INTRODUCTORY NOTE

Dynegy Inc. is filing this Amendment No. 1 on Form 10-Q/A ("Amendment No. 1") to reflect restatements relating to its audited consolidated financial statements as of December 31, 2001 and its unaudited condensed consolidated financial statements for the quarterly periods ended March 31, 2002 and 2001. These financial statements were previously included in Dynegy's Quarterly Report on Form 10-Q for the quarter ended March 31, 2002, which was originally filed with the SEC on May 15, 2002 (the "Original Filing"). These financial statements and the other financial information included in the Original Filing have been revised to reflect the restatement items described in the Explanatory Note to the accompanying unaudited condensed consolidated financial statements. Revised financial information for the periods presented reflecting these restatements was previously included in Dynegy's Annual Report on Form 10-K for the fiscal year ended December 31, 2001, which was most recently amended by Amendment No. 2 thereto filed with the SEC on April 11, 2003 (the "2001 Form 10-K/A"), and Dynegy's Annual Report on Form 10-K for the fiscal year ended December 31, 2002, which also was filed with the SEC on April 11, 2003 (the "2002 Form 10-K"). The restated financial and other information included in this Amendment No. 1 should be read together with the 2001 Form 10-K/A and the 2002 Form 10-K. Certain of the operating and financing cash flow data included in this Amendment No. 1 has been revised from the comparable data included in Note 19--Quarterly Financial Information (Unaudited) beginning on page F-76 of the 2002 Form 10-K. This revised data, which reflects minor corrections for errors, should be read to replace and supersede the data previously included in the 2002 Form 10-K. In addition to the restatements described elsewhere herein, this Amendment No. 1 also includes certain other revisions to the Original Filing. Dynegy's periodic SEC reports, including this Amendment No. 1, remain subject to an ongoing review by the SEC Division of Corporation Finance.

PLEASE NOTE THAT THE INFORMATION CONTAINED IN THIS AMENDMENT NO. 1, INCLUDING THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS AND THE

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

NOTES THERETO, DOES NOT REFLECT EVENTS OCCURRING AFTER MAY 15, 2002 (THE DATE OF THE ORIGINAL FILING). FOR A DESCRIPTION OF THESE EVENTS, PLEASE READ DYNEGY'S EXCHANGE ACT REPORTS FILED SINCE MAY 15, 2002, INCLUDING ITS ANNUAL REPORT ON FORM 10-K FOR THE FISCAL YEAR ENDED DECEMBER 31, 2002. SEE NOTE 12--SUBSEQUENT EVENTS FOR FURTHER DISCUSSION.

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

EXPLANATORY NOTE--RESTATEMENTS

This Amendment No. 1 on Form 10-Q/A of Dynegy Inc. ("Dynegy" or the "Company") includes restatements relating to the Company's audited consolidated financial statements as of December 31, 2001 and its unaudited condensed consolidated financial statements for the three-month periods ended March 31, 2002 and 2001. On April 11, 2003, Dynegy filed its Annual Report on Form 10-K for the fiscal year ended December 31, 2002 (the "2002 Form 10-K"), which included restated financial statements for each of the two years in the period ended December 31, 2001. The 2002 Form 10-K also included restated financial information for the three-month periods ended March 31, 2002 and 2001. The restatements relate to the following:

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

- . the Project Alpha structured natural gas transaction,
- . a balance sheet reconciliation project relating principally to the Company's natural gas marketing business,
- . corrections to the Company's previous hedge accounting for certain contracts resulting in the Company accounting for these contracts pursuant to the mark-to-market method under Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended ("Statement No. 133"); in addition, the Company determined that it had incorrectly accounted for certain derivative transactions prior to the adoption of Statement No. 133,
- . the valuation used in the Company's 2000 acquisition of Extant, Inc.,
- . the restatement of the Company's forward power curve methodology to reflect forward power and market prices more closely,
- . the recognition of additional assets, accrued liabilities and debt associated with certain lease arrangements, as well as impairment, depreciation and amortization expense for the related assets,
- . a correction to the measurement date relating to the implied dividend the Company previously recorded related to the in-the-money beneficial conversion option in the \$1.5 billion in Series B preferred stock issued to ChevronTexaco Corporation in November 2001,
- . the recognition of an other-than-temporary decline in value of a technology investment in the third quarter of 2001 rather than the second quarter of 2002,
- . corrections to the Company's previous accounting for income taxes, and
- . other adjustments that arose during the re-audit of the Company's 1999-2001 financial statements.

Specifically, the restatements are as follows:

Project Alpha. Dynegy entered into the Project Alpha structured natural gas transaction in April 2001. As described in a Current Report on Form 8-K dated April 25, 2002 (the "Alpha Form 8-K"), Dynegy restated the cash flow associated with the related gas supply contract as a financing activity in its consolidated statements of cash flows for 2001. The effect of this restatement was to reclassify approximately \$290 million of previously disclosed 2001 operating cash flow to financing cash flow. The effect of this restatement had no impact on the previously disclosed operating cash flow for the three-month period ended March 31, 2001. Following the disclosure in the Alpha Form 8-K and in connection with a further review of Project Alpha, Arthur Andersen LLP ("Andersen") informed the Company that it could no longer support its tax opinion relating to the transaction. Andersen's change in position was based in part on its conclusion that the reclassification of cash flow from operations to cash flow from financing lessened the factual basis for the opinion. Dynegy's financial statement recognition of the tax benefit in 2001 was based principally on the Company's assessment of the

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

relevant issues, as corroborated by Andersen's tax opinion. After the withdrawal of Andersen's tax opinion, management concluded that sufficient support to include the income tax benefit for financial statement presentation purposes no longer existed, the effect of which was a reversal of approximately \$79 million of tax benefit previously recognized by the Company during the second, third and fourth quarters of 2001. This decision had no impact on the tax benefit previously reported for the three-month period ended March 31, 2001. Andersen further advised the Company that its audit opinion relating to 2001 should no longer be relied upon as a result of the pending restatements relating to Project Alpha and such audit opinion has been withdrawn. Dynegy subsequently concluded that its restated consolidated financial statements would include the consolidation of ABG Gas Supply, LLC ("ABG"), one of the entities formed in connection with the transaction. The consolidation of ABG, which had no effect on reported net income for the three-month period ended March 31, 2001, is included herein based on compilations of financial information received from an agent of ABG's equity holders.

Balance Sheet Reconciliation Project. Dynegy originally recognized an after-tax charge of approximately \$80 million (\$124 million pre-tax) in the second quarter 2002 related to a balance sheet reconciliation project undertaken by the Company at the beginning of 2002. The charge related principally to the Company's natural gas marketing business and was associated with the process of reconciling accrued to actual results. Accrual accounting for natural gas marketing involves the estimation of gas volumes bought, sold, transported and stored, as well as the subsequent reconciliation from estimated to actual volumes. The Company has restated its financial statements to allocate this \$80 million charge from the second quarter 2002 back to the periods in which the transactions giving rise to the charge originally occurred.

The table below reflects the impact on net income and diluted earnings per share for the three months ended March 31, 2002 and 2001 related to this restatement.

	Three Months Ended March 31
	(in millions, except per share data)
Net Income (Loss)	
2001.....	\$ 22
2002.....	4
Diluted Earnings (Loss) per Share	
2001.....	\$0.07
2002.....	0.01

Corrected Hedge Accounting. The Company adopted Statement No. 133 effective January 1, 2001 and reflected certain contracts as cash flow hedges upon such adoption. Management has subsequently determined that following the initial adoption of Statement No. 133, the documentation of compliance requirements under the standard, particularly as it relates to documentation and the periodic assessment of hedge effectiveness, was inadequate to support the

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

accounting method previously applied. In addition, the Company determined that it had incorrectly accounted for certain derivative transactions prior to the adoption of Statement No. 133. The resulting restatement reflects the accounting for these contracts on a mark-to-market basis rather than on the hedge accounting basis previously employed. The correction in the accounting method for these contracts decreased net income for the three-month period ended March 31, 2002 by \$27 million (\$0.07 per diluted share) and increased net income for the three-month period ended March 31, 2001 by \$15 million (\$0.04 per diluted share). This correction had no impact on previously reported cash flows from operations in any period.

7

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

Valuation of Extant, Inc. Purchase. On September 29, 2000, Dynegy completed the acquisition of Extant, Inc., a privately held entity engaged in the communications business. The transaction was accounted for as a purchase. In 2000, the Company incorrectly valued the shares of Class A common stock it issued as consideration for the acquisition at \$49.59 per share, rather than \$36.59 per share, which amount represented the average share price during the five days surrounding the announcement of the acquisition. The \$49.59 per share originally utilized in the valuation was incorrectly based on the average closing price of Dynegy's Class A common stock during the 30 days prior to the closing date, which was consistent with the valuation provisions in the merger agreement. As a result, the purchase price allocated to the assets acquired and liabilities assumed in the purchase was overstated by \$23 million in 2000. This error resulted in an overstatement of the amortization of goodwill acquired in the transaction during 2001 and 2000. The resulting restatement reflects an increase in net income in the three-month period ended March 31, 2001 of approximately \$300,000 (\$0.00 per diluted share). Additionally, as a result of this error, the Company overstated by \$22 million (\$0.06 per diluted share) the impairment of goodwill recorded in 2002 associated with the Company's January 1, 2002 adoption of Statement of Financial Accounting Standard No. 142, "Goodwill and Other Intangible Assets" ("Statement No. 142").

Restated Forward Power Curve Methodology. The Company values substantially all of its natural gas marketing, power marketing and portions of its natural gas liquids marketing operations under a mark-to-market accounting methodology. The estimated fair value of the marketing and trading portfolio is computed by multiplying all existing positions in the portfolio by estimated prices, reduced by a LIBOR-based time value of money adjustment and deduction of reserves for credit, price and market liquidity risks. Dynegy uses a combination of market quotes, derivatives of market quotes and proprietary models to periodically value this portfolio as required by generally accepted accounting principles ("GAAP"). Market quotes are used for near-term transactions, where such quotes are generally available; derivatives of market quotes are used for mid-term transactions, where broker quotes are only marginally available; and proprietary models are used for long-term transactions, where broker quotes or other objective pricing indicators typically are not available. Beginning in the third quarter 2001, the Company began to enter into longer-term power transactions in the United States with respect to which no broker quotes or other market data was available;

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

consequently, the Company applied a proprietary model to estimate forward prices and, in turn, the fair market value of these longer-term power transactions.

During January 2003, in connection with the re-audit of the Company's 1999-2001 financial statements and an assessment of various accounting policies, the Company reconsidered the model-based methodology used to value the portions of its power marketing and trading portfolio for which broker quotes were not available. Under the Company's prior methodology, forward curves used to calculate the value of its long-term U.S. power contracts were derived from a proprietary model based on a required rate of return on investments in new generation facilities. The primary disadvantage of this type of methodology, which had been confirmed by the Company's former independent auditors prior to the withdrawal of their audit opinion for unrelated matters, is that, in certain circumstances, it may not reflect true market prices in future years. After reconsidering the appropriateness of this methodology in light of changing industry circumstances and in connection with the re-audit, in late January 2003 the Company determined that, beginning with the third quarter 2001, a different forward power curve methodology would more appropriately reflect the value of its long-term power contracts.

Upon making this determination, the Company corrected the forward power curve methodology it used to estimate the fair market value of its U.S. power marketing and trading portfolio. This corrected methodology incorporates forward energy prices derived from broker quotes and values from executed transactions to estimate forward price curves for periods where broker quotes and transaction data cannot be obtained. Further, the

8

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

Company determined that in order to adequately reflect its results, it was appropriate to restate its prior period financial statements, beginning with the third quarter 2001, to reflect the corrected methodology.

The change decreased reported net income for the three-month period ended March 31, 2002 by \$74 million (\$0.20 per diluted share). There was no change to reported net income for the three-month period ended March 31, 2001.

Restated Lease Accounting. The Company previously accounted for seven generation lease arrangements and one communications lease arrangement as operating leases. Its previous accounting treatment of these lease arrangements, which was confirmed by the Company's former independent auditors prior to the withdrawal of their audit opinion for unrelated matters, reflected its belief that these arrangements satisfied the applicable GAAP requirements so as to justify their treatment as operating leases. However, these requirements are very technical and subject to a high degree of interpretation. During the course of the re-audit of the Company's financial statements for 1999-2001, the Company analyzed its accounting for these arrangements and considered a variety of factors, including interpretations of the applicable GAAP requirements. Upon completion of this analysis and discussions with PricewaterhouseCoopers LLP, in January 2003, the Company determined it necessary to correct its accounting for these lease arrangements to recognize

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

on its balance sheet the related assets as of the inception of six of these arrangements. Although the Company previously amended the agreements relating to six generation lease arrangements so as to require them to be treated as capital leases in the second quarter 2002, the restatement of the accounting originally applied to these arrangements results in the recognition of the related assets as of an earlier date. Consequently, the Company's previously reported net income has been reduced, reflecting the recognition of impairment, depreciation and amortization expenses associated with the related assets. In addition, balance sheet amounts have been adjusted for this change as follows:

	March 31, 2002	December 31, 2001

	(\$ in millions)	
Restricted cash.....	\$ 10	\$ 17
Property, plant and equipment	1,167	1,094
Accrued liabilities and other	626	445
Long-term debt.....	700	666

Please read Note 7--Debt in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2001, as most recently amended by Amendment No. 2 thereto filed with the SEC on April 11, 2003 (the "2001 Form 10-K/A"), for further discussion.

The change decreased reported net income by \$14 million (\$0.04 per diluted share) for the three-month period ended March 31, 2002. There was no change to reported net income for the three-month period ended March 31, 2001.

Change in Implied Preferred Dividends. In November 2001, the Company issued \$1.5 billion in Series B preferred stock to ChevronTexaco. This preferred stock is convertible by ChevronTexaco into shares of Dynegey's Class B common stock at a conversion price of \$31.64. This conversion price represents an approximate 5% discount to the Company's stock price on November 7, 2001, the date the conversion price was negotiated. Based on the implied value of this beneficial conversion option as of November 7, Dynegey recognized a \$65 million preferred stock dividend to be amortized over the two-year period leading up to the

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

mandatory redemption date for the shares. During the course of the re-audit of the Company's financial statements for 1999-2001 the Company analyzed its accounting for the beneficial conversion option and determined it necessary to correct the commitment date used for valuing this beneficial conversion option to November 13, 2001, the date ChevronTexaco funded and consummated its preferred stock purchase and the preferred securities were issued. The Company's stock price increased significantly between November 7 and November 13 after the announcement of the proposed Enron Corp. merger. As a result of the increase in the intrinsic value of ChevronTexaco's beneficial conversion

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

option, the restated preferred stock dividend amount is calculated based on a two-year amortization of the beneficial conversion option's implied value of approximately \$660 million--an increase of approximately \$595 million over the \$65 million originally reported.

Net income available to common stockholders as originally reported for the three-month period ended March 31, 2002 is accordingly reduced by approximately \$75 million (\$0.20 per diluted share) as a result of this commitment date change. There was no impact on net income available to common shareholders for the three-month period ended March 31, 2001.

Valuation of Technology Investment. The Company acquired the common stock of a technology investment in the second quarter 2000. In the second quarter 2002, after several quarters of declines in the market price of the investment, the Company determined that the decline in value was other-than-temporary. As such, the Company recognized a \$12 million after-tax charge during the second quarter 2002. Upon further review, the Company determined it incorrectly delayed recognition of the charge associated with this investment, as the decline in value through September 30, 2001 met the "other-than-temporary" threshold. Therefore, the Company has restated the financial statements to record the impairment in the third quarter 2001. This restatement had no impact on reported net income or diluted earnings per share for the three-month periods ended March 31, 2002 or 2001.

Correction for Income Taxes. During the course of the re-audit of its 1999-2001 financial statements, the Company reviewed its previous accounting for income taxes and determined that it made errors in accounting for certain tax matters. These errors related to book-tax basis differences that were reflected as permanent differences as opposed to temporary differences, the failure to record differences between the amounts recognized as income tax provision and the amounts actually reflected in the applicable income tax returns, adjustments related to book and tax-basis balance sheet reconciliations and changes in estimates of tax contingencies. The Company has restated its financial statements to correct these errors, resulting in additional deferred tax expense. The restatement decreased reported net income for the three-month period ended March 31, 2002 by \$3 million (\$0.01 per diluted share) and for the three-month period ended March 31, 2001 by \$5 million (\$0.01 per diluted share).

Other Adjustments Arising During the Re-Audit. PricewaterhouseCoopers LLP re-audited Dynegy's 1999-2001 financial statements. The re-audit was completed in April 2003. The Company has restated its 1999-2001 financial statements to correct various errors that were identified during the course of the re-audit, which restatements are reflected in the 2001 Form 10-K/A and the 2002 Form 10-K. The corrections principally relate to the timing on which various transactions were recorded in the ordinary course of business. The corrections resulted in reductions to previously reported net income for the three months ended March 31, 2002 and 2001 of approximately \$15 million (\$0.04 per diluted share) and \$16 million (\$0.05 per diluted share), respectively.

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

PLEASE NOTE THAT THESE FINANCIAL STATEMENTS AND THE NOTES THERETO DO NOT REFLECT EVENTS OCCURRING AFTER MAY 15, 2002 (THE DATE ON WHICH DYNEGY ORIGINALLY FILED ITS FIRST QUARTER 2002 FORM 10-Q). FOR A DESCRIPTION OF THESE EVENTS, PLEASE READ THE COMPANY'S EXCHANGE ACT REPORTS FILED SINCE MAY 15, 2002, INCLUDING ITS ANNUAL REPORT ON FORM 10-K FOR THE FISCAL YEAR ENDED DECEMBER 31, 2002. SEE NOTE 12--SUBSEQUENT EVENTS FOR FURTHER DISCUSSION.

NOTE 1--ACCOUNTING POLICIES

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with the instructions to interim financial reporting as prescribed by the Securities and Exchange Commission ("SEC"). These interim financial statements and notes thereto should be read in conjunction with the restated consolidated financial statements and notes thereto included in the 2001 Form 10-K/A, which includes restated financial statements for 1999-2001 reflecting the revisions described in the Explanatory Note above.

The financial statements include all material adjustments, which, in the opinion of management, are necessary for a fair presentation of the results for the interim periods. Interim period results are not necessarily indicative of the results for the full year. The preparation of the condensed consolidated financial statements in conformity with generally accepted accounting principles requires management to develop estimates and make assumptions that affect reported financial position and results of operations and that impact the nature and extent of disclosure, if any, of contingent assets and liabilities. Actual results could differ materially from those estimates. Certain reclassifications have been made to prior period amounts in order to conform to current year presentation.

NOTE 2--CHANGES IN ACCOUNTING PRINCIPLES

On July 20, 2001, the Financial Accounting Standards Board ("FASB") issued Statement No. 142. Statement No. 142 discontinues goodwill amortization over its estimated useful life; rather, goodwill is subject to at least an annual fair-value based impairment test. The Company adopted Statement No. 142 effective January 1, 2002. The changes in the carrying amount of goodwill for each of Dynegy's reportable business segments for the three-month period ended March 31, 2002 are as follows:

	Wholesale Energy Network	Dynegy Midstream Services	Transmission & Distribution	Dynegy Global Communications	Total
Balances as of January 1, 2002.....	\$930	\$16	\$ 381	\$ 234	\$1,561
Cumulative effect of change in accounting principle.....	--	--	--	(234)	(234)
Goodwill acquired during the period.....	--	--	887	--	887
Balances as of March 31, 2002.....	\$930	\$16	\$1,268	\$ --	\$2,214

The Company has recognized a cumulative effect of change in accounting principle of \$234 million related to its Dynegy Global Communications segment in accordance with Statement No. 142. The fair value of that reporting segment was estimated using the expected present value of future cash flows to determine impairment. The value was negatively impacted by continued weakness

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

in the telecommunications and broadband markets.

14

DYNEGY INC.

	=====	=====

In August 2001, the FASB issued Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("Statement No. 144"). Statement No. 144 addresses the accounting and reporting for the impairment or disposal of long-lived assets and supersedes FASB Statement No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of" and APB Opinion No. 30, "Reporting the

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

Results of Operations--Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions." The Company's adoption of Statement No. 144 on January 1, 2002 did not have any impact on its financial position, results of operations or cash flows.

Accounting Principles Not Yet Adopted. Also during 2001, the FASB issued Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" ("Statement No. 143"). Statement No. 143 requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred with the associated asset retirement costs being capitalized as a part of the carrying amount of the long-lived asset. The Company is evaluating the future financial effects of adopting Statement No. 143 and will adopt the standard effective January 1, 2003.

15

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

On April 30, 2002, the FASB issued Statement of Financial Accounting Standards No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections" ("Statement No. 145"). Statement No. 145 rescinds Statement of Financial Accounting Standards No. 4, "Reporting Gains and Losses from Extinguishment of Debt" ("Statement No. 4"), the amendment to Statement No. 4, and Statement of Financial Accounting Standards No. 64, "Extinguishments of Debt Made to Satisfy Sinking-Fund Requirements" ("Statement No. 64"). Through this rescission, Statement No. 145 eliminates the requirement (in both Statement No. 4 and Statement No. 64) that gains and losses from the extinguishment of debt be aggregated and, if material, classified as an extraordinary item, net of the related income tax effect.

Further, Statement No. 145 amends paragraph 14(a) of Statement of Financial Accounting No. 13, "Accounting for Leases", to eliminate an inconsistency between the accounting for sale-leaseback transactions and certain lease modifications that have economic effects that are similar to sale-leaseback transactions. Statement No. 145 also makes several other technical corrections to existing pronouncements that may change accounting practice. Statement No. 145 is effective for transactions occurring after May 15, 2002, and the Company is evaluating the future financial effects, if any, of adopting Statement No. 145.

NOTE 3--BUSINESS COMBINATIONS AND OTHER ACQUISITIONS

In November 2001, Dynegy acquired 1,000 shares of Series A Preferred Stock ("Series A Preferred Stock") in Northern Natural for \$1.5 billion. The Series A Preferred Stock is entitled to cumulative dividends, as and if declared by the board of directors of Northern Natural, at a rate of 6%, payable annually beginning on January 31, 2003. Dividends of approximately \$8 million are reflected in "Other Income (Expense), net" on the Condensed Consolidated Statement of Operations for the quarter ended March 31, 2002 for dividends earned by Dynegy prior to the closing of the Northern Natural acquisition on January 31, 2002. The Series A Preferred Stock is redeemable at the option of

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

Northern Natural under specified circumstances at a redemption price equal to the liquidation preference plus accrued and unpaid dividends and other items. In connection with the investment, Dynegy Holdings Inc. ("DHI"), a wholly owned subsidiary of Dynegy, acquired an option to purchase all of the equity of Northern Natural's indirect parent company. DHI exercised its option to acquire the indirect parent of Northern Natural in November 2001 upon termination of the merger agreement with Enron. The exercise price for the option was \$23 million subject to adjustment based on Northern Natural's indebtedness and for the amount of working capital at closing. Subsequent litigation relating to the option was settled in part by the parties on January 3, 2002, and the closing of the option exercise occurred on January 31, 2002. Enron still maintains a damage action that DHI's exercise of the option was wrongful. (See Note 9 below.)

At January 31, 2002, Northern Natural had approximately \$950 million of debt outstanding. Approximately \$500 million of this debt consisted of senior unsecured notes with maturities ranging from 2005 to 2011. The remaining \$450 million consisted of a secured line of credit due November 2002. In order to obtain a bondholder consent required in connection with the Northern Natural acquisition, DHI agreed to effect a tender offer for one series of \$100 million of Northern Natural's senior unsecured notes. On April 26, 2002, DHI purchased \$90 million of the notes due 2005 pursuant to such tender offer. An Enron subsidiary has the option through June 30, 2002 to repurchase the Series A Preferred Stock and equity in Northern Natural's parent by repayment of the purchase price, subject to adjustments for working capital and indebtedness.

NOTE 4--COMMERCIAL OPERATIONS, RISK MANAGEMENT ACTIVITIES AND FINANCIAL INSTRUMENTS

Provisions in Statement No. 133, as amended, affect the accounting and disclosure of certain contractual arrangements and operations of the Company. Under Statement No. 133, as amended, all derivative instruments are recognized in the balance sheet at their fair values and changes in fair value are recognized immediately in earnings, unless the derivatives which are not a part of the Company's marketing activities qualify and are designated as hedges of future cash flows, fair values, or net investments or qualify and are designated, as normal purchases and sales. Derivatives treated as normal purchases or sales are recorded and recognized in income using accrual accounting.

The nature of the Company's business necessarily involves certain market and financial risks. The Company routinely enters into financial instrument contracts in an attempt to mitigate or eliminate these various risks. These risks and the Company's strategy for mitigating these risks are more fully described in Note 3 to the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2001 (the "2001 Form 10-K").

The Company recorded the impact of the adoption of Statement No. 133, as amended, as a cumulative effect adjustment in the Company's consolidated results on January 1, 2001. The amounts recorded, which are immaterial to net income and the Company's financial position, are as follows (in millions):

	Net Income	Other Comprehensive Income
	-----	-----
Adjustment to fair value of derivatives	\$ 3	\$105
Income tax effects.....	(1)	(44)
	---	---

Other comprehensive income.....	(1)	43
	-----	-----
Total comprehensive income (loss).	\$ (248)	\$198
	=====	=====

Additional disclosures required by Statement No. 133, as amended, are provided in the following paragraphs.

The Company enters into various financial derivative instruments which qualify as cash flow hedges. For derivatives treated as hedges of future cash flows, the effective portion of changes in fair value is recorded in other comprehensive income until the related hedged items impact earnings. Any ineffective portion of a hedge is reported in earnings immediately. Instruments related to the Company's energy convergence and midstream liquids businesses are entered into for purposes of hedging forward fuel requirements for certain power generation facilities, locking in future margin in the domestic midstream liquids business and hedging price risk in the global liquids business. Interest rate swaps are used to convert the floating interest-rate component of certain obligations to fixed rates.

The Company determined that its documentation and assessment of hedge effectiveness related to certain contracts entered into to hedge fuel requirements and power sales commitments was incomplete. As a result, the accounting for these contracts has been restated herein. Otherwise, during the three months ended March 31, 2002 and 2001, there was no material ineffectiveness from changes in fair value of hedge positions, and no amounts were excluded from the assessment of hedge effectiveness related to the hedge of future cash flows. Additionally, no amounts were reclassified to earnings in connection with forecasted transactions that were no longer considered probable of occurring.

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

The balance in other comprehensive income at March 31, 2002 is expected to be reclassified to future earnings, contemporaneously with the related purchases of fuel, sales of electricity or liquids, payments of interest and recognition of operating lease expense, as applicable to each type of hedge. Of this amount, approximately \$2 million in losses, net of taxes, is estimated to be reclassified into earnings over the 12-month period ending March 31, 2003. Actual amounts ultimately reclassified to earnings over the next 12 months could vary materially from this estimated amount as a result of changes in market conditions.

The Company also enters into derivative instruments which qualify as fair-value hedges. For derivatives treated as fair value hedges, changes in the fair value of the derivative and changes in the fair value of the related asset or liability are recorded in current period earnings. The Company uses interest rate-swaps to convert a portion of its non-prepayable fixed-rate debt into variable-rate debt. During the three months ended March 31, 2002 and 2001, there was no ineffectiveness from changes in fair value of hedge positions, and no amounts were excluded from the assessment of hedge effectiveness. Additionally, no amounts were recognized in relation to firm commitments that no longer qualified as fair-value hedge items.

The Company has investments in foreign subsidiaries, and the net assets of these subsidiaries are exposed to currency exchange-rate volatility. The Company uses derivative financial instruments, including foreign exchange forward contracts and cross currency interest rate swaps, to hedge this exposure. For derivatives treated as hedges of net investment in foreign operations, the effective portion of changes in the fair value of the derivative is recorded in the cumulative translation adjustment. For the three months ended March 31, 2002, approximately \$15 million of net gains related to these contracts were included in the cumulative translation adjustment. There was no net impact on the cumulative translation adjustment in the first quarter 2001.

NOTE 5--DEBT

DHI closed a \$900 million unsecured revolving credit agreement with a syndicate of commercial banks on April 29, 2002. This facility, which matures on April 28, 2003, replaced an expiring \$1.2 billion revolving credit agreement. The new facility provides funding for working capital, capital expenditures and general corporate purposes. Generally, borrowings under the credit agreement bear interest at a Eurodollar rate plus a margin that is determined based on designated unsecured debt ratings. The increase in this margin over the margins under the expired facility is expected to result in an increase in the fees paid by DHI compared to the fees paid under the expiring facility. Specifically, DHI expects to pay approximately \$1.4 million in additional borrowing fees during the term of the new facility and paid approximately \$3.2 million in additional upfront fees in connection with the closing of the new facility. Financial covenants include a debt-to-capitalization test (which takes into account certain lease and similar commitments of DHI and its subsidiaries) and a newly added 3.5 times earnings before interest, taxes and depreciation and amortization ("EBITDA")-to-interest

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

test. The permissible threshold for the debt-to-capitalization test was lowered in the new facility from 65% to 60%. Other newly added covenants in the new facility include subordination of certain intercompany debt owed to Dynegy and its subsidiaries (other than DHI and its subsidiaries), restrictions on liens and limitations prohibiting subsidiary debt at Dynegy Marketing & Trade, Dynegy Power Marketing, Inc. and Dynegy Midstream Services, Limited Partnership. Default provisions include cross payment default of Dynegy, DHI or any principal subsidiary with respect to debt or other similar obligations that exceed \$100 million, cross acceleration of Dynegy, DHI or any principal subsidiary under any instrument covering debt or similar obligations that exceed \$100 million and bankruptcy or receivership of Dynegy, DHI or any principal subsidiary. The new facility does not contain any defaults relating to material adverse changes in the condition of Dynegy or DHI after the closing date or to changes in Dynegy's or DHI's credit ratings. The new facility also does not contain a "term-out" provision that

19

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

would permit Dynegy to extend the maturity for borrowings under the facility beyond the facility's April 28, 2003 maturity date.

On February 21, 2002, DHI issued \$500 million of 8.75% senior notes due 2012. DHI will pay interest on the notes on February 15 and August 15 of each year, beginning August 15, 2002. The notes are unsecured and unsubordinated debt securities and are not subject to a sinking fund. DHI may redeem the notes prior to maturity, in whole or in part, at a redemption price equal to the greater of the principal amount of the notes and the make-whole price specified in the indenture relating to the notes.

The Company acquired debt with a face value of approximately \$950 million (and a fair value of approximately \$890 million) through the acquisition of Northern Natural. Approximately \$500 million of the Northern Natural debt consisted of senior unsecured notes with maturities ranging from 2005 to 2011. The remaining \$450 million consisted of a secured line of credit due November 2002. On April 26, 2002, DHI purchased \$90 million of Northern Natural's senior unsecured notes due 2005 pursuant to a tender offer. (See Note 3 above.)

During the three-month period ended March 31, 2002, the Company repaid commercial paper and revolving credit facilities for DHI and Illinois Power Company ("IP"), a wholly owned subsidiary of Dynegy, of approximately \$293 million.

On April 10, 2001, ABG Gas Supply entered into a credit agreement with a consortium of lenders in order to provide financing associated with Project Alpha. Advances under the agreement allowed ABG Gas Supply to purchase NYMEX natural gas contracts with the underlying physical gas supply to be sold to Dynegy Marketing and Trade under an existing natural gas purchases and sales agreement. The credit agreement requires ABG Gas Supply to repay the advances in monthly installments commencing February 2002 through December 2004 from funds received from Dynegy Marketing and Trade under the natural gas purchases and sales agreement. The advances bear interest at a Eurodollar rate plus a margin as defined in the agreement. Advances of \$307 million were outstanding

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

under this agreement at March 31, 2002.

NOTE 6--EARNINGS PER SHARE

Basic earnings (loss) per share represents the amount of earnings (loss) for the period available to each share of common stock outstanding during the period. Diluted earnings (loss) per share represents the amount of earnings (loss) for the period available to each share of common stock outstanding during the period plus each share that would have been outstanding assuming the issuance of common shares for all dilutive potential common shares outstanding during the period. Outstanding options contribute to the differences between basic and diluted shares outstanding in all periods. The diluted shares in the 2002 period do not include the effect of the assumed conversion of the Series B Mandatorily Convertible Redeemable Preferred Securities held by ChevronTexaco as it would be anti-dilutive.

When an entity has a net loss from continuing operations, Statement of Financial Accounting Standards No. 128, "Earnings per Share," prohibits the inclusion of dilutive potential common shares in the computation of diluted per-share amounts. Accordingly, the Company has utilized the basic shares outstanding amount to calculate both basic and diluted loss per share for the quarter ended March 31, 2002.

20

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

NOTE 7--CAPITAL STOCK

Chevron U.S.A. Inc., a ChevronTexaco subsidiary, purchased approximately 10.4 million shares of Class B common stock in the three-month period ended March 31, 2002 pursuant to its preemptive right under its shareholder agreement with Dynegey. Proceeds from this sale totaled approximately \$205 million and were invested in cash to enhance short-term liquidity.

NOTE 8--INVESTMENTS IN UNCONSOLIDATED AFFILIATES

Investments in affiliates that are not controlled by the Company but where the Company has significant influence over operations are accounted for by the equity method. The Company's share of net income from these affiliates is reflected in the Condensed Consolidated Statements of Operations as Earnings (Loss) from Unconsolidated Investments. The Company's principal equity method investments consist of entities that operate generation assets and natural gas liquids assets. These equity investments totaled \$844 million and \$830 million at March 31, 2002 and December 31, 2001, respectively. The Company entered into these ventures principally for the purpose of sharing risk and leveraging existing commercial relationships. These ventures maintain independent capital structures and have financed their operations on a non-recourse basis to the Company. The Company holds investments in three joint ventures in which Chevron U.S.A. or its affiliates are investors. For additional information about these investments, please read Note 16 to the 2001 Form 10-K.

Generation Assets. Investments primarily include ownership interests in

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

eight joint ventures that own fossil fuel electric generation facilities in diverse geographic regions. The Company's ownership is generally 50 percent in the majority of these ventures. The Company's aggregate net investment of \$698 million at March 31, 2002 represents approximately 2,400 MW of net generating capacity. Dynegy's most significant investment in generating capacity is its interest in West Coast Power, LLC ("West Coast Power"), a 50 percent owned venture with NRG Energy Inc. ("NRG") representing approximately 1,400 MW of net generating capacity in California. The net investment in West Coast Power totaled approximately \$325 million at March 31, 2002. West Coast Power provided equity earnings of approximately \$15 million and \$12 million in the quarterly periods ending March 31, 2002 and 2001, respectively.

Midstream Investments. Investments primarily include ownership interests in three ventures that operate natural gas liquids ("NGL") processing, extraction, fractionation and storage facilities in the Gulf Coast region as well as an interstate NGL pipeline. The Company's ownership interest in these ventures ranges from 23 percent to 39 percent. At March 31, 2002, the Company's aggregate net investment in these midstream businesses totaled approximately \$146 million.

Summarized aggregate financial information for these investments and Dynegy's equity share thereof was (in millions):

	Three Months Ended March 31,			
	2002		2001	
	Total	Equity Share	Total	Equity Share
Revenues.....	\$826	\$289	\$1,481	\$568
Operating margin	\$230	\$ 68	\$ 176	\$ 65
Net income.....	\$114	\$ 34	\$ 91	\$ 32

DYNEGY INC.

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

Other Investments. In addition to these equity investments, the Company holds interests in companies for which it does not have significant influence over the operations. These investments are accounted for by the cost method. Such investments totaled \$63 million and \$91 million at March 31, 2002 and December 31, 2001, respectively. The change is primarily attributed to the impairment of an investment in the Dynegy Global Communications segment resulting from unfavorable market conditions.

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

The Company also owns securities that have a readily determinable fair market value and are considered available-for-sale. The market value of these investments at March 31, 2002 and December 31, 2001 was estimated to be \$13 million and \$23 million, respectively. The change is primarily attributed to the impairment of an available-for-sale investment in the Dynegy Global Communications segment resulting from unfavorable market conditions.

NOTE 9--COMMITMENTS AND CONTINGENCIES

PLEASE NOTE THAT THE INFORMATION CONTAINED IN THIS NOTE 9, WHICH WAS PRESENTED IN THE COMPANY'S FIRST QUARTER 2002 FORM 10-Q ORIGINALLY FILED WITH THE SEC ON MAY 15, 2002 IN ORDER TO REFLECT MATERIAL CHANGES IN OR UPDATES TO THE COMPANY'S MATERIAL LEGAL PROCEEDINGS SINCE THE ORIGINAL FILING OF ITS 2001 FORM 10-K, DOES NOT REFLECT EVENTS OCCURRING AFTER MAY 15, 2002. FOR A DESCRIPTION OF THESE EVENTS, INCLUDING MATERIAL CHANGES IN, OR UPDATES TO, THE COMPANY'S MATERIAL LEGAL PROCEEDINGS, PLEASE READ ITS EXCHANGE ACT REPORTS FILED SINCE MAY 15, 2002, INCLUDING ITS ANNUAL REPORT ON FORM 10-K FOR THE FISCAL YEAR ENDED DECEMBER 31, 2002. SEE NOTE 12--SUBSEQUENT EVENTS FOR FURTHER DISCUSSION.

Please see Note 11, "Commitments and Contingencies," to the 2001 Form 10-K for a description of the Company's material legal proceedings. Set forth below is a description of any material developments that have occurred with respect to such proceedings since the Company's original filing of the 2001 Form 10-K and a description of any new matters that have arisen during the quarter.

We record reserves for estimated losses from contingencies when information available indicates that a loss is probable and the amount of the loss is reasonably estimable in accordance with SFAS No. 5 "Accounting for Contingencies." For environmental matters, we record liabilities when environmental assessment indicates that remedial efforts are probable and the costs can be reasonably estimated. Please read Note 2--Accounting Policies of the 2001 Form 10-K for further discussion.

With respect to several of the items listed below, Dynegy has determined that a loss is not probable or that any such loss, to the extent probable, is not reasonably estimable. Notwithstanding the foregoing, Dynegy's management has assessed the matters described below based on currently available information and made an informed judgment concerning the potential outcome of such matters, giving due consideration to the nature of the claim, the amount and nature of damages sought and the possibility of success. Management's judgment may, as a result of facts arising prior to resolution of these matters or other factors, prove inaccurate and investors should be aware that such judgment is made subject to the known uncertainty of litigation.

For the Interim Periods Ended March 31, 2002 and 2001

Baldwin Station Litigation. As previously described in the 2001 Form 10-K, IP and Dynegy Midwest Generation, Inc. (collectively, the Defendants) are the subject of a Notice of Violation ("NOV") from the Environmental Protection Agency (the "EPA") and a complaint filed by the EPA and the Department of

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

Justice alleging violations of the Clean Air Act (the "Act") and, the regulations promulgated under the Act. Similar notices and complaints have been filed against a number of other utilities. Both the NOV and the complaint allege that certain equipment repairs, replacements and maintenance activities at the Defendants' three Baldwin Station generating units constituted "major modifications" under the Prevention of Significant Deterioration and/or the New Source Performance Standards regulations. When activities that meet the definition of "major modifications" occur and they are not otherwise exempt, the Act and related regulations generally require that generating facilities meet more stringent emissions standards, which may entail the installation of potentially costly pollution control equipment. The Defendants filed an answer denying all claims and asserting various specific defenses and a trial date of February 11, 2003 has been set.

None of the Defendants' other facilities are covered in the complaint and NOV, but the EPA has officially requested information concerning activities at the Defendants' Vermilion, Wood River, and Hennepin Plants as well as Dynegy Northeast Generation's Danskammer Plant. It is possible that the EPA will eventually commence enforcement actions based on activities at those plants as well. The EPA has also recently requested information concerning activities at Dynegy Northeast Generation's Roseton Plant. The EPA has the authority to seek penalties for the alleged violations in question at the rate of up to \$27,500 per day for each violation. The EPA may also seek to require installation of the "best available control technology" (or the equivalent) at the Baldwin Station, and possibly at the Vermillion, Wood River, Hennepin, Danskammer, and Roseton Plants if the EPA initiates and successfully prosecutes enforcement actions against those plants.

California Market Litigation. As previously described in the 2001 Form 10-K, six class action lawsuits have been filed against various Dynegy entities based on the events occurring in the California power market. The complaints allege violations of California's Business and Professions Code, Unfair Trade Practices Act and various other statutes. The plaintiffs allege that the defendants, including the owners of in-state generation and various power marketers, conspired to manipulate the California wholesale power market to the detriment of California consumers. Included among the acts forming the basis of the plaintiffs' claims are the alleged improper sharing of generation outage data, improper withholding of generation capacity and the manipulation of power market bid practices. The plaintiffs seek unspecified treble damages.

All six lawsuits were consolidated before Judge Sammartino, Superior Court Judge for the County of San Diego. Judge Sammartino recently entered a pretrial conference order that establishes a trial date of March 1, 2004. In addition, on April 17, 2002, Dynegy and the other defendants in these actions filed challenges to the master plaintiffs' complaint moving to, among other things, have the actions dismissed in their entirety on grounds of federal preemption and to stay the proceedings in deference to the FERC's primary jurisdiction over wholesale electricity transactions. Briefing on these motions is scheduled to be completed on June 7, 2002 and the defendants' pleading challenges should be heard and decided by Judge Sammartino thereafter.

On March 11, 2002, the California Attorney General filed, on behalf of the People of the State of California, complaints in San Francisco Superior Court against several energy generators, including subsidiaries of West Coast Power and indirectly by Dynegy. The complaints allege that since June 1998, these generators sold power in the open market that should have been held in emergency reserve for the State. In the aggregate, the complaints seek more than \$150 million in penalties, restitution and return of profits from the generators.

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

On April 23, 2002, T&E Pastorino and Pastorino & Son Nursery filed a class action complaint in the Superior Court of the State of California for the County of San Mateo. Named as defendants are various generators and marketers, including Dynegy and certain affiliates. The complaint alleges unfair, unlawful and deceptive practices in violation of the California Unfair Business Practices Act and seeks to enjoin illegal conduct, restitution and unspecified damages. While some of the allegations in this lawsuit are similar to the allegations in the other six lawsuits, this lawsuit includes additional allegations based on events occurring subsequent to the filing of the other six lawsuits. These additional allegations include allegations similar to those made by the California Attorney General in the March 11, 2002 suit described above as well as allegations that contracts between these generators and the California Department of Water Resources (the "DWR") constitute unfair business practices resulting from market manipulation.

On May 13, 2002, two California law firms filed suit in California State Court against more than 20 energy generators, including those owned directly by West Coast Power and indirectly by Dynegy. Although Dynegy has not yet been served with this suit, the Company understands from press reports relating to the suit that it principally alleges the defendant generators, in connection with their execution of long-term power supply contracts with the DWR, took advantage of a manipulated market to overcharge for electricity. The suit, which was filed on behalf of California taxpayers, seeks to halt enforcement of the existing DWR contracts to the extent that the contracted prices are found to be unfair. The suit further seeks damages in the amount of the alleged excess prices under the contracts.

Dynegy believes that it has meritorious defenses to these claims and intends to defend vigorously against them. Dynegy is unable to estimate the range of possible loss that could be incurred with respect to these lawsuits. However, an adverse result in any of these proceedings could have a material adverse effect on its financial condition and results of operations.

As previously described in the 2001 Form 10-K, on February 13, 2002, the FERC initiated an investigation of possible manipulation of natural gas and power prices in the western United States during the period from January 2001 through the present. On May 8, 2002, in response to three memoranda discovered by the FERC allegedly containing evidence of market manipulation by Enron in California, the FERC issued data requests to all sellers in the California Independent System Operator (the "ISO") and the California Power Exchange (the "PX") markets during 2000 and 2001 seeking information with respect to whether those sellers engaged in trading strategies described in the three Enron memoranda. Responses to the data requests are due on May 22, 2002. The California State Senate has issued similar data requests.

Based on its investigation to date, Dynegy believes that its trading practices are consistent with applicable law and tariffs and will continue to cooperate fully with the FERC's investigation. However, the Company is continuing to assess these allegations and cannot predict with certainty how such allegations will ultimately be resolved.

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

In addition, as previously described in the 2001 Form 10-K, on February 25, 2002 the California Public Utilities Commission and the California Electricity Oversight Board filed complaints with the FERC asking that it void or reform power supply contracts between the DWR and, among others, West Coast Power. The complaints allege that prices under the contracts exceed just and reasonable prices permitted under the Federal Power Act. The FERC recently set these complaints for evidentiary hearing. The hearing, which will be deferred until completion of settlement talks currently scheduled to begin on May 16, 2002, will be limited to the question whether the California real-time market adversely affected the long-term bilateral markets to the extent that

24

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

modifications to the DWR power contracts are required. While the Company believes the terms of its contracts are just and reasonable and do not reflect alleged market manipulation, it cannot predict the outcome of this matter.

On March 20, 2002, the California Attorney General filed, on behalf of the People of the State of California, a complaint with the FERC against numerous power marketers and energy generators, including those owned directly by West Coast Power and indirectly by Dynegy. The complaint alleges that during 2000-2001, these marketers and generators failed to file with sufficient specificity the required quarterly reports under the Federal Power Act relating to sales to the ISO, the PX and the California Energy Resources Scheduling Division of the DWR, thereby making unlawful the market-based rates charged by these entities. The complaint seeks retroactive refunds to the extent such rates are found by the FERC to exceed just and reasonable levels. The Company believes it has meritorious defenses and will vigorously defend against these claims.

Enron Litigation. As previously described, Dynegy and DHI were sued on December 2, 2001 by Enron and Enron Transportation Services Co. in the United States Bankruptcy Court for the Southern District of New York, Adversary Proceeding No. 01-03626 (AJG). Enron claimed that Dynegy materially breached the Merger Agreement dated November 9, 2001 between Enron and Dynegy and related entities by wrongfully terminating that Agreement on November 28, 2001. Enron also claims that DHI wrongfully exercised its option to take ownership of Northern Natural under an Option Agreement dated November 9, 2001. Enron seeks damages in excess of \$10 billion and declaratory relief against Dynegy for breach of the Merger Agreement. Enron also seeks unspecified damages against Dynegy and DHI for breach of the Option Agreement. Dynegy filed an answer on February 4, 2002, denying all material allegations. On April 12, 2002, the Bankruptcy Court granted Dynegy's motion to transfer venue in the proceeding to the United States District Court for the Southern District of Texas (Houston Division). Discovery in this proceeding has not yet commenced.

In the 2001 Form 10-K, Dynegy also described a suit filed against Dynegy and DHI by Ann C. Pearl and Joel Getzler in the United States District Court for the Southern District of New York, Cause No. 01 CV 11652. Plaintiffs filed the lawsuit as a purported class action on behalf of all persons or entities that owned common stock of Enron Corp. as of November 28, 2001. A similar suit was filed by Bernard D. Shapiro and Peter Strub in the 129th Judicial District

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

Court for Harris County, Texas, Cause No. 2002-00080. Plaintiffs in each case allege that they are intended third party beneficiaries of the Merger Agreement dated November 9, 2001 among Enron and Dynegy and related entities. Plaintiffs claim that Dynegy materially breached the Merger Agreement by, inter alia, wrongfully terminating that agreement. Plaintiffs also claim that Dynegy breached the implied covenant of good faith and fair dealing. Plaintiffs seek unspecified damages and other relief.

Before any ruling on Dynegy's motion to transfer venue in the Pearl/Getzler case, and before any further proceedings in either of these actions, Enron moved before the Bankruptcy Court for any order staying all further prosecution of both the Pearl/Getzler case and the Shapiro/Strub case pursuant to the automatic stay provision contained in the Bankruptcy Code. On April 12, 2002, Enron's stay motion was granted. Thereafter, the Shapiro/Strub matter was withdrawn without prejudice, but the Pearl/Getzler plaintiffs filed an appeal from the Bankruptcy Court's stay order, which appeal is pending.

Dynegy believes that it has meritorious defenses against these claims and intends to vigorously defend against them. Dynegy is unable to estimate the range of possible loss that could be incurred with respect to these lawsuits. However, an adverse result in any of these proceedings could have a material adverse effect on its financial position and results of operations.

25

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

SEC Investigations. Dynegy has been advised by the Staff of the SEC that it intends to seek a formal order of investigation in connection with the previously announced inquiry into the facts and circumstances surrounding Project Alpha. Having commenced an investigation, the SEC can be expected to examine whether there are any additional transactions with similar financial statement effects as Project Alpha as well as any other transactions or business activities which receive media attention, including the CMS Energy trades described below. The Company has assured the Staff that it intends to cooperate fully with this investigation.

CMS Transactions. On November 15, 2001, Dynegy executed two sets of simultaneous buy and sale trades with CMS Energy Corp. In the first set of trades, Dynegy purchased 15 million megawatts of power from CMS Energy for delivery in December 2001 at \$25.50 per megawatt hour; concurrently, CMS Energy purchased from Dynegy the same amount of power at the same price per megawatt hour. In the second set of trades, Dynegy purchased 5 million megawatts of power per month from CMS Energy for delivery in January-December 2002 at \$34.00 per megawatt hour; concurrently, CMS Energy purchased from Dynegy the same amount of power at the same price per megawatt hour.

The information gathered to date indicates that the trades were consummated outside the view of other trading parties and, accordingly, could not have impacted market prices. In addition, the volumes, revenues and costs of sales associated with the trades were excluded from the Company's December 31, 2001 year-end operating statistics as reflected in the 2001 Form 10-K and are excluded from the operating statistics for the three months ended March 31,

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

2002. The Company had previously disclosed its first quarter 2002 results of operations in an earnings release dated April 30, 2002. In that release, 2002 first quarter revenues and 2002 first quarter costs of sales each contained \$236 million related to these trades. These amounts netted to zero in the operating margin line, resulting in no net income effect from the trades in that press release. For the purposes of reporting herein, the revenues and costs of sales for accrued portions of the CMS Energy trades have been excluded from the Company's December 31, 2001 and March 31, 2002 Revenues or Costs of Sales in the Consolidated Statements of Operations. The volumes related to these CMS Energy trades were excluded from the Operating Statistics for the WEN segment in the 2001 Forms 10-K and 10-K/A and the 2002 Forms 10-Q and 10-Q/A.

Based on the Company's preliminary investigation, although certain simultaneous buy and sell trades have been consummated, Dynegy believes that it has not performed any simultaneous buy and sell trades with counterparties for the purpose of artificially increasing its trading volumes or revenues. The Staff of the U.S. Commodity Futures Trading Commission ("CFTC") has requested that Dynegy voluntarily provide information to the Division of Enforcement of the CFTC relating to, among other things, trading activities on Dynegydirect, the Company's on-line trading platform, including all trades or trading activities between Dynegy and CMS Energy in November 2001. The Staff of the CFTC also has requested that Dynegy voluntarily provide information relating to the Company's trading activities in the California power market. The Company expects that Project Alpha, the CMS Energy trades and other previously consummated transactions may be reviewed by other governmental and regulatory agencies with competent jurisdiction. Dynegy intends to cooperate fully with any and all such reviews.

NOTE 10--REGULATORY ISSUES

The Company is subject to regulation by various federal, state, local and foreign agencies, including extensive rules and regulations governing transportation, transmission and sale of energy commodities as well as the discharge of materials into the environment or otherwise relating to environmental protection. Compliance

26

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

with these regulations requires general and administrative, capital and operating expenditures including those related to monitoring, pollution control equipment, emission fees and permitting at various operating facilities and remediation obligations. In addition, the U.S. Congress has before it a number of bills that could impact regulations or impose new regulations applicable to Dynegy and its subsidiaries. The Company cannot predict the outcome of these bills or other regulatory developments or the effects that they might have on its business. For a more detailed description of regulatory issues affecting the Company's business, please refer to "Item 1. Business--Regulation" in the 2001 Form 10-K.

NOTE 11--SEGMENT INFORMATION

Dynegy's operations are divided into four reportable segments: Wholesale

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

Energy Network (WEN), Dynegy Midstream Services (DMS), Transmission and Distribution (T&D) and Dynegy Global Communications (DGC). WEN is engaged in a broad array of businesses, including physical supply, of and risk-management activities around, wholesale natural gas, power, coal and other similar products. This segment is focused on optimizing the Company's and its customers' global portfolio of energy assets and contracts, as well as direct commercial and industrial sales and retail marketing alliances. DMS consists of the Company's North American midstream processing and marketing businesses and worldwide natural gas liquids marketing and transportation operations. Dynegy's T&D segment includes the operations of IP and Northern Natural. IP is an energy-delivery company engaged in the transmission, distribution and sale of electricity and natural gas to customers across a 15,000-square-mile area of Illinois. Northern Natural's 16,600 miles of pipeline extend from the Permian Basin in Texas to the Upper Midwest, providing extensive access to major utilities and industrial customers. Northern Natural's storage capacity is 59 billion cubic feet (Bcf) and its market area capacity is approximately 4.3 Bcf per day. DGC is engaged in the telecommunications business through its global long-haul fiber optic and metropolitan network located in key cities in the United States and Europe.

NOTE 12--SUBSEQUENT EVENTS

Credit Ratings. The credit ratings of Dynegy and its subsidiaries were placed under review for possible downgrade by Moody's, Standard & Poor's and Fitch on April 25, May 8 and April 26, 2002, respectively, due to uncertainties regarding the sustainability of cash flow, the Enron litigation (see Note 9), Dynegy's ability to access the capital markets, the cash flow treatment of Project Alpha (see Explanatory Note), allegations of market manipulation in California, the effect of these items on counterparty confidence and other matters. In addition, as a result of the Enron bankruptcy, the credit rating agencies have refocused their attention on the credit characteristics and credit protection measures of industry participants, and in some cases appear to have tightened the standards for a given rating level.

On March 14, 2002, Moody's affirmed Dynegy's and select subsidiaries' ratings with a qualification of negative outlook. Subsequently, on April 25, 2002, Moody's placed Dynegy and select subsidiaries under review for possible downgrade following the Company's announced reclassification of \$300 million in cash flow from

DYNEGY INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

(UNAUDITED AND RESTATED)

For the Interim Periods Ended March 31, 2002 and 2001

operations from 2001 to cash flow from financing in connection with Project Alpha. On April 24, 2002, Standard & Poor's lowered its credit ratings for Dynegy and its subsidiaries following a business risk evaluation of the Company's various operating segments, its overall financial profile, capital adequacy and liquidity position. In addition, on May 8, 2002, Standard & Poor's placed Dynegy and its subsidiaries on CreditWatch with negative implications. On April 30, 2002, Fitch lowered its credit ratings and reiterated its negative watch status for Dynegy and its subsidiaries due to concerns regarding the Company's financial flexibility and its ability to operate its business recognizing a difficult business and capital environment and maintained its status of review for possible downgrade. For a discussion of the Company's current credit ratings, please read "Management's Discussion and Analysis of Financial Condition and Results of Operations--Liquidity and Capital Resources-- Credit Rating Discussion."

THE COMPANY HAS EXPERIENCED A NUMBER OF MATERIAL DEVELOPMENTS SINCE THE ORIGINAL FILING OF ITS MARCH 31, 2002 FORM 10-Q ON MAY 15, 2002. FOR FURTHER DISCUSSION OF SUCH EVENTS, PLEASE READ THE COMPANY'S EXCHANGE ACT REPORTS FILED SINCE SUCH DATE, INCLUDING ITS ANNUAL REPORT ON FORM 10-K FOR THE FISCAL YEAR ENDED DECEMBER 31, 2002, WHICH DISCUSSION IS INCORPORATED HEREIN BY THIS REFERENCE.

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

DYNEGY INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For the Interim Periods Ended March 31, 2002 and 2001

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements of Dynegy Inc. ("Dynegy" or the "Company") and the notes thereto included elsewhere herein and with the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2001, as filed with the SEC. As discussed in the Introductory Note to this Form 10-Q/A, the financial information contained in this report has been revised to reflect the restatement items described in the Explanatory Note to the accompanying unaudited Condensed Consolidated Financial Statements. Dynegy has also amended its 2001 Form 10-K, most recently with Amendment No. 2 thereto filed with the SEC on April 11, 2003. The restatements to the Company's 2001 financial statements and related information are further described therein, and this Form 10-Q/A should be read together with such Amendment No. 2.

PLEASE NOTE THAT THE INFORMATION CONTAINED IN THIS FORM 10-Q/A, INCLUDING THE FINANCIAL STATEMENTS AND THE NOTES THERETO, DOES NOT REFLECT EVENTS OCCURRING AFTER MAY 15, 2002 (THE DATE ON WHICH DYNEGY ORIGINALLY FILED ITS MARCH 31, 2002 FORM 10-Q). FOR A DESCRIPTION OF THESE EVENTS, PLEASE READ THE COMPANY'S EXCHANGE ACT REPORTS FILED SINCE MAY 15, 2002, INCLUDING ITS ANNUAL REPORT ON FORM 10-K FOR THE FISCAL YEAR ENDED DECEMBER 31, 2002. SEE NOTE 12--SUBSEQUENT EVENTS FOR FURTHER DISCUSSION.

Dynegy is one of the world's leading energy merchants. Through its global energy delivery network and marketing, logistics and risk-management capabilities, the Company provides innovative solutions to customers in North America, the United Kingdom and Continental Europe. Dynegy's operations are reported in four segments: Wholesale Energy Network ("WEN"), Dynegy Midstream Services ("DMS"), Transmission and Distribution ("T&D") and Dynegy Global Communications ("DGC").

Like many companies in our industry, Dynegy has faced a number of challenges since the end of 2001. Events surrounding the collapse of Enron Corp. ("Enron") have contributed to an unprecedented business environment fueled by skepticism among regulators and investors alike. Dynegy's management understands the demands of these new market realities and is responding within the framework of our customer-focused, asset-backed business model. As we describe below, current conditions have required us to take steps to strengthen our balance sheet and address credit concerns. While much of this discussion focuses on the impact of these developments on our wholesale marketing and risk-management business, this business is generally responsible for only 30% of the Company's operating income on an annual basis. As we have previously disclosed, approximately 70% of the Company's annual operating income is derived from owned physical assets. This asset base is not expected to be significantly negatively impacted by these recent developments and continues to provide the foundation for Dynegy's energy merchant business.

This Form 10-Q describes a number of recent developments affecting the Company. On April 25, 2002, the Company preliminarily released its first quarter 2002 earnings and announced that it would reclassify \$300 million in cash flow from operations to cash flow from financing in 2001 related to Project Alpha. Also on April 25th, Moody's placed Dynegy's credit ratings under

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

review for possible downgrade citing concerns over the Company's ability to generate sustainable recurring operating cash flow. The Company has subsequently been named in several purported class action lawsuits alleging violations of the federal securities laws and announced the SEC's intention to expand its review of Project Alpha into a formal investigation. More recently,

31

on May 8, 2002, Standard & Poor's placed Dynegy's credit ratings on credit watch with negative implications due to concerns regarding the SEC's investigation and renewed allegations of price manipulation in California power markets as well as the effect of these actions on counterparty confidence.

Management remains committed to responding to these recent developments. With the exception of additional collateral requirements resulting from recent events, the Company's business results have not been significantly adversely affected to date. However, we are not operating in a normal business environment and our results of operations for the remainder of 2002 and beyond will be significantly affected by our ability to restore confidence with customers and investors. Among the most significant factors that Dynegy must address are the following:

- . confidence in the Company's long-term business strategy as an energy merchant company built around a physical asset base and in its execution of this strategy, including the cash flow it generates;
- . questions about the capital structure and liquidity position of the Company, including the overall amount of leverage relative to its asset base;
- . ongoing investigations and litigation relating to Project Alpha, the California power markets, the CMS trades and the Enron merger; and
- . the Company's ability to eliminate losses associated with its communications business by year-end.

Our success in addressing these issues will in turn affect the views of credit rating agencies, the capital markets and trade counterparties about our Company. Each of these factors is described in greater detail below. Please also read "Uncertainty of Forward-Looking Statements and Information" below for additional factors that could impact future operating results.

The following discussion also provides important information about the effect of recent events on our liquidity and capital resources. The Company's wholesale marketing and risk-management business has required additional capital in response to a general tightening of trade credit after Enron's bankruptcy and in response to recent events impacting Dynegy specifically. We are working diligently to address the concerns discussed above and to take the measures necessary to defend our investment grade credit ratings. However, as the Company has previously disclosed, management believes that Dynegy has sufficient liquidity and capital resources to continue to meet its obligations and to operate its business even in the event of the loss of our investment grade credit rating by one or more rating agencies. The Company intends to manage its wholesale marketing business in a manner consistent with its liquidity position. For further discussion, see "Liquidity and Capital Resources" below.

LIQUIDITY AND CAPITAL RESOURCES

In December 2001, Dynegy announced a \$1.25 billion capital restructuring

program to respond to concerns of credit rating agencies and trade counterparties regarding balance sheet strength in the merchant energy sector. In accordance with the plan, Dynegy raised \$744 million in net proceeds by selling approximately 39.1 million shares of common stock, including 10.4 million shares purchased by ChevronTexaco and 1.2 million shares purchased by senior management. Net proceeds from the sale of these shares were used to reduce indebtedness under DHI's revolving credit facility by approximately \$540 million and the remainder of the proceeds were held as cash. In addition to these equity sales, the Company reduced its original 2002 capital-spending program by over \$500 million to approximately \$1.2 billion. This reduction in capital spending related to funds originally budgeted for capital expenditure opportunities that were anticipated to arise during the year. The Company's primary capital expenditure focus will be the acquisition and/or construction of energy assets that will enable the Company to expand its energy network. Expenditures will include maintenance capital at existing facilities of approximately \$430 million. The Company also anticipates limiting future capital expenditures associated with its communications network.

32

The Company believes it prudent to increase liquidity and strengthen its balance sheet and, as a result, continues to assess additional alternatives, including possible joint ventures or sales of assets and businesses. These steps are designed to continue the Company's capital restructuring program. Such steps are also being taken to reduce leverage and to establish revised targets for debt to capitalization and coverage ratios.

Dynegy also continues to pursue a potential initial public offering by a newly created master limited partnership which would own a portion of the Company's downstream NGL business. The registration statement relating to this offering has not yet been declared effective by the SEC and Dynegy cannot guarantee its eventual effectiveness or that once effective, Dynegy Energy Partners' initial public offering will be successfully completed. Further, the issues facing Dynegy as described elsewhere in this Form 10-Q could affect Dynegy Energy Partners' ability to successfully market and consummate its initial public offering.

Dynegy's balance sheet at March 31, 2002 also reflects the increased leverage associated with our acquisition of Northern Natural Gas Company ("Northern Natural") from Enron at January 31, 2002. This increased leverage results partially from Northern Natural's \$950 million of indebtedness and partially from the \$1.5 billion of Series B Mandatorily Convertible Redeemable Preferred Stock ("Series B Preferred Stock") sold to ChevronTexaco in November 2001, the proceeds of which were used to purchase preferred stock in Northern Natural. The Company is continuing to assess alternatives regarding the Series B Preferred Stock, its capital structure and other alternatives relating to Northern Natural in the event Enron does not exercise its repurchase option. This option expires at the end of June. See "--Other Matters--Enron/Northern Natural."

DHI Revolving Credit Agreement

DHI closed a \$900 million unsecured revolving credit agreement with a syndicate of commercial banks on April 29, 2002. This facility, which matures on April 28, 2003, replaced an expiring \$1.2 billion revolving credit agreement. The new facility provides funding for working capital, capital expenditures and general corporate purposes. Generally, borrowings under the credit agreement bear interest at a Eurodollar rate plus a margin that is determined based on designated unsecured debt ratings. The increase in this margin over the margins under the expired facility is expected to result in an

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

increase in the fees paid by DHI compared to the fees paid under the expiring facility. Specifically, DHI expects to pay approximately \$1.4 million in additional borrowing fees during the term of the new facility and paid approximately \$3.2 million in additional upfront fees in connection with the closing of the new facility.

Financial covenants in the revolving credit agreement include a debt-to-capitalization test (which takes into account certain lease and similar commitments of DHI and its subsidiaries) and a newly added 3.5 times earnings before interest, taxes and depreciation and amortization ("EBITDA")-to-interest test. The permissible threshold for the debt-to-capitalization test was lowered in the new facility from 65% to 60%. Other newly added covenants in the new facility include subordination of certain intercompany debt owed to Dynegy and its subsidiaries (other than DHI and its subsidiaries), restrictions on liens and limitations prohibiting subsidiary debt at Dynegy Marketing & Trade, Dynegy Power Marketing, Inc. and Dynegy Midstream Services, Limited Partnership. Default provisions include cross payment default of Dynegy, DHI or any principal subsidiary with respect to debt or other similar obligations that exceed \$100 million, cross acceleration of Dynegy, DHI or any principal subsidiary under any instrument covering debt or similar obligations that exceed \$100 million and bankruptcy or receivership of Dynegy, DHI or any principal subsidiary. The new facility does not contain any defaults relating to material adverse changes in the condition of Dynegy or DHI after the closing date or to changes in Dynegy's or DHI's credit ratings. The new facility also does not contain a "term-out" provision that would permit Dynegy to extend the maturity for borrowings under the facility beyond the facility's April 28, 2003 maturity date.

33

Available Credit Capacity and Debt Maturities

The following table describes our available credit capacity at quarter end:

AVAILABLE CREDIT CAPACITY AS OF MARCH 31, 2002

	Dynegy				
Total	Dynegy Inc.	Holdings Inc.	Illinois Power	Northern Natural	
-----	-----	-----	-----	-----	-----
	(\$ in millions)				
Outstanding Loans and Letters of Credit	\$1,425	\$ --	\$ 735	\$240	\$450
Unused Borrowing Capacity.....	1,265	300	905	60	--
	-----	----	-----	----	----
Total Credit Capacity.....	\$2,690	\$300	\$1,640	\$300	\$450
	=====	=====	=====	=====	=====

Under current market conditions, Dynegy does not have access to the commercial paper markets and has relied on bank credit facilities, operating cash flow, public equity and debt issuances and cash on hand for its short-term liquidity requirements. Sales of common stock in December 2001 and January 2002 generated aggregate net proceeds of approximately \$744 million which were used to pay down approximately \$540 million of indebtedness under DHI's revolving credit facility; the remainder was invested in cash. In February 2002, DHI issued \$500 million of 8.75% senior notes due 2012 and used the net proceeds to pay down approximately \$250 million of indebtedness under DHI's revolving

credit facility; the remainder was held in cash.

Illinois Power Company ("IP") has a \$300 million 364-day revolving credit facility that matures on May 20, 2002. IP is seeking to replace the maturing IP facility with a new facility of at least \$200 million. The Company can provide no assurance that IP will be able to refinance this revolving credit facility on terms comparable to its existing facility. The existing IP revolver includes a "term-out" provision which would permit IP to convert outstanding borrowings under the current revolver to a one-year term loan in the event a new facility cannot be placed.

In addition to the \$900 million DHI facility described above and the IP facility, Dynegy Inc. has a \$300 million revolving credit facility which matures in November 2002. DHI also has a \$400 million revolving credit facility that matures in May 2003. Northern Natural has a \$450 million 364-day revolving credit facility that matures in November 2002.

In addition to these bank credit facilities, Dynegy has \$351 million of debt maturities through the third quarter of 2002, including \$200 million of DHI senior notes due July 2002, \$96 million of IP mortgage bonds also due in July 2002 and \$34 million of payments associated with ABG Gas Supply. Dynegy also has \$42 million of debt other than bank credit facilities maturing in the fourth quarter of 2002. See Note 5 to the accompanying financial statements.

As of May 14, 2002, the Company had committed credit lines of approximately \$2.4 billion, reflecting the new DHI revolving credit facility of \$900 million that replaced a \$1.2 billion facility that matured in May 2002. At May 14, 2002, the Company had borrowings of approximately \$1.1 billion and outstanding letters of credit of approximately \$669 million under these credit facilities (of which approximately \$337 million have been posted since April 25, 2002), leaving approximately \$631 million of unused borrowing capacity. In addition, at May 14 the Company had cash of approximately \$360 million and in excess of \$300 million of other highly liquid assets which is principally natural gas and crude inventories.

Credit Rating Discussion

Credit ratings impact the Company's ability to obtain short- and long-term financing, the cost of such financing and the execution of its commercial strategies. In determining the Company's credit ratings, the rating agencies consider a number of factors. Quantitative factors that are given significant weight include, among other things, EBITDA; operating cash flow; total debt outstanding; off balance sheet obligations and other

commitments; fixed charges such as interest expense, rent or lease payments; payments to preferred stockholders; liquidity needs and availability; and various ratios calculated from these factors. Qualitative factors include, among other things, predictability of cash flows, business strategy, industry position and contingencies. Although these factors are among those considered by the rating agencies, each agency may calculate and weigh each factor differently.

The credit ratings of Dynegy and its subsidiaries were placed under review for possible downgrade by Moody's and Standard & Poor's on April 25 and May 8, respectively, due to uncertainties regarding the sustainability of cash flow, the Enron litigation (see Note 9 to the accompanying financial statements), Dynegy's ability to access the capital markets, the cash flow treatment of Project Alpha (see the Introductory Note to the accompanying financial

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

statements), allegations of market manipulation in California, the effect of these items on counterparty confidence and other matters. On April 30, 2002, Fitch clarified its position with respect to a possible downgrade to include similar concerns. In addition, as a result of the Enron bankruptcy, the credit rating agencies have refocused their attention on the credit characteristics and credit protection measures of industry participants, and in some cases appear to have tightened the standards for a given rating level.

On April 24, 2002, Standard & Poor's lowered its credit ratings for Dynegy and its subsidiaries following a business risk evaluation of the Company's various operating segments, its overall financial profile, capital adequacy and liquidity position. On April 30, 2002, Fitch lowered its credit ratings for Dynegy and its subsidiaries due to concerns regarding the Company's financial flexibility and its ability to operate its business recognizing a difficult business and capital environment. The updated ratings are reflected in the table below.

As of May 9, 2002, Dynegy's senior unsecured debt ratings, as assessed by the three major credit rating agencies, were as follows:

Rated Enterprises -----	Standard & Poor's Moody's -----		Fitch -----
Senior Unsecured Debt Rating:			
Dynegy Holdings Inc.(1).....	BBB	Baa3	BBB
Dynegy Inc.(2).....	BBB-	Ba1	BBB-
Illinois Power(3).....	BBB-	Baa3	BBB
Illinova Corporation(4).....	BBB-	Ba1	BBB-
Northern Natural(5).....	CC	B3	CC
Commercial Paper/Short-Term Rating:			
Dynegy Holdings Inc.....	A-3	P-3	F3
Dynegy Inc.....	A-3	NP	F3
Illinois Power.....	A-3	P-3	F2

-
- (1) Dynegy Holdings Inc. is the primary debt financing entity for the enterprise. This entity is a subsidiary of Dynegy Inc. and is a holding company that includes substantially all of the operations of the WEN and DMS business segments and Northern Natural, which is reported in the T&D segment.
 - (2) Dynegy Inc. is the parent holding company. This entity generally provides financing to the enterprise through issuance of capital stock.
 - (3) This entity includes the Company's regulated transmission and distribution business in Illinois.
 - (4) Illinova Corporation is the holding company for Illinois Power and is no longer used to raise capital.
 - (5) Ratings have not changed since Dynegy's acquisition of Northern Natural and reflect Enron's repurchase option.

A downgrade in Dynegy's credit ratings to below investment grade would cause a reduction in the amount of trade credit expected to be extended by Dynegy's counterparties until these ratings could be restored. The

Company also anticipates that counterparties would increase their collateral demands relating to its wholesale marketing and risk-management business. Downgrades in Dynegy's credit ratings to below investment grade also would trigger the financing covenants described below under "Financing Trigger Events." Such a downgrade also could increase the risk that the Company would be unable to refinance debt obligations as they mature and could increase the borrowing costs incurred by the Company in connection with any such refinancings. The Company's financial flexibility would likewise be reduced as a result of restrictive covenants and other terms that are typically imposed on non-investment grade borrowers.

Management is in discussions with representatives of Moody's, Standard & Poor's and Fitch. These discussions focus on the Company's business strategy, 2002 forecast, business operations and the amount and sustainability of cash flows. Dynegy cannot predict with any certainty the actions, if any, that may be taken by the rating agencies subsequent to these meetings.

Financing Trigger Events

Dynegy's debt instruments and other financial obligations include routine provisions, which, if not met, could require early payment, additional collateral support or similar actions. For Dynegy, these trigger events include leverage ratios, insolvency events, defaults on scheduled principal or interest payments, acceleration of other financial obligations and change of control provisions. Dynegy does not have any trigger events tied to specified credit ratings or stock price in its debt instruments and has not executed any transactions that require it to issue equity based on credit rating or other trigger events.

The Company has two non-commercial agreements that have trigger events tied to credit ratings. At March 31, 2002, the amount of cash collateral that the Company would have to post in the event of a ratings trigger under these two agreements was \$300 million. The Company's investment in Catlin Associates, LLC, described below, accounts for \$270 million of the \$300 million in possible cash collateralization and would be triggered only if the senior unsecured debt ratings for DHI were downgraded below investment grade by both Moody's and Standard & Poor's. The remaining \$30 million relates to the Company's guarantee of certain contingent environmental obligations of West Coast Power, a 50 percent owned equity investment. This obligation would be triggered by a downgrade in DHI's credit rating to below investment grade by either Moody's or Standard & Poor's. Dynegy's credit ratings are under review by Moody's, Standard & Poor's and Fitch. Please see "--Credit Rating Discussion."

In June 2000, Dynegy and Black Thunder Investors LLC ("Investor") invested in Catlin Associates, LLC ("Catlin"), an entity that is consolidated by Dynegy, with the Investor's ownership in Catlin reflected as Minority Interest in the Condensed Consolidated Balance Sheets. Dynegy invested \$100 million in Catlin and the Investor invested \$850 million. As a result of its investment, the Investor received a preferred interest in Catlin, which holds indirect economic interests in Dynegy's midwest generation assets. As of March 31, 2002, these assets had a net book value of approximately \$3.0 billion. If DHI's senior unsecured debt is downgraded below investment grade by both Standard & Poor's and Moody's, Dynegy would be required to post cash collateral in an aggregate amount of \$270 million and, within 30 days, obtain an investment grade rating for the interest held by the Investor by either Standard & Poor's or Moody's or obtain a waiver from the Investor.

If Dynegy were unable to obtain the required rating for the interest held by the Investor or waiver, Dynegy would have the option of purchasing or refinancing the Investor's interest in Catlin. If Dynegy were to elect not to

exercise this option, it could ultimately result in an election by the Investor to cause the liquidation of the underlying generation assets in an amount sufficient to redeem the Investor's interest. Given the strategic importance of these generation assets, it is likely that Dynegy would seek to refinance or purchase the Investor's interest under such circumstances. For additional information regarding Catlin, please read "Management's Discussion and Analysis of Financial Condition and Results of Operations--Liquidity and Capital Resources--Contingent Financial Commitments as of December 31, 2001" in the 2001 Form 10-K.

36

Trade Credit and Liquidity

Following the Enron bankruptcy, there has been a general industry-wide contraction in trade credit in the wholesale energy markets. Open or unsecured credit lines generally have been reduced, and counterparties are more stringent in requiring credit support in the form of cash in advance, letters of credit or guarantees as a condition to transacting business above open credit limits. In addition, parties engaged in the wholesale marketing business, including Dynegy, are moving towards the implementation of standardized agreements that allow for the netting of positive and negative exposures associated with a single counterparty. Dynegy believes that the trend toward such master netting agreements is a positive market development and has executed or is in the process of negotiating such agreements with a number of its trading partners. Most commercial agreements typically include "adequate assurance" provisions or specific ratings triggers. These clauses typically give counterparties the right to suspend or terminate credit if the Company's credit ratings fall below investment grade.

Dynegy's wholesale marketing and risk-management business has historically relied upon DHI's senior unsecured debt investment grade credit rating to satisfy the credit support requirements of many counterparties. Prior to April 25, 2002, Dynegy had approximately \$350 million in letters of credit posted in connection with its commercial operations. Since the April 25, 2002 action by Moody's placing Dynegy's credit ratings under review for possible downgrade, Dynegy has been able to transact its wholesale marketing and risk-management business by posting an additional approximately \$360 million in letters of credit to collateralize its net exposure to various counterparties. Total outstanding letters of credit as of May 14, 2002 approximate \$710 million.

In the event of a further downgrade by one or more credit rating agencies, management estimates it would require an additional \$350 million to collateralize existing commercial arrangements. This \$350 million of additional collateral, together with the approximately \$360 million in collateral posted since April 25, represents the approximate \$700 million of additional collateral previously described by management as the necessary liquidity to support the commercial business in the event of a downgrade. The financing triggers described above represent an additional \$300 million of commitments, \$270 million of which would be triggered only in the event of a downgrade by both agencies. At May 14, Dynegy had unused borrowing capacity of approximately \$631 million, cash of approximately \$360 million and in excess of \$300 million of other highly liquid assets, principally natural gas and crude inventories.

Dynegy's current liquidity position can be summarized as follows (in millions):

Capacity

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

Bank capacity.....	\$ 631
Cash.....	360
Highly Liquid Inventory.....	300

	\$1,291
Requirements in Double Downgrade Event	
Additional Collateral.....	\$ 350
Financing Triggers.....	300

	\$ 650

Available Liquidity Remaining.....	\$ 641

Dynegy intends to manage its wholesale marketing and risk-management business in a manner consistent with its liquidity position. In the event of a downgrade, Dynegy believes it can reduce the level of short-term wholesale marketing and risk-management business activities with little impact on earnings and cash flow. However, in the event of a downgrade, longer term wholesale marketing and risk-management business activities could be affected and could have an impact on earnings in the future.

Other factors which will impact liquidity in the near term are cash flow from operations, capital spending, the approximately \$300 million in debt maturities in July 2002 and the Company's ability to execute additional

37

capital enhancing transactions such as asset or business sales, joint ventures or financings. Based on current credit capacity and assumptions management believes to be reasonable, we believe that Dynegy has sufficient liquidity and capital resources to meet its obligations even in a downgrade scenario.

Long-Term Supply Commitments

During the first quarter of 2002, the Company executed long-term supply contracts, including tolling arrangements. This long-term supply was acquired at a cost below that which would be incurred to build and maintain power generation facilities to provide such supply. The supply commitment increased the Company's firm capacity payments by \$624 million on a discounted basis, for total capacity payments of \$2.1 billion on a discounted basis at March 31, 2002. The additional future payment obligations associated with firm capacity contracts executed in the first quarter 2002 are expected to occur ratably beginning in year 2005 and beyond. These amounts include supply contracts that are reflected on the Condensed Consolidated Balance Sheets in Risk Management Assets or Risk Management Liabilities and those that are accounted for on an accrual basis, each as determined by the applicable contractual terms and in accordance with generally accepted accounting principles.

OTHER MATTERS

Enron/Northern Natural. On November 9, 2001, Dynegy entered into a merger agreement with Enron. The closing of the merger was conditioned upon the accuracy of representation and warranties, approval of the shareholders of both Dynegy and Enron, the receipt of applicable regulatory approvals, the absence of material adverse changes and other customary conditions.

On November 13, 2001, in connection with the merger agreement, ChevronTexaco purchased 150,000 shares of Dynegy's Series B Preferred Stock for \$1.5 billion.

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

Dynegy used the \$1.5 billion of proceeds from this issuance to purchase 1,000 shares of Series A Preferred Stock in Northern Natural. The Series A Preferred Stock has a 6% cumulative dividend which accrues from the issue date but is not payable until January 31, 2003. In connection with the preferred stock investment in Northern Natural, Dynegy paid \$1 million to acquire an option to purchase all of the equity of Northern Natural's indirect parent company. The exercise price for the option was \$23 million, subject to adjustment based on Northern Natural's indebtedness and working capital.

On November 28, 2001, Dynegy exercised its right to terminate the merger agreement with Enron. The above-mentioned agreements were impacted as follows:

- . Dynegy exercised its option to purchase the indirect parent company of Northern Natural. The closing of the transaction occurred on January 31, 2002. An Enron subsidiary has the option to reacquire Northern Natural through June 30, 2002 for \$1.5 billion plus accrued but unpaid dividends on the Series A Preferred Stock and the option exercise price, subject to adjustment based on Northern Natural's indebtedness and working capital.
- . At January 31, 2002, Northern Natural had approximately \$950 million of debt outstanding. The significant terms of the Northern Natural debt are as follows (\$ in millions):

Senior Notes, 6.875% due May 2005.....	\$100
Senior Notes, 6.75% due September 2008.....	150
Senior Notes, 7.00% due June 2011.....	250
Borrowing under Revolving Credit Agreement, 4.66% due November 2002	450

Total debt.....	\$950
	====

38

In order to obtain a bondholder consent required in connection with the Northern Natural acquisition, DHI agreed to effect a tender offer for \$100 million of senior unsecured notes of Northern Natural due in 2005. On April 26, 2002, DHI purchased \$90 million of the notes pursuant to such tender offer.

- . Management believes, based on an internal analysis of Northern Natural's credit capacity, including a review of other regulated pipelines, that Northern Natural will be able to refinance the \$450 million secured line of credit, and it is Northern Natural's management's intention to do so.
- . Each share of Dynegy's Series B Preferred Stock became convertible, at the option of ChevronTexaco, for a period of two years, into shares of Dynegy Class B common stock at the conversion price of \$31.64. This conversion price represents a 5% discount to the Company's stock price on November 7, 2001, the date the conversion price was negotiated. As a result of this event, ChevronTexaco acquired a beneficial conversion option, which will be accreted by Dynegy over the two-year option conversion term as an implied dividend. Based on the implied value of the beneficial conversion option as of November 7, the Company originally recognized a special preferred stock dividend of approximately \$65 million. The Company was recognizing this dividend over the two-year period from the issuance date of the preferred stock to the mandatory redemption date. For purposes of calculating the value of the beneficial conversion option, the Company originally used November 7, 2001 as the

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

commitment date. The Company has since determined that it should have used November 13, the date ChevronTexaco funded its preferred stock purchase and the preferred securities were issued, as the commitment date. The Company's stock price increased significantly between these two dates after the announcement of the proposed Enron Corp. merger resulting in an implied value of \$660 million rather than the previously disclosed \$65 million. The restated preferred stock dividend amount is calculated based on a two-year amortization of the beneficial conversion option's implied value of approximately \$660 million. Unless ChevronTexaco exercises its conversion right, Dynegy is required to redeem the Series B Preferred Stock for \$1.5 billion two years from the date of issuance. The Series B Preferred Stock is not entitled to a dividend.

On December 2, 2001, Enron filed for federal bankruptcy protection in the United States Bankruptcy Court, Southern District of New York. Enron also filed an adversary proceeding in the bankruptcy court against Dynegy and DHI seeking damages of \$10 billion for wrongful termination of the merger agreement and the wrongful exercise of its option to take ownership of Northern Natural. Please refer to Note 9 to the accompanying financial statements for further discussion of this dispute.

As previously described in the 2001 Form 10-K, as a result of Enron's bankruptcy filing, Dynegy recognized in its fourth quarter 2001 financial statements a pre-tax charge related to the Company's net exposure for commercial transactions with Enron. As of March 31, 2002, the Company's net exposure to Enron, inclusive of certain liquidated damages and other amounts relating to the termination of the transactions, was approximately \$84 million and was calculated by setting off approximately \$230 million owed from various Dynegy entities to various Enron entities against approximately \$314 million owed from various Enron entities to various Dynegy entities. The master netting agreement between Dynegy and Enron and the valuation of the commercial transactions covered by the agreement, which valuation is based principally on the parties' assessment of market prices for such period, remain subject to dispute by Enron with respect to which there have been negotiations between the parties. These negotiations have focused on the scope of the transactions covered by the master netting agreement and the parties' valuations of those transactions. If any disputes cannot be resolved by the parties, the agreement calls for arbitration. If the setoff rights were modified or disallowed, either by agreement or otherwise, the amount available for Dynegy entities to set off against sums that might be due Enron entities could be reduced materially.

California Market/West Coast Power. Dynegy and NRG Energy each own 50 percent of West Coast Power, a joint venture owning power generation plants in southern California. Dynegy's net interest in West Coast Power represents approximately 1,400 MW of generating capacity. Dynegy also participates in the California markets independently, as a wholesale marketer of gas and power. Through its interest in West Coast

Power, Dynegy has credit exposure for past transactions to state agencies ("ISO" and "PX"), which primarily relied on receipts from California utilities to pay their bills. West Coast Power also sells directly to the California Department of Water Resources ("DWR") pursuant to other bilateral agreements. As described in Note 9 to the accompanying financial statements, on February 25, 2002, the California Public Utilities Commission and the California Electricity Oversight Board filed complaints with the FERC asking that it void or reform power supply contracts between CDWR and, among others, West Coast Power. The complaints allege that prices under the contracts exceed just and reasonable prices permitted under the Federal Power Act. The FERC recently set

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

these complaints for evidentiary hearing. The hearing, which will be deferred until after settlement talks currently scheduled to begin on May 16, 2002, will be limited to the question whether the California market adversely affected the long-term bilateral markets to the extent that modifications to the DWR power contracts are required. While the Company believes the terms of its contracts are just and reasonable and do not reflect alleged market manipulation, it cannot predict how the FERC will respond to these complaints. The Company is vigorously defending against these complaints. Please read Note 11, "Commitments and Contingencies," to the 2001 Form 10-K and Note 9 to the accompanying financial statements for additional discussion of the Company's activities in the California power market.

As a result of West Coast Power's previously announced long-term sales arrangement with the DWR, ongoing management of credit risk associated with direct sales to customers in California and other factors, management believes that Dynegy's primary exposure relates to the realization of its share of West Coast Power's receivables from the ISO and PX and potential refunds or offsets associated with related transactions. Transactions with the aforementioned counterparties, other than the ISO and PX, are current under the terms of each individual arrangement. At March 31, 2002, Dynegy's portion of the receivables owed to West Coast Power by the ISO and PX approximated \$206 million. Management is continually assessing Dynegy's exposure, as well as its exposure through West Coast Power, relative to its California receivables and establishes reserves for contingent liabilities where the amount of potential loss is determined to be probable and estimable. During the three months ended March 31, 2002 and 2001, Dynegy's share of reserves taken by West Coast Power aggregated \$0.2 million and \$85.5 million, respectively. Dynegy's share of the total reserve at March 31, 2002 and December 31, 2001 was \$152.0 million and \$151.8 million, respectively.

ChevronTexaco Commercial Relationship. In March 2002, Dynegy and ChevronTexaco executed agreements to expand their commercial relationships to include substantially all of the natural gas and domestic mixed NGLs and NGL products produced or controlled by the former Texaco. The expanded term agreements extend through August 2006. This expanded relationship increases the volume of natural gas Dynegy purchases from ChevronTexaco from approximately 1.7 Bcf/d to approximately 2.9 Bcf/d. Dynegy also provides supply and service for in excess of 1.6 Bcf/d of natural gas for the combined ChevronTexaco facilities and third-party term markets. In addition, DMS' expanded contract with ChevronTexaco includes substantially all of the U.S. NGL production of the former Texaco. Concurrent with the expanded commercial agreements, the two companies executed new security provisions that Dynegy believes are mutually beneficial. The new security agreement improves Dynegy's liquidity position by reducing its reliance upon the financial markets for surety bonds and letters of credit, while ChevronTexaco's open credit exposure is significantly reduced. Additionally, it is scaleable to include the increased volumes in any pricing environment and provides cost savings to Dynegy. Such provisions involve replacement of historic credit support arrangements with a perfected security interest in a portion of Dynegy's domestic natural gas receivables. Dynegy has the option to revert back to historic credit support arrangements, which included the issuance of surety bonds and/or letters of credit.

Recent Accounting Pronouncements. Several recently issued accounting pronouncements have been adopted or will be adopted within the next year by the Company. See Note 2 to the accompanying financial statements for a discussion of Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" ("Statement No. 142"), Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" ("Statement No. 143"), Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("Statement No. 144") and Statement of

Financial Accounting Standards No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections" ("Statement No. 145").

In addition, we have interests in joint ventures, equity investors and financing arrangements that existing accounting guidance precludes us from consolidating. In the wake of the Enron bankruptcy, accounting standard setters, including the SEC and FASB, are evaluating the existing accounting and disclosure rules and requirements. One area that has received a high level of scrutiny is the accounting rules related to consolidations, specifically those that address special purpose entities. Standard setting bodies and regulators are evaluating the consolidation rules to determine whether the existing accounting framework should change. There is a risk that existing standards will change, particularly in light of the events of 2001, and that these changes could result in the consolidation in the Company's financial statements of entities that it does not consolidate.

Commitments and Contingencies. See Note 9 to the accompanying financial statements for a discussion of the Company's Commitments and Contingencies.

Dividend Policy. Dynegy intends to pay a quarterly dividend of \$0.075 per share of common stock, subject to declaration by the Board of Directors of the Company and the availability of funds legally available therefor. During the three-month periods ended March 31, 2002 and 2001, the Company paid approximately \$28 million and \$25 million in cash dividends, respectively, on common stock.

Concentration of Credit Risk. As a result of recent volatility in both the commodity and equity markets, Dynegy has reassessed its industry credit concentration as well as specific counterparty credit risks. Based on this reassessment, Dynegy continues to believe that credit risk imposed by industry concentration is largely offset by the diversification and creditworthiness of its customer base. The Company believes that its corporate credit policies are aligned with business risks in support of minimizing enterprise credit risk.

ACCOUNTING METHODOLOGY

The Company has identified three critical accounting policies that require a significant amount of judgment and are considered to be the most important to the portrayal of Dynegy's financial position and results of operations. These policies include the accounting for long-lived assets, the evaluation of counterparty credit and other similar risks and revenue recognition. See Note 3 to the 2001 Form 10-K for a discussion of the process surrounding the evaluation of counterparty credit and other similar risks. For disclosure on the Company's accounting for long-lived assets and revenue recognition, refer to Note 2 to the 2001 Form 10-K. Accounting methodology and application of accounting methodologies is more fully described in the 2001 Form 10-K.

ENTERPRISE RISK MANAGEMENT, VALUATION AND MONITORING

Market Risk. The Company is exposed to commodity price variability related to its natural gas, NGLs, crude oil, electricity and coal businesses. In addition, fuel requirements at its power generation, gas processing and fractionation facilities represent additional commodity price risks to the Company. In order to manage these commodity price risks, Dynegy routinely utilizes certain types of fixed-price forward purchase and sales contracts, futures and option contracts traded on the New York Mercantile Exchange and swaps and options traded in the over-the-counter financial markets to:

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

- . Manage and hedge its fixed-price purchase and sales commitments;
- . Provide fixed-price commitments as a service to its customers and suppliers;
- . Reduce its exposure to the volatility of cash market prices;
- . Protect its investment in storage inventories; and
- . Hedge fuel requirements.

41

The potential for changes in the market value of Dynegy's commodity, interest rate and currency portfolios is referred to as "market risk." A description of each market risk category is set forth below:

- . Commodity price risks result from exposures to changes in spot rates, forward prices and volatilities in commodities, such as electricity, natural gas, coal, NGLs, crude oil and other similar products;
- . Interest rate risks primarily result from exposures to changes in the level, slope and curvature of the yield curve and the volatility of interest rates; and
- . Currency rate risks result from exposures to changes in spot rates, forward rates and volatilities in currency rates.

Dynegy seeks to manage these market risks through diversification, controlling position sizes and executing hedging strategies. The ability to manage an exposure may, however, be limited by adverse changes in market liquidity or other factors.

Valuation Criteria and Management Estimates. As more fully described in the 2001 Form 10-K, Dynegy utilizes a fair value accounting model for certain aspects of its operations as required by generally accepted accounting principles. The net gains or losses resulting from the revaluation of these contracts during the period are recognized currently in the Company's results of operations. For financial reporting purposes, assets and liabilities associated with these transactions are reflected on the Company's balance sheet as risk management assets and liabilities, classified as short- or long-term pursuant to each contract's individual tenor. Net unrealized gains and losses from these contracts are classified as revenue in the accompanying statement of operations. Transactions that have been realized and settled are reflected gross in revenues and cost of sales.

As more fully described in the Explanatory Note to the accompanying unaudited Condensed Consolidated Financial Statements, the Company corrected the forward power curve methodology it used to estimate the fair market value of its U.S. power marketing and trading portfolio. Further, the Company restated its financial statements, beginning with the third quarter 2001, to reflect the revised methodology.

Risk-Management Asset and Liability Disclosures. The following tables depict the mark-to-market value and cash flow components of the Company's net risk-management assets and liabilities at March 31, 2002:

MARK-TO-MARKET VALUE OF NET RISK-MANAGEMENT ASSET

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

	Total	2002(2)	2003	2004	2005	2006	Thereafter
	-----	-----	-----	-----	-----	-----	-----
	(\$ in millions)						
Mark-to-Market Value of Risk-Management Assets and Liabilities.....	\$620	\$72	\$223	\$137	\$34	\$23	\$131

(1) The table reflects the fair value of Dynegy's risk-management asset position after deduction of time value, credit, price and other reserves necessary to determine fair value. These amounts exclude the fair value associated with certain derivative instruments designated as hedges. The net risk-management assets of \$689 million on the Condensed Consolidated Balance Sheets include the \$620 million herein as well as emission allowance credits, other comprehensive income balances and other non-trading amounts.

(2) Amounts represent April 1 to December 31, 2002 values.

42

CASH FLOW COMPONENTS OF NET RISK-MANAGEMENT ASSET

	Three-months Ended March 31, 2002	Nine-months Ended December 31, 2002	2003	2004	2005	2006	Thereafter
	-----	-----	-----	-----	-----	-----	-----
	(\$ in millions)						
Cash Flow of Risk-Management Assets and Liabilities.....	\$270	\$179	\$236	\$158	\$51	\$39	\$339

(1) The cash flow value reflects realized cash flows for the first quarter 2002 and anticipated undiscounted cash inflows and outflows by contract based on tenor of individual contract position and have not been adjusted for counterparty credit or other reserves. These amounts exclude the cash flows associated with certain derivative instruments designated as hedges as well as other non-trading amounts.

Changes in the March 31, 2002 net risk management assets and liabilities and the associated cash flows from December 31, 2001 were primarily driven by the following factors:

- . Cash realization of existing contracts during the first quarter of 2002;
- . Extension of the timing of hedged storage withdrawals from 2002 to 2003 and beyond as a result of market opportunities;
- . Incremental natural gas and power transactions, which in some instances, result in negative cash flows in 2002 and positive cash flows in future periods; and

The following table provides an assessment of the factors impacting the change in net value of the risk-management asset and liability accounts during

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

the quarter ended March 31, 2002 (\$ in millions).

Fair value of portfolio at January 1, 2002.....	\$ 935
Gains (losses) recognized through the income statement in the period, net	130
Cash received related to contracts settled during the period, net.....	(375)
Changes in fair value as a result of a change in valuation technique(1)..	--
Other changes in fair value, net.....	(1)

Fair value of portfolio at March 31, 2002(2).....	\$ 689
	=====

 (1) Dynegy's modeling methodology has been consistently applied period over period.

(2) The net risk management asset of \$689 million is the aggregate of the following line items on the Condensed Consolidated Balance Sheet: Current Assets--Assets from Risk-Management Activities, Other Assets--Assets from Risk-Management Activities, Current Liabilities--Liabilities from Risk-Management Activities and Other Liabilities--Liabilities from Risk-Management Activities.

43

The following table provides an assessment of net contract values by year based on the Company's valuation methodology described above.

NET FAIR VALUE OF MARKETING PORTFOLIO

	-----	----	-----	-----	-----	-----	-----
	\$620	\$72	\$223	\$137	\$ 34	\$ 23	\$131
	=====	====	=====	=====	=====	=====	=====

-
- (1) Amounts represent April 1 to December 31, 2002 values.
 - (2) Prices obtained from actively traded, liquid markets.
 - (3) Mid-term prices validated against industry posted prices.
 - (4) See "Critical Accounting Policies" in the 2001 Form 10-K/A for a discussion of Dynegy's use of long-term models.

Value at Risk ("VaR"). In addition to applying business judgment, senior management uses a number of quantitative tools to manage the Company's exposure to market risk. These tools include:

- . Risk limits based on a summary measure of market risk exposure, referred to as VaR; and
- . Stress and scenario analyses performed daily that measure the potential effects of various market events, including substantial swings in

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

volatility factors, absolute commodity price changes and the impact of interest rate movements.

The modeling of the risk characteristics of Dynegy's marketing portfolio involves a number of assumptions and approximations. Dynegy estimates VaR using a JP Morgan RiskMetrics(TM) approach assuming a one-day holding period. Inputs for the VaR calculation are prices, positions, instrument valuations and the variance-covariance matrix. While management believes that these assumptions and approximations are reasonable, there is no uniform industry methodology for estimating VaR, and different assumptions and/or approximations could produce materially different VaR estimates.

Dynegy uses historical data to estimate the Company's VaR and, to better reflect current asset and liability volatilities, these historical data are weighted to give greater importance to more recent observations. Given its reliance on historical data, VaR is effective in estimating risk exposures in markets in which there are not sudden fundamental changes or shifts in market conditions. An inherent limitation of VaR is that past changes in market risk factors, even when weighted toward more recent observations, may not produce accurate predictions of future market risk. VaR should be evaluated in light of this and the methodology's other limitations.

VaR represents the potential loss in value of Dynegy's enterprise-wide marketing portfolio due to adverse market movements over a defined time horizon within a specified confidence level. For the VaR numbers reported below, a one-day time horizon and a 95% confidence level were used. This means that there is a one in 20 statistical chance that the daily portfolio value will fall below the expected maximum potential reduction in portfolio value at least as large as the reported VaR. Thus, a change in portfolio value greater than the expected change in portfolio value on a single trading day would be anticipated to occur, on average, about once a month. Gains or losses on a single day can exceed reported VaR by significant amounts. Gains or losses can also accumulate over a longer time horizon such as a number of consecutive trading days.

In addition, Dynegy has provided its VaR using a one-day time horizon and a 99% confidence level. The purpose of this disclosure is to provide an indication of earnings volatility using a higher confidence level. Under

44

this presentation, there is one in one hundred statistical chance that the daily portfolio value will fall below the expected maximum potential reduction in portfolio value at least as large as the reported VaR. Average VaR is not available for the three-month period ended March 31, 2002 and the year ended December 31, 2001 due to the restatement of historical results. While VaR can be calculated at a single point in time, it is not feasible to recalculate the historical results necessary to calculate an average.

The following table sets forth the aggregate daily VaR of Dynegy's marketing portfolio (in millions):

DAILY VaR FOR MARKETING PORTFOLIO

	March 31, 2002	December 31, 2001
	-----	-----

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

One Day VaR--95% Confidence Level	\$22	\$17
One Day VaR--99% Confidence Level	\$31	\$24

The increase in VaR from December 31, 2001 is due primarily to increases in volatility.

Credit Risk. Credit risk represents the loss that the Company would incur if a counterparty fails to perform under its contractual obligations. To reduce the Company's credit exposure, the Company seeks to enter into netting agreements with counterparties that permit Dynegy to offset receivables and payables with such counterparties. Dynegy attempts to further reduce credit risk with certain counterparties by entering into agreements that enable the Company to obtain collateral or to terminate or reset the terms of transactions after specified time periods or upon the occurrence of credit-related events. The Company may, at times, use credit derivatives or other structures and techniques to provide for third-party guarantees of the Company's counterparties' obligations.

Dynegy's industry typically operates under negotiated credit lines for physical delivery contracts. Dynegy's Credit Department, based on guidelines set by Dynegy's Credit Policy Committee, establishes Dynegy's counterparty credit limits. For collateralized transactions, the Company also evaluates potential exposure over a shorter collection period and gives effect to the value of collateral received. The Company further seeks to measure credit exposure through the use of scenario analyses and other quantitative tools. Dynegy's credit management systems monitor current and potential credit exposure to individual counterparties and on an aggregate basis to counterparties and their affiliates.

The following table displays the value of Dynegy's marketing portfolio, inclusive of hedging activities, at March 31, 2002:

	Investment Grade Credit Quality	Below Investment Grade Credit Quality Or Unrated	Total

			=====

- (1) Amount represents emission allowance credits, other comprehensive income balances and other non-trading amounts.
- (2) Represents amounts included in "Current Assets--Assets from Risk Management Activities", "Other Assets--Assets from Risk-Management Activities", "Current Liabilities--Liabilities from Risk-Management Activities", and "Other Liabilities--Liabilities from Risk-Management Activities" on the Condensed Consolidated Balance Sheet.

Interest Rate Risk. Interest rate risk results from variable rate financial obligations and from providing risk-management services to customers, since changing interest rates impact the discounted value of future cash flows used to value risk-management assets and liabilities. Management continually monitors its exposure to fluctuations in interest rates and may execute swaps or other financial instruments to hedge and mitigate this exposure.

Marketing portfolio. The following table sets forth the daily VaR associated with the interest rate component of the marketing portfolio. Average VaR is not available for the three-month period ended March 31, 2002 and the year ended December 31, 2001 due to the restatement of historical results. While VaR can be calculated at a single point in time, it is not feasible to recalculate the historical results necessary to calculate an average. Dynegy seeks to manage its interest rate exposure through application of various hedging strategies. Hedging instruments executed to mitigate such interest rate exposure in the marketing portfolio are included in the VaR as of March 31, 2002 and December 31, 2001 reflected in the table below.

DAILY VaR ON INTEREST COMPONENT OF MARKETING PORTFOLIO

	March 31, 2002	December 31, 2001

	(\$ in millions)	
One Day VaR--95% Confidence Level	\$3.3	\$0.1

Variable Rate Financial Obligations. Based on sensitivity analysis as of March 31, 2002, it is estimated that a one percentage point interest rate movement in the average market interest rates (either higher or (lower)) over the twelve months ended March 31, 2003 would decrease (increase) income before taxes by approximately \$17 million. Hedging instruments executed to mitigate such interest rate exposure are included in the sensitivity analysis.

Foreign Currency Exchange Rate Risk. Foreign currency risk arises from the Company's investments in affiliates and subsidiaries owned and operated in foreign countries. Such risk is also a result of risk management transactions with customers in countries outside the U.S. Management continually monitors its exposure to fluctuations in foreign currency exchange rates. When possible, contracts are denominated in or indexed to the U.S. dollar, or such risk may be hedged through debt denominated in the foreign currency or through financial contracts. At March 31, 2002, the Company's primary foreign currency exchange rate exposures were the United Kingdom Pound, Canadian Dollar, European Euro and Norwegian Kroner.

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

The following table sets forth the daily and average foreign currency exchange VaR. Hedging instruments executed to mitigate such foreign currency exposure are included in the VaR as of March 31, 2002 and December 31, 2001 reflected in the table below.

DAILY AND AVERAGE FOREIGN CURRENCY EXCHANGE VaR

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

The following table reflects certain operating and financial data for the Company's business segments for the three-month periods ended March 31, 2002 and 2001. This financial data has been revised to reflect the restatement items described in the Explanatory Note to the accompanying unaudited Condensed Consolidated Financial Statements. Please read this Explanatory Note for further discussion of these restatement items.

Three-Month Periods Ended March 31, 2002 and 2001

For the quarter ended March 31, 2002, Dynegy recorded a net loss of \$247 million or \$0.91 per diluted share, compared with first quarter 2001 net income of \$155 million or \$0.46 per diluted share. First quarter 2002 net loss includes charges related to goodwill and other asset impairment in the DGC segment and a charge associated with a volumetric commitment to deliver gas assumed with the acquisition of Northern Natural. First quarter 2002 results benefited from the January 31, 2002 acquisition of Northern Natural and the fourth quarter 2001 acquisition of the BG Storage Limited ("BGSL") natural gas storage assets in the United Kingdom.

As described in Note 2 to the accompanying financial statements, the Company adopted Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" ("Statement No. 142"), effective January 1, 2002. The Company's net income and earnings per share for the three months ended March 31, 2001, exclusive of goodwill, would have been \$167 million or \$0.50 per diluted share.

Net income (loss) and EPS include the following charges:

	Three Months Ended March 31,			
	2002		2001	
Charge	EPS	Charge	EPS	
(\$ in millions, except per share amounts)				
Impairment of communications assets(1).....	(44)	(0.11)	--	--
Loss on gas delivery commitment(2).....	(13)	(0.03)	--	--
Cumulative effect of change in accounting principle(3)	(234)	(0.64)	2	0.01
Special dividend(4).....	--	(0.23)	--	--

(1) The Company recognized an after-tax charge of \$44 million (\$64 million pre-tax) associated with certain communications assets, investments in unconsolidated affiliates and equipment. The pre-tax charge is included in Cost of Sales, Earnings (Losses) of Unconsolidated Affiliates and Other Expenses in the accompanying Condensed Consolidated Statements of Operations.

(2) The Company incurred a \$13 million after-tax (\$18 million pre-tax) charge associated with a commitment to deliver gas assumed in the acquisition of Northern Natural. The pre-tax charge is included in "Operating Revenues."

(3) Effective January 1, 2002, the Company adopted Statement No. 142, realizing an after-tax cumulative effect loss of approximately \$234 million. Effective January 1, 2001, the Company adopted Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended, realizing an after-tax cumulative effect

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

gain of approximately \$2 million.

- (4) The special dividend in 2002 relates to the conversion price embedded in the Series B Preferred Stock held by ChevronTexaco Corporation.

Operating income decreased \$232 million quarter-to-quarter due to reduced revenues which were not completely offset by reduced cost of sales, increased general and administrative expense and increased depreciation and amortization expense. The most significant revenue decrease was in the WEN segment, primarily due to lower power prices. Increased general and administration expense is reflective of the infrastructure required to support a larger and more diverse operation. Included in the first quarter 2002 general

48

and administrative expense is approximately \$2 million of costs associated with implementing the operating and support system for the DGC segment. Increased depreciation and amortization expense is associated with the expansion of Dynegy's depreciable asset base, primarily due to the acquisitions of Northern Natural and the BGSL natural gas storage assets.

Impacting Dynegy's consolidated results was the Company's earnings (loss) from investment in unconsolidated affiliates, which was approximately \$(11) million and \$32 million in the 2002 and 2001 periods, respectively. Variances period-to-period in these results primarily reflect the impact of the impairment of \$45 million of certain DGC segment investments resulting from unfavorable market conditions.

Interest expense totaled \$89 million for the three-month period ended March 31, 2002, compared to \$66 million for the equivalent 2001 period. The variance is primarily attributed to higher average principal balances in the 2002 period compared to the 2001 period, in addition to slight increases in average interest rates on borrowings.

Other income and expenses, net (including minority interest expense and accumulated distributions associated with trust preferred securities) totaled \$12 million in expense in the quarter ended March 31, 2002 compared with \$35 million in expense in the 2001 period. Variances period-to-period in these results primarily reflect the impact of more favorable foreign exchange results, increased interest income and the recognition of a dividend on the Series A Preferred Stock in Northern Natural in January 2002, partially offset by an increase in minority interest expense.

The Company reported an income tax benefit of \$20 million for the quarter ended March 31, 2002, compared to an income tax provision of \$89 million for the 2001 period. The effective rates approximated 61 percent and 37 percent in 2002 and 2001, respectively. The tax benefit in the 2002 period resulted from the combination of book income and losses in jurisdictions with varying tax rates and the realization of permanent differences. The difference from the effective rates and the statutory rate of 35 percent in the 2001 period results principally from permanent differences arising from the amortization of certain intangibles, book-tax basis differences and the effect of certain foreign equity investments and state income taxes.

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

WEN reported segment net income of \$11 million for the three-month period ended March 31, 2002, compared with net income of \$112 million in the 2001 quarter. The first quarter 2001 net income includes the \$2 million cumulative effect of a change in accounting principle described in Note 4 to the Condensed Consolidated Financial Statements. Dynegy's results of operations period-to-period were influenced by the following:

- . Reduced margins associated with generation as a result of lower megawatt hours generated reflecting lower market prices and milder weather conditions primarily in the West. The decline is partially offset as a result of price risk management activities that mitigated the impact of decreased market prices as compared to the comparable prior year period;
- . Continued weakness in commodity prices during the first quarter of 2002, and an overall decrease in commodity prices compared to the first quarter of 2001;
- . Milder weather conditions experienced during the first quarter of 2002 compared to the first quarter of 2001;
- . Improved Canadian and European margins due to increased volumes as a result of market share gains from the prior year. There were increased power volumes in Canada due to opening of the markets to competition and Enron's absence from the market. Natural gas volumes in Europe increased due to trading activity around the BGSL natural gas storage assets in the United Kingdom;
- . Incremental ChevronTexaco natural gas volumes associated with former Texaco's equity production;
- . Favorable variances in other income and expense related to foreign exchange gain and loss and increased interest income;
- . Decreased minority interest expense;
- . Increased general and administration expenses reflecting increased capital and overhead costs required to support a larger, more diverse base of operations;
- . Increased interest expense due to higher average borrowings; and
- . Increased depreciation due principally to the depreciation of the natural gas storage assets in the United Kingdom.

Total physical MW hours sold in the first quarter of 2002 increased to 210.0 million MW hours compared to 52.0 million MW hours in the first quarter of 2001. Total natural gas volumes sold in North America in the first quarter of 2002 totaled 13.0 billion cubic feet per day compared to 10.7 billion cubic feet per day during last year's first quarter. The increased volumes in both power and gas were a result of improved market liquidity, greater sales volumes and greater market origination. These increases were offset by decreased generation volumes, primarily in the West, as a result of milder weather conditions.

Three-Month Periods Ended March 31, 2002 and 2001

DMS reported net income of \$22 million in the first quarter of 2002 compared with net income of \$27 million in the first quarter of 2001. The following influenced results of operations period-to-period:

- . Lower natural gas and NGL prices resulting in a decline in processing plant margins; partially offset by,
- . Higher price realization resulting from marketing activities; and
- . Favorable operating expense variances.

Aggregate domestic NGL processing volumes totaled 92.1 thousand gross barrels per day in the first quarter of 2002 compared to 78.1 thousand gross barrels per day during the same period in 2001. This increase was primarily due to increased straddle volumes resulting from higher fractionation spreads compared to the first quarter of 2001. The average fractionation spread was \$1.30 for the three months ended March 31, 2002, compared to negative \$0.03 for the comparable 2001 period. NGL marketing volumes were lower period-over-period

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

reflecting the impact of seasonal winter weather during the first quarter of 2001.

Three-Month Periods Ended March 31, 2002 and 2001

The T&D segment reported net income of \$35 million in the first quarter of 2002 compared to \$25 million in the first quarter of 2001. The 2002 net income includes an \$18 million pre-tax (\$13 million after tax) charge associated with a gas delivery commitment that was assumed with the acquisition of Northern Natural. The T&D segment reflects two months of operating results from Northern Natural. The increase related to Northern Natural's results is partially offset

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

by a decrease in IP's results associated with decreased residential and commercial volumes due to lower weather driven demand and a downturn in economic conditions.

	-----	-----
Net Loss.....	\$ (315)	\$ (9)
	-----	-----

Three-Month Periods Ended March 31, 2002 and 2001

DGC's segment results reflect a \$315 million quarterly loss in the three-month period ended March 31, 2002 resulting from start-up costs associated with expansion of the Company's global communications business and vendor equipment problems which delayed anticipated revenues. This compares to a \$9 million quarterly loss in the three-month period ended March 31, 2001. The 2002 net loss includes the \$234 million cumulative effect of change in accounting principle (see Note 2 to the accompanying condensed consolidated financial statements) and impairment of communications assets, principally underutilized equipment and certain investments.

Dynegy is assessing alternatives with respect to its telecommunications business and has publicly expressed its intention to eliminate the losses associated with this segment by the end of 2002. Continued losses through 2002 would negatively impact the Company's cash flows and earnings and could require Dynegy to record additional impairment charges related to its telecommunications assets, of which there is approximately \$625 million recorded in Property, Plant and Equipment on the Condensed Consolidated Balance Sheets. As of March 31, 2002, Dynegy also had approximately \$270 million, or approximately \$195 million on a discounted basis, in long-term operating commitments relating to its telecommunications business.

Cash Flow Disclosures

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

The following table is a condensed version of the operating section of the Condensed Consolidated Statements of Cash Flows:

	Quarter Ended March 31,	
	2002	2001
	(\$ in millions)	
Operating Cash Flows:		
Net Income (Loss).....	\$ (247)	\$ 155
Net Non-Cash Items Included in Net Income.....	658	221
	411	376
Operating Cash Flow Before Changes in Working Capital.		
Changes in Working Capital.....	(158)	(102)
	\$ 253	\$ 274
Net Cash Provided by Operating Activities.....		

54

Operating Cash Flow. Cash flow from operating activities totaled \$253 million for the three-month period ended March 31, 2002, compared to \$274 million reported in the same 2001 period. The decrease in operating cash flow is reflective of the net loss and an unfavorable change in working capital, partially offset by higher non-cash add-backs such as charges related to the cumulative effect of a change in accounting principle, depreciation and amortization and earnings and losses from unconsolidated affiliates. The cumulative effect of a change in accounting principle is a non-cash charge as a result of adopting Statement No. 142 related to the impairment of goodwill for the DGC segment. The depreciation and amortization is higher due to a larger asset base. Changes in working capital had a negative impact on operating cash flow during the first quarter of 2002 due primarily to the timing of cash inflows and outflows related to trade accounts as follows:

- . Payments during the quarter for operational and overhead costs accrued at December 31, 2001;
- . Increases in receivables associated with the sale of emission allowances at the end of the winter season and the sale of NGL liquids inventories, as well as an increase in receivables for IP resulting from cooler weather late in the quarter; and
- . The accrual of the dividend on the Series A Preferred Stock in Northern Natural in January 2002; offset by
- . The non-cash expense associated with the recognition of the gas delivery obligation assumed in the acquisition of Northern Natural.

Capital Expenditures and Investing Activities. Funds used in investing activities in the first quarter of 2002 totaled \$412 million. Capital expenditures of \$398 million relate primarily to the construction and improvement of power generation assets and investments associated with technology infrastructure. The business acquisition cash outflows of \$20 million relate to the acquisition of Northern Natural, net of cash acquired.

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

Capital expenditures of \$1.3 billion in the three-month period ended March 31, 2001 relate to the acquisition of the Central Hudson power generation facilities in the Northeast and to the construction of power generation assets, betterments of existing facilities related to the T&D segment and investments associated with technology infrastructure. Business acquisitions for the three-month period ended March 31, 2001 included acquisition costs related to the acquisition of iaxis, Limited.

Financing Activities. Net cash provided by financing activities was \$409 million during the first quarter of 2002. Dynegy received \$205 million in cash proceeds relative to ChevronTexaco's January 2002 purchase of approximately 10.4 million shares of Class B common stock. Capital stock proceeds also include \$21 million of cash inflow associated with cash received from senior management associated with a December 2001 private placement of equity. In March 2002, dividends of \$21 million were paid to the holders of Class A common stock and \$7 million was paid to the holder of Class B common stock. In March 2002, Illinova Corporation, a wholly owned subsidiary of Dynegy and the parent company of IP, consummated a tender offer pursuant to which it paid \$28 million in cash for shares of IP's preferred stock. Net proceeds of long-term debt from the February 2002 issuance of 8.75 percent senior notes due February 2012 were \$496 million, and payments of IP's transitional funding notes totaled \$22 million during the quarter. Also during the first quarter of 2002, proceeds from lease arrangements of approximately \$34 million were used in the construction of generation facilities and the U.S. fiber optic network. Finally, proceeds related to borrowings entered into by ABG Gas Supply totaled \$36 million and repayments totaled \$11 million. Additionally, Dynegy repaid commercial paper and borrowings under revolving credit lines for DHI and IP of \$293 million.

55

UNCERTAINTY OF FORWARD-LOOKING STATEMENTS AND INFORMATION

This Quarterly Report on Form 10-Q includes statements reflecting assumptions, expectations, projections, intentions or beliefs about future events that are intended as "forward-looking statements" under the Private Securities Litigation Reform Act of 1995. You can identify these statements by the fact that they do not relate strictly to historical or current facts. They use words such as "anticipate," "estimate," "project," "forecast," "may," "will," "should," "expect" and other words of similar meaning. In particular, these include, but are not limited to, statements relating to the following:

- . Projected operating or financial results;
- . Expectations regarding capital expenditures, dividends and other payments;
- . Pending or recent acquisitions such as the acquisitions of Northern Natural and BG Storage Limited, including the anticipated closing date, expected cost savings or synergies and the accretive or dilutive impact of an acquisition on earnings;
- . Expectations regarding transaction volume and liquidity in wholesale energy markets in North America and Europe;
- . The Company's beliefs and assumptions relating to trade credit in the wholesale energy market and its liquidity position, including its ability to meet its obligations in the event of a downgrade in its credit ratings;
- . The Company's ability to execute additional capital enhancing transactions such as asset sales, joint ventures or financings to enhance its liquidity position;

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

- . Beliefs or assumptions about the outlook for deregulation of retail and wholesale energy markets in North America and Europe and anticipated business developments in such markets;
- . The Company's ability to effectively compete for market share with industry participants;
- . Beliefs about the outcome of legal and administrative proceedings, including matters involving Enron, the California power market, shareholder class action lawsuits and environmental matters as well as the investigations surrounding Project Alpha and CMS Energy trades, respectively;
- . The expected commencement date for commercial operations for new power plants; and
- . Anticipated developments with respect to demand for broadband services and related applications and the Company's strategic plans in connection therewith, including the Company's ability to effectively execute DGC's business plan, meet forecasted revenues and manage functionality and operating costs of its network.

Any or all of Dynegy's forward-looking statements may turn out to be wrong. They can be affected by inaccurate assumptions or by known or unknown risks and uncertainties, including the following:

- . The timing and extent of changes in commodity prices for energy, particularly natural gas, electricity and NGLs, or communications products or services;
- . The timing and extent of deregulation of energy markets in North America and Europe and the rules and regulations adopted on a transitional basis in such markets;
- . The condition of the capital markets generally, which will be affected by interest rates, foreign currency fluctuations and general economic conditions, and Dynegy's financial condition, including DHI's ability to maintain its investment grade credit ratings;
- . Developments in the California power markets, including, but not limited to, governmental intervention, deterioration in the financial condition of our counterparties, default on receivables due and adverse results in current or future litigation;

56

- . The effectiveness of Dynegy's risk-management policies and procedures and the ability of Dynegy's counterparties to satisfy their financial commitments;
- . The liquidity and competitiveness of wholesale trading markets for energy commodities, including the impact of electronic or online trading in these markets;
- . The direct or indirect effects on our business resulting from the financial difficulties of Enron, or other competitors of Dynegy, including, but not limited to, their effects on liquidity in the trading and power industry, and its effects on the capital markets views of the

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

energy or trading industry and our ability to access the capital markets on the same favorable terms as in the past;

- . Operational factors affecting the start up or ongoing commercial operations of Dynegy's power generation or midstream natural gas facilities, including catastrophic weather related damage, unscheduled outages or repairs, unanticipated changes in fuel costs or availability of fuel emission credits, the unavailability of gas transportation, the unavailability of electric transmission service or workforce issues;
- . The cost of borrowing, availability of trade credit and other factors affecting Dynegy's financing activities including issues described in this Form 10-Q;
- . The direct or indirect effects on our business of a lowering of our credit rating (or actions we may take in response to changing credit ratings criteria), including, increased collateral requirements to execute our business plan, demands for increased collateral by our counterparties, refusal by our counterparties to enter into transactions with us and our inability to obtain credit or capital in amounts or on terms favorable to us;
- . Uncertainties regarding the development of, and competition within, the market for broadband services in North America and Europe, including risks relating to technologies and standards, regulation, capital costs, the timing and amount of customer demand for high bandwidth applications and the effect of global market conditions in the telecommunications business on customers and equipment service providers;
- . Cost and other effects of legal and administrative proceedings, settlements, investigations and claims, including legal proceedings related to the terminated merger with Enron, the California power market, shareholder claims and environmental liabilities that may not be covered by indemnity or insurance, as well as the SEC and CFTC investigation surrounding Project Alpha and simultaneous buy and sell trades, respectively;
- . Other North American or European regulatory or legislative developments that affect the demand for energy generally, increase the environmental compliance cost for Dynegy's power generation or midstream gas facilities or impose liabilities on the owners of such facilities; and
- . General political conditions, including any extended period of war or conflict involving North America or Europe.

Many of these factors will be important in determining Dynegy's actual future results. Consequently, no forward-looking statement can be guaranteed. Dynegy's actual future results may vary materially from those expressed or implied in any forward-looking statements.

All of Dynegy's forward-looking statements, whether written or oral, are expressly qualified by these cautionary statements and any other cautionary statements that may accompany such forward-looking statements. In addition, Dynegy disclaims any obligation to update any forward-looking statements to reflect events or circumstances after the date of this report.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Quantitative and Qualitative Disclosures About Market Risk are set forth in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" herein.

DYNEGY INC.

PART II. OTHER INFORMATION

ITEM 1--LEGAL PROCEEDINGS

See Note 9 to the accompanying financial statements for discussion of material recent developments in the Company's material legal proceedings.

ITEM 6--EXHIBITS AND REPORTS ON FORM 8-K

(a) The following instruments and documents are included as exhibits to this Form 10-Q/A:

- *10.1 Natural Gas Purchase and Sale Agreement among Chevron U.S.A. Inc., Texaco Exploration and Production Inc., Texaco Natural Gas Inc. and Dynegy Marketing and Trade, effective as of March 1, 2002.
- **10.2 Security Agreement among Chevron U.S.A. Inc., Texaco Exploration and Production Inc., Texaco Natural Gas Inc. and Dynegy Marketing and Trade, effective as March 1, 2002.
- +99.1 Certification Pursuant to 18 United States Code Section 1350, As Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- +99.2 Certification Pursuant to 18 United States Code Section 1350, As Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

* Exhibit omits certain information that the Company has filed separately with the SEC in connection with a confidential request pursuant to Rule 24b-2 promulgated under the Securities Exchange Act of 1934, as amended.

** Previously filed.

+ Pursuant to Securities and Exchange Commission Release No. 33-8212, this certification will be treated as "accompanying" this Amendment No. 1 and not "filed" as part of such report for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or the Exchange Act, or otherwise subject to the liability of Section 18 of the Exchange Act and this certification will not be deemed to be incorporated by reference into any filing under the Securities Act of 1933, as amended, or the Exchange Act.

(b) Reports on Form 8-K of Dynegy Inc. for the first quarter of 2002.

1. During the quarter ended March 31, 2002, the Company filed a Current Report on Form 8-K dated January 3, 2002. Items 5 and 7 were reported and no financial statements were filed.
2. During the quarter ended March 31, 2002, the Company filed a Current Report on Form 8-K dated January 31, 2002. Items 5, 7 and 9 were reported and no financial statements were filed.
3. During the quarter ended March 31, 2002, the Company filed a Current Report

Edgar Filing: DYNEGY INC /IL/ - Form 10-Q/A

on Form 8-K dated March 15, 2002. Items 4 and 7 were reported and no financial statements were filed.

58

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
