II. BUSINESS**1. Business Summary****A. Industry Status****(1) Characteristics of the Industry**

As of September 30, 2006, the number of domestic mobile phone subscribers reached 39.70 million and with a 82.0% penetration rate, and the Korean mobile communication market can be considered to have reached its maturation stage. However, considering the number of European countries with penetration rates exceeding 90%, additional future growth of the domestic market may be possible.

The Korean mobile communications market continues to improve with the help of advances in network-related technology evidenced by the world's first commercialization of CDMA2000 1x, CDMA 1x EV-DO, and the development of highly advanced handsets that enables the provision of convergence services for multimedia contents, mobile commerce, telematics, satellite DMB, digital home services and other related contents.

(3) Market Characteristics

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. With the market penetration rate reaching as high as 82.0% (as of the end of September 2006), the customer base is continuing to expand to include elementary school and pre-school children. Although demand to date has primarily been in the domestic market, as the business territory expands to overseas market, the size of overseas sales is expected to grow in the near future. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries.

3. Contingent Liabilities**A. Material Legal Proceedings****(1) Action Seeking to Vacate Judgment of the Intellectual Property Tribunal Nullifying Patent Registration Related to Caller Ring Service**

- a) Parties to the litigation: Park Won Sup (plaintiff) vs. the Company (defendant)
- b) Overview: Mr. Park Won Sup (the representative director of Ad Ring Systems Co., Ltd.) claimed that certain technology the Company uses to provide the caller ring service infringed upon his patent rights, and the Company sought an administrative action to nullify Mr. Park's patent rights in the Intellectual Property Tribunal. The Tribunal upheld the nullification of Mr. Park's patent rights and Mr. Park appealed the decision.
- c) Progress: The Patent Court dismissed plaintiff's claim (September 2005), after which the plaintiff appealed.
- d) Impact on business: In the event that the case is decided against the Company, there is a risk of material future royalty obligations. However, given the progress of the proceedings, the estimated impact should not be large; however, the actual impact may differ depending on future events.

(2) Actions for the Cancellation of the International Registration for Satellite Network

- a) Parties to the litigation: Korea Multinet Co., Ltd. (Korea Multinet) vs. the Ministry of Information and Communication (MIC ; the Company is participating in the action on behalf of MIC)
- b) Overview: Korea Multinet brought an administrative action against MIC to cancel the Company's international satellite frequency registration related to the satellite DMB business.
- c) Progress: The trial court found for the defendant and the appellate court affirmed the judgment of the trial court (June 30, 2004). The plaintiff appealed and the case is currently pending at the Supreme Court.
- d) Impact on business: Given the progress of the proceedings, no significant impact on the Company's business is expected; however, the actual impact may differ depending on future events.

(3) Actions for the Cancellation of Key Communication Business Licenses and Allotment of Satellite DMB Frequency

- a) Parties to the litigation: Korea Multinet vs. MIC (the Company is participating in the action on behalf of MIC)

Independent Accountants' Review Report

English Translation of a Report Originally Issued in Korean

To the Stockholders and Board of Directors of

SK Telecom Co., Ltd. :

We have reviewed the accompanying non-consolidated balance sheet of SK Telecom Co., Ltd. (the Company) as of September 30, 2006 and the related non-consolidated statements of income and cash flows for the three months and nine months ended September 30, 2006 and 2005, all expressed in Korean won. These financial statements are the responsibility of the Company's management. Our responsibility is to issue a report on these financial statements based on our reviews.

We conducted our reviews in accordance with standards for review of interim financial statements in the Republic of Korea. Those standards require that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data, and this provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Based on our reviews, nothing has come to our attention that causes us to believe that the financial statements referred to above are not presented fairly, in all material respects, in conformity with accounting principles generally accepted in the Republic of Korea.

We have previously audited, in accordance with auditing standards generally accepted in the Republic of Korea, the non-consolidated balance sheet of the Company as of December 31, 2005, and the related non-consolidated statements of income, appropriations of retained earnings and cash flows for the year then ended (not presented herein); and in our report dated February 3, 2006, we expressed an unqualified opinion on those non-consolidated financial statements. The accompanying balance sheet as of December 31, 2005, which is comparatively presented, does not differ in material respects from such audited non-consolidated balance sheet.

Table of Contents

Our reviews also comprehended the translation of the Korean won amounts into U.S. dollar amounts and nothing has come to our attention that causes us to believe that such translation has not been made in conformity with the basis stated in Note 2(a). Such U.S. dollar amounts are presented solely for the convenience of readers outside of Korea. Accounting principles and review standards and their application in practice vary among countries. The accompanying financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to review such financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying financial statements are for use by those knowledgeable about Korean accounting principles and review standards and their application in practice.

SK TELECOM CO., LTD.
NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS AND NINE MONTHS ENDED SEPTEMBER 30, 2006 AND 2005

1. GENERAL

SK Telecom Co., Ltd. (the Company) was incorporated in March 1984 under the laws of the Republic of Korea to engage in providing nationwide cellular telephone communication services in the Republic of Korea. The Company mainly provides wireless telecommunications in the Republic of Korea and recently acquired foreign wireless telecommunications operations in Vietnam, Mongolia and the United States of America. The Company's common shares and depositary receipts (DRs) are listed on the Stock Market of Korea Exchange (formerly Korea Stock Exchange) and the New York and London Stock Exchanges, respectively. As of September 30, 2006, the Company's total issued shares are held by the following:

	Number of shares	Percentage of total shares issued (%)
SK Group	18,748,522	23.09
POSCO Corp.	2,341,569	2.88
Institutional investors and other minority shareholders	51,540,566	63.48
Treasury stock	8,563,054	10.55
	81,193,711	100.00

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the Company have been prepared in conformity with accounting principles generally accepted in the Republic of Korea, using the same accounting policies which were adopted in preparing the annual financial statements. Significant accounting policies followed in preparing the accompanying financial statements are summarized as follows:

a. Basis of Presentation

The Company's statutory financial statements have been prepared in the Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea (Korean GAAP). Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with accounting principles generally accepted in other countries. Accordingly, these financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying financial statements have been condensed, restructured and translated into English with certain expanded descriptions from the Korean language financial statements. Certain information included in the Korean language financial statements, but not required for a fair presentation of the Company's financial position, results of operations or cash flows, is not presented in the accompanying financial statements.

The official accounting records of the Company are maintained and expressed in Korean won, the currency of the country in which the Company is incorporated and operates. The translation of Korean won amounts into U.S. dollar amounts is included solely for the convenience of readers outside of the Republic of Korea and has been made at the rate of ₩ 946.00 to US\$1, the Noon Buying Rate in the City of New York for cable transfers in Korean won as certified for customs purposes by the Federal Reserve Bank of New York on the last business day of the nine months ended September 30, 2006. Such translations into U.S. dollars should not be construed as representations that the Korean won amounts could be converted into U.S. dollars at that or any other rate.

Table of Contents

b. Adoptions of New Statements of Korea Accounting Standards (SKAS)

On January 1, 2006, the Company adopted SKAS No. 18 through No. 20, which are effective from the fiscal year beginning after December 31, 2005. Such adoption of SKASs did not have an effect on the non-consolidated financial position of the Company as of September 30, 2006 or the non-consolidated ordinary income and net income of the Company for the three months and nine months ended September 30, 2006.

c. Cash Equivalents

Cash equivalents are highly liquid investments and short term financial instruments, which are readily convertible without significant transaction cost, do not have significant risk of changes in interest rates, and with original maturities of three months or less.

d. Allowance for Doubtful Accounts

Allowance for doubtful accounts is provided based on the estimated collectibility of individual accounts and historical bad debt experience.

e. Inventories

Inventories, which consist mainly of replacement units for wireless telecommunication facilities and supplies for sales promotion, are stated at the lower of cost or market value, with cost determined using the moving average method. The Company maintains perpetual inventory systems, which are adjusted to physical inventory counts performed at fiscal year end. When the market value of inventories is less than the acquisition cost, the carrying amount is reduced to the market value and any difference is charged to current operations as operating expenses. There was no such loss for the three months and nine months ended September 30, 2006 and 2005.

f. Securities (Excluding securities accounted for using the equity method of accounting)

Debt and equity securities are initially recorded at their acquisition costs (fair value of considerations paid) including incidental cost incurred in connection with acquisition of the related securities and classified into trading, available-for-sale and held-to-maturity securities depending on the acquisition purpose and nature .

Trading securities are stated at fair value with gains or losses on valuation reflected in current operations.

Securities classified as available-for-sale are reported at fair value. Unrealized gains or losses on valuation of available-for-sale securities are included in capital adjustments and the unrealized gains or losses are reflected in net income when the securities are sold or if impairment is other than temporary. Equity securities are stated at acquisition cost if fair value cannot be reliably measured. If the declines in the fair value of individual available-for-sale securities below their acquisition or amortized cost are other than temporary and there is objective evidence of impairment, write-downs of the individual securities are recorded to reduce the carrying value to their fair value. The related write-downs are recorded in current operations as a loss on impairment of investment securities.

Held-to-maturity securities are presented at acquisition cost after premiums or discounts are amortized or accreted, respectively. The Company recognizes write-downs resulting from other-than-temporary declines in the fair value below its book value on the balance sheet date if there is objective evidence of impairment. The related write-downs are recorded in current operations as a loss on impairment of investment securities.

Trading securities are presented in the current asset section of the balance sheet, and available-for-sales and held-to-maturity securities are presented in the current asset section of the balance sheet if their maturities are within one year; otherwise such securities are recorded in the non-current section of the balance sheet.

Table of Contents

g. Equity Securities Accounted for Using the Equity Method

Investment securities of affiliated companies, in which the Company has the ability to exercise significant influence, are carried using the equity method of accounting, whereby the Company's initial investment is recorded at cost and the carrying value is subsequently increased or decreased to reflect the Company's portion of stockholders' equity of the investee. Differences between the purchase cost and the acquisition date net asset fair value of the investee are amortized over 5 to 20 years using the straight-line method. When applying the equity method of accounting, unrealized inter-company gains and losses are eliminated (See Note 4). In addition, the Company provides for additional losses for those investments accounted for using the equity method that are reduced to zero to the extent that the Company has other investment assets related to the equity method investees.

When the Company's share of equity interest in the equity method investees increases as a result of capital transactions of the investees with (or without) consideration, the increase in the Company's proportionate shares in the investees are treated as goodwill or negative goodwill and when the Company's share of equity interest in the equity method investees decreases as a result of capital transactions of the investees with (or without) consideration, the decrease in the Company's proportionate shares in the investees are accounted for as gain or loss on disposal. However, if equity method investees are subsidiaries, such differences in the Company's proportionate shares in the investees are accounted for as capital adjustments of affiliates in the Company's shareholders' equity.

In translating the foreign currency forward statements of the Company's investees operating overseas, the Company applies (a) the foreign exchange rate at the balance sheet date to the investee's balance sheet items (except historical rates applied for shareholders' equity), and (b) the average foreign exchange rate for the current period for income statements items. After translating the balance sheet and income statements items as noted above, the Company's portion of the amount after deducting the translated total liabilities from translated total assets and equity is recorded as capital adjustment of affiliates in the Company's shareholders' equity.

h. Property and Equipment

Property and equipment are stated at cost. Major renewals and betterments, which prolong the useful life or enhance the value of assets, are capitalized. Expenditures for maintenance and repairs are charged to expense as incurred.

Depreciation is computed using the declining balance method (except for buildings and structures acquired on or after January 1, 1995 which are depreciated using the straight-line method) over the estimated useful lives (4~30 years) of the related assets (See Note 6).

Interest expense and other financing charges for borrowings related to the manufacture or construction of property and equipment are charged to current operations as incurred.

Table of Contents

i. Intangible Assets

Intangible assets are recorded at cost, less amortization computed using the straight-line method over 5 to 20 years. The amortization for the nine months ended September 30, 2006 and 2005 were ₩260,627 million and ₩245,212 million, respectively, and for the three months ended September 30, 2006 and 2005 were ₩89,367 million and ₩81,639 million, respectively.

With its application for a license to provide IMT 2000 service, the Company has a commitment to pay ₩1,300,000 million to the Ministry of Information Communication (MIC → ₩650,000 million was paid in March 2001 by SK IMT Co., Ltd. (a former subsidiary of the Company), which was merged into the Company on May 1, 2003, and the remainder is required to be paid over 10 years with an annual interest rate equal to the 3-year-maturity government bond rate minus 0.75% (4.08% as of September 30, 2006). The future payment obligations are ₩90,000 million (related present value discount: ₩1,206 million) in 2007, ₩110,000 million in 2008, ₩130,000 million in 2009, ₩150,000 million in 2010 and ₩170,000 million in 2011. On December 4, 2001, SK IMT Co., Ltd. received the IMT 2000 license from MIC, and recorded the total license cost as an intangible asset. As a result of the merger with SK IMT Co., Ltd., the Company acquired such IMT license of ₩1,259,253 million and assumed the related long-term payable with a principal amount of ₩650,000 million on May 1, 2003 (the date of merger). Amortization of the IMT license commenced when the Company started its commercial IMT 2000 service in December 2003, using the straight-line method over the estimated useful life of the IMT license which expires in December 2016. As of September 30, 2006, the present value discount related to the current portion and long-term portion of payments to be made to MIC totaled ₩1,206 million and ₩45,756 million, respectively.

j. Convertible Bonds

The proceeds from issuance of convertible bonds are allocated between the conversion rights and the debt issued; and the portion allocable to the conversion rights is accounted for as capital surplus with a corresponding conversion right adjustment deducted from the related bonds. Such conversion right adjustment is amortized to interest expense using the effective interest rate method over the redemption period of the convertible bonds. The portion allocable to the conversion rights is measured by deducting the present value of the debt at time of issuance from the gross proceeds from issuance of convertible bonds, with the present value of the debt being computed by discounting the expected future cash flows (including call premium, if any) using the effective interest rate applied to ordinary or straight debt of the Company at the issue date.

k. Discounts on Bonds

Discounts on bonds are amortized to interest expense using the effective interest rate method over the redemption period of the bonds.

l. Valuation of Long-term Payables

Long-term payables resulting from long-term installment transactions are stated at the present value of the expected future cash flows. Imputed interest amounts are recorded in present value discount accounts, which are deducted directly from the related nominal payable balances. Such imputed interest is included in operations using the effective interest rate method over the redemption period.

m. Provisions, Contingent Liabilities and Contingent Assets

The Company recognizes a provision when i) it has a present obligation as a result of a past event, ii) it is probable that a disbursement of economic resources will be required to settle the obligation, and iii) a reliable estimate can be made of the amount of the obligation (See Note 22).

Table of Contents

The Company does not recognize the following contingent obligations as liabilities:

Possible obligations related to past events, for which the existence of a liability can only be confirmed upon occurrence of uncertain future event or events outside the control of the Company.

Present obligations arising out of past events or transactions, for which i) a disbursement of economic resources to fulfill such obligations is not probable or ii) a disbursement of economic resources is probable, but the related amount cannot be reasonably estimated.

In addition, the Company does not recognize potential assets related to past events or transactions, for which the existence of an asset or future benefit can only be confirmed upon occurrence of uncertain future event or events outside the control of the Company.

n. Accrued Severance Indemnities

In accordance with the Company's policy, all employees with more than one year of service are entitled to receive severance indemnities upon termination of their employment based on length of service and rate of pay. Accruals for severance indemnities are recorded to approximate the amount required to be paid if all employees were to terminate at the balance sheet date.

The Company has deposits with insurance companies to fund the portion of the employees' severance indemnities which is in excess of the tax deductible amount allowed under the Corporate Income Tax Law, in order to take advantage of the additional tax deductibility for such funding. Such deposits with outside insurance companies, where the beneficiaries are the Company's employees, totaling ~~₩~~3,418 million and ~~₩~~187,103 million as of September 30, 2006 and December 31, 2005, respectively, are deducted from accrued severance indemnities.

In accordance with the Korean National Pension Fund Law, the Company transferred a portion of its accrued severance indemnities to the National Pension Fund through March 1999. Such transfers, amounting to ~~₩~~54 million and ~~₩~~5,172 million as of September 30, 2006 and December 31, 2005, respectively, are deducted from accrued severance indemnities.

Actual payment of severance indemnities amounted to ~~₩~~257,989 million and ~~₩~~17,937 million for the nine months ended September 30, 2006 and 2005, respectively, and ~~₩~~869 million and ~~₩~~3,402 million for the three months ended September 30, 2006 and 2005, respectively.

Effective March 31, 2006, the Company changed its policy for the severance indemnities applicable to those employees who joined the Company before or on December 31, 2002 from cumulative method, where employees are entitled to get paid more than one month of salary each year depending on the length of service, to simple multiplier method, where employees are paid one month of salary each year regardless of their service period in accordance with the resolution of the Company's joint labor-management conference held on March 16, 2006. As a result of such policy change, the Company has decided to distribute early settlements to those eligible employees on their accumulated severance indemnities as of March 31, 2006 on a mandatory basis. In addition, the Company paid the additional bonuses of ~~₩~~125,890 million for those employees who received the mandatory distribution for their early settlement as compensation for those employees. The Company recorded such compensation costs as special severance indemnities in other expenses for the nine months ended September 30, 2006. In addition, the Company executed the early retirement program and the related special bonus of ~~₩~~18,131 million were paid to eligible employees and accounted for as special severance indemnities in other expenses. Such costs are recorded as other expenses for the nine months ended September 30, 2006.

o. Accounting for Employee Stock Option Compensation Plan

Table of Contents

The Company adopted the fair value based method of accounting for its employee stock option compensation plan (See Note 15). Under the fair value based method, compensation cost is measured at the grant date based on the value of the award and is recognized over the service period. For stock options, fair value is determined using an option-pricing model that takes into account the stock price at the grant date, the exercise price, the expected life of the option, the volatility of the underlying stock, expected dividends and the current risk-free interest rate for the expected life of the option. However, as permitted under Korean GAAP, the Company excludes the volatility factor in estimating the value of its stock options granted before December 31, 2003, which results in measurement at minimum value. The total compensation cost of an option estimated at the grant date is not subsequently adjusted for changes in the price of the underlying stock or its volatility, the actual life of the option, dividends on the stock, or the risk-free interest rate. In addition, recognized compensation costs related to stock options expired due to such stock options not being exercised within the exercisable period are transferred to other capital surplus from capital adjustments (See Note 12).

p. Accounting for Leases

Lease agreements that include a bargain purchase option, result in the transfer of ownership at the end of the lease term, have a lease term equal to 75% or more of the estimated economic life of the leased property or where the present value of minimum lease payments equals or exceeds 90% of the fair value of the leased property, are accounted for as capital leases. All other leases are accounted for as operating leases.

Assets and liabilities related to capital leases are recorded as property and equipment and obligations under capital leases, respectively, and the related interest is calculated using the effective interest rate method and charged to other expenses. For operating leases, the future minimum lease payments are expensed ratably over the lease term while contingent rentals are expensed as incurred (See Note 10).

q. Research and Development Costs

The Company charges substantially all research and development costs to expense as incurred. The Company incurred internal research and development costs of ₩153,294 million and ₩149,236 million for the nine months ended September 30, 2006 and 2005, respectively, and ₩51,539 million and ₩51,772 million for the three months ended September 30, 2006 and 2005, respectively. In addition, external research and development costs were ₩49,702 million and ₩51,394 million for the nine months ended September 30, 2006 and 2005, respectively, and ₩16,354 million and ₩17,131 million for the three months ended September 30, 2006 and 2005, respectively.

r. Accounting for Foreign Currency Transactions and Translation

Transactions denominated in foreign currencies are recorded in Korean won based on the prevailing rate of exchange at the dates of transactions. Monetary assets and liabilities denominated in foreign currency are translated into Korean won at the Base Rates announced by Seoul Money Brokerage Services, Ltd. on the balance sheet date, which were ₩945.20 and ₩1,013.00 to US\$1.00 at September 30, 2006 and December 31, 2005, respectively. The resulting gains or losses arising from the translation or settlement of such assets and liabilities are included in current operations.

s. Derivative Instruments

The Company records rights and obligations arising from derivative instruments as assets and liabilities, which are stated at fair value. The gains and losses that result from the change in the fair value of derivative instruments are reported in current earnings. However, for derivative instruments designated as hedging the exposure of variable cash flows, the effective portions of the gains or losses on the hedging instruments are recorded as a separate component of stockholders' equity and credited/charged to operations at the time the hedged transactions affect earnings, and the ineffective portions of the gains or losses are credited/charged immediately to operations.

t. Revenue Recognitions

Table of Contents

Operating revenue is recognized when cellular telephone communication services are provided.

u. Income Tax

Income tax expense is determined by adding or deducting the total income tax and surtaxes to be paid for the current period and the changes in deferred income tax assets and liabilities.

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are generally recognized for all taxable temporary differences with some exceptions and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be utilized. The carrying amount of deferred tax assets is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered. Deferred income tax assets and liabilities are classified into current and non-current based on the classification of related assets or liabilities for financial reporting purposes (See Note 16).

v. Handset Subsidiaries to Long-term Mobile Subscribers

Effective March 27, 2006, the Telecommunication Law of Korea was revised to allow wireless carriers to provide handset subsidiaries to customers who have maintained their wireless account with the same carrier for 18 months or longer. The Company commenced its handset subsidy program on the effective date of the revised Telecommunications Law and included a clause in the service contract which allows the Company to change the terms of its subsidy program, including the Company's ability to terminate the program at any time after a thirty day notice to its customers. The Company charges such handset subsidiaries to commissions paid as the related payments are made.

w. Reclassifications

Certain reclassifications have been made in prior period's financial statements to conform to classifications used in the current period. Such reclassifications did not have an effect on the previously reported net assets as of December 31, 2005 and ordinary income and net income for the three months and nine months ended September 30, 2005.

3. INVESTMENT SECURITIES**a. Trading Securities**

Table of Contents

- (Note a) Common stocks of extended Computing Environment Co., Ltd. were listed on the Korea Securities Dealers Automated Quotation during the three months ended September 30, 2006.
- (Note b) The Company recorded its investments in common stock of LG Powercomm Co., Ltd. at its fair value, which was estimated by an outside professional valuation company using the present value of expected future cash flows and the unrealized loss on valuation of investments amounting to ₩118,257 million (net of tax effect of ₩44,856 million) as of December 31, 2005 was recorded as a capital adjustment. Based on the opinion of the outside professional valuation company, there was no significant change in LG Powercomm Co., Ltd. s operation and financial results, which have an effect on the fair value of the common stocks, for the nine months ended September 30, 2006. No additional unrealized loss or recovery on valuation of such investments was recorded accordingly.
- (Note c) As a reasonable estimate of fair value could not be made, the investment is stated at acquisition cost. The investment in common stock of Eonex Technologies Inc. was reclassified to available-for-sale securities from equity securities accounted for using the equity method during 2003, as the Company s ownership in such investees decreased to less than 20% and the Company no longer exercises significant influence. Such securities were transferred to available-for-sale securities at the carrying amount valued using the equity method of accounting prior to the reclassification.
- (Note d) Due to the impairment of the Company s investments in common stock of TeleMerc.com, the Company recorded impairment loss on such investments of ₩1,793 million in the 4th quarter of 2005.
- (Note e) The investment in Korea IT Fund was reclassified to equity securities accounted for using the equity method during the nine months ended September 30, 2006 as the Company has the ability to exercise significant influence on the investee.

- (Note a) Investments were recorded using the equity method of accounting based on unaudited and unreviewed financial statements as of and for the nine months ended September 30, 2006. In order to verify the reliability of such unaudited and unreviewed financial statements, the Company has performed the following procedures and found no significant errors:
- i) obtained the signature from the chief executive officer of the equity method investee asserting that the unaudited and unreviewed financial statements are accurate
 - ii) checked whether the major transactions identified by the Company, including public disclosures, were appropriately reflected in the unaudited and unreviewed financial statements
 - iii) performed an analytical review on the unaudited and unreviewed financial statements
- (Note b) Investments in equity securities are carried using the equity method of accounting based on the financial statements as of December 31, 2005 as information as of September 30, 2006 was not available and the change in the Company's portion of stockholders' equity of the investee for the nine months ended September 30, 2006 was immaterial.
- (Note c) The Company received dividends from SK C&C Co., Ltd. and Skytel Co., Ltd. and the corresponding amount was deducted from the carrying amount of equity method securities.
- (Note d) Other increase (decrease) in investments in equity securities of WiderThan Co., Ltd. and IHQ, Inc. represent gains (losses) on disposal of investments in equity securities, which have resulted from the dilution of the Company's ownership as a result of investees' sale of their unissued shares to third parties.
- (Note e) Other increase in investments in Korea IT Fund is the carrying amount transferred from available-for-sale equity securities.
- (Note f) Investment was fully liquidated due to dissolution of SKT-HP Ventures, LLC for the nine months ended September 30, 2006.

Table of Contents

On May 27, 2004, the Company issued zero coupon convertible bonds with a maturity of five years in the principal amount of US\$329,450,000 for US\$324,923,469, with an initial conversion price of ₩235,625 per share of the Company's common stock, which was greater than market value at the date of issuance. Subsequently, the initial conversion price was changed to ₩217,062 per share in accordance with anti-dilution protection. The Company may redeem their principal amount after 3 years from the issuance date if the market price exceeds 130% of the conversion price during a predetermined period. On the other hand, the bond holders may redeem their notes at 103.81% of the principal amount on May 27, 2007 (3 years from the issuance date). The conversion right may be exercised during the period from July 7, 2004 to May 13, 2009 and the number of common shares to be converted as of September 30, 2006 is 1,685,816 shares. During the nine months ended September 30, 2006, the conversion price was changed from ₩218,098 to ₩217,062 and the number of shares to be converted was changed from 1,677,812 shares to 1,685,816 shares due to the payment of interim dividends in accordance with the resolution of the Company's board of directors dated July 28, 2006.

Conversion of notes to common shares may be prohibited under the Telecommunications Law or other legal restrictions which restrains foreign governments, individuals and entities from owning more than 49% of the Company's voting stock, if this 49% ownership limitation is violated due to the exercise of conversion rights. In this case, the Company will pay a bond holder a cash settlement determined at the average price of one day after a holder exercises its conversion right or the weighted average price for the following five business days. The Company intends to sell treasury shares held in trust by the Company that corresponds to the number of shares of common stock that would have been delivered in the absence of the 49% foreign shareholding restrictions. The Company entered into an agreement with Credit Suisse First Boston International to reduce the effect of fluctuation with respect to cash settlement payments that may be more or less than the proceeds from sales of treasury shares held in trust. Unless either previously redeemed or converted, the notes are redeemable at 106.43% of the principal amount at maturity. During the nine months ended September 30, 2006, the convertible bonds with a principal amount of US\$18,420,000 were converted into 99,361 shares of treasury stock (See note 14), and the principal amount of the convertible bonds decreased from US\$329,450,000 to US\$311,030,000. In addition, the consideration for conversion right (capital surplus) decreased by ₩2,728 million (net of tax effect of ₩1,034 million) as a result of this conversion.

b. Long-term borrowings

Long-term borrowings as of September 30, 2006 and December 31, 2005 are as follows (In millions of Korean won and thousands of U.S. dollars):

	Lender	Final maturity year	Annual interest rate (%) (Note)	September 30, 2006	December 31, 2005
Long-term floating rate discount bill	Shinhan Bank	June 29, 2011	91 days CD yield + 0.25%	₩200,000	₩

The above borrowings are classified as long-term borrowings as the borrowings are to be rolled-over exceeding 1 year from September 30, 2006 in accordance with the loan agreement.

(Note) 91 days CD yield as of September 30, 2006 is 4.6%.

9. SUBSCRIPTION DEPOSITS

The Company receives subscription deposits from customers of cellular services at the subscription date. The Company has no obligation to pay interest on subscription deposits but is required to return them to subscribers upon termination of the subscription contract.

Table of Contents

Long-term subscription deposits held as of September 30, 2006 and December 31, 2005 are as follows (In millions of Korean won except deposit per subscriber amounts):

	Service type	Deposit per subscriber	September 30, 2006	December 31, 2005
Cellular		₩ 200,000	₩ 21,666	₩ 23,770

The Company offers existing and new cellular subscribers the option of obtaining credit insurance from Seoul Guarantee Insurance Company (SGIC) in lieu of the subscription deposits. Existing subscribers who elect this option are refunded their subscription deposits. As a result, the balance of subscription deposits has been decreasing.

Total	₩ 6,679,235	₩ 5,470,701

a. Legal Reserve

The Korean Commercial Code requires the Company to appropriate as a legal reserve at least 10% of cash dividends for each accounting period until the reserve equals 50% of outstanding capital stock. The legal reserve may not be utilized for cash dividends, but may only be used to offset a future deficit, if any, or may be transferred to capital stock.

b. Reserve for Improvement of Financial Structure

The Financial Control Regulation for listed companies in Korea requires that at least 10% of net income (net of accumulated deficit), and an amount equal to net gain (net of related income taxes, if any) on the disposal of property and equipment be appropriated as a reserve for improvement of financial structure until the ratio of stockholders' equity to total assets reaches 30%. The reserve for improvement of financial structure may not be utilized for cash dividends, but may only be used to offset a future deficit, if any, or may be transferred to capital stock.

c. Reserves for Loss on Disposal of Treasury Stock and Research and Manpower Development

Reserves for loss on disposal of treasury stock and research and manpower development were appropriated in order to recognize certain tax deductible benefits through the early recognition of future expenditures for tax purposes. These reserves will be reversed from appropriated retained earnings in accordance with the relevant tax

laws. Such reversal will be included in taxable income in the year of reversal.

d. Reserve for Business Expansion

The reserve for business expansion is voluntary and was approved by the board of directors and stockholders.

Table of Contents**14. TREASURY STOCK**

Upon issuances of stock dividends and new common stock, and the merger with Shinsegi Telecomm, Inc. and SK IMT Co., Ltd., the Company acquired fractional shares totaling 77,970 shares for ₩6,110 million through 2005. In addition, the Company acquired 8,584,445 shares of treasury stock in the market or through the trust funds for ₩2,040,995 million through 2005 in order to stabilize the market price of its stock. In addition, during the nine months ended September 30, 2006, the convertible bonds with a principal amount of US\$18,420,000 were converted into 99,361 shares of common stock. Such conversion was settled by the Company by using its treasury stock with carrying value totaling ₩23,481 million, which resulted in the Company recording ₩176 million of gain on disposal of treasury stock.

On August 17, 2006, the Company retired 491,000 shares of treasury stock, which were acquired by the Company during the period from August 1, 2006 through August 14, 2006 for ₩92,518 million in accordance with a resolution of the board of directors dated July 28, 2006.

On September 29, 2006, the Company retired 592,000 shares of treasury stock, which were acquired by the Company during the period from September 4, 2006 through September 27, 2006 for ₩116,559 million in accordance with a resolution of the board of directors dated August 31, 2006.

In connection with the retired treasury stocks discussed above, the Company reduced its retained earnings before appropriations by ₩209,077 million in accordance with Korean Commercial law.

15. STOCK OPTIONS

On March 17, 2000, March 16, 2001 and March 8, 2002, in accordance with the approval of its stockholders or its board of directors, the Company granted stock options to its management, representing 17,800 shares at an exercise price of ₩424,000 per share, 43,820 shares at an exercise price of ₩211,000 per share and 65,730 shares at an exercise price of ₩267,000 per share. The stock options will become exercisable after three years from the date of grant and shall be exercisable for two years from the first exercisable date. Upon exercise of stock options, the Company will issue its common stock. If the employees leave the Company within three years after the grant of stock options, such employees forfeit their unvested stock options awarded. Stock options representing 530 shares for which total compensation cost was ₩3 million were forfeited during the year ended December 31, 2004.

The value of stock options granted is determined using the Black-Scholes option-pricing model, without considering the volatility factor in estimating the value of its stock options, as permitted under Korean GAAP. The following assumptions are used to estimate the fair value of options granted in 2000, 2001 and 2002; risk-free interest rate of 9.1% for 2000, 5.9% for 2001 and 6.2% for 2002; expected life of three years for 2000, 2001 and 2002; expected dividend of ₩500 per share for 2000, 2001 and 2002. Under these assumptions, total compensation cost, the recognized compensation cost (included in labor cost) for the three months and nine months ended September 30, 2006 and 2005 and the outstanding balance of stock options in capital adjustment as of September 30, 2006 and December 31, 2005 are as follows (In millions of Korean won):
