Washington, D.C. 20549

Form 10-K

x ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2005

or

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 0-28030

i2 Technologies, Inc.

(Exact Name of Registrant as Specified in Its Charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

One i2 Place
11701 Luna Road

Dallas, Texas

75-2294945
(I.R.S. Employer Identification No.)

75234
(Zip code)

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

(Address of principal executive offices)

Registrant's telephone number, including area code: **(469) 357-1000**

Securities registered pursuant to Section 12(b) of the Act: **None**

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, \$0.00025 par value

Preferred Share Purchase Rights

(Title of Class)

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer (as defined in Rule 12b-2 of the Act).

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the common equity held by non-affiliates (Affiliates being, for these purposes only, directors, executive officers and holders of more than 5% of the Registrant's Common Stock) on June 30, 2005, was \$94.4 million.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

As of March 1, 2006, the Registrant had approximately 20,702,325 outstanding shares of Common Stock.

DOCUMENTS INCORPORATED BY REFERENCE

Selected designated portions of the Registrant's definitive Proxy Statement to be filed on or before April 30, 2006 in connection with the Registrant's 2006 Annual Meeting of stockholders are incorporated by reference into Part III of this Annual Report.

The disclosures set forth in this report are qualified by Item 1A, Risk Factors, and by the section captioned Forward-Looking Statements in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as other cautionary statements set forth elsewhere in this report.

References in this report to the terms optimal and optimization and words to that effect are not necessarily intended to connote the mathematically optimal solution, but may connote near-optimal solutions, which reflect practical considerations such as customer requirements as to response time, precision of the results and other commercial factors.

All references to common stock and per share amounts for periods prior to February 17, 2005 have been retroactively restated to reflect the 1-for-25 reverse stock split we implemented February 16, 2005. See Item 5, Market For Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity.

ITEM 1. BUSINESS

Nature of Operations. We are a provider of multi-enterprise supply chain management solutions, including various supply chain software and service offerings. We operate our business in one business segment. Supply chain management is the set of processes, technology and expertise involved in managing supply, demand and fulfilment throughout divisions within a company and with its customers, suppliers and partners. The goals of our solutions include increasing supply chain efficiency and enhancing customer and supplier relationships by managing variability, reducing complexity, improving operational visibility, increasing operating velocity and integrating planning and execution. We also offer master data management technology, which is designed to collect, synthesize and distribute critical reference data by leveraging a service oriented architecture. Our offerings help customers improve efficiency in relation to sourcing, supply, demand, fulfilment and logistics performance. Our application software is often bundled with other offerings we provide such as business optimization and technical consulting, training, solution maintenance, software upgrades and development.

Globally, we have more than 500 customers in a variety of industries including:

Technology

Computer & Electronics

Telecommunications Equipment and Service

Semiconductor

Consumer Electronics & Consumer Durables

Contract Manufacturers

Automotive and Industrial

Automotive Original Equipment Manufacturers

Suppliers

Industrial Manufacturers

Process Industries

Metals

Energy & Chemicals

Consumer Goods & Retail

Retailers

Table of Contents

Consumer Packaged Goods

Soft Goods (Textiles/Apparel & Footwear)

No individual customer accounted for more than 10% of our total revenues during 2005, 2004 or 2003.

i2 was founded in 1988 and incorporated in Delaware in 1989. Our executive offices are located at One i2 Place, 11701 Luna Road, Dallas, Texas 75234, and our telephone number is (469) 357-1000.

Industry Background

Today's competitive business environment has led many companies in diverse industries to seek ways to make their businesses more agile and offer greater operating efficiency while improving flexibility and responsiveness to changing market conditions. In addition to facing higher competitive standards with respect to meeting customer demands for product quality, variety and price, businesses also recognize the need to improve asset utilization, reduce the cost of goods, reduce inventories, shorten lead times and reduce the cost of fulfilling orders. Furthermore, a company's extended supply chain may span multiple continents, requiring suppliers in one part of the world to collaborate with a plant in another to serve customers in yet a third location. These forces are prompting companies to collaborate with a broad range of suppliers and customers to improve efficiencies across multi-enterprise supply chains.

We believe that traditional enterprise resource planning (ERP) systems fail to provide both the forward visibility across divisions or enterprises and the high-speed decision-support capabilities that we believe are necessary to quickly plan and execute decisions. To increase competitiveness, we believe companies are looking for solutions that can be integrated with their existing systems to provide tools for managing the variability in their supply chains, allowing them to monitor events in order, inventory and transportation, to evaluate tradeoffs for fast and accurate decision-making and to execute their plans across the critical processes in their supply chains.

The growth of the Internet and the proliferation of software applications have accelerated many companies' efforts to increase efficiencies by leveraging information technology based on open standards. We believe this has prompted demands for a dynamic, open and integrated environment among customers, suppliers and designers. In response to these evolving market forces, many companies have sought to re-engineer their business processes to reduce manufacturing cycle times, shift from mass production to order-driven manufacturing, increase the use of outsourcing and share information more readily with vendors and customers.

Integration has become an increasingly important issue for enterprises to lower costs and realize value from their diverse environment of applications and distributed systems. Customers seek integration at several levels—business process, applications, user interface, data and technology. A wide variety of companies are pursuing the integration market opportunity, including ERP companies, leading Independent Software Vendors (ISVs), Enterprise Application Integration (EAI) vendors, Systems Integrators (SIs) and other information technology (IT) services organizations, but no single company has demonstrated a complete solution to the various requirements sought by customers. i2 provides an integration framework utilizing service oriented architecture—the Agile Business Process Platform.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

Leading software and technology companies are developing offshore (global) workforces, in part to take advantage of the technical talent and lower costs of human resources in India, China and other locations. This has led many companies to initiate their own offshore operations or outsource some run and maintain processes, as well as development and implementation activities, to Offshore IT Services (OIS) firms.

Development of the i2 Solutions

Advanced Planning and Scheduling. We have offered a set of supply chain management solutions since our company was founded nearly 18 years ago. Our founders, Sanjiv Sidhu and Ken Sharma, sought to expand enterprise application software beyond traditional ERP systems, which were basically transaction accounting and processing systems that did not consider production constraints or offer more sophisticated monitoring, decision-support and execution capabilities. We took the first step beyond ERP with the development of an advanced planning and scheduling application that took into account actual constraints to improve the flow of materials within a factory. That solution, i2 Factory Planner, has assisted many of our customers in improving the efficiency and profitability of their factories while reducing their materials and inventory costs.

Supply Chain Planning/Supply Chain Management. Our applications evolved into solutions for supply chain planning that encompassed constraint-based planning and scheduling for multiple factories, distribution centers and warehouses. With the addition of supply chain design and execution capabilities for logistics, demand planning and fulfilment, we became a leader in enterprise solutions for supply chain management.

Supplier Relationship Management. We continued to expand our product base by applying our solutions for the extended supply chain to the supplier relationship processes and functions. To facilitate cost-effective sourcing and product design, we acquired and developed technologies that help customers to more efficiently source, negotiate the pricing of and procure materials and components from suppliers, thereby enabling them to make design decisions while cognizant of the effect on the supply chain of existing products and the total product portfolio.

Distributed Fulfilment and Revenue Management. Our distributed order execution technology has enabled us to develop integrated, closed-loop planning and execution solutions. We continue to invest in this technology, which provides a scalable and flexible framework for creating new solutions and is used by our customers across multiple entities for transaction processing, visibility and event management capabilities. We have also invested in solutions that help customers optimize merchandising, revenue and pricing.

Supply and Demand Synchronization. i2's next-generation supply chain management solutions focus on the multi-echelon value chain, encompassing the customer's customer and the supplier's supplier. Our next-generation solutions are designed to enable businesses to manage and tune their supply chains simultaneously so that they can quickly change parameters to meet their dynamic business needs. These solutions are built on the i2 Agile Business Process Platform, a unique service-oriented architecture (SOA) that includes a layer of technology services for integration and data management, user interface development and a visual business process workflow engine. The platform is business process management (BPM) compliant and been designed to interoperate with legacy, ERP and other enterprise architectures.

Products

Our solutions—bundles of software products and technology services—are designed to help customers address various supply chain problems and opportunities, including:

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

Linking certain aspects of planning and decision-making to execution of such plans and the monitoring of changing conditions across the supply chain

Improving current business processes, return on assets and profitability

Creating an environment for continuous process improvement

Improving customer service levels and delivering on commitments to customers

Enhancing competitive advantage

Table of Contents

Increasing market share

Enhancing time to value for process redesign and acquisition integration

Our primary products are focused on optimizing the following business processes: supply and demand management; execution and collaboration; transportation and distribution management; supplier relationship management; as well as data management and analytics. Our products are complemented by our business process consulting and our technology and services.

Supply and Demand Management: i2 solutions for supply and demand management help businesses coordinate the production and distribution of goods and materials throughout the supply chain to final delivery to the customer. They also help businesses analyze their revenues with merchandising, planning and pricing tools.

Solutions for supply planning are designed to provide multi-enterprise visibility, collaboration, decision-support and execution capabilities. Using these tools, a business may estimate future demand for its products to help planners more accurately estimate future supply needs. As a result, businesses can make better decisions about how much of what products to make, when to make them, and what parts to utilize to make those products. Solutions for supply planning include i2 Factory Planner, i2 Supply Chain Planner, i2 Inventory Optimization and various scheduling products.

Solutions for demand management provide tools designed to forecast and continuously manage demand, plan merchandising strategies, manage markdowns and promotions pricing, and optimize price quoting. Using these products, companies can begin to optimize their revenues by selling products at prices set by analytic products. Demand management products include i2 Demand Manager, i2 Markdown Optimizer and i2 Merchandise Planner. i2 Inventory Optimization, i2 Sales and Operations Planning, i2 Merchandise Financial Planning, i2 Buying and Assortment Management, and i2 Allocation and Replenishment.

Transportation and Distribution Management: Solutions for transportation and distribution management help businesses optimize the flow of goods between suppliers, enterprise supply chain locations and customers. These tools provide integrated products for planning and executing transportation and distribution activities, as well as tools for strategic supply chain design and transportation modeling. Using i2 solutions, a business can procure, plan, execute and monitor freight movements across multiple modes, borders and enterprises. As a result, businesses can make better decisions about where and how to ship products, reducing their transportation costs while executing supply chain plans and achieving customer service objectives. Transportation and distribution management products include i2 Supply Chain Strategist, i2 Transportation Bid Collaboration, i2 Transportation Planner, i2 Transportation Modeler and i2 Transportation Manager.

Execution and Collaboration: Solutions to optimize plan execution and collaboration help businesses integrate the planning and execution processes, creating a closed-loop environment. These solutions provide tools designed to stage inventory, plan replenishment, manage orders and provide visibility to lower fulfilment costs, improve on-time delivery performance and enhance customer satisfaction. The i2 Collaborative Supply Execution solution is designed to, provide inventory and plan collaboration, transaction processing, visibility, event management, integration and workflow capabilities. Other solutions in this category include i2 Supply Chain Visibility, i2 Customer Order Fulfilment, i2 Collaborative Replenishment and i2 Configurator.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

Supplier Relationship Management: Supplier relationship management solutions help companies and their suppliers collaborate on sourcing and procurement for supply management. This solution is designed to bridge product development, sourcing, supply planning and procurement across the supply chain, providing the ability to create, execute and sustain global sourcing strategies. Sourcing solutions provide decision-support and optimization tools that are designed to help companies improve decision-making on supplies and the parts to use in products. During product development, these products can help to optimize designs by considering sourcing and supply chain constraints, as well as allowing design collaboration when outsourcing manufacturing or

Table of Contents

Index to Financial Statements

custom parts. During procurement, supplier relationship management solutions help companies to define sourcing strategies to reduce supply risks and costs, negotiate terms and streamline the requisitioning and buying of materials. Sourcing products include i2 Strategic Sourcing, i2 Product Sourcing and i2 Negotiate.

Data Management and Analytics: We offer a data management solution that is designed to provide customers with the ability to manage data from multiple sources including legacy, ERP and other applications. i2 Master Data Management can be deployed: to create and maintain application-specific data; to consolidate data from multiple disparate sources; to cleanse, transform, synchronize and validate data; as well as to filter unwanted data. Solutions for analytics such as i2 Performance Manager enable companies to monitor all aspects of their supply chain.

Dispositions: On July 1, 2005, we completed the sale of Trade Service Corporation (TSC), which was operated as a part of our content and data services business and on December 1, 2005, we sold the remainder of our content and data service business. See *ITEM 7.*

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - Discontinued Operations and Note 15. *Discontinued Operations* in our Notes to Consolidated Financial Statements.

Product Development

We focus our ongoing product development efforts on meeting the requests of, and delivering on our commitments to, our current customers, enhancing our solutions and the underlying technology across our products, and developing or enhancing products that will enable us to enter new markets. In order to address customer recommendations, we have developed a User Enhancement Voting Process in collaboration with the i2 User Group. This process allows customers to provide input so that our solutions evolve to meet our customers' business challenges and opportunities. In addition, we invest in solutions that help us more fully complete our solution offerings and enable cross-product workflows. We have continued to invest in products and technologies that we anticipate will be important and differentiated in the future.

Our Solutions Operations activities are primarily conducted in North America and India. Most product management and product marketing employees are based in North America, but many development and services teams are based in India. The India location offers many benefits to i2, including centralization of development efforts and cost structure advantages. Our India-based Solutions Center provides services such as upgrades, implementations and development services that heavily leverage other organizations based in India. For the years ended December 31, 2005, 2004 and 2003, our research and development expense totaled approximately \$37.3 million, \$56.3 million and \$66.2 million, respectively.

Services and Maintenance

Our customer service and support program includes software maintenance, the delivery of functional enhancements and updates, and around-the-clock availability for high severity issues.

We maintain a technical support team that operates through our service and support centers located in North America, Latin America, Greater Asia Pacific, Europe and Africa. Our customer service and support activities consist of the following:

Consulting Services. We offer our customers both on-site and off-site consulting services for assisting in the implementation of our products and services and integration with the customers' existing systems. We and our customers also use third-party consulting firms.

Development Services. Customers may also contract with us for services to provide custom development of our applications. In some cases, the modifications or additions to the software may be incorporated into future releases of our products.

Table of Contents

Index to Financial Statements

Training. We offer education and training programs for our customers and third-party implementation providers with classes offered at our offices or at customer locations. We also offer web-based and self-paced learning programs. These classes focus on the fundamental principles of our software products as well as their implementation and use.

Maintenance and Product Updates. We provide ongoing support services for our products. Maintenance contracts are typically sold to customers at the time of the initial license and may be renewed for additional periods. Our maintenance agreements with our customers provide the right to receive most product updates and enhancements to the products purchased by the customer, as well as telephone and online support. Our support services are packaged into three tiers (silver, gold and platinum), which offer customers the ability to choose the level of service they desire.

Sales and Marketing

We sell our software and services through a direct customer-facing organization that is augmented by other sales channels, including systems consulting and integration firms and other industry-related partners. Our direct customer-facing organization consists of account representatives and client managers that are supported by a team of personnel that includes solution and industry specialists.

We currently have joint marketing agreements with software vendors and other industry-related firms such as IBM and Microsoft. Additionally, we have alliances with top global and regional systems consulting and integration, hardware, software, and other relevant services firms including Accenture, IBM Global Services, Infosys and Tata Consulting Services, among others. These joint-marketing agreements and alliances generally provide the vendors with the ability to market our products and access our marketing materials and product training. By using these indirect sales channels, we seek to capitalize on the installed base of other companies and obtain favorable product recommendations from the business partners, thereby increasing the market coverage of our products.

Competition

The markets in which we operate are highly competitive. Our competitors are diverse and offer a variety of solutions targeting various segments of the extended supply chain as well as the enterprise as a whole. Some competitors compete with suites of applications, while most offer solutions designed specifically to target particular functions or industries. We believe our principal competitors are as follows:

ERP Software Vendors. These include companies such as Oracle and SAP, who have added or are attempting to add capabilities for supply chain planning or collaboration to their transaction system products. In addition, both companies are engaged in a multi-year effort to re-deploy their solutions on a Services Oriented Architecture platform.

Other Software Vendors. These include companies such as Adexa and Manugistics who compete principally with our production, logistics and fulfilment optimization products; companies such as Manugistics who compete with our transportation and distribution management products; companies such as JDA Software who compete primarily with our retail applications; and companies such as Manhattan Associates and Kinaxis who compete principally with our fulfilment and certain of our demand optimization products.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

Custom and Offshore Development. We also compete with independent developers of enterprise application software such as Infosys, Satyam, Wipro and other entities in countries with relatively low wage structures and, increasingly, internal development efforts by corporate information technology departments.

Proprietary Rights and Licenses

We regard our trademarks, copyrights, patents, trade secrets, technology and other proprietary rights as critical to our business. To protect our proprietary rights, we primarily rely on a combination of copyright, patent, trademark and trade secret laws, confidentiality procedures and contractual provisions. We license our software products in object code (machine-readable) format to customers under license agreements and we generally do not sell or otherwise transfer title to our software products to our customers. Our non-exclusive license agreements generally allow the use of our software products solely by the customer for specified purposes without the right to sublicense or transfer our software products.

Trademarks are important to our business as we use them in our marketing and promotional activities as well as with the delivery of our software products. Our registered trademarks include i2, i2 and design and PLANET.

We hold a number of U.S. patents that predominantly relate to planning, scheduling optimization, demand fulfilment, collaboration, e-commerce and data management and reporting. These patents expire at various times through 2021. We also depend on trade secrets and proprietary know-how for certain unpatented aspects of our business. To protect our proprietary information, we enter into confidentiality agreements with our employees, consultants and licensees, and generally control access to and distribution of our proprietary information. We sublicense some software that we license from third parties and incorporate in, or license in conjunction with, our products.

International Operations

We have international offices in Australia, Belgium, Canada, China, Finland, France, Germany, India, Japan, Korea, Netherlands, Singapore, South Africa, Taiwan and the United Kingdom. Total assets related to our international operations accounted for 37%, 32% and 26% of our total consolidated assets as of December 31, 2005, 2004 and 2003. International revenue totalled \$158.2 million, or 47% of total revenue in 2005; \$144.8 million, or 40% of total revenue, in 2004; and \$166.3 million, or 36% of total revenue, in 2003. See *Note 14 Segment Information, International Operations and Customer Concentrations* in our Notes to Consolidated Financial Statements.

Employees

At December 31, 2005, we had approximately 1,250 full-time employees, including approximately 410 employees engaged in research and development activities primarily located in India and the U.S. and approximately 135 employees engaged in sales and marketing activities. Our future success depends in significant part upon the continued service of our key technical, sales and managerial personnel and our ability to attract and retain highly qualified technical, sales and managerial personnel. Our employees in Germany are represented by a Worker's Council; however, none of our employees is represented by a collective bargaining agreement and we have never experienced a work stoppage. We believe employee relations to be satisfactory.

Seasonality

We typically experience higher demand for our products and services during the second and fourth quarter of the year.

Available Information

We make available, free of charge, through our investor relations web site, our reports on Forms 10-K, 10-Q and 8-K, and amendments to those reports, as soon as reasonably practicable after they are filed with the Securities and Exchange Commission (SEC). The address for our investor relations web site is <http://www.i2.com/investor>.

Table of Contents

Index to Financial Statements

The information contained on our website is not part of, and is not incorporated in, this or any other report we file with or furnish to the SEC.

In June 2003, we adopted a Code of Business Conduct and Ethics. The Code of Business Conduct and Ethics applies to, among others, our Chief Executive Officer and Chief Financial Officer. The full text of the Code of Business Conduct and Ethics is available at our investor relations web site, <http://www.i2.com/investor>. We intend to disclose any amendment to, or waiver from, a provision of the Code of Business Conduct and Ethics that applies to our Chief Executive Officer or Chief Financial Officer on our investor relations web site.

Item 1A. Risk Factors

Any investment in our company will be subject to risks inherent to our business. Before making an investment decision, you should carefully consider the risks described below together with all of the other information included in this report. The risks and uncertainties described below are not the only ones facing our company. Additional risks and uncertainties that we are not aware of or focused on or that we currently deem immaterial may also impair our business operations. This report is qualified in its entirety by these risk factors.

If any of the following risks actually occur, they could have a material adverse effect on our business, financial condition, cash flow or results of operations. In that case, the trading price of our securities could decline and you may lose all or part of your investment.

Risks Related To Our Business

We Have Experienced Substantial Negative Cash Flows And May Continue To Experience Such Negative Cash Flows, Which Would Have A Further Significant Adverse Effect On Our Business, Impair Our Ability To Support Our Operations And Adversely Affect Our Liquidity.

We have experienced substantial negative cash flows during the five years ended December 31, 2005, primarily due to sharp declines in our revenues and our inability to reduce our expenses to a level at or below the level of our revenues. Additionally, in 2005 we disposed of operations that generated positive income and cash flow. We used the proceeds from these disposals to pay down existing debt. Although we implemented restructuring activities in early 2005 focused on, among other things, further reducing our workforce and decreasing continued development of the functionality of certain of our products, a failure to maintain expense levels, stabilize or grow revenues, achieve positive cash flows and obtain additional equity or debt financing as needed will impair our ability to support our operations, adversely affect our liquidity and threaten our ability to repay our debts when they come due, which would have a material adverse effect on our business, results of operations, cash flow and financial condition as well as our stock price. Additionally, we continue to be obligated to pay approximately \$5.6 million annually in interest on our \$111.3 million face value of convertible notes, which includes the additional \$7.5 million of notes issued in January 2006 pursuant to the exercise of the over-allotment option. Continued negative cash flows and the adverse market perception associated therewith may continue to negatively affect our ability to sell our products and maintain existing customer relationships and may adversely affect our ability to obtain additional debt or equity financing on advantageous terms. There can be no assurance that we will be successful in obtaining or maintaining an adequate level of cash resources and we may be forced to act more aggressively in the future in the area of expense reduction in order to conserve cash resources.

Table of Contents

Index to Financial Statements

We Have A Negative Net Working Capital Balance Which May Require Additional Private Or Public Debt Or Equity Financing To Meet Working Capital Needs And To Repay Our Existing Debt When It Becomes Due. This May Have A Substantial Dilutive Effect On The Holdings Of Existing Stockholders. Such Financing May Only Be Available On Disadvantageous Terms, Or May Not Be Available At All. We Have \$25 million of 5.25% Convertible Subordinated Notes That Are Due In December 2006 And Our Working Capital May Be Insufficient To Repay These Notes.

At December 31, 2005, we had a negative net working capital balance of \$34.3 million. Our cash position may continue to decline in the future, primarily due to cash outflows associated with our operations, our debt service obligations and our prior restructuring activities. Unless we are able to maintain expense levels, stabilize or grow revenues and achieve consistent positive cash flows, our ability to support our operations and our liquidity may be further impaired. We may not be successful in obtaining or maintaining an adequate level of cash resources. We have \$25.0 million of debt that matures in December 2006.

We may be required to seek additional private or public debt or equity financing in order to support our operations and repay our outstanding indebtedness. However, we may not be able to obtain debt or equity financing on satisfactory terms or at all, and any new financing will likely have a substantial dilutive effect on our existing stockholders.

Our 5% Senior Convertible Notes Contain Covenants That Restrict Our Ability To Incur Additional Indebtedness.

Our 5% senior convertible notes contain financial covenants that, among other things, place restrictions on the amount and type of additional indebtedness that we can incur. Based on certain conditions we are limited to additional unsecured borrowings of \$25 million and limitations of secured borrowings based on EBITDA levels.

Our Financial Results Have Varied And May Continue To Vary Significantly From Quarter To Quarter And We May Again Fail To Meet Expectations, Which Might Negatively Impact The Price Of Our Stock.

Our operating results have varied significantly from quarter to quarter in the past, and we expect our operating results to continue to vary from quarter to quarter in the future due to a variety of factors, many of which are outside of our control. Although our revenues are subject to fluctuation, significant portions of our expenses are not variable in the short term, such as our lease and purchase commitments and debt servicing expense. If we cannot reduce expenses quickly to respond to decreases in revenues, a revenue shortfall is likely to adversely and disproportionately affect our operating results. These factors have caused our operating results to be below the expectations of securities analysts and investors in the past and may do so again in the future. Our failure to meet or exceed analyst and investor expectations might negatively affect the price of our common stock.

Continued Decreased Levels Of Demand For Our Enterprise Products And Services Could Significantly Reduce Our Revenues.

Historically, we have derived a substantial portion of our revenues from licenses of our enterprise products and related services. Our enterprise products principally include solutions to address supply and demand management, transportation and distribution management, execution and collaboration, supplier relationship management, as well as data management and analytics. We expect software solution revenues and

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

maintenance and consulting contracts related to our enterprise products to continue to account for a substantial portion of our revenues for the foreseeable future. We have experienced a sharp decrease in the demand for our enterprise products and related services due to a number of factors, including sales execution, product competitiveness and questions regarding our viability, which have led to a decline in our revenues. Other factors, such as competition and technological change and the existing and potential litigation and other proceedings against us, could also adversely impact demand for, or market acceptance of, these applications.

Table of Contents

Index to Financial Statements

If We Are Unable To Develop And Generate Demand For Our Products, Additional Serious Harm Could Result To Our Business.

We have invested significant resources in developing and marketing our products and services. The demand for, and market acceptance of, our products and services are subject to a high level of uncertainty. Adoption of software solutions, particularly by those individuals and enterprises that have historically relied upon traditional means of commerce and communication, requires a broad acceptance of substantially different methods of conducting business and exchanging information. Our products and services are often considered complex and may involve a new approach to the conduct of business by our customers. As a result, intensive marketing and sales efforts may be necessary to educate prospective customers regarding the uses and benefits of these products and services in order to generate demand. The market for our products and services may continue to weaken, competitors may develop superior products and services or we may fail to develop acceptable solutions to address new market conditions. Any one of these events could have a material adverse effect on our business, results of operations, cash flow and financial condition.

We May Not Be Competitive, And Increased Competition Could Seriously Harm Our Business.

Relative to us, many of our competitors have one or more of the following advantages:

Longer operating history.

Greater financial, technical, marketing, sales and other resources.

Consistent positive cash flows.

Historical profitable operations.

Superior product functionality in certain areas.

Greater name recognition.

A broader range of products to offer.

Better software performance.

A larger installed base of customers.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

Current and potential competitors have established, or may establish, cooperative relationships among themselves or with third parties to enhance their products, which may result in increased competition. In addition, we expect to experience increasing price competition as we compete for market share. We understand that some competitors are offering enterprise application software at no charge as components of product bundles. Further, traditional enterprise resource planning vendors have focused more resources on the development and marketing of enterprise application software, particularly in the product and industry segments in which we compete and, increasingly, corporate information technology departments are undertaking internal development efforts. As a result of these and other factors, we may be unable to compete successfully with our existing or new competitors.

We Have Been And Continue To Be Subject To Claims Pertaining To The Quality Of Our Products And Services, And Questions Regarding Our Financial Viability, Which Claims And Perceptions, If Unresolved Or Not Addressed, Could Continue To Seriously Harm Our Business And Our Stock Price.

From time to time, customers make claims pertaining to the quality and performance of our software and services, citing a variety of issues. Our recent operating performance, our historic negative net cash position, the long-term decline in our stock price, and the existing and potential litigation and other proceedings against us have led to questions in the market regarding our financial viability. Whether customer claims regarding the quality and performance of our products and services or concerns about our financial viability are founded or unfounded, if such claims and perceptions are not resolved in a manner favorable to us, they may continue to

Table of Contents

Index to Financial Statements

adversely impact customer demand and affect the market perception of our company, our products and our services. Any such damage to our reputation could have a material adverse effect on our business, results of operations, cash flow and financial condition and could negatively affect the price of our stock.

We Face Risks Related To Ongoing Governmental Investigations And Litigation That Could Have A Material Adverse Effect On Our Relationships With Customers And Our Business, Results Of Operations, Cash Flow and Financial Condition And We May Face Additional Litigation In The Future That Could Also Harm Our Business.

In March 2003, the SEC issued a formal order of investigation to determine whether there had been violations of the federal securities laws by us and/or others involved with us in connection with matters relating to the 2003 restatement of our consolidated financial statements. The settlement of the SEC enforcement proceedings, announced on June 9, 2004 and described in *Note 7 Commitments and Contingencies* in our Notes to Condensed Consolidated Financial Statements, covers the company only. On July 15, 2005, the SEC filed a civil action against three former officers of the company: Gregory A. Brady, William M. Beecher and Reagan L. Lancaster. The complaint relates to events that occurred prior to the restatement of the company's financial statements in 2003. We continue to cooperate with the staff of the SEC and we are also cooperating with the U.S. Attorney's Office for the Northern District of Texas, which has also been investigating certain matters relating to our restatement.

We currently face a lawsuit recently brought against us by Kmart and a potential assessment by the Internal Revenue Service relating to the timing of the company's remittance of withholding taxes associated with the exercise of stock options by employees in the 2000 tax year. We may face additional litigation in the future that could harm our business and impair our liquidity.

We are generally obligated, to the extent permitted by law, to indemnify our current and former directors and officers who are named as defendants in some of these lawsuits. Defending against existing and potential litigation and other proceedings may continue to require significant attention and resources of our management. We cannot assure you that the significant time and effort spent will not adversely affect our business, results of operations, cash flow and financial condition.

The Loss Of Certain Of Our Key Personnel And Any Future Potential Losses Of Key Personnel Or Our Failure To Attract Additional Personnel Could Seriously Harm Our Company.

We rely upon the continued service of a relatively small number of key technical, sales and senior management personnel. We have lost a number of key personnel as a result of our performance and our restructurings, among other reasons, and we believe our voluntary attrition rate is generally higher than the software industry's average. Our workforce reductions have impacted employees directly responsible for sales, which may affect our ability to close revenue transactions with our customers and prospects, and consulting, which may affect customer satisfaction. Our future success depends on retaining our key employees and our ability to retain, attract and train other highly qualified technical, sales and managerial personnel, which may be increasingly difficult given our recent financial performance and employee layoffs.

Additional changes to our organizational structure may result in further voluntary and involuntary attrition and loss of key personnel. Our employees can typically resign with little or no prior notice. Our loss of any more of our key technical, sales and senior management personnel, and the intellectual capital that they possess, or our inability to retain, attract and train additional qualified personnel could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Table of Contents

Index to Financial Statements

Restructuring and Reorganization Initiatives Have Been Executed, And Such Activities Pose Significant Risks To Our Business.

Restructuring initiatives were recently executed by us in an effort to achieve our profitability objectives. This restructuring involved, among other things, reducing our workforce and decreasing continued development of functionality for certain of our products. These activities pose significant risks to our business, including the risk that terminated employees will disparage the company, file legal claims against us related to their termination of employment, become employed by competitors or share our intellectual property or other sensitive information with others and that the reorganization will not achieve targeted efficiencies. The failure to retain and effectively manage our remaining employees or achieve our targeted efficiencies through the reorganization could increase our costs, adversely affect our development efforts and impact the quality of our products and customer service. If customers become dissatisfied with our products or service, our maintenance renewals may decrease, our customers may take legal action against us and our sales to existing customers could decline, leading to reduced revenues. Additionally, during 2005, we announced the reorganization of our sales and services operating structure from primarily geographic to primarily industry-focused field groups. Failure to achieve the desired results of our strategic initiatives would harm our business, results of operations, cash flow and financial condition.

Because Our Software Products Are Intended To Work Within Complex Business Processes, Implementation Or Upgrades Of Our Products Can Be Difficult, Time-Consuming And Expensive, And Customers May Be Unable To Implement Or Upgrade Our Products Successfully Or Otherwise Achieve The Benefits Attributable To Our Products. This May Result In Customer Dissatisfaction, Harm To Our Reputation And Cause Non-Payment Issues.

Our products typically must integrate with the many existing computer systems and software programs of our customers. This can be complex, time-consuming and expensive, and may cause delays in the deployment of our products. As a result, some customers may have difficulty implementing our products successfully or otherwise achieving the benefits attributable to our products. Delayed or ineffective implementation or upgrades of our software and services may limit our sales opportunities, result in customer dissatisfaction and harm to our reputation, or cause non-payment issues.

Failure To Complete Development Projects As Planned Could Harm Our Operating Results And Create Business Distractions And Negative Publicity That Could Harm Our Business.

Risks associated with our software solutions and other development projects include, but are not limited to:

Customers may withhold cash payments or cancel contracts if we fail to meet our delivery commitments, the customers have financial difficulties or change strategy, or the functionality delivered is not acceptable to the customers. We are particularly susceptible to this with respect to arrangements where payments are scheduled to occur later in the engagement.

The cancellation or scaling back of one or more of our larger software solutions and other development projects could have a material adverse impact on future software solution revenues.

We may be unable to recognize revenue associated with software solutions and other development projects in accordance with expectations. We generally recognize revenue from software solutions and other development projects over time using the contract method of accounting. Failure to complete project phases in accordance with the overall project plan can create variability in our

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

expected revenue streams if we are not able to recognize revenues related to particular projects because of delays in development.

Many of our software solutions and other development projects are fixed-price arrangements. If we fail to accurately estimate the resources required for a fixed-price project or the customer attempts to change the scope of the project, the profit, if any, realized from the project would be adversely affected to the extent that we have to add additional resources to complete the project.

If We Fail To Adequately Protect Our Intellectual Property Rights Or Face A Claim Of Intellectual Property Infringement By A Third Party, We Could Lose Our Intellectual Property Rights Or Be Liable For Significant Damages.

We rely primarily on a combination of copyright, trademark and trade secret laws, confidentiality procedures and contractual provisions to protect our proprietary rights. However, unauthorized parties may attempt to copy aspects of our products or to obtain and use information that we regard as proprietary. Policing unauthorized use of our products is difficult, and we cannot be certain that the steps we have taken will prevent misappropriation of our intellectual property. This is particularly true in India, where a significant portion of our Solutions Operations are located, and other foreign countries such as China and Russia where the laws do not protect proprietary rights to the same extent as the laws of the United States and may not provide us with an effective remedy against piracy. The misappropriation or duplication of our intellectual property could disrupt our ongoing business, distract our management and employees, reduce our revenues and increase our expenses. Any litigation to defend our intellectual property rights could be time-consuming and costly.

There has been a substantial amount of litigation in the software industry regarding intellectual property rights. As a result, we may be subject to claims of intellectual property infringement. Although we are not aware that any of our products infringe upon the proprietary rights of third parties, third parties may claim infringement by us with respect to current or future products. Any infringement claims, with or without merit, could be time-consuming, result in costly litigation or damages, cause product shipment delays or the loss or deferral of sales, or require us to enter into royalty or licensing agreements. If we enter into royalty or licensing agreements in settlement of any litigation or claims, these agreements may not be on terms favorable to us. Unfavorable royalty and licensing agreements could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Certain Of Our Customers Purchase Our Software, But Delay Or Terminate Its Implementation. If This Type Of Activity Becomes Significant, It Could Harm Our Ability To Sell To Existing Customers And Impact Our Maintenance and Services Revenues.

Certain of our existing customers delay or terminate implementations of our software due to budgetary constraints related to economic uncertainty, dissatisfaction with product quality, the difficulty of prioritizing a surplus of information technology projects, changes in business strategy, personnel or priorities or for other reasons. Such customers may be less likely to invest in additional software in the future and to continue to pay for software maintenance. Since our business relies to a large extent upon sales to existing customers and since maintenance and services revenues are key elements of our revenue base, any reduction in these sales or these maintenance and services payments could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Our Software May Contain Errors Which Could Result In The Loss Of Customers And Reputation, Adverse Publicity, Loss Of Revenues, Delays In Market Acceptance, Diversion of Development Resources And Claims Against Us By Customers.

Our software programs may contain errors. Although we conduct testing and quality assurance through a release management process, we may not discover errors until our customers install and use a given product or until the volume of services that a product provides increases. On occasion, we have experienced delays in the scheduled introduction of new and enhanced products because of errors. Errors could result in loss of customers and reputation, adverse publicity, loss of revenues, delays in market acceptance, diversion of development and consulting resources and claims against us by customers.

Table of Contents

Index to Financial Statements

Failure Or Circumvention Of Our Controls And Procedures Or Failure To Comply With Regulations Related To Controls And Procedures Could Seriously Harm Our Business.

Over time, we have made significant changes in and may consider making additional changes to our internal controls, our disclosure controls and procedures, and our corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, and not absolute, assurances that the objectives of the system are met. Any failure of our controls, policies and procedures could have a material adverse effect on our business, results of operations, cash flow and financial condition.

We May Have Difficulty Obtaining And Maintaining Cost-Effective Insurance, Which May Have A Material Adverse Effect On Our Business, Results Of Operations, Cash Flow and Financial Condition.

We obtain insurance to cover a variety of potential risks and liabilities. In the future, it may become more difficult to maintain insurance coverage at reasonable levels, or if such coverage is available, the cost to obtain or maintain it may increase substantially. This may result in our being forced to bear the burden of an increased portion of risks for which we have traditionally been covered by insurance, which could have a material adverse effect on our business, results of operations, cash flow and financial condition.

We May Not Be Successful In Convincing Customers To Migrate To Current Or Future Releases Of Our Products, Which May Lead To Reduced Consulting And Maintenance Revenues And Less Future Business From Existing Customers.

Our customers may not be willing to incur the costs or invest the resources necessary to complete upgrades to current or future releases of our products. This may lead to our loss of consulting and maintenance revenues and future business from customers that continue to operate prior versions of our products or choose to no longer use our products.

If We Fail To Derive Benefits From Our Existing And Future Strategic Relationships, Our Business Will Suffer.

From time to time, we have collaborated with other companies in areas such as marketing, distribution or implementation. Maintaining these and other relationships is a meaningful part of our business strategy. However, some of our current and potential strategic partners are either actual or potential competitors, which may impair the viability of these relationships. In addition, some of our relationships have failed to meet expectations and may fail to meet expectations in the future. A failure by us to maintain existing strategic relationships or enter into successful new strategic relationships in the future could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Serious Harm To Our Business Could Result If Our Encryption Technology Fails To Ensure The Security Of Our Customers Online Transactions.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

The secure exchange of confidential information over public networks is a significant concern of consumers engaging in on-line transactions and interaction. Some of our software applications use encryption technology to provide the security necessary to affect the secure exchange of valuable and confidential information. Advances in computer capabilities, new discoveries in the field of cryptography or other events or developments could result in a compromise or breach of the algorithms that these applications use to protect customer transaction data. If any compromise or breach were to occur, it could have a material adverse effect on our business, results of operation and financial condition.

Table of Contents

Index to Financial Statements

We Are Dependent On Third-Party Software That We Incorporate Into And Include With Our Products And Solutions And Impaired Relations With These Third Parties, Defects In Third-Party Software Or The Inability To Enhance Their Software Over Time Could Harm Our Business.

We incorporate and include third-party software into and with certain of our products and solutions. Additionally, we may incorporate and include additional third-party software into and with our products and solutions in future product offerings. The operation of our products could be impaired if errors occur in the third-party software that we utilize. It may be more difficult for us to correct any defects in third-party software because the development and maintenance of the software is not within our control. Accordingly, our business could be adversely affected in the event of any errors in this software. There can be no assurance that these third parties will continue to make their software available to us on acceptable terms, to invest the appropriate levels of resources in their products and services to maintain and enhance the software capabilities, or to remain in business.

Further, it may be difficult for us to replace any third-party software if a vendor seeks to terminate our license to the software or our ability to license the software to customers. Any impairment in our relationship with these third parties could have a material adverse effect on our business, results of operations, cash flow and financial condition.

We Face Risks Associated With International Sales And Operations That Could Harm Our Company.

International revenues accounted for approximately 47% of our total revenues during 2005, and we expect to continue to generate a significant portion of our revenues from international sales in the future. Our international operations are subject to risks inherent in international business activities, including the tendency of markets outside of the U.S. to be more volatile and difficult to forecast than the U.S. market. Any of the following factors, among other things, could adversely affect the success of our international operations:

Difficulties and costs of staffing and managing geographically disparate operations.

Extended accounts receivable collection cycles in certain countries.

Compliance with a variety of foreign business practices, laws and regulations.

Overlap of different tax structures and regimes.

Meeting import and export licensing requirements.

Trade restrictions.

Changes in tariff rates.

Changes in general economic and political conditions in international markets.

The Expansion Of Our Operations In India Poses Significant Risks That Could Impair Our Ability To Develop Our Products, Implement Our Products Or Put Our Products At A Competitive Disadvantage.

We have shifted a large portion of our software solutions and other development and services capacity to India. However, we may not fully achieve the cost savings and other benefits that we anticipate from this program and we may not be able to attract or retain sufficient numbers of developers and consultants with the necessary skill sets in India to meet our needs. The distributed nature of our development and consulting resources could create further operational challenges and complications. Additionally, we have a heightened risk exposure to changes in the economic, security and political conditions of India. Operational issues, recruiting and retention issues, ability to obtain work permits, economic and political instability, military actions and other unforeseen occurrences in India could impair our ability to develop and introduce new software applications and functionality in a timely manner, or hinder our ability to provide cost-competitive services, either of which could put our products at a competitive disadvantage and cause us to lose existing customers or fail to attract new customers.

Table of Contents

Index to Financial Statements

We May Not Successfully Integrate The Products, Technologies Or Businesses From, Or Realize The Intended Benefits Of, Acquisitions, And We May Make Future Acquisitions Or Enter Into Joint Ventures That Are Not Successful, Which Could Seriously Harm Our Business.

Historically, we have acquired technology or businesses to supplement and expand our product offerings. In the future, we could acquire additional products, technologies or businesses, or enter into joint venture arrangements for the purpose of complementing or expanding our business. Negotiation of potential acquisitions or joint ventures and our integration of acquired products, technologies or businesses could divert management's time and resources. Future acquisitions could cause us to issue equity securities that would dilute your ownership of us, incur debt or contingent liabilities, amortize intangible assets, or write off in-process research and development and other acquisition-related expenses that could have a material adverse affect on our business, results of operations, cash flow and financial condition. We may not be able to properly integrate acquired products, technologies or businesses with our existing products and operations, train, retain and motivate personnel from the acquired businesses, or combine potentially different corporate cultures. Failure to do so could deprive us of the intended benefits of those acquisitions. In addition, we may be required to write-off acquired research and development if further development of purchased technology becomes unfeasible, which may adversely affect our business, results of operations, cash flow and financial condition.

Changes In The Value Of The U.S. Dollar, As Compared To The Currencies Of Foreign Countries Where We Transact Business, Could Harm Our Operating Results.

To date, our international revenues have been denominated primarily in U.S. Dollars. However, the majority of our international expenses, including the wages of approximately 63% of our employees, have been denominated in currencies other than the U.S. Dollar. Therefore, changes in the value of the U.S. Dollar as compared to these other currencies may adversely affect our operating results. We have implemented limited hedging programs to mitigate our exposure to currency fluctuations affecting international accounts receivable, cash balances and intercompany accounts, but we do not hedge our exposure to currency fluctuations affecting future international revenues and expenses and other commitments. For the foregoing reasons, currency exchange rate fluctuations have caused, and likely will continue to cause, variability in our foreign currency denominated revenue streams and our cost to settle foreign currency denominated liabilities.

We May Become Subject To Product Liability Claims That Could Seriously Harm Our Business.

Our software products generally are used by our customers in mission-critical applications where component failures could cause significant damages. To mitigate this exposure, our license agreements typically seek to limit our exposure to product liability claims from our customers. However, these contract provisions may not preclude all potential claims. Additionally, our insurance policies may be inadequate to protect us from all liability that we may face. Product liability claims could require us to spend significant time and money in litigation or to pay significant damages. As a result, any claim, whether or not successful, could harm our reputation and have a material adverse effect on our business, results of operations, cash flow and financial condition.

We May Not Be Able to Fully Realize The Benefits Of Our Deferred Tax Assets.

If we do not achieve sufficient domestic federal taxable income in future years to utilize all or some of our net operating loss carryforwards, they will expire, and we will be unable to fully realize the benefits of our deferred tax assets.

Index to Financial Statements

Risks Related To Our Industry

If Our Products Are Not Able To Deliver Fast, Demonstrable Value To Our Customers, Our Business Could Be Seriously Harmed.

Enterprises are requiring their application software vendors to provide faster time to value on their technology investments. We must continue to improve the speed of our implementations and the pace at which our products deliver value or our competitors may gain important strategic advantages over us. If we cannot successfully respond to these market demands, or if our competitors do so more effectively than we do, our business, results of operations, cash flow and financial condition could be materially and adversely affected.

Releases Of And Problems With New Products May Cause Purchasing Delays, Which Would Harm Our Revenues.

Our practice and the practice in the industry is to periodically develop and release new products and enhancements. As a result, customers may delay their purchasing decisions in anticipation of our new or enhanced products, or products of competitors. Delays in customer purchasing decisions could seriously harm our business and operating results. Moreover, significant delays in the general availability of new releases, significant problems in the installation or implementation of new releases, or customer dissatisfaction with new releases could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Risks Related To Our Stock

Our Stock Price Historically Has Been Volatile, Which May Make It More Difficult To Resell Common Stock At Attractive Prices.

The market price of our common stock has been highly volatile in the past, and may continue to be volatile in the future. The following factors could significantly affect the market price of our common stock:

Negative cash flows.

Additional equity or debt financing transactions.

Continued quarterly variations in our results of operations.

The market or system on which our common stock trades.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

Announcement of new customers, new products, product enhancements, joint ventures and other alliances by our competitors or us.

Technological innovations by our competitors or us.

Stock valuations or performance of our competitors.

General market conditions, geopolitical events or market conditions specific to particular industries.

Perceptions in the marketplace of performance problems involving our products and services.

In particular, the stock prices of many companies in the technology and emerging growth sectors have fluctuated widely, often due to events unrelated to their operating performance. These fluctuations may harm the market price of our common stock.

If We Are Unsuccessful In Maintaining The Listing Of Our Common Stock On The NASDAQ National Market, Our Business Reputation May Be Harmed and Our Ability To Raise Funds In The Capital Markets Might Be Adversely Affected.

On July 21, 2005, our common stock was re-listed by The NASDAQ Listing Qualifications Panel and began trading on The NASDAQ National Market. In the future, our common stock price may decline to levels that

Table of Contents

Index to Financial Statements

would again cause us not to comply with NASDAQ listing standards. Any failure to maintain the listing of our common stock on The NASDAQ National Market might harm our general business reputation and be a consideration for investors when considering an investment in us, which could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Our Executive Officers And Directors, In Particular Sanjiv Sidhu And An Affiliate Of Q Investments, Have Significant Influence Over Stockholder Votes.

As of March 1, 2006, our current executive officers and directors together beneficially owned approximately 31.2% of the total voting power of our company, approximately 26.6% of which was beneficially owned by Sanjiv Sidhu, our current Chairman and former Chief Executive Officer and President, and entities that he controls. Further, an affiliate of Q Investments beneficially owns approximately 22.9% of the voting power of the company, and has the right to appoint two directors to our Board of Directors. Accordingly, Mr. Sidhu, the Q Investments affiliate and our officers and directors holding or controlling holdings of stock in our company have had and will have significant influence in determining the composition of our Board of Directors and other significant matters requiring stockholder approval or acquiescence, including amendments to our certificate of incorporation, a substantial sale of assets, a merger or similar corporate transaction or a non-negotiated takeover attempt. Such concentration of ownership may discourage a potential acquirer from making an offer to buy our company that other stockholders might find favorable, which in turn could adversely affect the market price of our common stock.

Our Charter And Bylaws Have Anti-Takeover Provisions And We Have A Stockholder Rights Plan Which, In Combination, Effectively Inhibit A Non-Negotiated Merger Or Business Combination.

Provisions of our certificate of incorporation and our bylaws, Delaware law and our stockholder rights plan could make it more difficult for a third party to acquire us, even if doing so would be beneficial to our stockholders. We are subject to the provisions of Section 203 of the Delaware General Corporation Law, which restricts certain business combinations with interested stockholders. The combination of these provisions effectively inhibits a non-negotiated merger or other business combination.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our corporate headquarters is located in Dallas, Texas and is held under an operating lease contract that expires in 2010. This facility houses our executive and administrative staff as well as sales, marketing, research and development and consulting personnel. We also lease space for our other offices in the U.S., Australia, Belgium, Canada, China, Finland, France, Germany, India, Japan, Korea, Netherlands, Singapore, South Africa, Taiwan and the United Kingdom primarily to provide sales, customer support, consulting services and research and development activities. We consider our properties suitable and adequate for our present needs and do not anticipate leasing any significant additional properties at this time.

ITEM 3. LEGAL PROCEEDINGS

Governmental Investigations and Actions

Beginning in the fall of 2001, we and certain members of our Board of Directors received a series of communications from a former officer containing a variety of allegations generally related to revenue recognition and financial reporting, among other things. Our Board of Directors directed our Audit Committee to conduct an internal investigation of these allegations. In November 2002, we reported to the SEC and publicly disclosed the results of that investigation, as well as certain related allegations made during the fall of 2002 by the former

Table of Contents

Index to Financial Statements

officer and another former officer. Thereafter, the staff of the SEC opened an informal inquiry into these allegations and other matters relating to our financial reporting.

In January 2003, our ongoing investigation turned up information that persuaded management and the Audit Committee that material adjustments to our previously issued financial statements might be required and that our consolidated financial statements for the years ended December 31, 2001 and 2000 should be re-audited. The cumulative impact of the revenue adjustments required by the re-audit was to reduce revenue by \$359.7 million, which was comprised of \$127.3 million of revenue that was reversed and \$232.4 million of revenue that was deferred for possible recognition in the future. In March 2003, we were advised that the SEC had issued a formal order of investigation to determine whether there had been violations of the federal securities laws by the company and/or others involved with the company in connection with matters relating to the restatement of our consolidated financial statements.

On June 9, 2004, the company settled the SEC enforcement proceedings. Without admitting or denying the SEC's substantive findings against it, the company consented to a cease-and-desist order requiring future compliance with specific provisions of the federal securities laws and paid a \$10.0 million civil penalty.

The settlement of the SEC enforcement proceedings covers the company only. On July 15, 2005, the SEC filed a civil action against three former officers of the company: Gregory A. Brady, William M. Beecher and Reagan L. Lancaster. The complaint relates to events that occurred prior to the restatement of the company's financial statements in 2003. The SEC's investigation continues as to other individuals and entities. We continue to cooperate with the staff of the SEC and we are also cooperating with the U.S. Attorney's Office for the Northern District of Texas, which is also investigating certain matters relating to our restatement.

Customer Litigation

On September 30, 2004, we were served with a complaint in a suit filed in the District Court of Dallas County, Texas by Kmart Corporation against the company, Sanjiv Sidhu, our current Chairman and former Chief Executive Officer and President, and Gregory Brady, our former Chief Executive Officer and President. The complaint alleges fraudulent inducement, breach of contract, breach of fiduciary duty, rescission and unjust enrichment in relation to the license agreement, dated as of September 29, 2000, between our company and Kmart. Certain of the allegations in Kmart's complaint are purportedly similar to the subject of the cease-and-desist order entered into by the company in connection with the June 9, 2004 settlement of the SEC enforcement proceedings related to the company's 2003 restatement as well as the allegations made by the SEC in the subsequent civil action brought against three former officers of the company on July 15, 2005. The complaint states that Kmart paid in excess of \$40.0 million for software and technology and in excess of \$10.0 million for implementation services in connection with the license agreement. The prayer for relief requests rescission of the license agreement, actual and punitive damages, fees, costs and other disbursements. We are vigorously defending the company against this action.

Indemnification Agreements

We have entered into indemnification agreements with certain of our officers, directors and employees that may require us, among other things, to indemnify such officers, directors and employees against certain liabilities that may arise by reason of their status or service as directors, officers or employees and to advance their expenses incurred as a result of any proceeding against them as to which they could be indemnified. Pursuant to these agreements, we have advanced fees and expenses incurred by certain current and former directors, officers and employees in

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

connection with the governmental investigations and actions related to the 2003 restatement of our consolidated financial statements and other matters and may continue to do so in the future.

We have also entered into agreements regarding the advancement of costs with certain officers and employees. Pursuant to these agreements, we have advanced fees and expenses incurred by such officers and employees in connection with the governmental investigations and actions related to the 2003 restatement of our consolidated financial statements and other matters and may continue to do so in the future.

Table of Contents

Index to Financial Statements

The maximum potential amount of future payments we could be required to make under these indemnification agreements and the agreements for the advancement of costs is unlimited. Additionally, our corporate by-laws allow us to choose to indemnify any employee for certain events or occurrences while the employee is, or was, serving at our request in such capacity. We incurred approximately \$4.9 million, \$4.5 million and \$1.4 million of expense for legal fees and expenses for current and former employees during 2005, 2004 and 2003, respectively.

Internal Revenue Service Audit

We currently are being examined by the Internal Revenue Service (IRS) regarding matters relating to the timing of the company's remittance of withholding taxes, which were previously remitted, associated with the exercise of certain stock options by employees in the 2000 tax year. The company has filed a protest regarding the IRS's position on the matter and the protest is being reviewed by the IRS. The IRS has not issued an assessment with respect to any monetary penalties claimed to be owed by the company and the company presently intends to seek a full statutory abatement of any such penalties which might be assessed. The amount of such assessment could be significant.

India Tax Assessments

On March 29, 2005, we were notified by the Office of the Addl. Commissioner of Income-Tax in India of tax and interest assessments of approximately \$2.4 million and \$0.9 million, respectively, related to transfer pricing adjustments between our affiliated companies for the Indian statutory fiscal year ended March 31, 2002. The Office of the Addl. Commissioner of Income-Tax has asserted that intercompany charges from our Indian subsidiaries to our U.S. and Dutch subsidiaries were understated during this period. The company was required to pay, and has paid, the assessed tax during the appeals process. The future assessment of a penalty, in addition to the tax and interest, in an amount up to \$2.4 million is possible, but not probable, and no amount has been accrued at December 31, 2005.

On February 15, 2006, we were notified of similar adjustments related to the Indian statutory fiscal year ended March 31, 2003. We have not received formal assessments related to these adjustments, but we estimate that additional tax and interest assessments of approximately \$0.7 million and \$0.3 million, respectively, may be forthcoming.

We believe the Indian tax authorities' position regarding our intercompany transactions to be without merit and that all intercompany transactions were conducted at appropriate pricing levels.

Japan Tax Examination

In January 2006, we closed the tax examination by the National Tax Agency in Japan regarding withholding taxes on intercompany payments made by our subsidiary in Japan. No assessment was made.

Certain Accruals

We have accrued for estimated losses in the accompanying consolidated financial statements for matters where we believe the likelihood of an adverse outcome is probable and the amount of the loss is reasonably estimable. We are subject to various claims and legal proceedings that arise in the ordinary course of our business from time to time, including claims and legal proceedings that have been asserted against us by former employees and certain customers, and have been in negotiations to settle certain of those contingencies. The adverse resolution of any one or more of those matters or the matters described in this Item 3 over and above the amount, if any, that has been estimated and accrued in our consolidated financial statements could have a material adverse effect on our business, financial condition, results of operations or cash flows.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

Table of Contents**Index to Financial Statements****PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock trades on the NASDAQ National Market under the ticker symbol ITWO. During the period from May 9, 2003 to July 25, 2005, our common stock was quoted on the over-the-counter Pink Sheets under the ticker symbol ITWH.PK.

The following table lists the high and low per share intra-day sales prices for our common stock as reported by The NASDAQ National Market or as quoted in the over-the-counter Pink Sheets, as applicable, for the periods indicated. All references to common stock and per share amounts for periods prior to February 17, 2005 have been retroactively restated to reflect the 1-for-25 reverse stock split we implemented on February 16, 2005.

	<u>High</u>	<u>Low</u>
2005		
Fourth quarter	\$ 22.25	\$ 10.83
Third quarter	24.88	7.80
Second quarter	8.80	6.75
First quarter	17.50	7.77
2004		
Fourth quarter	\$ 18.75	\$ 15.00
Third quarter	23.00	15.00
Second quarter	33.75	19.50
First quarter	61.25	25.00

As of March 1, 2006, there were approximately 20,702,325 shares of our common stock outstanding held by approximately 396 holders of record.

Dividends

We have never declared or paid cash dividends on our common stock. We currently intend to retain any earnings for use in our business and do not anticipate paying any cash dividends in the foreseeable future. Future dividends, if any, will be determined by our Board of Directors.

Table of Contents**Index to Financial Statements***Stock Option Plans*

Information regarding stock-based compensation awards (including both stock options and stock rights awards) outstanding and available for future grants as of December 31, 2005, segregated between stock-based compensation plans approved by stockholders and stock-based compensation plans not approved by stockholders, is presented in the table below. Included in the table are stock options granted to former employees of acquired companies that were assumed by us. We do not intend to grant additional stock options under any of the assumed plans of acquired companies. See *Note 10 Employee Benefit Plans*, in our Notes to Consolidated Financial Statements. While our stockholders approved certain of our acquisitions of the companies from which these plans were assumed, our stockholders have not approved any of the assumed plans (in thousands, except per share amounts):

Plan Category	Number of Shares to be Issued Upon Exercise of Outstanding Awards	Weighted-Average Price of Outstanding Awards	Number of Shares Available for Future Grants
Plans approved by stockholders:			
1995 Plan	4,853	\$ 76.49	2,619
Plans not approved by stockholders:			
2001 Plan	383	89.84	411
Assumed plans of acquired companies	25	324.36	619
Total	5,261	\$ 78.66	3,649

Stock Rights Plan

On January 17, 2002, our Board of Directors approved adoption of a stockholder rights plan and declared a dividend of one preferred share purchase right for each outstanding share of common stock. Each share of common stock has attached to it (after adjusting for our recent 1-for-25 reverse stock split) one right to purchase 25 units of one one-thousandth of a share of Series A junior participating preferred stock at a price of \$75.00 per unit. The rights, which expire on January 17, 2012, will only become exercisable upon distribution. Distribution of the rights will not occur until ten days after the earlier of (i) the public announcement that a person or group has acquired beneficial ownership of 15.0% or more of our outstanding common stock or (ii) the commencement of, or announcement of an intention to make, a tender offer or exchange offer that would result in a person or group acquiring the beneficial ownership of 15.0% or more of our outstanding common stock.

Shares of Series A preferred stock purchasable upon exercise of the rights are not redeemable. Each share of Series A preferred stock will be entitled to a dividend of 40 times the dividend declared per share of common stock. In the event of liquidation, each share of Series A preferred stock will be entitled to a payment of the greater of (i) 40 times the payment made per share of common stock or (ii) \$1,000. Each share of Series A preferred stock will have 40 votes, voting together with the common stock. Finally, in the event of any merger, consolidation or other transaction in which shares of common stock are exchanged, each share of Series A preferred stock will be entitled to receive 40 times the

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

amount received per share of common stock. Because of the nature of the dividend, liquidation and voting rights, the value of the 25 units of Series A preferred stock purchasable upon exercise of each right should approximate the value of one share of common stock.

If, after the rights become exercisable, we are acquired in a merger or other business combination transaction, or 50% or more of our consolidated assets or earning power are sold, proper provision will be made so that each holder of a right will thereafter have the right to receive upon exercise that number of shares of common stock of the acquiring company having market value of two times the exercise price of the right.

Table of Contents

Index to Financial Statements

If any person or group becomes the beneficial owner of 15.0% or more of the outstanding shares of common stock, proper provision will be made so that each holder of a right, other than rights beneficially owned by the acquiring person (which will thereafter be void), will have the right to receive upon exercise that number of shares of common stock or units of Series A preferred stock (or cash, other securities or property) having a market value of two times the exercise price of the right.

The rights have significant anti-takeover effects by causing substantial dilution to a person or group that attempts to acquire us on terms not approved by our Board of Directors. The rights should not interfere with any merger or other business combination approved by the Board of Directors since the rights may be redeemed by us at the redemption price of \$0.25 per right prior to the occurrence of a distribution date. Additional details of this stock rights plan are presented in *Note 9 Stockholders Equity (Deficit) and Income (Loss) per Common Share* in our Notes to Consolidated Financial Statements.

Convertible Debt

As of December 31, 2005, we had approximately \$103.75 million in face value of outstanding indebtedness that is convertible into shares of our common stock, including \$25.0 million of our 5.25% convertible notes that are due in December 2006. Details of this debt are presented in *Note 6 Borrowings and Debt Issuance Costs* in our Notes to Consolidated Financial Statements included elsewhere in this report. On November 28, 2005, we called \$235.0 million of our \$260.0 million of our 5.25% convertible subordinated notes due December 15, 2006. We settled this debt on December 28, 2005. In September and October of 2005, we retired \$50.0 million of our 5.25% convertible subordinated notes due on December 15, 2006.

Table of Contents**Index to Financial Statements****ITEM 6. SELECTED FINANCIAL DATA**

The following table presents selected consolidated financial data for the periods indicated. The selected consolidated financial data set forth below should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and related notes included elsewhere in this report. Amounts shown are in thousands, except per share data. The revenue amounts have been reclassified from previously reported amounts. See *Note 2 Reclassification of Certain Revenue and Expense*.
