11

Our efficiency has been driven by our approach to lending, product development, and branch expansion.

Multi-family and commercial real estate lending are both broker-driven without cost to the Company.

One-to-four family loans are originated on a pass-through basis and sold shortly after closing, servicing-released, generating income for the Company.

Products and services are frequently developed by third-party providers and the sale of these products generates additional revenues.

46 of our 166 branches are located in-store.

Franchise expansion has largely stemmed from mergers and acquisitions.

12

Much of our growth has been acquisition-driven.
