Chen Tung and Mr. Liu Hongru, and one non-executive director, Mr. Gong Huazhang. Mr. Franco Bernabè serves as the chairman of the committee. Under our audit committee charter, the chairman of the committee must be an independent director and all resolutions of the committee must be approved by independent directors. The audit committee's major responsibilities include:

supervising the integrity of financial reporting process to ensure fair, transparent and true financial disclosure;

evaluating the effectiveness of the internal control and risk management framework;

inspecting and supervising the effectiveness of the internal audit functions;

reviewing the independent auditing process, evaluating the performance of external auditors annually and raising proposals together with the supervisory committee to the shareholders' meetings with respect to the retention of external auditors and the compensation of such external auditors;

Table of Contents

receiving and dealing with submissions and complaints by employees regarding accounting, internal control or auditing matters.

Investment and Development Committee

The current members of our investment and development committee are Ren Chuanjun, as chairman of the committee, and Su Shulin. The investment and development committee's major responsibilities include:

studying strategic action plans as proposed by our President and making recommendations to the board of directors;

studying the annual investment budget as proposed by our President and making recommendations to the board of directors; and

reviewing preliminary feasibility studies and feasibility studies for material investment projects requiring approval of the board of directors and making recommendations to the board of directors.

Evaluation and Remuneration Committee

The current members of our evaluation and remuneration committee are Liu Hongru, as chairman of the committee, Mr. Zheng Hu and Mr. Zou Haifeng. The evaluation and remuneration committee's major responsibilities include:

managing the performance evaluations for our President and monitoring performance evaluations led by our President for Senior Vice President, Vice Presidents, Chief Financial Officer and other senior management personnel;

studying our incentive plan, compensation plan and stock appreciation rights plan, supervising and evaluating the implementation of these plans and making recommendations for improvements to and perfection of such plans.

Health, Safety and Environment Committee

The current members of our health, safety and environment committee are Duan Wende, as chairman of the committee, Mr. Zhou Jiping and Mr. Wang Fucheng. The health, safety and environment committee's major responsibilities include:

supervising the effective implementation of our Health, Safety and Environmental Protection Plan;

making recommendations to the board of directors and our President for major decisions with respect of health, safety and environmental protection;

inquiring the occurrence of and responsibilities for material accidents and supervising the remedial measures of material accidents.

Table of Contents**Employees**

As of December 31, 2002, 2003 and 2004, we had 419,598, 417,229 and 424,175 employees, respectively. The table below sets forth the number of our employees by business segment as of December 31, 2004.

	Employees	% of total
Exploration and production	236,591	55.8
Refining and marketing	116,813	27.5
Chemicals and marketing	57,765	13.6
Natural gas and pipeline	10,191	2.4
Other ⁽¹⁾	2,815	0.7
 Total	 424,175	 100.0%

⁽¹⁾ Including PetroChina Exploration & Development Research Institute, PetroChina Plan and Design Institute, PetroChina Refining & Chemicals Technology Research Center, and the management of our headquarters and specialized companies.

Our employees participate in various retirement benefit plans organized by municipal and provincial governments whereby we are required to make monthly insurance contributions to these plans at rates ranging from 16% to 22% of the employees' salary. Expenses incurred by us in connection with the retirement benefit plans were approximately RMB 2,109 million, RMB 2,193 million and RMB 2,476 million (US\$299 million), respectively, for the three years ended December 31, 2002, 2003 and 2004, respectively.

In 2004, we have not experienced any strikes, work stoppages, labour disputes or actions which affected the operation of any of our businesses. We consider our relationship with our employees to be good.

Share Ownership

Director Zou Haifeng currently has 3,550 A shares of Jilin Chemical Industrial Stock Company, a subsidiary of PetroChina. Other directors, senior officers and supervisors do not have share ownership in PetroChina or any of PetroChina's affiliates. We have granted stock appreciation rights relating to our H shares to our directors, senior officers and supervisors. Upon exercise of these stock appreciation rights, members of the senior management will not receive any of our shares, but will, by way of stock appreciation rights, receive a momentary sum which is calculated on the basis of the price of our H shares. Because the relevant PRC laws limit the ownership of the H shares of a company incorporated under the PRC laws to only non-PRC nationals, and companies are not permitted to repurchase and hold their own shares for offering stock appreciation rights under current PRC law, our directors, senior officers and supervisors do not hold our H shares under the stock options granted to them. Instead, we expect to calculate the book gains and losses on the basis of share prices and in accordance with our stock appreciation rights granting criteria to be finalized, and make cash payments of such compensation to our directors, senior officers and supervisors.

Table of Contents

ITEM 7 MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

Major Shareholders

Prior to the restructuring of the CNPC group in November 1999, CNPC was one of the largest companies in the PRC in terms of sales. As part of the restructuring of the CNPC group, CNPC transferred to PetroChina substantially all its businesses and assets in China relating to the exploration and production of crude oil and natural gas, refining and marketing, chemicals and natural gas sales and transmission. Since the restructuring of the CNPC group, CNPC has engaged in crude oil and natural gas exploration and production business activities outside the PRC and limited chemicals production and retail of refined products. CNPC's primary business activities relate to the provision of various services and products to PetroChina.

PetroChina was established on November 5, 1999 with CNPC as its sole promoter. As of December 31, 2004, CNPC owned 158,241,758,000 State-owned shares, representing approximately 90% of the share capital of PetroChina, and, accordingly, CNPC is our controlling shareholder.

The shares held by CNPC are state-owned shares in the share capital of PetroChina. However, CNPC has identical voting rights. Holders of state-owned shares and H shares are deemed to be shareholders of different classes for certain matters which may have effect on their respective interest.

As of December 31, 2004, Warren E. Buffett, Berkshire Hathaway Inc., OBH, Inc., National Indemnity Company, GEICO Corporation and Government Employees Insurance Company, as a group as defined under Rule 13d-1(b)(1)(ii)(J) of the Securities Exchange Act of 1934, as amended, collectively owned 2,347,761,000 H shares, representing approximately 1.3% of the total outstanding share capital of PetroChina, or approximately 13.4% of the H shares of PetroChina.

Related Party Transactions

As CNPC directly owns approximately 90% of our total outstanding share capital, transactions between us and CNPC constitute connected transactions for us under the Listing Rules of the Hong Kong Stock Exchange. The waiver in respect of these connected transactions by Hong Kong Stock Exchange is valid from January 1, 2003 to December 31, 2005.

CNPC and PetroChina are expected to continue to conduct all of the connected transactions referred to in the following agreements:

Comprehensive Products and Services Agreement

CNPC and PetroChina will continue to conduct the transactions contemplated by the Comprehensive Products and Services Agreement which was entered into between CNPC and us on March 10, 2000, under which: (1) we have agreed to provide to CNPC, and (2) CNPC has agreed to provide to us, a range of products and services which may be required from time to time by either party.

Products and Services Provided by Us to the CNPC Group

Under the Comprehensive Products and Services Agreement, we have agreed to provide to CNPC certain products and services, including crude oil, natural gas, refined products, chemical products, and services such as supply of water, electricity, gas and heating, quantifying and measuring services and quality inspection services.

Table of Contents

Products and Services Provided by the CNPC Group to Us

CNPC has agreed to supply us a wider range of products and services, including the following categories:
construction and technical services,

production services,

supply of material services,

social services,

ancillary services, and

financial services.

Individual Product and Service Implementation Agreement

We and our affiliates may enter into, from time to time and as required, individual Product and Service Implementation Agreements with CNPC and its affiliates.

As the individual Product and Service Implementation Agreement is only intended to provide for the supply of specific products and services contemplated by the Comprehensive Product and Services Agreement, these agreement does not constitute a new connected transaction.

Land Use Rights Leasing Contract

We and CNPC will continue to perform the Land Use Rights Leasing Contract entered into between CNPC and us on March 10, 2000, under which CNPC has agreed to lease the land use rights of an aggregate of 42,476 parcels of land to us in connection with our business and operations, covering an aggregate area of approximately 1,145 million square meters located throughout the PRC, for a term of 50 years for an annual fee in the amount of RMB 2,000 million. The total amount of the fees payable after ten years from the effective date of the contract may be adjusted (to reflect market conditions at such time of adjustment, including market prices, inflation or deflation and other important factors) by consent reached between CNPC and us. In addition, any governmental, legal or other administrative taxes and fees to be paid in connection with the leased properties will be borne by CNPC. However, we have agreed to share proportionately on a reasonable basis with CNPC any additional amount of such taxes and fees payable as a result of changes in policies of the PRC government after the effective date of this contract.

Buildings Leasing Contract and Supplementary Building Leasing Agreement

We and CNPC will continue to perform the Buildings Leasing Contract entered into between CNPC and us on March 10, 2000, under which CNPC has agreed to lease to us a total of 191 buildings covering an aggregate area of 269,770 square meters.

These 191 buildings were leased to us at a price of RMB 145 per square meter per year, or is, at an aggregate annual fee of RMB 39,116,650, for a term of 20 years. In addition, we have agreed to pay for any governmental, legal or other administrative taxes and maintenance charges to be paid in connection with these 191 buildings.

Subsequent to the execution of this contract, on September 26, 2002, we entered into a Supplemental Buildings Leasing Agreement with CNPC, under which CNPC agreed to lease to us an additional 404 buildings covering an aggregate area of 442,730 square meters.

We entered into this Supplementary Building Leasing Agreement as a result of the expansion of our production and operations. These 404 buildings are mainly used for the crude oil and natural gas exploration activities, the West-East natural gas pipeline project and the construction of the refining and chemical products production base in the northeastern region of the PRC.

Table of Contents

We have agreed to pay approximately RMB 157 million annually for these 404 buildings under the Supplemental Buildings Leasing Agreement. We and CNPC will adjust the area and quantity of the properties leased under the Building Leasing Contract and the Supplemental Buildings Leasing Agreement every three years by taking into account changes in the production and operations of each party as well as in the market price. The Supplemental Buildings Leasing Agreement came into effect on January 1, 2003 and will expire simultaneously with the Building Leasing Contract. However, provisions in the Building Leasing Contract that do not conflict with the Supplemental Buildings Leasing Agreement will remain in full force.

Intellectual Property Licensing Contracts

We and CNPC will continue to perform the three intellectual property licensing contracts, including a Trademark Licensing Contract, a Patent and Know-how Licensing Contract and a Computer Software Licensing Contract entered into between CNPC and us on March 10, 2000. Under these licensing contracts, CNPC has granted us exclusive rights to use certain trademarks (including the CNPC trademark), patents, know-how and computer software of CNPC for no consideration. These intellectual property rights relate to the assets and businesses of CNPC that were transferred to us in the restructuring of the CNPC group.

Contract for the Transfer of Rights under Production Sharing Contracts

We and CNPC will continue to perform the Contract for the Transfer of Rights under Production Sharing Contracts dated March 10, 2000. As part of the restructuring, CNPC transferred to us relevant rights and obligations, excluding the rights and obligations relating to CNPC's supervisory functions, under 23 Production Sharing Contracts entered into by CNPC with a number of international oil and natural gas companies.

Guarantee of Debts Contract

We and CNPC will continue to perform the Guarantee of Debts Contract dated March 10, 2000. As part of the restructuring of the CNPC group, we assumed all of CNPC's debts relating to the assets transferred to us in the restructuring of the CNPC group.

Under this contract, CNPC has agreed to guarantee certain of our debts totalling approximately RMB 756 million (including principal and interest) as of December 31, 2004 for no consideration.

Deposits with China Petroleum Finance Company Limited

We placed deposits with China Petroleum Finance Company Limited, or CP Finance, a subsidiary of CNPC and a non-bank financial institution approved by the People's Bank of China, in the amount of RMB 2,861 million, RMB 2,331 million and RMB 1,782 million (US\$215 million) as of December 31, 2002, 2003 and 2004, respectively. The deposits yield interest at prevailing saving deposit rates.

Related Party Transactions with CNPC (HK)

As part of the restructuring of the CNPC group and in preparation for our listing on HKSE, and as disclosed in our prospectus dated March 27, 2000, CNPC entered into the Contract for the Transfer of Rights under Production Sharing Contracts with us whereby the relevant rights and obligations (other than the supervisory functions related to CNPC's role as representative of the PRC government) of CNPC under certain contracts, including the Xinjiang Karamay Oilfield Area Blocks 9(1)-9(5) Petroleum Contract dated July 1, 1996, entered into between CNPC and Hafnium Limited, or the Xinjiang Contract, and the Liaohe Oilfield Leng Jiapu Area Petroleum Contract dated December 30, 1997, entered into between CNPC and Beckbury International Limited, or the Liaohe Contract, were novated to us.

Table of Contents

CNPC (Hong Kong) Limited, or CNPC (HK) is a 57.5% owned subsidiary of CNPC. CNPC is our controlling shareholder which holds approximately 90% of our issued share capital. Upon the effective novation by CNPC to us of its interests in the above petroleum production contracts (i.e., Xinjiang Contract and the Liaohe Contract), certain transactions under these petroleum production sharing contracts constitute connected transactions between CNPC (HK) and us.

Summary of the major terms and conditions of these related party transactions under the Xinjiang Contract and the Liaohe Contract are as follows:

(1) ***Production sharing and development cost apportionment between CNPC (HK) and us.*** We and CNPC (HK) share the oil and natural gas produced from the Karamay Oilfield Area Blocks 9(1)-9(5), as to 46% by us and 54% by CNPC (HK), and from the Liaohe Oilfield Leng Jiapu Area, as to 30% by us and 70% by CNPC (HK). CNPC (HK) is responsible for all of the development costs in respect of the Karamay Oilfield Area Blocks 9(1)-9(5). We are responsible for 30% and CNPC (HK) is responsible for 70% of the development costs in respect of the Liaohe Leng Jiapu Oilfield.

(2) ***Provision of assistance by us to CNPC (HK).*** We have agreed to provide assistance to CNPC (HK) for, among other things: (i) leasing warehouses, terminal facilities, barges, pipelines and land; (ii) obtaining approvals necessary for the petroleum operations; and (iii) obtaining office space, office supplies, transportation and communication facilities. CNPC (HK) has agreed to pay us an annual assistance fee in the amount of US\$50,000 for each of the Karamay Oilfield Area Blocks 9(1)-9(5) and the Liaohe Leng Jiapu Oilfield Area. The amount of such fee was determined through negotiations by taking into account the actual circumstances and conditions, including the scope of the projects and the level of demand for such assistance. This fee is accounted for as operating costs and shared by us and CNPC (HK) in accordance with procedures described in the Xinjiang Contract and the Liaohe Contract.

(3) ***Payment of training fees.*** In the course of development and operations of each oilfield, CNPC (HK) is obligated to pay us an amount of US\$50,000 annually for training of our personnel for each of the Karamay Oilfield Area Blocks 9(1)-9(5) and the Liaohe Leng Jiapu Oilfield Area. The amount of this fee was determined through negotiations by taking into account the actual circumstances and conditions, including the scope of the projects and the level of demand for training.

(4) ***Sale of crude oil by CNPC (HK) to us.*** CNPC (HK) has the right to deliver its share of oil production from each of the Karamay Oilfield Area Blocks 9(1)-9(5) and the Liaohe Leng Jiapu Oilfield Area to a destination of its choice, except for destinations which infringe on the political interests of the PRC. However, given the transportation costs and the prevailing oil prices, the purchaser of the oil production attributable to CNPC (HK) from each of the Karamay Oilfield Area Blocks 9(1)-9(5) and the Liaohe Leng Jiapu Oilfield Area is likely to be CNPC or its affiliates, including us, which will purchase oil produced in the Karamay Oilfield Area Blocks 9(1)-9(5) and the Liaohe Leng Jiapu Oilfield Area at the market price. Since the entering into of the petroleum production sharing contracts, CNPC (HK) has sold all of its share of the oil production to CNPC or its affiliates, including us. As far as our board of directors is aware, CNPC (HK) intends to continue with this arrangement. Although there is no contractual obligation on us to purchase oil production from the Karamay Oilfield Area Blocks 9(1)-9(5) and the Liaohe Leng Jiapu Oilfield Area, from a commercial perspective, we intend to continue to make such purchases. The price of various grades of crude oil sold will be determined either with reference to the price approved by the relevant PRC authorities or with reference to the prevailing price in arm's length transactions of crude oil of a similar quality in the market, adjusted to take into account the terms of transportation, payment and other factors.

Table of Contents

Loans or Guarantees with Related Parties

As of December 31, 2004, we had unsecured short-term and long-term loans from CP Finance in an aggregate amount of RMB 23,168 million (US\$2,799 million). The average annual interest rate on these loans is 4.55%.

ITEM 8 FINANCIAL INFORMATION
Financial Statements

See pages F-1 to F-62 following Item 19.

Dividend Policy

Our board of directors will declare dividends, if any, in Renminbi with respect to H shares on a per share basis and will pay such dividends in HK dollars. Any final dividend for a financial year shall be subject to shareholders approval. The Bank of New York will convert the HK dollar dividend payments and distribute them to holders of ADSs in U.S. dollars, less expenses of conversion. The holders of the H shares will share proportionately on a per share basis in all dividends and other distributions declared by our board of directors.

The declaration of dividends is subject to the discretion of our board of directors. Our board of directors will take into account factors including the following:

general business conditions;

our financial results;

capital requirements;

contractual restrictions on the payment of dividends by us to our shareholders or by our subsidiaries to us;

our shareholders' interests;

the effect on our debt ratings; and

other factors our board of directors may deem relevant.

We may only distribute dividends after we have made allowance for:

recovery of losses, if any;

allocations to the statutory common reserve fund;

allocations to the statutory common welfare fund; and

allocations to a discretionary common reserve fund if approved by our shareholders.

The minimum and maximum aggregate allocations to the statutory funds are 15% and 20%, respectively, of our net income determined in accordance with PRC accounting rules. Under PRC law, our distributable earnings will be equal to our net income determined in accordance with PRC accounting rules or IFRS, whichever is lower, less allocations to the statutory and discretionary funds.

Subject to the above and to ensure that our dividend policy is consistent with that of major international oil and gas companies, we currently expect that we will distribute as dividends

Table of Contents

approximately 40% to 50% of our reported net income for all years commencing on or after January 1, 2000. We believe that our dividend policy strikes a balance between two important goals:

providing our shareholders with a competitive return on investment; and

assuring sufficient reinvestment of profits to enable us to achieve our strategic objectives.

An interim dividend of RMB 0.115919 (US\$0.0140) per H share (inclusive of applicable tax) for the six months ended June 30, 2004 was paid to our shareholders on October 8, 2004. On May 26, 2005, our shareholders approved the payment of a final dividend of RMB 0.147511 (US\$0.0178) per H share (inclusive of applicable tax) for the year ended December 31, 2004. The final dividend was calculated on the basis of 45% of our net income for the year ended December 31, 2004. The final dividend was paid on June 10, 2005.

Significant Changes

None.

Table of Contents**ITEM 9 THE OFFER AND LISTING****Nature of the Trading Market and Market Price Information**

Our ADSs, each representing 100 H shares, par value RMB 1.00 per H share, have been listed and traded on the New York Stock Exchange since April 6, 2000 under the symbol PTR. Our H shares have been listed and traded on the Hong Kong Stock Exchange since April 7, 2000. Prior to these listings, there was no public market for our equity securities. The New York Stock Exchange and the Hong Kong Stock Exchange are the principal trading markets for our ADSs and H shares, respectively.

As of December 31, 2004, there were 17,582,418,000 H shares issued and outstanding. As of December 31, 2004, there were 185 registered holders of American depository receipts evidencing 24,240,874 ADSs. The depository of the ADSs is The Bank of New York.

The high and low closing sale prices of the H shares on the Hong Kong Stock Exchange and of the ADSs on the New York Stock Exchange for each quarterly period since listing in 2000 and for each month in 2005 (through June 24, 2005) are set forth below.

ITEM 10 ADDITIONAL INFORMATION
Memorandum and Articles of Association

Our Articles of Association Currently in Effect

The following is a summary based on the significant provisions of our articles of association currently in effect, which was filed with the Commission as an exhibit to our annual report on Form 20-F for the fiscal year ended December 31, 2001 (File No. 1-15006). We hereby incorporate by reference the relevant exhibit to this annual report.

Enforceability of Shareholders' Rights

Our articles of association provide that all differences or claims between a holder of H shares and us;

between a holder of H shares and any of our directors, supervisors, general managers, deputy general managers or other senior officers; or

between a holder of H shares and a holder of State-owned shares, arising from any provision of the articles of association, any right or obligation conferred or imposed by the PRC Company Law or any other relevant law or administrative regulation which concerns our affairs must, with certain exceptions, be referred to arbitration at either the China International Economic and Trade Arbitration Commission in the PRC or the Hong Kong International Arbitration Center. Our articles of association provide that such arbitration will be final and conclusive.

Restrictions on Transferability and the Share Register

The articles of association provide that PRC investors are not entitled to be registered as holders of H shares. As provided in the articles of association, we may refuse to register a transfer of H shares unless:

- any relevant transfer fee is paid;

- the instrument of transfer is accompanied by the share certificates to which it relates, or such other evidence is given as may be reasonably necessary to show the right of the transferor to make the transfer;

- the instrument of transfer is in respect of one class of shares only; and

- the transfer is conducted in accordance with the laws and administrative regulations of or required by the securities exchanges on which the shares are listed.

We are required to keep a register of our shareholders which shall be comprised of various parts, including one part which is to be maintained in Hong Kong in relation to H shares to be listed on the Hong Kong Stock Exchange.

Dividends

We may distribute dividends twice a year, with the final dividend for any financial year being subject to the approval of the shareholders by way of an ordinary resolution. The articles of association allow for distribution of dividends in the form of cash or shares.

Dividends may only be distributed, however, after allowance has been made for:

- recovery of losses, if any;

- allocations to the statutory common reserve fund;

Table of Contents

allocations to the statutory common welfare fund; and

allocations to a discretionary common reserve fund if approved by the shareholders.

The minimum and maximum aggregate allocations to the statutory funds are 15% and 20%, respectively, of our net income determined in accordance with PRC accounting rules.

The articles of association require us to appoint on behalf of the holders of H shares a receiving agent which is registered as a trust corporation under the Trustee Ordinance of Hong Kong to receive dividends declared by us in respect of the H shares on behalf of such shareholders. The articles of association require that cash dividends in respect of H shares be declared in Renminbi and paid by us in HK dollars.

Voting Rights and Shareholders Meetings

Our board of directors will convene a shareholders annual general meeting once every year and within six months from the end of the preceding financial year. Our board will convene an extraordinary general meeting within two months of the occurrence of any one of the following events:

where the number of directors is less than the number stipulated in the PRC Company law or two-thirds of the number specified in our articles of association;

where our unrecovered losses reach one-third of the total amount of our share capital;

where shareholders holding 10% or more of our issued and outstanding voting shares request in writing the convening of an extraordinary general meeting; or

where our board deems necessary or our board of supervisors so request.

Meetings of a special class of shareholders must be called in certain enumerated situations when the rights of the holders of such class of shares may be modified or adversely affected, as discussed below. Resolutions proposed by shareholders holding 5% or more of the total number of voting shares will be included in the agenda for the relevant annual general meeting if they are matters which fall within the scope of the functions and powers of shareholders in general meeting.

All shareholders meetings must be convened by our board by written notice given to shareholders not less than 45 days before the meeting. Based on the written replies received by us 20 days before a shareholders meeting, we will calculate the number of voting shares represented by shareholders who have indicated that they intend to attend the meeting. Where the number of voting shares represented by those shareholders amount to more than one-half of our total voting shares, we may convene the shareholders general meeting, regardless of the number of shareholders who actually attend. Otherwise, we will, within five days, inform the shareholders again of the motions to be considered and the date and venue of the meeting by way of public announcement. After the announcement is made, the shareholders meeting may be convened. The accidental omission by us to give notice of a meeting to, or the non-receipt of notice of a meeting by, a shareholder will not invalidate the proceedings at that shareholders meeting.

Shareholders at meetings have the power, among other things, to approve or reject our profit distribution plans, the annual budget, the financial statements, an increase or decrease in share capital, the issuance of debentures, the merger or liquidation of PetroChina and any amendment to our articles of association. In addition, the rights of a class of shareholders may not be modified or abrogated, unless approved by a special resolution of all shareholders at a general shareholders meeting and by a special resolution of shareholders of that class of shares at a separate meeting. Our articles of association enumerate, without limitation, certain amendments which would be deemed to be a modification or abrogation of the rights of a class of shareholders, including increasing or decreasing the number of shares of a class disproportionate to increases or decreases

Table of Contents

of other classes of shares, removing or reducing rights to receive dividends in a particular currency or creating shares with voting or equity rights superior to shares of such class.

Each H share is entitled to one vote on all matters submitted to a vote of our shareholders at all shareholders meetings, except for meetings of a special class of shareholders where only holders of shares of the affected class are entitled to vote on the basis of one vote per share of the affected class.

Shareholders are entitled to attend and vote at meetings either in person or by proxy. Proxies must be in writing and deposited at our legal address, or such other place as is specified in the meeting notice, not less than 24 hours before the time for holding the meeting at which the proxy proposes to vote or the time appointed for the passing of the relevant resolutions. When the instrument appointing a proxy is executed by the shareholder's attorney-in-fact, such proxy when deposited must be accompanied by a notarially certified copy of the relevant power of attorney or other authority under which the proxy was executed.

Except for those actions discussed below which require supermajority votes, resolutions of the shareholders are passed by a simple majority of the voting shares held by shareholders who are present in person or by proxy. Special resolutions must be passed by more than two-thirds of the voting rights represented held by shareholders who are present in person or by proxy.

The following decisions must be adopted by special resolution:

an increase or reduction of our share capital or the issue of shares of any class, warrants and other similar securities;

the issue of our debentures;

our division, merger, dissolution and liquidation;

amendments to our articles of association; and

any other matters considered by the shareholders in a general meeting and which they have resolved by way of an ordinary resolution to be of a nature which may have a material impact on us and should be adopted by special resolution.

All other actions taken by the shareholders, including the appointment and removal of our directors and independent auditors and the declaration of normal dividend payments or stock distributions, will be decided by an ordinary resolution of the shareholders.

In addition, certain amendments to the articles of association require the approval and consent of the relevant PRC authorities.

Any shareholder resolution which is in violation of any laws or regulations of the PRC or the articles of association will be null and void.

Board of Directors

Directors will be elected by shareholders at a general meeting. Because the shares do not have cumulative voting rights, a holder of a majority of our shares is able to elect all of the directors. Directors are elected for a term of three years.

Meetings of the board of directors shall be held at least twice every year and shall be convened by the Chairman of the board of directors, who shall notify all directors 10 days before each meeting.

Our board of directors is accountable to the shareholders in general meetings and exercises the following functions and powers to:

(a) be responsible for the convening of shareholders' meetings and reporting on its work to the shareholders at such meetings;

Table of Contents

- (b) implement the resolutions passed by the shareholders in general meetings;
- (c) determine our business plans and investment proposals;
- (d) formulate our annual preliminary and final budgets;
- (e) formulate our profit distribution proposal and loss recovery proposals;
- (f) formulate proposals for the increase or reduction of our registered capital and the issuance of our debentures;
- (g) draw up plans for our merger, division or dissolution;
- (h) decide on our internal management structure;
- (i) appoint or remove our president and to appoint or remove the vice presidents and other senior officers, including the financial controller, based on the recommendation of the general manager, and to decide on their remuneration;
- (j) formulate our basic management system;
- (k) formulate proposals for any amendment of our articles of association; and
- (l) exercise any other powers conferred by the shareholders in general meetings.

Except for items (f), (g) and (k), which require the affirmative vote of more than two-thirds of all of our directors, resolutions on any other items may be approved by the affirmative vote of a simple majority of our directors.

In addition to obligations imposed by laws, administrative regulations or the listing rules of the stock exchanges on which our H shares are listed, the articles of association place on each of our directors, supervisors, president, vice presidents and any other senior officers a duty to each shareholder, in the exercise of our functions and powers entrusted to such person:

not to cause us to exceed the scope of business stipulated in our business license;

to act honestly in our best interests;

not to expropriate our property in any way, including, without limitation, usurpation of opportunities which benefit us; and

not to expropriate the individual rights of shareholders, including, without limitation, rights to distributions and voting rights, save and except according to a restructuring which has been submitted to the shareholders for their approval in accordance with the articles of association.

Our articles of association further place on each of our directors, supervisors, president, vice presidents and senior officers:

a duty, in the exercise of such person's powers and discharge of such person's duties, to exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances;

a fiduciary obligation, in the exercise of our powers entrusted to him or her, not to place himself or herself in a position where his or her duty to us and his or her interests may conflict; and

a duty not to direct a person or entity related or connected to a director, supervisor, president, vice president or senior officer in certain relationships enumerated in the articles of association to act in a manner which such director, supervisor, president, vice president or senior officer is prohibited from doing.

Subject to compliance with all relevant laws and administrative regulations, the shareholders in a general meeting may by ordinary resolution remove any director before the expiration of his term of

Table of Contents

office. Subject to certain qualifications, a director, supervisor, president, vice president or other senior officer may be relieved of liability for a specific breach of his or her duties by the informed consent of shareholders in a general meeting.

Board of Supervisors

The board of supervisors is composed of seven members appointed to monitor our financial matters: to verify financial reports and other financial information which have been prepared by the board and which are proposed to be presented at shareholders meetings, and

to oversee our directors, president, vice presidents and other senior officers in order to prevent such persons from abusing their authority or infringing upon our interest.

The board of supervisors powers are generally limited to investigating and reporting to shareholders and management on our affairs and to calling shareholders extraordinary general meetings.

One member of the board of supervisors will be an employee representative appointed by our employees. The remaining members will be appointed by the shareholders in a general meeting. One member of the board of supervisors shall be the chairman. A member of the board of supervisors may not be a director, the president, a vice president or the financial controller. The term of office of each member of the board of supervisors is three years, including the term of office of the chairman of the board of supervisors, both of which terms of office are renewable upon re-election and re-appointment. Reasonable expenses incurred by the board of supervisors in carrying out its duties will be paid by us.

The board of supervisors is accountable, and will report, to the shareholders in the shareholders general meetings.

Restrictions on Large or Controlling Shareholders

Our articles of association provide that, in addition to any obligation imposed by laws and administrative regulations or required by the listing rules of the stock exchanges on which our H shares are listed, a controlling shareholder shall not exercise his voting rights in a manner prejudicial to the interests of the shareholders generally or of some part of the shareholders:

to relieve a director or supervisor from his or her duty to act honestly in our best interests;

to approve the expropriation by a director or supervisor of our assets in any way, including, without limitation, opportunities which may benefit us; or

to approve the expropriation by a director or supervisor of the individual rights of other shareholders, including, without limitation, rights to distributions and voting rights, except according to a restructuring of our company which has been submitted for approval by the shareholders in a general meeting in accordance with our articles of association.

A controlling shareholder, however, will not be precluded by our articles of association or any laws and administrative regulations or the listing rules of the stock exchanges on which our H shares are listed from voting on these matters.

A controlling shareholder is defined by our articles of association as any person who acting alone or in concert with others:

is in a position to elect more than one-half of the board of directors;

has the power to exercise, or to control the exercise of, 30% or more of our voting rights;

holds 30% or more of our issued and outstanding shares; or

Table of Contents

has de facto control of us in any other way.

Amended Articles of Association Pending for Approval

In May 2005, our shareholders approved our amended articles of association at the annual general meeting of shareholders, which is subject to approval by the State-owned Assets Supervision and Administration Commission of the PRC, or SASAC, before they become effective. Accordingly, we are still governed by our current articles of association in effect, pending this approval. We expect this approval to be granted in due course.

In this subsection, we describe the significant changes that will come into effect upon the approval of SASAC. In the subsection above, we describe our current articles of association. Both subsections must be read in conjunction in order to understand how we will function after the amended articles of association have been approved. We have filed our amended articles of association with the Commission as an exhibit to this annual report on Form 20-F.

The amended articles of associations increase the minimum frequency of mandatory meetings of the board of directors from twice to four times every year and remove the explicit requirement of notifying all directors 10 days before each meeting.

In addition, the amended articles of associations add, among others, the following provisions:

Share Certificates and Register of Shareholders

The amended articles of associations provide that we will make the following documents available at our Hong Kong representative office for inspection by the public and shareholders free of charge and for copying by shareholders at reasonable charges:

a complete duplicate of the register of shareholders;

a report showing the status of our issued share capital;

the latest audited financial statements, directors' report, auditors' report, and supervisors' Reports;

our special resolutions;

reports showing the number and nominal value of securities repurchased by us since the end of the last financial year, the aggregate amount paid for such securities and the maximum and the minimum prices paid in respect of each class of securities repurchased;

a copy of the latest annual examination report filed with the State Administration of Industry and Commerce of the PRC; and

for shareholders only, copies of the shareholder meetings' minutes.

Shareholders' General Meetings

The amended articles of associations provide that when any shareholder is required to abstain from voting on any particular resolution or restricted to voting only for or against any particular resolution under the Listing Rules, any votes cast by or on behalf of such shareholder in contravention of such requirement or restriction shall not be counted.

Board of Directors

The amended articles of associations provide that when a director or any of his associates has a material interest in any board resolution, the relevant transaction will be dealt with by conducting a board meeting rather than circulating written board resolution. If an independent non-executive director and its affiliates has no material interests in the transaction, he should be present at such board meeting.

Table of Contents

Secretary of the Board of Directors

The amended articles of associations impose additional responsibilities upon the secretary of our board of directors, who will

organize board meetings and general meetings; and

circulate minutes of the meetings of the board of directors to all directors for their signature and records within 14 days after the board meeting is held, and make the minutes available for inspection.

Financial and Accounting Systems and Profit Distribution

The amended articles of associations provide that we will not exercise our power to forfeit the unclaimed dividends until after the expiry of the applicable limitation period under the relevant PRC law.

Material Contracts

Incorporated by reference to our Registration Statement on Form F-1 (Registration No. 333-11566) and our annual reports on Form 20-F for the fiscal years ended December 31, 1999 (File No. 1-15006), December 31, 2000 (File No. 1-15006), December 31, 2001 (File No. 1-15006), December 31, 2002 (File No. 1-15006) and December 31, 2003 (File No. 1-15006), to which our material contracts were filed as exhibits. For information regarding certain material contracts, see Item 7 Major Shareholders and Related Party Transactions Related Party Transactions and the material contracts that we have filed with the Commission as exhibits to this annual report.

Exchange Controls

The Renminbi currently is not a freely convertible currency. We receive most of our revenues in Renminbi. A portion of our Renminbi revenues must be converted into other currencies to meet our foreign currency obligations. We have substantial requirements for foreign currency, including:

debt service on foreign currency-denominated debt;

purchases of imported equipment and materials; and

payment of any dividends declared in respect of the H shares.

Under the existing foreign exchange regulations in China, we may undertake current account foreign exchange transactions, including the payment of dividends, without prior approval from the State Administration of Foreign Exchange by producing commercial documents evidencing such transactions, provided that they are processed through Chinese banks licensed to engage in foreign exchange transactions. The PRC government has stated publicly that it intends to make the Renminbi freely convertible in the future. However, uncertainty exists as to whether the PRC government may restrict access to foreign currency for current account transactions if foreign currency becomes scarce in the PRC.

Foreign exchange transactions under the capital account, including principal payments with respect to foreign currency-denominated obligations, continue to be subject to limitations and require the prior approval of the State Administration of Foreign Exchange. These limitations could affect our ability to obtain foreign exchange through debt financing, or to obtain foreign exchange for capital expenditures.

We have been, and will continue to be, affected by changes in exchange rates in connection with our ability to meet our foreign currency obligations and will be affected by such changes in connection with our ability to pay dividends on the H shares in Hong Kong dollars and on ADSs in US dollars. We believe that we have or will be able to obtain sufficient foreign exchange to continue

Table of Contents

to satisfy these obligations. We do not engage in any financial contract or other arrangement to hedge our currency exposure.

We are not aware of any other PRC laws, decrees or regulations that restrict the export or import of capital or that affect the remittance of dividends, interest or other payments to non-resident holders.

Taxation

The following discussion addresses the main PRC tax consequences of the ownership of H shares or ADSs purchased in connection with the global offering and held by the investor as capital assets.

Dividends and Individual Investors

Under the Provisional Regulations of China Concerning Questions of Taxation on Enterprises Experimenting with the Share System (the Provisional Regulations) and other applicable tax laws and regulations, dividends paid by PRC companies on shares experimenting with the share system to individuals are generally subject to a PRC withholding tax of 20%. However, on July 21, 1993, the PRC State Administration of Taxation issued the Notice Concerning the Taxation of Gains on Transfer and Dividends from Shares (Equities) Received by Foreign Investment Enterprises, Foreign Enterprises and Foreign Individuals (the Tax Notice). Under the Tax Notice, dividends paid by a PRC company to foreign persons with respect to shares listed on an overseas stock exchange (Overseas Shares), including the H shares and ADSs, are not subject to PRC withholding tax for the time being.

The Individual Income Tax Law of the PRC was amended effective January 1, 1994 and states that it supersedes any contradictory prior administrative regulation concerning individual income tax. The amended Individual Income Tax Law can be interpreted as providing that all foreign individuals are subject to the 20% withholding tax on dividends paid by a PRC company on its Overseas Shares unless specifically exempted by the financial authority of the State Council of the PRC. However, in a letter dated July 26, 1994 to the former State Commission for Restructuring the Economic System, the former State Council Securities Committee and the China Securities Regulatory Commission, the PRC State Administration of Taxation restated the exemption. In the event that the letter is withdrawn, a 20% tax may be withheld on dividends paid to you, subject to reduction by an applicable tax treaty between China and the country where you reside. To date, the relevant tax authorities have not collected withholding tax from dividend payments on such shares exempted under the Tax Notice.

Dividends and Foreign Enterprises

According to the Provisional Regulations and other applicable tax laws and regulations, dividends paid by PRC companies to foreign enterprises are ordinarily subject to a PRC withholding tax levied at a flat rate of 20%. However, according to the Tax Notice, a foreign enterprise with no permanent establishment in China receiving dividends paid on Overseas Shares will temporarily not be subject to the 20% withholding tax. If such withholding tax becomes applicable in the future, such rate may still be reduced under relevant tax treaties, if applicable.

Tax Treaties

If you are a resident or citizen of a country that has entered into a double-taxation treaty with the PRC, you may be entitled to a reduction in the amount of tax withheld, if any, imposed on the payment of dividends. The PRC currently has such treaties with a number of countries, including but not limited to:

the United States;

Table of Contents

Australia;

Canada;

France;

Germany;

Japan;

Malaysia;

Singapore;

the United Kingdom; and

the Netherlands.

Under each one of such treaties, the rate of withholding tax imposed by China's taxation authorities is generally reduced. For example, under the double taxation treaty between China and the United States, China may tax dividends paid by us to an eligible U.S. holder up to a maximum of 10% of their gross amount. Under the treaty, an eligible U.S. holder is a person who, by reason of domicile, residence, place or head office, place of incorporation or any other criterion of similar nature is subject to taxation in the United States, as applicable under the treaty's treaty shopping provisions .

Capital Gains

The Tax Notice provides that gains realized by foreign enterprises upon the sale of Overseas Shares which are not held by entities established by such enterprises in the PRC and gains realized by foreign individuals upon the sale of Overseas Shares are not subject to withholding tax for the time being. However, as far as individuals are concerned, the Individual Income Tax Law of the PRC, as amended on October 31, 1993 and effective on January 1, 1994, provides for a capital gains tax of 20% on individuals. On January 28, 1994, the Provisions for Implementing the Individual Income Tax Law of the PRC was promulgated which provides that the measures to levy individual income tax on the gains realized on the sale of shares will be made in the future by the Ministry of Finance and subject to the approval of the State Council. On June 20, 1994, February 9, 1996 and March 30, 1998, the Ministry of Finance and the State Administration of Taxation issued notices providing that temporarily no capital gains tax will be imposed on gains from the sale of shares by individuals. However, it is uncertain whether the above exemption for foreign enterprises and foreign individuals will continue to apply or be renewed in the future. If such exemption does not apply or is not renewed, and the Tax Notice is found not to apply, as a holder of H shares or ADSs you may be subject to a 20% tax on capital gains, unless reduced by an applicable double taxation treaty.

Additional PRC Tax Considerations

Under the Provisional Regulations of the People's Republic of China Concerning the Stamp Duty, a stamp duty is not imposed by the PRC on the transfer of shares, such as the H shares or ADSs, of PRC publicly traded companies that take place outside of China.

Significant Differences in Corporate Governance Practices

We have filed a summary of the significant differences in our corporate governance practices for purposes of Section 303A.11 of the New York Stock Exchange Listed Company Manual with the Commission as an exhibit to this annual report on Form 20-F and have disclosed the same on our website, www.petrochina.com.cn, which may be accessed as follows:

1. From our main web page, first click on Investor Relations .
2. Next, click on Corporate Governance Structure .

ITEM 11 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business, we hold or issue various financial instruments which expose us to interest rate and foreign exchange rate risks. Additionally, our operations are affected by certain commodity price movements. We historically have not used derivative instruments for hedging or trading purposes. Such activities are subject to policies approved by our senior management. Substantially all of the financial instruments we hold are for purposes other than trading. We regard an effective market risk management system as an important element of our treasury function and are currently enhancing our systems. A primary objective of our market risk management is to implement certain methodologies to better measure and monitor risk exposures.

The following discussions and tables, which constitute forward-looking statements that involve risks and uncertainties, summarize our market-sensitive financial instruments including fair value, maturity and contract terms. Such discussions address market risk only and do not present other risks which we face in the normal course of business.

Interest Rate Risk

Our interest risk exposure arises from changing interest rates. The tables below provide information about our financial instruments including various debt obligations that are sensitive to changes in interest rates. The tables present principal cash flows and related weighted-average interest rates at expected maturity dates. Weighted-average variable rates are based on effective rates as of December 31, 2002, 2003 and 2004. The information is presented in Renminbi equivalents, our reporting currency.

Foreign Exchange Rate Risk

We conduct our business primarily in Renminbi. However, a portion of our RMB revenues are converted into other currencies to meet foreign currency financial instrument obligations and to pay for imported equipment, crude oil and other materials. Foreign currency payments for imported equipment represented 12.2%, 15.5% and 18.6% of our total payments for equipment in 2002, 2003 and 2004 respectively. Foreign currency payments for imported crude oil and other materials represented 7.7%, 10.8% and 9.6% of our total payments for materials in 2002, 2003 and 2004 respectively.

The Renminbi is not a freely convertible currency. Limitation in foreign exchange transactions imposed by the PRC government could cause future exchange rates to vary significantly from current or historical exchange rates. The tables below provide information about our financial instruments including foreign currency denominated debt instruments that are sensitive to foreign currency exchange rates. The tables below summarize such information by presenting principal cash flows and related weighted-average interest rates at expected maturity dates in RMB equivalents, using the exchange rates in effect as of December 31, 2002, 2003 and 2004, respectively.

- ⁽¹⁾ Due to the declining interest rates in recent years in China, the PRC government has implemented a program to adjust interest rates on certain fixed RMB loans periodically to reflect the market rates in effect published by the People's Bank of China, or the PBOC, from time to time. As a result, these previously fixed RMB loans are categorized as variable rate loans as of December 31, 2002, 2003 and 2004. The newly adjusted rates usually become effective one year after the announcement by the PBOC. The average interest rates on these loans are calculated based on the then effective rates as of December 31, 2002, 2003 and 2004, respectively.

Commodity Price Risk

We are engaged in a broad range of petroleum related activities. The hydrocarbon commodity markets are influenced by global as well as regional supply and demand conditions. The PRC government currently publishes prices for onshore crude oil, gasoline and diesel according to international benchmark prices. A decline in prices of crude oil and refined products could adversely affect our financial performance. We historically have not used commodity derivative instruments to hedge the potential price fluctuations of crude oil and other refined products. Therefore, during 2002, 2003 and 2004, we were exposed to the general price fluctuations of broadly traded oil and gas commodities.

ITEM 15 CONTROLS AND PROCEDURES

Our Chairman, who performs the functions of Chief Executive Officer, and our Chief Financial Officer, after evaluating the effectiveness of PetroChina's disclosure controls and procedures (as defined in the United States Exchange Act Rules 13a-15(e) and 15d(e)) as of the end of the period covered by this annual report, have concluded that, as of such date, PetroChina's disclosure controls and procedures were effective to ensure that material information required to be disclosed in the reports that we file and furnish under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and regulations, except as disclosed in the following paragraphs.

In preparation for certain internal control reporting requirements set forth in Section 404 of the Sarbanes-Oxley Act, we are undertaking company-wide documentation of internal controls, performing the system and process evaluation and testing required (and any necessary remediation) in an effort to comply with such requirements by the effective date for compliance. Our efforts to implement standardized internal control procedures and develop the internal tests necessary to verify the proper application of the internal control procedures and their effectiveness will be a key area of focus for our board of directors, our audit committee and our senior management.

In the course of preparation for the implementation of the requirements of Section 404 of the Sarbanes-Oxley Act, we have identified certain internal control deficiencies that could adversely affect our ability to record, process, summarize and report financial data consistent with our management's assertions in our financial statements. The significant deficiencies and weakness that we have discovered did not relate to fraud or require any material adjustments to our financial statements. Specifically, the identified areas would require us to: (1) enhance our internal audit function by developing and executing a formal audit plan at the head office and regional company level, enhancing its effectiveness and timely communicating identified deficiencies to management, (2) enhance the security and access control of information systems, and (3) improve the experience and knowledge of our employees.

Following the identification of these issues, we commenced planning for remedial measures to make the necessary improvements as soon as practicable. Our board of directors and audit committee have been advised of these issues. Under the supervision and with the participation of our senior management, including our Chairman and Chief Financial Officer, we are in the process of conducting further evaluation of our internal control over financial reporting. We plan to design enhanced processes and controls to address these and any other issues that might be identified through our review. As we are still in the evaluation process, we may identify other conditions that may result in significant deficiencies or material weaknesses in the future. If we discover such conditions, we will take action to correct them. We are committed to taking appropriate steps for remediation, as needed.

Table of Contents

There were no changes in our internal control over financial reporting that occurred during the year ended December 31, 2004 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 16A AUDIT COMMITTEE FINANCIAL EXPERT

Our audit committee is composed of three non-executive independent directors, Messrs. Franco Bernabé, Chee-Chen Tung and Liu Hongru, and one non-executive director, Gong Huazhang. See Item 6 Directors, Senior Management and Employees Board Practices Audit Committee. Our board of directors has determined that Liu Hongru, our non-executive independent director, is qualified as a financial expert, as defined in Item 16A of Form 20-F.

ITEM 16B CODE OF ETHICS

We have adopted a Code of Ethics that applies to our Chief Executive Officer, Chief Financial Officer, Chief Accounting Officer, other executives and senior officers and a separate Code of Ethics that applies to all of our employees. We have included these two Codes of Ethics as Exhibit 16.1 and Exhibit 16.2 to this annual report. These two Codes of Ethics are also posted on our website, *www.petrochina.com.cn*, and may be accessed as follows:

1. From our main web page, first click on Investor Relations .
2. Next, click on Corporate Governance Structure .
3. Finally, click on Code of Ethics for Senior Management or Code of Ethics for Employees of PetroChina Company Limited .

ITEM 16C PRINCIPAL ACCOUNTANT FEES AND SERVICES

PricewaterhouseCoopers has served as PetroChina's independent public accountants for each of the fiscal years in the three-year period ended December 31, 2004, for which audited financial statements appear in this annual report on Form 20-F. The auditors are elected annually at the annual general meeting of PetroChina.

The offices of PricewaterhouseCoopers are located at Prince's Building, 22nd Floor, Central, Hong Kong.

The following table presents the aggregate fees for professional audit services and other services rendered by PricewaterhouseCoopers to PetroChina for each of the years ended December 31, 2003 and 2004.

	December 31,			
	2003	2003	2004	2004
	RMB	US\$	RMB	US\$
	(in millions)			
Audit fees	44	5	43	5
Audit-related fees				
Tax fees				
Other fees			23	3
Total	44	5	66	8

Audit fees consist of fees billed for the annual audit services and other audit services, which are those services that only the external auditor reasonably can provide, and include the group audit, statutory audits, and assistance with and review of documents filed with the Commission.

Table of Contents

Other fees mainly include fees billed for advisory services in assisting our management to evaluate and improve our internal control procedures over financial reporting as required under Section 404 of the Sarbanes-Oxley Act.

Audit Committee Pre-approved Policies and Procedures

Currently, all non-audit services to be provided by our independent public accountants, PricewaterhouseCoopers, must be approved by our audit committee.

During 2004, services relating to all audit-related fees provided to us by PricewaterhouseCoopers were approved by our audit committee in accordance with the *de minimis* exception to the pre-approval requirement provided by paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of PetroChina Company Limited:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income, of cash flows and of changes in equity present fairly, in all material respects, the consolidated financial position of PetroChina Company Limited (the Company) and its subsidiaries (the Group) at December 31, 2003 and 2004, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2004, in conformity with International Financial Reporting Standards. These financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for the opinion expressed above.

International Financial Reporting Standards vary in certain significant respects from accounting principles generally accepted in the United States. The application of the latter would have affected the determination of consolidated net income for each of the three years in the period ended December 31, 2004 and the determination of consolidated shareholders' equity at December 31, 2003 and 2004 to the extent summarized in Note 35 to the consolidated financial statements.

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in millions except for per share data or unless otherwise stated)

1 ORGANIZATION AND PRINCIPAL ACTIVITIES

PetroChina Company Limited (the Company) was established in the People's Republic of China (the PRC or China) on November 5, 1999 as a joint stock company with limited liability as a result of a group restructuring (the Restructuring) of China National Petroleum Corporation (CNPC) in preparation for the listing of the Company's shares in Hong Kong and in the United States of America. (See Note 24.) The Company and its subsidiaries are collectively referred to as the Group.

The Group is principally engaged in (i) the exploration, development and production of crude oil and natural gas, (ii) the refining, transportation, storage and marketing of crude oil and petroleum products, (iii) the production and sale of chemicals, and (iv) the transmission, marketing and sale of natural gas. (See Note 34.)

2 BASIS OF PREPARATION

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). This basis of accounting differs from the accounting principles generally accepted in the United States of America (US GAAP) (Note 35). The statements are prepared on the historical cost convention as modified by the revaluation of certain property, plant and equipment.

The preparation of financial statements in conformity with IFRS requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of current events and actions, actual results ultimately may differ from those estimates.

In September 2002, the Company acquired from CNPC the assets, liabilities and interests related to CNPC's refined products marketing enterprises comprising primarily of service stations and related facilities for RMB 3,200. The Company has accounted for the acquisition in a manner similar to a uniting of interests, whereby the assets and liabilities of the marketing enterprises acquired were accounted for at historical cost to CNPC, and the consolidated financial statements were restated in the prior year to give effect to the acquisition with all periods presented as if the operations of the Company and these marketing enterprises had always been combined. The difference between the RMB 3,200 acquisition price and the net liabilities transferred from CNPC was adjusted against equity.

The consolidated financial statements are expressed in Renminbi (RMB), the national currency of the PRC. Solely for the convenience of the reader, the December 31, 2004, financial statements have been translated into United States dollars at the noon buying rate in New York City on December 31, 2004, for cable transfers in Renminbi as certified for customs purposes by the Federal Reserve Bank of New York of US\$1.00 = RMB 8.2765. No representation is made that the Renminbi amounts could have been, or could be, converted into United States dollars at that rate or at any other certain rate on December 31, 2004, or at any other date.

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

3 SUMMARY OF PRINCIPAL ACCOUNTING POLICIES***(a) Basis of consolidation***

The consolidated financial statements include the financial statements of the Company and its subsidiaries. Subsidiaries are those entities in which the Group has an interest of more than one half of the voting rights or otherwise has power to govern the financial and operating policies.

Subsidiaries are consolidated from the date on which control is transferred to the Group and are no longer consolidated from the date that control ceases. The purchase method of accounting is used to account for the acquisition of subsidiaries. The cost of an acquisition is measured as the fair value of the assets given up, shares issued or liabilities undertaken at the date of acquisition plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest. The excess of the cost of acquisition over the fair value of the Group's share of the net assets of the subsidiary acquired is recorded as goodwill. Intercompany transactions, balances and unrealized gains on transactions between group companies are eliminated; unrealized losses are also eliminated unless cost cannot be recovered. Where necessary, accounting policies of subsidiaries have been changed to ensure consistency with the policies adopted by the Group.

A listing of the Group's principal subsidiaries is set out in Note 36.

(b) Investments in equity affiliates

Investments in equity affiliates are accounted for by the equity method. Under this method the Group's share of the post-acquisition profits or losses of equity affiliates is recognized in the income statement and its share of post-acquisition movements in reserves is recognized in reserves. The cumulative post-acquisition movements are adjusted against the cost of the investment. Equity affiliates are entities in which the Group generally has between 20% and 50% of the voting rights, or over which the Group has significant influence, but which it does not control. Unrealized gains on transactions between the Group and its equity affiliates are eliminated to the extent of the Group's interest in the equity affiliates; unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. The Group's investment in equity affiliates includes goodwill (net of accumulated amortization) on acquisition. When the Group's share of losses in an equity affiliate equals or exceeds its interest in the equity affiliate, the Group does not recognize further losses, unless the Group has incurred obligations or made payments on behalf of the equity affiliate.

A listing of the Group's principal equity affiliates is shown in Note 17.

(c) Foreign currencies

Items included in the financial statements of each entity in the Group are measured using the currency that best reflects the economic substance of the underlying events and circumstances relevant to that entity. Substantially all assets and operations of the Group are located in the PRC, and the measurement currency is RMB. The Group also owns certain crude oil and natural gas exploration and production operations in Indonesia and the measurement currency for these operations is US dollars. The consolidated financial statements are presented in RMB, which is the measurement currency of the parent and most of the consolidated entities.

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

Foreign currency transactions of the Group are accounted for at the exchange rates prevailing at the date of the transactions; gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognized in the consolidated income statement. Monetary assets and liabilities are translated at balance sheet date exchange rates.

Income statement and cash flows of foreign entities are translated into the Group's reporting currency at average exchange rates for the year and their balance sheets are translated at the exchange rates at year end. Currency translation differences are recognized in shareholders' equity.

The Group did not enter into any hedge contracts during any of the years presented. No foreign currency exchange gains or losses were capitalized for any years presented.

(d) Financial instruments

Financial instruments carried at the balance sheet date include cash and bank balances, investments, receivables, payables, leases and debts. Where necessary the particular recognition methods adopted are disclosed in the individual policy statements associated with each item.

Derivatives are recognized at fair value with changes in the fair value recognized in the income statement. The Group did not hold any derivative financial instruments for hedging or risk management purpose in any of the years presented.

(e) Investments

The Group classifies its investments into the following categories: trading, held-to-maturity and available-for-sale. Investments that are acquired principally for the purpose of generating a profit from short-term fluctuations in price are classified as trading investments and included in current assets; the Group did not hold any investment in this category during the year presented. Investments with fixed maturity that the management has the intent and ability to hold to maturity are classified as held-to-maturity and are included in current assets if their respective maturity dates are twelve months or less from balance sheet date, or in non-current assets if their respective maturity dates are more than twelve months from balance sheet date; during the year the Group did not hold any investment in this category. Investments intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, are classified as available-for-sale; these are included in non-current assets unless management has the express intention of holding the investment for less than twelve months from the balance sheet date or unless they will need to be sold to raise operating capital, in which case they are included in current assets. Management determines the appropriate classification of its investments at the time of the purchase and re-evaluates such designation on a regular basis.

All purchases and sales of investments are recognized on the effective acquisition or sale date. Cost of purchase includes transaction costs. Available-for-sale investments measured at fair value except there are no quoted market prices in active markets and whose fair values cannot be reliably measured using valuation techniques. Available-for-sale investments carried at cost are subject to review for impairment.

(f) Property, plant and equipment

Property, plant and equipment, including oil and gas properties (Note 3(g)), are initially recorded at cost less accumulated depreciation, depletion and amortization. Cost represents the purchase price of the asset and other costs incurred to bring the asset into existing use. Subsequent to their

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

initial recognition, property, plant and equipment are carried at revalued amount. Revaluations are performed by independent qualified valuers on a regular basis.

In the intervening years between independent revaluations, the directors review the carrying values of the property, plant and equipment and adjustment is made where the carrying value differs from fair value. As at September 30, 2003, an exercise was undertaken by independent qualified valuers, resulting in minor adjustments to the carrying values, as described in Note 16. Increases in the carrying amount arising on revaluation are credited to the revaluation reserve. Decreases in valuation of property, plant and equipment are first offset against increases from earlier valuations in respect of the same asset and are thereafter charged to the income statement. All other decreases in valuation are charged to the income statement. Any subsequent increases are credited to the income statement up to the amount previously charged.

Revaluation surpluses pertaining to revalued assets depreciated or disposed of are retained in the revaluation reserve and will not be available for offsetting against possible future revaluation losses.

Depreciation, depletion and amortization to write off the cost or valuation of each asset, other than oil and gas properties, to their residual values over their estimated useful lives is calculated using the straight-line method.

The Group uses the following useful lives for depreciation, depletion and amortization purposes:

Buildings	25-40 years
Plant and machinery	10-15 years
Equipment and motor vehicles	3-16 years

No depreciation is provided for construction in progress until they are completed and ready for use.

Property, plant and equipment, including oil and gas properties (Note 3(g)), are reviewed for possible impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of a cash generating unit exceeds the higher of its net selling price and its value in use, which is the estimated net present value of future cash flows to be derived from the continuing use of the assets in the cash generating unit and from their ultimate disposal.

Gains and losses on disposal of property, plant and equipment are determined by reference to their carrying amount and are taken into account in determining net income.

Interest and other costs on debts to finance the construction of property, plant and equipment are capitalized during the period of time that is required to complete and prepare the property for its intended use. Costs for planned major maintenance activities, primarily related to refinery turnarounds, are expensed as incurred except for costs of components that result in improvements and betterments which are capitalized as part of property, plant and equipment and depreciated over their useful lives.

(g) Oil and gas properties

The successful efforts method of accounting is used for oil and gas exploration and production activities. Under this method, all costs for development wells, support equipment and facilities, and proved mineral interests in oil and gas properties are capitalised. Costs of exploratory wells are capitalised as construction in progress pending determination of whether the wells find proved

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

reserves. Proved oil and gas reserves are the estimated quantities of crude oil, natural gas and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not on escalations based upon future conditions. Geological and geophysical costs are expensed when incurred. Costs of exploratory wells are capitalized pending a determination of whether sufficient quantities of potentially economic oil and gas reserves have been discovered. Exploratory wells in areas not requiring major capital expenditures are evaluated for economic viability within one year of completion of drilling. The related well costs are expensed as dry holes if it is determined that such economic viability is not attained. For wells that found economically viable reserves in areas where a major capital expenditure would be required before production can begin, the related well costs remain capitalized only if additional drilling is under way or firmly planned. Otherwise the well costs are expensed as dry holes. The Group has no costs of unproved properties capitalised in oil and gas properties.

The Ministry of Land and Resources in China issues production licenses to applicants on the basis of the reserve reports approved by relevant authorities. Administrative rules issued by the State Council provide that the maximum term of a production license is 30 years. However, in accordance with a special approval from the State Council, the Ministry of Land and Resources has issued production licenses effective March 2000 to the Group for all of its crude oil and natural gas reservoirs with terms coextensive with the projected production life of those reservoirs, ranging up to 55 years. Production licenses to be issued to the Group in the future will be subject to the 30-year maximum unless additional special approvals can be obtained from the State Council. Each of the Group's production licenses is renewable upon application by the Group 30 days prior to expiration. Future oil and gas price increases may extend the productive lives of crude oil and natural gas reservoirs beyond the current terms of the relevant production licenses. Payments on such licenses are made annually and are expensed as incurred. The cost of oil and gas properties is amortized at the field level on the unit of production method. Unit of production rates are based on oil and gas reserves estimated to be recoverable from existing facilities based on the current terms of the Group's production licenses. The Group's reserve estimates include only crude oil and natural gas which management believes can be reasonably produced within the current terms of these production licenses. The Group did not incur and does not anticipate to incur any material dismantlement, restoration or abandonment cost given the nature of its onshore producing activities and current PRC regulations governing such activities.

(h) Intangible assets

Expenditure on acquired patents, trademarks, technical know-how and licenses is capitalized and amortized using the straight-line method over their useful lives, generally over 10 years. Intangible assets are not revalued. The Group does not have capitalized internally generated intangible assets. The carrying amount of each intangible asset is reviewed annually and adjusted for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. The impairment loss is recognized in the consolidated income statement. The recoverable amount is measured as the higher of net selling price and value in use which is the present value of estimated future cash flows to be derived from continuing use of the asset and from its ultimate disposal.

F-12

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

(i) Leases

Leases of property, plant and equipment where the Group assumes substantially all the benefits and risks of ownership are classified as capital leases. Capital leases are capitalized at the inception of the leases at the lower of the fair value of the leased property and the estimated present value of the underlying lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. Property, plant and equipment acquired under capital lease are generally depreciated over the useful life of the asset as the Group usually obtains ownership of such leased assets by the end of the leased term.

Leases of assets under which substantially all of the risks and benefits of ownership are effectively retained by the lessor are classified as operating leases. Payments made under operating leases are expensed on a straight-line basis over the lease term. Payments made to the PRC's land authorities to secure land use rights are treated as operating leases. Land use rights are generally obtained through advance lump-sum payments and the terms for use range up to 50 years.

(j) Related parties

Related parties are corporations in which CNPC is a major shareholder and is able to control or exercise significant influence.

(k) Inventories

Inventories are oil products, chemical products, and materials and supplies, which are stated at the lower of cost and net realizable value. Cost is determined by the weighted average cost method. The cost of finished goods comprises raw materials, direct labor, other direct costs and related production overheads, but excludes interest expense. Net realizable value is the estimate of the selling price in the ordinary course of business, less the cost of completion and selling expenses.

(l) Trade receivables

Trade receivables are carried at original invoice amount less provision made for impairment of these receivables. Such provision for impairment of trade receivables is established if there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. The amount of the provision is the difference between the carrying amount and the recoverable amount, being the present value of expected cash flows, discounted at the market rate of interest for similar borrowers.

(m) Cash and cash equivalents

Cash and cash equivalents are carried in the balance sheet at cost and comprise cash in hand and investments with maturities of three months or less from the time of purchase.

(n) Debts

Debts are recognized initially at the proceeds received, net of transaction costs incurred. In subsequent periods, debts are stated at amortized cost using the effective yield method. Any difference between proceeds (net of transaction costs) and the redemption value is recognized in the income statement over the period of the debts, except for the portion eligible for capitalization.

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

(o) Taxation

The Company has obtained approval from the State Administration for Taxation to report taxable income on a consolidated basis.

Deferred income tax is provided, using the liability method, for temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes. Currently enacted tax rates are used to determine deferred income tax.

The principal temporary differences arise from depreciation on oil and gas properties and equipment and allowances for impairment of receivables, inventories, investments and property, plant and equipment. Deferred tax assets relating to the carryforward of unused tax losses are recognized to the extent that it is probable that future taxable income will be available against which the unused tax losses can be utilized.

The Group also incurs various other taxes which are not income taxes. Taxes other than income taxes, which form part of the operating expenses, primarily comprise consumption tax, resource tax, urban construction tax, education surcharges and business tax.

(p) Revenue recognition

Sales are recognized upon delivery of products and customer acceptance, if any, or performance of services, net of sales taxes and discounts. Revenues are recognized only when the Group has transferred to the buyer the significant risks and rewards of ownership of the goods, and when the amount of revenue and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

The Group markets a portion of its natural gas production under take-or-pay contracts. Customers under the take-or-pay contracts are required to take or pay for the minimum natural gas deliveries specified in the contract clauses. Revenue recognition for natural gas sales and transmission tariff under the take-or-pay contracts follows the accounting policies described in this note. Payments received from customers for natural gas not yet taken are recorded as deferred revenues until actual deliveries.

In November 2004 FASB's Emerging Issues Task Force (EITF) discussed EITF Issue no. 04-13, Accounting for Purchases and Sales of Inventory with the Same Counterparty, in order to consider whether or not buy/sell contractual arrangements should be reported net in the Statement of Income and accounted for as non-monetary transactions. There was a further EITF meeting in March 2005 but no consensus was reached on this issue and further discussion is planned.

Buy/sell contractual arrangements in this context are defined as those entered into concurrently or in contemplation of one another with the same counterparty.

The Group entered into buy/sell contracts with Sinopec for crude oil and reported the revenue gross in the Consolidated Statements of Income. Title of the commodity passes to the buyer on delivery, purchases and sales may not necessarily take place at the same time and amounts are separately invoiced and settled; there is no legal right of offset. The Group considers therefore that these are not non-monetary transactions and are then outside the scope of APB Opinion No. 29, Accounting for Nonmonetary Transactions. In addition, the guidance provided in EITF No. 99-19, Reporting Revenue Gross as a Principal versus Net as an Agent, EITF No. 02-3, Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities and EITF No. 03-11, Reporting Realized Gains and Losses on Derivative Instruments That Are Subject to FASB Statement No. 133 and Not Held for

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

Trading Purposes as Defined in Issue No. 02-3 has been considered in determining the presentation of the results of the Group's operations. As a result of a communication to the oil and gas industry issued by the US Securities and Exchange Commission in February 2005 requesting additional disclosures regarding buy/sell contracts, the Group reviewed such contracts and has estimated that, if buy/sell contracts were required to be reported net, both Sales and other operating revenues and Purchase, services and other for 2004 would be reduced by RMB 2,217 (2003: RMB 1,747; 2002: RMB 963) with no impact on net income.

(q) Provisions

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made.

(r) Research and development expenses

Research expenditure incurred is recognized as an expense. Costs incurred on development projects are recognized as intangible assets to the extent that such expenditure is expected to generate future economic benefits. Research and development expenses were RMB 1,806, RMB 2,411 and RMB 2,936 for the years ended December 31, 2002, 2003 and 2004, respectively.

(s) Retirement benefit plans

The Group contributes to various employee retirement benefit plans organized by municipal and provincial governments under which it is required to make monthly contributions to these plans at rates prescribed by the related municipal and provincial governments. The municipal and provincial governments undertake to assume the retirement benefit obligations of existing and future retired employees of the Group. Contributions to these plans are charged to expense as incurred.

(t) Share appreciation rights

Compensation under the share appreciation rights is measured as the amount by which the quoted market price of the Company's H Shares exceeds the grant price. Compensation is accrued as a charge to compensation expense over the vesting service period. The compensation accrued during a vesting service period is adjusted in subsequent periods for changes, either upward or downward to the grant price, in the quoted market price of the Company's shares. The amount of compensation and the effect of subsequent changes are included in the employee compensation cost of the income statement; the related liability is included in the salaries and welfare payable.

(u) Reclassification

Certain balances of the prior year have been reclassified to conform with current year presentation, including separate presentation of advance operating lease payments in Note 19.

(v) New accounting developments

In December 2003, the IASB issued amendments to thirteen existing IFRS standards under its Improvements Project. The amendments will become effective on January 1, 2005. The Group has not adopted these revised standards and does not expect the adoption of these revised standards would have a material effect on the results of operation and the financial position of the Group.

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

In December 2004, the IASB issued IFRS 6 Exploration for and Evaluation of Mineral Resources. Adoption of IFRS 6 is required for annual periods beginning on or after January 1, 2006. IFRS 6 permits an entity to develop an accounting policy for exploration and evaluation assets without specifically considering the requirement of paragraph 11 and 12 of IAS 8 and allows an entity to use the accounting policies applied immediately before adopting IFRS 6. IFRS 6 requires entities recognizing exploration and evaluation assets to perform an impairment test on these assets. However, IFRS 6 allows variation in recognition of impairment from that specified in IAS 36 but measures the impairment as set forth in IAS 36 once impairment is identified. The Group's accounting policies with respect to exploration and evaluation asset are described in Note 3(g) and 3(f). The Group is evaluating the manner and effect of adoption of IFRS 6.

The following standards of IASB also will be effective January 1, 2005-IFRS 2, Share-based Payment, IFRS 3, Business Combination, IFRS 4, Insurance Contracts, and IFRS 5, Non Current Assets Held for Sale and Discontinued Operations. The Group is evaluating the manner of adoption of these IFRS and does not expect the adoption of these new standards will have a material effect on the financial condition or results of operations of the Group.

4 EMPLOYEE COMPENSATION COSTS

	Year Ended December 31,		
	2002	2003	2004
	RMB	RMB	RMB
Wages and salaries	10,631	12,893	14,926
Social security costs ⁽ⁱ⁾	5,617	6,649	7,383
	16,248	19,542	22,309

(i) Social security costs represent contributions to funds for staff welfare organized by the municipal and provincial governments including contribution to the retirement benefit plans (Note 26).

5 SHUT DOWN OF MANUFACTURING ASSETS

During the years ended December 31, 2002, 2003 and 2004, the Group provided RMB 2,121, RMB 2,355 and RMB 220 respectively for the shut down of certain less efficient operating facilities in the refining and chemical manufacturing plants. The charges represented the net book value of the facilities.

	Year Ended December 31,		
	2002	2003	2004
	RMB	RMB	RMB
Refining facilities	1,179	1,596	192
Chemical facilities	942	759	28
	2,121	2,355	220

There were no employee termination or relocation costs relating to the shut down of these manufacturing equipment.

F-16

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

6 INTEREST EXPENSE

	Year Ended December 31,		
	2002	2003	2004
	RMB	RMB	RMB
Interest on			
loans	4,402	3,662	3,306
capital leases	10	4	2
Less: amounts capitalized	(896)	(1,320)	(1,005)
	3,516	2,346	2,303

Amounts capitalized are debt costs related to funds borrowed specifically for the purpose of acquiring qualifying assets. Interest rates on such capitalized debts ranged 5.02% to 5.43% in 2002, 5.02% in 2003 and 5.02% in 2004.

7 INCOME TAXES

	Year Ended December 31,		
	2002	2003	2004
	RMB	RMB	RMB
Current tax	19,289	26,347	39,404
Deferred income tax (Note 23)	2,897	1,594	2,814
Share of tax of equity affiliates	45	131	345
	22,231	28,072	42,563

In accordance with the relevant PRC income tax rules and regulations, the PRC income tax rate applicable to the Group is principally 33% (2003: 33%; 2002: 33%). Operations of the Group in certain regions in China have qualified for certain tax incentives in the form of reduced income tax rate to 15% through the year 2010 or accelerated depreciation of certain plant and equipment.

The tax on the Group's income before income taxes differs from the theoretical amount that would arise using the basic tax rate in the PRC applicable to the Group as follows:

	Year Ended December 31,		
	2002	2003	2004
	RMB	RMB	RMB
Income before income taxes	69,240	98,322	147,141
Tax calculated at a tax rate of 33%	22,849	32,446	48,556

Edgar Filing: PETROCHINA CO LTD - Form 20-F

Prior year tax return adjustment	618	419	27
Effect of preferential tax rate	(2,377)	(5,190)	(6,886)
Utilization of previously unrecognized tax loss of subsidiaries			(832)
Income not subject to tax	(93)	(566)	(605)
Expenses not deductible for tax purposes	1,234	963	2,303
Tax charge	22,231	28,072	42,563

8 BASIC AND DILUTED NET INCOME PER SHARE

Basic and diluted net income per share for the years ended December 31, 2002, 2003 and 2004 have been computed by dividing net income by the number of 175,824 shares issued and outstanding for the respective years.

There are no dilutive potential ordinary shares.

9 DIVIDENDS

	Year Ended December 31,		
	2002	2003	2004
	RMB	RMB	RMB
Final dividend for 2001 (Note (i))	8,839		
Interim dividend for 2002 (Note (ii))	8,811		
Final dividend for 2002 (Note (iii))		12,299	
Interim dividend for 2003 (Note (iv))		17,379	
Final dividend for 2003 (Note (v))			13,947
Interim dividend for 2004 (Note (vi))			20,381
	17,650	29,678	34,328

- (i) A final dividend in respect of 2001 of RMB 0.050272 per share amounting to a total of RMB 8,839 was paid on June 21, 2002, and was accounted for in shareholders' equity as an appropriation of retained earnings in the year ended December 31, 2002.
- (ii) An interim dividend in respect of 2002 of RMB 0.050113 per share amounting to RMB 8,811 was paid on October 8, 2002, and was accounted for in shareholders' equity as an appropriation of retained earnings in the year ended December 31, 2002.
- (iii) A final dividend in respect of 2002 of RMB 0.069951 per share amounting to a total of RMB 12,299 was paid on June 12, 2003, and was accounted for in shareholders' equity as an appropriation of retained earnings in the year ended December 31, 2003.
- (iv) An interim dividend in respect of 2003 of RMB 0.098841 per share amounting to a total of RMB 17,379 was paid on October 8, 2003, and was accounted for in shareholders' equity as an appropriation of retained earnings in the year ended December 31, 2003.
- (v) A final dividend in respect of 2003 of RMB 0.079324 per share amounting to a total of RMB 13,947 was paid on June 2, 2004, and was accounted for in shareholders' equity as an appropriation of retained earnings in the year ended December 31, 2004.
- (vi) As authorized by shareholders in the Annual General Meeting on May 18, 2004, the Board of Directors, in a meeting held on August 26, 2004, resolved to distribute an interim dividend in respect of 2004 of RMB 0.115919 per share amounting to a total of RMB 20,381. The interim dividend was paid on October 8,

2004, and was accounted for in shareholders' equity as an appropriation of retained earnings in the year ended December 31, 2004.

- (vii) At the meeting on March 16, 2005, the Board of Directors proposed a final dividend in respect of 2004 of RMB 0.147511 per share amounting to a total of RMB 25,936. These financial statements do not reflect this dividend payable, which will be accounted for in shareholders' equity as an appropriation of retained earnings in the year ended December 31, 2005.

10 CASH AND CASH EQUIVALENTS

	At December 31,	
	2003	2004
	RMB	RMB
Cash at bank and in hand	11,231	11,304

The weighted average effective interest rates on bank deposits were 1.30% and 1.23% for the years ended December 31, 2003 and 2004, respectively.

11 RECEIVABLES UNDER RESALE AGREEMENTS

Securities purchased under agreements to resell (resale agreements) are recorded as receivables under resale agreements. The difference between purchase and resell prices is treated as interest income and accrued over the life of resale agreements using the effective yield method.

Resale agreements are accounted for as collateralized financing transactions and are recorded at their contractual amounts plus interest accrued. The underlying collaterals are principally the PRC government bonds.

12 NOTES RECEIVABLE

Notes receivable represent mainly the bills of acceptance issued by banks for sales of goods and products. All notes receivable are due within one year.

13 ACCOUNTS RECEIVABLE

	At December 31,	
	2003	2004
	RMB	RMB
Accounts receivable due from third parties	8,263	6,905
Less: Impairment provision	(5,872)	(4,740)
	2,391	2,165
Accounts receivable due from related parties		
Fellow CNPC subsidiaries	592	482
Equity affiliates	280	15
	3,263	2,662

Movement in allowance for impairment of receivables are as follows:

	Year Ended December 31,		
	2002	2003	2004

	RMB	RMB	RMB
Balance at beginning of year	6,663	6,356	5,872
(Write back)/Provision	(45)	210	(442)
Amount written off against provision	(262)	(694)	(690)
Balance at end of year	6,356	5,872	4,740

Amounts due from related parties are interest free, unsecured and repayable in accordance with normal commercial terms.

	RMB	RMB
One year or less	3,988	5,278
Over one year	267	411
Balance at December 31	4,255	5,689

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

The RMB 411 at December 31, 2004 for capitalized exploratory well costs over one year are principally related to wells that are under further evaluation of drilling results or pending completion of development planning.

Buildings owned by the Group are on leased land. The net book values of the buildings owned by the Group analysed by the following categories of lease terms:

	At December 31,	
	2003	2004
	RMB	RMB
Short-term lease (less than 10 years)	1,125	335
Medium-term lease (10 to 50 years)	42,973	50,682
	44,098	51,017

Substantially all the buildings of the Group are located in the PRC.

Property, plant and equipment under capital leases at the end of year are as follows:

	At December 31,	
	2003	2004
	RMB	RMB
Exploration and Production		45
Refining and Marketing	94	94
Chemicals and Marketing	221	110
Accumulated depreciation	(75)	(74)
	240	175

Capital leases are principally related to plant and equipment and generally contain purchase options at the end of the lease terms.

Depreciation expenses on property, plant and equipment are as follows:

	Year Ended December 31,		
	2002	2003	2004
	RMB	RMB	RMB
Owned assets	36,018	39,293	45,040
Assets under capital lease	27	21	23

The depreciation charge of the Group included RMB 1,753, RMB 1,487 and RMB 3,789 relating to impairment provision for property, plant and equipment held for use for the years ended December 31, 2002, 2003 and 2004,

respectively. Of this amount, RMB 1,384, RMB 863 and RMB 798 for the years ended December 31, 2002, 2003 and 2004 respectively was related to the Chemicals and Marketing segment, RMB 369, RMB 624 and RMB 1,398 for the years ended December 31, 2002, 2003 and 2004 respectively was for the Refining and Marketing segment, and RMB Nil, RMB Nil and RMB 1,593 for the years ended December 31, 2002, 2003 and 2004 respectively was for the Exploration and Production segment.

Repair and maintenance costs were RMB 5,060, RMB 4,721 and RMB 6,205 for the years ended December 31, 2002, 2003 and 2004, respectively.

Bank debts are secured on property, plant and equipment at net book value of RMB 152 and RMB 218 at December 31, 2003 and 2004, respectively.

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

A valuation of the Group's property, plant and equipment, excluding oil and gas reserves, was carried out during 1999 by independent valuers. The valuation was based on depreciated replacement costs.

As at September 30, 2003, a revaluation of the Group's refining and chemical production equipment was undertaken by a firm of independent valuers, China United Assets Appraiser Co., Ltd, in the PRC on a depreciated replacement cost basis.

The June 1999 revaluation resulted in RMB 80,549 in excess of the prior carrying value and a revaluation loss of RMB 1,122 on certain property, plant and equipment.

The September 2003 revaluation resulted in RMB 872 in excess of the carrying value of certain property, plant and equipment immediately prior to the revaluation and a revaluation loss of RMB 1,257.

With respect to the RMB 872 revaluation gain resulting from the 2003 revaluation, RMB 98 were related to property, plant and equipment that in 1999 experienced revaluation loss, and were credited to the income statement. The remaining RMB 774 was credited to the revaluation reserve in the shareholders' equity.

With respect to the RMB 1,257 revaluation loss resulting from the 2003 revaluation, RMB 768 were related to property, plant and equipment that in 1999 experienced revaluation gain. The remaining RMB 489 were charged to the income statement.

17 INVESTMENTS IN EQUITY AFFILIATES

Principal affiliates accounted for under the equity method are:

Company Name	Country of Incorporation and Operations	Paid-up/ Registered Capital	Attributable Equity Interest Held (%)	Principal Activities
Dalian West Pacific Petrochemical Co., Ltd.	PRC	USD258	28.4	Production and sale of refined and petrochemical products
China Marine Bunker (PetroChina) Co., Ltd.	PRC	RMB 1,000	50	Supplying bunker oils, marine lubricant and fresh water to foreign trading vessels and coastal vessels, transportation, storage, import and export of oil products

Share of income of equity affiliates included in the statements of income of the Group was RMB 268, RMB 985 and RMB 1,824 for the years ended December 31, 2002, 2003 and 2004, respectively.

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

Share of net profit of equity affiliates included in retained earnings of the Group was RMB 584, RMB 1,860 at December 31, 2003 and 2004, respectively. Dividends received and receivable from equity affiliates were RMB 134, RMB 203 at December 31, 2003 and 2004, respectively.

18 AVAILABLE-FOR-SALE INVESTMENTS

	At December 31,	
	2003	2004
	RMB	RMB
Unlisted available-for-sale investments	2,652	2,265
Less: Impairment provision	(813)	(755)
	1,839	1,510

Available-for-sale investments, comprising principally unlisted equity securities, are classified as non-current assets, unless they are expected to be realized within twelve months of the balance sheet date or unless they will need to be sold to raise operating capital.

Dividend income from available-for-sale investments was RMB 60, RMB 69 and RMB 90 for the years ended December 31, 2002, 2003 and 2004, respectively.

Movements in provision for impairment of available-for-sale investments are as follows:

	Year Ended December 31,		
	2002	2003	2004
	RMB	RMB	RMB
Balance at beginning of year	665	660	813
Provision	4	158	26
Amount written off against provision	(9)	(5)	(84)
Balance at end of year	660	813	755

19 ADVANCE OPERATING LEASE PAYMENTS

	At December 31,	
	2003	2004
	RMB	RMB
Land use rights	5,544	7,952
Advance lease payments	1,708	4,296

7,252

12,248

Land use rights have terms up to 50 years. Advance lease payments are principally for use of land sub-leased from entities other than PRC land authorities. These advance operating lease payments are amortized over the related lease periods using the straight line method.

20 INTANGIBLE AND OTHER ASSETS

Intangible and other assets consist of the following:

	At December 31,					
	2003			2004		
	Cost	Accumulated Amortization	Net	Cost	Accumulated Amortization	Net
	RMB	RMB	RMB	RMB	RMB	RMB
Patents	1,721	(769)	952	1,873	(958)	915
Technical know-how	239	(155)	84	248	(181)	67
Other	1,300	(348)	952	1,421	(395)	1,026
Intangible assets	3,260	(1,272)	1,988	3,542	(1,534)	2,008
Other assets			1,036			979
			3,024			2,987

Amortization on intangible and other assets was RMB 552, RMB 635 and RMB 754 for the years ended December 31, 2002, 2003 and 2004, respectively.

Patents principally represent expenditure incurred in acquiring processes and techniques that are generally protected by relevant government authorities. Technical know-how amounts are attributable to operational technology acquired in connection with purchase of equipment. The technical know-how costs are included as part of the purchase price by contracts and are distinguishable.

Other assets primarily consist of long-term prepaid expenses to service providers.

		41,959	38,458

For loans denominated in RMB with floating rates, the rates are re-set annually on the respective anniversary dates based on rates announced by the People's Bank of China. For loans denominated in currencies other than RMB with floating rates, the rates are re-set quarterly or semi-annually as stipulated in the respective agreements. Other loans represent loans from independent third parties other than banks with interest rates ranging from 1.55% to 6.32% per annum. Interest free loans amounted to RMB 215 and RMB 87 at December 31, 2003 and 2004, respectively. Interest free loans were treated as government assistance and no imputation of interest expense on such loans was recognized in the Group's consolidated financial statements.

Debts of RMB 853 and RMB 756 were guaranteed by CNPC and its subsidiaries at December 31, 2003 and 2004, respectively.

The Group's debts include secured liabilities (leases and bank debts) totalling RMB 170 and RMB 50 respectively, at December 31, 2003, and 2004. Bank debts are secured over certain of the Group's property, plant and equipment (Note 16). Lease liabilities are effectively secured as the rights to the leased assets revert to the lessor in the event of default.

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

On April 7, 2000, the Company completed a global initial public offering (Global Offering) pursuant to which 17,582,418,000 shares of RMB 1.00 each, representing 13,447,897,000 H shares and 41,345,210 American Depositary Shares (ADSs , each representing 100 H shares), were issued at prices of HK\$1.28 per H share and US\$16.44 per ADS, respectively, for which the net proceeds to the Company were approximately RMB 20 billion. The shares issued pursuant to the Global Offering rank equally with existing shares. The H shares and ADSs are listed on the Stock Exchange of Hong Kong Limited and the New York Stock Exchange respectively.

The 17,582,418,000 H shares issued by the Company comprise 15,824,176,000 shares offered by the Company, and 1,758,242,000 shares offered by CNPC pursuant to an approval from China Securities Regulatory Commission to convert the state-owned shares owned by CNPC.

Shareholders' rights are governed by the PRC Company Law that requires an increase in registered capital to be approved by the shareholders in general meeting and the relevant PRC Government and regulatory authorities.

- (a) Pursuant to PRC regulations and the Company's Articles of Association, the Company is required to transfer 10% of its net profit, as determined under the PRC accounting regulations, to statutory common reserve fund until the fund aggregates to 50% of the Company's registered capital. The transfer to this reserve must be made before

distribution of dividends to shareholders.

The statutory common reserve fund shall only be used to make good previous years' losses, to expand the Company's production operations, or to increase the capital of the Company. Upon approval by a resolution of shareholders' general meeting, the Company may convert its statutory common reserve fund into share capital and issue bonus shares to existing shareholders in proportion to their original shareholdings or to increase the nominal value of each share currently held by them, provided that the balance of the reserve fund after such issue is not less than 25% of the registered capital.

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

- (b) Pursuant to the PRC regulations and the Company's Articles of Association, the Company is required to transfer 5% to 10% of its net income, as determined under the PRC accounting regulations, to the statutory common welfare fund. This fund can only be used to provide common facilities, of which the Group retains the titles, and other collective benefits to the Company's employees. This fund is non-distributable other than in liquidation. The directors have proposed to transfer 5% (2003: 5%) of the net income, as determined under the PRC accounting regulations, for the year ended December 31, 2004 to the statutory common welfare fund.
- (c) The Company's distributable reserve is the retained earnings computed under the PRC accounting regulations, which amounted to RMB 59,104 and RMB 95,248 as of December 31, 2003 and 2004, respectively. The distributable reserve computed under the PRC accounting regulations at December 31, 2004 has been arrived at after the accrual for the proposed final dividend in respect of year 2004 of RMB 25,936 (Note 9 (vii)).
- (d) As of December 31, 2004, Revaluation surplus relating to depreciation and disposals amounted to approximately RMB 38,064 and RMB 46,757 as of December 31, 2003 and 2004, respectively.
- (e) The revaluation surplus recognized during the formation of the Group in 1999 was partially utilized to offset against the revaluation loss on the same assets arising in 2003 (Note 16). Additional valuation surplus arising in 2003 was credited to the revaluation reserve.

26 PENSIONS

The Group participates in various retirement benefit plans organized by municipal and provincial governments under which it is required to make monthly contributions to these plans at rates ranging from 16% to 22% of the employees' basic salary for the relevant periods. The Group currently has no additional obligations for the payment of retirement and other post-retirement benefits of employees other than the monthly contributions described above. Expenses incurred by the Group in connection with the retirement benefit plans were RMB 2,109, RMB 2,193 and RMB 2,476 respectively, for the years ended December 31, 2002, 2003 and 2004.

27 FINANCIAL INSTRUMENTS

The Group holds or issues various financial instruments which expose it to credit, interest rate, foreign exchange rate and fair value risks. In addition, the Group's operations are affected by certain commodity price movements. The Group historically has not used derivative instruments for hedging or trading purposes. Such activities are subject to policies approved by the Group's senior management. Substantially all of the financial instruments the Group holds is for purposes other than trading. The Group regards an effective market risk system as an important element of the Group's treasury function and is continuously enhancing its systems. A primary objective is to implement certain methodologies to better measure and monitor risk exposures.

(a) Credit risk

The carrying amounts of accounts receivable included in the balance sheet represent the Group's maximum exposure to credit risk in relation to its financial assets. No other financial assets carry a significant exposure to credit risk.

The Group has no significant concentration of credit risk. Cash is placed with state-owned banks and financial institutions.

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

(b) Interest rate risk

The Group is exposed to the risk arising from changing interest rates. A detailed analysis of the Group's debts, together with their respective interest rates and maturity dates, are included in Note 22.

(c) Foreign exchange rate risk

Renminbi is not a freely convertible currency. Future exchange rates of Renminbi could vary significantly from the current or historical exchange rates as a result of controls that could be imposed by the PRC government. The exchange rates of Renminbi are affected by changes in PRC government policies. The exchange rates of Renminbi are also affected by economic developments and political changes domestically and internationally, and supply and demand for Renminbi. The official exchange rate for the conversion of Renminbi to US Dollars has generally been stable recently. As Renminbi is the measurement currency of the Company and most of its consolidated entities, the fluctuation of exchange rates of Renminbi may have positive or negative impacts on the results of operations of the Group. Because prices for the Group's crude oil and refined products are set generally with reference to US Dollar-denominated international prices, a devaluation of Renminbi against US Dollar may not have a negative impact on the Group's revenue, but may increase the cost incurred by the Group to acquire imported materials and equipment as well as the foreign currency-denominated obligations of the Group. On the other hand, an appreciation of Renminbi against US Dollar may decrease the Group's revenue, but the cost for acquiring imported materials and equipment may be reduced. The results of operations and the financial condition of the Group also may be affected by fluctuations in exchange rates against Renminbi of a number of other foreign currencies other than US Dollar.

(d) Commodity price risk

The Group is engaged in a broad range of petroleum related activities. The hydrocarbon commodity markets are influenced by global as well as regional supply and demand conditions. The PRC government currently publishes prices for onshore crude oil, gasoline and diesel according to international benchmark prices. A decline in prices of crude oil and refined products could adversely affect its financial performance. The Group historically has not used commodity derivative instruments to hedge the potential price fluctuations of crude oil and other refined products. Therefore, during 2003 and 2004, the Group was exposed to the general price fluctuations of broadly traded oil and gas commodities.

(e) Fair values

The carrying amounts of the following financial assets and financial liabilities approximate their fair value: cash, short-term investments, trade receivables and payables, other receivables and payables, lease obligations, short-term debt and floating rate long-term debt. The fair value of the fixed rate long-term debt is likely to be different from their carrying amounts. As the majority of the debts are at variable rates, the difference between fair value and carrying amounts is likely to be immaterial. Analysis of the fair value and carrying amounts of long-term debt are presented in Note 22.

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

28 CONTINGENT LIABILITIES**(a) Bank and other guarantees**

At December 31, 2004, the Group had contingent liabilities in respect of bank and other guarantees and other matters arising in the ordinary course of business from which it is anticipated that no material liabilities will arise.

	At December 31,	
	2003	2004
	RMB	RMB
Guarantee of debts of equity affiliates	448	203

(b) Environmental liabilities

CNPC and the Group have operated in China for many years. China has adopted extensive environmental laws and regulations that affect the operation of the oil and gas industry. The outcome of environmental liabilities under proposed or future environmental legislation cannot reasonably be estimated at present, and could be material. Under existing legislation, however, management believes that there are no probable liabilities, except for the amounts which have already been reflected in the financial statements, that will have a material adverse effect on the financial position of the Group.

(c) Legal contingencies

The Group is the named defendant in certain insignificant lawsuits as well as the named party in other proceedings arising in the ordinary course of business. While the outcomes of such contingencies, lawsuits or other proceedings cannot be determined at present, management believes that any resulting liabilities will not have a material adverse effect on the financial position of the Group.

(d) Leasing of roads, land and buildings

According to the Restructuring Agreement entered into between the Company and CNPC in 1999 upon the formation of the Company, CNPC has undertaken to the Company the following:

CNPC will use its best endeavors to obtain formal land use right certificates to replace the entitlement certificates in relation to the 28,649 parcels of land which were leased or transferred to the Company from CNPC, within one year from August, September and October 1999 when the relevant entitlement certificates were issued;

CNPC will complete, within one year from November 5, 1999, the necessary governmental procedures for the requisition of the collectively-owned land on which 116 service stations owned by the Company are located; and

CNPC will obtain individual building ownership certificates in the name of the Company for all of the 57,482 buildings transferred to the Company by CNPC, before November 5, 2000.

As at December 31, 2004, CNPC has obtained formal land use right certificates in relation to 26,549 out of the above-mentioned 28,649 parcels of land, some building ownership certificates for the above-mentioned buildings, but has completed none of the necessary governmental procedures for the above-mentioned service stations located on collectively-owned land. The Directors of the Company confirm that the use of and the conduct of relevant activities at the above-mentioned

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

parcels of land, service stations and buildings are not affected by the fact that the relevant land use right certificates or individual building ownership certificates have not been obtained or the fact that the relevant governmental procedures have not been completed. In management's opinion, the outcome of the above events will not have a material adverse effect on the results of operations or the financial position of the Group.

(e) Group insurance

Except for limited insurance coverage for vehicles and certain assets subject to significant operating risks, the Group does not carry any other insurance for property, facilities or equipment with respect to its business operations. In addition, the Group does not carry any third-party liability insurance against claims relating to personal injury, property and environmental damages or business interruption insurance since such insurance coverage is not customary in China. While the effect of under-insurance on future incidents cannot be reasonably assessed at present, management believes that it may have a material impact on the operating results but will not have a material adverse effect on the financial position of the Group.

(f) Cost reduction measures

The Group may further streamline its production facilities within the next several years to further improve the operating efficiency and competitiveness of the Group. Management has not approved all significant actions to be taken to complete such plans. Management does not believe such plans will have a material adverse impact on the Group's financial position, but may have a material adverse effect on the Group's results of operations.

(g) Other

In December 2003, a gas blow-out incident occurred at one of the gas wells of the Group. The blow-out caused the leakage of a large quantity of sulfurated hydrogen, causing injuries and death to many residents living in the surrounding area. As a result of an investigation conducted by the PRC government, CNPC, which provided drilling services for the well, was held liable for this blow-out. The incident has not had, and the Company does not believe it will have, a material adverse effect on the results of operations and financial position of the Group.

29 COMMITMENTS***(a) Operating lease commitments***

Operating lease commitments of the Group are mainly for leasing of land and buildings and equipment. Leases range from one to fifty years and usually do not contain renewal options. Future

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

minimum lease payments as of December 31, 2003 and 2004 under non-cancelable operating leases are as follows:

	At December 31,	
	2003	2004
	RMB	RMB
First year	2,552	2,701
Second year	2,433	2,473
Third year	2,409	2,452
Fourth year	2,391	2,434
Fifth year	2,380	2,356
Thereafter	84,776	83,035
	96,941	95,451

Operating lease expenses for land and buildings and equipment were RMB 3,127, RMB 3,573 and RMB 3,873 for the years ended December 31, 2002, 2003 and 2004 respectively.

(b) Capital commitments

	At December 31,	
	2003	2004
	RMB	RMB
Capital expenditure contracted for at the balance sheet date but not recognized in the financial statements is as follows:		
Oil and gas properties	896	645
Plant and equipment	10,055	4,614
Other	194	111
	11,145	5,370

(c) Long-term natural gas supply commitments

The Group markets a portion of its natural gas production under long-term take-or-pay contracts. Under these contracts, the customers are required to take or pay, and the Group is obligated to deliver, minimum quantities of natural gas annually. The prices for the natural gas are based on those approved by the PRC State Development and Reform Commission at the time of deliveries.

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

At December 31, 2004, future minimum delivery commitments under the contracts are as follows:

	Quantities (billion of cubic feet)
2005	229
2006	443
2007	581
2008	637
2009	701
2010 and thereafter	6,111
	8,702

(d) Exploration and production licenses

The Company is obligated to make annual payments with respect to its exploration and production licenses to the Ministry of Land and Resources. Payments incurred were approximately RMB 202, RMB 296 and RMB 444 for the years ended December 31, 2002, 2003 and 2004 respectively.

Estimated annual payments for the next five years are as follows:

	RMB
2005	618
2006	681
2007	712
2008	712
2009	712

(e) Dividends

Dividends received from the Company are likely to be one of the principal sources of funding for CNPC. Subject to the relevant provisions of the PRC Company Law and the Articles of Association of the Company, CNPC, as the major shareholder of the Company, may seek to influence the determination of the amount of dividends paid by the Company with a view to satisfying its cash flow requirements including those relating to its obligations to provide supplementary social services to its employees and a limited number of third parties. The Ministry of Finance has committed to provide subsidies to enable CNPC to fund a portion of future operating shortfalls arising out of CNPC's obligations to provide social services. The directors believe that these subsidies will substantially reduce CNPC's reliance on dividends from the Company.

30 ACQUISITION

On April 22, 2002 the Group acquired all of the share capital of PetroChina International Indonesia Limited (formerly Devon Energy Indonesia Ltd.) (Devon) for RMB 2,068. This company is engaged in the exploration and production of crude oil and natural gas in Indonesia. The acquired business contributed turnover of RMB 632 and operating profit of RMB 132 to the Group for the year ended December 31, 2002.

In addition, the Group increased its equity interests in PetroChina Tarim Oil (Gas) Transportation Limited (Tashu) and Jilian (Jilin) Petrochemicals Limited (Jilian) respectively by 53.1% in

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

November and 35% in December 2002 for a total consideration of RMB 472, and the two entities became the subsidiaries of the Company at the respective dates of acquisitions. The acquired businesses did not contribute significant turnover and operating profit to the Group for the year ended December 31, 2002.

Other than for land and buildings, the fair value of the net assets approximated the book value of the net assets acquired, and no plant closure provisions or other restructuring provisions were required.

The assets and liabilities arising from the acquisitions at the respective dates of acquisitions were as follows:

	Devon	Jilian	Tashu	Total
	RMB	RMB	RMB	RMB
Assets	2,145	1,050	897	4,092
Liabilities	(77)	(664)	(262)	(1,003)
	2,068	386	635	3,089
Equity interest acquired	100.0%	35.0%	53.1%	
Fair value of net assets acquired	2,068	135	337	2,540
Less: Cash and cash equivalents acquired	(64)	(8)	(264)	(336)
Consideration not yet settled		(54)		(54)
Cash outflow on acquisition	2,004	73	73	2,150

31 MAJOR CUSTOMERS

The Group's major customers are as follows:

	Year Ended December 31,					
	2002		2003		2004	
	Revenue	% to Total Revenue	Revenue	% to Total Revenue	Revenue	% to Total Revenue
	RMB	%	RMB	%	RMB	%
Sinopec	26,497	11	35,932	12	36,977	9
CNPC	7,772	3	9,323	3	14,516	4
	34,269	14	45,255	15	51,493	13

32 RELATED PARTY TRANSACTIONS

The Group is part of a larger group of companies under CNPC and has extensive transactions and relationships with members of the CNPC group. Because of these relationships, it is possible that the terms of these transactions are not the same as those that would result from transactions among wholly unrelated parties. Related parties refer to corporations in which CNPC is a major shareholder and is able to control or exercise significant influence.

CNPC itself is a state-owned enterprise. In accordance with a specific exemption in IAS 24, Related Party Disclosure, the Group does not accumulate or disclose transactions with other state-owned enterprises as related party transactions, other than those with other CNPC group companies and significant customers as described in Note 31.

F-41

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

The majority of the Group's business activities are conducted with state-owned enterprises. Sale of certain products to these state-owned enterprises are at state-prescribed prices which are similar to prices to other customers. The Group considers that these sales are activities in the ordinary course of business and has not accumulated or disclosed such related party transactions.

As a result of the restructuring of CNPC to form the Company in 1999, the Company and CNPC entered into a Comprehensive Products and Services Agreement for a range of products and services which may be required and requested by either party; a Land Use Rights Leasing Contract (Note 28(d)) under which CNPC leases 42,476 parcels of land located throughout the PRC to the Company; and a Buildings Leasing Contract under which CNPC leases 191 buildings, located throughout the PRC to the Company.

The term of the Comprehensive Products and Services Agreement is 10 years commencing from November 5, 1999. The products and services to be provided by the CNPC group to the Company under the Comprehensive Products and Services Agreement include construction and technical services, production services, supply of material services, social services, ancillary services, and financial services. The products and services are provided in accordance with (1) state-prescribed prices; or (2) where there is no state-prescribed price, relevant market prices; or (3) where neither (1) nor (2) is applicable, actual cost incurred; or the agreed contractual price, being the actual cost plus a margin of no more than 15% for certain construction and technical services, and 3% for all other types of services.

The Land Use Rights Contract provides for the lease of an aggregate area of approximately 1,145 million square meters of land located throughout the PRC to business units of the Group for a term of 50 years at an annual fee of RMB 2,000. The total fee payable for the lease of all such property may, after the expiration of 10 years, be adjusted by agreement between the Company and CNPC.

Under the Buildings Leasing Contract, 191 buildings covering an aggregate area of 269,770 square meters located throughout the PRC are leased at an aggregate annual fee of RMB 39 for a term of 20 years.

The Company also entered into a Supplemental Buildings Leasing Agreement with CNPC in September 2002 to lease an additional 404 buildings covering approximately 442,730 square meters at an annual rental of RMB 157. The Supplemental Buildings Leasing Agreement will expire at the same time as the Buildings Leasing Agreement.

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

In addition to the related party information shown elsewhere in the financial statements, the following is a summary of significant related party transactions entered into in the ordinary course of business between the Group and entities controlled by CNPC during the years indicated below:

	Notes	Year Ended December 31,		
		2002	2003	2004
		RMB	RMB	RMB
Sale of goods	(a)	7,772	9,323	14,516
Fees paid for construction and technical services	(b)			
Exploration and development services	(c)	21,781	25,180	29,030
Other construction and technical services	(d)	16,324	15,688	18,469
Fees for production services	(e)	15,743	16,042	16,313
Social services charge	(f)	1,243	1,326	1,289
Ancillary service charges	(g)	1,713	1,683	1,717
Interest income	(h)	25	30	25
Interest expense	(i)	1,086	1,052	1,097
Rental expense	(j)	1,916	2,001	2,106
Commission expense and other charges	(k)	936	971	884

Notes:

- (a) Represents sale of crude oil, refined and chemical products conducted principally at market prices.
- (b) Under the Comprehensive Products and Services Agreement entered into between CNPC and the Company, certain construction and technical services provided by CNPC are charged at cost plus an additional cost of no more than 15%, including exploration and development services and oilfield construction services.
- (c) Direct costs for exploration and development services comprise geophysical survey, drilling, well cementing, logging, and well testing.
- (d) The fees paid for other construction and technical services comprise fees for construction of refineries and chemical plants and technical services in connection with oil and gas exploration and production activities such as oilfield construction, technology research, engineering and design, etc.
- (e) The fees paid for production services comprise fees for the repair of machinery, supply of water, electricity and gas, provision of services such as communications, transportation, fire fighting, asset leasing, environmental protection and sanitation, maintenance of roads, manufacture of replacement parts and machinery.
- (f) These represent expenditures for social welfare and support services which are charged at cost.
- (g) Ancillary service charges represent mainly fees for property management, the provision of training centers, guesthouses, canteens, public shower rooms, etc.

(h) The Group had deposits placed with China Petroleum Finance Company Limited (CP Finance), a subsidiary of CNPC and a non-bank financial institution approved by the People s Bank of China, amounting to RMB 2,861, RMB 2,331 and RMB 1,782 as of December 31, 2002, 2003 and 2004 respectively. The deposits yield interest at prevailing saving deposit rates.

F-43

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

- (i) The Group had unsecured short-term and long-term loans from CP Finance amounting to RMB 24,702, RMB 25,188 and RMB 23,168 as of December 31, 2002, 2003 and 2004 respectively, included under loans from related parties. The loans were interest bearing at market rates.
- (j) Rental expenses are calculated in accordance with the lease agreements entered into between the Company and CNPC.
- (k) CNPC purchases materials on behalf of the Company and charges commission thereon. The commission is calculated at rates ranging from 1% to 5% of the goods purchased.
- (l) The Group had a 4.73%, 7.5% and 7.5% equity interest in CP Finance at a book value of RMB 94, RMB 299 and RMB 299 as of December 31, 2002, 2003 and 2004 respectively.

33 EMOLUMENTS OF DIRECTORS, SUPERVISORS AND SENIOR MANAGEMENT

Details of the directors and supervisors emoluments are as follows:

	Year Ended December 31,		
	2002	2003	2004
	RMB 000	RMB 000	RMB 000
Fee for directors and supervisors	128	83	120
Salaries, allowances and other benefits	1,042	1,377	2,012
Contribution to retirement benefit scheme	25	34	43
	1,195	1,494	2,175

The emoluments of the directors and supervisors fall within the following bands (including directors and supervisors whose term expired during the year):

	Year Ended December 31,		
	2002	2003	2004
	Number	Number	Number
Nil - RMB 1	23	19	24

Fee for directors and supervisors disclosed above included RMB 66 thousand, RMB 62 thousand and RMB 95 thousand respectively, for the year ended December 31, 2002, 2003 and 2004 paid to independent non-executive directors.

None of the directors and supervisors has waived their remuneration during the years indicated above.

The five highest paid individuals in the Group for each of the years indicated above were also directors or supervisors and their emoluments are reflected in the analysis presented above.

The Company has adopted a share option scheme which is a share appreciation right arrangement payable in cash to the recipients upon exercise of the rights which became effective on the initial public offering of the H shares of the Company on April 7, 2000. The directors, supervisors and senior executives of the Company are eligible for the scheme. 87,000,000 units of share appreciation rights were granted to senior executives. 35,000,000 units were granted to the directors and supervisors; of these 35,000,000 units, 33,130,000 units are outstanding, net of subsequent forfeiture of 1,870,000 units by a former independent director.

F-44

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

The rights can be exercised on or after April 8, 2003, the third anniversary of the grant, up to April 7, 2008. The exercise price is the price as at the initial public offering being HK\$1.28 per share or approximately RMB 1.36 per share.

As at December 31, 2004, none of the holders of the stock appreciation rights has exercised the rights. The liability for the units awarded under the scheme has been calculated based on the difference between the exercise price and the market price of the shares and amounted to approximately RMB 406 and RMB 367 at December 31, 2003 and 2004.

34 SEGMENT INFORMATION

The Group is engaged in a broad range of petroleum related activities through its four major business segments: Exploration and Production, Refining and Marketing, Chemicals and Marketing and Natural Gas and Pipeline.

The Exploration and Production segment is engaged in the exploration, development, production and sales of crude oil and natural gas.

The Refining and Marketing segment is engaged in the refining, transportation, storage and marketing of crude oil and petroleum products.

The Chemicals and Marketing segment is engaged in the production and sale of basic petrochemical products, derivative petrochemical products, and other chemical products.

The Natural Gas and Pipeline segment is engaged in the transmission of natural gas, crude oil and refined products, and the sale of natural gas.

In addition to these four major business segments, the Other segment includes the assets, income and expenses relating to cash management, financing activities, the corporate centre, research and development, and other business services to the operating business segments of the Group.

Substantially all assets and operations of the Group are located in the PRC, which is considered as one geographic location in an economic environment with similar risks and returns. In addition to its operations in the PRC in April 2002 the Group acquired all the share capital of Devon Energy Indonesia Ltd., a company engaging in the exploration and production of crude oil and natural gas in Indonesia. In April 2003, the Group acquired for RMB 679 a 50% interest in Amerada Hess Indonesia Holdings Co., which has a 30% interest in one of the oil and gas concessions that the Group acquired in 2002.

The accounting policies of the operating segments are the same as those described in Note 3 Summary of Principal Accounting Policies .

35 SIGNIFICANT DIFFERENCES BETWEEN IFRS AND US GAAP

The consolidated financial statements have been prepared in accordance with IFRS, which differ in certain material respects from the accounting principles generally accepted in the United States of America (US GAAP). Such differences involve methods for measuring the amounts shown in the financial statements, as well as additional disclosures required by US GAAP.

Effect on net income of significant differences between IFRS and US GAAP is as follows:

	Year Ended December 31,			
	2002	2003	2004	2004
	RMB	RMB	RMB	US\$
Net income under IFRS	46,910	69,614	102,927	12,436
US GAAP adjustments:				
Reversal of revaluation loss of property, plant and equipment		391		
Depreciation charges on property, plant and equipment revaluation gain	8,157	8,053	8,170	987
Depreciation charges on property, plant and equipment revaluation loss	(112)	(144)	(830)	(100)
Loss on disposal of revalued property, plant and equipment	224	451	523	63
Income tax effect	(2,729)	(2,886)	(2,595)	(314)
Minority interests	(60)	(60)	(60)	(7)
One-time remedial payments for staff housing	(2,553)			
Net income under US GAAP	49,837	75,419	108,135	13,065
Basic and diluted net income per share under US GAAP (RMB)	0.28	0.43	0.62	0.07

Changes in shareholders' equity under US GAAP for each of the years ended December 31, 2002, 2003 and 2004 are as follows:

	Year Ended December 31,			
	2002	2003	2004	2004
	RMB	RMB	RMB	US\$
Balance at beginning of year	251,914	283,464	329,205	39,776
Net profit for the year	49,837	75,419	108,135	13,065
Contribution from CNPC to marketing enterprises	10			
Final dividend for year 2001	(8,839)			
Interim dividend for year 2002	(8,811)			
Final dividend for year 2002		(12,299)		
Interim dividend for year 2003		(17,379)		
Final dividend for year 2003			(13,947)	(1,685)
Interim dividend for year 2004			(20,381)	(2,463)
Payment to CNPC for acquisition of marketing enterprises	(3,200)			
Contribution from CNPC for one-time remedial staffing housing	2,553			
Balance at end of year	283,464	329,205	403,012	48,693

In preparing the summary of differences between IFRS and US GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the estimates of revenues and expenses. Accounting estimates have been employed in these financial statements to determine reported amounts, including realizability, useful lives of tangible and intangible assets, income taxes and other areas. Actual results may differ from those estimates.

A summary of the principal differences and additional disclosures applicable to the Group is set out below:

(a) Revaluation of property, plant and equipment

As described in Note 16, the property, plant and equipment, excluding oil and gas reserves, transferred to the Company by CNPC were appraised as of June 30, 1999, as required by the relevant PRC regulations, by a firm of independent valuers registered in the PRC, China Enterprise Appraisal. As at September 30, 2003, a revaluation of the Group's refining and chemical production equipment was undertaken by a firm of independent valuers registered in the PRC, China United Assets Appraiser Co., Ltd, on a depreciated replacement cost basis.

The June 1999 revaluation resulted in RMB 80,549 in excess of the prior carrying value and a revaluation loss of RMB 1,122 on certain property, plant and equipment.

The September 2003 revaluation resulted in RMB 872 in excess of the carrying value of certain property, plant and equipment immediately prior to the revaluation and a revaluation loss of RMB 1,257.

With respect to the RMB 872 revaluation gain resulting from the 2003 revaluation, RMB 98 were related to property, plant and equipment that in 1999 experienced revaluation loss, and

F-52

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

were credited to the income statement. The remaining RMB 774 was credited to the revaluation reserve in the shareholders' equity.

With respect to the RMB 1,257 revaluation loss resulting from the 2003 revaluation, RMB 768 were related to property, plant and equipment that in 1999 experienced revaluation gain. The remaining RMB 489 were charged to the income statement.

The depreciation charge, which includes impairment charge, on the revaluation surplus from January 1, 2002 to December 31, 2002 was RMB 8,157, from January 1, 2003 to December 31, 2003 was RMB 8,053, and from January 1, 2004 to December 31, 2004 was RMB 8,170.

The depreciation charge, which includes impairment charge, on the revaluation loss from January 1, 2002 to December 31, 2002 was RMB 112, from January 1, 2003 to December 31, 2003 was RMB 144, and from January 1, 2004 to December 31, 2004 was RMB 830.

The loss on disposal of revalued property, plant and equipment, which includes shut down of manufacturing assets, from January 1, 2002 to December 31, 2002 was RMB 224, from January 1, 2003 to December 31, 2003 was RMB 451, and from January 1, 2004 to December 31, 2004 was RMB 523.

For purposes of reconciling to the US GAAP financial data, the effect of the revaluation, the related depreciation charges and loss on disposal is reversed. A deferred tax asset relating to the reversal of the effect of revaluation in 1999 is established, together with a corresponding increase in the shareholders' equity. Under a special approval granted by the Ministry of Finance, the effect of the revaluation in 1999 is available as additional depreciation base for purposes of determining taxable income.

(b) Related party transactions

The Group has disclosed in Note 31, transactions with significant customers and in Notes 13, 15, 21, 22 and 32 transactions and balances with its immediate parent, CNPC, and related companies. CNPC is owned by the PRC government, which also owns a significant portion of the productive assets in the PRC. IFRS exempts state controlled enterprises from disclosing transactions with other state controlled enterprises. IFRS also excludes from related parties government departments and agencies to the extent that such dealings are in the normal course of business. US GAAP contains no similar exemptions but requires disclosure of material related party transactions. The Group believes that it has provided meaningful disclosures of related party transactions through the major customer disclosures in Note 31 and the transactions with the CNPC Group disclosed in Note 32. Although the majority of the Group's activities are conducted with the PRC government and its affiliates and other state controlled enterprises, none individually constitutes a major customer or supplier other than those disclosed.

(c) One-time remedial payments for staff housing

The Ministry of Finance of the PRC issued several public notices and regulations during the year ended December 31, 2000 and 2001 with respect to the one-time remedial payments for staff housing payable to certain employees who joined the workforce prior to December 31, 1998 and have housing conditions below local standards as determined in accordance with government regulations and guidelines. These Ministry of Finance notices and regulations also provided that the portion of remedial payments attributable to the periods prior to a restructuring

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

of the employer enterprise from a wholly state-owned status to a less than wholly state-owned status is to be borne by the state shareholder of the enterprise.

The restructuring that resulted in the formation of the Group took place in November 1999. As such, the one-time remedial housing payments payable to the eligible employees of the Group are to be borne by the state shareholder of the Group.

Under IFRS, such direct payments to employees or reimbursements will not be recorded through the consolidated income statement of the Group. US GAAP contains no such exemption but requires this principal shareholder's action on behalf of the Company to be recorded in the consolidated income statement. In the last quarter of year 2002, the Group and CNPC completed the process of estimating the amount payable to qualified employees of the Group. This amount, RMB 2,553, was reflected in determining net income of the Group for the year ended December 31, 2002, under US GAAP. Since this amount is borne by CNPC, a corresponding amount has been included as an addition to the other reserves in the shareholders' equity of the Group. There are no significant changes in this estimates during 2003 and 2004.

(d) Recent US accounting pronouncements

In December 2004, the FASB revised FAS No. 123 (FAS 123(R)). FAS 123(R), *Share-based Payment*, requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on their fair values. Pro forma disclosure is no longer an alternative to financial statement recognition. FAS 123(R) is effective as of the beginning of the Company's first fiscal year that begins after June 15, 2005. The Group is evaluating the transition provisions allowed by FAS 123(R). The Group does not expect the adoption of FAS 123(R) to have a material impact on the Group's financial position or operational results.

On November 24, 2004, the FASB issued Statement No. 151, *Inventory Costs*, an amendment of ARB No. 43, Chapter 4 (FAS 151). FAS 151 requires that abnormal amounts of idle capacity and spoilage costs be excluded from the cost of inventory and expensed when incurred. The provisions of FAS 151 are applicable to inventory costs incurred during fiscal years beginning after June 15, 2005. The Group does not expect the adoption of FAS 151 to have a material impact on the Group's financial position or results of operation.

On December 15, 2004, the FASB issued Statement No. 153, *Exchanges of Nonmonetary Assets*, an amendment of APB Opinion No. 29 (FAS 153). FAS 153 requires exchanges of productive assets to be accounted for at fair value, rather than at carryover basis, unless (1) neither the asset received nor the asset surrendered has a fair value that is determinable within reasonable limits or (2) the transactions lack commercial substance. FAS 153 is effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005. The Group does not expect the adoption of FAS 153 to have a material impact on the Group's financial position or results of operation.

37 EVENTS AFTER BALANCE SHEET DATE

On March 28, 2005, the Company has entered into an acquisition agreement with CNPC. According to the acquisition agreement, the Company has acquired the petroleum and natural gas-related refinery and petrochemical businesses respectively owned by CNPC's wholly-owned

F-55

Table of Contents

PETROCHINA COMPANY LIMITED
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Amounts in millions except for per share data or unless otherwise stated)

subsidiaries, Ningxia Dayuan Refinery and Petrochemical Company Limited and Qingyang Refinery and Petrochemical Company Limited, from CNPC for which the Company paid a cash consideration of RMB 9.14.

The acquisition has been completed on April 1, 2005.

The transaction was accounted for in a manner similar to a uniting of interests, whereby the assets and liabilities of the two entities acquired by the Company were recorded at historical cost to CNPC. The difference between the RMB 9.14 acquisition price and the net liabilities transferred from CNPC was adjusted against equity. Following is a summary of certain summarized financial data at December 31, 2004 and for the year then ended of the businesses acquired from CNPC.

	RMB
Results of operations	
Turnover	4,582
Net loss	(148)
Financial position:	
Current assets	822
Total assets	2,077
Current liabilities	1,237
Total liabilities	2,314
Net liabilities	(237)

On June 8, 2005, the Board of Directors of the Company approved entering into a purchase agreement whereby the Company will acquire a 50% ownership interest in Zhong You Kan Tan Kai Fa Company Limited (Newco). Currently Newco is 100% owned by two wholly-owned subsidiaries of CNPC. The Company's investment in Newco is expected to be approximately RMB 20,741. Concurrent with the purchase agreement, the Company also agreed in a transfer agreement to sell its wholly-owned subsidiary, PetroChina International Limited, to Newco for a consideration of approximately RMB 579.

The purchase and transfer agreements require approvals by relevant regulatory authorities and the shareholders of the Company.

Upon completion of the purchase and transfer agreements, the Company will obtain control of the operational and financial policies of Newco. Its investment in Newco and the transfer of PetroChina International Limited to Newco will be accounted for in a manner similar to a uniting of interests since these transactions are among entities under common control by CNPC. The consolidated financial statements of the Company will be restated as if the operations of the Company and Newco had always been combined.

38 APPROVAL OF FINANCIAL STATEMENTS

The financial statements were approved by the board of directors on March 16, 2005 and by the shareholders at the annual general meeting held on May 26, 2005.

Costs Incurred in Property Acquisitions, Exploration and Development Activities

	Year Ended December 31,		
	2002	2003	2004
	RMB	RMB	RMB
Property acquisition costs			
Exploration costs	10,704	15,137	18,160
Development costs	35,558	39,587	43,712
Total	46,262	54,724	61,872
Share of equity affiliates' costs of property acquisition, exploration, and development	228	592	274

Proved Reserve Estimates

Oil and gas proved reserves cannot be measured exactly. Reserve estimates are based on many factors related to reservoir performance that require evaluation by the engineers interpreting the available data, as well as price and other economic factors. The reliability of these estimates at any point in time depends on both the quality and quantity of the technical and economic data, and the production performance of the reservoirs as well as engineering judgment. Consequently, reserve estimates are subject to revision as additional data become available during the producing life of a reservoir. When a commercial reservoir is discovered, proved reserves are initially determined based on limited data from the first well or wells. Subsequent data may better define the extent of the reservoir and additional production performance, well tests and engineering studies will likely improve the reliability of the reserve estimate. The evolution of technology may also result in the application of improved recovery techniques such as supplemental or enhanced recovery projects, or both, which have the potential to increase reserves beyond those envisioned during the early years of a reservoir's producing life.

Proved oil and gas reserves are the estimated quantities of crude oil, natural gas and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not on escalations based upon future conditions. Proved developed reserves are those reserves, which can be expected to be recovered through existing wells with existing equipment and operating methods. Proved undeveloped reserves are those reserves, which are expected to be recovered from new wells on undrilled acreage, or from existing wells where relatively major expenditure is required.

The Ministry of Land and Resources in China issues production licenses to applicants on the basis of the reserve reports approved by relevant authorities. Administrative rules issued by the State Council provide that the maximum term of a production license is 30 years. However, in accordance with a special approval from the State Council, the Ministry of Land and Resources has issued production licenses effective March 2000 to the Group for all of its crude oil and natural gas reservoirs with terms coextensive with the projected productive life of those reservoirs, ranging up to 55 years. Production licenses to be issued to the Group in the future will be subject to the 30-year maximum unless additional special approvals can be obtained from the State Council. Each of the Group's production licenses is renewable upon application by the Group 30 days prior to expiration.

**PETROCHINA COMPANY LIMITED
SUPPLEMENTARY INFORMATION ON OIL AND GAS EXPLORATION
AND PRODUCTION ACTIVITIES (UNAUDITED) (Continued)**

(Amounts in millions unless otherwise stated)

Oil and gas price increases may extend the productive lives of crude oil and natural gas reservoirs beyond the current terms of the relevant production licenses.

Proved reserve estimates as of December 31, 2002, 2003 and 2004 were based on a report prepared by DeGolyer and MacNaughton, independent engineering consultants. These reserve estimates were prepared for each oil and gas region (as opposed to individual fields within a region) and adjusted for the estimated effects of using prices and costs prevailing at the end of the period. The Company's reserve estimates include only crude oil and natural gas, which the Company believes can be reasonably produced within the current terms of production licenses.

PETROCHINA COMPANY LIMITED
SUPPLEMENTARY INFORMATION ON OIL AND GAS EXPLORATION
AND PRODUCTION ACTIVITIES (UNAUDITED) (Continued)

(Amounts in millions unless otherwise stated)

Estimated quantities of net proved oil and condensate and natural gas reserves and of changes in net quantities of proved developed and undeveloped reserves for each of the period indicated are as follows:

	Crude Oil and Condensate	Natural Gas
	(millions of barrels)	(billions of cubic feet)
Proved developed and undeveloped		
Reserves at January 1, 2002	10,959	36,103
Changes resulting from:		
Revisions of previous estimates	349	(225)
Improved recovery	31	
Extensions and discoveries	330	3,540
Purchases of Minerals in Place	38	193
Production	(770)	(794)
Reserves at December 31, 2002	10,937	38,817
Changes resulting from:		
Revisions of previous estimates	199	278
Improved recovery	81	
Extensions and discoveries	476	2,853
Production	(774)	(879)
Reserves at December 31, 2003	10,919	41,069
Changes resulting from:		
Revisions of previous estimates	148	56
Improved recovery	109	43
Extensions and discoveries	542	4,405
Production	(777)	(1,019)
Reserves at December 31, 2004	10,941	44,554
Proved developed reserves at:		
December 31, 2002	9,198	11,921
December 31, 2003	8,885	13,374
December 31, 2004	8,748	16,787
Proportional interest in proved reserves of equity affiliates		
December 31, 2002	62	2
December 31, 2003	78	78
December 31, 2004	78	91

At December 31, 2004, 10,910 million barrels of crude oil and condensate and 44,362 billion cubic feet of natural gas proved developed and undeveloped reserves are located within China, and 31 million barrels of crude oil and condensate and 192 billion cubic feet of natural gas proved developed and undeveloped reserves are located in Indonesia.

Standardized Measure

The following disclosures concerning the standardized measure of future cash flows from proved oil and gas reserves are presented in accordance with the US Statement of Financial Accounting Standards No. 69. The amounts shown are based on prices and costs at the end of each period, currently enacted tax rates and a 10 percent annual discount factor. Since prices and costs do not remain static, and no price or cost changes have been considered, the results are not necessarily indicative of the fair market value of estimated proved reserves, but they do provide a common benchmark which may enhance the users' ability to project future cash flows.

The standardized measure of discounted future net cash flows related to proved oil and gas reserves at the end of each of the three years in the period ended December 31, 2002, 2003 and 2004 is as follows (in millions of RMB):

At December 31, 2002	
Future cash inflows	2,710,152
Future production costs	(745,866)
Future development costs	(73,344)
Future income tax expense	(562,289)
Future net cash flows	1,328,653
Discount at 10% for estimated timing of cash flows	(713,267)
Standardized measure of discounted future net cash flows	615,386
At December 31, 2003	
Future cash inflows	2,991,193
Future production costs	(765,111)
Future development costs	(88,556)
Future income tax expense	(635,169)
Future net cash flows	1,502,357
Discount at 10% for estimated timing of cash flows	(807,037)
Standardized measure of discounted future net cash flows	695,320
At December 31, 2004	
Future cash inflows	3,894,766
Future production costs	(865,257)
Future development costs	(90,938)
Future income tax expense	(906,035)
Future net cash flows	2,032,536
Discount at 10% for estimated timing of cash flows	(1,061,260)
Standardized measure of discounted future net cash flows	971,276

Share of equity affiliates	standardized measure of discounted future net cash flows	
At December 31, 2002		2,612
At December 31, 2003		3,744
At December 31, 2004		5,371

Future net cash flows were estimated using period-end prices and costs, and currently enacted tax rates.

Changes in the standardized measure of discounted net cash flows for the Group for each of the three years in the period ended December 31, 2002, 2003 and 2004 are as follows:

	Year Ended December 31,		
	2002	2003	2004
	RMB	RMB	RMB
CHANGES IN STANDARDIZED MEASURE OF DISCOUNTED FUTURE CASH FLOWS			
Beginning of year	405,999	615,386	695,320
Sales and transfers of oil and gas produced, net of production costs	(116,977)	(146,580)	(179,478)
Net changes in prices and production costs and other	259,016	90,150	355,109
Extensions, discoveries and improved recovery	53,024	65,150	117,560
Development costs incurred	(1,983)	1,730	9,693
Revisions of previous quantity estimates	17,364	15,520	13,236
Accretion of discount	60,095	87,580	98,935
Purchases of minerals in place	2,351		
Net change in income taxes	(63,503)	(33,616)	(139,099)
End of year	615,386	695,320	971,276
