is continuing. Both wells are still estimated to take approximately three months to complete from commencement of drilling.

Surface Spill Response and Containment

Work continues to collect and disperse oil that has reached the surface of the sea, to protect the shoreline of the Gulf of Mexico, and to collect and clean up any oil that has reached shore.

More than 2,600 vessels are now involved in the response effort, including skimmers, tugs, barges and recovery vessels. Operations to skim oil from the surface of the water now have recovered, in total, approximately 368,000 barrels (15.5 million gallons) of oily liquid.

The total length of containment boom deployed as part of efforts to prevent oil from reaching the coast is now over 2.2 million feet, and an additional 2.4 million feet of sorbent boom also has been deployed.

To date, approximately 37,000 claims have been submitted and more than 18,000 payments already have been made, totalling approximately \$48 million. BP has received more than 152,000 calls into its help lines.

Additional information

The cost of the response to date amounts to approximately \$1,250 million, including the cost of the spill response, containment, relief well drilling, grants to the Gulf states, claims paid, and federal costs. This excludes the \$360 million in funds for the Louisiana barrier islands construction project. It is too early to quantify other potential costs and liabilities associated with the incident.
