CHECK POINT SOFTWARE TECHNOLOGIES REPORTS RECORD 2012 FIRST QUARTER  
FINANCIAL RESULTS

- Total Revenue: \$313.1 million, representing an 11 percent increase year over year
- Non-GAAP Operating Income: \$186.7 million, representing 60 percent of revenues
- Non-GAAP EPS: \$0.74, representing a 16 percent increase year over year
- Cash Flow from Operations: \$275.3 million, representing a 30 percent increase year over year

REDWOOD CITY, CA – April 23, 2012 — Check Point® Software Technologies Ltd. (NASDAQ: CHKP), the worldwide leader in securing the Internet, today announced its financial results for the first quarter ended March 31, 2012.

“I am very pleased with our strong start to the 2012 calendar year. Check Point delivered record first quarter results with good growth across all of our key financial metrics. The growth was driven by our latest network security appliances and the continued strength of our annuity software blades,” said Gil Shwed, founder, chairman, and chief executive officer of Check Point Software Technologies.

Financial Highlights:

- Total Revenue: \$313.1 million, an increase of 11 percent, compared to \$281.3 million in the first quarter of 2011.
- GAAP Operating Income: \$172.9 million, an increase of 22 percent, compared to \$141.3 million the first quarter of 2011. GAAP operating margin was 55 percent, compared to 50 percent in the first quarter of 2011.
- Non-GAAP Operating Income: \$186.7 million, an increase of 16 percent, compared to \$160.6 million in the first quarter of 2011. Non-GAAP operating margin was 60 percent, compared to 57 percent in the first quarter of 2011.
- GAAP Net Income and Earnings per Diluted Share: GAAP net income was \$143.6 million, an increase of 18 percent, compared to \$122.1 million in the first quarter of 2011. GAAP earnings per diluted share were \$0.68, an increase of 19 percent, compared to \$0.57 in the first quarter of 2011.
- Non-GAAP Net Income and Earnings per Diluted Share: Non-GAAP net income was \$156.9 million, an increase of 14 percent, compared to \$137.1 million in the first quarter of 2011. Non-GAAP earnings per diluted share were \$0.74, an increase of 16 percent, compared to \$0.64 in the first quarter of 2011.
- Deferred Revenues: As of March 31, 2012, Check Point had deferred revenues of \$542.2 million, an increase of 18 percent, compared to \$460.4 million as of March 31, 2011.
- Cash Flow: Cash flow from operations was \$275.3 million, an increase of 30 percent, compared to \$211.6 million in the first quarter of 2011.
- Share Repurchase Program: During the first quarter of 2012, Check Point repurchased 1.29 million shares at a total cost of \$75 million.
- Cash Balances, Marketable Securities and Short Term Deposits: \$3,121.2 million as of March 31, 2012, an increase of \$549 million, compared to \$2,572.2 million as of March 31, 2011.

For information regarding the Non-GAAP financial measures discussed in this release, please see “Use of Non-GAAP Financial Information” and “Reconciliation of GAAP to Non-GAAP Financial Information.”

#### Check Point ThreatCloud™

On April 17, Check Point introduced ThreatCloud™, the first collaborative network to fight cybercrime. As enterprises fight threats separately, many threats are left undetected without a current way of sharing threat information across entities. To stay ahead of modern threats, businesses must collaborate – sharing threat data between organizations – to make security stronger and more effective.

ThreatCloud™ automatically gathers threat data from enterprises that choose to contribute and from an innovative worldwide network of threat sensors. It then analyzes the data and distributes threat intelligence to security gateways around the globe. ThreatCloud leverages Check Point's large installed base of security gateways, Check Point research and industry malware feeds enabling customers to quickly adapt their security response to new threats and protect their networks against threats that otherwise would go undetected.

ThreatCloud is available with Check Point's latest software blade release, R75.40, which also includes:

- New Anti-Bot and enhanced Antivirus Software Blades that are powered by ThreatCloud, allowing them to get real-time updates and enforce pre-emptive protection against advanced threats and other forms of sophisticated malware.
  - Check Point GAiA™ unified operating system supporting all security gateways and software blades.
- Over 100 additional security features, R75.40 brings customers advanced threat prevention, security consolidation and simplified management for better visibility and control.

#### Industry Accolades:

Check Point also continues to receive industry awards for innovative product development and leadership worldwide, including:

- Leader in the Gartner Magic Quadrant for Unified Threat Management
- Computing Security “Encryption Product of the Year” Award - Check Point Full Disk Encryption
- SC Magazine Readers Choice Award - Best Intrusion Prevention (IPS) Solution
- Frost & Sullivan Malaysia Excellence Award - Network Security Vendor of the Year

In addition, Check Point President, Amnon Bar-Lev, was named a 2012 Channel Chief by CRN Magazine for the fifth consecutive year, based on his program innovations, growth and experience in the channel.

Shwed concluded, “Check Point's continued network security leadership is a result of our focus on providing customers with the best security available in the marketplace. ThreatCloud™ creates the first collaborative network to fight cybercrime, empowering our customers with threat intelligence and real-time protections.”

#### Second Quarter 2012 Investor Conference Participation Schedule:

- Bank of America Merrill Lynch 2012 Technology Conference  
May 8, 2012 – San Francisco, CA
- Jeffries Global TMT Conference  
May 9, 2012 – New York, NY
- J.P. Morgan 40th Annual Technology, Media and Telecom Conference

May 16, 2012 – Boston, MA

- Cowen & Company 40th Annual Technology Media & Telecom Conference  
May 30, 2012 – New York, NY

Members of Check Point's management team will present at these conferences and discuss the latest company strategies and initiatives. Check Point's conference presentations are expected to be available via webcast on the company's web site. To view these presentations and access the most updated information please visit the company's web site at [www.checkpoint.com/ir](http://www.checkpoint.com/ir). The schedule is subject to change.

#### Conference Call and Webcast Information

Check Point will host a conference call with the investment community on April 23, 2012 at 8:30 AM ET/5:30 AM PT. To listen to the live webcast, please visit the website at: [www.checkpoint.com/ir](http://www.checkpoint.com/ir). A replay of the conference call will be available through May 1, 2012 on the company's website or by telephone at +1.201.612.7415, replay ID number 392351, account # 215.

#### About Check Point Software Technologies Ltd.

Check Point Software Technologies Ltd. ([www.checkpoint.com](http://www.checkpoint.com)), the worldwide leader in securing the Internet, provides customers with uncompromised protection against all types of threats, reduces security complexity and lowers total cost of ownership. Check Point first pioneered the industry with FireWall-1 and its patented stateful inspection technology. Today, Check Point continues to develop new innovations based on the Software Blade Architecture, providing customers with flexible and simple solutions that can be fully customized to meet the exact security needs of any organization. Check Point is the only vendor to go beyond technology and define security as a business process. Check Point 3D Security uniquely combines policy, people and enforcement for greater protection of information assets and helps organizations implement a blueprint for security that aligns with business needs. Customers include tens of thousands of organizations of all sizes, including all Fortune and Global 100 companies. Check Point's award-winning ZoneAlarm solutions protect millions of consumers from hackers, spyware and identity theft.

#### Use of Non-GAAP Financial Information

In addition to reporting financial results in accordance with generally accepted accounting principles, or GAAP, Check Point uses non-GAAP measures of net income, operating income, operating margin and earnings per share, which are adjustments from results based on GAAP to exclude non-cash stock-based compensation charges, amortization of intangible assets, net gain on marketable securities previously impaired, and the related tax effects. Check Point's management believes the non-GAAP financial information provided in this release is useful to investors' understanding and assessment of Check Point's ongoing core operations and prospects for the future. Historically, Check Point has also publicly presented these supplemental non-GAAP financial measures in order to assist the investment community to see the Company "through the eyes of management," and thereby enhance understanding of its operating performance. The presentation of this non-GAAP financial information is not intended to be considered in isolation or as a substitute for results prepared in accordance with GAAP. A reconciliation of the non-GAAP financial measures discussed in this press release to the most directly comparable GAAP financial measures is included with the financial statements contained in this press release. Management uses both GAAP and non-GAAP information in evaluating and operating business internally and as such has determined that it is important to provide this information to investors.

*(a) Includes in 2006 a \$2.1 million business consolidation charge discussed in Note 5.*

*(b) Amounts at December 31, 2006, have been retrospectively adjusted for the transfer of U.S. Can's plastic pail business from the metal food and household products packaging, Americas, segment to the plastic packaging, Americas, segment, which occurred as of January 1, 2007.*

## Notes to Unaudited Condensed Consolidated Financial Statements

### Ball Corporation and Subsidiaries

#### 4. Acquisitions

##### *U.S. Can Corporation*

On March 27, 2006, Ball acquired all of the issued and outstanding shares of U.S. Can Corporation (U.S. Can) for 444,756 common shares of Ball Corporation (valued at \$44.28 per share for a total of \$19.7 million). Contemporaneously with the acquisition, Ball refinanced \$598.2 million of U.S. Can debt, including \$26.8 million of bond redemption premiums and fees, and over the next several years, we expect to realize approximately \$42 million for acquired net operating tax loss carryforwards. The acquired operations form part of Ball's metal food and household products packaging, Americas, segment. Responsibility for a small plastic pail business acquired with the U.S. Can transaction was transferred to the company's plastic packaging, Americas, segment effective January 1, 2007. The acquisition has been accounted for as a purchase and, accordingly, its results have been included in the consolidated financial statements since March 27, 2006.

##### *Alcan Packaging*

On March 28, 2006, Ball acquired North American plastic bottle container assets from Alcan Packaging (Alcan) for \$184.7 million cash. The acquired business primarily manufactures and sells barrier polypropylene plastic bottles used in food packaging and, to a lesser extent, barrier PET plastic bottles used for beverages and food. The operations acquired form part of Ball's plastic packaging, Americas, segment. The acquisition has been accounted for as a purchase and, accordingly, its results have been included in the consolidated financial statements since March 28, 2006.

Following is a summary of the net assets acquired in the U.S. Can and Alcan transactions. The valuations were performed by management, including identification and valuation of acquired intangible assets, and of liabilities, including development and assessment of associated costs of consolidation and integration plans. The company also engaged third party experts to assist management in valuing certain assets and liabilities including inventory; property, plant and equipment; intangible assets and pension and other post-retirement obligations. During the first quarter of 2007, the company completed its valuation of the acquired assets and liabilities and revised the purchase price allocations accordingly. The final purchase price allocations resulted primarily in an increase in identifiable intangible assets for both acquisitions.

<i>(\$ in millions)</i>	U.S. Can (Metal Food & Household Products Packaging, Americas)	Alcan (Plastic Packaging, Americas)	Total
Cash	\$ 0.2	\$ -	\$ 0.2
Property, plant and equipment	164.6	73.6	238.2
Goodwill	353.2	48.7	401.9
Intangibles	63.9	33.6	97.5
Other assets, primarily inventories and receivables	220.1	40.1	260.2
Liabilities assumed (excluding refinanced debt), primarily current	(184.1)	(11.3)	(195.4)
Net assets acquired	\$ 617.9	\$ 184.7	\$ 802.6

With the assistance of an independent valuation firm, the customer relationships and acquired technologies of both acquisitions were identified as valuable intangible assets, and the company assigned them an estimated life of 20 years based on the valuation firm's estimates. Because the acquisition of U.S. Can was a stock purchase, neither the goodwill nor the intangible assets are tax deductible for U.S. income tax purposes only if, and until such time as, the stock is sold. However, because the Alcan acquisition was an asset purchase, the amortization of goodwill and intangible assets is deductible for U.S. tax purposes.

**Notes to Unaudited Condensed Consolidated Financial Statements**  
**Ball Corporation and Subsidiaries**

**5. Business Consolidation Activities**

2006

*Metal Food & Household Products Packaging, Americas*

In the first quarter of 2006, a pretax charge of \$2.1 million (\$1.4 million after tax) was recorded to shut down a metal food can production line in the Whitby, Ontario, plant. The shut down activities were completed during 2006. The charge was subsequently reduced by \$0.7 million in the fourth quarter of 2006 to reflect a gain on the disposition of the plant's fixed assets.

In October 2006 the company announced plans to close two manufacturing facilities in North America as part of the realignment of the metal food and household products packaging, Americas, segment following the acquisition earlier in the year of U.S. Can. A pretax charge of \$33.6 million (\$27.4 million after tax) was recorded in the fourth quarter related to the Burlington, Ontario, plant closure, including \$7.8 million of severance costs, \$16.8 million of pension costs and \$9 million of other costs. The closure of the Alliance, Ohio, plant, estimated to cost approximately \$1 million for employee and other costs, was treated as an opening balance sheet item related to the acquisition. Operations have ceased at both plants and payments of \$5.2 million were made in the first quarter of 2007 against the reserves.

Summary

The following table summarizes the first quarter 2007 activity related to the amounts provided for business consolidation activities:

(\$ in millions)	Fixed Assets/			Total
	Spare Parts	Employee Costs	Other	
Balance at December 31, 2006	\$ 6.7	\$ 14.1	\$ 4.3	\$ 25.1
Payments	–	(5.9)	(1.0)	(6.9)
Disposal of spare parts	(1.4)	–	–	(1.4)
Balance at April 1, 2007	\$ 5.3	\$ 8.2	\$ 3.3	\$ 16.8

The remaining reserves are expected to be utilized during 2007 and 2008. The carrying value of fixed assets remaining for sale in connection with business consolidation activities was \$13.1 million at April 1, 2007.

**6. Receivables**

A receivables sales agreement provides for the ongoing, revolving sale of a designated pool of trade accounts receivable of Ball's North American packaging operations, up to \$225 million. The agreement qualifies as off-balance sheet financing under the provisions of SFAS No. 140, as amended by SFAS No. 156. Net funds received from the sale of the accounts receivable totaled \$181.4 million at April 1, 2007, and \$201.3 million at December 31, 2006, and are reflected as a reduction of accounts receivable in the condensed consolidated balance sheets.

**Notes to Unaudited Condensed Consolidated Financial Statements**  
**Ball Corporation and Subsidiaries**

**7. Inventories**

<i>(\$ in millions)</i>	April 1, 2007	December 31, 2006
Raw materials and supplies	\$ 428.9	\$ 445.6
Work in process and finished goods	589.8	489.8
	\$ 1,018.7	\$ 935.4

Historically the cost of the majority of metal beverage packaging, Americas, and metal food and household products packaging, Americas, inventories were determined using the LIFO method of accounting. During the fourth quarter of 2006, the company determined that the FIFO method of inventory accounting better matches revenues and expenses in accordance with sales contract terms. Therefore, in the fourth quarter of 2006, the accounting policy was changed to record all inventories using the FIFO method of accounting. The adjustments to the first quarter 2006 statements of earnings and cash flows were not significant.

**8. Property, Plant and Equipment**

<i>(\$ in millions)</i>	April 1, 2007	December 31, 2006
Land	\$ 88.1	\$ 88.5
Buildings	771.3	764.1
Machinery and equipment	2,635.6	2,618.6
Construction in progress	253.5	215.1
	3,748.5	3,686.3
Accumulated depreciation	(1,859.3)	(1,810.3)
	\$ 1,889.2	\$ 1,876.0

Property, plant and equipment are stated at historical cost. Depreciation expense amounted to \$61.2 million and \$51.8 million for the three months ended April 1, 2007, and April 2, 2006, respectively.

On April 1, 2006, a fire in the metal beverage can plant in Hassloch, Germany, damaged a significant portion of the building and machinery and equipment. A \$34.7 million fixed asset write down was recorded in the first quarter of 2006, which represented the estimated impairment of the assets damaged as a result of the fire. No gain was recorded in the first quarter of 2006 as a result of the fire, although a pretax gain of \$75.5 million was recorded during the remainder of 2006. In accordance with the final agreement reached with the insurance company in November 2006, the final property insurance proceeds of €37.6 million (\$48.6 million) were received in January 2007. Additionally, €8.3 million (\$10.9 million) was recognized during the first quarter of 2007 for insurance recoveries related to business interruption costs. Approximately €19 million of additional business interruption recoveries has been agreed upon with the insurance carrier and will be recognized primarily during the second and third quarters of 2007.

<b>Other</b>	Various	21.4	Various	25.5
		2,430.8		2,311.6
Less: Current portion of long-term debt		(70.1)		(41.2)
		\$ 2,360.7		\$ 2,270.4

At April 1, 2007, approximately \$554 million was available under the multi-currency revolving credit facilities, which provide for up to \$750 million in U.S. dollar equivalents. The company also had short-term uncommitted credit facilities of up to \$337 million at April 1, 2007, of which \$168.1 million was outstanding and due on demand.

The notes payable are guaranteed on a full, unconditional and joint and several basis by certain of the company's wholly owned domestic subsidiaries. The notes payable also contain certain covenants and restrictions including, among other things, limits on the incurrence of additional indebtedness and limits on the amount of restricted payments, such as dividends and share repurchases. Exhibit 20 contains unaudited condensed, consolidating financial information for the company, segregating the guarantor subsidiaries and non-guarantor subsidiaries. Separate financial statements for the guarantor subsidiaries and the non-guarantor subsidiaries are not presented because management

has determined that such financial statements would not be material to investors.

The company was in compliance with all loan agreements at April 1, 2007, and has met all debt payment obligations. The U.S. note agreements, bank credit agreement and industrial development revenue bond agreements contain certain restrictions relating to dividend payments, share repurchases, investments, financial ratios, guarantees and the incurrence of additional indebtedness.

**Notes to Unaudited Condensed Consolidated Financial Statements**  
**Ball Corporation and Subsidiaries**

**12. Income Taxes**

Effective January 1, 2007, Ball adopted FIN 48, "Accounting for Uncertainty in Income Taxes." As of the date of adoption, the accrual for uncertain tax positions was \$45.8 million and the cumulative effect of the adoption was an increase in the reserve for uncertain tax positions of \$2.1 million. The accrual includes an \$11.4 million charge to opening retained earnings and a \$9.3 million reduction in goodwill. An additional adjustment was made to increase goodwill by \$1.2 million in the opening balance sheet of the acquisition of U.S. Can. The company records the related interest expense and penalties, if any, as a tax provision expense, consistent with the practice prior to adoption. Potential interest expense comprises \$6 million of the accrual balance discussed above, while no penalties have been provided. The amount of unrecognized tax benefits as of the date of adoption that, if recognized, would affect the effective tax rate is approximately \$37.6 million. At this time there are no positions where the unrecognized tax benefit will increase or decrease significantly within the next 12 months. U.S. federal and state income tax returns for the years 2000 through 2006 are open for audit. The income tax returns filed in Europe for the years 2002 through 2006 are also open for audit. The company's significant filings in Europe are in France, Germany, the Netherlands, Poland, Serbia and the United Kingdom. The other tax jurisdictions are not significant to the overall tax provision or accrual for uncertain tax positions.

**13. Employee Benefit Obligations**

<i>(\$ in millions)</i>	April 1, 2007	December 31, 2006
Total defined benefit pension liability	\$ 521.7	\$ 510.6
Less current portion	(24.9)	(24.1)
Long-term defined benefit pension liability	496.8	486.5
Retiree medical and other postemployment benefits	201.8	191.1
Deferred compensation plans	139.5	144.0
Other	8.7	26.1
	\$ 846.8	\$ 847.7

Components of net periodic benefit cost associated with the company's defined benefit pension plans were:

<i>(\$ in millions)</i>	April 1, 2007			Three Months Ended			April 2, 2006		
	U.S.	Foreign	Total	U.S.	Foreign	Total	U.S.	Foreign	Total
Service cost	\$ 10.1	\$ 2.2	\$ 12.3	\$ 7.1	\$ 2.2	\$ 9.3	\$ 11.7	\$ 7.3	\$ 19.0
Interest cost	11.7	7.3	19.0	10.9	6.5	17.4	(13.6)	(4.4)	(18.0)
Expected return on plan assets	(13.6)	(4.4)	(18.0)	(12.0)	(3.8)	(15.8)	0.1	(0.1)	-
Amortization of prior service cost	0.1	(0.1)	-	1.3	(0.1)	1.2	3.4	1.2	4.6
Recognized net actuarial loss	3.4	1.2	4.6	4.9	0.8	5.7	11.7	6.2	17.9
Net periodic benefit cost	\$ 11.7	\$ 6.2	\$ 17.9	\$ 12.2	\$ 5.6	\$ 17.8	\$ 11.7	\$ 6.2	\$ 17.9

Contributions to the company's defined global benefit pension plans, not including the unfunded German plans, were \$8.3 million in the first three months of 2007. The total required contributions to these funded plans are expected to be approximately \$58 million in 2007. As part of the company's overall debt reduction plan, we anticipate contributing an

incremental \$70 million (\$43 million after tax) to our North American pension plans during the fourth quarter of 2007. Payments to participants in the unfunded German plans were €4.4 million (\$5.8 million) in the first three months of 2007 and are expected to be approximately €19 million for the full year (approximately \$25 million).

Comprehensive earnings	\$ 95.8	\$ 51.5

**Notes to Unaudited Condensed Consolidated Financial Statements**  
**Ball Corporation and Subsidiaries**

**14. Shareholders' Equity and Comprehensive Earnings (continued)**

**Stock-Based Compensation Programs**

The company has shareholder approved stock option plans under which options to purchase shares of Ball common stock have been granted to officers and employees at the market value of the stock at the date of grant. Payment must be made at the time of exercise in cash or with shares of stock owned by the option holder, which are valued at fair market value on the date exercised. In general, options are exercisable in four equal installments commencing one year from the date of grant and terminate 10 years from the date of grant. A summary of stock option activity for the three months ended April 1, 2007, follows:

	Outstanding Options		Nonvested Options	
	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Grant Date Fair Value
Beginning of year	4,852,978	\$ 26.69	1,286,937	\$ 10.27
Vested			(200)	9.26
Exercised	(273,571)	16.45		
Canceled/forfeited	(15,800)	41.99	(15,800)	10.39
End of period	4,563,607	27.25	1,270,937	10.27
Vested and exercisable, end of period	3,292,670	22.31		
Reserved for future grants	5,946,941			

The weighted average remaining contractual term for all options outstanding at April 1, 2007, was 6 years and the aggregate intrinsic value (difference in exercise price and closing price at that date) was \$84.9 million. The weighted average remaining contractual term for options vested and exercisable at April 1, 2007, was 5.1 years and the aggregate intrinsic value was \$77.5 million. The company received \$4.5 million from options exercised during the three months ended April 1, 2007. The intrinsic value associated with these exercises was \$8.1 million and the associated tax benefit of \$3 million was reported as other financing activities in the condensed consolidated statement of cash flows.

In addition to stock options, the company issues to certain employees restricted shares which vest over various periods but generally in equal installments over five years. Compensation cost is recorded based upon the fair value of the shares at the grant date.

To encourage certain senior management employees and outside directors to invest in Ball stock, Ball adopted a deposit share program in March 2001 (subsequently amended and restated in April 2004) that matches purchased shares with restricted shares. In general, restrictions on the matching shares lapse at the end of four years from date of grant, or earlier in stages if established share ownership guidelines are met, assuming the relevant qualifying purchased shares are not sold or transferred prior to that time. Grants under the plan are accounted for as equity awards and compensation expense is recorded based upon the fair value of the shares at the grant date.

For the three months ended April 1, 2007, the company recognized pretax expense of \$4.8 million (\$2.9 million after tax) for share-based compensation arrangements, which represented \$0.03 per basic and diluted share. For the three months ended April 2, 2006, the company recognized pretax expense of \$3.1 million (\$1.9 million after tax) for such arrangements, which represented \$0.02 per basic and diluted share. At April 1, 2007, there was \$22.1 million of total unrecognized compensation costs related to nonvested share-based compensation arrangements. This cost is expected to be recognized in earnings over a weighted-average period of 2.5 years.

**Notes to Unaudited Condensed Consolidated Financial Statements**  
**Ball Corporation and Subsidiaries**

**15. Earnings Per Share**

(\$ in millions, except per share amounts; shares in thousands)	Three Months Ended	
	April 1, 2007	April 2, 2006
<b>Diluted Earnings per Share:</b>		
Net earnings	\$ 81.2	\$ 44.4
Weighted average common shares	102,110	103,245
Effect of dilutive stock options	1,705	1,808
Weighted average shares applicable to diluted earnings per share	103,815	105,053
Diluted earnings per share	\$ 0.78	\$ 0.42

Information needed to compute basic earnings per share is provided in the condensed consolidated statements of earnings.

**16. Contingencies**

The company is subject to various risks and uncertainties in the ordinary course of business due, in part, to the competitive nature of the industries in which the company participates. We do business in countries outside the U.S., have changing commodity prices for the materials used in the manufacture of our packaging products and participate in changing capital markets. Where management considers it warranted, we reduce these risks and uncertainties through the establishment of risk management policies and procedures, including, at times, the use of certain derivative financial instruments.

From time to time, the company is subject to routine litigation incident to its businesses. Additionally, the U.S. Environmental Protection Agency has designated Ball as a potentially responsible party, along with numerous other companies, for the cleanup of several hazardous waste sites. Our information at this time does not indicate that these matters will have a material adverse effect upon the liquidity, results of operations or financial condition of the company.

The IRS has proposed to disallow Ball's deductions of interest expense for the tax years 2000 through 2004 incurred on loans under a company-owned life insurance plan that was established in 1986. Ball has disputed the IRS's claims, and the company believes the interest deductions will be sustained as filed.

17.

### **Indemnifications and Guarantees**

During the normal course of business, the company or its appropriate consolidated direct or indirect subsidiaries have made certain indemnities, commitments and guarantees under which the specified entity may be required to make payments in relation to certain transactions. These indemnities, commitments and guarantees include indemnities to the customers of the subsidiaries in connection with the sales of their packaging and aerospace products and services; guarantees to suppliers of direct or indirect subsidiaries of the company guaranteeing the performance of the respective entity under a purchase agreement; guarantees in respect of certain foreign subsidiaries' pension plans; indemnities for liabilities associated with the infringement of third party patents, trademarks or copyrights under various types of agreements; indemnities to various lessors in connection with facility, equipment, furniture and other personal property leases for certain claims arising from such leases; indemnities to governmental agencies in connection with the issuance of a permit or license to the company or a subsidiary; indemnities pursuant to agreements relating to certain joint ventures; indemnities in connection with the sale of businesses or substantially all of the assets and specified liabilities of businesses; and indemnities to directors, officers and employees of the company to the extent permitted under the laws of the State of Indiana and the United States of America. The duration of these indemnities, commitments and guarantees varies, and in certain cases, is indefinite. In addition, the majority of these indemnities, commitments and guarantees do not provide for any limitation on the maximum potential future payments the company could be obligated to make. As such, the company is unable to reasonably estimate its potential exposure under these items.

The company has not recorded any liability for these indemnities, commitments and guarantees in the accompanying condensed consolidated balance sheets. The company does, however, accrue for payments under promissory notes and other evidences of incurred indebtedness and for losses for any known contingent liability, including those that may arise from indemnifications, commitments and guarantees, when future payment is both reasonably determinable and probable. Finally, the company carries specific and general liability insurance policies and has obtained indemnities, commitments and guarantees from third party purchasers, sellers and other contracting parties, which the company believes would, in certain circumstances, provide recourse to any claims arising from these indemnifications, commitments and guarantees.

The company's senior notes and senior credit facilities are guaranteed on a full, unconditional and joint and several basis by certain of the company's wholly owned domestic subsidiaries. Foreign tranches of the senior credit facilities are similarly guaranteed by certain of the company's wholly owned foreign subsidiaries. These guarantees are required in support of the notes and credit facilities referred to above, are co-terminous with the terms of the respective note indentures and credit agreement and would require performance upon certain events of default referred to in the respective guarantees. The maximum potential amounts which could be required to be paid under the guarantees are essentially equal to the then outstanding principal and interest under the respective notes and credit agreement, or under the applicable tranche. The company is not in default under the above notes or credit facilities.

Ball Capital Corp. II is a separate, wholly owned corporate entity created for the purchase of receivables from certain of the company's wholly owned subsidiaries. Ball Capital Corp. II's assets will be available first to satisfy the claims of its creditors. The company has provided an undertaking to Ball Capital Corp. II in support of the sale of receivables to a commercial lender or lenders which would require performance upon certain events of default referred to in the undertaking. The maximum potential amount which could be paid is equal to the outstanding amounts due under the accounts receivable financing (see Note 6). The company, the relevant subsidiaries and Ball Capital Corp. II are not in default under the above credit arrangement.

From time to time, the company is subject to claims arising in the ordinary course of business. In the opinion of management, no such matter, individually or in the aggregate, exists which is expected to have a material adverse effect on the company's consolidated results of operations, financial position or cash flows.

## **Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

*Management's discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements and the accompanying notes. Ball Corporation and its subsidiaries are referred to collectively as "Ball" or the "company" or "we" or "our" in the following discussion and analysis.*

### **BUSINESS OVERVIEW**

Ball Corporation is one of the world's leading suppliers of metal and plastic packaging to the beverage, food and household products industries. Our packaging products are produced for a variety of end uses and are manufactured in plants around the world. We also supply aerospace and other technologies and services to governmental and commercial customers.

We sell our packaging products primarily to major beverage and food producers and producers of household products with which we have developed long-term customer relationships. This is evidenced by our high customer retention and our large number of long-term supply contracts. While we have diversified our customer base, we do sell a majority of our packaging products to relatively few major companies in North America, Europe, the People's Republic of China (PRC) and Argentina, as do our equity joint ventures in Brazil, the U.S. and the PRC. We also purchase raw materials from relatively few suppliers. Because of our customer and supplier concentration, our business, financial condition and results of operations could be adversely affected by the loss of a major customer or supplier or a change in a supply agreement with a major customer or supplier, although our long-term relationships and contracts mitigate these risks.

In the rigid packaging industry, sales and earnings can be improved by reducing costs, developing new products, expanding volume and increasing pricing. In 2008 we expect to complete a project to upgrade and streamline our North American beverage can end manufacturing capabilities, a project that is expected to result in productivity gains and cost reductions beginning this year. While the U.S. and Canadian beverage container manufacturing industry is relatively mature, the European, PRC and Brazilian beverage can markets are growing and are expected to continue to grow. We are capitalizing on this growth by continuing to reconfigure some of our European can manufacturing lines. To better position the company in the European market, the capacity from the fire-damaged Hassloch, Germany, plant is being replaced with a mix of steel beverage can manufacturing capacity in the Hassloch plant and aluminum beverage can manufacturing capacity in the company's Hermsdorf, Germany, plant. Two of the new German lines are currently producing at limited capacity, and all three lines are expected to be in commercial production by the end of the second quarter of 2007.

As part of our packaging strategy, we are focused on developing and marketing new and existing products that meet the needs of our customers. These innovations include new shapes, sizes, opening features and other functional benefits of both metal and plastic packaging. This packaging development activity helps us maintain and expand our supply positions with major beverage, food and household products customers.

Ball's consolidated earnings are exposed to foreign exchange rate fluctuations. We attempt to mitigate this exposure through the use of derivative financial instruments, as discussed in "Quantitative and Qualitative Disclosures About Market Risk" within Item 3 of this report.

The primary customers for the products and services provided by our aerospace and technologies segment are U.S. government agencies or their prime contractors. It is possible that federal budget reductions and priorities, or changes in agency budgets, could limit future funding and new contract awards or delay or prolong contract performance.

We recognize sales under long-term contracts in the aerospace and technologies segment using the cost-to-cost, percentage of completion method of accounting. Our present contract mix consists of approximately two-thirds cost-type contracts, which are billed at our costs plus an agreed upon and/or earned profit component, and approximately one-third fixed price contracts. We include time and material contracts in the fixed price category because such contracts typically provide for the sale of engineering labor at fixed hourly rates.

Throughout the period of contract performance, we regularly reevaluate and, if necessary, revise our estimates of total contract revenue, total contract cost and progress toward completion. Because of contract payment schedules, limitations on funding and other contract terms, our sales and accounts receivable for this segment include amounts that have been earned but not yet billed.

Management uses various measures to evaluate company performance. The primary financial metric we use is economic value added (operating earnings, as defined by the company, less a charge for net operating assets employed). Our goal is to increase economic value added on an annual basis. Other financial metrics we use are earnings before interest and taxes (EBIT); earnings before interest, taxes, depreciation and amortization (EBITDA); diluted earnings per share; operating cash flow and free cash flow (generally defined by the company as cash flow from operating activities less capital expenditures). These financial measures may be adjusted at times for items that affect comparability between periods. Nonfinancial measures in the packaging segments include production spoilage rates, quality control figures, safety statistics and production and shipment volumes. Additional measures used to evaluate performance in the aerospace and technologies segment include contract revenue realization, award and incentive fees realized, proposal win rates and backlog (including awarded, contracted and funded backlog).

We recognize that attracting and retaining quality employees is essential to the success of Ball and, because of this, we strive to pay employees competitively and encourage their ownership of the company's common stock as part of a diversified portfolio. For most management employees, a meaningful portion of compensation is at risk as an incentive, dependent upon economic value added operating performance. For more senior positions, more compensation is at risk. Through our employee stock purchase plan and 401(k) plan, which matches employee contributions with Ball common stock, employees, regardless of organizational level, have opportunities to own Ball stock.

## **CONSOLIDATED SALES AND EARNINGS**

The company has five reportable segments organized along a combination of product lines and geographic areas: (1) metal beverage packaging, Americas; (2) metal beverage packaging, Europe/Asia; (3) metal food and household products packaging, Americas; (4) plastic packaging, Americas; and (5) aerospace and technologies. We also have investments in companies in the U.S., the PRC and Brazil, which are accounted for using the equity method of accounting and, accordingly, those results are not included in segment sales or earnings.

During the fourth quarter of 2006, Ball's management changed the company's method of inventory accounting for certain inventories from the last-in, first-out (LIFO) method to the first-in, first-out (FIFO) method in the metal beverage, Americas, and the metal food and household products packaging, Americas, segments. The period ended April 2, 2006, has been retrospectively adjusted on a FIFO basis. In the third quarter of 2006, the company changed its expense allocation method by allocating to each of the packaging segments stock-based compensation expense previously included in corporate undistributed expenses. These changes did not have a significant impact on any segment for the current or prior years. The quarter ended April 2, 2006, has been conformed to the current presentation of this expense allocation.

### *Metal Beverage Packaging, Americas*

The metal beverage packaging, Americas, segment consists of operations located in the U.S., Canada and Puerto Rico, which manufacture metal container products used in beverage packaging. This segment accounted for 38 percent of consolidated net sales in the first three months of 2007 (43 percent in 2006). Sales were 8 percent higher in 2007 than in 2006 as a result of higher sales prices, which were primarily due to rising aluminum prices.

Segment earnings of \$93.8 million in the first quarter of 2007 were higher than those of the first quarter of 2006, which were \$53.5 million. Contributing to the higher earnings were the impact of high raw material inventories

carried through from 2006, cost recovery mechanisms in certain customer contracts, positive cost impacts from new end technology projects and improved production efficiencies in our manufacturing facilities. Reductions in energy costs also contributed to the improved earnings performance. The higher levels of raw material inventories carried over from 2006 were the result of purchasing more than normal supplies of raw material to address concerns about potential work stoppages and concerns of delivery from certain suppliers. The comparatively high earnings in the first quarter of 2007 are not expected to continue as the inventories carried over from 2006 were used during the first quarter.

We continue to focus efforts on the growing custom beverage can business, which includes cans of different shapes, diameters and fill volumes, and cans with added functional attributes for new products and product line extensions.

*Metal Beverage Packaging, Europe/Asia*

The metal beverage packaging, Europe/Asia, segment includes metal beverage packaging products manufactured and sold in Europe and Asia, as well as plastic containers manufactured and sold in Asia. This segment accounted for 23 percent of consolidated net sales in the first three months of 2007 (22 percent in 2006). Segment sales in the first quarter of 2007 were 28 percent higher compared to the same period of the prior year due largely to strong demand, market growth, higher volumes, price recovery initiatives and the strength of the euro. Higher segment volumes were aided by favorable European weather and growth in Europe of custom can volumes. The slow return of the metal beverage can to the German market, following the mandatory deposit legislation previously reported on, is being more than offset by stronger demand in southern and eastern Europe, which experienced double-digit percentage growth in the first quarter of 2007. Higher segment volumes in the PRC were aided by continued growth of beverage consumption and a shift mix from other packaging types.

Segment earnings were \$44.9 million in the first three months of 2007 compared to \$28.1 million for the same period in 2006. Earnings in 2007 were higher due to increased sales volumes; price recovery initiatives; a stronger euro; and manufacturing and selling, general and administrative cost control programs. These improvements were partially offset by higher raw material, freight and energy costs.

On April 1, 2006, a fire in the metal beverage can plant in Hassloch, Germany, damaged a significant portion of the building and machinery and equipment. A \$34.7 million fixed asset write down was recorded in the first quarter of 2006, which represented the estimated impairment of the assets damaged as a result of the fire. No gain or loss was recorded in the first quarter of 2006 as a result of the fire, although a pretax gain of \$75.5 million was recorded during the remainder of 2006. In accordance with the final agreement reached with the insurance company in November 2006, the final property insurance proceeds of €37.6 million (\$48.6 million) were received in January 2007. Additionally, €8.3 million (\$10.9 million) was recognized in the first quarter of 2007 for insurance recoveries related to business interruption costs. Approximately €19 million of additional business interruption recoveries has been agreed upon with the insurance carrier and will be recognized during the second and third quarters of 2007.

*Metal Food & Household Products Packaging, Americas*

The metal food and household products packaging, Americas, segment consists of operations located in the U.S., Canada and Argentina. The company acquired U.S. Can Corporation (U.S. Can) on March 27, 2006, and with that acquisition, added to its metal food can manufacturing the production of aerosol cans, paint cans and custom and specialty cans. Effective January 1, 2007, responsibility for a small plastic pail business acquired with the U.S. Can transaction was transferred to the plastic packaging, Americas, segment.

Segment sales in the first quarter of 2007 comprised 16 percent of consolidated net sales (14 percent in 2006). First quarter 2007 sales were 47 percent higher than in the first quarter of 2006 due to the inclusion of sales from the acquisition of U.S. Can and the pass through of higher raw material costs. These increases were partially offset by lower metal food can sales volumes compared to the first quarter of 2006, which were attributable to higher pre-buys by our customers in the first quarter of 2006 compared to the first quarter of 2007, as a result of announced steel price increases, and lost business in 2006 that impacted first quarter 2007 food can sales volumes.

Segment losses were \$0.2 million in the first quarter of 2007 compared to earnings of \$1 million in the same period last year. Earnings in the first quarter of 2007 were negatively impacted by higher costs as a result of poor manufacturing performance in late 2006 carried into 2007, higher manufacturing costs and inefficiencies in the first quarter of 2007 attributable to ongoing integration efforts related to the closure of Ball's Burlington, Ontario,

manufacturing facility in the fourth quarter of 2006, higher material costs and lower metal food can sales volumes. The first quarter of 2006 also included a pretax charge of \$2.1 million (\$1.4 million after tax) for employee benefit and decommissioning costs related to the shut down of a metal food can manufacturing line in Ball's Whitby, Ontario, plant.

Additional details regarding business consolidation activities are available in Note 5 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

#### *Plastic Packaging, Americas*

The plastic packaging, Americas, segment consists of operations located in the U.S. and Canada, which manufacture polyethylene terephthalate (PET) and polypropylene plastic container products used mainly in beverage and food packaging, as well as high density polyethylene and polypropylene containers for industrial and household product applications. On March 28, 2006, Ball acquired North American plastic bottle container assets from Alcan Packaging (Alcan), including two plastic container manufacturing plants in the U.S. and one in Canada, as well as certain manufacturing equipment and other assets from other Alcan facilities. Effective January 1, 2007, responsibility for a U.S. Can plastic pail business was also transferred to the plastic packaging, Americas, segment.

Segment sales, which accounted for 11 percent of consolidated net sales in the first quarter of 2007 (9 percent in 2006), were 52 percent higher than in the same period in 2006. The segment sales increase in the first quarter was related to the Alcan acquisition and the sales from the transferred plastic pail business from the U.S. Can acquisition, as well as higher PET bottle volumes in 2007. We continue to focus PET development efforts in the custom hot-fill, beer, wine, flavored alcoholic beverage and specialty container markets, and we have added specialty container production capacity in these areas to accommodate anticipated new demand. In the food and specialty area, development efforts are focused on custom markets as well.

Segment earnings of \$2.3 million in the first three months of 2007 were higher than first quarter 2006 earnings of \$1.6 million largely due to the incremental sales from the Alcan and U.S. Can acquisitions, partially offset by lower than anticipated PET sales volumes and the temporary idling of some production capacity, which negatively impacted segment earnings in the first quarter of 2007.

#### *Aerospace and Technologies*

Aerospace and technologies segment sales, which represented 12 percent of consolidated net sales in the first quarter of 2007 (12 percent in 2006), were 29 percent higher than in the first quarter of 2006 due to new programs, increased scope on previously awarded contracts and cost overruns, offset by reductions to ongoing programs due to customer funding constraints and program delays. Segment earnings were \$19.6 million in the first three months of 2007 compared to \$9.5 million for the same period in 2006. Earnings improvement in the first quarter of 2007 was due to an improved contract mix as a consequence of newer, more profitable programs. In addition, earnings in the first quarter of 2006 were negatively affected by the lower sales due to program delays and higher unrecoverable pension costs.

Contracted backlog in the aerospace and technologies segment at April 1, 2007, was \$832 million compared to a backlog of \$886 million at December 31, 2006. Comparisons of backlog are not necessarily indicative of the trend of future operations.

For additional information on our segment operations, see the Summary of Business by Segment in Note 3 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

#### Selling, General and Administrative

Selling, general and administrative (SG&A) expenses were \$82.2 million in the first quarter of 2007 compared to \$70.3 million for the same period in 2006. Contributing to higher expenses in the first quarter of 2007 compared to 2006 were \$4.5 million of additional SG&A from the U.S. Can acquisition, expense associated with the mark-to-market adjustment of a deferred stock incentive compensation plan and normal compensation and benefit increases, including incentive compensation. Also, a \$5.8 million out-of-period adjustment was included in SG&A

expenses in the first quarter of 2006.

Interest and Taxes

Consolidated interest expense was \$37.9 million for the first three months of 2007 compared to \$23.3 million in the same period of 2006. The higher expense in 2007 was primarily due to higher average borrowings in connection with the company's acquisitions in March 2006.

Page 20

---

The consolidated effective income tax rate was 32 percent for the first three months of 2007 compared to 29 percent for the same period in 2006. The tax rate was higher in 2007 primarily due to the current impact of Financial Interpretation No. (FIN) 48, which the company adopted as of January 1, 2007; slightly lower projected tax credits in 2007; the expiration, on December 31, 2006, of the extraterritorial income exclusion for exporters, which was partially offset by an increase in the 2007 manufacturing deduction percentage; and a shift in the pretax income mix to higher tax jurisdictions. In addition, the 2006 effective tax rate included a discrete period \$1.4 million tax benefit recorded upon the settlement of certain tax matters, as well as the tax benefit for some non-recurring deductions, including a Canadian rationalization charge. Details regarding the adoption of FIN 48 are included in Note 12 to the unaudited condensed consolidated financial statements within Item 1 of this report.

## **NEW ACCOUNTING PRONOUNCEMENTS**

For information regarding recent accounting pronouncements, see Note 2 to the unaudited condensed consolidated financial statements within Item 1 of this report.

## **FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES**

Cash flows used in operations were \$107.7 million in the first three months of 2007 compared to \$171.8 million in the first three months of 2006. The improvement over 2006 was primarily due to higher net earnings.

Based on information currently available, we estimate 2007 capital spending to be approximately \$275 million, net of property insurance recoveries, compared to 2006 net capital spending of \$218.3 million.

Interest-bearing debt increased to \$2,598.9 million at April 1, 2007, compared to \$2,451.7 million at December 31, 2006, primarily due to seasonal working capital needs, common stock repurchases and a higher euro. We intend to allocate our operating cash flow in 2007 to debt reduction, dividends and common stock repurchases. Our stock repurchase program, net of issuances, is expected to be more than \$175 million in 2007 compared to \$45.7 million in 2006. Through the first quarter of 2007, we repurchased \$87.5 million of our common stock, net of issuances, including the \$51.9 million settlement in January 2007 of a forward contract commenced in December 2006.

Total required contributions to the company's defined benefit plans, not including the unfunded German plans, are expected to be approximately \$58 million in 2007. As part of the company's overall debt reduction plan, we anticipate contributing an incremental \$70 million (\$43 million after tax) to our North American pension plans during the fourth quarter of 2007. We expect these incremental contributions to bring the pension plans funding to the 95 percent level. This estimate may change based on plan asset performance, the revaluation of the plans' liabilities later in 2007 and revised estimates of 2007 full-year cash flows. Payments to participants in the unfunded German plans are expected to be approximately €19 million for the full year (approximately \$25 million).

At April 1, 2007, approximately \$554 million was available under the company's multi-currency revolving credit facilities. In addition, the company had short-term uncommitted credit facilities of \$337 million at the end of the first quarter, of which \$168.1 million was outstanding.

The company has a receivables sales agreement that provides for the ongoing, revolving sale of a designated pool of trade accounts receivable of Ball's North American packaging operations, up to \$225 million. The agreement qualifies as off-balance sheet financing under the provisions of Statement of Financial Accounting Standards (SFAS) No. 140, as amended by SFAS No. 156. Net funds received from the sale of the accounts receivable totaled \$181.4 million at April 1, 2007, and \$201.3 million at December 31, 2006, and are reflected as a reduction of accounts receivable in the condensed consolidated balance sheets.

The company was in compliance with all loan agreements at April 1, 2007, and has met all debt payment obligations. Additional details about the company's debt and receivables sales agreement are available in Notes 11 and 6, respectively, accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

## CONTINGENCIES, INDEMNIFICATIONS AND GUARANTEES

Details about the company's contingencies, indemnifications and guarantees are available in Notes 16 and 17 accompanying the unaudited condensed consolidated financial statements included within Item 1 of this report.

### Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the ordinary course of business, we employ established risk management policies and procedures to reduce our exposure to fluctuations in commodity prices, interest rates, foreign currencies and prices of the company's common stock in regard to common share repurchases. Although the instruments utilized involve varying degrees of credit, market and interest risk, the counterparties to the agreements are expected to perform fully under the terms of the agreements.

We have estimated our market risk exposure using sensitivity analysis. Market risk exposure has been defined as the changes in fair value of derivative instruments, financial instruments and commodity positions. To test the sensitivity of our market risk exposure, we have estimated the changes in fair value of market risk sensitive instruments assuming a hypothetical 10 percent adverse change in market prices or rates. The results of the sensitivity analysis are summarized below.

#### Commodity Price Risk

We manage our North American commodity price risk in connection with market price fluctuations of aluminum primarily by entering into can and can end sales contracts, which generally include aluminum-based pricing terms that consider price fluctuations under our commercial supply contracts for aluminum purchases. Such terms may include a fixed price or an upper limit to the aluminum component pricing. This matched pricing affects substantially all of our metal beverage packaging, Americas, net sales. We also, at times, use certain derivative instruments such as option and forward contracts as cash flow hedges to match commodity price risk with sales contracts.

Most of the plastic packaging, Americas, sales contracts negotiated through the end of the first quarter include provisions to pass through resin cost changes. As a result, we believe we have minimal exposure related to changes in the cost of plastic resin. Many of our metal food and household products packaging, Americas, sales contracts negotiated through the end of the first quarter either include provisions permitting us to pass through some or all steel cost changes we incur or incorporate annually negotiated steel costs. We anticipate that we will be able to pass through the majority of the steel price increases that occur through the fourth quarter of 2007.

In Europe and Asia, the company manages aluminum and steel raw material commodity price risks through annual and long-term contracts for the purchase of the materials, as well as certain sales contracts, that reduce the company's exposure to fluctuations in commodity prices within the current year. These purchase and sales contracts include fixed price, floating and pass-through pricing arrangements. To minimize Ball's exposure to significant price changes, the company also uses forward and option contracts as cash flow hedges to manage future aluminum price risk and foreign exchange exposures for those sales contracts where there is not a pass-through arrangement.

Outstanding derivative contracts at the end of the first quarter of 2007 expire within five years. Included in shareholders' equity at April 1, 2007, within accumulated other comprehensive loss, is approximately \$0.2 million of net gain associated with these contracts, of which \$0.7 million of net gain is expected to be recognized in the consolidated statement of earnings during the next 12 months. Gains and/or losses on these derivative contracts will be offset by higher and/or lower costs on metal purchases.

Considering the effects of derivative instruments, the market's ability to accept price increases and the company's commodity price exposures, a hypothetical 10 percent adverse change in the company's steel, aluminum and resin

prices could result in an estimated \$12.3 million after-tax reduction of net earnings over a one-year period. Additionally, if foreign currency exchange rates were to change adversely by 10 percent, we estimate there could be a \$13.1 million after-tax reduction of net earnings over a one-year period for foreign currency exposures on the metal. Actual results may vary based on actual changes in market prices and rates.

The company is also exposed to fluctuations in prices for energy such as natural gas and electricity, as well as the cost of diesel fuel as a component of freight cost. A hypothetical 10 percent increase in our utility prices could result in an estimated \$8.9 million after-tax reduction of net earnings over a one-year period. A hypothetical 10 percent increase in our diesel fuel surcharge could result in an estimated \$2 million after-tax reduction of net earnings over the same period. Actual results may vary based on actual changes in market prices and rates.

#### Interest Rate Risk

Our objectives in managing exposure to interest rate changes are to limit the effect of such changes on earnings and cash flows and to lower our overall borrowing costs. To achieve these objectives, we use a variety of interest rate swaps and options to manage our mix of floating and fixed-rate debt. Interest rate instruments held by the company at April 1, 2007, included pay-fixed interest rate swaps. Pay-fixed swaps effectively convert variable rate obligations to fixed rate instruments. Swap agreements expire at various times within the next five years. Included in shareholders' equity at April 1, 2007, within accumulated other comprehensive loss, is approximately \$4.3 million of net gain associated with these contracts, of which \$0.9 million of net earnings is expected to be recognized in the consolidated statement of earnings during the next 12 months. Approximately \$1.1 million of net gain related to the termination or deselection of hedges is included in the above accumulated other comprehensive loss at April 1, 2007. The amount recognized in 2007 earnings related to terminated hedges is insignificant.

Based on our interest rate exposure at April 1, 2007, assumed floating rate debt levels through the first quarter of 2008 and the effects of derivative instruments, a 100 basis point increase in interest rates could result in an estimated \$7.7 million after-tax reduction of net earnings over a one-year period. Actual results may vary based on actual changes in market prices and rates and the timing of these changes.

#### Foreign Currency Exchange Rate Risk

Our objective in managing exposure to foreign currency fluctuations is to protect foreign cash flows and earnings associated with foreign exchange rate changes through the use of cash flow hedges. In addition, we manage foreign earnings translation volatility through the use of foreign currency options. Our foreign currency translation risk results from the European euro, British pound, Canadian dollar, Polish zloty, Chinese renminbi, Brazilian real, Argentine peso and Serbian dinar. We face currency exposures in our global operations as a result of purchasing raw materials in U.S. dollars and, to a lesser extent, in other currencies. Sales contracts are negotiated with customers to reflect cost changes and, where there is not a foreign exchange pass-through arrangement, the company uses forward and option contracts to manage foreign currency exposures. Contracts outstanding at the end of the first quarter 2007 expire within five years. At April 1, 2007, there were no amounts included in accumulated other comprehensive loss for these items.

Considering the company's derivative financial instruments outstanding at April 1, 2007, and the currency exposures, a hypothetical 10 percent reduction in foreign currency exchange rates compared to the U.S. dollar could result in an estimated \$22.2 million after-tax reduction of net earnings over a one-year period. This amount includes the \$13.1 million currency exposure discussed above in the "Commodity Price Risk" section. This hypothetical adverse change in foreign currency exchange rates would also reduce our forecasted average debt balance by \$85.9 million. Actual changes in market prices or rates may differ from hypothetical changes.

#### **Item 4. CONTROLS AND PROCEDURES**

Our chief executive officer and chief financial officer participated in management's evaluation of our disclosure controls and procedures, as defined by the Securities and Exchange Commission (SEC), as of the end of the period covered by this report and concluded that our controls and procedures were effective.

During the quarter, there were no changes in the company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting. The company acquired certain operations of U.S. Can on March 27, 2006, and certain assets of Alcan on March 28, 2006. (Additional details are available in Note 4 to the condensed consolidated financial statements within Item 1 of this report.) The company is integrating the acquired U.S. Can and Alcan operations within its system of internal controls over financial reporting. Pursuant to rules promulgated under Section 404 of the Sarbanes-Oxley Act of 2002, the controls for these acquired operations are required to be evaluated and tested by the end of 2007.

## FORWARD-LOOKING STATEMENT

The company has made or implied certain forward-looking statements in this report which are made as of the end of the time frame covered by this report. These forward-looking statements represent the company's goals, and results could vary materially from those expressed or implied. From time to time we also provide oral or written forward-looking statements in other materials we release to the public. As time passes, the relevance and accuracy of forward-looking statements may change. Some factors that could cause the company's actual results or outcomes to differ materially from those discussed in the forward-looking statements include, but are not limited to: fluctuation in customer and consumer growth, demand and preferences; loss of one or more major customers or changes to contracts with one or more customers; insufficient production capacity; overcapacity in foreign and domestic metal and plastic container industry production facilities and its impact on pricing; failure to achieve anticipated productivity improvements or production cost reductions, including those associated with capital expenditures such as our beverage can end project; changes in climate and weather; fruit, vegetable and fishing yields; power and natural resource costs; difficulty in obtaining supplies and energy, such as gas and electric power; availability and cost of raw materials, as well as the recent significant increases in resin, steel, aluminum and energy costs, and the ability or inability to include or pass on to customers changes in raw material costs; changes in the pricing of the company's products and services; competition in pricing and the possible decrease in, or loss of, sales resulting therefrom; insufficient or reduced cash flow; transportation costs; the number and timing of the purchases of the company's common shares; regulatory action or federal and state legislation including mandated corporate governance and financial reporting laws; the effects of the German mandatory deposit or other restrictive packaging legislation such as recycling laws; interest rates affecting our debt; labor strikes; increases and trends in various employee benefits and labor costs, including pension, medical and health care costs; rates of return projected and earned on assets and discount rates used to measure future obligations and expenses of the company's defined benefit retirement plans; boycotts; antitrust, intellectual property, consumer and other litigation; maintenance and capital expenditures; goodwill impairment; changes in generally accepted accounting principles or their interpretation; accounting changes; local economic conditions; the authorization, funding, availability and returns of contracts for the aerospace and technologies segment and the nature and continuation of those contracts and related services provided thereunder; delays, extensions and technical uncertainties, as well as schedules of performance associated with such segment contracts; international business and market risks such as the devaluation or revaluation of certain currencies and the activities of foreign subsidiaries; international business risks (including foreign exchange rates and activities of foreign subsidiaries) in Europe and particularly in developing countries such as the PRC and Brazil; changes in the foreign exchange rates of the U.S. dollar against the European euro, British pound, Polish zloty, Serbian dinar, Hong Kong dollar, Canadian dollar, Chinese renminbi, Brazilian real and Argentine peso, and in the foreign exchange rate of the European euro against the British pound, Polish zloty and Serbian dinar; terrorist activity or war that disrupts the company's production or supply; regulatory action or laws including tax, environmental and workplace safety; technological developments and innovations; successful or unsuccessful acquisitions, joint ventures or divestitures and the integration activities associated therewith; changes to unaudited results due to statutory audits of our financial statements or management's evaluation of the company's internal controls over financial reporting; and loss contingencies related to income and other tax matters, including those arising from audits performed by U.S. and foreign tax authorities. If the company is unable to achieve its goals, then the company's actual performance could vary materially from those goals expressed or implied in the forward-looking statements. The company currently does not intend to publicly update forward-looking statements except as it deems necessary in quarterly or annual earnings reports. You are advised, however, to consult any further disclosures we make on related subjects in our 10-K, 10-Q and 8-K reports to the Securities and Exchange Commission.

**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

There were no events required to be reported under Item 1 for the quarter ended April 1, 2007.

**Item 1A. Risk Factors**

Risk factors affecting the company can be found within Item 1A of the company's annual report on Form 10-K.

**Item 2. Changes in Securities**

The following table summarizes the company's repurchases of its common stock during the quarter ended April 1, 2007.

## Purchases of Securities

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs <sup>(b)</sup>
<i>(\$ in millions)</i>				
January 1 to February 4, 2007	1,200,185	\$ 43.29	1,200,185	8,727,990
February 5 to March 4, 2007	418,199	\$ 46.02	418,199	8,309,791
March 5 to April 1, 2007	701,148	\$ 45.77	701,148	7,608,643
Total	2,319,532 <sup>(a)</sup>	\$ 44.53	2,319,532	

*(a) Includes open market purchases and/or shares retained by the company to settle employee withholding tax liabilities.*

*(b) The company has an ongoing repurchase program for which shares are authorized from time to time by Ball's board of directors.*

**Item 3. Defaults Upon Senior Securities**

There were no events required to be reported under Item 3 for the quarter ended April 1, 2007.

**Item 4. Submission of Matters to a Vote of Security Holders**

There were no events required to be reported under Item 4 for the quarter ended April 1, 2007.

**Item 5. Other Information**

There were no events required to be reported under Item 5 for the quarter ended April 1, 2007.

**Item 6. Exhibits**

- 20 Subsidiary Guarantees of Debt
- 31 Certifications pursuant to Rule 13a-14(a) or Rule 15d-14(a), by R. David Hoover, Chairman of the Board, President and Chief Executive Officer of Ball Corporation and by Raymond J. Seabrook, Executive Vice President and Chief Financial Officer of Ball Corporation
