**ChipMOS REPORTS THIRD QUARTER 2004 RESULTS**

**Hsinchu, Taiwan, November 11, 2004** ChipMOS TECHNOLOGIES (Bermuda) LTD. ( ChipMOS or the Company ) (Nasdaq: IMOS) today reported unaudited consolidated financial results for the third quarter ended September 30, 2004.

Revenue for the third quarter of 2004 was NT\$3,944 million or US\$116 million, an increase of 61% from NT\$2,438 million or US\$72 million for the same period in 2003 and a decrease of 9% from NT\$4,323 million or US\$127 million for the second quarter of 2004. (The above and following numbers were based on an exchange rate of NT\$33.98 against US\$1.00 as of Sep. 30, 2004.)

On a consolidated basis, the gross margin for the third quarter of 2004 was 26% compared to 20% for the same period in 2003 and 27% for the second quarter of 2004. Excluding the effects of consolidating CHANTEK ELECTRONIC CO., LTD. ( Chantek ), gross margin was 33% for the third quarter of 2004 compared to 34% for the second quarter of 2004. Net income for the third quarter of 2004 was NT\$388 million or US\$11 million, and NT\$5.91 or US\$0.17 per common share, compared to a net income of NT\$174 million or US\$5 million, and NT\$2.95 or US\$0.09 per common share, for the same period in 2003 and net income of NT\$642 million or US\$19 million, and NT\$10.72 or US\$0.32 per common share, for the second quarter of 2004.

ChipMOS third quarter 2004 consolidated results include the financial results of ChipMOS TECHNOLOGIES INC., ChipMOS Japan Inc., ChipMOS U.S.A., Inc., ChipMOS Far East Limited, ChipMOS Logic TECHNOLOGIES INC., Advanced Micro Chip Technology Co., Ltd., Chantek, Modern Mind Technology Limited and its wholly-owned subsidiary ChipMOS TECHNOLOGIES (Shanghai) LTD., and ThaiLin Semiconductor Corp.

S.J. Cheng, Chairman and Chief Executive Officer of ChipMOS, said, Our impressive results in the third quarter were primarily due to ChipMOS focus on growing end markets, combined with our strong geographic presence and capacity agreements with the majority of our major customers. Capacity was again constrained in testing services for memory semiconductors, in particular DRAM and flash memory semiconductors. Demand in our driver IC business for testing and assembly services for LCD and other flat-panel display driver semiconductors was, however, slightly lower in the third quarter compared to the prior second quarter. We believe this is consistent with broader market trends and expect the inventory to return to more normal levels during the fourth quarter.

During the third quarter, we continued to focus on several strategic initiatives to drive our long-term growth. In August 2004, we agreed to acquire all of First International Computer Testing and Assembly Technology, Inc. s ( FICTA ) testing and assembly assets from its Hsinchu Science Park, Hsinchu, Taiwan operation. This acquisition closed in the beginning of November and increased our capacity for the assembly and testing of memory semiconductors by approximately 12 million pieces per month. We have already integrated these wafer testers, final testers and assembly equipment for memory products into our operations, in line with our proven track record of successfully acquiring and transferring equipment into our operations to support customer demand in a timely and cost-effective manner.

S.K. Chen, Chief Financial Officer of ChipMOS, said, "From an operations standpoint, we are pleased with our results. Our gross margin before taking into account the effect of the consolidation of Chantek was strong at 33% primarily due to higher sales volumes and our ability to more efficiently leverage our cost structure. We were able to keep our margin and net income in line with our previous guidance, while turning away a greater amount of lower margin turnkey business. We also recently completed a US\$85 million offering of convertible senior notes, allowing us to make the ongoing strategic investments in our operations in Mainland China and in the advanced technologies that differentiate ChipMOS. Based on industry forecasts and customer discussions, we believe our operations in China will contribute an even greater percentage of our revenues over the next few years given the continued rapid economic expansion in Asia from a manufacturing and end-market standpoint."

S.J. Cheng, concluded, "We are encouraged by our business fundamentals despite higher inventory levels and forecasts that the semiconductor industry will remain challenging. We are executing on our growth plan by leveraging our technology expertise and successfully partnering with the world's leading semiconductor companies to support their product roadmaps. Most recently, we entered into an agreement with Samsung Electronics Co., Ltd. to provide assembly services for Samsung Electronics' 60ball Fine-pitch BGA packages for its DDR II 512Mb DRAM products. We continue to successfully expand our customer base and engagements with existing customers because of the strategic investments we have made in advanced technologies, our geographic strength, the quality of our engineers and the commitment of our entire organization to ensuring the success of all customer programs. In terms of the fourth quarter of 2004, specifically, we currently expect net revenues will be approximately flat to up 3 percent sequentially compared to the third quarter of 2004. Our higher than industry average guidance reflects the strength in our operations and our ability to execute on our business model, while also managing our operating costs."

#### **Investor Conference Call / Webcast Details**

ChipMOS will review detailed third quarter 2004 results on Wednesday, November 10, 2004 at 7:00PM EST in New York (8:00AM, November 11, Taiwan time). The conference call-in number is 973-582-2706. A live webcast of the conference call will be available at ChipMOS' website at [www.chipmos.com.tw](http://www.chipmos.com.tw). A replay of the call will be available from 10:00PM EST in New York on November 10 through November 18 by telephone at (973) 341-3080 and at ChipMOS' website at <http://www.chipmos.com.tw>. The passcode for both the live call and the replay is 5245523.

#### **About ChipMOS TECHNOLOGIES (Bermuda) LTD.:**

ChipMOS ([www.chipmos.com.tw](http://www.chipmos.com.tw)) is a leading independent provider of semiconductor testing and assembly services to customers in Taiwan, Japan, and the U.S. With advanced facilities in Hsinchu and Southern Taiwan Science Parks in Taiwan and Shanghai, ChipMOS and its subsidiaries provide testing and assembly services to a broad range of customers, including leading fabless semiconductor companies, integrated device manufacturers and independent semiconductor foundries.

#### **Forward-Looking Statements**

*Certain statements contained in this announcement may be viewed as forward-looking statements within the meaning of Section 27A of the U.S. Securities Act of 1933, as amended, and Section 21E of the U.S. Securities Exchange Act of 1934, as amended. Such forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause the actual performance, financial condition or results of operations of the Company to be materially different from any future performance, financial condition or results of operations implied by such forward-looking statements. Further information regarding these risks, uncertainties and other factors is included in the Company's most recent Annual Report on Form 20-F filed with the U.S. Securities and Exchange Commission (the "SEC") and in the Company's other filings with the SEC.*
