Basic earnings per share represents income available to common stockholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflect additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may be issued by the company relate solely to outstanding stock options and warrants are determined using the treasury stock method.

The pro forma net income for the three and six months ended June 30, 2004 does not reflect approximately \$398,000 in acquisition related costs incurred by First National. In management's opinion, these unaudited results are not necessarily indicative of what actual combined results of operations might have been if the acquisition had been effective at the beginning of fiscal year 2004.

Effective the close of business on March 31, 2005, First National Bank of the Carolinas was merged into American Community Bank.

**NOTE F STOCK COMPENSATION PLAN**

Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation, encourages all entities to adopt a fair value based method of accounting for employee stock compensation plans, whereby compensation cost is measured at the grant date based on the value of the award and is recognized over the service period, which is usually the vesting period. However, it also allows an entity to continue to measure compensation cost for those plans using the intrinsic value based method of accounting prescribed by Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, whereby compensation cost is the excess, if any, of the quoted market price of the stock at the grant date (or other measurement date) over the amount an employee must pay to acquire the stock. Stock options issued under the company's stock option plans have no intrinsic value at the grant date and, under Opinion No. 25, no compensation cost is recognized for them. The Company has elected to continue with the accounting methodology in Opinion No. 25. Presented below are the pro forma disclosures of net income and earnings per share and other disclosures as if the fair value based method of accounting had been applied.

In December 2004, the FASB issued SFAS No. 123(R), Accounting for Stock-Based Compensation. This Statement focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. SFAS No. 123(R) requires that the fair value of such equity instruments be recognized as an expense in the financial statements as services are performed. The provisions of this Statement are effective for the first interim reporting period of the first fiscal year that begins after December 15, 2005. Accordingly, we will adopt SFAS No. 123(R) commencing with the quarter ending March 31, 2006. If we had included the cost of employee stock option compensation in the consolidated financial statements, our net income for the three months ended June 30, 2005 and 2004 would have decreased by approximately \$12,102 and \$24,900, respectively.

The warrants entitled the holder to purchase one share of common stock at \$10.50 per share and expired on April 30, 2005. There are no pending legal proceedings other than those incurred in the normal course of business to which the Company or subsidiaries are a party, or of which any of their property is the subject.

Provisions for loan losses are charged to income to bring the allowance for loan losses to a level deemed appropriate by management. Total loans receivable increased by \$13.3 million during the quarter ended June 30, 2005. Non interest-earning assets at June 30, 2005 increased by \$6.2 million or 19.1% to \$38.6 million compared to \$32.4 million at December 31, 2004. The cash and due from banks primarily represents customer deposits that are in the process of collection and not available for overnight investment combined with cash on hand in the branches. In addition, bank premises and equipment was \$10.0 million at June 30, 2005, an increase of \$1.3 million from December 31, 2004. The net interest margin for the quarter ended June 30, 2005 was 4.21% compared to 3.46% for the same quarter in 2004. The increase in net interest margin resulted primarily from the re-pricing of the Company's prime rate based loan portfolio due to eight increases in short-term rates by the Federal Open Market Committee since the first quarter of 2004. The interest rate spread, which is the difference between the average yield on earning assets and the cost of interest-bearing funds, increased 69 basis points from 3.11% in the quarter ended June 30, 2004 to 3.80% for the same quarter in 2005.

**Provision for Loan Losses.** The Company's provision for loan losses for the quarter ended June 30, 2005 was \$182,000, representing a \$42,000 or 30.0% increase from the \$140,000 recorded for the quarter ended June 30, 2004. Non-interest income as a percentage of total revenue (defined as net interest income plus non-interest income) decreased to 18.5% for the three months ended June 30, 2005 from 23% for the same period in the prior year primarily as a result of the increase in the Company's net interest income. The largest components of non-interest income were service charges on deposit accounts of \$585,000 for the quarters ended June 30, 2005 and 2004 and fees from mortgage banking operations of \$133,000 in 2005 as compared to \$108,000 in 2004 or a 23.1% increase.

**Non-interest Expense.** Total non-interest expense increased from \$2.6 million for the three months ended June 30, 2004 to \$2.9 million for the same period in 2005. The net interest margin for the six months ended June 30, 2005 was 4.10% compared to 3.39% for the same period in 2004. The increase in net interest margin resulted primarily from the re-pricing of the Company's prime rate based loan portfolio due to eight increases in short-term rates by the Federal Open Market Committee since the first quarter of 2004. The interest rate spread, which is the difference between the average yield on earning assets and the cost of interest-bearing funds, increased to 3.75% for the six months ended June 30, 2005 compared to 2.99% for the same period in 2004.

**Provision for Loan Losses.** The Company's provision for loan losses for the six months ended June 30, 2005 was \$291,000, representing a \$32,000 or 12% decrease over the \$259,000 recorded for the six months ended June 30, 2004. Provisions for loan losses are charged to income to bring the allowance for loan losses to a level deemed appropriate by management.

Non-interest income as a percentage of total revenue (defined as net interest income plus non-interest income) decreased to 18% at June 30, 2005 from 24% at June 30, 2004 primarily as a result of the increase in the Company's net interest income. The largest components of non-interest income were service charges on deposit accounts of \$1.10 million for the quarter ended June 30, 2005 as compared to \$1.05 million for the same period in 2004 or a 5% increase and fees from mortgage banking operations of \$221,000 in 2005 as compared to \$174,000 in 2004 or a 27% increase. Service charge income increased primarily as a result of the increase in deposit transaction accounts. Fees from mortgage operations increased due to a continued strong local housing market.

**Non-Interest Expenses.** Total non-interest expense increased from \$4.6 million for the six months ended June 30, 2004 to \$5.3 million for the same period in 2005. This 15% increase was primarily due to increased operating expenses resulting from the April 15, 2004 acquisition of FNB, which accounted for \$542,000 of the \$901,000 increase, and increased expenses related to the opening of two new branches in the second quarter of 2005.

**Income Taxes.** The Company's provision for income taxes, as a percentage of income before income taxes, was 37.3% and 37.2% for the six months ended June 30, 2005 and 2004, respectively.

## ***Liquidity and Capital Resources***

Maintaining adequate liquidity while managing interest rate risk is the primary goal of the Company's asset and liability management strategy. Liquidity is the ability to fund the needs of the Company's borrowers and depositors, pay operating expenses, and meet regulatory liquidity requirements. Maturing investments, loan and mortgage-backed security principal repayments, deposit growth and borrowings from the Federal Home Loan Bank are presently the main sources of the Company's liquidity. The Company's primary uses of liquidity are to fund loans, operating expenses, deposit withdrawals, repay borrowings and to make investments.

## Edgar Filing: AMERICAN COMMUNITY BANCSHARES INC - Form 10-Q

As of June 30, 2005, liquid assets (cash and due from banks, interest-earning deposits with banks, and investment securities available for sale) were approximately \$67.6 million, which represents 16.1% of total assets and 18.3% of total deposits and borrowings. Supplementing this liquidity, the Company has

- 15 -

**Table of Contents**

available lines of credit from correspondent banks of approximately \$20.0 million and an additional line of credit with the FHLB equal to 15% of assets (subject to available qualified collateral, with borrowings of \$12.4 million outstanding from the FHLB at June 30, 2005). At June 30, 2005, outstanding commitments to extend credit were \$7.4 million and available line of credit balances totaled \$65.7 million. Management believes that the combined aggregate liquidity position of the Company is sufficient to meet the funding requirements of loan demand and deposit maturities and withdrawals in the near term.

Certificates of deposit represented 58.7% of the Company's total deposits at June 30, 2005, and 58.9% at December 31, 2004. The Company's growth strategy will include efforts focused at increasing the relative volume of transaction deposit accounts. Certificates of deposit of \$100,000 or more represented 33% of the Company's total deposits at June 30, 2005. These deposits are generally considered rate sensitive, but management believes most of them are relationship-oriented. While the Company will need to pay competitive rates to retain these deposits at maturity, there are other subjective factors that will determine the Company's continued retention of those deposits.

Banks and bank holding companies, as regulated institutions, must meet required levels of capital. The FDIC and the Federal Reserve, the primary regulators of the Bank and Bancshares, respectively, have adopted minimum capital regulations or guidelines that categorize components and the level of risk associated with various types of assets. Financial institutions are expected to maintain a level of capital commensurate with the risk profile assigned to its assets in accordance with these guidelines. At June 30, 2005, the Company maintained capital levels exceeding the minimum levels for well capitalized bank holding companies and banks.

## **Table of Contents**

### *Asset Quality*

No material changes have occurred in the Company's asset quality since December 31, 2004.

### **Item 3. Quantitative and Qualitative Disclosures about Market Risk**

Market risk reflects the risk of economic loss resulting from adverse changes in market price and interest rates. This risk of loss can be reflected in diminished current market values and/or reduced potential net interest income in future periods.

The Company's market risk arises primarily from interest rate risk inherent in its lending and deposit-taking activities. The structure of the Company's loan and deposit portfolios is such that a significant decline in interest rates may adversely impact net market values and net interest income. The Company does not maintain a trading account nor is the Company subject to currency exchange risk or commodity price risk. Interest rate risk is monitored as part of the Company's asset/liability management function, which is discussed above in Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations under the heading Liquidity and Capital Resources.

Management does not believe there has been any significant change in the overall analysis of financial instruments considered market risk sensitive since December 31, 2004.

### **Item 4. Controls and Procedures**

The Company maintains a system of internal controls and procedures designed to provide reasonable assurance as to the reliability of the consolidated financial statements and other disclosures included in this report. The Company's Board of Directors, operating through its audit committee which is composed entirely of independent outside directors, provides oversight to the Company's financial reporting process.

The Company's management, under the supervision and with the participation of the Chief Executive Officer and the Chief Financial Officer of the Company (its principal executive officer and principal financial officer, respectively), have concluded based on their evaluation as of the end of the period covered by this quarterly report that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports filed or submitted by it under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms, and include controls and procedures designed to ensure that information required to be disclosed by the Company in such reports is accumulated and communicated to the Company's management, including the Chief Executive Officer and the Chief Financial Officer of the Company, as appropriate to allow timely decisions regarding required disclosure.

There were no significant changes in the Company's internal controls during the Company's last fiscal quarter that could significantly affect the Company's internal control over financial reporting.
