Explanatory Note

Millennium Chemicals Inc. (the Company) filed Amendment No. 2 to its Annual Report on Form 10-K/A for the year ended December 31, 2003 (Amendment No. 2) on August 9, 2004 to reflect the restatement of its financial statements for the years ended December 31, 2001 through 2003. That restatement (the August 2004 Restatement) corrected errors in the computation of deferred income taxes relating to the Company's investment in Equistar Chemicals, LP (Equistar), a partnership in which the Company owns a 29.5% interest. The August 2004 Restatement decreased the Company's liability for deferred income taxes and Shareholders' deficit at December 31, 2003 and 2002 by \$15 million. The August 2004 Restatement similarly decreased liabilities for deferred income taxes and increased Shareholders' equity at December 31, 2001 and 2000 by \$15 million. The August 2004 Restatement did not affect the Company's cash flow or operating income in any year. For more information on the effect of the August 2004 Restatement for each period presented see Note 17 to the Consolidated Financial Statements.

The Company is filing this Amendment No. 1 to its Quarterly Report on Form 10-Q/A for the period ended September 30, 2004 (Amendment No. 1) to restate its financial statements for the third quarter of 2004. Included herein are restated consolidated statements of operations for the three and nine month periods ended September 30, 2004 and 2003, restated statements of cash flows for the nine months ended September 30, 2004 and 2003 and restated consolidated balance sheets as of September 30, 2004 and December 31, 2003. This restatement (the February 2005 Restatement) corrects errors made in recording estimated liabilities for future environmental remediation spending associated with existing obligations, primarily related to the Kalamazoo River Superfund Site, that were not recorded previously. The February 2005 Restatement increased environmental remediation liabilities by \$52 million, decreased deferred tax liabilities by \$17 million, increased Accumulated deficit by \$35 million as of September 30, 2004, and decreased net income by \$1 million, or \$0.02 per share, and \$4 million, or \$0.06 per share, respectively, for the three and nine month periods ended September 30, 2004, and increased net loss by \$2 million, or \$0.03 per share, in the nine month period ended September 30, 2003. The Company also has made certain adjustments to the financial statements for the periods presented that previously had been considered immaterial to those financial statements. For more information on the effect of the February 2005 Restatement for each period presented, see Note 18 to the Consolidated Financial Statements.

Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-Q/A

The Company concluded, in January 2005, that it would restate its financial statements for the three and nine months ended September 30, 2004 because of the errors that are corrected in the February 2005 Restatement. The conclusion was reached as a result of an analysis of environmental remediation liabilities conducted in connection with Lyondell Chemical Company's (Lyondell) acquisition of the Company on November 30, 2004, and the preparation of the financial statements of Lyondell and the Company as of and for the year ended December 31, 2004. These errors were reported by the Company on February 1, 2005, in a press release, a copy of which was filed as an exhibit to a Current Report on Form 8-K filed on February 2, 2005.

Table of Contents

A discussion of the February 2005 Restatement is set forth in Note 18 to the Consolidated Financial Statements included in this Amendment No. 1. Changes also have been made to the following items in this Amendment No. 1 as a result of the February 2005 Restatement.

Item 1, Financial Statements has been revised to reflect the February 2005 Restatement;

Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations has been revised to reflect the February 2005 Restatement; and

Item 4, Controls and Procedures has been updated in connection with the errors discussed above.

On November 30, 2004, the Company was acquired by Lyondell. As a result, the Company is a wholly owned subsidiary of Lyondell. This Amendment No. 1 does not reflect events, including Lyondell's November 30, 2004 acquisition of the Company, that have occurred after November 9, 2004, the date the Quarterly Report on Form 10-Q was originally filed. Information with respect to events that have occurred after November 9, 2004, has been or will be set forth, as appropriate, in the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. Any references to facts and circumstances at a current date refer to such facts and circumstances as of such original filing date. This Amendment No. 1 consists of relevant portions of the Company's prior filing of the Quarterly Report on Form 10-Q for the quarter ended September 30, 2004 as prepared by the Company's prior management. The Company is under new management following the acquisition of the Company by Lyondell on November 30, 2004.

The Company is also filing with the Securities and Exchange Commission, amendments to its Annual Report on Form 10-K/A for the year ended December 31, 2003, and is also filing, as soon as practicable, amendments to its Quarterly Reports on Form 10-Q/A for each of the three months ended March 31 and June 30, 2004, to reflect changes required as a result of the February 2005 Restatement.

The only changes made to the prior disclosures in this Amendment No. 1 are those that were determined necessary by the Company's new management as a result of the February 2005 Restatement. The Company has provided and will continue to provide current information as appropriate through filings on Form 8-K, as well as through the new filings on Form 10-Q referred to above. Also, the Company's new management is preparing the Company's Annual Report on Form 10-K for the year ended December 31, 2004, which, in many respects, may update and supersede the information included in this Amendment No. 1 and the Company's prior periodic reports, including regarding environmental liabilities.

In this Amendment No. 1, the terms our, we, and the Company refer to Millennium Chemicals Inc. and its consolidated subsidiaries, except as the context otherwise requires.

Non-GAAP Financial Measures

Financial measures based on accounting principles generally accepted in the United States of America (GAAP) are commonly referred to as GAAP financial measures. A non-GAAP financial measure is generally defined by the Securities and Exchange Commission as one that purports to measure historical or future financial performance, financial position, or cash flows, but excludes or includes amounts that would not be so adjusted in the most comparable GAAP measure. From time to time the Company discloses non-GAAP financial measures, primarily EBITDA. EBITDA represents income from operations before interest, taxes, depreciation and amortization, other income items, equity earnings, and the cumulative effect of accounting changes. EBITDA is a key measure used by the banking and investing communities in their evaluation

Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-Q/A

of economic performance. Accordingly, management believes that disclosure of EBITDA provides useful information to investors because it is frequently cited by financial analysts in evaluating companies' performance. EBITDA is not a measure of operating performance computed in accordance with GAAP and should not be considered as a substitute for GAAP measures. Additionally, these measures may not be comparable to similarly named measures of other companies.

The Company also periodically reports adjusted net or operating income (loss) or adjusted EBITDA, excluding designated items. Management believes that excluding these items generally helps investors to compare operating performance between two periods. Such adjusted data are not reported without an explanation of the items that are excluded.

MILLENNIUM CHEMICALS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(Dollars in millions, except share and per share data)

Note 1 Basis of Presentation

Pursuant to the rules and regulations of the Securities and Exchange Commission, the accompanying unaudited interim consolidated financial statements do not include all of the disclosures normally required by accounting principles generally accepted in the United States of America for complete financial statements. The accompanying unaudited consolidated financial statements should be read in conjunction with the financial statements and disclosures included in the Annual Report on Form 10-K of Millennium Chemicals Inc. (the Company) for the year ended December 31, 2003, as amended by Amendment No. 5 on Form 10-K/A filed with the Securities and Exchange Commission on February 14, 2005. In the opinion of management, all adjustments considered necessary to present fairly the financial position and results of operations for the interim periods are included in the accompanying unaudited consolidated financial statements. Certain prior year balances have been reclassified to conform with the current year presentation.

The unaudited consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries. Minority interest represents the minority ownership of the Company's Brazilian subsidiary and the La Porte Methanol Company. All significant intercompany accounts and transactions have been eliminated. The Company's 29.5% investment in Equistar Chemicals, LP (Equistar), a joint venture between the Company and Lyondell Chemical Company (Lyondell), is accounted for by the equity method; accordingly, the Company's share of Equistar's pre-tax net income or loss is included in net income or loss.

Note 2 Agreement for a Stock-for-Stock Business Combination

On March 29, 2004, Lyondell and the Company announced that their respective Boards of Directors had approved, and the companies had executed, an agreement and plan of merger. The proposed transaction is intended to qualify as a reorganization for U.S. federal income tax purposes, in which Millennium shareholders generally will not recognize gain or loss, other than any gain or loss recognized on the receipt of cash for fractional shares.

The proposed transaction is subject to approval by both companies' shareholders and other customary conditions. The Company and Lyondell have obtained amendments to the Company's and Lyondell's respective bank credit agreements and Lyondell's accounts receivable sales facility to permit the transaction. The Company and Lyondell will each hold special meetings of shareholders on November 30, 2004 to consider and vote on the proposed transaction. The transaction is expected to close after the close of business on November 30, 2004; however, there can be no assurance that the transaction will close. The transaction involves the merger of Millennium Subsidiary LLC, a newly created subsidiary of the Company, into the Company, in which the Company's Common Stock now held by its public shareholders will be converted into common stock of Lyondell, and the Company's preferred stock to be issued to Lyondell immediately before the merger will be converted into common stock of the Company, as the surviving entity in the merger. As a result of the transaction, the Company will become a wholly-owned subsidiary of Lyondell. After the closing of the transaction, the combined company will be called Lyondell Chemical Company and will be headquartered in Houston, Texas.

Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-Q/A

The Company's shareholders will receive between 0.95 and 1.05 shares of Lyondell common stock for each share of the Company's Common Stock, depending on the average of the volume-weighted average price of Lyondell shares for the 20 trading days ending on the third trading day before the consummation of the transaction. The Company's shareholders will receive 0.95 shares of Lyondell common stock if the average price of Lyondell shares during the period is \$20.50 per share or greater, and 1.05 shares if it is \$16.50 per share or less. If the average price is between these two amounts, the exchange ratio will vary proportionately. The shares of Lyondell common stock received in exchange for Company stock will be entitled to receive the same cash dividend as existing outstanding Lyondell shares. The proposed transaction is scheduled to close after the close of business on November 30, 2004, after the record date of Lyondell's regular fourth quarter dividend, and therefore the Company's shareholders will not receive this dividend. As of October 1, 2004, the Company's 4.00% convertible senior debentures (the 4.00% Convertible Senior Debentures) are convertible at a conversion price of approximately \$13.63 per share of the Company's Common Stock. If any of the 4.00% Convertible Senior Debentures are converted prior to the consummation of the proposed transaction, the shares of Company Common Stock received upon conversion of such debentures will be exchanged for Lyondell common stock according to the ratio set forth above. If not exchanged prior to the closing of the proposed transaction, the 4.00% Convertible Senior Debentures will be convertible into Lyondell common stock in accordance with the terms of the convertible debenture indenture following the closing of the transaction.

Table of Contents

MILLENNIUM CHEMICALS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

(Dollars in millions, except share and per share data)

- (a) Approximately 286 and 284 shares of common stock issuable for options, awards and shares held in trust for certain employee benefit plans for the three months and nine months ended September 30, 2003, respectively, were excluded because the effect would be antidilutive.
- (b) Approximately 11,004 shares of common stock issuable for the conversion of the 4.00% Convertible Senior Debentures for the nine month period ended September 30, 2004 were excluded because the effect would be antidilutive due to the income adjustment to add back interest (net of income taxes) for purposes of calculating diluted income per share.

Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation (SFAS No. 123), as amended by SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure, encourages a fair value based method of accounting for employee stock options and similar equity instruments, which generally would result in the recording of additional compensation expense in the Company's financial statements. SFAS No. 123, as amended, also allows the Company to continue to account for stock-based employee compensation using the intrinsic value for equity instruments under Accounting Principles Board Opinion No. 25 (APB Opinion No. 25). The Company has elected to account for such instruments using APB Opinion No. 25 and related interpretations, and thus has adopted the disclosure-only provisions of SFAS No. 123, as amended. Accordingly, no compensation cost has been recognized for the stock option plans in the accompanying financial statements as all options granted had an exercise price equal to the market value of the underlying Common Stock on the date of grant.

Disclosure on a pro forma basis of net income (loss) and related per-share amounts as if the Company had applied the fair value recognition provisions of SFAS No. 123, as amended, to stock-based employee compensation is omitted because the pro forma effect on net income (loss) is insignificant.

Note 4 Recent Accounting Developments

On January 1, 2003, the Company adopted SFAS No. 143, Accounting for Asset Retirement Obligations (SFAS No. 143). SFAS No. 143 applies to legal obligations associated with the retirement of long-lived assets. This standard requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred and the associated asset retirement costs be capitalized as part of the carrying amount of the long-lived asset. Accretion expense and depreciation expense related to the liability and capitalized asset retirement costs, respectively, are recorded in subsequent periods. The Company's asset retirement obligations arise from activities associated with the eventual remediation of sites used for landfills and mining and include estimated liabilities for closure, restoration, and post-closure care. The Company is not required to restrict, and has not restricted, any Company assets for purposes of settling these obligations. As these liabilities are settled, a gain or loss is recognized for any difference between the settlement amount and the liability recorded. The amount of the asset retirement obligations was \$12 and \$13 at each of September 30, 2004 and December 31, 2003, respectively. The Company reported an after-tax transition charge of \$1 in the first quarter of 2003 as the cumulative effect of this accounting change. The impact of adoption was to increase the Company's reported assets and liabilities by \$2 and \$3, respectively.

In December 2003, the Financial Accounting Standards Board (FASB) issued revised FASB Interpretation No. 46, Consolidation of Variable Interest Entities, an interpretation of Accounting Research Bulletin No. 51, Consolidated Financial Statements (FIN 46R). FIN 46R requires the

Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-Q/A

assets, liabilities, and results of operations of a variable interest entity (VIE) to be consolidated in the financial statements of the enterprise considered to be the primary beneficiary of that entity. The Company evaluated material relationships with certain entities that were considered potential VIEs. The Company concluded, with one possible exception discussed below, that those entities are not VIEs or the Company is not the primary beneficiary of the VIE. As such, in accordance with FIN 46R, the Company is not required to consolidate those entities.

The Company evaluated its long-term obligations with one entity that may be a VIE. The Company has no equity interest in this entity and has confirmed that the entity is consolidated by an equity owner. The Company has not been able to obtain the financial information from the entity necessary to determine whether the Company is the primary beneficiary of the entity. Management of the entity cited confidentiality considerations with regard to the decision not to provide the Company with certain financial information. The Company pays approximately \$3 in plant and equipment rental charges on an annual basis to this entity.

In March 2004, the Emerging Issues Task Force (EITF) of the FASB issued EITF Issue No. 03-6, Participating Securities and the Two-Class Method under FASB Statement No. 128, Earnings per Share (EITF 03-6). EITF 03-6 addresses a number of questions regarding the computation of earnings per share by companies that have issued securities other than common stock that contractually entitle the holder to participate in

Table of Contents**MILLENNIUM CHEMICALS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)***(Dollars in millions, except share and per share data)*

dividends and earnings of the company when, and if, it declares dividends on its common stock. EITF 03-6 became effective for periods beginning after March 31, 2004. EITF 03-6 had no impact on the Company's financial statements, as the Company has not issued securities for which EITF 03-6 would apply.

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) was signed into law on December 8, 2003. In January 2004, the FASB issued FASB Staff Position (FSP) No. FAS 106-1, Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (FSP No. FAS 106-1), which permitted a sponsor of a postretirement healthcare plan that provides a prescription drug benefit to make a one-time election to defer recognition and accounting for the effects of the Act and the disclosures related to its plans as required by SFAS No. 132 (Revised 2003), Employers' Disclosures about Pensions and Other Postretirement Benefits until the FASB developed and issued authoritative guidance on accounting for the Federal subsidies provided by the Act. The Act introduced a prescription drug benefit under Medicare (Medicare Part D) as well as a Federal subsidy to sponsors of retiree healthcare benefit plans that provide a medical benefit that is at least actuarially equivalent to Medicare Part D. The Company elected to make the one-time deferral. On May 19, 2004, the FASB issued FSP No. FAS 106-2 of the same title, which provided final guidance on the accounting for subsidies under the Act and became effective for the Company's third quarter financial report ending September 30, 2004. The effects of the Act were not significant and will be reflected in its next measurement of plan obligations as required by SFAS No. 106, Employers' Accounting for Postretirement Benefits Other Than Pensions. This measurement of plan obligations will occur on the earlier of December 31, 2004 or the effective date of the announced stock-for-stock business combination with Lyondell. See Note 2 regarding the announced stock-for-stock business combination.

In September 2004, the EITF issued EITF 04-8, The Effect of Contingently Convertible Debt on Diluted Earnings per Share. Contingently convertible debt instruments are financial instruments that are generally convertible into common shares of the issuer after the common stock price has exceeded a predetermined threshold for a specified time period. Prior to the issuance of EITF 04-8, companies were allowed to exclude the potentially dilutive effect of the conversion feature from diluted earnings per share until the market price contingency was met. EITF 04-8 will require companies to include the impact of contingently convertible debt in their diluted earnings per share computation regardless of whether the market trigger has been reached. EITF 04-8 is expected to be effective for periods ending after December 15, 2004. Diluted earnings per share for prior periods must be retroactively restated to conform to EITF 04-8. EITF 04-8 will have no impact on the Company's financial statements as the shares of common stock that would be issued upon conversion of the Company's 4.00% Convertible Senior Debentures are already included in the Company's diluted earnings per share computation when not antidilutive.

Note 5 Asset Impairment Charges

In the three months and nine months ended September 30, 2004, the Company recorded asset impairment charges of \$3 and \$11, respectively, primarily related to the write-off of expenditures for property, plant and equipment at the Company's Le Havre, France titanium dioxide (TiO₂) manufacturing plant. In the fourth quarter of 2003, the carrying value of the property, plant and equipment at this plant was determined to be impaired, and a charge was required to write down the basis in those assets to zero. Capital expenditures at this plant for the three months and nine months ended September 30, 2004 were capitalized as property, plant and equipment and then immediately written off as asset impairment charges as a result of evaluating those assets for impairment under the guidance of SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (SFAS No. 144). Because the basis of all of the property, plant and equipment for the Le Havre, France plant was written down to zero, no depreciation expense for this plant was recorded in manufacturing and other costs of sales for the three months and nine months ended September 30, 2004.

Note 6 Reorganization and Office Closure Costs

On July 21, 2003, the Company announced that it would implement a program to reduce costs. This program included a reduction of approximately 5% in the number of the Company's employees worldwide. The Company closed its executive offices in Red Bank, New Jersey, effective September 1, 2003, and relocated its headquarters to Hunt Valley, Maryland, where the Company had existing administrative offices. In addition, the Company announced the suspension of payment of dividends on its Common Stock.

The Company has recorded cumulative charges related to the program of \$21 (including \$1 and \$3 for the three months and nine months ended September 30, 2004, respectively), of which \$20 was for severance-related costs and \$1 was for contractual commitments for ongoing lease costs, net of expected sublease income, associated with the closure of the Red Bank, New Jersey office for the remaining term of the lease agreement (Red Bank Office lease costs). All

Table of Contents**MILLENNIUM CHEMICALS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)***(Dollars in millions, except share and per share data)*

costs associated with this program are accounted for in accordance with SFAS No. 112, Employer's Accounting for Postemployment Benefits or SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities, as appropriate. Cumulative cash payments of \$24 for the implementation of this program, of which \$23 were for severance-related costs and \$1 was for Red Bank Office lease costs, were made through September 30, 2004, including \$1 and \$10 in the three months and nine months ended September 30, 2004, respectively. Substantially all of the remainder of the cash payments relating to this program, which are estimated to be approximately \$3, will be disbursed during the next several quarters. No significant charges associated with this program are expected in future periods. Accrued liabilities associated with this program and included in Accrued expenses and other liabilities were \$2 at September 30, 2004. The cumulative charges of \$21 associated with the cost reduction program are less than the cumulative cash payments of \$24 because some of the cash payments made under the program, primarily for retirement benefits, were related to expenses and liabilities that were recorded through the normal course of business in periods prior to the implementation of this program in mid-2003.

Note 7 European Receivables Securitization Program

From March 2002 until November 2003, the Company had been transferring its interest in certain European trade receivables to an unaffiliated third party as its basis for issuing commercial paper under a revolving securitization arrangement (annually renewable for a maximum of five years on April 30 of each year at the option of the third party) with maximum availability of 70 million *euro*, which was treated, in part, as a sale under accounting principles generally accepted in the United States of America. In November 2003, the Company terminated this securitization arrangement and there were no balances outstanding at September 30, 2004 or December 31, 2003. The cumulative gross proceeds from this securitization arrangement through September 30, 2003 were \$253. Cash flows from this securitization arrangement were reflected as operating activities in the Consolidated Statement of Cash Flows. The aggregate loss on sales associated with this arrangement was \$1 and \$2 for the three months and nine months ended September 30, 2003, respectively, and was included in Selling, development and administrative (S,D&A) expense. Servicing liabilities associated with the transaction were insignificant.

Note 8 Inventories

Inventories are stated at the lower of cost or market value.

Total long-term debt								\$ 1,401	\$ 1,461

On November 25, 2003, the Company received approximately \$125 in gross proceeds and, on December 2, 2003, received an additional \$25 in gross proceeds from the sale by Millennium Chemicals Inc. (Millennium Chemicals) of \$150 aggregate principal amount of the 4.00% Convertible Senior Debentures, which are guaranteed by Millennium America Inc. (Millennium America), a wholly-owned indirect subsidiary of Millennium Chemicals. The gross proceeds of the sale were used to repay all of the \$47 of outstanding borrowings at that time under the term loan portion (the Term Loan) of the Company's five-year credit agreement expiring June 18, 2006, as amended, (the Credit Agreement) and \$103 of outstanding borrowings under the revolving loan portion (the Revolving Loans) of its Credit Agreement, which currently has a maximum availability of \$150. The Company used \$4 of cash to pay the fees relating to the sale of the 4.00% Convertible Senior Debentures. Under the terms of the agreements relating to the sale of the 4.00% Convertible Senior Debentures, Millennium Chemicals and Millennium America agreed to: (1) file with the Securities and Exchange Commission on or before March 24, 2004 a registration statement covering the resale of the debentures and the common stock issuable upon conversion thereof pursuant to Rule 415 under the Securities Act, and (2) use reasonable efforts to cause this registration statement to be declared effective under the Securities Act of 1933, as amended (the Securities Act), on or before May 23, 2004. On March 23, 2004, Millennium Chemicals and Millennium America, as guarantor, initially filed a registration statement with the Securities and Exchange Commission, and on June 16, 2004; August 19, 2004; September 23, 2004 and September 24, 2004 filed amendments to this registration statement. The Securities and Exchange Commission declared this registration statement effective on September 24, 2004. Accordingly, Millennium Chemicals ceased accruing the additional interest on the debentures required under the agreement. This interest had accrued from May 24, 2004 until August 21, 2004, at an annualized rate of 0.25% and from August 22, 2004 until September 23, 2004 at an

annualized rate of 0.50%.

On April 25, 2003, the Company received approximately \$107 in net proceeds (\$109 in gross proceeds) from the issuance and sale by Millennium America of \$100 additional principal amount at maturity of its 9.25% Senior Notes due June 15, 2008 (the 9.25% Senior Notes), which are guaranteed by Millennium Chemicals. The net proceeds were used to repay all of the \$85 of outstanding borrowings at that time under the Revolving Loans and for general corporate purposes. Under the terms of this issuance and sale, Millennium America and Millennium Chemicals entered into an exchange and registration rights agreement with the initial purchasers of the \$100 additional principal amount of these 9.25% Senior Notes. Pursuant to this agreement, each of Millennium America and Millennium Chemicals agreed to: (1) file with the Securities and Exchange Commission on or before July 24, 2003 a registration statement relating to a registered exchange offer for the notes, and (2) use its reasonable efforts to cause this exchange offer registration statement to be declared effective under the Securities Act on or before October 22, 2003. On June 13, 2003, Millennium America and Millennium Chemicals, as guarantor, initially filed a registration statement with the Securities and Exchange Commission, and on December 15, 2003; June 25, 2004; July 6, 2004; August 19, 2004; September 23,

Table of Contents

MILLENNIUM CHEMICALS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

(Dollars in millions, except share and per share data)

2004 and September 24, 2004 filed amended registration statements. The exchange offer registration statement was declared effective on September 24, 2004 and the exchange offer was completed on October 28, 2004. Upon completion of the exchange offer, Millennium America ceased accruing the additional interest it had been obligated to pay since October 23, 2003, at the annualized rate of approximately 1.00% to each holder of \$100 additional principal amount of notes.

The Company had \$26 of outstanding undrawn standby letters of credit and no outstanding borrowings under the Revolving Loans and, accordingly, had \$124 of unused availability under such facility at September 30, 2004. In addition to letters of credit outstanding under the Credit Agreement, the Company also had outstanding undrawn standby letters of credit and bank guarantees under other arrangements of \$6 at September 30, 2004. The Company had unused availability under short-term uncommitted lines of credit, other than the Credit Agreement, of \$42 at September 30, 2004.

The Revolving Loans are available in U.S. dollars, British pounds and *euros*. The Revolving Loans may be borrowed, repaid and reborrowed from time to time. The Revolving Loans include a \$50 letter of credit subfacility and a swingline facility in the amount of \$25. As of September 30, 2004, \$26 was outstanding under the letter of credit subfacility, and no amount under the swingline facility. The Term Loans were entirely prepaid on November 25, 2003, which effectively retired the Term Loans as any such amounts prepaid may not be reborrowed. The interest rates on the Revolving Loans are floating rates based upon margins over LIBOR, NIBOR, or the Administrative Agent's prime lending rate, as the case may be. Such margins, as well as the facility fee, are based on the Company's Leverage Ratio. The Leverage Ratio is the ratio of Total Indebtedness to cumulative EBITDA for the prior four fiscal quarters, each as defined in the Credit Agreement.

The Credit Agreement contains various restrictive covenants and requires that the Company meet certain financial performance criteria. Compliance with these covenants is monitored frequently in order to assess the likelihood of continued compliance. As a result of the restatement of its prior financial statements, the Company obtained waivers on July 29, 2004 and February 2, 2005, under the Credit Agreement relating to certain representations under the Credit Agreement regarding such prior financial statements. The Company was in compliance with all covenants under the Credit Agreement in effect at September 30, 2004.

The financial covenants in the Credit Agreement require the Company to maintain a Senior Secured Leverage Ratio, defined as the ratio of Senior Secured Indebtedness, as defined, to cumulative EBITDA for the prior four fiscal quarters, each as defined, of no more than 1.25 to 1.00 for each of the remaining quarters of 2004 and 1.00 to 1.00 for the first quarter of 2005 and thereafter, and an Interest Coverage Ratio, defined as the ratio of cumulative EBITDA for the prior four fiscal quarters to Net Interest Expense, for the same period, each as defined, of no less than 1.40 to 1.00 for the third quarter of 2004; 1.50 to 1.00 for the fourth quarter of 2004; and 1.75 to 1.00 for the first quarter of 2005 and thereafter. The covenants in the Credit Agreement also limit, among other things, the ability of the Company and/or certain subsidiaries of the Company to: (i) incur debt and issue preferred stock; (ii) create liens; (iii) engage in sale/leaseback transactions; (iv) declare or pay dividends on, or purchase, the Company's stock; (v) make restricted payments; (vi) engage in transactions with affiliates; (vii) sell assets; (viii) engage in mergers or acquisitions; (ix) engage in domestic accounts receivable securitization transactions; and (x) enter into restrictive agreements. In addition, in the event the Company sells certain assets as specified in the Credit Agreement and the Leverage Ratio is equal to or greater than 3.75 to 1.00, the outstanding Revolving Loans must be prepaid with a portion of the Net Cash Proceeds, as defined, of such sale and the maximum availability under the Credit Agreement would be decreased by 50% of the aggregate Net Cash Proceeds received from such asset sales in excess of \$100. Any sale involving Equistar or certain inventory or accounts receivable would reduce the maximum availability under the Credit Agreement by 100% of such Net Cash Proceeds received. The obligations under the Credit Agreement are collateralized by: (1) a pledge of 100% of the stock of the Company's existing and future domestic subsidiaries and 65% of the stock of certain of the Company's existing and future foreign

Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-Q/A

subsidiaries, in both cases other than subsidiaries that hold immaterial assets (as defined in the Credit Agreement); (2) all the equity interests held by the Company's subsidiaries in Equistar and the La Porte Methanol Company (which pledges are limited to the right to receive distributions made by Equistar and the La Porte Methanol Company, respectively); and (3) all present and future accounts receivable, intercompany indebtedness and inventory of the Company's domestic subsidiaries, other than subsidiaries that hold immaterial assets. In connection with the announced stock-for-stock business combination with Lyondell (see Note 2), the Company obtained an amendment to its Credit Agreement on July 7, 2004, which will allow the consummation of the announced stock-for-stock business combination with Lyondell and modifies the definition of EBITDA to exclude certain transaction costs related to this business combination.

Table of Contents**MILLENNIUM CHEMICALS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)**

(Dollars in millions, except share and per share data)

Millennium America also has outstanding \$500 aggregate principal amount of 7.00% Senior Notes due November 15, 2006 (the 7.00% Senior Notes) and \$250 aggregate principal amount of 7.625% Senior Debentures due November 15, 2026 (the 7.625% Senior Debentures and, together with the 7.00% Senior Notes and the 9.25% Senior Notes, the Senior Notes), that are fully and unconditionally guaranteed by Millennium Chemicals. The indenture under which the 7.00% Senior Notes and 7.625% Senior Debentures were issued contains certain covenants that limit, among other things: (i) the ability of Millennium America and its Restricted Subsidiaries, as defined, to grant liens or enter into sale/leaseback transactions; (ii) the ability of the Restricted Subsidiaries to incur additional indebtedness; and (iii) the ability of Millennium America and Millennium Chemicals to merge, consolidate or transfer substantially all of their respective assets. This indenture allows Millennium America and its Restricted Subsidiaries to grant security on loans of up to 15% of Consolidated Net Tangible Assets (CNTA), as defined, of Millennium America and its consolidated subsidiaries. Accordingly, based upon CNTA and secured borrowing levels at September 30, 2004, any reduction in CNTA below approximately \$1,000 would decrease the Company s availability under the Revolving Loans by 15% of any such reduction. CNTA was approximately \$2,000 at September 30, 2004. The 7.00% Senior Notes and the 7.625% Senior Debentures can be accelerated by the holders thereof if any other debt in excess of \$20 is in default and is accelerated.

The 9.25% Senior Notes were issued by Millennium America and are guaranteed by Millennium Chemicals. The indenture under which the 9.25% Senior Notes were issued contains certain covenants that limit, among other things, the ability of the Company and/or certain subsidiaries of the Company to: (i) incur additional debt; (ii) issue redeemable stock and preferred stock; (iii) create liens; (iv) redeem debt that is junior in right of payment to the 9.25% Senior Notes; (v) sell or otherwise dispose of assets, including capital stock of subsidiaries; (vi) enter into arrangements that restrict dividends from subsidiaries; (vii) enter into mergers or consolidations; (viii) enter into transactions with affiliates; and (ix) enter into sale/leaseback transactions. In addition, this indenture contains a covenant that would prohibit the Company from (i) paying dividends or making distributions on its common stock; (ii) repurchasing its common stock; and (iii) making other types of restricted payments, including certain types of investments, if such restricted payments would exceed a restricted payments basket. Although the Company has no intention at the present time to pay dividends or make distributions, repurchase its Common Stock, or make other restricted payments, the Company would be prohibited by this covenant from doing so at the present time. The indenture also requires the calculation of a Consolidated Coverage Ratio, defined as the ratio of the aggregate amount of EBITDA, as defined, for the four most recent fiscal quarters to Consolidated Interest Expense, as defined, for the four most recent quarters. The Company must maintain a Consolidated Coverage Ratio of 2.25 to 1.00. Currently, the Company s Consolidated Coverage Ratio is below this threshold and, therefore, the Company is subject to certain restrictions that limit the Company s ability to incur additional indebtedness, pay dividends, repurchase capital stock, make certain other restricted payments, and enter into mergers or consolidations. However, if the 9.25% Senior Notes were to receive investment grade credit ratings from both Moody s Investors Service (Moody s) and Standard & Poor s (S&P) and meet certain other requirements as specified in the indenture, certain of these covenants would no longer apply. The 9.25% Senior Notes can be accelerated by the holders thereof if any other debt in excess of \$30 is in default and is accelerated.

The consummation of the announced stock-for-stock business combination with Lyondell will give each holder of the 9.25% Senior Notes the right to require the Company to purchase all or part of such holder s securities at a purchase price in cash equal to 101% of the principal amount thereof plus accrued and unpaid interest to the date of purchase.

The 4.00% Convertible Senior Debentures were issued by Millennium Chemicals and are guaranteed by Millennium America. Holders may convert their debentures into shares of the Company s Common Stock at a conversion price, subject to adjustment upon certain events, of \$13.63 per share, which is equivalent to a conversion rate of 73.3568 shares per one thousand dollar principal amount of debentures. The conversion privilege may be exercised under the following circumstances:

Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-Q/A

prior to November 15, 2018, during any fiscal quarter commencing after December 31, 2003, if the closing price of the Company's Common Stock on at least 20 of the 30 consecutive trading days ending on the first trading day of that quarter is greater than 125% of the then current conversion price;

on or after November 15, 2018, at any time after the closing price of the Company's Common Stock on any date is greater than 125% of the then current conversion price;

if the debentures are called for redemption;

Table of Contents

MILLENNIUM CHEMICALS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

(Dollars in millions, except share and per share data)

upon the occurrence of specified corporate transactions, including a consolidation, merger or binding share exchange pursuant to which the Company's Common Stock would be converted into cash or property other than securities;

during the five business-day period after any period of ten consecutive trading days in which the trading price per one thousand dollar principal amount of debentures on each day was less than 98% of the product of the last reported sales price of the Company's Common Stock and the then current conversion rate; and

at any time when the long-term credit rating assigned to the debentures is either Caa1 or lower, in the case of Moody's, or B- or lower in the case of S&P, or either rating agency has discontinued, withdrawn or suspended its rating.

During the thirty consecutive trading days ending October 1, 2004, the closing price of the Company's Common Stock was greater than 125% of the current conversion price per share of Common Stock for at least 20 trading days. Accordingly, on October 1, 2004, the Company announced that the debentures are currently convertible into shares of the Company's Common Stock under section 15.01(a)(i) of the indenture.

The debentures are redeemable at the Company's option beginning November 15, 2010 at a redemption price equal to 100% of their principal amount, plus accrued interest, if any. On November 15 in each of 2010, 2013 and 2018, holders of debentures will have the right to require the Company to repurchase all or some of the debentures they own at a purchase price equal to 100% of their principal amount, plus accrued interest, if any. The Company may choose to pay the purchase price in cash or shares of the Company's Common Stock or any combination thereof. In the event of a conversion request upon a credit ratings event as described above, after June 18, 2006, the Company has the right to deliver, in lieu of shares of Company Common Stock, cash or a combination of cash and shares of Company Common Stock. After the closing of the proposed business combination with Lyondell, the Company would deliver shares of Lyondell common stock rather than Company Common Stock. Holders of the debentures will also have the right to require the Company to repurchase all or some of the debentures they own at a cash purchase price equal to 100% of their principal amount, plus accrued interest, if any, upon the occurrence of certain events constituting a Fundamental Change, as defined in the indenture. This indenture also limits the Company's ability to consolidate with or merge with or into any other person, or sell, convey, transfer or lease properties and assets substantially as an entirety to another person, except under certain circumstances. The consummation of the announced stock-for-stock business combination with Lyondell is not expected to be considered a Fundamental Change, as defined in the indenture. However, the Company does expect to execute with the trustee a supplemental indenture providing that each debenture shall be convertible into Lyondell's common stock at a conversion ratio determined in accordance with the indenture to reflect the exchange ratio in the business combination.

Although the Company does not currently pay a dividend to its common stockholders, Lyondell does currently pay a dividend. If the Company executes a supplemental indenture with the trustee, as described above, and Lyondell continues to pay a dividend to its common stockholders, the conversion rate, as defined, will be adjusted. The conversion rate will be increased by a percentage calculated by dividing the average of the last reported sales price of Lyondell's common stock for the ten consecutive trading days prior to the business day immediately preceding the record date by this average less the amount in cash per share that Lyondell distributes to holders of its common stock. At the current market prices of Lyondell's common stock, this percentage would be approximately 1.0% per quarter.

At September 30, 2004, the Company was in compliance with all covenants in the indentures governing the 9.25% Senior Notes, 7.00% Senior Notes, 7.625% Senior Debentures, and 4.00% Convertible Senior Debentures.

The Company, as well as the Senior Notes and the 4.00% Convertible Senior Debentures, are currently rated BB- by S&P with a stable outlook. Moody's has assigned the Company a senior implied rating of Ba3, and the Senior Notes and the 4.00% Convertible Senior Debentures a rating of B1 with a negative outlook. These ratings are non-investment grade ratings.

On March 29, 2004, S&P placed the Company's ratings on Credit Watch with negative implications reflecting the future ownership by the highly leveraged Lyondell and the strong likelihood that the ratings of the Company will be lowered modestly upon completion of the proposed transaction. On March 30, 2004, Moody's placed the Company's credit ratings under review for possible downgrade following the announcement by Lyondell and the Company that the two companies signed a definitive agreement that, if completed, will result in the combination of the Company with Lyondell in a stock-for-stock transaction. Moody's cited concerns over the potential impact that future distributions by the Company, as an operating subsidiary of Lyondell, to Lyondell will have on the Company's credit profile over the

Table of Contents

MILLENNIUM CHEMICALS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

(Dollars in millions, except share and per share data)

long term, primarily the potential for elevated debt levels over the next several years while Lyondell seeks to de-lever its balance sheet.

Note 10 Derivative Instruments and Hedging Activities

The Company is exposed to market risk, such as changes in currency exchange rates, commodity pricing and interest rates. To manage the volatility relating to these exposures, the Company selectively enters into derivative transactions pursuant to the Company's policies for hedging practices. Designation is performed on a specific exposure basis to support hedge accounting. The changes in fair value of these hedging instruments are offset in part or in whole by corresponding changes in the fair value or cash flows of the underlying exposures being hedged. The Company does not hold or issue derivative financial instruments for speculative or trading purposes.

Foreign Currency Exposure Management: The Company manufactures and sells its products in a number of countries throughout the world and, as a result, is exposed to movements in foreign currency exchange rates. The primary purpose of the Company's foreign currency hedging activities is to manage the volatility associated with foreign currency purchases and foreign currency sales. The Company utilizes forward exchange contracts with various terms. As of September 30, 2004, these contracts had expiration dates no later than April 13, 2005.

The Company utilizes forward exchange contracts with contract terms normally lasting less than three months to protect against the adverse effect that exchange rate fluctuations may have on foreign currency denominated trade receivables and trade payables. These derivatives have not been designated as hedges for accounting purposes. The gains and losses on both the derivatives and the foreign currency denominated trade receivables and payables are recorded in current earnings. Net amounts included in earnings, which offset similar amounts from foreign currency denominated trade receivables and payables, were insignificant for each of the three months and nine months ended September 30, 2004 and were a gain of \$3 and \$6, respectively, for the three months and nine months ended September 30, 2003.

In addition, the Company utilizes forward exchange contracts that qualify as cash flow hedges. These are intended to offset the effect of exchange rate fluctuations on forecasted sales and inventory purchases. Gains and losses on these instruments are deferred in other comprehensive income (OCI) until the underlying transaction is recognized in earnings. The earnings impact is reported either in Net sales or Cost of products sold to match the underlying transaction being hedged. Net amounts on forward exchange contracts designated as cash flow hedges reclassified to earnings to match the gain or loss on the underlying transaction being hedged were insignificant and a gain of \$1, respectively, for the three months and nine months ended September 30, 2004 and were a loss of \$1 and \$5, respectively, for the three months and nine months ended September 30, 2003. Hedge ineffectiveness had no impact on earnings for the three months and nine months ended September 30, 2004 and 2003. No forward exchange contract cash flow hedges were discontinued during the three months and nine months ended September 30, 2004 and 2003. The Company currently estimates that the net gains on foreign currency cash flow hedges included in OCI at September 30, 2004 that will be reclassified to earnings during the next twelve months is insignificant.

Commodity Price Risk Management: Raw materials used by the Company are subject to price volatility caused by demand and supply conditions and other unpredictable factors. The Company selectively uses commodity swap arrangements and commodity options with various terms to manage the volatility related to anticipated purchases of natural gas and certain commodities, a portion of which exposes the Company to natural

Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-Q/A

gas price risk. As of September 30, 2004, there were no such contracts outstanding. The mark-to-market gains or losses on qualifying hedges were included in OCI to the extent effective, and reclassified into Cost of products sold in the period during which the hedged transaction affected earnings. The mark-to-market gains or losses on ineffective portions of hedges are recognized immediately in Cost of products sold. Net amounts on commodity swaps designated as cash flow hedges reclassified to Cost of products sold to match the gain or loss on the underlying transaction being hedged were a loss of \$1 for the three months ended September 30, 2003, and insignificant for each of the nine months ended September 30, 2004 and 2003. There were no gains or losses on commodity swaps designated as cash flow hedges reclassified to Cost of products sold in the three months ended September 30, 2004. Hedge ineffectiveness had no impact on earnings for the three months and nine months ended September 30, 2004 and 2003. No commodity swap cash flow hedges were discontinued in the three months and nine months ended September 30, 2004 or in the three months ended September 30, 2003, and net losses on commodity swap cash flow hedges that were discontinued in the nine months ended September 30, 2003 were insignificant. The Company had no gains or losses on commodity swaps included in OCI at September 30, 2004.

In addition, the Company utilizes commodity swap and option arrangements to manage price volatility related to anticipated purchases of certain commodities, a portion of which exposes the Company to natural gas price risk. These

Table of Contents**MILLENNIUM CHEMICALS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)***(Dollars in millions, except share and per share data)*

derivatives are not designated as hedges for accounting purposes. The gains and losses on these instruments are recorded in current earnings. Net amounts included in earnings were insignificant in the nine months ended September 30, 2004 and were net losses of \$1 and \$2, respectively, in the three months and nine months ended September 30, 2003. There were no gains or losses on these commodity swap and options arrangements in the three months ended September 30, 2004.

Interest Rate Risk Management: The Company selectively uses derivative instruments to manage its ratio of debt bearing fixed interest rates to debt bearing variable interest rates. On September 10, 2004, the Company terminated all of its outstanding interest rate swap agreements with a notional amount of \$225 and the Company received proceeds of approximately \$3. These interest rate swap agreements were designated as fair value hedges of underlying fixed-rate obligations. Gains deferred on these interest rate swap agreements of approximately \$2 result in an increase in the carrying value of long-term debt and will be recognized as a reduction in Interest expense ratably over approximately 2 years, the remaining term of the underlying fixed rate obligations previously hedged. Subsequent to the termination, the Company entered into new interest rate swaps with a total notional amount of \$100, which are designated as fair value hedges of underlying fixed-rate obligations and are outstanding at September 30, 2004. The valuation of these outstanding interest rate swap agreements at September 30, 2004, which required the recognition of a swap liability and a corresponding decrease in the carrying value of the long-term debt, was insignificant. The gains and losses on both the interest rate swaps and the hedged portion of the underlying debt are recorded in Interest expense. Hedge ineffectiveness had no impact on earnings for the three months and nine months ended September 30, 2004 and 2003.

Note 11 Pension and Other Postretirement Benefits

The following table provides the components of net periodic benefit cost and the amount of contributions for pensions:

	Pension Benefits			
	For the Three Months Ended		For the Nine Months Ended	
	September 30,		September 30,	
	2004	2003	2004	2003

	—	—	—	—
Other postretirement benefits paid	\$ 2	\$ 3	\$ 8	\$ 9
	—	—	—	—

As a result of rising medical benefit costs and competitive business conditions, the Company announced in the first quarter of 2004 that, effective April 1, 2004, it planned to reduce the level of retiree medical benefits provided to essentially all of its retirees by offering a monthly subsidy to retirees that enroll in designated preferred provider organization plans or Medicare supplement insurance plans. This change reduced the Company's accumulated postretirement benefit obligation by approximately \$45. Beginning in 2004, the Company is recognizing this reduction ratably over approximately thirteen years through other postretirement employee benefit (OPEB) net periodic benefit cost. Estimated OPEB net periodic benefit cost for the year ending December 31, 2004, after giving effect to this change, will be income of approximately \$4 compared to a benefit cost of \$2 for the year ended December 31, 2003. The Company estimates that cash payments for retiree medical and insurance benefits for the year ending December 31, 2004 will be approximately \$9, compared to payments of \$12 made for the year ended December 31, 2003, as the Company transitions to the subsidy plan. Cash payments for retiree medical and insurance benefits in subsequent years are estimated to be significantly less than in 2003.

Note 12 Comprehensive Income (Loss)

The following table sets forth the components of other comprehensive income (loss) and total comprehensive income (loss):

Three Months Ended	Nine Months Ended
September 30,	September 30,

	2004	2003	2004	2003
	Restated*		Restated*

Other comprehensive income (loss)				
Net gains (losses) on derivative financial instruments		1	1	(2)
Currency translation adjustment	13	7	1	66
Total comprehensive income (loss)	\$ 40	\$ (20)	\$ 9	\$ (2)

* The Company restated its financial statements as disclosed in Notes 17 and 18 to the Consolidated Financial Statements in this Amendment No. 1.

Note 13 Commitments and Contingencies

Legal and Environmental: The Company and various Company subsidiaries are defendants in a number of pending legal proceedings relating to present and former operations. These include several proceedings alleging injurious exposure of plaintiffs to various chemicals and other materials on the premises of, or manufactured by, the Company's current and former subsidiaries. Typically, such proceedings involve claims made by many plaintiffs against many defendants in the chemical industry. Millennium Petrochemicals Inc., a wholly-owned operating subsidiary of the Company (Millennium Petrochemicals), is one of a number of defendants in 125 active premises-based asbestos cases (i.e., where the alleged exposure to asbestos-containing materials was to employees of third-party contractors or subcontractors on the premises of certain current or former Company facilities, and did not relate to any

Table of Contents**MILLENNIUM CHEMICALS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)***(Dollars in millions, except share and per share data)*

products manufactured or sold by the Company or any of its predecessors). Of the cases filed against Millennium Petrochemicals, only three assert specific damage amounts other than asserting damages in excess of the statutory minimum. The three cases that do assert a specific amount of damages each assert a minimum of \$200,000 exemplary damages. Millennium Petrochemicals is responsible for these premises-based cases as a result of its indemnification obligations under the Company's agreements with Equistar; however, Equistar will be required to indemnify Millennium Petrochemicals for any such claims filed on or after December 1, 2004 related to the assets or businesses contributed by Millennium Petrochemicals to Equistar. In addition to the cases referenced above, Millennium Petrochemicals is one of a number of defendants in 10 premises-based asbestos cases filed in Indiana relating to an alleged former company facility. These cases are not subject to the above-described Equistar indemnification obligation. Millennium Inorganic Chemicals Inc., a wholly-owned operating subsidiary of the Company (Millennium Inorganic Chemicals), is one of a number of defendants in 100 premises-based asbestos cases filed since 2003 in Baltimore County, Maryland, all of which assert damages in excess of the statutory minimum. Approximately half of these claims are on the active docket and half are on an inactive docket of claims for which no legal obligations attach and no defense costs are being incurred. With respect to the active docket, at the current rate, cases filed in 2003 are not likely to be scheduled to be tried for at least 10 years. To date, no premises-based asbestos case has been tried in the State of Maryland. A defunct indirect Company subsidiary is among a number of defendants in 100 asbestos cases in Texas, where the alleged exposure was to persons on the premises of facilities where vessels formerly fabricated by this defunct subsidiary were situated. All of these cases assert unspecified monetary damages in excess of the statutory minimum.

Together with other alleged past manufacturers of lead-based paint and lead pigments for use in paint, the Company, a current subsidiary, as well as alleged predecessor companies, have been named as defendants in various legal proceedings alleging that they and other manufacturers are responsible for personal injury, property damage, and remediation costs allegedly associated with the use of these products. The plaintiffs in these legal proceedings include municipalities, counties, school districts, individuals and the State of Rhode Island, and seek recovery under a variety of theories, including negligence, failure to warn, breach of warranty, conspiracy, market share liability, fraud, misrepresentation and public nuisance. The majority of these legal proceedings assert unspecified monetary damages in excess of the statutory minimum and, in certain cases, contain general language requesting equitable relief from defendants such as abatement of lead-based paint in buildings. Legal proceedings relating to lead pigment or paint are in various procedural stages or pre-trial, post-trial and post-dismissal appellate settings.

The Company's defense costs to date for lead-based paint and lead pigment litigation largely have been covered by insurance. The Company has not accrued any liabilities for any lead-based paint and lead pigment litigation. The Company has insurance policies that potentially provide approximately \$1,000 in indemnity coverage for lead-based paint and lead pigment litigation. That estimate of indemnity coverage would depend upon the timing of any request for indemnity and the solvency of the various insurance carriers that are part of the coverage block at the time of such a request. As a result of insurance coverage litigation initiated by the Company, an Ohio trial court issued a decision in 2002 effectively requiring certain insurance carriers to resume paying defense costs in the lead-based paint and lead pigment cases. Indemnity coverage was not at issue in the Ohio court's decision. The insurance carriers may appeal the Ohio decision regarding defense costs, and they have in the past and may in the future attempt to deny indemnity coverage if there is ever a settlement or an adverse judgment in any lead-based paint or lead pigment case.

In 1986, a predecessor of a company that is now a subsidiary of the Company sold its recently acquired Glidden Paints business. As part of that sale, the seller agreed to indemnify the purchaser against certain claims made during the first eight years after the sale; the purchaser agreed to indemnify the seller against such claims made after the eight-year period. With the exception of two cases, all pending lead-based paint and lead pigment litigation involving the Company and its subsidiaries, including the Rhode Island case, was filed after the eight-year period. Accordingly, the Company believes that it is entitled to full indemnification from the purchaser against lead-based paint and lead pigment cases filed after the eight-year period. The purchaser disputes that it has such an indemnification obligation, and claims that the seller must indemnify it. Because the Company's defense costs to date largely have been covered by insurance and there never has been a settlement paid by, nor any judgment rendered against, the Company (or any other company sued in any lead-based paint or lead pigment litigation), the parties

indemnification claims have not been ruled on by a court.

The Company's businesses are subject to extensive federal, state, local and foreign laws, regulations, rules and ordinances concerning, among other things, emissions to the air, discharges and releases to land and water, the generation, handling, storage, transportation, treatment and disposal of wastes and other materials and the remediation of environmental pollution caused by releases of wastes and other materials (collectively, Environmental Laws). The

Table of Contents**MILLENNIUM CHEMICALS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)***(Dollars in millions, except share and per share data)*

operation of any chemical manufacturing plant and the distribution of chemical products entail risks under Environmental Laws, many of which provide for substantial fines and criminal sanctions for violations. There can be no assurance that significant costs or liabilities will not be incurred with respect to the Company's operations and activities. In particular, the production of TiQ TiCl_4 , vinyl acetate monomer (VAM), acetic acid, methanol and certain other chemicals involves the handling, manufacture or use of substances or compounds that may be considered to be toxic or hazardous within the meaning of certain Environmental Laws, and certain operations have the potential to cause environmental or other damage. Significant expenditures including facility-related expenditures could be required in connection with any investigation and remediation of threatened or actual pollution, triggers under existing Environmental Laws tied to production or new requirements under Environmental Laws.

The Company cannot predict whether future developments or changes in laws and regulations concerning environmental protection will affect its earnings or cash flow in a materially adverse manner or whether its operating units, Equistar or La Porte Methanol Company will be successful in meeting future demands of regulatory agencies in a manner that will not materially adversely affect the consolidated financial position, results of operations or cash flows of the Company. For example, the eight-county Houston/Galveston region has been designated a severe non-attainment area for ozone by the U.S. Environmental Protection Agency (the EPA) under a one-hour ozone standard. Emission reduction controls for nitrogen oxides (NOx), which contribute to ozone formation, must be installed at each of Equistar's six plants located in the Houston/Galveston region prior to a November 2007 compliance deadline for the one-hour ozone standard. Revised rules adopted by the regulatory agencies changed the required NOx emission reduction levels from 90% to 80%. Under the revised 80% standard, Equistar estimates that the incremental capital expenditures would range between \$165 and \$200. Equistar's cumulative capital expenditures through September 30, 2004 totaled \$96. This estimate could be affected by increased costs for stricter proposed controls over highly reactive, volatile organic compounds (HRVOCs). The regulatory agency for the state of Texas, the Texas Commission on Environmental Quality, (TCEQ), plans to finalize the HRVOC rules by December 2004. Equistar is still assessing the impact of the proposed HRVOC revisions. In addition, in April 2004, the EPA designated the eight-county Houston/Galveston region a moderate non-attainment area under an eight-hour ozone standard. As a result, the TCEQ must submit a plan to the EPA in 2007 to demonstrate compliance with the eight-hour ozone standard in 2010. The TCEQ is continuing with its current plan to revise the HRVOC rules in 2004. The timing and amount of the estimated expenditures are subject to these regulatory and other uncertainties, as well as to obtaining the necessary permits and approvals. There can be no assurance as to the ultimate cost of implementing any plan developed to comply with the final ozone standards.

Certain Company subsidiaries have been named as defendants, potentially responsible parties (the PRPs), or both, in a number of environmental proceedings associated with waste disposal sites or facilities currently owned, operated or used by the Company's current or former subsidiaries or predecessors. The Company's estimated individual exposure for potential cleanup costs, damages for personal injury or property damage related to these proceedings has been estimated to be between \$0.01 for several small sites and \$67 for the Kalamazoo River Superfund Site in Michigan.

A subsidiary of the Company was named as a PRP at the Kalamazoo River Superfund Site. The site involves cleanup of river sediments and floodplain soils contaminated with polychlorinated biphenyls, cleanup of former paper mill operations and cleanup and closure of landfills associated with former paper mill operations. In October 2000, the Kalamazoo River Study Group (the KRSG), of which one of the Company's subsidiaries is a member, submitted to the State of Michigan a Draft Remedial Investigation and Draft Feasibility Study, which evaluated a number of remedial options for the river. The cost for these remedial options above the amounts accrued could range from \$0 to \$2,500; however, the Company strongly believes that the likelihood of the cost being \$2,500 is remote. At the end of 2001, the EPA took responsibility for the site at the request of the State. Based upon an interim allocation, the Company is paying 55% of costs related to studying and evaluating the environmental condition of the river. The EPA has initiated a process that will lead to a facilitation (the Facilitation) beginning in the Fall of 2004 among the agency, the Company, another KRSG member, the Michigan Departments of Environmental Quality and Natural Resources, and certain federal natural resource trustees. The Facilitation participants have selected co-facilitators and determined the governing principles of

Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-Q/A

the Facilitation. One of the goals of the Facilitation is to determine what additional investigation and data are needed to further develop cleanup options for downstream portions of the Kalamazoo River.

Another interim measure initiated by the EPA is the development of a computer model that will be designed to identify polychlorinated biphenyls sources on the Kalamazoo River and determine how polychlorinated biphenyls move and where they are deposited in the river to assist in remedial planning. Some results, but not all, are expected by the end of 2005. The Company's ultimate liability for the Kalamazoo site will depend on many other factors that have not

Table of Contents

MILLENNIUM CHEMICALS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

(Dollars in millions, except share and per share data)

yet been determined, including the ultimate remedy selected, the number and financial viability of the other members of the KRSG as well as of other PRPs outside the KRSG, and the determination of the final allocation among the members of the KRSG and other PRPs.

On January 16, 2002, Slidell Inc. (Slidell) filed a lawsuit against Millennium Inorganic Chemicals alleging breach of contract and other related causes of action, including a violation of the Uniform Trade Secret Act, arising out of a contract between the two parties for the supply of packaging equipment. In the suit, Slidell seeks unspecified monetary damages in excess of the statutory minimum. The Company believes it has substantial defenses to each of the causes of actions alleged and has filed a counterclaim against Slidell for recovery of money it has already paid for the equipment plus other direct damages arising out of Slidell's breach of its contractual obligations. The trial in this matter was expected to take place in the fourth quarter of 2004, but was recently postponed and is now tentatively set for trial on January 16, 2005.

The Company has accrued \$109 as of September 30, 2004 for potential liabilities for environmental and other contingencies, collectively, but which primarily relate to environmental remediation activities. Expenses or benefits associated with these contingencies, including changes in estimated costs to resolve these contingencies, are included in the Company's S,D&A expense. Expenses resulting from changes in estimated liabilities for these contingencies for the three months and nine months ended September 30, 2004 were \$3 and \$14, respectively, and for the three months and nine months ended September 30, 2003 were insignificant. The Company expects that cash expenditures related to these potential liabilities will be made over a number of years, and will not be concentrated in any single year.

The Company agreed as part of its spin-off from Hanson plc (Hanson) to indemnify Hanson and certain of its subsidiaries against certain of such contractual indemnification obligations, and Millennium Petrochemicals agreed as part of the December 1, 1997 formation of Equistar to indemnify Equistar for certain liabilities related to the assets contributed by Millennium Petrochemicals to Equistar in excess of \$7, which threshold was exceeded in 2001. The terms of these indemnification agreements do not limit the maximum potential future payments to the indemnified parties. The maximum amount of future indemnification payments is dependent upon many factors and is not practicable to estimate.

No assurance can be given that actual costs for environmental matters will not exceed accrued amounts or that estimates made with respect to indemnification obligations will be accurate. In addition, it is possible that costs will be incurred with respect to contamination, indemnification obligations or other environmental matters that currently are unknown or as to which it is currently not possible to make an estimate.

Table of Contents**MILLENNIUM CHEMICALS INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)***(Dollars in millions, except share and per share data)***Note 14 Operations by Business Segment**

The Company's principal operations are managed and grouped as three separate business segments: Titanium Dioxide and Related Products, Acetyls and Specialty Chemicals. Operating income and expense not identified with the three separate business segments, including certain of the Company's S,D&A expense not allocated to its three business segments, employee-related costs from predecessor businesses and certain other expenses, are grouped under the heading Other. The following is a summary of the Company's operations by business segment:

On March 31, 2003, Equistar completed transactions involving a 15-year propylene supply arrangement and the sale of a polypropylene production facility in Pasadena, Texas. Equistar received total cash proceeds of \$194, including the value of the polypropylene inventory sold. Approximately \$159 of the total cash proceeds represented a partial prepayment for product to be delivered under a long-term supply arrangement, primarily at cost-based prices. Equistar will recognize this deferred revenue over 15 years, as the associated product is delivered. Equistar's results for the nine months ended September 30, 2003, include a \$12 loss on the sale of the polypropylene production facility.

In April 2003, Equistar issued \$450 of 10.625% senior notes due in 2011. The proceeds, net of associated fees, were used to prepay \$300 of 8.5% notes due in the first quarter of 2004, approximately \$122 of the \$296 of the then outstanding term loans under Equistar's credit facility and prepayment premiums of approximately \$17. Equistar's results for the nine months ended September 30, 2003, include \$19 of debt prepayment costs, consisting of the \$17 prepayment premium and the write-off of \$2 of unamortized debt issuance costs related to the prepaid term loan.

In August 2004, Equistar made cash distributions to its owners, totaling \$100. The Company received \$30 for its share of this cash distribution.

Note 16 Supplemental Financial Information

Millennium America is a holding company for all of the Company's operating subsidiaries other than its operations in the United Kingdom, France, Brazil and Australia. Millennium America is the issuer of the 7% Senior Notes, the 7.625% Senior Debentures, and the 9.25% Senior Notes, and is the principal borrower under the Credit Agreement. Millennium Chemicals is the issuer of the 4% Convertible Senior Debentures. Millennium America fully and unconditionally guarantees all obligations under the Credit Agreement and the 4.00% Convertible Senior Debentures. The 7% Senior Notes, the 7.625% Senior Debentures and the 9.25% Senior Notes, as well as outstanding amounts under the Credit Agreement, are fully and unconditionally guaranteed by Millennium Chemicals. Accordingly, the following Condensed Consolidating Balance Sheets at September 30, 2004 and December 31, 2003, the Condensed Consolidating Statements of Operations for the three months and nine months ended September 30, 2004 and 2003, and the Condensed Consolidating Statements of Cash Flows for the nine months ended September 30, 2004 and 2003, are provided for the Company as supplemental financial information to the Company's consolidated financial statements to disclose the financial position, results of operations and cash flows of (i) Millennium Chemicals, (ii) Millennium America, and (iii) all subsidiaries of Millennium Chemicals other than Millennium America (the Non-Guarantor Subsidiaries). The investment in subsidiaries of Millennium America and Millennium Chemicals are accounted for by the equity method; accordingly, the shareholders' deficit of Millennium America and Millennium Chemicals are presented as if each of those companies and their respective subsidiaries were reported on a consolidated basis.
