SILICON GRAPHICS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Basis of Presentation

These unaudited condensed consolidated financial statements include the accounts of Silicon Graphics, Inc. and our wholly owned subsidiaries. The unaudited results of operations for the interim periods shown herein are not necessarily indicative of operating results for the entire fiscal year. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) necessary to present fairly the financial position, results of operations, and cash flows for all periods presented have been made. These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the fiscal year ended June 24, 2005 filed with the Securities and Exchange Commission. During the first six months of fiscal 2006, our accounting calendar had 27 weeks compared with 26 weeks during the first six months of fiscal 2005.

We have incurred operating losses and negative cash flows from operations during each of the past several fiscal years. Our working capital at December 30, 2005 was \$48 million, down slightly from \$49 million at June 24, 2005. We used cash in operations of \$25 million during the six-month period ended December 30, 2005. Additionally, we had a stockholders' deficit of \$253 million at December 30, 2005, compared with \$191 million at June 24, 2005. During the second quarter of fiscal 2006, we borrowed an initial \$35 million against the term loan portion of our credit facility and as such, our unrestricted cash and marketable investments at December 30, 2005 were \$66 million, up from \$64 million at June 24, 2005. On November 7, 2005, our securities were suspended from trading on the NYSE and our common stock was subsequently delisted from the NYSE effective January 13, 2006. Since the date of suspension, our common stock has been traded on the over-the-counter securities market under the symbol SGID and is currently quoted on the OTC Bulletin Board. This transition has adversely affected the market price of our common stock and 6.5% Senior Secured Convertible Notes and may adversely impact our future liquidity and access to the capital markets. We also postponed our annual meeting of stockholders until March 23, 2006 in order to include, among other things, an additional proposal for stockholders to approve an amendment to our Restated Certificate of Incorporation that will effect a reverse stock split of our common stock. We are currently proposing a reverse stock split to stockholders at ratios in the range of 1-for-10 to 1-for-20. We believe that a reverse stock split will improve the trading characteristics of our common stock as well as facilitate our efforts to seek additional investment or strategic alternatives with the goal of preserving and creating value for the benefit of stockholders and creditors.

During the fourth quarter of fiscal 2005, we retained the turnaround firm AlixPartners LLC. The AlixPartners LLC engagement includes assisting us in developing and implementing a restructuring program aimed at further substantial expense reductions, revenue and margin improvement initiatives and improved cash flow and liquidity.

On August 30, 2005, we approved a restructuring plan and began to implement a reduction in force with notifications to affected employees in North America and certain other locations on September 1, 2005, with further notifications communicated to international employees during the second quarter ended December 30, 2005. In addition to the headcount reductions, the restructuring plan includes initiatives to reduce expenses in other areas, including procurement costs for goods and services, consolidation and reorganization of operations in several locations including exiting one building at our U.S. corporate headquarters, reducing marketing spending by focusing on the highest priority activities and benefits and other spending controls. See Note 3 for additional discussion related to our restructuring plans.

As our cash position at the end of fiscal 2005 was not sufficient to support our on-going operations, we actively sought to raise additional financing. On October 25, 2005, we announced the completion of a new two-year asset-backed credit facility with Wells Fargo Foothill, Inc. and

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

Ableco Finance LLC. During the second quarter of fiscal 2006, we borrowed an initial \$35 million against the term loan portion of this facility and on February 3, 2006, borrowed the remaining \$15 million. See Notes 9, 11 and 18 for additional discussion related to this new credit facility. Although we were in compliance with all covenants contained in this new credit facility as of December 30, 2005, we cannot be certain that we will be able to maintain compliance with all of the covenants or that this additional financing will be adequate to meet our requirements or achieve our objectives.

Table of Contents

Although we secured additional financing on October 25, 2005 as described in Note 9, there are significant risks associated with the achievement of our goals for fiscal 2006. While we are implementing initiatives developed in conjunction with AlixPartners LLC that are aimed at improving revenue and margins for our core systems products, we still consumed cash from operations through the second quarter of fiscal 2006 and expect to consume cash in the third quarter of fiscal 2006. The new funds and our current sources of liquidity will only be adequate for our fiscal 2006 operating needs if our restructuring plan yields its anticipated savings and we meet the goals of our credit agreement for fiscal 2006. If we fail to achieve these objectives, we will likely consume additional cash in our operations, which would further impair our liquidity. If we are unable to achieve our objectives, we would consider alternatives for ensuring the continued operation of our business. These alternatives could include further reductions in headcount and in the scope of our operations, generating cash from selling or licensing our intellectual property and seeking funding from marketing partners and government customers.

On January 27, 2006, the Board of Directors appointed Mr. Dennis McKenna as our new President and Chief Executive Officer in order to effectuate the turnaround of our business. In addition, our Board of Directors appointed Mr. McKenna as a director and Chairman of the Board on February 1, 2006. We are currently in a transition period as a result of this leadership change. Although we have not yet announced any material changes to our overall business strategy or operations, we expect to have strategic or operational changes to our business in the future and we cannot assure you that such strategic or operational changes, if any, will lead to an improvement of our business and financial condition.

In light of these challenges, our Board of Directors is continuing to evaluate a range of strategic alternatives with the goal of preserving and creating value for the benefit of stockholders and creditors. Alternatives include pursuing our current strategy as an independent public company, seeking a strategic partner or acquirer, seeking a financial partner to make a substantial equity investment, divesting additional technologies or products, or some combination of the foregoing. We cannot assure that any acquisition or other change in control transaction will occur, or that if such a transaction does occur that it would result in stockholders realizing value equal to or greater than the current trading price of our common stock. If we fail to implement one or more of these alternatives successfully and we have a significant shortfall against our fiscal 2006 operating plan, we could be forced to seek protection under bankruptcy laws.

2. Share-Based Compensation

Share-based Compensation Plans

During the six month period ended December 30, 2005 and for the three preceding fiscal years ended June 24, 2005, we had three active share-based compensation plans, as described below.

Our Amended and Restated 1993 Long-Term Incentive Stock Plan (the 1993 Plan) permits the grant to our employees of up to 3,800,000 restricted shares of our common stock and up to 30,938,808 of share options on our common stock. The 1993 Plan also permits the issuance of stock appreciation rights (SARs). Option awards are generally granted with an exercise price equal to the market price of our common stock at the date of grant; those awards generally vest based on four years of continuous service and have seven-year contractual terms. Restricted share awards generally vest in four annual installments. Vesting may be accelerated if there is a change in control of SGI and the successor corporation does not assume or issue an equivalent share right. Currently, there are no shares of restricted stock subject to repurchase.

Our Amended and Restated 1996 Supplemental Non-Executive Equity Incentive Plan (the 1996 Plan) permits the grant of shares of our common stock or equivalent instruments to our employees (which may be subject to conditions and restrictions) and/or of share options on up to a total of 22,500,000 shares of our common stock. Option awards are generally granted with an exercise price equal to the market price of our common stock at the date of grant; those awards generally vest based on four years of continuous service and have seven-year contractual terms.

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

Restricted share awards generally vest in four annual installments. Vesting may be accelerated if there is a change in control of SGI and the successor corporation does not assume or issue an equivalent share right.

Our Amended and Restated 1998 Employee Stock Purchase Plan (ESPP) allows eligible employees to purchase

Table of Contents

our stock through payroll deductions at 85% of the lower of the closing prices for the stock at the beginning or the end of the purchase period. Purchases are limited to 10% of each employee's compensation and cannot exceed an amount set by the Board of Directors. On January 26, 2006, the Board of Directors suspended new offering periods under the ESPP until otherwise determined by the Board.

On January 26, 2006, the Board approved certain minor amendments to the 1993 Plan, 1996 Plan and ESPP Plan required to qualify the grant of options and issuance of shares under the plans under applicable state securities laws.

Adoption of SFAS 123(R)

Effective June 25, 2005, we adopted the fair value recognition provisions of SFAS 123(R), *Share-Based Payment*, using the modified-prospective transition method and therefore we have not restated our financial results for prior periods. Under that transition method, compensation cost recognized in the three and six months ended December 30, 2005 includes the following: (a) compensation cost related to any share-based payments granted through, but not yet vested as of June 24, 2005, and (b) compensation cost for any share-based payments granted subsequent to June 24, 2005, based on the grant-date fair value estimated in accordance with the provisions of SFAS 123(R). We recognize compensation expense for the fair values of these awards, which have graded vesting, on a straight-line basis over the requisite service period of each of these awards.

Compensation Costs

The compensation costs that have been included in our results of operations and the total income tax benefit, if any, that we recognized on our statement of operations for these share-based compensation arrangements were as follows for the three and six month period ended December 30, 2005 (in thousands):

	Three Months Ended	Six Months Ended
	Dec. 30, 2005	Dec. 30, 2005
	<u> </u>	<u> </u>
Share-based compensation costs included in:		
Cost of product and other revenue	\$ 36	\$ 78
Cost of service revenue	101	220
Research and development	236	531
Selling, general, and administrative	383	836
	<u> </u>	<u> </u>
Total share-based compensation costs	756	1,665
Income tax benefit recognized		
	<u> </u>	<u> </u>
	<u>\$ 756</u>	<u>\$ 1,665</u>

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

Because the amount of share-based compensation associated with our cost of production is not significant, we did not capitalize any share-based compensation cost as part of inventory and fixed assets during the three- and six-month periods ended December 30, 2005. Net cash proceeds from the exercise of stock options were \$0.1 million and \$0.4 million for the three- and six-month periods ended December 30, 2005, respectively. No income tax benefit was realized from stock option exercises during the three and six month periods ended December 30, 2005. In accordance with SFAS 123(R), we present excess tax benefits from the exercise of stock options, if any, as financing cash flows rather than operating cash flows.

Prior to June 25, 2005, we accounted for our share-based compensation plans under the recognition and measurement provisions of APB Opinion No. (APB) 25, *Accounting for Stock Issued to Employees*, and related guidance, as permitted by SFAS 123, amended by SFAS 148, *Accounting for Stock-Based Compensation-Transition and Disclosure (SFAS 148)*. We did not recognize any significant share-based employee compensation costs in our statements of operations prior to fiscal 2006, as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant. As required by SFAS 148 prior to the adoption of SFAS 123(R), we provided pro forma net loss and pro forma net loss per common share disclosures for stock-based awards, as if the fair-value-based method defined in SFAS 123 had been applied.

Table of Contents

The following table presents the pro forma effect on net loss from continuing operations and net loss per share if we had applied the fair value recognition provisions of SFAS 123 to options granted under our share-based compensation arrangements during the three and six month periods ended December 24, 2004 (in thousands, except per share amounts):

	Three Months Ended	Six Months Ended
	Dec. 24, 2004	Dec. 24, 2004
Net loss from continuing operations, as reported	\$ (11,149)	\$ (39,078)
Add:		
Stock-based employee compensation expense included in net loss from continuing operations	8	17
Deduct:		
Stock-based employee compensation expense determined under fair value method	(1,719)	(3,115)
Net loss from continuing operations, pro forma	\$ (12,860)	\$ (42,176)
Net loss per share from continuing operations basic and diluted:		
As reported	\$ (0.04)	\$ (0.15)
Pro forma	\$ (0.05)	\$ (0.16)

For purposes of this pro forma disclosure, we estimated the value of the options using a Black-Scholes-Merton closed-form option pricing formula and amortized that value to expense over the options vesting periods. We allocated this fair value to the pro forma compensation expense of our fiscal periods using the accelerated expense attribution method specified in FASB Interpretation No. (FIN) 28, *Accounting for Stock Appreciation Rights and Other Variable Stock Option or Award Plans*.

Valuation of Stock Option Awards

The fair value of each option award is estimated on the date of grant using the Black-Scholes-Merton closed-form option valuation model that uses the assumptions noted in the following table. Expected volatilities are based on historical volatility of our stock and other factors. We use historical data to estimate the options expected term, which represents the period of time that options granted are expected to be outstanding. For purposes of performing our valuation, we separated our employees into two groups, within which the employees have similar historical exercise behavior; the ranges given below result from certain groups of employees exhibiting different behavior. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

	Three months ended				Six months ended								
	Dec. 30, 2005				Dec. 24, 2004				Dec. 30, 2005				Dec. 24, 2004
Expected volatility	1.1				1.0				1.1				1.1
Expected term (in years)	2.76	3.66	4.39	5.56	2.76	3.66	4.39	5.52					
Risk-free rate	4.41%	4.42%	3.93%	4.07%	3.98%	4.24%	3.90%-4.07%						
Expected dividends	0%				0%				0%				

Table of Contents*Summary of Stock Options*

A summary of options under all of our share-based compensation plans as of December 30, 2005 and changes during the first six months of fiscal 2006 are as follows (in thousands, except exercise price and contractual term):

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (in Years)	Aggregate Intrinsic Value
Options outstanding at June 24, 2005	35,441	\$ 2.58		
Options granted	405	\$ 0.67		
Options exercised	(746)	\$ 0.54		
Options forfeited or expired	(3,693)	\$ 2.72		
Options outstanding at December 30, 2005	31,407	\$ 2.58	5.61	\$ 0.00
Options vested and exercisable at December 30, 2005	24,612	\$ 2.91	5.30	\$ 0.00

Aggregate intrinsic value is the sum of the amounts by which the quoted market price of our stock exceeded the exercise price of the options at December 30, 2005, for those options for which the quoted market price was in excess of the exercise price (in-the-money options). The weighted-average grant-date fair value of options granted during the first six months of fiscal 2006 and fiscal 2005 was \$0.67 and \$1.66, respectively. The total intrinsic value of options exercised during the six months ended December 30, 2005, was \$0.1 million.

As of December 30, 2005, \$2.1 million of total unrecognized compensation cost related to unvested share-based compensation arrangements granted under our various plans is expected to be recognized over a weighted-average period of 2.3 years.

Employee Stock Purchase Plan

As of December 30, 2005, we had issued 25,715,491 shares over the life of the ESPP and its predecessor plans. 2,454,478 and 970,352 shares were issued during the first six months of fiscal 2006 and fiscal 2005, respectively. As of December 30, 2005, we had 6,560,531 shares in reserve for future issuance under the plan; however, on January 26, 2006, the Board of Directors suspended new offering periods under the ESPP until otherwise determined by the Board.

The fair value of each option element of our ESPP is estimated on the date of grant using the Black-Scholes-Merton closed-form option valuation model that uses the assumptions noted in the following table. Expected volatilities are based on historical volatility of our stock and other factors. Expected term represents the six-month offering period for our ESPP. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

	Six months ended	
	Dec. 30, 2005	Dec. 24, 2004
Expected volatility	0.72	1.1
Expected term (in years)	0.5	0.5
Risk-free rate	3.79%	1.69%
Expected dividends	0%	0%

Disclosures Pertaining to All Share-Based Compensation Plans

Cash received from option exercises and ESPP contributions under all share-based payment arrangements for the first six months of fiscal 2006 and fiscal 2005 was \$1.7 million and \$2.5 million, respectively. Because of our net operating losses, we did not realize any tax benefits for the tax deductions from share-based payment arrangements during the first six months of fiscal 2006 and fiscal 2005.

Table of Contents**3. Other Operating Expenses, Net**

Other operating expenses, net represents the costs associated with our restructuring and charges associated with changes in the estimated useful lives of certain leasehold improvements and furniture and fixtures related to facilities in the process of being vacated. These actions, by plan, were as follows during the first six months of fiscal 2006 (in thousands):

	Balance at June 24, 2005	Costs Incurred	Adjust- ments	Non-cash Settlements and Other	Cash Payments	Balance at Dec 30, 2005

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

Total of all restructuring plans	\$ 45,518	\$ 17,701	\$ (402)	\$ (687)	\$ (17,396)	\$ 44,734
----------------------------------	-----------	-----------	----------	----------	-------------	-----------

During the first six months of fiscal 2006, we made \$17 million in payments related to all of our restructuring plans and actions, \$8 million of which was for severance and related charges and \$9 million of which was for vacated facilities obligations, primarily rent. We recognized costs of \$18 million, of which \$9 million was for severance and related charges and \$9 million was for accretion and other costs related to our vacated leased facilities. We made minor adjustments of \$0.4 million to our estimates of severance and related costs and vacated facilities costs associated with all restructuring plans. We recorded \$0.7 million in non-cash adjustments. These adjustments included approximately \$5 million of credits related to deferred rent on vacated facilities, offset in part by approximately \$4 million in charges for the acceleration of depreciation associated with changes in the estimated useful lives of certain leasehold improvements and furniture and fixtures related to one of our current buildings at our U.S. corporate headquarters that is in the process of being vacated.

The restructuring liability balance of \$45 million at December 30, 2005 includes \$42 million of facility-related liabilities and \$3 million in severance obligations. The facility-related liabilities of \$42 million represent \$182 million in future non-cancelable rental payments due, less estimated sublease income of \$103 million, the majority of which is under contract, and less \$37 million in accretion expense that will be recognized through fiscal 2014. We expect to pay

Table of Contents

the majority of the accrued severance and related charges and \$14 million of facility-related charges during the 12 months following December 30, 2005, with the remainder of our restructuring obligations to be paid through fiscal 2014.

As of December 30, 2005, we have completed the execution of our fiscal 2000 and fiscal 2001 restructuring plans. As of December 30, 2005, we have substantially completed the execution of our fiscal 2002, fiscal 2003, fiscal 2004, and fiscal 2005 restructuring plans, with the exception of certain severance obligations of our international subsidiaries and payments associated with vacated leased facilities that have lease terms expiring through fiscal 2014. These facilities obligations are presented in these condensed consolidated financial statements net of aggregate estimated sublease income of \$93 million. Of this estimated sublease income, \$86 million is under contract and \$7 million is not under contract.

As part of our fiscal 2004 restructuring plan, we agreed to sublease our Amphitheatre Technology Center campus in Mountain View, California and relocated our headquarters to our nearby Crittenden Technology Center campus. As required by SFAS 146, *Accounting for Costs Associated with Exit or Disposal Activities (SFAS 146)*, we determined the fair value of our future contractual obligations under these operating leases for this facility using our credit-adjusted risk-free interest rate estimated at approximately 22% as of the date we ceased to use the leased properties. As of December 30, 2005, the fair value of our future remaining obligations for the leased properties was \$33 million. On a quarterly basis over the periods from the respective cease-use dates to the end of the lease terms (concluding in fiscal 2013), we are required to accrete these discounted future obligations up to their contractually obligated amount of \$64 million using the effective interest method. This undiscounted value is net of \$86 million of contractual sublease income for this facility. In fiscal 2004, we began recording restructuring accretion expense, which we expect to be between \$2 million and \$7 million annually through fiscal 2013. During the three- and six month periods ended December 30, 2005, we recorded \$2 million and \$4 million, respectively, in restructuring accretion expense for the Amphitheatre Technology Center.

As part of our fiscal 2005 restructuring plan, we vacated sales and administrative facilities throughout the world. As required by SFAS 146, we calculated and accrued the fair value of our future contractual obligations under these operating leases using our credit-adjusted risk-free interest rate estimated at approximately 22% as of the date we ceased to use the leased properties. As of December 30, 2005, the fair value of our future remaining obligations for the leased properties was \$5 million. On a quarterly basis over the periods from the respective cease-use dates to the end of the lease terms (concluding in fiscal 2014), we are required to accrete these discounted future obligations for the leased property up to their contractually obligated amount of \$9 million using the effective interest method. This undiscounted value is net of \$7 million of non-contractual estimated sublease income of \$8 million partially offset by estimated sublease execution costs of \$1 million. In fiscal 2005, we began to record restructuring accretion expense, which we expect to be \$1 million or less annually for this facility through fiscal 2014. Accretion expense was \$0.6 million during the six month period ended December 30, 2005.

In an effort to further reduce our operating expenses, we began to implement restructuring activities under the fiscal 2006 restructuring plan during the first and second quarters of fiscal 2006. Under the fiscal 2006 restructuring plan, we eliminated approximately 217 positions across most levels and functions. We expect to eliminate more positions under the fiscal 2006 restructuring plan and expect to complete these actions and make the remaining payments related to this fiscal 2006 action by the end of fiscal 2006. Our obligation for severance and related charges under the fiscal 2006 restructuring plan was \$3 million as of December 30, 2005. We also vacated approximately 70,785 square feet of R&D and administrative facilities in California and Minnesota in the second quarter of fiscal 2006. As required by SFAS 146, we calculated and accrued the fair value of our future contractual obligations under these operating leases using our credit-adjusted risk-free interest rate estimated at approximately 33% as of the date we ceased to use the leased properties. As of December 30, 2005, the fair value of our future remaining obligations for the leased properties was \$4 million. On a quarterly basis over the periods from the respective cease-use dates to the end of the lease terms (concluding in fiscal 2014), we are required to accrete these discounted future obligations for the leased property up to their contractually obligated amount of \$6 million using the effective interest method. The undiscounted value is net of \$10 million of non-contractual estimated sublease income of \$11 million partially offset by estimated sublease execution costs of \$1 million. In the second quarter of fiscal 2006, we began to record restructuring accretion expense, which we expect to be \$0.5 million or less annually for these facilities through fiscal 2014. Accretion expense was not significant for the six month period ended December 30, 2005.

The restructuring and relocation costs incurred during the six month period ended December 30, 2005, the

Table of Contents

cumulative amount incurred through December 30, 2005, and the total amount expected to be incurred for each major type of cost associated with our restructuring plans accounted for in accordance with SFAS 146 (our fiscal 2003, fiscal 2004, fiscal 2005, and fiscal 2006 plans) were as follows (in thousands):

	<u>Products</u>	<u>Global Services</u>	<u>Total</u>

Total other current assets	\$ 27,673	\$ 37,765

6. Restricted Investments

Restricted investments consist of short- and long-term investments held under a security agreement (see Note 9) or pledged as collateral against letters of credit. The majority of our restricted investments are currently pledged as collateral against letters of credit and are primarily associated with two specific customer arrangements for significant multi-year contracts with long-term delivery and installation commitments. Restricted investments pledged as collateral are held in our name by major financial institutions.

7. Property and Equipment

Property and equipment were as follows (in thousands):

9. Financing Arrangement

On October 25, 2005, we entered into a two-year asset-backed credit facility with Wells Fargo Foothill, Inc. and Ableco Finance LLC. The facility provides for credit of up to \$100 million, consisting of a \$50 million revolving line of credit and a \$50 million term loan. The borrowing base under this credit facility is determined weekly based on the value of working capital items, real estate and intellectual property. The revolving line of credit bears interest payable monthly at the prime rate plus 0.75% for cash advances up to \$30 million (prime was 7.25% at December 30, 2005). We are using our full capacity under this revolving line to secure \$47 million in letters of credit, principally the rent deposits required under our leases for the Amphitheatre and Crittenden Technology Center campuses in Mountain View, California. We deposit additional cash collateral when the eligible accounts receivable and other collateral, which fluctuate within the quarter, are below the level needed to secure our letters of credit. The credit facility was secured by total cash collateral of \$7 million at December 30, 2005, which is included as a component of Short-term Restricted Investments. The term loan and cash advances greater than \$30 million bear interest payable monthly at the prime rate plus 4.5% or 10.0%, whichever is greater (11.75% was the rate at December 30, 2005, prime plus 4.5%). Letters of credit bear interest payable monthly up to a maximum rate of 3.0%. The facility does not require the permanent deposit of cash collateral. The facility is secured by substantially all of the assets of SGI and its domestic subsidiaries (the Borrowers) and includes covenants for, among other things, minimum levels of EBITDA, minimum levels of cash and cash equivalents, and limits on capital expenditures. Subject to certain specified exceptions, the credit facility also limits the ability of the Borrowers to incur additional indebtedness, create liens on their assets, enter into certain transactions (including mergers, consolidations and reorganizations), dispose of certain assets, pay dividends or other distributions on capital stock, repurchase capital stock or prepay or repurchase debt obligations. The credit facility is subject to acceleration upon various events of default, including nonpayment of principal, interest, fees or other amounts when due, violation of covenants, commencement of insolvency proceedings against any Borrower or any of its U.S. subsidiaries or material foreign subsidiaries, the entry of certain judgments against any Borrower or any of its subsidiaries, cross default to indebtedness of any Borrower or any of its subsidiaries, and invalidity of loan documents or security interests. During the second quarter of fiscal 2006, we borrowed an initial \$35 million against the term loan and on February 3, 2006, borrowed the remaining \$15 million. See Notes 11 and 18 for additional information.

We currently use our revolving line of credit under this facility with Wells Fargo Foothill, Inc. and Ableco Finance LLC solely to support letters of credit, including the \$47 million in letters of credit required under our lease obligations for the Crittenden and Amphitheatre Technology Center campuses in Mountain View, California and to support our current operations. Although we were in compliance with all the covenants contained in this new credit facility as of December 30, 2005, we cannot be certain that we will be able to maintain compliance with all of the covenants or that this additional financing will be adequate to meet our requirements or achieve our objectives.

10. Discontinued Operations

On June 15, 2004, we received \$58 million in gross proceeds for the sale of our Alias application software business (Alias) to Accel-KKR, a technology-focused private equity investment firm, and recorded a net gain of \$51 million on the transaction. The results of our Alias application software business for periods prior to its sale in June 2004 are reflected as discontinued operations. In the first six months of fiscal 2005, we incurred an additional \$0.3 million in transaction costs associated with this transaction.

Table of Contents**11. Long-Term Debt**

Long-term debt was as follows (in thousands):

	<u>Dec. 30, 2005</u>	<u>June 24, 2005</u>
6.50% Senior Secured Convertible Notes due June 1, 2009, including unamortized premium of \$16,625 at December 30, 2005 and \$18,970 at June 24, 2005	\$ 205,203	\$ 207,548
6.125% Convertible Subordinated Debentures due February 1, 2011, net of unamortized discount of \$5,982 at December 30, 2005 and \$6,442 at June 24, 2005	50,794	50,334
Term Loan due October 24, 2007	35,000	
11.75% Senior Secured Notes due June 1, 2009	2,386	2,386
Other	4,360	3,544
	<u>297,743</u>	<u>263,812</u>
Less amounts due within one year	(4,456)	(1,820)
Amounts due after one year	<u>\$ 293,287</u>	<u>\$ 261,992</u>

In December 2003, we exchanged \$224 million of newly issued 6.50% Senior Secured Convertible Notes (the Senior Secured Convertible Notes) and \$2 million of 11.75% Senior Secured Notes (the Senior Secured Notes) for 98% of our existing 5.25% Senior Convertible Notes (the 2004 Senior Notes). The Senior Secured Convertible Notes are convertible at the holders' option into shares of common stock at a conversion price equal to \$1.25 per share, and they are redeemable at our option beginning in December 2005. During calendar year 2006, the Senior Secured Convertible Notes may be redeemed at our option at 100% of the principal amount if the closing price of our common stock has been at least 150% of the conversion price for the 20 consecutive trading days ending two trading days prior to the notice of redemption. In the following years, the Senior Secured Convertible Notes may be redeemed at our option at 100% of the principal amount. The Senior Secured Notes are not convertible and are redeemable at our option at varying prices based on the year of redemption, beginning in June 2004 at 104% of the principal amount. Both the Senior Secured Convertible Notes and the Senior Secured Notes are redeemable at the option of the holder in the event of the sale of all, or substantially all, of our common stock for consideration other than common stock traded on a U.S. exchange or approved for quotation on the NASDAQ National Market. In addition, the indentures governing the Senior Secured Convertible Notes and the Senior Secured Notes contain covenants that, among other things, limit our ability to incur additional indebtedness, issue capital stock, pay dividends on and redeem or repurchase our capital stock, and prepay or repurchase subordinated debt. Both the Senior Secured Convertible Notes and the Senior Secured Notes are also secured by a junior priority security interest in those assets in which the lenders under our secured credit facility currently hold a senior priority security interest. See Note 9 to these Condensed Consolidated Financial Statements for further information regarding our secured credit facility.

The debt exchange was accounted for as an extinguishment of the tendered debt and resulted in a non-cash loss of approximately \$31 million recorded in the second quarter of fiscal 2004, primarily representing the difference between the fair value of the new debt instruments and the net carrying value of the extinguished debt. The difference is treated as a premium on the new Senior Secured Convertible Notes and is being amortized as an offset to interest expense over the term of the notes. None of our Senior Secured Convertible Notes were converted during the first six months of fiscal 2006. The unamortized premium on our Senior Secured Convertible Notes was reduced by \$2 million during the first six months of fiscal 2006 due to regular amortization.

In connection with the fiscal 1996 acquisition of Cray Research, Inc. (Cray), we assumed the 6.125% Convertible Subordinated Debentures due in 2011. These debentures are convertible into shares of our common stock at a conversion price of \$39.17 per share at any time prior to

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

maturity and may be redeemed at our option at a price of 100% of the principal amount. Prior to our acquisition of Cray, Cray repurchased a portion of the debentures with a face value of \$33 million. The repurchase satisfied the first six required annual sinking fund payments of \$6 million originally scheduled for fiscal years 1997 through 2002. In fiscal 2000 and fiscal 1999, we repurchased additional portions of the debentures with a face value of \$11 million and \$15 million, respectively. These repurchases satisfied the next four required annual sinking fund payments of \$6 million originally scheduled for fiscal 2003 through fiscal 2006. Remaining annual sinking fund payments of \$5 million in fiscal 2007 and \$6 million each in fiscal 2008 to 2010 are scheduled, with a final maturity payment of \$35 million in 2011. During the fourth quarter of fiscal 2005, we received a notice of default from a purported holder of more than 25% of these 2011 Debentures. For further information regarding this allegation, see Note 17.

Table of Contents

On October 25, 2005, we announced the completion of a new two-year asset-backed credit facility with Wells Fargo Foothill, Inc. and Ableco Finance LLC. The new facility provides for increased credit of up to \$100 million, consisting of a \$50 million revolving line of credit and a \$50 million term loan. The borrowing base under the new credit facility is determined weekly based on the value of working capital items, real estate and intellectual property. The revolving line of credit bears interest payable monthly at the prime rate plus 0.75% for cash advances up to \$30 million. We are using our full capacity under this revolving line to secure \$47 million in letters of credit, principally the rent deposits required under our leases for the Amphitheatre and Crittenden Technology Center campuses in Mountain View, California. The term loan and cash advances greater than \$30 million bear interest payable monthly at the prime rate plus 4.5% or 10.0%, whichever is greater. During the second quarter of fiscal 2006, we borrowed \$35 million against the term loan for which monthly payments are to begin in December 2006. Term loan payments are calculated based on the drawn amount of the term loan at the time payment is scheduled to begin. Equal payments are made based on a 36-month period; however, the outstanding unpaid principal balance and all accrued and unpaid interest under the term loan shall be due and payable on the date of termination of the Agreement. No portion of the term loan that is repaid may be re-borrowed. The new facility is secured by substantially all of the assets of SGI and its domestic subsidiaries (the Borrowers) and includes covenants for, among other things, minimum levels of EBITDA, minimum levels of cash and cash equivalents, and limits on capital expenditures. Subject to certain specified exceptions, the new credit facility also limits the ability of the Borrowers to incur additional indebtedness, create liens on their assets, enter into certain transactions (including mergers, consolidations and reorganizations), dispose of certain assets, pay dividends or other distributions on capital stock, repurchase capital stock or prepay or repurchase debt obligations. The credit facility is subject to acceleration upon various events of default. See Note 9 for additional information.

Other long-term debt at December 30, 2005 includes \$3 million of proceeds received in connection with products sold under certain sales-type lease arrangements, after which we sold the lease receivables to certain financial institutions. These long-term debt amounts represent future revenue streams for customer support contracts on those leased products that we are required under EITF 88-18, *Sales of Future Revenue*, to classify as debt. These future revenue streams will be amortized into revenue over the life of the contracts and will have no future cash-flow impact. Other long-term debt at December 30, 2005 also included a \$1 million loan secured by a receivable. The loan bears interest at a fixed annual rate of 5.22% and is repayable in quarterly installments ending in fiscal 2008.

12. Guarantees

Financial Guarantees

Financial guarantees include contracts that contingently require us to make payments to the beneficiary of the guarantee based on changes in an underlying variable (for example, a specified interest rate, security price, or other variable) that is related to an asset, liability, or equity security of the guaranteed party. Currently, we have issued financial guarantees to cover rent on leased facilities and equipment, in favor of government authorities and certain other parties to cover liabilities associated with the importation of goods and to support payments in advance of future delivery on our goods and services. The majority of our financial guarantees have terms of one year or less. Our maximum potential obligation under financial guarantees at December 30, 2005 was \$48 million for which we had \$48 million of assets held as collateral.

Assets held as collateral closely approximate fair value. At December 30, 2005, we did not have any obligations associated with our guarantees that met the criteria to be recorded as liabilities on our statement of financial position.

Table of Contents**Product warranty**

At the time of sale, we provide for an estimated cost to warrant our products against defects in materials and workmanship for a period of up to one year on UNIX and Linux systems and up to three years on storage systems. Product warranty activity was as follows (in thousands):

	Six Months Ended	
	Dec. 30, 2005	Dec. 24, 2004
Product warranty beginning balance	\$ 6,442	\$ 5,203
New warranties issued	4,137	5,411
Warranties paid	(4,339)	(4,860)
Changes in warranty rate estimates	(199)	684
Product warranty ending balance	\$ 6,041	\$ 6,438

13. Loss Per Share

Set forth below is a reconciliation of basic and diluted loss per share from continuing operations (in thousands, except per share amounts):

	Three Months Ended		Six Months Ended	
	Dec. 30, 2005	Dec. 24, 2004	Dec 30, 2005	Dec. 24, 2004
Net loss from continuing operations	\$ (31,433)	\$ (11,149)	\$ (63,504)	\$ (39,078)
Weighted average shares outstanding basic and diluted	268,383	262,487	267,572	262,263
Net loss per share from continuing operations basic and diluted	\$ (0.12)	\$ (0.04)	\$ (0.24)	\$ (0.15)
Potentially dilutive weighted securities excluded from computations because they are anti-dilutive	153,309	155,848	153,802	156,895

14. Comprehensive Loss

The components of comprehensive loss, net of tax, were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	Dec. 30, 2005	Dec. 24, 2004	Dec. 30, 2005	Dec. 24, 2004
Net loss	\$ (31,433)	\$ (11,149)	\$ (63,504)	\$ (39,354)
Change in net unrealized gain on derivative instruments designated and qualifying as cash flow hedges	244	109	(1,367)	(88)
Foreign currency translation loss adjustments	(10)		(434)	(1,275)
Comprehensive loss	\$ (31,199)	\$ (11,040)	\$ (65,305)	\$ (40,717)

15. Segment Information

SGI has two reportable segments, Products and Global Services. Our reportable segments are determined after assessment of factors such as quantitative thresholds of business components to be included into reportable segments,

Table of Contents

customer base, economic characteristics, homogeneity of products, technology, delivery channels, and other factors. This determination aligns reportable segments with the process by which our Chief Executive Officer makes operating decisions and evaluates performance.

Products

Our Products segment is comprised of our Core Systems based on the Intel® Itanium® 2 microprocessor and Linux® operating system as well as our storage solutions and our Legacy Systems based on the MIPS® RISC microprocessor and IRIX® operating system including the remarketed versions of these workstations, graphics systems, high-performance servers and storage solutions. Our Products are distributed through our direct sales force and through indirect channels, including resellers, distributors, and systems integrators.

Our Core Systems are comprised of our high-performance servers and visualization systems based on Intel Itanium 2 microprocessors and the Linux operating system and storage solutions. Our Core Systems include the SGI® Altix® family of high-performance servers and the SGI® InfiniteStorage line of storage solutions. These are high-performance supercomputing systems designed for technical computing applications, and they are also used as storage management servers for managing very large data repositories that contain critical information and media servers for broadcast television applications. Our Core Systems also include the Silicon Graphics Prism family of visualization systems. These visualization systems are used in a variety of applications, including computer-aided design, medical imaging, 2D and 3D animation, broadcast, modeling, and simulation. Our graphics systems integrate high-performance computing, data management, and high-performance visualization into a single system.

Our Legacy Systems are comprised of our high-performance servers and visualization systems based on MIPS RISC microprocessors and the IRIX operating system. Our Legacy Systems include the SGI® Origin® family of high-performance servers. These are high-performance supercomputing systems designed for technical computing applications, and they are also used as storage management servers for managing very large data repositories that contain critical information and media servers for broadcast television applications. Our Legacy Systems also include the Silicon Graphics® Tezro® and Silicon Graphics Fuel® workstations and the SGI® Onyx® family of graphics systems. These workstations are used in a variety of applications, including computer-aided design, medical imaging, 2D and 3D animation, broadcast, modeling, and simulation. Our graphics systems integrate high-performance computing, data management, and high-performance visualization into a single system. Our Legacy Systems also include the remarketed versions of the MIPS/IRIX-based workstations, graphics systems and high-performance servers as well as remarketed versions of our storage solutions.

Global Services

Our Global Services segment supports our computer hardware and software products and provides professional services to help customers realize the full value of their information technology investments. Our professional services organization provides technology consulting, education, managed services, and third-party products.

Segment Results

We evaluate our segments based on profit or loss from operations before interest and taxes.

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

Expenses for research and development, sales and marketing, manufacturing, and finance and administration are allocated to the reportable segments and are included in the results reported. We do not identify or allocate assets or depreciation by operating segment, nor do we evaluate segments on these criteria. Operating segments do not sell products to each other, and accordingly, there is no inter-segment revenue to be reported.

Table of Contents

Operating results for our reportable segments were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	Dec. 30, 2005	Dec. 24, 2004	Dec. 30, 2005	Dec. 24, 2004
Revenue from external customers:				
Products	\$ 73,495	\$ 144,901	\$ 172,187	\$ 242,570
Global services	70,898	78,201	141,883	155,939
Total consolidated	\$ 144,393	\$ 223,102	\$ 314,070	\$ 398,509
Operating income (loss):				
Products	\$ (29,204)	\$ (6,758)	\$ (56,918)	\$ (34,993)
Global services	10,397	2,809	19,025	7,951
Total reportable segments	(18,807)	(3,949)	(37,893)	(27,042)
Restructuring	(10,114)	(5,199)	(17,299)	(8,365)
Total consolidated	\$ (28,921)	\$ (9,148)	\$ (55,192)	\$ (35,407)

16. Related Party Transactions

Our proportionate share of SGI Japan's financial results is included as a component of Interest and Other Income (Expense), net in accordance with APB 18, *The Equity Method of Accounting for Investments in Common Stock*. We record revenue for products sold to SGI Japan when evidence of an arrangement exists, delivery has occurred, the price is fixed and determinable and collectibility is reasonably assured as prescribed by SEC Staff Accounting Bulletin No. (SAB) 104, *Revenue Recognition*. However, because of our related party relationship with SGI Japan, we reduce our proportionate share of their financial results for any SGI product sold to SGI Japan that has not been sold through to their customers, by the amount of profit on those transactions. Due to the timing of receipt of financial reporting information from SGI Japan, these entries are recorded on a one-quarter lag, unless the amount of profit on product not yet sold through to SGI Japan's customers during the quarter is materially different than previous quarters. When materially different, we reduce our proportionate share of SGI Japan's financial results by the amount of the profit on those specific transactions in the current quarter.

Revenue and standard cost of revenue associated with sales to SGI Japan were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	Dec. 30, 2005	Dec. 24, 2004	Dec. 30, 2005	Dec. 24, 2004
Product revenue	\$ 4,839	\$ 27,823	\$ 21,665	\$ 33,674
Standard cost of product revenue	\$ 2,763	\$ 18,531	\$ 13,635	\$ 22,135

Aggregate amounts receivable from and amounts payable to SGI Japan were immaterial at December 30, 2005 and December 24, 2004.

17. Contingencies

Our U.S. income tax returns for fiscal years 2002 to 2004 are open, and to date, we have not been notified of any pending audits or of any proposed adjustments to those returns. We are also negotiating the settlement of tax issues relating to our investment in Cray Research that affect the years 1984 through 1988. The current settlement proposals may result in a significant tax credit. We are currently being audited for state sales and use tax matters for the years 2001 through 2005 in Wisconsin and Minnesota. In addition, we have open income tax, VAT, and sales tax audits for years 1995 through 2005 in various foreign jurisdictions. The most significant of these audits surrounds proposed adjustments we made in April 2005 to our Canadian federal tax returns for fiscal years 1996 through 2004. The adjustments are currently being reviewed by the Canadian Revenue Authorities and if accepted, may result in a significant tax credit. Our tax reserves associated with these historic Canadian federal tax returns have been prepared on the basis of issued assessments for fiscal years 1996 through 2002 and submitted tax returns for fiscal years 2003 and 2004. The outcome of any tax audit cannot be predicted with certainty, but we believe that any resulting audit adjustments to any of our open tax returns will not result in a material adverse impact on our financial condition, results of operations, or cash flows within the next twelve months.

Table of Contents

SCO Group, the successor to AT&T as the owner of certain UNIX system V intellectual property and as our licensor, has publicly claimed that certain elements of the Linux operating system infringe SCO Group's intellectual property rights. In August 2003, we received a letter from SCO Group alleging that, as a result of our activities related to the Linux operating system, we are in breach of the fully paid license under which we distribute our IRIX operating system. The letter purported to terminate our UNIX System V license effective October 14, 2003. We have not received any communication from SCO with regard to this purported termination since that time. We believe that the SCO Group's allegations are without merit and that our fully paid license is non-terminable. There can be no assurance that this dispute with SCO Group will not escalate into litigation, which could have a material adverse effect upon SGI, or that SCO Group's intellectual property claims, which include a widely-publicized litigation against IBM Corporation, will not impair market acceptance of the Linux operating system.

On August 10, 2005, we filed a lawsuit with the LG Munich, a Higher Regional Court in Germany, against T-Systems International GmbH (TSI), a systems integrator, relating to a dispute regarding whether acceptance criteria were met with regard to an SGI system delivered in the spring of 2003. We are seeking full payment for the system in an amount equal to 4.6 million (\$5.4 million based on the conversion rate as of December 30, 2005). On September 21, 2005, TSI filed a counterclaim contesting our claim and alleging damages of 9 million plus interest since April 2004 (\$10.7 million based on the conversion rate as of December 30, 2005), which exceeds our contractual limit of liability of 2 million (\$2.4 million based on the conversion rate as of December 30, 2005). On December 7, 2005, we responded to TSI's counterclaim and filed a motion seeking an additional 3.8 million (\$4.5 million based on the conversion rate as of December 30, 2005) for lost profit relating to maintenance services. We cannot currently predict the outcome of this dispute.

On July 12, 2005, we disclosed that we had received a notice of default from a purported holder of more than 25% of our 6.125% Convertible Subordinated Debentures due 2011 (the 2011 Debentures), which we assumed when we acquired Cray Research in 1996 (see Note 11). The notice alleged that the indenture for the 2011 Debentures was breached in 2000 when we sold assets relating to certain former Cray Research product lines to Tera Computer Company (now known as Cray, Inc.) without causing Tera to assume the indenture. As a result of the notice and the expiration of the applicable cure period, such holder may now seek to accelerate the maturity of the 2011 Debentures. We strongly disagree with the claims made in the notice and intend to vigorously challenge any claim of an event of default. There are currently \$57 million outstanding principal amount of 2011 Debentures, and all required interest and principal payments have been made timely. The indenture provides that upon an event of default the indenture trustee or the holders of at least 25% of the 2011 Debentures may cause the outstanding principal amount plus accrued interest to be immediately due and payable. The 2011 Debentures are unsecured and subordinated. The debenture holders or trustee would be required to commence legal proceedings and obtain a judgment in order to enforce their claim on the assets of SGI. No notice of acceleration or legal proceedings with respect to this claimed default has been received.

A default entitling acceleration under the indenture for the 2011 debentures would trigger an event of default under our new asset-backed credit facility announced on October 25, 2005. Acceleration of the maturity of the 2011 debentures would trigger an event of default under our lease agreements with respect to certain facilities in Mountain View, California. We have reviewed the claimed default with the counterparties under these agreements and requested that they refrain from exercising any rights they may have arising from the claimed default. We are not aware that any of the counterparties under these agreements intend to take any action at this time.

On July 29, 2005, Syntegra (USA), Inc., a computer repair services vendor, filed a complaint against SGI in the U.S. District Court, Northern District of California, in connection with SGI's termination of its contract with Syntegra and transition of its business to an alternate vendor alleging, among other things, breach of contract, unfair competition and misappropriation of trade secrets. This complaint was dismissed from the federal court as improperly filed and on September 20, 2005, Syntegra re-filed a substantively similar complaint in the Superior Court of California, Santa Clara County. On November 7, 2005, SGI filed its answer to Syntegra's complaint and, additionally, filed a cross complaint against Syntegra for, among other things, declaratory relief and breach of contract. We intend to vigorously defend against Syntegra's allegations and pursue our claims.

As a result of anonymous allegations and allegations by an ex-employee, we are conducting an internal investigation into whether certain systems were delivered to an entity in China in possible violation of U.S. export laws.

Table of Contents

We have voluntarily shared information with respect to the investigation with the U.S. Department of Commerce. We cannot assure that the Department or other agencies of the US government will not institute any proceedings against the Company in the future. In addition, from time to time, we receive inquiries from regulatory agencies informally requesting information or documentation. There can be no assurance in any given case that such informal review will not lead to further proceedings involving the Company in the future.

We also routinely receive communications from third parties asserting patent or other rights covering our products and technologies. Based upon our evaluation, we may take no action or we may seek to obtain a license. We are in discussions with several parties that have asserted intellectual property infringement claims. There can be no assurance in any given case that a license will be available on terms we consider reasonable, or that litigation will not ensue.

We are not aware of any pending disputes, including those disputes and settlements described above, that would be likely to have a material adverse effect on our financial condition, results of operations, or liquidity. However, litigation is subject to inherent uncertainties, and unfavorable outcomes could occur. An unfavorable outcome could include the payment of monetary damages, cash or other settlement, or an injunction prohibiting us from selling one or more products. If an unfavorable resolution were to occur, there exists the possibility of a material adverse impact on our financial condition, results of operations, or cash flows of the period in which the resolution occurs or on future periods.

18. Subsequent Events

On February 3, 2006, we borrowed the remaining \$15 million against the term loan component of our asset-backed credit facility with Wells Fargo Foothill, Inc. and Ableco Finance LLC. See Notes 9 and 11 for additional information.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

MANAGEMENT'S DISCUSSION AND ANALYSIS

This Form 10-Q includes forward-looking statements regarding our business, objectives, financial condition, and future performance that involve risks and uncertainties. These forward-looking statements include, among others, statements relating to the following: expected levels of revenue, gross margin, operating expense, future profitability, our expectations for new product introductions and market conditions, our assessment of the adequacy of our liquidity and capital resources, our belief regarding capital levels required for fiscal 2006, headcount reductions, and the expected impact on our business of restructuring actions, legal proceedings, and government actions. We have based these forward-looking statements on our current expectations about future events. In some cases, you can identify forward-looking statements by terminology such as may, will, should, expects, plans, anticipates, believes, estimates, predicts, potential, or continue or the terms or other similar terms. These forward-looking statements are only predictions and are subject to risks and uncertainties that could cause our actual results to differ materially from those expressed or implied in such statements. These risks and uncertainties include the following: risks related to liquidity and the adequacy of our capital resources; risks related to our ability to achieve profitable operations or limit losses; risks related to the impact on our business of the restructuring effected in fiscal 2005 and the significant restructuring effected and to be effected in fiscal 2006; risks related to our compliance with debt covenants; changes in customer order patterns; the impact of employee attrition; adverse changes in general economic or business conditions; adverse changes in the markets for our products, including expected rates of growth and decline in our current markets; heightened competition, reflecting rapid technological advances and constantly improving price/performance, which may result in significant discounting and lower gross profit margins; continued success in technological advancements and the acceptance of new product introductions; risks related to dependence on our partners and suppliers; risks related to foreign operations (including weak or disrupted economies, unfavorable currency movements, and export compliance issues); risks associated with intellectual property disputes and other claims and litigation; and other factors, including, but not limited to, those discussed below under the heading Risks That Affect Our Business.

The following discussion should be read in conjunction with our Condensed Consolidated Financial Statements and Notes thereto included in Part I, Item 1 of this Form 10-Q. All information presented herein is based on our fiscal calendar. We undertake no obligation to publicly update or revise any forward-looking statements, whether changes occur as a result of new information, future events, changed assumptions, or otherwise.

Overview

We are a leading provider of products and services for high-performance computing, storage and visualization. We sell highly scalable servers, advanced visualization systems, desktop workstations, storage solutions and associated products that enable our customers in the scientific, technical and creative communities to solve their most challenging problems and provide them with strategic and competitive advantage. We also offer a range of services and solutions, including professional services, customer support and education. These products and services are targeted primarily toward five market segments: Defense and Homeland Security; Science and Research; Manufacturing; Energy; and Media.

On November 7, 2005, our securities were suspended from trading on the NYSE and were delisted from the NYSE effective January 13, 2006. Since the date of suspension, our common stock has been traded on the over-the-counter securities market under the symbol SGID and is currently quoted on the OTC Bulletin Board. See Risks That Affect Our Business.

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

The following overview describes key elements of our business strategy and our results achieved during fiscal 2005 and for the first six months of fiscal 2006:

Further Restructurings to Reduce Expenses. We continue to reduce our total operating cost structure, principally from headcount reductions and geographic consolidation of functions and facilities. Costs for manufacturing and service, research and development, sales, marketing and administration declined 17.5% and 8% for the first six months of fiscal 2006 and for fiscal year 2005 respectively, from the comparable prior year periods. However, our revenue declined at a faster rate than the decline in our costs in fiscal 2005, and during the first six months of fiscal 2006, resulting in continued operating losses and cash consumption in those periods. During the fourth quarter of fiscal 2005, we retained the turnaround firm AlixPartners LLC to assist us in developing and implementing a restructuring program aimed at further substantial expense reductions, revenue and margin improvement initiatives and improved cash flow and liquidity.

Table of Contents

On August 30, 2005, we approved a restructuring plan and began to implement a reduction in our workforce with notifications to affected employees in North America and certain other locations on September 1, 2005. The balance of the notifications either occurred in the second quarter of fiscal 2006 or will occur over a reasonable period, consistent with business and local legal requirements in other parts of the world. In addition to the headcount reductions, the fiscal 2006 restructuring plan includes initiatives to reduce expenses in other areas, including procurement costs for goods and services, consolidation and reorganization of operations in several locations including exiting one building at our U.S. corporate headquarters, reducing marketing spending by focusing on the highest priority activities and benefits and other spending controls. The benefits of our restructuring plan are expected to be reflected in a combination of lower operating expenses and improved gross margins. We have realized \$24 million in annualized savings from these initiatives through the second quarter of fiscal 2006, with increasing benefits anticipated over the remainder of fiscal 2006. Although we expect to realize significant long-term cost savings as a result of these actions, the savings reflected in our operating expenses in the second quarter and first six months of fiscal 2006 are partially offset by \$6 million and \$9 million respectively, in professional advisory fees incurred in connection with the cost reduction initiatives. We are currently on course with the \$100 million in annualized savings that we had set out to achieve. We have taken the actions that we believe will achieve approximately 85% of these savings and are implementing the actions we believe will support the remaining 15% of our goal. We expect the impact of all of these initiatives to be more fully reflected in our second half operating results.

We currently estimate that the total restructuring costs to be incurred in connection with these fiscal 2006 restructuring actions will be between \$22 million and \$24 million, of which we estimate that between \$10 million and \$12 million will relate to severance benefits and approximately \$12 million to facilities-related charges. Substantially all of these costs will require the outlay of cash, although our severance programs provide, wherever practical, for payments to be made over the same period in which the payroll expenses otherwise would have been incurred, with the objective of minimizing incremental cash expense. The timing of payments relating to leased facilities will be unchanged by the restructuring. Under this restructuring plan, we recognized costs during the three- and six-month periods of fiscal 2006 of \$4 million and \$9 million, respectively, for the elimination of approximately 217 positions across most levels and functions and expect substantially all of the severance actions under this plan to be complete by the end of fiscal 2006. In addition, we expect substantially all of the restructuring actions to be completed by the end of fiscal 2006. Any forecast of operating results is inherently uncertain, and although we will seek to implement these actions in a manner that does not materially reduce revenue, we cannot be certain that we will achieve this objective.

Improve Liquidity through Additional Financing. Our unrestricted cash and cash equivalents and marketable investments totaled \$66 million at December 30, 2005, up from \$64 million at June 24, 2005. As our cash position at the end of fiscal 2005 was not sufficient to support our operations, we actively sought to raise additional financing. On October 25, 2005, we completed a financing arrangement with Wells Fargo Foothill, Inc. and Ableco Finance LLC with respect to a new asset-backed credit facility that replaced our previous asset-based credit facility and provided a significant increase in borrowing availability subject to additional requirements. See **Financial Condition** for a discussion of the terms of the facility. During the second quarter of fiscal 2006, we borrowed an initial \$35 million against the term loan. This amount is included as a component of our unrestricted cash and cash equivalents and marketable investments at December 30, 2005. On February 3, 2006, we borrowed the remaining \$15 million against the loan. See Notes 9, 11 and 18 for additional information. Although we were in compliance with all covenants contained in this facility as of December 30, 2005, we cannot be certain that we will be able to maintain compliance with all of the covenants or that the additional financing will be adequate to meet our requirements or achieve our objectives.

Leadership in High-Performance Standards-Based Computer Systems. During the past several years, we have transitioned our focus from our legacy systems based on our MIPS processors and IRIX operating system to our core systems based on industry-standard Intel Itanium processors and the Linux operating system. However, competition is putting pressure on the growth rates and gross margins for our Intel/Linux product families. These pressures include increasing acceptance of commodity clusters (large groups of low cost, small computers including connected PCs) in the high-performance computing market. Our revenue growth prospects, and our ability to return to profitability, depend on our ability to grow the Itanium/Linux-based product families at a rate that will more than offset the expected continued decline of the MIPS/IRIX-based families and our maintenance business. In addition, our product strategy and business depend on the continued availability and competitiveness of the Itanium 2 processor family and could be adversely affected by any delays and/or discontinuance of this processor family. Intel recently announced delays in the development and launch of several processors of its Itanium 2 processor family. See **Risks that Affect Our Business** .

Table of Contents

Maintain Gross Margins to Support R&D and Other Investments. Our strategy is to develop differentiated products that provide our customers with strategic and competitive advantages. However, this requires continued substantial investments in research and development. In addition, maintaining acceptable gross margins will require achieving an overall revenue level adequate to absorb our fixed costs, striking the appropriate balance between large lower margin transactions and our more normal sales transactions, and working with suppliers such as Intel to continue to structure favorable component pricing.

Building Systems Integrator and Reseller Channels. We are increasingly looking to resellers, systems integrators and OEM partners to add to our sales volumes and serve markets that we do not serve directly. This is especially important because our midrange systems often have a more attractive gross margin profile than our largest systems. Although we believe we are making progress in this area, the benefits have yet to be reflected in any material respect in our results of operations.

In light of these challenges, our Board of Directors is evaluating a range of strategic alternatives with the goal of preserving and creating value for the benefit of stockholders and creditors. Alternatives include pursuing our current strategy as an independent public company, seeking a strategic partner or acquirer, seeking a financial partner to make a substantial equity investment, divesting additional technologies or products, or some combination of the foregoing. We cannot assure that any acquisition or other change in control transaction will occur, or that if such a transaction does occur that it would result in stockholders realizing value equal to or greater than the current trading price of our common stock. If we fail to implement one or more of these alternatives successfully, we could be forced to seek protection under bankruptcy laws.

Results of Operations

The financial information and the discussion below should be read in conjunction with the accompanying Condensed Consolidated Financial Statements and Notes thereto. During the first six months of fiscal 2006, our accounting calendar had 27 weeks compared with 26 weeks during the first six months of fiscal 2005.

	<u>Three Months Ended (1)</u>		<u>Six Months Ended (1)</u>	
(in millions except per share amounts; numbers may not add due to rounding)	<u>Dec. 30, 2005</u>	<u>Dec. 24, 2004</u>	<u>Dec. 30, 2005</u>	<u>Dec. 24, 2004</u>
Total revenue	\$ 144	\$ 223	\$ 314	\$ 399
Cost of revenue	84	139	190	252
Gross profit	60	84	124	147
Gross profit margin	41.6%	37.5%	39.6%	36.8%
Total operating expenses	89	93	179	182
Operating loss	(29)	(9)	(55)	(35)
Interest and other income (expense), net	(2)	(4)	(8)	(9)
Loss from continuing operations before income taxes	(31)	(13)	(63)	(45)
Net loss from continuing operations	(31)	(11)	(64)	(39)
Net loss from discontinued operations				

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

Net loss	\$ (31)	\$ (11)	\$ (64)	\$ (39)
Net loss per share from continuing operations basic and diluted	\$ (0.12)	\$ (0.04)	(0.24)	(0.15)
Net loss per share from discontinued operations basic and diluted				(0.00)
Net loss per share - basic and diluted	\$ (0.12)	\$ (0.04)	\$ (0.24)	\$ (0.15)

- (1) The above financial information reflects an increase of approximately \$1 million in additional stock-based compensation expense for the three- and six-month periods ended December 30, 2005 compared with the financial information presented in the press release announcing our financial results for the second fiscal quarter ended December 30, 2005, which was furnished with the Securities and Exchange Commission as an exhibit to a Current Report on Form 8-K filed on January 31, 2006.
- (2) Total operating expenses include a \$4 million charge in both the three- and six-month periods ended December 30, 2005 for the acceleration of depreciation associated with changes in the estimated useful lives of certain leasehold improvements and furniture and fixtures associated with one of our buildings at our U.S. corporate headquarters that is in the process of being vacated. This charge represents an increase in net loss per share basic and diluted of \$0.02 in both the three- and six-month periods ended December 30, 2005.

Table of Contents*Revenue*

The following discussion of revenue is based on the results of our reportable segments as described in Note 15 to our Notes to the Condensed Consolidated Financial Statements. Total revenue is principally derived from two reportable segments, Products and Global Services. We have realigned our Products segment into our Core Systems, comprised of our high-performance servers and visualization systems based on Intel Itanium 2 microprocessors and the Linux operating system, and storage solutions, and our Legacy Systems, comprised of our high-performance servers and visualization systems based on MIPS RISC microprocessors and the IRIX operating system. This change was made to align reportable segments with the process by which management makes operating decisions and evaluates performance. Prior year amounts have been reclassified to conform to the current year presentation.

Revenue for the second quarter of fiscal 2006 decreased \$79 million or 35% compared with the corresponding period of fiscal 2005 reflecting declines in sales across all reportable segments. Revenue for the first six months of fiscal 2006 declined \$84 million or 21% compared with the corresponding period of fiscal 2005, principally due to declines in sales of our Legacy Systems and to a lesser extent in sales of our Core Systems and Global Services.

The following table presents total revenue by reportable segment (dollars in millions; numbers and percentages may not add due to rounding):

	Three Months Ended		Six Months Ended	
	December 30, 2005	December 24, 2004	December 30, 2005	December 24, 2004
Core Systems	\$ 44	\$ 91	\$ 118	\$ 147
Legacy Systems	29	54	54	96
Total Products	\$ 73	\$ 145	\$ 172	\$ 243
% of total revenue	51%	65%	55%	61%
Global Services	\$ 71	\$ 78	\$ 142	\$ 156
% of total revenue	49%	35%	45%	39%

Products. Revenue from our Products segment for the second quarter and first six months of fiscal 2006 decreased \$72 million or 50% and \$71 million or 29%, respectively, compared with the corresponding period in fiscal 2005. The overall decline in product revenue for the second quarter and first six months of fiscal 2006 compared with the corresponding periods of fiscal 2005 was primarily attributable to a smaller number of large dollar transactions, especially in the Altix family of servers, coupled with an overall decline in volume.

Revenue from Core Systems for the second quarter and first six months of fiscal 2006 decreased \$47 million or 52% and \$29 million or 20%, respectively, compared with the corresponding periods in fiscal 2005. The decline for the second quarter and first six months of fiscal 2006 compared with the corresponding periods in fiscal 2005 is primarily a result of reduced volumes of our Altix servers, offset in part by increased volume of our Prism family of visualization systems. As noted above, fewer large dollar transactions for Altix servers for the second quarter and first six months of fiscal 2006 compared with the corresponding periods of fiscal 2005 also contributed to the decline in Core Systems revenue. Despite higher average selling prices, reduced volumes of our storage solutions resulted in a decrease in storage solutions revenue in the second quarter and first six months of fiscal 2006 compared with the corresponding periods in fiscal 2005.

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

Revenue from Legacy Systems for the second quarter and first six months of fiscal 2006 decreased \$24 million or 46% and \$42 million or 44 %, respectively, compared with the corresponding periods in fiscal 2005 principally due to a decrease in sales associated with all our MIPS/IRIX-based systems. The continuing long-term decline in the overall UNIX workstation market, an industry-wide trend that we expect will continue as lower-cost personal computers continue to gain market share, largely contributed to the revenue decline. For the second quarter and first six months of fiscal 2006 compared with the corresponding periods in fiscal 2005, reduced volumes of both our Fuel and Tezro visual workstations coupled with a higher mix of Tezro visual workstations sales for which the average selling price declined, was also a contributing factor in the decline in Legacy Systems revenue. The decline in both our MIPS/IRIX-based servers and graphics systems revenue in the second quarter and first six months of fiscal 2006 compared with the corresponding periods in fiscal 2005 was principally due to reduced volumes that more than offset increases in average selling prices. Revenue from our remarketed products for the second quarter and first six months of fiscal 2006 increased compared with the corresponding periods in fiscal 2005 primarily due to an increase in sales of both our remarketed MIPS/IRIX-based workstations and graphics systems and our remarketed storage systems.

Table of Contents

Global Services. Revenue from our Global Services segment is comprised of hardware and software support, maintenance and professional services. Professional services revenue includes revenue generated from the sale of SGI and third party products and SGI consulting and managed services.

Revenue from Global Services for the second quarter and first six months of fiscal 2006 decreased \$7 million or 9% and \$14 million or 9%, respectively, compared with the corresponding periods in 2005. The decline was primarily due to a reduction in our traditional customer support revenue resulting from lower pricing for new contracts generated in the second quarter and first six months of fiscal 2006 compared with previously existing contracts, coupled with a decline in the overall installed base, and to a lesser extent, from a decline in revenue generated from professional services contracts.

Geographic Revenue. Total revenue by geographic area was as follows (dollars in millions):

Area	Three Months Ended				Six Months Ended			
	December 30, 2005		December 24, 2004		December 30, 2005		December 24, 2004	
	\$	%	\$	%	\$	%	\$	%
Americas	\$ 90	63%	\$ 126	56%	\$ 183	58%	\$ 241	60%
Europe	35	24%	51	23%	76	24%	91	23%
Rest of World	19	13%	46	21%	55	18%	67	17%
Total revenue	144		\$ 223		\$ 314		\$ 399	

The shift in geographic revenue mix in the second quarter of fiscal 2006 compared with the corresponding period in fiscal 2005 is primarily attributable to an 83% decline in revenue in Japan. Revenue in Japan for the second quarter of fiscal 2005 included two large transactions to a single customer in Japan, namely SGI Japan, a related party that is also our exclusive distributor in Japan that accounted for 10% of total revenue in the second quarter of fiscal 2005. During the second quarter of fiscal 2006, similar large transactions in Japan did not occur. Geographic revenue mix as a percentage of total revenue in the first six months of fiscal 2006 was relatively consistent with the mix in the corresponding periods in fiscal 2005.

Backlog. Our consolidated backlog at December 30, 2005 was \$114 million, up from \$88 million at December 24, 2004. Backlog is comprised of committed purchase orders for products and professional services deliverable within nine months. Backlog arose primarily in Europe, with slight decreases experienced in all other regions. The increase in backlog in Europe is primarily associated with significant orders from Leibniz Computing Center in Munich, Germany and the Technical University in Dresden, Germany, for which approximately 47% of the two orders have been booked. These orders are not expected to be recognized as revenue until fiscal 2008. Backlog increased both within the Products segment, specifically with regard to our Intel/Linux-based Altix servers and for professional services.

We generally do not maintain sufficient backlog to meet our quarterly objectives for product revenue without obtaining significant new orders that are booked and shipped within the quarter. Our backlog reflects only orders for which a firm purchase order has been issued or a contract has been made, although orders in backlog are subject to customer cancellation or rescheduling in certain circumstances, and government customers typically have rights of cancellation for convenience. SGI systems have also been selected for a number of multi-year U.S. government programs, with expected purchases that are not reflected in our current backlog. In addition, we have several longer delivery-cycle contracts as noted above for which a portion of the value is not reflected in our current backlog. These orders are currently scheduled to ship

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

outside the time provided in our bookings policy and are not expected to be recognized as revenue until fiscal 2008. These orders generally also require us and our partners to develop and deliver future products, and are subject to performance guarantees collateralized by letters of credit and additional penalties for delays in delivery or non-performance.

Table of Contents*Gross Profit Margin*

Cost of product and other revenue includes costs related to product shipments, including materials, labor, overhead, and other direct or allocated costs involved in their manufacture or delivery. Costs associated with engineering service revenue are included in cost of service revenue, unless the engineering service effort meets the criteria for government funded research, as outlined in SFAS 2, *Accounting for Research and Development Costs*. If the contract meets the criteria for a government funded research arrangement, the costs to deliver the contract are included in research and development expense. Cost of service revenue includes all costs incurred in the support and maintenance of our products, as well as costs to deliver professional services, including the costs associated with third-party products.

Overall, gross profit margin for the second quarter and the first six months of fiscal 2006 increased from 37.5% to 41.6% and from 36.8% to 39.6%, respectively, compared with the corresponding periods of fiscal 2005. This improvement was primarily due to an improvement in service gross profit margin, offset in part by a decline in product and other gross profit margin.

Product and other gross profit margin for the second quarter and first six months of fiscal 2006 decreased 1.6 percentage points and 2.2 percentage points, respectively, compared with the corresponding periods in fiscal 2005. As a result of fixed manufacturing costs, cost of sales did not decline in proportion to our lower sales volumes in the second quarter and first six months of fiscal 2006 compared with the corresponding periods in fiscal 2005. In addition, we continue to see a shift in revenue mix from our MIPS/IRIX-based systems, which typically carry higher gross margins to our Intel/Linux-based systems, which have lower gross margins. The decline in product and other gross profit margin for the second quarter of fiscal 2006 compared with the corresponding period in fiscal 2005 was offset in part by fewer large low margin transactions, which are typically negotiated with high discount rates due to very competitive bidding processes.

Service gross profit margin for the second quarter and first six months of fiscal 2006 increased 10.7 percentage points and 8.6 percentage points, respectively, compared with the corresponding periods in fiscal 2005. The improvements in service gross profit margins primarily resulted from the positive impact of our restructuring actions resulting from headcount reductions and other cost control measures coupled with improved margins on professional services contracts.

Operating Expenses

Operating expenses were as follows (dollars in millions):

	Three Months Ended		Six Months Ended	
	December 30, 2005	December 24, 2004	December 30, 2005	December 24, 2004
Research and development	\$ 21	\$ 25	\$ 44	\$ 48
% of total revenue	14%	11%	14%	12%
Selling, general, and administrative	\$ 57	\$ 63	\$ 117	\$ 126
% of total revenue	40%	28%	37%	32%
Other	\$ 10	\$ 5	\$ 17	\$ 8

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

% of total revenue	7%	2%	6%	2%
--------------------	----	----	----	----

Operating Expenses (excluding Other Operating Expenses). Operating expenses, excluding other operating expenses, for the second quarter of fiscal 2006 decreased by 11% from the corresponding period of fiscal 2005, but increased as a percentage of total revenue from 39% to 54%. Operating expenses, excluding other operating expenses, for the first six months of fiscal 2006 decreased by 7% from the corresponding period of fiscal 2005, but increased as a percentage of total revenue from 44% to 51%. The decline in operating expenses was primarily attributable to lower headcount resulting from our restructuring activities and through employee attrition and from the impact of our overall expense control measures aimed at bringing expenses in line with prevailing revenue levels. Although we expect to realize significant long-term cost savings as a result of our restructuring actions, the savings reflected in our operating expenses

Table of Contents

in the second quarter and first six months of fiscal 2006 were partially offset by \$6 million and \$9 million respectively, in professional advisory fees incurred in connection with our cost reduction initiatives. The decrease in our operating expenses was also mitigated by the fact that our accounting calendar had 27 weeks during the first six months of fiscal 2006 compared with 26 weeks during the first six months of fiscal 2005.

Adoption of SFAS 123(R)

We have three share-based compensation plans: two stock option programs and an employee stock purchase plan (ESPP). Prior to fiscal 2006, we accounted for these plans under the recognition and measurement provisions of APB Opinion No. (APB) 25, *Accounting for Stock Issued to Employees*, and related guidance, as permitted by SFAS 123, *Accounting for Stock-Based Compensation*. Accordingly, we did not recognize any significant amounts of share-based employee compensation expense in our statements of operations prior to fiscal 2006; instead, we provided footnote disclosure of our pro forma results of operations as if we had recognized compensation expense in accordance with SFAS 123.

Beginning in the first quarter of fiscal 2006, we adopted the fair value recognition provisions of SFAS 123(R), *Share-Based Payment*, using the modified-prospective transition method. Under that transition method, compensation cost recognized in the second quarter and first six months of fiscal 2006 include the following: (a) compensation cost related to any share-based payments granted through, but not yet vested as of June 24, 2005, and (b) compensation cost for any share-based payments granted subsequent to June 24, 2005, based on the grant-date fair value estimated in accordance with the provisions of SFAS 123(R).

As a result of adopting SFAS 123(R), we recognized share-based employee compensation expense of \$0.7 million and \$1.7 million during the second quarter and first six months of fiscal 2006, which primarily affected our reported research and development and selling, general, and administrative expenses. We respectively calculated this expense based on the fair values of the share-based compensation awards as estimated using the Black-Scholes-Merton closed-form option valuation model. Use of this model requires us to make assumptions about expected future volatility of our stock price and the expected term of the options that we grant. Calculating share-based compensation expense under SFAS 123(R) also requires us to make assumptions about expected future forfeiture rates for our option awards. As of December 30, 2005, total unrecognized compensation expense related to unvested share-based compensation arrangements already granted under our various plans was \$2 million, which we expect will be recognized over a weighted-average period of 2.3 years. However, it is difficult to predict the actual amount of share-based compensation expense that we will recognize in future periods because that expense can be affected by changes in the amount or terms of our share-based compensation awards issued in the future, changes in the assumptions used in our model to value those future awards, changes in our stock price, and changes in interest rates, among other factors.

Research and Development Expense. Research and development expense for the second quarter and first six months of fiscal 2006 decreased \$4 million or 16% and \$4 million or 8%, respectively, compared with the corresponding periods of fiscal 2005. For the second quarter and first six months of fiscal 2006 compared with the corresponding periods of fiscal 2005, the impact of a 12% and 9%, respectively, reduction in headcount and lower information technology-related costs were offset in part by increased materials and outside services costs. We will continue to focus our research and development investments towards potential growth areas, including investments in our Altix family of servers and the new Prism family of Intel/Linux visualization products, while leveraging the research and development efforts of our industry partners, as we continue to move to product lines that incorporate industry standard technologies.

Selling, General and Administrative Expenses. Selling, general, and administrative expenses for the second quarter and first six months in fiscal 2006 decreased by \$6 million or 9% and \$8 million or 7%, respectively, compared with the corresponding periods of fiscal 2005 primarily due to a 21% and 17%, respectively, reduction in headcount and other cost savings measures, offset in part by an increase of \$6 million and \$9 million, respectively, in professional advisory fees incurred in connection with our cost reduction initiatives.

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

Other Operating Expenses. Over the past several years in response to declining revenues, we have initiated a number of restructuring actions, under various plans, aimed at reducing the level of cash consumed in operations and restoring long-term profitability to SGI. These actions have resulted in both headcount reductions and facility closures. Other operating expense of \$10 million and \$5 million for the second quarters of fiscal 2006 and fiscal 2005, respectively, represented the costs of our restructuring plans. Other operating expense for the second quarter of fiscal 2006

Table of Contents

includes a \$4 million charge for severance costs, accretions expense of \$2 million associated with our fiscal 2004 Mountain View, California headquarters relocation and a \$4 million charge for the acceleration of depreciation associated with changes in the estimated useful lives of certain leasehold improvements and furniture and fixtures associated with one of our buildings at our current U.S. corporate headquarters that is in the process of being vacated. As a result of the restructuring actions we have undertaken through December 30, 2005, we anticipate operating cash outflows of \$3 million through fiscal 2006 for severance and related charges and \$79 million through fiscal 2014 for facilities related expenditures, which is net of estimated sublease income of \$103 million. See Note 3 to our condensed consolidated financial statement in Part I, Item 1 of this Form 10-Q for further information regarding our restructuring activities.

Other operating expense was \$17 million and \$8 million for the first six months of fiscal 2006 and 2005, respectively. Other operating expense for the first six months of fiscal 2006 represented a \$9 million charge for severance costs, accretion expense of \$4 million associated with our fiscal 2004 Mountain View, California headquarters relocation and a \$4 million charge for the acceleration of depreciation associated with changes in the estimated useful lives of certain leasehold improvements and furniture and fixtures associated with one of our buildings at our U.S. corporate headquarters that is in the process of being vacated. During the first six months of fiscal 2005, we recorded non-cash accretion expense of \$6 million related to the relocation of our Mountain View, California headquarters and costs of \$3 million related to the relocation of our facility in the United Kingdom. See Note 3 to the Condensed Consolidated Financial Statements for further information about these activities.

Interest and Other

Interest and other income (expense) were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	December 30, 2005	December 24, 2004	December 30, 2005	December 24, 2004
Interest expense	\$ (4,028)	\$ (3,856)	\$ (7,503)	\$ (8,992)
Investment gain (loss)	\$	\$ 31	\$ (227)	\$ 31
Foreign exchange gain	404	443	243	1,338
Miscellaneous (expense) income	(677)	708	(949)	(617)
Interest income	475	278	775	672
Interest and other income (expense), net	\$ 202	\$ 1,460	\$ (158)	\$ 1,424
Income (loss) from Equity Investment	\$ 1,601	\$ (1,328)	\$ 133	\$ (1,558)

Interest Expense. Interest expense remained relatively constant from the second quarter of fiscal 2005 to the second quarter of fiscal 2006. Interest expense decreased from \$9 million for the first six months of fiscal 2005 to \$8 million in the first six months of fiscal 2006 primarily as a result of interest expense incurred on various non-debt transactions in the ordinary course of business offset in part by fluctuations in the amount of interest expense associated with our outstanding debt.

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

Interest and Other Income (Expense), Net. Interest and other income (expense), net includes interest income on our cash investments, gains and losses on other investments, and other non-operating items.

Income (Loss) from Equity Investment. Income (loss) from equity investment represents our share of the results of operations of SGI Japan.

Provision for Income Taxes

Our net provision for income taxes of \$0.8 million for the first six months of fiscal 2006 arose principally from net income taxes payable in foreign jurisdictions and a net increase to our reserves for taxes and related interest in various jurisdictions for historic tax exposures, partially offset by a refund of state income taxes paid in prior years. Our net benefit for income taxes of \$5 million for the first six months of fiscal 2005 arose principally from a refund of U.S. income taxes paid in prior years and a reduction in foreign tax exposures, partially offset by net income taxes payable in foreign jurisdictions.

Table of Contents***Financial Condition***

Cash Balances. At December 30, 2005, our unrestricted cash and cash equivalents and marketable investments totaled \$66 million, compared with \$64 million at June 24, 2005. At December 30, 2005 and June 24, 2005, we also held \$47 million and \$40 million, respectively, of restricted investments. Restricted investments consist of short- and long-term investments held under a security agreement or pledged as collateral against letters of credit. The increase in our cash and cash equivalents compared with June 24, 2005 is primarily the result of cash provided by our borrowings, offset in part by cash used in our operations and from investment activities during the first six months of fiscal 2006.

Cash Consumption Trends. Primarily as a result of net losses, operating activities from continuing operation used \$25 million during the first six months of fiscal 2006, compared with using \$30 million during the same period of fiscal 2005. The negative operating cash flows from continuing operations in the first six months of fiscal 2006 were primarily due to our net losses and low revenue levels. We generated \$23 million from our accounts receivable during the first six months of fiscal 2006, this was more than the \$3 million that was generated during the same period of fiscal 2005. During the first six months of fiscal 2006, our inventory decreased \$8 million compared to the \$11 million increase in inventory reported in the first six months of fiscal 2005. Our accounts payable declined \$7 million in the first half of fiscal 2006 while it increased \$12 million in the same period of fiscal 2005. During the first six months of fiscal 2006, our accrued compensation decreased \$10 million compared to the \$2 million increase in accrued compensation in the same period of fiscal 2005.

Investing activities, other than changes in available-for-sale and restricted investments, used \$4 million in cash during the first six months of fiscal 2006, compared with using \$6 million in cash during the same period of fiscal 2005. Principal investing activities in the first six months of fiscal 2006 primarily consisted of purchases of property and equipment of \$3 million. Principal investing activities in the first six months of fiscal 2005 primarily consisted of purchases of property and equipment of \$7 million.

Financing activities provided \$38 million in cash during the first six months of fiscal 2006, compared with using \$9 million during the same period of fiscal 2005. During the first six months of fiscal 2006, we received proceeds of \$35 million from borrowings against our new term loan, \$2 million from stock issued under our employee stock purchase plan (ESPP) and \$1 million for future customer support in connection with products that we sold under certain sales-type leases; we are required by EITF 88-18, *Sales of Future Revenue*, to account for the accumulated proceeds from these arrangements as debt. During the first six months of fiscal 2005, the principal use of cash for financing activities was the repayment of \$13 million of our debt.

We have incurred net losses and negative cash flows from operations during each of the past several fiscal years. At December 30, 2005, our principal sources of liquidity included unrestricted cash and marketable investments of \$66 million, up from \$64 million at June 24, 2005. Our unrestricted cash and marketable investments at December 30, 2005 included borrowings of \$35 million against the term loan portion of our credit facility. Currently, we expect to consume cash from operations through at least the third quarter of fiscal 2006. We also experience significant intra-quarter fluctuations in our cash levels, with the result that our cash balances are generally at their highest point at the end of each quarter and significantly lower at other times. These intra-quarter fluctuations reflect our business cycle, with significant requirements for inventory purchases in the early part of the quarter and most sales being consummated in the last few weeks of the quarter. To maintain adequate levels of unrestricted cash within each quarter, we offer certain customers discounted terms for early payment and hold certain vendor payments until the beginning of the following quarter. We also continue to focus on expense controls, margin improvement initiatives and working capital efficiencies. It is essential to our operating plan for fiscal 2006 that our restructuring plan yields its anticipated savings and we meet the goals of our credit agreement for fiscal 2006.

Credit Arrangements. On October 25, 2005, we announced the completion of a new two-year asset-backed credit facility with Wells Fargo Foothill, Inc. and Ableco Finance LLC. The new facility provides for credit of up to \$100 million, consisting of a \$50 million revolving line of

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

credit and a \$50 million term loan. The borrowing base under our credit facility is determined weekly based on the value of working capital items, real estate and intellectual property. Our facility is secured by substantially all of the assets of SGI and its domestic subsidiaries (the Borrowers) and, together with the indentures governing our Senior Secured Notes, includes covenants for minimum levels of EBITDA, minimum levels of cash and cash equivalents, and limits on capital expenditures. Subject to certain specified exceptions, the facility and the indentures governing our Senior Secured Notes also limit the ability of the Borrowers to incur additional indebtedness, create liens on their assets, enter into certain transactions (including mergers, consolidations and reorganizations), dispose of certain assets, pay dividends or other distributions on capital stock, repurchase capital stock, or prepay or repurchase debt obligations. Our credit facility is subject to acceleration upon various events of default and failure to comply with these covenants could entitle the lender to accelerate the underlying obligations. On several occasions during the past three fiscal years, we were in violation of financial and administrative covenants in the predecessor credit facility. In each case, we received a waiver of compliance from the lender.

Table of Contents

During the second quarter of fiscal 2006, we borrowed an initial \$35 million against the term loan and on February 3, 2006, borrowed the remaining \$15 million. We currently use our revolving line of credit under this facility to support letters of credit, including the \$47 million in letters of credit required under our lease obligations for the Crittenden and Amphitheatre Technology Center campuses in Mountain View, California and to support our current operations. Although we were in compliance with all the covenants contained in this credit facility as of December 30, 2005, we cannot be certain that we will be able to maintain compliance with all of the covenants or that this additional financing will be adequate to meet our requirements or achieve our objectives.

At both December 30, 2005 and June 24, 2005, we had outstanding \$191 million, in aggregate principal amount of senior secured convertible notes and senior secured notes, both due in 2009, and \$57 million in aggregate principal amount of convertible subordinated debentures, due in 2011. Our Senior Secured Notes contain a covenant that limits our ability to incur indebtedness to banks and other institutional lenders in excess of \$100 million, including any indebtedness under our credit facility. Including the letters of credit issued under our credit facility described above, at December 30, 2005, we had maximum potential future payments of \$48 million related to financial guarantees for which we are the guarantor, but we do not expect our ultimate obligations under these guarantees to be material to our financial position, results of operations, or cash flows.

During the fourth quarter of fiscal 2005, we received a notice of default from an investor claiming to own more than 25% of our outstanding 2011 convertible subordinated debentures. We assumed these debentures when we acquired Cray Research in 1996. The 2011 debentures are unsecured and subordinated. The notice alleges that in 2000 we violated the indenture for the 2011 debentures when we sold certain assets relating to the former Cray Research vector computing business to Tera Computer (now known as Cray, Inc.) without having them assume the indenture. We strongly disagree with the claims made in the notice and intend to vigorously challenge any claim of an event of default.

The indenture provides that upon an event of default the indenture trustee or the holders of at least 25% of the 2011 debentures may cause the outstanding principal amount plus accrued interest to be immediately due and payable. The notice period for this alleged event of default expired on July 11, 2005. The 2011 debenture holders or trustee would be required to commence legal proceedings and obtain a judgment in order to enforce their claim on the assets of SGI. No notice of acceleration or legal proceedings with respect to this claimed default has been received. We cannot be certain, however, that such a notice will not be delivered or that we would prevail in any legal proceedings that might result. In addition, the notice of default in itself may give rise to actions by other creditors as described below and may complicate or even prevent our efforts to raise additional financing.

A default entitling acceleration under the indenture for the 2011 debentures would trigger an event of default under our credit facility. In such an event, we might be required to deposit an amount equal to the difference between our then current restricted cash deposits with the lender and the full amount of the letters of credit secured by the facility. At December 30, 2005, this amount would have been \$40 million. Acceleration of the maturity of the 2011 debentures would trigger an event of default under lease agreements with respect to the Amphitheatre and Crittenden Technology Center campuses in Mountain View, California. In such an event, our landlords may have the right to exercise various remedies under the related leases, including, without limitation, eviction, lease termination, assertion of claims for accelerated rents, and draws against the outstanding letters of credit (which may include recovery of free rent for prior periods). We have reviewed the claimed default with the counterparties under our credit facility and these lease agreements and requested that they refrain from exercising any rights they may have arising from the claimed default. We are not aware that any of the counterparties under these agreements intend to take any action at this time. Our Senior Secured Notes do not contain similar provisions.

Restructuring Activities and Additional Capital. In the fourth quarter of fiscal 2005, we retained the turnaround firm AlixPartners LLC to advise us in developing and implementing a restructuring program aimed at further substantial expense reductions, revenue and margin improvement initiatives and improved cash flow and liquidity. See [Overview Further Restructurings to Reduce Expenses](#) .

Table of Contents

Forecasts of future events are inherently uncertain, and there are significant risks associated with the achievement of our goals for fiscal 2006. While we are implementing initiatives developed in conjunction with AlixPartners LLC aimed at improving revenue and margins for our core systems products we expect to continue consuming cash from operations through at least the third quarter of fiscal 2006. Our new credit facility significantly improves our liquidity position. However, these new funds and our current sources of liquidity will only be adequate for our fiscal 2006 operating needs if our restructuring plan yields its anticipated savings and we meet the goals of our credit agreement for fiscal 2006. If we fail to achieve these objectives, we will likely consume additional cash in our operations, which would further impair our liquidity. If we are unable to achieve our objectives, we would consider alternatives for ensuring the continued operation of our business. These could include further reductions in headcount and in the scope of our operations, generating cash from licensing intellectual property, and seeking funding from marketing partners and government customers. See [Risks That Affect Our Business](#) .

In light of these challenges, our Board of Directors is evaluating a range of strategic alternatives with the goal of preserving and creating value for the benefit of stockholders and creditors. Alternatives include pursuing our current strategy as an independent public company, seeking a strategic partner or acquirer, seeking a financial partner to make a substantial equity investment, divesting additional technologies or products, or some combination of the foregoing. We cannot assure that any acquisition or other change in control transaction will occur, or that if such a transaction does occur that it would result in stockholders realizing value equal to or greater than the current trading price of our common stock. If we fail to implement one or more of these alternatives successfully, we could be forced to seek protection under bankruptcy laws.

Contractual Obligations

During the first six months of fiscal 2006, there were two material changes to our contractual obligations. In December 2005, we renegotiated license fee arrangements and reduced our obligations by \$2.6 million over the next three years. In October 2005, we entered into a new two-year asset-backed credit facility with Wells Fargo Foothill, Inc. and Ableco Finance LLC that provides for increased credit of up to \$100 million, consisting of a \$50 million revolving line of credit and a \$50 million term loan. The outstanding debt on the term loan at December 30, 2005 was \$35 million, of which \$1 million was short term and the balance will be due in 2007. In addition, on February 3, 2006, we borrowed the remaining \$15 million of the term loan portion of the facility. See Note 9 to our Notes to the Condensed Consolidated Financial Statements for the terms and conditions of this credit facility. There were no other material changes outside the ordinary course of our business in long-term debt obligations, capital lease obligations, operating lease obligations, purchase obligations, or any other long-term liabilities reflected in our condensed consolidated balance sheet.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent liabilities. On an on-going basis, we evaluate these estimates, including: those related to customer programs and incentives; bad debts; inventory; lease residual values; warranty obligations; restructuring; incomes taxes and contingencies. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ materially from these estimates. We believe there have been no significant changes during the six months ended December 30, 2005 to the items that we disclosed as our critical accounting policies and estimates in our discussion and analysis of financial condition and results of operations in our fiscal 2005 Form 10-K, except as noted below.

Stock-Based Compensation Expense

We account for stock-based compensation in accordance with the provisions of SFAS 123(R). Under the fair value recognition provisions of SFAS 123(R), stock-based compensation cost is estimated at the grant date based on the value of the award and is recognized as expense ratably over the requisite service period of the award. Determining the appropriate fair value model and calculating the fair value of stock-based awards at the grant date requires judgment, including estimating stock price volatility, forfeiture rates and expected option life.

Table of Contents

Risks That Affect Our Business

SGI operates in a rapidly changing environment that involves a number of risks, some of which are beyond our control.

We have been incurring losses and consuming cash in our operations and must reverse these trends. We have incurred net losses and negative cash flows from operations resulting from year over year declines in revenue during each of the past several fiscal years. At December 30, 2005, our principal source of liquidity was unrestricted cash and marketable investments of \$66 million, down from \$106 million at December 24, 2004. Our unrestricted cash and marketable investments at December 30, 2005 included borrowings of \$35 million against the term loan portion of our credit facility. We expect to continue to consume cash from operations through at least the third quarter of fiscal 2006. Our cash levels fluctuate significantly within each quarter and are at their highest at the end of the quarter. See Financial Condition .

To seek to improve our liquidity, we are developing and implementing a restructuring program aimed at substantial expense reductions and a revenue generation initiative aimed at reversing the decline in our revenues. As part of this program, on October 25, 2005, we announced the completion of a new two-year asset-backed credit facility with Wells Fargo Foothill, Inc. and Ableco Finance LLC that provides availability of up to \$100 million, consisting of a \$50 million revolving line of credit and a \$50 million term loan. During the second quarter of fiscal 2006, we borrowed an initial \$35 million against the term loan portion of this facility and on February 3, 2006, borrowed the remaining \$15 million. Although we were in compliance with all the covenants contained in this credit facility as of December 30, 2005, we cannot be certain that we will be able to maintain compliance with all of the covenants or that this additional financing will be adequate to meet our requirements or achieve our objectives. In addition, our operating goals include returning to profitability in the second half of fiscal 2006, requiring us to achieve significant year-over-year revenue growth in that period while realizing our targeted expense savings and margin improvements. If we fail to achieve these targets, we will likely consume further cash in our operations, which would further impair our liquidity. See Financial Condition .

We require varying amounts of cash during each fiscal quarter in order to pay our vendors, employee salaries and to operate our business generally, including the requirement to adequately capitalize our network of domestic and international subsidiaries. If we fail to reduce the cash consumed by operations on a timely basis, we may not have the cash resources required to run our business. The uncertainty related to our liquidity and continued viability has been a source of concern for some customers, vendors and partners, and has contributed to the challenges we face in seeking to reverse the decline in revenues. If customers lose confidence in our ability to supply their needs in a consistent and reliable manner or continue as a going concern, they may not renew their contracts or provide us with new business. In addition, to help maintain adequate levels of unrestricted cash within each quarter, we offer certain customers discounted terms for early payment and hold certain vendor payments to the beginning of the following quarter. We could face substantial liquidity pressure if significant vendors or others with whom we do business were to change the payment terms under which we operate. These pressures could force us to seek protection under bankruptcy laws. If we are forced to seek bankruptcy protection, the holders of our common stock may not be able to realize any remaining value in their shares and the holders of our debt securities may realize less than the principal amount of those securities.

Our on-going restructuring activities may not reduce our losses and cash consumption. We have implemented several expense-related restructurings in recent years. In addition, in September 2005, we began to implement a restructuring plan aimed at further substantial expense reductions. See Overview Further Restructurings to Reduce Expenses . Although we will seek to implement these actions in a manner that does not materially reduce revenue or impair our ability to compete successfully, we cannot be certain that these outcomes will not occur or that these actions will accomplish their intended objective of reducing our losses and cash consumption. Substantially all of the restructuring charges have required or will require the outlay of cash.

We may not achieve our operating goals and may not be in compliance with debt covenants. On October 25, 2005, we announced the completion of a new two-year asset-backed credit facility with Wells Fargo Foothill, Inc. and Ableco Finance LLC that provides availability of up to \$100 million consisting of a \$50 million revolving line of credit and a term loan of \$50 million. Our credit facility may be deemed to be in

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

default and be accelerated if we fail to meet certain financial and other covenants. The credit facility also permits the lenders to decline future extensions of credit if a

Table of Contents

material adverse change occurs. See **Financial Condition** . During each quarter of fiscal 2005 and on several occasions during fiscal 2003 and 2004, we were in violation of financial or administrative covenants under our prior credit facility for which, in each case, we received a waiver from the lender. In addition, we were in violation of the EBITDA covenant under the prior facility as of September 30, 2005; however, this covenant was amended in conjunction with this new credit facility and no waiver was required. Although we were in compliance with all the covenants contained in this credit facility as of December 30, 2005, there can be no assurance that a waiver will be available on acceptable terms in the event of a future default. If we were unable to obtain a necessary waiver, we would be required to deposit an amount equal to the difference between our then current unrestricted cash deposits and the full amount of the letters of credit secured by the facility. If a default is not waived, we may not be able to obtain alternative financing on acceptable terms. In addition, our two series of outstanding secured notes contain covenants, including restrictions on our ability to incur additional debt. See Note 11 to the consolidated financial statements to this Form 10-Q. The need to comply with the terms of our debt obligations may also limit our ability to obtain additional financing and our flexibility in planning for or reacting to changes in our business and the industry.

We are operating under new leadership that will cause strategic and operational changes in our business. On January 27, 2006, we appointed Mr. Dennis McKenna as our new President and Chief Executive Officer in order to effectuate the turnaround of our business. In addition, our Board of Directors appointed Mr. McKenna as a director and Chairman of the Board on February 1, 2006. We are currently in a transition period as a result of this leadership change. Although we have not yet announced any material changes to our overall business strategy or operations, we expect to have strategic or operational changes to our business in the future and we cannot assure you that such strategic or operational changes, if any, will lead to an improvement of our business and financial condition. There can also be no assurance that any such strategic or operational changes will not lead to a further deterioration of our business or financial condition.

We may not be able to raise additional capital in the future. In the future, we may need to obtain additional financing to fund our business or repay our debt, and we cannot assure you that financing will be available in amounts or on terms acceptable to us. In addition, if funds are raised by incurring further debt, our operations and finances may become subject to further restrictions and we may be required to limit our service or product development activities or other operations, or otherwise modify our business strategy. If we fail to comply with financial or other covenants required in connection with such a financing, our creditors may be able to exercise remedies that could substantially impair our ability to operate. In addition, if we obtain additional funds by selling any of our equity securities or if we issue equity derivative securities in connection with obtaining debt financing, the percentage ownership of our stockholders will be reduced, stockholders may experience additional dilution, or the equity securities may have rights, preferences or privileges senior to the common stock.

We may suffer adverse consequences from a claimed default under our 2011 subordinated debentures. In the fourth quarter of fiscal 2005, we received a notice of default related to our 2011 convertible subordinated debentures. See **Financial Condition** . We strongly disagree with the claims made in the notice and intend to vigorously challenge any claim of an event of default. We cannot be certain, however, that a notice of acceleration will not be delivered or that we would prevail in any legal proceedings that might result. In addition, the notice of default in itself may give rise to actions by our asset-based lender or the landlords of our Amphitheatre and Crittenden Technology Center campuses in Mountain View, California under cross-default or cross-acceleration provisions, and may complicate or even prevent our efforts to raise additional financing.

Our success is dependent on continued revenue growth from newer product families. The SGI Altix family of servers and superclusters based on the Intel Itanium 2 processor and the Linux operating system was introduced in January 2003 and additional products in this line were added during fiscal 2004. In October 2004, we expanded our advanced graphics product line with the introduction of Silicon Graphics Prism, visualization systems based on Linux, Itanium 2, and our scalable graphics technology. Our Linux-based systems sales declined by 52% in second quarter of fiscal 2006 compared with the corresponding period in fiscal 2005. Risks associated with these newer product families include dependence on Intel in terms of price, supply, performance, product roadmaps and timely access to design specifications, and continued support for and development of the Itanium 2 processor family; the availability of Linux applications optimized for the 64-bit Itanium platform or our scalable systems architecture; acceptance of the Linux operating system in demanding environments; and competition from other suppliers of Intel-based servers, including clusters of low-end servers. These clusters are rapidly increasing as an important competitive factor in the high performance server market and have had a negative effect on our revenues and our gross margins.

Table of Contents

Future revenue growth from our newer product families is especially important because revenues from our traditional MIPS and IRIX products and maintenance business are expected to continue to decline. Our ability to achieve future revenue growth will depend significantly on the market success of these newer product families in servers, storage and visualization as well as our ability to generate sales to match or replace revenues generated from large sales transactions in prior periods. If one or more of the product lines were to fail in the market, it could have an adverse effect on our business and liquidity.

Our product strategy and business would be adversely affected by any delay, discontinuance or decreased competitiveness of Intel's Itanium 2 processor family. All of our core products are based on Intel's Itanium 2 architecture and we have cooperated with Intel in creating products optimized for this architecture. Intel's Itanium processors have been facing increased competition from other processors, such as AMD Opteron processors. In addition, Intel announced delays in the development and launch of several processors of its Itanium 2 processor family. Our product strategy and business depend on the continued availability and competitiveness of the Itanium 2 processor family and would be adversely affected by any further delays and/or discontinuance of this processor family. In addition, we may incur penalties under long-term contracts that require the delivery of future products. It is also important to our competitive position that Intel's Itanium 2 processors be competitive as to performance as well as price. Although it would be possible to migrate our products to the architecture of another processor, the migration may be expensive, time consuming and cause disruptions to our customers.

Our results of operations would be adversely affected if the carrying value of our long-lived assets becomes impaired. We evaluate our long-lived assets, including property and equipment and goodwill, whenever events or circumstances occur that indicate that the carrying amount of a long-lived asset may not be recoverable. Such events or circumstances may include the discontinuation of a product or product line, a sudden or consistent decline in the forecast for a product, changes in technology or in the way an asset is being used, a history of operating or cash flow losses or an adverse change in legal factors or in the business climate. Our long-lived asset impairment review would be based on a cash flow analysis and would require judgment with respect to many factors, including future cash flows, changes in technology, the continued success of product lines and future volume and revenue and expense growth rates. It is possible that our estimates of cash flows may change within the next twelve months resulting in the need to reassess the carrying value of our long-lived assets for impairment. The process of evaluating the potential impairment of goodwill is subjective and requires significant estimates and assumptions at many points during the analysis. Our estimated future cash flows are based on assumptions that are consistent with our annual planning process and include estimates for revenue and operating margins and future economic and market conditions. We base our fair value estimates on assumptions we believe to be reasonable at the time, but that are unpredictable and inherently uncertain. Actual future results may differ from those estimates. As a result, we may incur substantial non-cash impairment charges, which could adversely affect our results of operations.

Our financial reporting controls and procedures may be impaired by our restructuring activities and attrition. The uncertainties surrounding our business prospects and our continuing restructuring actions have increased the challenges of attracting and retaining qualified employees. Our annualized attrition rates have increased significantly in fiscal 2006 compared with fiscal 2005. There is no guarantee that we can retain highly qualified employees, or that we will be able to hire highly qualified candidates, as new skills are needed. In addition, while we will strive to ensure that material weaknesses do not develop in our internal controls due to headcount reductions or other factors, there is no guarantee that our internal controls will be unaffected by the restructuring actions or increasing attrition. If material weaknesses develop and we are unable to efficiently and effectively address these matters, investors could lose confidence in the reliability of our internal controls over financial reporting.

We are increasingly dependent on our partners. Our strategy of developing system products based on industry-standard technologies has increased our dependence on Intel and other partners. It is therefore important that we receive appropriate technical cooperation from Intel and other partners, and that the products from these partners continue to evolve in ways that support the differentiation that we seek to bring to our products. In particular, our Altix and Prism families depend on the continued availability, performance and price/performance of the Intel Itanium 2 processor family. Our financial performance and business prospects would be adversely affected if Intel were to reduce its support for the Itanium 2 line, including its willingness to supply components on terms that enable us to compete effectively for sales with substantial price sensitivity. Intel's plans in this regard could be affected by decisions of other system vendors with respect to their ongoing commitment to the Itanium 2 platform.

Table of Contents

The competitiveness of our system products, particularly our servers, is also significantly affected by the availability on our platform of third-party software applications that are important to customers in our target markets. The success of our Linux-based products and services depends on, among other things, the growth of the Linux market, the acceptance of Linux solutions by customers in demanding environments, the availability of Linux applications optimized for the 64-bit Itanium 2 platform or our scalable systems architecture and our dependence on acceptance of SGI-developed code by the open source community and by Linux distributors with whom we partner.

Our dependence on third party partners and suppliers, including sole source suppliers, may prevent us from delivering an acceptable product on a timely basis. We rely on both single source and sole source suppliers for many of the components we use in our products. For example, we utilize the Intel Itanium 2 processors in our Altix family of servers and superclusters and our Prism graphics system and have designed our system architecture to optimize performance using this processor. The Itanium 2 processor family is available only from Intel. If we were to utilize an alternative microprocessor, the transition would require an alternative design, which would be costly and cause significant delays in the development of future products, adversely affecting our business and operating results.

Our business is dependent on our ability to anticipate our needs for components and products and our suppliers' ability to deliver such components and products in time to meet critical manufacturing and distribution schedules. In addition, we have benefited from favorable discounts on certain components from key suppliers for selected transactions. Our business could be adversely affected, for example, if suppliers fail to meet product release schedules, if we experience supply constraints, if we fail to negotiate favorable pricing or if we experience any other interruption or delay in the supply chain which interferes with our ability to manufacture our products or manage our inventory levels. Risks also include limited bargaining flexibility, the possibility of charges for excess and obsolete inventory and risks involved with end of life buys from single source and sole source suppliers. We are currently focused on maximizing our working capital by working closely with our suppliers and tightly managing our overall supply chain.

In addition, we are in the process of transitioning to an alternate supplier to act as our foundry for certain key integrated circuits for new products planned for 2008 and later. There can be no assurance that we will be able to complete the transition without significant incremental cash impact.

We are dependent on sales to the U.S. government. A significant portion of our revenue is derived from sales to the U.S. government, either directly by us or through system integrators and other resellers. Sales to the government present risks in addition to those involved in sales to commercial customers, including potential disruptions due to changes in appropriation and spending patterns. Our U.S. government business is also highly sensitive to changes in the U.S. government's national and international priorities and budgeting. Events like Operation Iraqi Freedom and the continuing war on terrorism may affect funding for our programs or result in changes in government programs or spending priorities that may adversely affect our business. In addition, the U.S. government can typically terminate or modify its contracts with us at any time for its convenience. Our government business is also subject to specific procurement regulations and a variety of other requirements. Failure to comply with these or other applicable regulations and requirements could lead to suspension or debarment from government contracting or subcontracting for a period of time. Any disruption or limitation in our ability to do business with the U.S. government could have an adverse impact on us.

A portion of our business requires security clearances from the U.S. government. We have implemented measures to maintain our clearances in light of the fact that our Vice Chairman and former Chief Executive Officer, Robert Bishop, is an Australian citizen. These arrangements are subject to periodic review by customer agencies and the Defense Security Service of the Department of Defense.

We expect our operating results to fluctuate for a variety of reasons. Our revenue and operating results may fluctuate for a number of reasons from period to period, and we have fallen materially short of our forecasts on several occasions in recent years. Decreases in revenue can arise from any number of factors, including decreased demand, supply constraints, delays in the availability of new products, transit interruptions,

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

overall economic conditions, competitive factors, military or terrorist actions, or natural disasters. Demand can also be adversely affected by concerns specifically associated with our financial health and by product and technology transition announcements by us or our competitors. The timing of customer acceptance of certain large-scale server products may also have a significant effect on periodic operating results. Margins are heavily influenced by revenue levels, mix considerations, including

Table of Contents

geographic concentrations, the mix of product and service revenue, industry price trends, competitive pricing pressures (particularly for high visibility accounts) and the mix of server and desktop product revenue as well as the mix of configurations within these product categories. As a result of the concentration of sales in the third month of each quarter, developments late in a quarter can have a significant impact on that period's results.

We operate in a highly competitive industry with increasing market share being gained by cluster systems. The computer industry is highly competitive, with rapid technological advances and constantly improving price/performance. Most of our competitors have substantially greater technical, marketing and financial resources. They also generally have a larger installed base of customers and a wider range of available applications software. Competition may result in significant discounting and lower gross margins. In addition, as our Linux-based systems business grows, the number of our competitors may grow commensurate with the increased market opportunity. An important competitive development in our market has been the emergence of networked clusters of commodity computers from suppliers like Dell Computer as an alternative to our midrange products. These clusters have grown at a faster than anticipated rate and are taking an increasing share of the high-performance computing market. These clustered systems may not be subject to U.S. export regulations, which may make them more attractive to certain international customers. See *Many of our international sales require export licenses*.

Our typical concentration of sales at the end of our fiscal quarters makes period-to-period financial results less predictable. Over half of each quarter's product revenue results from orders booked and shipped during the third month, and disproportionately in the latter half of that month. This makes the forecasting of revenue inherently uncertain and can produce pressure on our internal infrastructure during the third month of a quarter. Because we plan our operating expenses, many of which are relatively fixed in the short term, on expected revenue, even a relatively small revenue shortfall may cause a period's results to be substantially below expectations.

Our common stock and other securities have been delisted from the New York Stock Exchange and are only traded on the over-the-counter securities market. This may adversely affect our future access to the capital markets. Our securities were suspended from trading on the NYSE on November 7, 2005, and were delisted from the NYSE effective as of January 13, 2006. Since the date of suspension, our common stock has been traded on the over-the-counter securities market under the symbol SGID and is currently quoted on the OTC Bulletin Board. This has adversely affected the market price of our common stock and 6.5% Senior Secured Convertible Notes and may adversely impact our future liquidity and access to the capital markets.

We are subject to the risks of international operations. We generate a large portion of our revenue outside the United States, and as a result, our business is subject to the risks associated with doing business internationally. International transactions frequently involve increased financial and legal risks arising from stringent contractual terms and conditions and the widely differing legal systems and customs in foreign countries. War, terrorism or public health issues in the regions of the world in which we do business have caused and may continue to cause damage or disruption to commerce by creating economic and political uncertainties. Such events could adversely affect our business in any number of ways, such as decreasing demand for our products, increasing our costs of operations, making it difficult to deliver products to customers, and causing delays and other problems in our supply chain. Our future revenue, gross margin, expenses and financial condition could also suffer due to other international factors, including but not limited to: changes in a country's economic and labor conditions; currency fluctuations; compliance with a variety of foreign laws, as well as U.S. laws affecting the activities of U.S. companies abroad; changes in tax laws; changes in the regulatory or legal environment; difficulties associated with repatriating cash generated abroad; fluctuations in transportation costs; natural and medical disasters; and trade protection measures.

Many of our international sales require export licenses. Our sales to customers outside the United States are subject to U.S. export regulations. Sales of many of our high-end products require clearance and export licenses from the U.S. Department of Commerce under these regulations. Our international sales would be adversely affected if such regulations were tightened, or if they are not modified over time to reflect the increasing performance of our products. Delay or denial in the granting of any required licenses could make it more difficult to make sales to foreign customers. In addition, we could be subject to regulations, fines and penalties for violations of import and export regulations such as our products being shipped directly or through a third-party to certain countries. Such violations could result in penalties, including prohibiting us from exporting our products to one or more countries, and could materially and adversely affect our business.

Table of Contents

We may not be able to develop and introduce new products on a timely basis. Meeting our objectives for the future will require that our recently introduced products achieve success in the marketplace and that we succeed in the timely development and introduction of more successful new products. Product transitions are a recurring part of our business. A number of risks are inherent in this process.

The development of new technology and products is increasingly complex and uncertain, which increases the risk of delays. The introduction of new computer systems requires close collaboration and continued technological advancement involving multiple hardware and software design teams, internal manufacturing teams, outside suppliers of key components such as semiconductors and outsource manufacturing partners. The failure of any one of these elements could cause our products under development to fail to meet specifications or to miss the aggressive timetables that we establish. There is no assurance that development or acceptance of our new systems will not be affected by delays in this process.

In addition, Intel recently announced delays in the development and launch of several processors of its Itanium 2 processor family. Our product strategy and business depend on the continued availability and competitiveness of the Itanium 2 processor family and would be adversely affected by any delays and/or discontinuance of this processor family. See *Our product strategy and business would be adversely affected by any delay, discontinuance or decreased competitiveness of Intel's Itanium 2 processor family*. In addition, we may incur penalties under long-term contracts that require the delivery of future products.

Short product life cycles place a premium on our ability to manage the transition to new products. We often announce new products in the early part of a quarter while the product is in the final stages of development and testing, and seek to manufacture and ship the product in volume during the same quarter. Our results could be adversely affected by such factors as development delays, the release of products to manufacturing late in any quarter, quality or yield problems experienced by suppliers, variations in product costs and excess inventories of older products and components. In addition, some customers may delay purchasing existing products in anticipation of new product introductions.

Most products are upgraded during their product life cycle. The ability to upgrade products in a timely fashion is necessary to compete in the computer industry. Delay in introducing updates and upgrades can adversely affect acceptance and demand for product.

We may become involved in intellectual property disputes. We routinely receive communications from third parties asserting patent or other rights covering our products and technologies. Based upon our evaluation, we may take no action or may seek to obtain a license. We are in discussions with several parties that have asserted intellectual property infringement claims. In any given case there is a risk that a license will not be available on terms that we consider reasonable, or that litigation will ensue. We expect that, as the number of hardware and software patents issued continues to increase, and as competition in the markets we address intensifies, the volume of these intellectual property claims will also increase.

In addition, our growing visibility as a supplier of Linux-based systems and as a participant in the open source software community increases our risk of becoming embroiled in the intellectual property disputes concerning these subjects, such as the current widely reported litigations between SCO Group on the one hand and IBM and Red Hat on the other. We received a notice from SCO Group purporting to terminate as of October 14, 2003 our fully paid license to certain UNIX operating system-related code, under which we distribute our IRIX operating system, on the basis that we have breached the terms of such license. We believe that the SCO Group's allegations are without merit and that our fully paid license is non-terminable. Nonetheless, there can be no assurance that this dispute with SCO Group will not escalate into litigation, which could have a material adverse effect on us, or that SCO Group's intellectual property claims will not impair the market acceptance of the Linux operating system.

We may not be able to retain and attract qualified employees. Our success depends on our ability to continue to attract, retain and motivate highly qualified technical, sales and marketing and management personnel. The uncertainties surrounding our business prospects and our continuing restructuring actions have increased the challenges of retaining world-class talent. Our annualized attrition rates have increased significantly in fiscal 2006 compared with fiscal 2005. There is no guarantee that we can retain highly qualified employees or that we will be able to hire highly qualified candidates as new skills are needed.

We may not be able to utilize a significant portion of our net operating loss and credit carryforwards. We

Table of Contents

have generated a significant amount of U.S. net operating loss carryforwards due to prior period losses. U.S. and state income tax laws limit the amount of these carryforwards a company can utilize upon a greater than 50% cumulative shift of stock ownership over a three year period. The issuance of additional common stock, in financing transactions or on conversion of our outstanding convertible bonds such as the 2009 Senior Convertible Notes issued in December 2003, will count towards this cumulative ownership shift. Our ability to use our existing carryforwards in the future may be limited and not available to offset income tax liabilities from future profits. This would have an effect on our cash balances and liquidity and would reduce our income after taxes if in any given fiscal period taxable profits are in excess of the restricted losses available for offset. Any net operating loss utilization restriction would not affect our future effective tax rate since any affected loss and credit carryforwards have been subject to a valuation allowance in prior periods.

Compliance or the failure to comply with environmental laws could impact our future net earnings. Certain of our products and operations are regulated under various laws in the US, Europe and other parts of the world relating to the environment, including laws and regulations that can limit the use of certain substances in our products or require us to recycle our products when they become waste. While it is our policy to ensure that our operations and products comply with all environmental laws at all times any failure to so comply with environmental laws or customer requirements relating to such laws could require us to stop producing or selling certain products, recall noncompliant products, or otherwise incur substantial costs in order to acquire costly equipment or make other operational changes in order to achieve compliance. Although environmental costs and liabilities have not materially affected us to date, due to the nature of our operations and legal developments affecting our products and operations, environmental costs and liabilities could have a material adverse affect on our business and financial position in the future.

From time to time new regulations are enacted, and it is difficult to anticipate how such regulations will be implemented and enforced. We track regulatory developments that may impact our business and devote substantial resources toward developing strategies for compliance with new requirements as they are enacted.

For example, we face increasing complexity in our product design and procurement operations as we adjust to new and anticipated requirements relating to the materials composition of our products, including the European Union Directive on the Restriction on the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS), which regulates the use of lead and other hazardous substances in electrical and electronic equipment put on the market in the European Union starting July 1, 2006. If we are unable to complete all required product changes prior to July 1, 2006, RoHS could adversely affect our sales into the European Union and subject us to penalties as well as contractual and other liabilities. In addition, we may face significant costs and liabilities in connection with product take-back legislation, such as the European Union Directive on Waste Electrical and Electronic Equipment (WEEE), which makes producers of electrical and electronic equipment, including computers, responsible for the collection, recycling, treatment and disposal of past and future covered products. Legislation similar to RoHS and WEEE has been or may be enacted in other jurisdictions, including in the United States, Japan and China. These and other environmental laws may become stricter over time and require us to incur substantial compliance costs. RoHS and WEEE are in the process of being implemented by individual countries in the European Union and it is likely that each jurisdiction will implement, interpret or enforce RoHS and WEEE somewhat differently. In addition, final guidance from individual jurisdictions may impose different or additional responsibilities on us. Our failure to comply with WEEE and ROHS, contractual obligations relating to WEEE and RoHS or other environmental laws could result in our being directly or indirectly liable for costs, fines or penalties and third-party claims, and could jeopardize our ability to conduct business in countries in the European Union.

Our business is subject to market risk. In the normal course of business, our financial position is routinely subject to a variety of risks, including market risk associated with interest rate movements and currency rate movements on non-U.S. dollar denominated assets and liabilities, as well as collectibility of accounts receivable. We regularly assess these risks and have established policies and business practices to protect against the adverse effects of these and other potential exposures. As a result, we do not anticipate material losses in these areas.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

The information required under this Item 3 is included in the section above entitled "Our business is subject to market risk" and should be read in connection with the information on market risk related to changes in interest rates and non-U.S. currency exchange rates in Part II, Item 7A, "Quantitative and Qualitative Disclosures About Market Risk", in our Annual Report on Form 10-K for the year ended June 24, 2005.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures. Our management, including our chief executive officer and chief financial officer, evaluated our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this Form 10-Q (the "evaluation date"). Based on that evaluation, our chief executive officer and chief financial officer have concluded that our disclosure controls and procedures were effective, as of the evaluation date, to ensure that the information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time period specified in SEC rules and forms. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including cost limitations, the possibility of human error, judgments and assumptions regarding the likelihood of future events, and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can provide only reasonable assurance of achieving their control objectives.

Table of Contents

Changes in internal control over financial reporting. There were no changes in our internal control over financial reporting during the period covered by this report that has materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

Our U.S. income tax returns for fiscal years 2002 to 2004 are open, and to date, we have not been notified of any pending audits or of any proposed adjustments to those returns. We are also negotiating the settlement of tax issues relating to our investment in Cray Research that affect the years 1984 through 1988. The current settlement proposals may result in a significant tax credit. We are currently being audited for state sales and use tax matters for the years 2001 through 2005 in Wisconsin and Minnesota. In addition, we have open income tax, VAT, and sales tax audits for years 1995 through 2005 in various foreign jurisdictions. The most significant of these audits surrounds proposed adjustments we made in April 2005 to our prior year Canadian federal tax returns for fiscal years 1996 through 2004. The adjustments are currently being reviewed by the Canadian Revenue Authorities and if accepted, will result in a significant tax credit. Our tax reserves associated with these historic Canadian federal tax returns have been prepared on the basis of issued assessments for fiscal years 1996 through 2002 and submitted tax returns for fiscal years 2003 and 2004. The outcome of any tax audits cannot be predicted with certainty, but we believe that any resulting audit adjustments to any of our open tax returns will not result in a material adverse impact on our financial condition, results of operations, or cash flows within the next twelve months.

SCO Group, the successor to AT&T as the owner of certain UNIX system V intellectual property and as our licensor, has publicly claimed that certain elements of the Linux operating system infringe SCO Group's intellectual property rights. In August 2003, we received a letter from SCO Group alleging that, as a result of our activities related to the Linux operating system, we are in breach of the fully paid license under which we distribute our IRIX operating system. The letter purported to terminate our UNIX System V license effective October 14, 2003. We have not received any communication from SCO with regard to this purported termination since that time. We believe that the SCO Group's allegations are without merit and that our fully paid license is non-terminable. There can be no assurance that this dispute with SCO Group will not escalate into litigation, which could have a material adverse effect upon SGI, or that SCO Group's intellectual property claims, which include a widely-publicized litigation against IBM Corporation, will not impair market acceptance of the Linux operating system.

On August 10, 2005, we filed a lawsuit with the LG Munich, a Higher Regional Court in Germany, against T-Systems International GmbH (TSI), a systems integrator, relating to a dispute regarding whether acceptance criteria were met with regard to an SGI system delivered in the spring of 2003. We are seeking full payment for the system in an amount equal to 4.6 million (\$5.4 million based on the conversion rate as of December 30, 2005). On September 21, 2005, TSI filed a counterclaim contesting our claim and alleging damages of 9 million plus interest since April 2004 (\$10.7 million based on the conversion rate as of December 30, 2005), which exceeds our contractual limit of liability of 2 million (\$2.4 million based on the conversion rate as of December 30, 2005). On December 7, 2005, we responded to TSI's counterclaim and filed a motion seeking an additional 3.8 million (\$4.5 million based on the conversion rate as of December 30, 2005) for lost profit relating to maintenance services. We cannot currently predict the outcome of this dispute.

On July 12, 2005, we disclosed that we had received a notice of default from a purported holder of more than 25% of our 6.125% Convertible Subordinated Debentures due 2011 (the 2011 Debentures), which we assumed when we acquired Cray Research in 1996 (see Note 11). The notice alleged that the indenture for the 2011 Debentures was breached in 2000 when we sold assets relating to certain former Cray Research product lines to Tera Computer Company (now known as Cray, Inc.) without causing Tera to assume the indenture. As a result of the notice and the expiration of the applicable cure period, such holder may now seek to accelerate the maturity of the 2011 Debentures. We strongly disagree with the claims made in the notice and intend to vigorously challenge any claim of an event of default. There are currently \$57 million outstanding principal amount of 2011 Debentures, and all required interest and principal payments have been made timely. The indenture

Edgar Filing: SILICON GRAPHICS INC - Form 10-Q

provides that upon an event of default the indenture trustee or the holders of at least 25% of the 2011 Debentures may cause the outstanding principal amount plus accrued interest to be immediately due and payable. The 2011 Debentures are unsecured and subordinated. The debenture holders or trustee would be required to commence legal proceedings and obtain a judgment in order to enforce their claim on the assets of SGI. No notice of acceleration or legal proceedings with respect to this claimed default has been received.

Table of Contents

A default entitling acceleration under the indenture for the 2011 debentures would trigger an event of default under our asset-backed credit facility. Acceleration of the maturity of the 2011 debentures would trigger an event of default under lease agreements with respect to certain facilities in Mountain View, California. We have reviewed the claimed default with the counterparties under these agreements and requested that they refrain from exercising any rights they may have arising from the claimed default. We are not aware that any of the counterparties under these agreements intend to take any action at this time.

On July 29, 2005, Syntegra (USA), Inc., a computer repair services vendor, filed a complaint against SGI in the U.S. District Court, Northern District of California, in connection with SGI's termination of its contract with Syntegra and transition of its business to an alternate vendor alleging, among other things, breach of contract, unfair competition and misappropriation of trade secrets. This complaint was dismissed from the federal court as improperly filed and on September 20, 2005, Syntegra re-filed a substantively similar complaint in the Superior Court of California, Santa Clara County. On November 7, 2005, SGI filed its answer to Syntegra's complaint and, additionally, filed a cross complaint against Syntegra for, among other things, declaratory relief and breach of contract. We intend to vigorously defend against Syntegra's allegations and pursue our claims.

As a result of anonymous allegations and allegations by an ex-employee we are conducting an internal investigation into whether certain systems were delivered to an entity in China in possible violation of U.S. export laws. We have voluntarily shared information with respect to the investigation with the U.S. Department of Commerce. We cannot assure that the Department or other agencies of the US government will not institute any proceedings against the Company in the future. In addition, from time to time, we receive inquiries from regulatory agencies informally requesting information or documentation. There can be no assurance in any given case that such informal review will not lead to further proceedings involving the Company in the future.

We also routinely receive communications from third parties asserting patent or other rights covering our products and technologies. Based upon our evaluation, we may take no action or we may seek to obtain a license. We are in discussions with several parties that have asserted intellectual property infringement claims. There can be no assurance in any given case that a license will be available on terms we consider reasonable, or that litigation will not ensue.

We are not aware of any pending disputes, including those disputes and settlements described above, that would be likely to have a material adverse effect on our financial condition, results of operations, or liquidity. However, litigation is subject to inherent uncertainties, and unfavorable outcomes could occur. An unfavorable outcome could include the payment of monetary damages, cash or other settlement, or an injunction prohibiting us from selling one or more products. If an unfavorable resolution were to occur, there exists the possibility of a material adverse impact on our financial condition, results of operations, or cash flows of the period in which the resolution occurs or on future periods.

Item 5. Other Information

We currently have a two-year asset-backed credit facility with Wells Fargo Foothill, Inc. and Ableco Finance LLC. The facility provides for credit of up to \$100 million, consisting of a \$50 million revolving line of credit and a \$50 million term loan. At December 30, 2005, we had borrowings against the term loan of \$35 million. On February 3, 2006, we borrowed the remaining \$15 million against the loan.

The disclosure set forth in Notes 9 and 11 of Notes to Condensed Consolidated Financial Statements in Part I, Item 1 of this Form 10-Q is incorporated herein by reference.

Item 6. Exhibits

The following Exhibits are filed as part of this Report:

- 10.1 Amendment dated November 18, 2005 to the Third Amended and Restated Credit Agreement, dated as of October 24, 2005, among Silicon Graphics, Inc., Silicon Graphics Federal, Inc., Silicon Graphics World Trade Corporation, Wells Fargo Foothill, Inc. and Ableco Finance LLC.
- 10.2 Amended and Restated 1993 Long-Term Incentive Stock Plan.
- 10.3 Amended and Restated 1996 Supplemental Non-Executive Equity Incentive Plan.
- 10.4 Amended and Restated 1998 Employee Stock Purchase Plan
- 10.5 Form of Restricted Stock Agreement
- 10.6 Employment Agreement between Silicon Graphics, Inc. and Dennis McKenna dated January 27, 2006 (incorporated by reference to Exhibit 10.1 of Registrant's Form 8-K filed on February 2, 2006)
- 31.1 Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 for Dennis McKenna and Jeffrey V. Zellmer.
