PART I

ITEM 1. DESCRIPTION OF BUSINESS

Overview

Andrea Electronics Corporation (Andrea) designs, develops and manufactures state-of-the-art microphone technologies and products for enhancing speech-based applications software and communications that require high quality, clear voice signals. Our technologies eliminate unwanted background noise to enable the optimum performance of various speech-based and audio applications. We are incorporated under the laws of the State of New York and have been engaged in the electronic communications industry since 1934.

Andrea s products and technologies optimize the performance of speech-based applications and audio applications in primarily the following markets:

personal computing (primarily for speech recognition applications and voice communication over the internet);

audio and video conferencing; and

in-vehicle communications (to enable untethered, hands-free communication).

Andrea Digital Signal Processing (DSP) Microphone and Audio Software business Our patented and patent-pending digital noise canceling technologies enable a speaker to be several feet from the microphone, and free the speaker from having to hold the microphone (we refer to this capability as far-field microphone use). Our Digital Super Directional Array (DSDA) and Pure Audio microphone products convert sound received by an array of microphones into digital signals that are then processed to cancel background noise from the signal to be transmitted. These two adaptive technologies represent the core technologies within our portfolio of far-field technologies. In addition to DSDA and Pure Audio, Andrea has developed and commercialized several other digital, far-field noise canceling technologies, including, among others, Andrea EchoStop, a high-quality acoustic echo canceller which enables speaker phone functionality with technology for canceling unwanted stationary noises.

All of our digital, far-field microphone technologies are software-based and operate using either a dedicated DSP or a general purpose processor (for example, the Intel Pentium). The software, which may encompass one or all of our far-field noise canceling technologies, can be applied to improve the performance of a single microphone or multiple microphones. In addition, our digital, far-field, noise canceling technologies can be tailored and implemented into various form factors, for example, into the monitor of a PC, a personal digital assistant, a rear view mirror or, and can be used individually or combined depending on particular customer requirements.

We are currently targeting our far-field technologies at 1) the desktop computing market (primarily through our relationship with Analog Devices, Inc. (Analog Devices), 2) the video and audio conferencing market and 3) the market for personal hands free communication designed for use in automobiles, trucks and buses to control PCs and cellular communication and other devices within vehicles. Our far-field, digital noise canceling technologies and related products, together with implementations of other high-end audio technologies (for example, our Active Noise Cancellation technology) comprise our Andrea DSP Microphone and Audio Software line of business. Net revenues of such technologies and products during the years ended December 31, 2006 and 2005 approximated 55% and 39%, respectively, of our total net revenues. We dedicate the majority of our marketing and research and development resources to this business segment, as we believe that communication products will increasingly require high performance, untethered (hands-free and headset-free) microphone technology.

Andrea Anti-Noise Headset Product business Our headset microphone products help to ensure clear speech in personal computer and telephone headset applications. Our Active Noise Cancellation microphone technology uses electronic circuits that distinguish a speaker s voice from background noise in the speaker s environment and then cancels the noise from the signal to be transmitted by the microphone. Our Active Noise Reduction headphone products use electronic circuits that distinguish the signal coming through an earphone from background noise in the listener s environment and then reduces the noise heard by the listener. Together with our standard noise canceling headset products, these products comprise our Andrea Anti-Noise Headset Product segment. During the years ended December 31, 2006 and 2005, our Andrea Anti-Noise Headset Product segment approximated 45% and 61%, respectively, of our total net revenues.

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

For more financial information regarding our operating segments, see Note 14 of the audited consolidated financial statements.

Industry Background

Our primary mission is to provide the emerging voice interface markets with state-of-the-art microphone and communication products. The idea underlying these markets is that natural language spoken by the human voice will become an important means by

Table of Contents

which to communicate and control many types of computing devices and other appliances and equipment that contain microprocessors. We are designing and marketing our products and technologies to be used for these natural language, human/machine interfaces with:

desktop, laptop and hand-held computers and mobile personal computing devices;

video and audio conferencing systems; and

automotive communication systems.

We believe that end users of these applications and interfaces will require high quality microphone and earphone products that enhance voice transmission, particularly in noisy office and mobile environments. We also believe that these applications will increasingly require microphones that are located several feet from the person speaking, or far-field microphone technology. Applications in this area include:

continuous speech dictation to personal computers;

multiparty video teleconferencing and software that allows participants to see and jointly communicate; and

cellular hands free interfaces for automobiles, home and office automation.

We believe that an increasing number of these devices will be introduced into the marketplace during the next several years.

Our Strategy

Our strategy is to:

maintain and extend our market position with our Andrea DSP Microphone and Audio Software technologies and products and our higher margin Andrea Anti-Noise products;

develop relationships with companies that have significant distribution capabilities for our Andrea DSP Microphone and Audio Software technologies and products and Andrea Anti-Noise products;

broaden our Andrea DSP Microphone and Audio Software product lines and Andrea Anti-Noise product lines through a more modest but still a healthy level of internal research and development;

design our products to satisfy specific end-user requirements identified by our collaborative partners; and

outsource manufacturing of our products in order to reduce fixed overhead and achieve economies of scale.

An important element of our strategy for expanding the channels of distribution and broadening the base of users for our products is our collaborative arrangements with manufacturers of computing and communications equipment and software publishers that are actively engaged in the various markets in which our products have application. In addition, we have been increasing our own direct marketing efforts.

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

The success of our strategy will depend on our ability to, among other things:

increase net revenues of Andrea DSP Microphone and Audio Software products and our line of existing Andrea Anti-Noise products;

continue to contain costs;

introduce additional Andrea DSP Microphone and Audio Software products and Andrea Anti-Noise products;

maintain the competitiveness of our technologies through focused and targeted research and development; and

achieve widespread adoption of our products and technologies.

Our Technologies

We design our Andrea DSP Microphone and Audio Software and Andrea Anti-Noise products to transmit voice signals with the high level of quality, intelligibility and reliability required by the broad range of voice-based applications in computing and telecommunications. We achieve this through the use of several audio technologies that employ software processes that are proprietary to us. Software processes of this type are commonly referred to as algorithms.

Table of Contents

Andrea DSP Microphone and Audio Software Technology

This set of technologies is generally based on the use of an array of microphones from which the analog signals are converted to digital form and then processed using digital electronic circuitry to eliminate unwanted noise in the speaker's environment. Our Andrea DSP Microphone and Audio Software Products provide clear acoustic and audio input performance where the desired audio signal is at a distance from the microphone. An example of this is a person driving an automobile who wants to control various systems in the car or communicate through a wireless telephone. We have also engineered our Andrea DSP Microphone and Audio Software Products to be compatible with Universal Serial Bus, or USB, computer architecture. USB is an industry standard for connecting peripherals, such as microphones, earphones, headsets, keyboards, mice, joysticks, scanners and printers, to personal computers. We believe that our Andrea DSP Microphone and Audio Software technology achieve far-field microphone performance previously unattainable through microphones based on mechanical acoustic designs and microphones based on analog signal processing.

Our Andrea DSP Microphone and Audio Software Products include the use of the following technologies, among other technologies and techniques:

Digital Super Directional Array (DSDA®). Our patented DSDA microphone technology enables high quality far-field communications by centering microphone sensitivity on a user's voice and canceling noise outside of that signal. DSDA continuously samples the ever changing acoustic properties within an environment and adaptively identifies interfering noises that are extraneous to the voice signal, resulting in increased intelligibility of communications.

PureAudio®. Our patented PureAudio is a noise canceling algorithm that enhances applications that are controlled by speech by sampling the ambient noise in an environment and attenuating the noise from sources near or around the desired speech signals, thus delivering a clear audio signal. Designed specifically to improve the signal-to-noise ratio, PureAudio is effective in canceling stationary noises such as computer and ventilation fans, tires and engines.

EchoStop®. Our patented EchoStop is an advanced acoustic echo canceller (stereo version available) developed for use with conferencing systems such as group audio and videoconferencing systems and cellular car phone kits. EchoStop allows true two-way communication (often referred to as full duplex) over a conferencing system, even when the system is used in large spatial environments that may be vulnerable to extensive reverberation. EchoStop incorporates noise reduction algorithms to reduce the background noise of both the microphone input and the loudspeaker output, thus preventing the accumulation of interfering noise over conferencing systems that facilitate communication among multiple sites.

SuperBeam. SuperBeam is a highly accurate digital algorithm that forms an acoustic beam that extends from the microphone to the speech source in an environment. We believe SuperBeam provides a fixed noise reduction microphone solution for the typical acoustic environment found in room environments in which speech is used, such as in offices and homes. The microphone beam is generated by processing multiple microphone samples through pre-established digital filters and adding the outputs. The result is an optimum speech enhancement and noise reduction solution to a predefined setting. Because the beam is able to adapt to changes in the acoustic environment, this technology is called adaptive beamforming.

Direction Finding and Tracking Array (DFTA®). Our patented DFTA technology utilizes an array of microphones, unique software algorithms and digital signal processing to detect the presence of a user's voice. DFTA determines the direction of the voice which then tracks the speaker when he or she moves.

Andrea Anti-Noise Technologies

Noise Cancellation (NC) Microphone Technology. This technology is based on the use of pressure gradient microphones to reduce the transmission of noise from the speaker's location. Instead of using electronic circuitry to reduce noise, pressure gradient microphones rely on their mechanical and acoustic design to do so. Our NC microphones are well-suited for applications in which there is less background noise in the speaker's environment.

Active Noise Cancellation (ANC) Microphone Technology. This technology is based on analog signal processing circuits that electronically cancel the transmission of noise from the speaker's location. ANC is particularly well-suited for those environments in which the speaker is surrounded by high levels of ambient background noise.

Our ANC and NC microphones are most effectively used in near-field applications where the microphone is next to the speaker's mouth such as a headset environment.

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

Active Noise Reduction (ANR) Earphone Technology. This technology is based on analog signal processing circuits that electronically reduce the amount of noise in the environment that the listener would otherwise hear in the earphone. Our ANR

Table of Contents

earphones improve the quality of speech and audio heard by a listener in extremely noisy environments, particularly those characterized by low frequency sounds, such as those in aircraft, machine rooms, factories, automobiles, trucks and other ground transportation equipment.

Our Products and their Markets and Applications

Our Andrea DSP Microphone and Audio Software Products and Andrea Anti-Noise Products have been designed for applications that are controlled by or depend on speech across a broad range of hardware and software platforms. These products incorporate our DSP, NC, ANC and ANR microphone technologies, and are designed to cancel background noise in a range of noisy environments, such as homes, offices, factories and automobiles. We also manufacture a line of accessories for these products. For the consumer and commercial markets, we have designed our Andrea DSP Microphone and Audio Software Products and Andrea Anti-Noise Products for the following applications:

Speech recognition for word processing, database, and similar applications;

Distance Learning (education through the use of Internet-base lessons and training information);

Audio/videoconferencing;

Internet telephony and Voice Chat;

Professional audio systems;

Voice-activated interactive games;

Cellular and other wireless telecommunications;

Telematics, or in-vehicle computing (the use of computer-controlled systems in automobiles and trucks); and

Hands-free car phone kits.

We market and sell our products directly to end users through our website, computer product distributors, through value-added resellers, to original equipment manufacturers and to software publishers. For more information about these collaborative arrangements, please refer to the information under the caption "Our Collaborative Arrangements" .

Andrea DSP Microphone and Audio Software Products

We develop our Andrea DSP Microphone and Audio Software Products primarily through customer-specific integration efforts, and we either license our related algorithms, sell a product incorporating our related algorithms, or both. For example, we have developed technologies that can be, or are, embedded into a PC, PC monitors, high-end videoconferencing units, IP telephony applications, automotive interiors and hand-held devices, among others. In addition, we have developed stand-alone products for specific customers who then sell such products to end users. As a result, such products are not available from us directly. However, as part of our strategy to increase sales to prospective customers desiring high-quality microphone performance for certain customer-specific environments, we have developed the following products that may be purchased directly from Andrea:

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

Andrea Superbeam Array Microphone. The Superbeam Array Microphone is a two-microphone device that attaches to the top of any laptop or PC equipped with Analog Devices' SoundMa[®] Digital Audio System. The SoundMax Cadenza software is integrated with Andrea Electronics PureAudio and DSDA noise-cancellation software, thereby removing the high costs associated with required memory and processing power from previous, DSP-based microphone devices (now powered by Intel's host processor).

Andrea USB Stereo Full Duplex Adapter (USBD2A). The USBD2A was designed for users who desire to utilize Andrea Electronics' award winning Superbeam Array Microphone, and who operate PCs which do not have integrated stereo microphone input capability. In addition to providing users with high quality voice input to enable, headset-free, speech-based PC applications such as VoIP, voice command and control, and online-gaming, the USBD2A also provides high fidelity, amplified stereo output for multimedia audio playback.

Andrea AudioCommander. Offering an audio interface for controlling PC multimedia applications, AudioCommander includes controls to operate noise cancellation features, thereby enhancing microphone performance. The software also includes an audio wizard that sets microphone levels to optimize PC audio for speech-enabled applications including speech recognition, Internet telephony and command and speech control functions.

Table of Contents

Andrea AutoArray Microphone (AutoArray). The AutoArray is a digital, high performance microphone system designed for computing applications in vehicles such as automobiles and trucks. It is the first super-directional audio input device designed specifically for in-vehicle computing. The AutoArray incorporates our DSDA and PureAudio technologies, among others.

Andrea VoiceCenter (VoiceCenter). The VoiceCenter is a multi-functional, digital voice recorder software application that enables recorded speech files to be applied for productivity as well as expressing personality. The digital WAV recorded files are automatically labeled and can be compressed with WMA for attachment to e-mail, used as voice memos, voice alarms (with a calendar reminder function) and even add your voice annotation to documents. The VoiceCenter also includes Andrea PureAudio noise reduction/speech enhancement technology for increasing the recording sound quality of any microphone.

Andrea Anti-Noise Products

Our Andrea Anti-Noise Products include a line of headsets, handsets and related accessories that incorporate our NC, ANC and ANR technologies. Our headsets are mostly differentiated by the various designs of their headband, microphone boom and earphone components and are available in both single earphone monaural and dual earphone stereo models.

NC Products. Our NC products are sold through our internal contact center, as well as to original equipment manufacturers for incorporation into, or for use with their products. With some of our headsets, customers have the unique ability to mix and match microphone boom and headband components to meet their specific application and user comfort preferences. The speaker-housing unit in these models can be used for digital, CD-quality sound. By removing the speaker-housing unit, we can offer this headset for simple speech applications at a lower price.

ANC Products. All of our ANC products are sold through our internal contact center. Two of our higher end ANC headset products incorporate a dual microphone housing design that optimizes the acoustic performance of the sound output with tenor and base attributes that are set, or pre-equalized, at the time of manufacture.

We have developed and manufactured a line of accessories for our Andrea Anti-Noise Products:

Andrea Personal Computer Telephone Interface (PCTI). The PCTI is a comprehensive desktop device that integrates computer applications controlled by speech and traditional telephony applications by connecting headset users to the telephone, to the computer, or to both simultaneously. Users can alternately or simultaneously conduct telephone conversations and use speech recognition to enter data or dictate into the PC, without having to pause or toggle between connectivity devices.

Andrea MC-100 Multimedia Audio Controller. The Andrea MC-100 Multimedia Audio Controller connects a PC headset or handset with a PC multimedia speaker system thereby allowing a user to conveniently switch between the headset/handset and the speaker system.

Our Collaborative Arrangements

An important element of our strategy is to promote widespread adoption of our products and technologies by collaborating with large enterprises and market and technology leaders in telecommunications, computer manufacturing, and software publishing. For example, we have arrangements and/or relationships with Analog Devices, Ericsson Inc. and Creative Labs. We are currently discussing additional arrangements with other companies, but we cannot assure that any of these discussions will result in any definitive agreements.

Clever Devices Procurement Agreement. In March 2001, we entered into a procurement agreement with Clever Devices to be the microphone supplier for its SpeakEasy II mass transit bus communication system. The integrated communication system utilizes Andrea Electronics' high performance digital microphone system to enable the clear voice communications in high noise, mass transit environments. Andrea Electronics' digital microphone array, which incorporates its DSDA and PureAudio algorithms, reduces mass transit noises such as tire, engine and wind noise, as well as interfering passenger voices. As part of the agreement, Andrea provided Clever Devices with a proprietary digital signal processor reference design and a patented microacoustic mechanical design to be integrated with the SpeakEasy II communication system. Clever Devices is not obligated to procure any minimum quantity of product from us under our procurement agreement. During 2006 and 2005 our sales to Clever Devices of this communication system and related products were \$174,253 and \$177,071, respectively.

Analog Devices License Agreements. In December 2001 and March 2002, we entered into two license agreements with Analog Devices to be their provider of noise canceling technologies for use with certain of their computer audio product offerings. These license agreements relate to Andrea Electronics' high performance noise canceling technologies that enable clear voice communications and high-performance audio in small home-office and regular office environments. In accordance with our agreements, Analog Devices paid us a total of \$5 million in license fees during calendar 2002. During 2006 and 2005, license revenue

Table of Contents

recognized under these license agreements were \$0 and \$713,284, respectively. Revenues related to the recognition of the deferred revenue as well as other service related revenues to Analog Devices were approximately 8% and 24% of the total net revenues for the year ended December 31, 2006 and 2005, respectively. There will be no further revenue recognized related to these licensing agreements.

In November 2004, we entered into a license agreement with Analog Devices to integrate our VoiceCenter technology with one of Analog's audio codec products for one of Analog Devices' customers (VoiceCenter Licensed Product). In consideration for this license Analog will pay Andrea a royalty for each VoiceCenter Licensed Product shipped. During the year ended December 31, 2005, we recognized \$7,468 of revenues under this agreement.

In November 2004, Andrea entered into a license agreement with Analog to integrate its EchoStop technology with certain Analog products for one of Analog's customers (EchoStop Licensed Products). As consideration of this license, Analog will pay Andrea a royalty for each EchoStop Licensed Product shipped. During the first year of the agreement, Analog will pay Andrea a minimum of \$100,000 in royalty payments, payable in payments of \$25,000 per quarter. During the three months ended June 30, 2006 Andrea received the final \$25,000 of the minimum royalty payment due under this agreement. Andrea will continue to receive royalty payments based on the number of EchoStop Licensed Products shipped until either party terminates the agreement per the terms of the agreement. During the years ended December 31, 2006 and 2005, Andrea has recognized \$34,017 and \$75,000, respectively of revenues under this agreement.

In January 2006, Andrea entered into a license agreement with Analog to integrate our DSDA and EchoStop technologies with certain of Analog products for specific Analog PC Original Equipment Manufacturer (OEM) customers (DSDA/EchoStop Licensed Product). In consideration of this license, Analog will pay Andrea a royalty for each DSDA/EchoStop Licensed Product shipped. During the years ended December 31, 2006 and 2005, Andrea has recognized \$100,000 and \$0, respectively of revenues under this agreement. When the royalties paid to Andrea from DSDA/EchoStop Licensed Products amount to \$500,000, no further payments will be required under this agreement.

Ericsson Inc. License Agreement. In December 2002, we entered into a license agreement with Marconi Communications to provide and integrate a number of our proprietary audio software technologies into the Marconi ViPr Virtual Presence System (ViPr). The ViPr conference system is a new network appliance developed by Marconi that enables secure, high resolution, real-time, multimedia communications between people in geographically dispersed locations. The addition of our hands-free audio system includes an advanced stereo version of Andrea's patented EchoStop, as well as its patented DSDA and PureAudio noise canceling algorithms, among others. The implementation of Andrea's microphone array, which is embedded in the monitor of the ViPr system allows users to carry on discussion at normal conversation levels, even in a noisy environment. In 2006, Ericsson Inc. purchased certain assets and liabilities of Marconi Communication Inc. In conjunction with this purchase, Andrea, Marconi Communications Inc. and Ericsson Inc. executed a Novation Agreement in which the 2002 license agreement is now between Ericsson and Andrea. During the year ended December 31, 2006 and 2005, we recorded \$30,800 and \$6,240, respectively, of licensing revenue related to this agreement.

Creative Technology Ltd. Production and Distribution Agreement. In October 2004 we entered into a Production and Distribution Agreement with Creative Technology Ltd. This agreement was modified in January 2005 to incorporate additional license rights. This agreement grants Creative a non-exclusive license to VoiceCenter as well as the right to purchase and resell certain of our other products. VoiceCenter will be distributed with Creative's Sound Blaster Live! ADVANCED MB, a simple online upgrade allowing PC users with motherboard audio produced by Dell to upgrade to Sound Blaster audio quality. The Sound Blaster Live! ADVANCED MB audio solution is available for PCs equipped with this configuration. The features of PureAudio and DSDA will be distributed in certain of Creative's other products to enable optimized far-field voice input. In consideration for this agreement Creative will pay Andrea a royalty for each VoiceCenter license shipped with their Soundblaster Live. During the years ended December 31, 2006 and 2005, we recorded \$582,569 and \$586 of licensing revenue related to this agreement, respectively.

Samsung Electronics Co., Ltd License Agreement. In October 2005, Andrea entered into a license agreement with Samsung Electronics Co., LTD (Samsung) to integrate our DSDA and EchoStop technologies with certain notebook/laptop PC products incorporating directional microphone and speaker phone functions for use in conjunction with PC software voice driven applications. During the years ended December 31, 2006 and 2005, Andrea has recognized \$29,844 and \$0, respectively of revenues under this agreement.

Patents, Trademarks, and Other Intellectual Property Rights

We rely on a combination of patents, patent applications, trade secrets, copyrights, trademarks, nondisclosure agreements, and contractual restrictions to protect our intellectual property and proprietary rights. We cannot assure, however, that these measures will protect our intellectual property or prevent misappropriation or circumvention of our intellectual property.

Table of Contents

Andrea maintains a number of patents in the United States covering claims to certain of its products and technology, which expire at various dates ranging from 2012 to 2020. We also have other patent applications currently pending; however, we cannot assure that patents will be issued with respect to these currently pending or future applications which we may file, nor can we assure that the strength or scope of our existing patents, or any new patents, will be of sufficient scope or strength or provide meaningful protection or commercial advantage to us.

Research and Development

We consider our technology to be of substantial importance to our competitiveness. To maintain this competitiveness, we have organized our research and development efforts using a market and applications approach for meeting the requirements of new and existing customers. Consistent with this approach, our engineering staff interacts closely with our sales and marketing personnel and directly with customers. The engineering staff is responsible for the research and development of new products and the improvement and support of existing products. For the years ended December 31, 2006 and 2005, total research and development expenses were \$571,288 and \$638,884, respectively. During 2007, we expect research and development expenses to remain at the same level when compared to 2006. We expect this will occur as a result of our overall plan to improve cash flows by containing our expenses. Additionally, most of Andrea's core technology is already developed, therefore, heightened emphasis will be placed on application engineering, sales and marketing activity and less emphasis on research and development. No assurance can be given that our research and development efforts will succeed. See Part II Item 6 Management's Discussion and Analysis or Plan of Operation.

Sales and Marketing

We employ a sales staff as well as outside sales representative organizations to market our Andrea DSP Microphone and Audio Software Products and our Andrea Anti-Noise Products. Andrea DSP Microphone and Audio Software Products and Andrea Anti-Noise Products are marketed to computer OEMs, distributors of personal computers and telecommunications equipment, software publishers, and end-users in both business and household environments. These products are sold to end-users through distributors and value-added resellers, software publishers, Internet Service Providers and Internet Content Developers. Under our existing collaborative agreements, our collaborators have various marketing and sales rights to our Andrea DSP Microphone and Audio Software and Andrea Anti-Noise Products. We are seeking to enter into additional collaborative arrangements for marketing and selling our Andrea DSP Microphone and Audio Software Products and Andrea Anti-Noise Products, but we cannot assure that we will be successful in these efforts. Market acceptance of the Andrea DSP Microphone and Audio Software Products and Andrea Anti-Noise Products is critical to our success.

Production Operations

In 2006 and 2005, all of our assembly operations were done with subcontractors in Asia or in the United States. Most of the components for the Andrea DSP Microphone and Audio Software Products and Andrea Anti-Noise Products are available from several sources and are not characteristically in short supply. However, certain specialized components, such as microphones and DSP boards, are available from a limited number of suppliers and subject to long lead times. To date we have been able to obtain sufficient supplies of these more specialized components, but we cannot assure that we will continue to be able to do so. Shortages of, or interruptions in, the supply of these more specialized components could have a material adverse effect on our sales of Andrea DSP Microphone and Audio Software Products and Andrea Anti-Noise Products.

Competition

The markets for our Andrea DSP Microphone and Audio Software Products and Andrea Anti-Noise Products are highly competitive. Competition in these markets is based on varying combinations of product features, quality and reliability of performance, price, sales, marketing and technical support, ease of use, compatibility with evolving industry standards and other systems and equipment, name recognition, and development of new products and enhancements. Most of our current and potential competitors in these markets have significantly greater financial, marketing, technical, and other resources than us. Consequently, these competitors may be able to respond more quickly to new or emerging technologies and changes in customer requirements, or to devote greater resources to the development, marketing, and sale of their products than we can. We cannot assure that one or more of these competitors will not independently develop technologies that are substantially equivalent or superior to our technology.

We believe that our ability to compete successfully will depend upon our ability to develop and maintain advanced technology, develop proprietary products, attract and retain qualified personnel, obtain patent or other proprietary protection for our products and technologies and manufacture, assemble and market products, either alone or through third parties, in a profitable manner.

Employees

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

At December 31, 2006, we had 16 employees, of whom 3 were engaged in production and related operations, 4 were engaged in research and development, and 9 were engaged in management, administration, sales and customer support duties. None of our

Table of Contents

employees are unionized or covered by a collective bargaining agreement. We believe that we generally enjoy good relations with our employees. In addition to our regular employees we utilize 6 independent consultants, 3 of whom are sales representatives and 3 who are engaged in research and development activities.

ITEM 2. DESCRIPTION OF PROPERTY

In March 2005, Andrea entered into an assignment of lease and assumption agreement with respect to its previous corporate headquarters in Melville, New York. Under this agreement, Andrea vacated the premises on March 26, 2005 and the assignee took over the current lease, as amended. Additionally, in March 2005 Andrea entered into a new lease for its new corporate headquarters, which is located in Bohemia, New York. The lease is for approximately 11,000 square feet of leased space, which houses our production operations, research and development activities, sales, administration and executive offices. We believe that we maintain our machinery, equipment and tooling in good operating condition and that these assets are adequate for our current business and are adequately insured. See Notes 5 and 12 to our Consolidated Financial Statements for further information concerning our property and equipment and leased facilities.

ITEM 3. LEGAL PROCEEDINGS

Additionally, Andrea is involved in routine litigation incidental through the normal course of business. While it is not feasible to predict or determine the final outcome of the claims, Andrea believes the resolution of these matters will not have a material adverse effect on Andrea's financial position, results of operations or liquidity.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

On November 16, 2006, at the Annual Meeting of Shareholders of the Company, the shareholders elected as directors of the Company for terms of one year, the following individuals Douglas J. Andrea (51,678,506 shares for, 910,946 shares withheld); Gary A. Jones (51,674,129 shares for, 915,323 shares withheld); Louis Libin (51,693,506 shares for, 895,946 shares withheld); Joseph J. Migliozi (51,858,466 shares for, 730,986 shares withheld); Jonathan D. Spaet (51,696,056 shares for, 893,396 shares withheld). The shareholders approved the Andrea Electronics Corporation 2006 Equity Compensation Plan (11,655,705 shares for, 2,290,926 shares against, 292,136 shares abstained and 38,350,685 broker non votes). In addition, the shareholders ratified the selection of Marcum & Kliegman LLP as the Company's independent accountants for the year ended December 31, 2006 (51,851,779 shares for, 543,266 shares against, and 194,407 shares abstained).

PART II**ITEM 5. MARKET FOR COMMON EQUITY AND RELATED STOCKHOLDER MATTERS**

The table below sets forth the high and low sales prices for Andrea's Common Stock as reported by the Over the Counter Bulletin for the eight fiscal quarters ended December 31, 2006. On March 26, 2007, there were approximately 470 holders of record of Andrea's Common Stock.

Quarter Ended	High	Low
March 31, 2005	\$ 0.07	\$ 0.06
June 30, 2005	\$ 0.06	\$ 0.04
September 30, 2005	\$ 0.06	\$ 0.04
December 31, 2005	\$ 0.06	\$ 0.03
March 31, 2006	\$ 0.09	\$ 0.03
June 30, 2006	\$ 0.17	\$ 0.06
September 30, 2006	\$ 0.13	\$ 0.06
December 31, 2006	\$ 0.16	\$ 0.09

No cash dividends were paid on Andrea's Common Stock in 2006 or 2005.

During the three months ended December 31, 2006, the Company did not repurchase any of its common stock.

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

Overview

Our mission is to provide the emerging voice interface markets with state-of-the-art communications products that facilitate natural language, human/machine interfaces.

Table of Contents

Examples of the applications and interfaces for which Andrea DSP Microphone and Audio Software Products and Andrea Anti-Noise Products provide benefit include: Internet and other computer-based speech; telephony communications; multi-point conferencing; speech recognition; multimedia; multi-player Internet and CD ROM interactive games; and other applications and interfaces that incorporate natural language processing. We believe that end users of these applications and interfaces will require high quality microphone and earphone products that enhance voice transmission, particularly in noisy environments, for use with personal computers, mobile personal computing devices, cellular and other wireless communication devices and automotive communication systems. Our Andrea DSP Microphone and Audio Software Products use far-field digital signal processing technology to provide high quality transmission of voice where the user is at a distance from the microphone. High quality audio communication technologies will be required for emerging far-field voice applications, ranging from continuous speech dictation, to Internet telephony and multiparty video teleconferencing and collaboration, to natural language-driven interfaces for automobiles, home and office automation and other machines and devices into which voice-controlled microprocessors are expected to be introduced during the next several years.

We outsource to Asia high volume assembly for most of our products from purchased components. We assemble some low volume Andrea DSP Microphone and Audio Software Products from purchased components. As sales of any particular Andrea DSP Microphone and Audio Software Product increases, assembly operations are transferred to a subcontractor in Asia.

Our Critical Accounting Policies

Our consolidated financial statements and the notes to our consolidated financial statements contain information that is pertinent to management's discussion and analysis. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. On a continual basis, management reviews its estimates utilizing currently available information, changes in facts and circumstances, historical experience and reasonable assumptions. After such reviews, and if deemed appropriate, those estimates are adjusted accordingly. Actual results may vary from these estimates and assumptions under different and/or future circumstances. Management considers an accounting estimate to be critical if: 1) it requires assumptions to be made that were uncertain at the time the estimate was made; and 2) changes in the estimate, or the use of different estimating methods that could have been selected, could have a material impact on the Company's consolidated results of operations or financial condition.

The following critical accounting policies have been identified that affect the more significant judgments and estimates used in the preparation of the consolidated financial statements. In addition to the recording and presentation of our convertible preferred stock, we believe that the following are some of the more critical judgment areas in the application of our accounting policies that affect our financial condition and results of operations. We have discussed the application of these critical accounting policies with our Audit Committee. The following critical accounting policies are not intended to be a comprehensive list of all the Company's accounting policies or estimates.

Revenue Recognition Non software-related revenue, which is generally comprised of microphones and microphone connectivity product revenues, is recognized when title and risk of loss pass to the customer, which is generally upon shipment. With respect to licensing revenues, Andrea recognizes revenue in accordance with Statement of Position (SOP) 97-2, Software Revenue Recognition, as amended, and Staff Accounting Bulletin Topic 13 Revenue Recognition. License revenue is recognized based on the terms and conditions of individual contracts (for example, see Note 9 of our consolidated financial statements). In addition, fee based services, which are short-term in nature, are generally performed on a time-and-material basis under separate service arrangements and the corresponding revenue is generally recognized as the services are performed.

Accounts Receivable We are required to estimate the collectibility of our trade receivables. Judgment is required in assessing the realization of these receivables, including the current creditworthiness of each customer and related aging of the past due balances. We evaluate specific accounts when we become aware of a situation where a customer may not be able to meet its financial obligations due to a deterioration of its financial viability, credit ratings or bankruptcy. The reserve requirements are based on the best facts available to us and are reevaluated and adjusted as additional information is received. Our reserves are also determined by using percentages applied to certain aged receivable categories. At December 31, 2006 and 2005, our allowance for doubtful accounts were \$16,704 and \$18,856 respectively.

Inventory We are required to state our inventories at the lower of cost or market. In assessing the ultimate realization of inventories, we are required to make considerable judgments as to future demand requirements and compare that with our current inventory levels. Our reserve requirements generally increase as our projected demand requirements decrease due to market conditions, technological and product life cycle changes as well as longer than previously expected usage periods. We have evaluated the current levels of

Table of Contents

inventories, considering historical net revenues and other factors and, based on this evaluation, recorded adjustments to cost of revenues to adjust inventories to net realizable value. Inventories of \$1,088,778 and \$679,002 at December 31, 2006 and 2005 are net of reserves of \$591,980 and \$673,817, respectively. It is possible that additional charges to inventory may occur in the future if there are further declines in market conditions, or if additional restructuring actions are taken.

Long Lived Assets Statement of Financial Accounting Standards (SFAS), No. 144 Accounting for the Impairment or Disposal of Long-Lived Assets (FAS 144) requires management judgments regarding the future operating and disposition plans for marginally performing assets, and estimates of expected realizable values for assets to be sold. Andrea accounts for its long-lived assets in accordance with FAS 144 for purposes of determining and measuring impairment of its other intangible assets. Andrea's policy is to periodically review the value assigned to its long lived assets to determine if they have been permanently impaired by adverse conditions which may affect Andrea. If required, an impairment charge would be recorded based on an estimate of future discounted cash flows. In order to test for recoverability, Andrea compared the sum of an undiscounted cash flow projections (gross margin dollars from product sales) of the Andrea DSP Microphone and Audio Software core technology to the carrying value of that technology. Considerable management judgment is necessary to estimate undiscounted future operating cash flows and fair values and, accordingly, actual results could vary significantly from such estimates. No impairment charges were recognized during the years ended December 31, 2006 and 2005, respectively.

Deferred Tax Assets We currently have significant deferred tax assets. SFAS No. 109, Accounting for Income Taxes (FAS 109), requires a valuation allowance be established when it is more likely than not that all or a portion of deferred tax assets will not be realized. Furthermore, FAS 109 provides that it is difficult to conclude that a valuation allowance is not needed when there is negative evidence such as cumulative losses in recent years. Therefore, cumulative losses weigh heavily in the overall assessment. Accordingly, and after considering changes in previously existing positive evidence, we recorded a full valuation allowance. In addition, we expect to provide a full valuation allowance on future tax benefits until we can sustain a level of profitability that demonstrates our ability to utilize the assets, or other significant positive evidence arises that suggests our ability to utilize such assets. The future realization of a portion of our reserved deferred tax assets related to tax benefits associated with the exercise of stock options, if and when realized, will not result in a tax benefit in the consolidated statement of operations, but rather will result in an increase in additional paid in capital. We will continue to re-assess our reserves on deferred income tax assets in future periods on a quarterly basis.

Contingencies - We are subject to proceedings, lawsuits and other claims, including proceedings under laws and government regulations related to securities, environmental, labor, product and other matters. We are required to assess the likelihood of any adverse judgments or outcomes to these matters, as well as potential ranges of probable losses. A determination of the amount of reserves required, if any, for these contingencies is based on an analysis of each individual issue with the assistance of legal counsel. The amount of any reserves may change in the future due to new developments in each matter.

The impact of changes in the estimates and judgments pertaining to revenue recognition, receivables and inventories is directly reflected in our segments' loss from operations. Although any charges related to our deferred tax provision are not reflected in our segment results, the long-term forecasts supporting the realization of those assets and changes in them are significantly affected by the actual and expected results of each segment.

Cautionary Statement Regarding Forward-Looking Statements

Certain information contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended December 31, 2006 and other items set forth in this Report on Form 10-KSB are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The words anticipates, believes, estimates, expects, intends, plans, seeks, variations of such words, and similar expressions are intended to identify forward-looking statements. We have based these forward-looking statements on our current expectations, estimates and projections about our business and industry, our beliefs and certain assumptions made by our management. Investors are cautioned that matters subject to forward-looking statements involve risks and uncertainties including economic, competitive, governmental, technological and other factors that may affect our business and prospects. These statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict. In order to obtain the benefits of these safe harbor provisions for any such forward-looking statements, we wish to caution investors and prospective investors about the following significant factors, which, among others, have in some cases affected our actual results and are in the future likely to affect our actual results and could cause them to differ materially from those expressed in any such forward-looking statements. These factors include:

Risk Factors

Our operating results are subject to significant fluctuation; period-to-period comparisons of our operating results may not necessarily be meaningful and you should not rely on them as indications of our future performance.

Table of Contents

Our results of operations have historically been and are subject to continued substantial annual and quarterly fluctuations. The causes of these fluctuations include, among other things:

the volume of sales of our products under our collaborative marketing arrangements;

the cost of development of our products;

the mix of products we sell;

the mix of distribution channels we use;

the timing of our new product releases and those of our competitors;

fluctuations in the computer and communications hardware and software marketplace;

general economic conditions.

We cannot assure that the level of revenues and gross profit, if any, that we achieve in any particular fiscal period will not be significantly lower than in other fiscal periods. Our net revenues for the year ended December 31, 2006 were approximately \$5.7 million versus \$4.3 million in the year ended December 31, 2005. Net income for the year ended December 31, 2006 was approximately \$19,000, or \$0.00 per share on a basic and diluted basis, versus net loss of approximately \$628,000, or \$0.01 per share on a basic and diluted basis for the year ended December 31, 2005. We continue to explore opportunities to grow sales in other business areas, we are also examining additional opportunities for cost reduction, production efficiencies and further diversification of our business. In the first quarter of 2005 we made tremendous strides in cutting our expenses. By assigning our lease in Melville, New York, entering into our new lease in Bohemia, New York, closing our facility in Israel, moving our facility in Utah and other related operational expense reductions, effective April 2005, we reduced our annual cash expenses by approximately \$1.1 million. Although we are improving cash flows by reducing overall expenses, if our revenues decline we may not generate positive cash flows and our net income or loss may be affected. Furthermore, our acquisition in 1998 of Lamar Signal Processing, Ltd. (Lamar) resulted in a substantial amount of goodwill (written off in entirety) and other intangible assets. The amortization of these intangible assets has had, and will continue to have, a negative, non-cash impact on our results of operations. As a result of all of the above factors, we might continue to accumulate losses and the market price of our common stock could decline and/or continue to fluctuate.

If we fail to maintain access to funds sufficient to meet our operating needs, we may be required to significantly reduce, sell, or refocus our operations and our business, results of operations and financial condition could be materially and adversely effected.

In order to be a viable entity we need to maintain and increase profitable operations. To continue to achieve profitable operations we need to maintain/increase current net revenues and continue to look for ways to control expenses. We might also need to sell additional assets or raise capital as a means of funding continued operations. In recent years, we have sustained significant operating losses. Since 1997, we have been unable to generate sufficient cash flow from operations to meet our operating needs and, correspondingly, from time to time during the past several years, we have raised additional capital from external sources. We may have to continue to raise additional capital from external sources. These sources may include private or public financings through the issuance of debt, convertible debt or equity, or collaborative arrangements. Such additional capital and funding may not be available on favorable terms, if at all. Additionally, we may only be able to obtain additional capital or funds through arrangements that require us to relinquish rights to our products, technologies or potential markets, in whole or in part, or result in our sale. In 2005 we significantly cut our expenses. By assigning our lease in Melville, New York, and entering into our new lease in Bohemia, New York, closing our facility in Israel, moving our facility in Utah and other related operational expense reductions, effective April 2005, we reduced our annual cash expenses by approximately \$1.1 million. As a result of the decrease in expenses and our increases in revenues, we believe that we now have sufficient liquidity to continue our operations at least through December 2007, provided our net revenues do not decline and our operating expenses do not increase. Although we have revised our business strategies to reduce our expenses and capital expenditures, we cannot assure you that we will be successful in generating positive cash flows or obtaining access to additional sources of

funding in amounts necessary to continue our operations. Failure to maintain sufficient access to funding may also result in our inability to continue operations.

Shares Eligible For Future Sale May Have An Adverse Effect On Market Price; Andrea Stockholders May Experience Substantial Dilution.

Sales of a substantial number of shares of our common stock in the public market could have the effect of depressing the prevailing market price of our common stock. Of the 200,000,000 shares of common stock presently authorized, 59,121,857 were outstanding as

Table of Contents

of March 26, 2007. The number of shares outstanding does not include an aggregate of 30,307,013 shares of common stock that are issuable. This number of issuable common shares is equal to 51% of the 59,121,857 outstanding shares. These issuable common shares are comprised of: a) 7,590,001 shares of our common stock reserved for issuance upon exercise of outstanding awards granted under our 1991 Performance Equity Plan, 1998 Stock Plan and 2006 Stock Plan; b) 9,984 shares reserved for future grants under our 1998 Stock Plan; c) 8,070,000 shares reserved for future grants under our 2006 Stock Plan; d) 4,607,252 shares of common stock that are issuable upon conversion of the Series C Preferred Stock; e) 4,871,432 shares of common stock issuable upon conversion of the Series D Preferred Stock; and f) 5,158,344 of common stock issuable upon exercise of warrants relating to the Series D Preferred stock.

Conversions of our Series C Preferred Stock, Series D Preferred Stock and related warrants may result in substantial dilution to other holders of our common stock.

As of March 26, 2007, we had 100,701,477 shares of Series C Preferred Stock, 1,217,858 shares of Series D Preferred Stock and 5,158,344 Common Stock warrants outstanding. The issuance of shares of common stock upon conversion of the Series C Preferred Stock is limited to that amount which, after given effect to the conversion, would cause the holder not to beneficially own in excess of 4.99% or, together with other shares beneficially owned during the 60 day period prior to such conversion, not to beneficially own in excess of 9.99% of the outstanding shares of common stock. The issuance of common stock upon conversion of the Series D Preferred Stock and the related warrants also are limited to that amount which, after given effect to the conversion, would cause the holder not to beneficially own an excess of 4.99% of then outstanding shares of our common stock, except that each holder has a right to terminate such limitation upon 61 days notice to us. Beneficial ownership for purposes of calculation of such percentage limitations does not include shares whose acquisition is subject to similar limitations. If all shares of the Series C and Series D Preferred Stock and warrants, which are outstanding to be issued, are assumed to be converted into or exercised for shares of common stock, the number of new shares of common stock required to be issued as a result would aggregate 14,637,028 shares, which would represent 25% of the then outstanding shares of common stock.

Short sales of our common stock may be attracted by or accompany conversions of Series C Preferred Stock and Series D Preferred Stock, which sales may cause downward pressure upon the price of our common stock.

Short sales of our common stock may be attracted by or accompany the sale of converted common stock, which in the aggregate could cause downward pressure upon the price of the common stock, regardless of our operating results, thereby attracting additional short sales of the common stock.

If we fail to commercialize and fully market our Andrea DSP Microphone and Audio Software products, or continue to develop, and not fully market, Andrea Anti-Noise Headset products, our net revenues may not increase at a high enough rate to improve our results of operations or may not increase at all.

Our business, results of operations and financial condition depend on the successful commercialization of our Andrea DSP Microphone and Audio Software products and technologies. We introduced our first Andrea DSP Microphone products in 1998 and we continued to introduce complementary products and technologies over the last several years. We are primarily targeting these products at the desktop computer market, the audio and video conferencing markets and the market for in-vehicle computing, among others. The success of these products is subject to the risks frequently encountered by companies in an early stage of product commercialization, particularly companies in the computing and communications industries.

If we are unable to obtain market acceptance of Andrea DSP Microphone and Audio Software products and technologies or if market acceptance of these products and technologies occurs at a slow rate, then our business, results of operations and financial condition will be materially and adversely affected.

We, and our competitors, are focused on developing and commercializing products and technologies that enhance the use of voice, particularly in noisy environments, for a broad range of computer and communications applications. These products and technologies have been rapidly evolving and the number of our competitors has grown, but the markets for these products and technologies are subject to a high level of uncertainty and have been developing slowly. We, alone or together with our industry, may be unsuccessful in obtaining market acceptance of these products and technologies.

If we fail to develop and successfully introduce new products and technologies in response to competition and evolving technology, we may not be able to attract new customers or retain current customers.

The markets in which we sell our Andrea DSP Microphone and Audio Software and Andrea Anti-Noise Headset products are highly competitive. We may not compete successfully with any of our competitors. Most of our current and potential competitors have significantly

greater financial, technology development, marketing, technical support and other resources than we do. Consequently, these competitors may be able to respond more quickly to new or emerging technologies and changes in customer requirements, or

Table of Contents

devote greater resources to the development, marketing, and sale of their products than we can. One or more of these competitors may independently develop technologies that are substantially equivalent or superior to our technology. The introduction of products incorporating new technologies could render our products obsolete and unmarketable and could exert price pressures on existing products.

We are currently engaged in the development of digital signal processing products and technologies for the voice, speech and natural language interface markets. We may not succeed in developing these new digital signal processing products and technologies, and any of these new digital signal processing products or technologies may not gain market acceptance.

Further, the markets for our products and technologies are characterized by evolving industry and government standards and specifications that may require us to devote substantial time and expense to adapt our products and technologies. For example, certain of our Andrea DSP Microphone and Audio Software and Andrea Anti-Noise Headset products are subject to the Federal Communications Commission requirements. We may not successfully anticipate and adapt our products and technologies in a cost effective and timely manner to changes in technology and industry standards or to introductions of new products and technologies by others that render our then existing products and technologies obsolete.

If our marketing collaborators do not effectively market those of their products with which our products are included or incorporated, our sales growth will be adversely affected.

We have entered into collaborative and distribution arrangements with software publishers and computer hardware manufacturers relating to the marketing and sale of Andrea DSP Microphone and Audio Software products through inclusion or incorporation with the products of our collaborators. Our success will therefore be dependent to a substantial degree on the efforts of these collaborators to market their products with which our products are included or incorporated. Our collaborators may not successfully market these products. In addition, our collaborators generally are not contractually obligated to any minimum level of sales of our products or technologies, and we have no control over their marketing efforts. Furthermore, our collaborators may develop their own microphone, earphone or headset products that may replace our products or technologies or to which they may give higher priority.

Shortages of, or interruptions in, the supply of more specialized components for our products could have a material adverse effect on our sales of these products.

The majority of our assembly operations are fulfilled by subcontractors (primarily in the Far East) using purchased components. Some specialized components for the Andrea DSP Microphone and Audio Software products and Andrea Anti-Noise products, such as microphones and digital signal processing boards, are available from a limited number of suppliers (in some cases foreign) and subject to long lead times. We may not be able to continue to obtain sufficient supplies of these more specialized components, particularly if the sales of our products increase substantially or market demand for these components otherwise increases. If our subcontractors fail to meet our production and shipment schedules, our business, results of operations and financial condition would be materially and adversely affected.

Our ability to compete may be limited by our failure to adequately protect our intellectual property or by patents granted to third parties.

We rely on a combination of patents, patent applications, trade secrets, copyrights, trademarks, and nondisclosure agreements with our employees, independent contractors, licensees and potential licensees, limited access to and dissemination of our proprietary information, and other measures to protect our intellectual property and proprietary rights. However, the steps that we have taken to protect our intellectual property may not prevent its misappropriation or circumvention. In addition, numerous patents have been granted to other parties in the fields of noise cancellation, noise reduction, computer voice recognition, digital signal processing and related subject matter. We expect that products in these fields will increasingly be subject to claims under these patents as the numbers of products and competitors in these fields grow and the functionality of products overlap. Claims of this type could have an adverse effect on our ability to manufacture and market our products or to develop new products and technologies, because the parties holding these patents may refuse to grant licenses or only grant licenses with onerous royalty requirements. Moreover, the laws of other countries do not protect our proprietary rights to our technologies to the same extent as the laws of the United States.

An unfavorable ruling in any current litigation proceeding or future proceeding may adversely affect our business, results of operations and financial condition.

From time to time we are subject to litigation incidental to our business. For example, we are subject to the risk of adverse claims, interference proceedings before the U.S. Patent and Trademark Office, oppositions to patent applications outside the United States, and litigation alleging infringement of the proprietary rights of others. Litigation to establish the validity of patents, to assert infringement claims against others, and to

defend against patent infringement claims can be expensive and time-consuming, even if the outcome is in our favor.

Table of Contents

Changes in economic and political conditions outside the United States could adversely affect our business, results of operations and financial condition.

We generate revenues to regions outside the United States, particularly in Europe and areas in the Americas and Asia. For the years ended December 31, 2006 and 2005, net revenues to customers outside the United States accounted for approximately 49% and 8%, respectively, of our net sales. International sales and operations are subject to a number of risks, including:

trade restrictions in the form of license requirements;

restrictions on exports and imports and other government controls;

changes in tariffs and taxes;

difficulties in staffing and managing international operations;

problems in establishing and managing distributor relationships;

general economic conditions; and

political and economic instability or conflict.

To date, we have invoiced our international sales in U.S. dollars, and have not engaged in any foreign exchange or hedging transactions. We may not be able to continue to invoice all of our sales in U.S. dollars in order to avoid engaging in foreign exchange or hedging transactions. If we are required to invoice any material amount of international sales in non-U.S. currencies, fluctuations in the value of non-U.S. currencies relative to the U.S. dollar may adversely affect our business, results of operations and financial condition or require us to incur hedging costs to counter such fluctuations.

If we are unable to attract and retain the necessary managerial, technical and other personnel necessary for our business, then our business, results of operations and financial condition will be harmed.

Our performance is substantially dependent on the performance of our executive officers and key employees. The loss of the services of any of these executive officers or key employees could have a material adverse effect on our business, results of operations and financial condition. Our future success depends on our continuing ability to attract and retain highly qualified managers and technical personnel. Competition for qualified personnel is intense and we may not be able to attract, assimilate or retain qualified personnel in the future.

Compliance with the Sarbanes-Oxley Act of 2002 will require substantial financial and management resources and may result in additional expenses, which as a smaller public company may be disproportionately high.

Section 404 of the Sarbanes-Oxley Act of 2002 requires that we evaluate and report on our system of internal controls as of December 31, 2007 and requires that we have such system of internal controls audited beginning with our Annual Report on 10-KSB for the year ending December 31, 2008. If we fail to maintain the adequacy of our internal controls, we could be subject to regulatory scrutiny, civil or criminal penalties and/or stockholder litigation. Any inability to provide reliable financial reports could harm our business. Section 404 of the Sarbanes-Oxley Act of 2002 also requires that our independent registered public accounting firm report on management's evaluation of our system of internal controls. The development of the internal controls of any such entity to achieve compliance with the Sarbanes-Oxley Act may increase the time and costs necessary to complete any such acquisition. Furthermore, any failure to implement required new or improved controls, or difficulties encountered in the implementation of adequate controls over our financial processes and reporting in the future, could harm our operating results or cause us to fail to meet our reporting obligations. Inferior internal controls could also cause investors to lose

confidence in our reported financial information, which could have a negative effect on the trading price of our stock.

Results Of Operations

Year Ended December 31, 2006 Compared to Year Ended December 31, 2005

Revenues

Net revenues for the year ended December 31, 2006, were \$5,735,290, an increase of 33% from net revenues of \$4,307,985 for the year ended December 31, 2005. This increase in net revenues reflects a less than 1% decrease in net revenues of Andrea Anti-Noise Products to \$2,591,055, or 45% of total net revenues, and a 84% increase in net revenues of Andrea DSP Microphone and Audio Software Products, to \$3,144,235, or 55% of total net revenues. \$1,442,112 of the increase in net revenues for the year ended December 31, 2006 of Andrea DSP Microphone and Audio Software Products are due to low margin product shipments to one of our OEM customers. \$582,569 of the increases in net revenues for the year ending December 31, 2006 of Andrea DSP Microphone and Audio Software Products relate to revenue recognized related to our license agreements with Creative. These increases in net

Table of Contents

revenues of Andrea DSP Microphone and Audio Software Products offset in part by the decrease in amortization of licensing revenue recognized related to our agreements with Analog. Licensing revenue recognized related to our December 2001 and March 2002 agreements with Analog was \$713,284 for the year ending December 31, 2005.

Cost of Revenues

Cost of revenues as a percentage of net revenues for the year ended December 31, 2006 increased to 54% from 46% for the year ended December 31, 2005. The cost of revenues as a percentage of net revenues for the year ended December 31, 2006 for Andrea Anti-Noise Products is 60% compared to 56% for the year ended December 31, 2005. The cost of revenues as a percentage of net revenues for the year ended December 31, 2006 for Andrea DSP Microphone and Audio Software Products is 49% compared to 32% for the year ended December 31, 2005. These increases primarily reflect the impact of the changes in the composition of our net revenues as described under Revenues above.

Research and Development

Research and development expenses for the year ended December 31, 2006 decreased 11% to \$571,288 from \$638,884 for the year ended December 31, 2005. These decreases are primarily due to the closure of our Israel facility and the reversal of non-cash deferred rent charges relating to our assignment of lease and assumption agreement. For the year ended December 31, 2006, the decrease in research and development expenses reflects a 7% decrease in our Andrea DSP Microphone and Audio Software Technology efforts to \$447,669, or 78% of total research and development expenses and a 22% decrease in our Andrea Anti-Noise Headset Product efforts to \$123,619, or 22% of total research and development expenses. With respect to DSP Microphone and Audio Software technologies, research efforts are primarily focused on the pursuit of commercializing a natural language-driven human/machine interface by developing optimal far-field microphone solutions for various voice-driven interfaces, incorporating Andrea's digital super directional array microphone technology, and certain other related technologies such as noise suppression and stereo acoustic echo cancellation. We believe that continued research and development spending should provide Andrea with a competitive advantage.

General, Administrative and Selling Expenses

General, administrative and selling expenses decreased approximately 13% to \$1,963,977 for the year ended December 31, 2006 from \$2,253,208 for the year ended December 31, 2005. This decrease is primarily related to the decrease in operation costs as a result of our new lease partially offset by the increase in costs relating to expensing stock options. For the year ended December 31, 2006, the decrease reflects a 9% decrease in our Andrea DSP Microphone and Audio Software Technology efforts to \$1,217,205, or 62% of total general, administrative and selling expenses and a 19% decrease in our Andrea Anti-Noise Headset Product efforts to \$746,772, or 38% of total general, administrative and selling expenses.

Other Expense

Other expense, net for the year ended December 31, 2006 was \$2,899 compared to \$50,620 for the year ended December 31, 2005. The year to date decrease in other expense is the result of the loss in disposal of property and equipment in the 2005 First Quarter.

Provision for Income Taxes

The provision for income taxes in the year ending December 31, 2006 is a result of certain licensing revenues that are subject to withholding of income tax as mandated by the foreign jurisdiction in which the revenues are earned (as defined in Note 9 to our consolidated financial statements). There is no provision for income taxes for the year ending December 31, 2005, as we did not have revenue subject to these withholding taxes in 2005. For all other income taxes, we provide a full valuation allowance on future tax benefits until we can sustain a level of profitability that demonstrates our ability to utilize the assets, or other significant positive evidence arises that suggests our ability to utilize such assets. The future realization of a portion of our reserved deferred tax assets related to tax benefits associated with the exercise of stock options, if and when realized, will not result in a tax benefit in the consolidated statement of operations, but rather will result in an increase in additional paid-in capital. We will continue to re-assess our reserves on deferred income tax assets in future periods on a quarterly basis.

Net Income (loss)

Net income for the year ended December 31, 2006 was \$18,666 compared to a net loss of \$627,508 for the year ended December 31, 2005. The net income for the year ended December 31, 2006 principally reflects the factors described above.

Off-Balance Sheet Arrangements

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

The Company has no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on its financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Table of Contents

Liquidity And Capital Resources

Andrea's principal sources of funds have historically been gross cash flows from operations and proceeds from the sale of convertible notes, preferred stock or other securities to certain financial institutions, investors and potential industry partners and are expected to be gross cash flows from operations going forward. At December 31, 2006, we had cash and cash equivalents of \$303,678 compared with \$418,597 at December 31, 2005. The balance of cash and cash equivalents at December 31, 2006 is primarily a result of our cash provided from operations, partially offset by gross cash outflows from operations during the year ended December 31, 2006.

Working capital balance at December 31, 2006 was \$1,562,083 compared to a working capital of \$992,636 at December 31, 2005. The increase in working capital reflects an increase in total current assets of \$677,293 and an increase in total current liabilities of \$107,846. The increase in total current assets reflects a decrease in cash and cash equivalents of \$114,919, an increase in accounts receivable of \$233,636, an increase in inventory of \$409,776, and an increase in prepaid expenses of \$148,800. The increase in total current liabilities reflects an increase in trade accounts payable of \$159,015, a decrease in the current portion of capital lease of \$7,123, and a decrease of \$35,690 in other current liabilities.

The decrease in cash and cash equivalents of \$114,919 reflects \$58,092 of net cash used in operating activities, \$44,366 of net cash used by investing activities and \$12,461 of net cash used by financing activities.

The cash used in operating activities of \$58,092, excluding non-cash charges, is primarily attributable to the \$18,666 net income for the year ended December 31, 2006, a \$231,484 increase in accounts receivable, a \$327,939 increase in inventory, a \$148,800 increase in prepaid expenses and other current assets, a \$159,015 increase in accounts payable, and a decrease of \$44,046 in other current liabilities. The changes in inventory, accounts payable and other current and long term liabilities primarily reflect differences in the timing related to both the payments for and the acquisition of inventory as well as for other services in connection with ongoing efforts related to Andrea's various product lines. Additionally, we secured better pricing on certain inventory items by purchasing in bulk.

The cash used by investing activities of \$44,366 reflects an increase in property and equipment of \$21,598 and an increase in patents and trademarks of \$22,768. The increase in property and equipment reflects capital expenditure associated with molds for our Andrea Anti Noise Headset business line and computer related. The increase in patents and trademarks reflects capital expenditures associated with our intellectual property.

The net cash used by financing activities of \$12,461 reflects payments of our capital leases associated with communication related equipment.

We plan to continue to improve our cash flows during 2007 by aggressively pursuing 1) existing sales opportunities in our Andrea Anti-Noise Headset Products market, 2) existing and prospective opportunities to sell our Superbeam Array Microphone generated through our co-marketing efforts with Analog Devices in the personal computing market, 3) opportunities in the video and audio conferencing market and 4) the automotive (in-vehicle computing) market. However, there can be no assurance that we will be able to successfully execute the aforementioned plans. As of March 26, 2007, Andrea has approximately \$500,000 (unaudited) of cash and cash equivalents. During 2006, we utilized approximately \$115,000 in cash. We believe that we have sufficient liquidity available to continue in operation through at least December 2007. To the extent that we do not generate sufficient cash flows from our operations in 2007, additional financing might be required. Although we are improving cash flows by reducing overall expenses, if our revenues decline, these reductions may impede our ability to be cash flow positive and our net income or loss may be disproportionately affected. We have no commitment for additional financing and may experience difficulty in obtaining additional financing on favorable terms, if at all. Any financing we obtain may contain covenants that restrict our freedom to operate our business or may have rights, preferences or privileges senior to our common stock and may dilute our current shareholders' ownership interest in Andrea. We cannot assure that demand will continue for any of our products, including future products related to our Andrea DSP Microphone and Audio Software technologies, or, that if such demand does exist, that we will be able to obtain the necessary working capital to increase production and provide marketing resources to meet such demand on favorable terms, or at all.

Inflation

Inflation should not have a significant impact on our operating results.

Recently Issued Accounting Pronouncements

In June 2006, the FASB issued Interpretation No. 48 "Accounting for Uncertainty in Income Taxes" an Interpretation of FASB Statement No. 109 (the "Interpretation"). The Interpretation establishes for all entities a minimum threshold for financial statement recognition of the benefit of tax positions, and requires certain expanded disclosures. The Interpretation is effective for fiscal years beginning after December 31, 2006, and is to be applied to all open tax years as of the date of effectiveness. We are in the process of evaluating the impact of the application of the

Interpretation on our consolidated financial statements and we are currently not in a position to determine such effects.

Table of Contents

In September 2006, the FASB issued SFAS No. 157 Fair Value Measurements , which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. Adoption is required for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption of SFAS No. 157 is encouraged. We are currently evaluating the expected effect of SFAS No. 157 on our consolidated financial statements and are currently not yet in a position to determine such effects.

In September 2006, the Staff of the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108 (SAB 108) which provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. SAB 108 is effective for fiscal years ending on or after November 15, 2006. The adoption of SAB 108 did not have a material impact on our consolidated financial position, results of operations or cash flows.

In December 2006, the FASB issued FASB Staff Position (FSP) EITF 00-19-2 Accounting for Registration Payment Arrangements (FSP EITF 00-19-2) which specifies that the contingent obligation to make future payments or otherwise transfer consideration under a registration payment arrangement should be separately recognized and measured in accordance with SFAS No. 5, Accounting for Contingencies. Adoption of FSP EITF 00-19-02 is required for fiscal years beginning after December 15, 2006. We are currently evaluating the expected effect of FSP EITF 00-19-02 on our consolidated financial statements and are currently not yet in a position to determine such effects.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115. This Statement permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The fair value option established by this Statement permits all entities to choose to measure eligible items at fair value at specified election dates. A business entity shall report unrealized gains and losses on items for which the fair value option has been elected in earnings (or another performance indicator if the business entity does not report earnings) at each subsequent reporting date. A not-for-profit organization shall report unrealized gains and losses in its statement of activities or similar statement. This Statement applies to all entities, including not-for-profit organizations. Most of the provisions of this Statement apply only to entities that elect the fair value option. However, the amendment to FASB Statement No. 115, Accounting for Certain Investments in Debt and Equity Securities, applies to all entities with available-for-sale and trading securities. Some requirements apply differently to entities that do not report net income. This Statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company does not expect the adoption of SFAS No. 159 to have a material impact on its consolidated financial statements.

In November 2006, the EITF reached a final consensus in EITF Issue 06-6 Debtor's Accounting for a Modification (or Exchange) of Convertible Debt Instruments (EITF 06-6). EITF 06-6 addresses the modification of a convertible debt instrument that changes the fair value of an embedded conversion option and the subsequent recognition of interest expense for the associated debt instrument when the modification does not result in a debt extinguishment pursuant to EITF 96-19, Debtor's Accounting for a Modification or Exchange of Debt Instruments, . The consensus should be applied to modifications or exchanges of debt instruments occurring in interim or annual periods beginning after November 29, 2006. We do not expect the adoption of EITF 06-6 to have a material impact on our consolidated financial position, results of operations or cash flows.

In November 2006, the FASB ratified EITF Issue No. 06-7, Issuer's Accounting for a Previously Bifurcated Conversion Option in a Convertible Debt Instrument When the Conversion Option No Longer Meets the Bifurcation Criteria in FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities (EITF 06-7). At the time of issuance, an embedded conversion option in a convertible debt instrument may be required to be bifurcated from the debt instrument and accounted for separately by the issuer as a derivative under FAS 133, based on the application of EITF 00-19. Subsequent to the issuance of the convertible debt, facts may change and cause the embedded conversion option to no longer meet the conditions for separate accounting as a derivative instrument, such as when the bifurcated instrument meets the conditions of Issue 00-19 to be classified in stockholders' equity. Under EITF 06-7, when an embedded conversion option previously accounted for as a derivative under FAS 133 no longer meets the bifurcation criteria under that standard, an issuer shall disclose a description of the principal changes causing the embedded conversion option to no longer require bifurcation under FAS 133 and the amount of the liability for the conversion option reclassified to stockholders' equity. EITF 06-7 should be applied to all previously bifurcated conversion options in convertible debt instruments that no longer meet the bifurcation criteria in FAS 133 in interim or annual periods beginning after December 15, 2006, regardless of whether the debt instrument was entered into prior or subsequent to the effective date of EITF 06-7. Earlier application of EITF 06-7 is permitted in periods for which financial statements have not yet been issued. The Company is currently evaluating the impact of this guidance on our consolidated financial position, results of operations or cash flows.

Table of Contents

Quantitative and Qualitative Disclosures about Market Risk

Our principal source of financing activities is the issuance of convertible preferred stock with financial institutions. We are affected by market risk exposure primarily through any amounts payable in stock, or cash by us under convertible securities. We do not utilize derivative financial instruments to hedge against changes in interest rates or for any other purpose. In addition, substantially all transactions entered into by us are denominated in U.S. dollars. As such, we have shifted foreign currency exposure onto our foreign customers. As a result, if exchange rates move against foreign customers, we could experience difficulty collecting unsecured accounts receivable, the cancellation of existing orders or the loss of future orders. The foregoing could materially adversely affect our business, financial condition and results of operations.

ITEM 7. FINANCIAL STATEMENTS

The financial statements are included in this Report beginning on page F-1.

ITEM 8. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fourth quarter of 2006 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 8A. CONTROLS AND PROCEDURES

Andrea's management, including its principal executive officer and principal financial officer, have evaluated the effectiveness of the Andrea's disclosure controls and procedures, as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the Exchange Act). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, Andrea's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that it files or submits under the Exchange Act with the Securities and Exchange Commission (the SEC) (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to Andrea's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

Limitations on the Effectiveness of Controls

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that all control issues and instance of fraud, if any, within a company have been detected. Andrea's disclosure controls and procedures are designed to provide reasonable assurance of achieving its objectives.

ITEM 8B. OTHER INFORMATION

None.

PART III

**ITEM 9. DIRECTORS, EXECUTIVE OFFICERS PROMOTERS, CONTROL PERSONS AND CORPORATE GOVERNANCE;
COMPLIANCE WITH SECTION 16(a) OF THE EXCHANGE ACT**

Information on the Directors of the Company follows (all Directors serve for a one-year term; ages are as of December 31, 2006):

Douglas J. Andrea, age 44, has been Chairman of the Board of Directors since November 2001, a Director of the Company since 1991, Corporate Secretary since 2003 and Chief Executive Officer since January 2005. He was Co-Chairman and Co-Chief Executive Officer of the

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

Company from November 1998 until August 2001. He served as Co-President of the Company from November 1992 to November 1998, as Vice President - Engineering of the Company from December 1991 to November 1992, and as Secretary of the Company from 1989 to January 1993.

Gary A. Jones, age 61, has been a Director of the Company since April 1996. He has served as President of Digital Technologies, Inc. since 1994 and was Chief Engineer at Allied Signal Ocean Systems from 1987 to 1994. From March 1998 to December 2000, Mr. Jones was the Managing Director of Andrea Digital Technologies, Inc, a wholly-owned subsidiary of Andrea Electronics Corporation.

Table of Contents

Louis Libin, age 48, has been a Director of the Company since February 2002. He is President of Broad Comm, Inc., a consulting group specializing in advanced television broadcast, interactive TV, Internet Protocol and wireless communications. Prior to his tenure at Broad Comm, Mr. Libin was Chief Technology Officer for NBC, and was responsible for all business and technical matters for satellite, wireless and communication issues for General Electric and NBC. Since 1989, Mr. Libin has represented the United States on satellite and transmission issues at the International Telecommunications Union (the ITU) in Geneva, Switzerland. Mr. Libin is a Senior Member of the Institute of Electrical and Electronic Engineers (IEEE), and is a member of the National Society of Professional Engineers.

Joseph J. Migliozi, age 57, has been a Director of the Company since September 2003. He operates his own management consulting firm since 2001. From 1997 to 2001 Mr. Migliozi was the Chief Operating and Financial Officer of Voyetra Turtle Beach. Prior to that, he served in various executive management positions in the electronics manufacturing industries, with both financial and operational responsibilities. Mr. Migliozi is a Certified Public Accountant. The Company's Board of Directors has determined that Mr. Migliozi is an audit committee financial expert under the rules of the Securities and Exchange Commission. Mr. Migliozi is independent as defined under the Securities Exchange Act of 1934.

Jonathan D. Spaet, age 50, has been a Director of the Company since 2003. He is Vice-President of Advertising Sales for Time Warner Cable National Advertising Sales since September 2004, overseeing advertising sales for Time Warner Cable markets around the country. Previously, he was Vice-President of Sales for Westwood One Radio Networks, managing ad sales one of the largest radio groups in the country. From 2002 to 2003, he was the Chief Operating Officer of MEP Media, a company that was starting a digital cable channel devoted to the music enthusiast. Prior to MEP, he was President of Ad Sales for USA Networks, supervising ad sales, marketing, research and operations for both USA and Sci-fi, two top-tier cable channels. Previously, he was President of Ad Sales for About.com. This followed 15 years at NBC, where Mr. Spaet's career included a six-year position in NBC Cable and nine years in the NBC Television Stations Group.

Information about Executive Officers Who Are Not Directors

The following information is provided for the Company's executive officer who is not also a director:

Corisa L. Guiffre, age 34, has been the Company's Vice President and Chief Financial Officer of the Company since June 2003 and Assistant Corporate Secretary since October 2003. Ms. Guiffre joined the Company in November 1999 and served as Vice President and Controller until June 2003. Prior to joining the Company she was part of the Audit, Tax and Business Advisory divisions at Arthur Andersen LLP. She is a Certified Public Accountant, a member of the American Institute of Certified Public Accountants and a member of the New York State Society of Certified Public Accountants.

The executive officers of the Company are elected annually and hold office until their successors have been elected and qualified or until they are removed or replaced.

SECTION 16(a) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE

Section 16(a) of the Securities Exchange Act of 1934, as amended, requires the Company's directors and officers and persons who beneficially own more than ten percent of the Company's common stock to file with the Securities and Exchange Commission (SEC) initial reports of ownership and reports of changes in ownership of common stock in the Company. Officers, directors and greater-than-ten percent shareholders are also required to furnish the Company with copies of all Section 16(a) reports they file. Based solely upon a review of Forms 3 and 4 and amendments thereto furnished to the Company under Section 16(a) of the Securities Exchange Act of 1934, as amended, during the year ended December 31, 2006 and Forms 5 and amendments thereto furnished to the Company with respect to the year ended December 31, 2006, and written representations provided to the Company from the individuals required to file reports, the Company believes that each of the individuals required to file reports complied with applicable reporting requirements for transactions in the Company's common stock during the year ended December 31, 2006.

Code of Business Ethics and Conduct

Andrea Electronics has adopted a Code of Business Ethics and Conduct. See Exhibits to this Annual Report on Form 10-KSB.

ITEM 10. EXECUTIVE COMPENSATION

Summary Compensation Table

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

The following table sets forth information for the last fiscal year relating to compensation earned by each person who served as chief executive officer and the other most highly compensated executive officers whose total compensation was over \$100,000 during the year ended December 31, 2006.

Table of Contents

Name and Principal Position	Year	Salary	Bonus	Stock Options ⁽¹⁾	Total
Douglas J. Andrea, Chairman of the Board, Chief Executive Officer, and Corporate Secretary	2006	\$ 255,000	\$ 35,516	\$ 61,082	\$ 351,598
Corisa L. Guiffre, Vice President, Chief Financial Officer and Assistant Corporate Secretary	2006	\$ 96,923	\$	\$ 4,886	\$ 101,809

- (1) Reflects the dollar amount recognized for financial statement reporting purposes in accordance with FAS 123(R) for 2,000,000 and 400,000 options in 2006 for Mr. Andrea and Ms. Guiffre, respectively, based upon a fair value of each option of \$0.12 using the Black-Scholes option pricing model. The weighted average assumptions used in the valuation of the options were as follows: dividend yield, 0%; expected volatility, 247%; risk-free rate, 5.07%; and expected life in years of 7 years.

Outstanding Equity Awards at Fiscal Year-End

The following table provides information concerning unexercised options for each named executive officer outstanding as of December 31, 2006. None of the named executive officers had stock awards that have not vested or unearned equity incentive plan awards at December 31, 2006.

Name	Number of securities underlying unexercised options (#) exercisable	Option Awards		Option exercise price (\$/share)	Option expiration date
		Number of securities underlying unexercised options (#) unexercisable			
Douglas J. Andrea	150,000			\$ 5.375	4-01-2007
	50,000			\$ 14.625	3-03-2008
	100,000			\$ 14.125	6-08-2008
	100,000			\$ 6.250	3-23-2009
	50,000			\$ 5.375	8-17-2009
	75,000			\$ 6.875	4-14-2010
	50,000			\$ 6.000	8-01-2010
	250,000			\$ 0.690	1-31-2012
	400,000			\$ 0.130	6-14-2014
	250,000			\$ 0.100	8-04-2014
	250,000			\$ 0.040	8-04-2015
	600,000			\$ 0.050	8-10-2015
		1,000,000 ⁽¹⁾	\$ 0.120	11-02-2016	
		1,000,000 ⁽¹⁾	\$ 0.120	11-16-2016	
Corisa L. Guiffre	25,000			\$ 7.125	11-22-2009
	10,000			\$ 6.875	4-14-2010
	10,000			\$ 6.000	8-01-2010
	10,000			\$ 1.780	3-19-2011
	25,000			\$ 0.690	1-31-2012
	250,000			\$ 0.050	8-10-2015
		400,000 ⁽²⁾	\$ 0.120	11-16-2016	

- (1) The stock options vest 33.3% from and after August 1, 2007, 33.3% from and after August 1, 2008 and 33.4% from and after August 1, 2009
- (2) The stock options vest 33.3% from and after the first anniversary of the Date of Grant, 33.3% from and after the second anniversary of the Date of Grant and 33.4% from and after the third anniversary of the Date of Grant, which was November 16, 2006.

Table of Contents**Employment Agreements**

In June 2004, the Company entered into a one-year employment contract with the Chairman of the Board, Douglas J. Andrea, which automatically renewed for one additional one-year term and expired June 2006. Pursuant to this Employment Agreement, Mr. Andrea received a 2006 annual base salary of \$225,000 per annum, a minimum annual prorated bonus of \$50,000. Mr. Andrea was also entitled to a change in control payment equal to one times his base salary with continuation of health and medical benefits for one year in the event of a change in control and subsequent termination of employment other than for cause. In accordance with Amendment 1 of Mr. Andrea's employment agreement, Mr. Andrea did not receive a \$50,000 bonus for the periods ended December 31, 2005 and 2004, and instead is entitled to \$100,000 bonus when the Company has positive cash flows and such payment would not cause the Company to receive a "have going concern" audit opinion language for the Company's financial statements, as determined by the Board of Directors in its sole discretion. This bonus may be payable in lump sum or over time as determined by the Board of Directors in its sole discretion and consistent with the intent of the Amendment 1. At December 31, 2006, \$115,000 is owed to Mr. Andrea under this agreement.

In November 2006, the Company entered into an employment agreement with the Chairman of the Board, Douglas J. Andrea. The employment agreement expires July 31, 2008 and is subject to renewal as approved by the Compensation Committee of the Board of Directors. Pursuant to his employment agreement, Mr. Andrea will receive an annual base salary of \$300,000 per annum. In addition, upon execution of the employment agreement, Mr. Andrea is entitled to a salary adjustment from August 1, 2006 through the date of the employment agreement. The employment agreement provides for quarterly bonuses equal to 25% of the Company's pre-bonus net after tax quarterly earnings in excess of \$25,000 for a total quarterly bonus amount not to exceed \$12,500; and annual bonuses equal to 10% of the Company's annual pre-bonus net after tax earnings in excess of \$300,000. All bonuses shall be payable as soon as the Company's cash flow permits. All bonus determinations or any additional bonus in excess of the above will be made in the sole discretion of the Compensation Committee. On November 2, 2006, in accordance with his employment agreement, Mr. Andrea was granted 1,000,000 stock options. This grant provides for a three year vesting period, an exercise price of \$0.12 per share, which was fair market value at the date of grant, and a term of 10 years. On November 16, 2006, in accordance with his employment agreement, Mr. Andrea was granted 1,000,000 stock options. This grant provides for a three year vesting period, an exercise price of \$0.12 per share, which was fair market value at the date of grant, and a term of 10 years. Mr. Andrea is also entitled to a change in control payment equal to two times his salary with continuation of health and medical benefits for two years in the event of a change in control. At December 31, 2006, \$6,349 is owed to Mr. Andrea under this agreement.

In November 1999, the Company entered into an change in control agreement with the Chief Financial Officer, Corisa L. Guiffre. This agreement provides for a change in control payment equal to three times her average annual compensation for the five preceding taxable years with continuation of health and medical benefits for three years in the event of a change in control of the Company, as defined in the agreement, and subsequent termination of employment other than for cause.

Director Compensation

The following table provides the compensation received by individuals who served as non-employee directors of the Company during the 2006 fiscal year.

Director	Fees Earned			Total
	of Paid in Cash	Stock Awards ⁽¹⁾	Stock Option Awards ⁽²⁾	
Gary A Jones	\$ 2,000	\$ 5,000	\$ 407	\$ 7,407
Louis Libin	\$ 2,000	\$ 5,000	\$ 1,334	\$ 8,334
Joseph J. Migliozi	\$ 2,000	\$ 5,000	\$ 2,352	\$ 9,352
Jonathan D. Spaet	\$ 1,750	\$ 5,000	\$ 407	\$ 7,157

- (1) Reflects the dollar amount recognized for financial statement reporting purposes in accordance with FAS 123(R) for 166,668 and 400,000 shares of stock granted in 2006 and 2005, respectively.
- (2) Reflects the dollar amount recognized for financial statement reporting purposes in accordance with FAS 123(R) for 16,667, 16,667 and 41,667 options in 2006 for Messrs. Jones, Migliozi and Spaet, respectively, based upon a fair value of each option of \$0.12 using the Black-Scholes option pricing model and 40,000 options in 2005 for Messrs. Libin and Migliozi based upon a fair value of each option of

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

\$0.05 using the Black-Scholes option pricing model. The assumptions used in the valuation of the 2006 options were as follows: dividend yield, 0%; expected volatility, 247%; risk-free rate, 5.07%; and expected life in years of 7 years. The assumptions used in the valuation of the 2005 options were as follows: dividend yield, 0%; expected volatility, 220%; risk-free rate, 4.47%; and expected life in years of 5 years. At December 31, 2006, Messrs. Jones, Libin, Migliozzi and Spaet held 161,667, 150,000, 216,667 and 126,667 options to purchase shares of common stock.

Table of Contents**Annual Retainer and Meeting Fees for Non-Employee Directors.**

The following tables set forth the applicable retainers and fees that will be paid to non-employee directors for their service on the Board of Directors of the Company during 2007. Employee directors do not receive any retainers or fees for their services on the Boards of Directors.

Annual Retainer	\$5,000 (paid in the form of common stock)
Fee per Board Meeting (Regular or Special)	\$500
Fee per Committee Meeting	\$250
Additional Annual Retainer for the Chairperson of	
the Compensation and Nomination and	
Governance Committees	\$2,500 (paid in the form of stock options) ⁽¹⁾
Additional Annual Retainer for the Chairperson of	
the Audit Committee	\$5,000 (paid in the form of stock options) ⁽¹⁾

- (1) Stock option grants will have an exercise price equal to the fair market value of the Company's common stock on the date of grant, an eighteen-month vesting period and a term of 10 years.

ITEM 11. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS**Stock Ownership**

The following table sets forth certain information as of March 26, 2007, with respect to the common stock ownership of (i) each director of the Company, (ii) each executive officer named in the Summary Compensation Table and (iii) all directors and executive officers of the Company as a group.

Name of Beneficial Owner	Number of Shares Owned (excluding options)	Number of Shares That May be		Percent of Common Stock Outstanding ⁽¹⁾
		Acquired Within 60 days by Exercising Options		
Douglas J. Andrea	261,014 ⁽²⁾	2,325,000		4.2%
Corisa L. Guiffre	2,750	330,000		*
Gary A. Jones	198,704	145,000		*
Louis Libin	141,667	150,000		*
Joseph J. Migliozi	181,079	175,000		*
Jonathan D. Spaet	181,079	110,000		*
Current directors and executive officers as				
a group (6 persons)	966,293	3,235,000		6.7%

*Less than 1%

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

- (1) Percentages with respect to each person or group of persons have been calculated on the basis of 59,121,857 shares of Company common stock, plus the number of shares of Company common stock which such person or group of persons has the right to acquire within 60 days from March 26, 2007, by the exercise of options. The information concerning the shareholders is based upon information furnished to the Company by such shareholders. Except as otherwise indicated none of the shares listed are pledged as security and all of the shares next to each identified person or group are owned of record and beneficially by such person or each person within such group and such persons have sole voting and investment power with respect thereto.
- (2) Includes 12,438 and 3,876 shares owned by Mr. Andrea's spouse and Mr. Andrea's daughter, respectively.

Table of Contents

The following table sets forth certain information as of March 26, 2007, with respect to the stock ownership of beneficial owners of more than 5% of the Company's outstanding common stock:

Name and Address	Shares of		Percent of
	Common Stock	Common Stock	Common Stock and Common Stock Equivalents
	Owned	Equivalents ⁽¹⁾	Outstanding ⁽²⁾
Alpha Capital Anstalt Pradafant 7, Furstentums 9490 Vaduz, Liechtenstein		5,722,159	9.7%
Nickolas W. Edwards 937 Pine Ave, Long Beach, CA 90813	5,390,000 ⁽⁴⁾		9.1%

- (1) The issuance of shares of common stock upon conversion of the Series C Preferred Stock is limited to that amount which, after given effect to the conversion, would cause the holder not to beneficially own in excess of 4.99% or, together with other shares beneficially owned during the 60 day period prior to such conversion, not to beneficially own in excess of 9.99% of the outstanding shares of common stock. The issuance of common stock upon conversion of the Series D Preferred Stock and the related warrants also are limited to that amount which, after given effect to the conversion, would cause the holder not to beneficially own an excess of 4.99% of then outstanding shares of our common stock, except that each holder has a right to terminate such limitation upon 61 days notice to us.
- (2) Percentages with respect to each person or group of persons have been calculated on the basis of 59,121,857 shares of Company common stock, plus the number of shares of Company common stock which such person or groups of persons has the right to acquire within 60 days of the conversion of Series C Preferred Stock and Series D Preferred Stock.
- (3) Based on information filed with the Securities and Exchange Commission in a Schedule 13G (Amendment No. 1) on February 15, 2007. Common stock ownership of Alpha Capital Anstalt (Alpha Capital) is not known as of March 26, 2007. Based on Company records as of March 26, 2007, Alpha Capital has 5,312,153 common stock equivalents from Series C Preferred Stock, Series D Preferred Stock and related warrants. See footnote (1) above, for limitations on the conversion of such common stock equivalents.
- (4) Based on information filed with the Securities and Exchange Commission in a Schedule 13G (Amendment No. 1) on October 20, 2006 by Nickolas W. Edwards.

The following table sets forth certain information as of March 26, 2007, for all compensation plans, including individual compensation arrangements under which equity securities of the Company are authorized for issuance.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))

Tax fees	\$	\$
All other fees	\$	\$

Pre-Approval of Services by the Independent Auditor

The Audit Committee has adopted a policy for pre-approval of audit and permitted non-audit services by the Company's independent auditor. The Audit Committee will consider annually and, if appropriate, approve the provision of audit services by its external auditor and consider and, if appropriate, pre-approve the provision of certain defined audit and non-audit services. The Audit Committee also will consider on a case-by-case basis and, if appropriate, approve specific engagements that are not otherwise pre-approved.

Any proposed engagement that does not fit within the definition of a pre-approved service may be presented to the Audit Committee for consideration at its next regular meeting or, if earlier consideration is required, to the Audit Committee or one or more of its members. The member or members to whom such authority is delegated shall report any specific approval of services at its next regular meeting. The Audit Committee will regularly review summary reports detailing all services being provided to the Company by its external auditor.

During the year ended December 31, 2006, all services were approved, in advance, by the Audit Committee in compliance with these procedures.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To The Audit Committee of the Board of Directors and Shareholders of

Andrea Electronics Corporation:

We have audited the accompanying consolidated balance sheets of Andrea Electronics Corporation (a New York corporation) and subsidiaries (the Company) as of December 31, 2006 and 2005, and the related consolidated statements of operations, changes in shareholders' equity and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Andrea Electronics Corporation and subsidiaries as of December 31, 2006 and 2005, and the results its operations and its cash flows for the years then ended in conformity with United States generally accepted accounting principles.

ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2006

1. ORGANIZATION AND BUSINESS

Andrea Electronics Corporation, incorporated in the State of New York in 1934, (together with its subsidiaries, Andrea or the Company) has been engaged in the electronic communications industry since its inception. Since the early 1990s, Andrea has been primarily focused on developing and manufacturing state-of-the-art microphone technologies and products for enhancing speech-based applications software and communications, primarily in the computer and business enterprise markets that require high quality, clear voice signals. Andrea's technologies eliminate unwanted background noise to enable the optimum performance of various speech-based and audio applications. Andrea DSP Microphone and Audio Software Products and Andrea Anti-Noise Products have been designed for applications that are controlled by or depend on speech across a broad range of hardware and software platforms. These products incorporate Digital Signal Processing, Noise Cancellation, Active Noise Cancellation and Active Noise Reduction microphone technologies, and are designed to cancel background noise in a wide range of noisy environments, such as homes, offices, factories and automobiles. Andrea also manufactures a line of accessories for these products for the consumer and commercial markets in the United States as well as in Europe and Asia.

Management's Liquidity Plans

As of December 31, 2006, Andrea had a working capital of \$1,562,083 and cash and cash equivalents of \$303,678. Andrea's income from operations was \$84,752 for the year ended December 31, 2006. Andrea plans to continue to improve its cash flows during 2007 by placing heightened emphasis on its sales and marketing efforts.

As of March 26, 2007, Andrea has approximately \$500,000 (unaudited) of cash. While Andrea explores opportunities to increase revenues in new business areas, the Company also continues to examine additional opportunities for cost reduction and further diversification of its business. In 2005, Andrea made significant changes in its facilities (See Note 12). By Andrea assigning its lease in Melville, New York, and entering into a new lease in Bohemia, New York, the closing of its facility in Israel, the movement of the Company's facility in Utah and other related operational expense reductions, effective April 2005, Andrea reduced its annual cash expenses by approximately \$1.1 million. Although the Company has improved its cash flows by reducing overall expenses, to the extent that the Company's revenues decline or remain flat, additional liquidity might be required. Accordingly, if Andrea fails to develop additional revenues from sales of its products to generate adequate funding from operations, or if Andrea fails to obtain additional financing through a capital transaction or other type of financing, Andrea may be required to continue to reduce its operating expenses and/or operations or Andrea may have to relinquish its products, technologies or markets which could have a materially adverse effect on revenue and operations. Andrea has no commitment for additional financing and may experience difficulty in obtaining additional financing on favorable terms, if at all. Management believes that Andrea has sufficient liquidity available to operate through at least December 31, 2007.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The financial statements include the accounts of Andrea and its wholly-owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Earnings (loss) Per Share

Basic earnings (loss) per share is computed by dividing the net income (loss) by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) adjusts basic earnings (loss) per share for the effects of convertible securities, stock options and other potentially dilutive financial instruments, only in the periods in which such effect is dilutive. Securities that could potentially dilute basic earnings per share (EPS) in the future that were not included in the computation of the diluted EPS because to do so would have been anti-dilutive for the periods presented, consist of the following:

	December 31, 2006	December 31, 2005
Total potential common shares as of:		
Options to purchase common stock (Note 13)	1,925,000	4,512,500
Series C Convertible Preferred Stock and related accrued dividends (Note 7)		4,836,010
Series D Convertible Preferred Stock and related warrants (Note 8)	5,158,344	10,472,632
 Total potential common shares as of December 31, 2006	 7,083,344	 19,821,142

Table of Contents**ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

DECEMBER 31, 2006

The following table sets forth the components used in the computation of basic and diluted earnings per share for the year ended::

	December 31, 2006:	December 31, 2005:
Numerator:		
Net income (loss)	\$ 18,666	\$ (627,508)
Denominator:		
Weighted average shares	58,470,811	57,949,328
Effect of dilutive securities:		
Series C Convertible Preferred Stock	4,607,252	(1)
Series D Convertible Preferred Stock	4,971,432	(1)
Employee stock options	276,182	(1)
Denominator for diluted earnings per share-adjusted weighted average shares after assumed conversions	68,325,677	57,949,328

⁽¹⁾ There were no dilutive securities for the year ended December 31, 2005 as the period had a net loss and the effect of any dilutive security would be anti-dilutive

Cash and Cash Equivalents

Cash and cash equivalents include cash and highly liquid investments with original maturities of three months or less (amounts of which may at time, exceed Federal Deposit Insurance Corporation (FDIC) limits on insurable amounts. The Company has cash deposits in excess of the maximum amounts insured by FDIC at December 31, 2006 and 2005. The Company mitigates its risk by investing in or through major financial institutions.

Concentration of Credit Risk

Andrea is a manufacturer of audio communications equipment for several industries. Revenues of noise canceling and active noise canceling products were significant to one customer and its affiliates, accounting for approximately 10% and 11% of the total net revenues for the year ended December 31 2006 and 2005, respectively, and accounted for 3% and 14% of total accounts receivable at December 31, 2006 and 2005, respectively. Revenues of superbeam array microphone products were significant to one customer and its affiliates, accounting for approximately 25% and 0% of the total net revenues for the year ended December 31, 2006 and 2005, respectively, and accounted for 24% and 0% of total accounts receivable at December 31, 2006 and 2005, respectively. Licensing revenues and other revenues of noise canceling and active noise canceling products were significant to one customer and its affiliates, accounting for approximately 11% and 1% of the total net revenues for the year ended December 31, 2006 and 2005, respectively, and accounted for 41% and 2% of total accounts receivable at December 31, 2006 and 2005, respectively.

During the years ended December 31, 2006 and 2005, Andrea purchased a substantial portion of its finished goods from two suppliers. Purchases from these two suppliers amounted to 79% and 3% in 2006 and 73% and 11% in 2005, of total purchases. At December 31, 2006, the amounts due to these suppliers in accounts payable were \$377,019 and \$0 respectively. At December 31, 2005, the amounts due to these suppliers in accounts payable were \$178,596 and \$24,447 respectively. Prepaid expenses and other current assets includes \$334,948 of deposits to one of these suppliers.

Allowance for Doubtful Accounts

The Company performs on-going credit evaluations of its customers and adjusts credit limits based upon payment history and the customer's current credit worthiness, as determined by the review of their current credit information. Collections and payments from customers are continuously monitored. The Company maintains an allowance for doubtful accounts, which is based upon historical experience as well as specific customer collection issues that have been identified. While such bad debt expenses have historically been within expectations and allowances established, the Company cannot guarantee that it will continue to experience the same credit loss rates that it has in the past. If the financial condition of customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

F-7

Table of Contents

ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2006

Inventories

Inventories are stated at the lower of cost (on a first-in, first-out) or market basis. The cost elements of inventories include materials, labor and overhead. Andrea reviews its inventory reserve for obsolescence on a quarterly basis and establishes reserves on inventories when the cost of the inventory is not expected to be recovered. Andrea's policy is to reserve for inventory that shows slow movement over the preceding six consecutive quarters. Andrea records charges in inventory reserves as part of cost of revenues.

Property and Equipment

Property and equipment is stated at cost less accumulated depreciation and amortization. Depreciation is provided on a straight-line basis over the estimated useful lives of the assets ranging from 3 to 7 years. Leasehold improvements are amortized on a straight-line basis over the shorter of the lives of the respective leases or the expected useful lives of those improvements.

Expenditures for maintenance and repairs that do not materially prolong the normal useful life of an asset are charged to operations as incurred. Improvements that substantially extend the useful lives of the assets are capitalized. Upon sale or other disposition of assets, the cost and related accumulated depreciation and amortization are removed from the accounts and the resulting gain or loss, if any, is reflected in the statement of operations.

Other Intangible Assets

Andrea amortizes its core technology and patents and trademarks on a straight-line basis over their estimated useful lives that range from 15 to 17 years.

Long-Lived Assets

Andrea accounts for its long-lived assets in accordance with Statement of Financial Accounting Standards (SFAS) No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, for purposes of determining and measuring impairment of its long-lived assets (primarily intangible assets) other than goodwill. Andrea's policy is to review the value assigned to its long lived assets to determine if they have been permanently impaired by adverse conditions which may affect Andrea whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If Andrea identifies a permanent impairment such that the carrying amount of Andrea's long lived assets is not recoverable using the sum of an undiscounted cash flow projection (gross margin dollars from product sales), the impaired asset is adjusted to its estimated fair value, based on an estimate of future discounted cash flows which becomes the new cost basis for the impaired asset. Considerable management judgment is necessary to estimate undiscounted future operating cash flows and fair values and, accordingly, actual results could vary significantly from such estimates. No impairment charges were recognized during the years ended December 31, 2006 and 2005.

Revenue Recognition

Non software-related revenue, which is generally comprised of microphones and microphone connectivity product revenues, is recognized when title and risk of loss pass to the customer, which is generally upon shipment. With respect to licensing revenues, Andrea recognizes revenue in accordance with Statement of Position (SOP) 97-2, Software Revenue Recognition, as amended, and Staff Accounting Bulletin Topic 13 Revenue Recognition in Financial Statement. License revenue is recognized based on the terms and conditions of individual contracts (see Note 9). In addition, fee based services, which are short-term in nature, are generally performed on a time-and-material basis under separate service arrangements and the corresponding revenue is generally recognized as the services are performed.

Income Taxes

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

The provision for income taxes for the year ended December 31, 2006 is a result of certain licensing revenues that are subject to withholding of income tax as mandated by the foreign jurisdiction in which the revenues are earned (as defined in Note 9). There is no provision for income taxes for the year ending December 31, 2005, as Andrea did not have revenue subject to these withholding taxes in 2005. For all other income taxes, Andrea accounts for income taxes in accordance with SFAS No. 109, Accounting for Income Taxes. SFAS No. 109 requires an asset and liability approach for financial accounting and reporting for income taxes. The provision for income taxes is based upon income or loss after adjustment for those permanent items that are not considered in the determination of taxable income. Deferred income taxes represent the tax effects of differences between the financial reporting and tax bases of the Company's assets and liabilities at the enacted tax rates in effect for the years in which the differences are expected to reverse. The Company evaluates the recoverability of deferred tax assets and establishes a valuation allowance when it is more likely

F-8

Table of Contents**ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

DECEMBER 31, 2006

than not that some portion or all of the deferred tax assets will not be realized. If it becomes more likely than not that a tax asset will be used, the related valuation allowance on such assets would be reversed. Management makes judgments as to the interpretation of the tax laws that might be challenged upon an audit and cause changes to previous estimates of tax liability. In management's opinion, adequate provisions for income taxes have been made for all years. If actual taxable income by tax jurisdiction varies from estimates, additional allowances or reversals of reserves may be necessary. Income tax expense consists of the tax payable for the period and the change during the period in deferred tax assets and liabilities. (Note 11).

Stock-Based Compensation

At December 31, 2006, Andrea had three stock-based employee compensation plans, which are described more fully in Note 13. Effective, January 1, 2006, the Company adopted the provisions of SFAS No. 123R, Share-Based Payment. SFAS No. 123R establishes accounting for stock-based awards exchanged for employee services. Under the provisions of SFAS No. 123R, share-based compensation cost is measured at the grant date, based on the fair value of the award, and is recognized as expense over the employee's requisite service period (generally the vesting period of the equity grant). The Company amortizes stock-based compensation by using the straight-line method. The Company elected to adopt the modified prospective transition method as provided by SFAS No. 123R. In accordance with the requirements of the modified prospective transition method, consolidated financial statements for prior year periods have not been restated to reflect the fair value method of expensing share-based compensation. Additionally, effective with the adoption of SFAS No. 123R excess tax benefits realized from the exercise of stock-based awards are classified in cash flows from financing activities.

Prior to January 1, 2006, the Company applied Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees (APB 25) and related interpretations in accounting for its stock-based compensation plans applying the disclosure-only provisions of SFAS No. 123, Accounting for Stock-Based Compensation, as amended by SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure. In accordance with APB 25, no stock-based compensation expense was recognized for options granted to employees, as all options granted under those plans have an exercise price equal to the market value of the underlying common stock on the date of grant. The adoption of SFAS No. 123R did not affect the Company's cash flows or financial position, but has had an adverse impact on results of operations. The result of adoption of this pronouncement was \$83,707 of compensation expense for the year ended December 31, 2006, \$74,348 which is included in general, administrative and selling expenses, \$8,668 is included in research and development expenses and \$691 is included in cost of revenues in the accompanying consolidated statement of operations.

The proforma effect of expensing stock options on the Company's results of operations using a Black-Scholes option-pricing model for the periods prior to the adoption of the SFAS No. 123R is presented in the following pro forma table:

	For the Year Ended December 31, 2005
Net loss	\$ (627,508)
Deduct: Total stock-based employee compensation expenses determined under fair value-based method, net of income taxes	146,730
Pro forma net loss:	\$ (774,238)
Basic and diluted net loss per share as reported:	\$ (0.01)
Basic and diluted pro forma net loss per share:	\$ (0.01)

Research and Development

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

Andrea expenses all research and development costs as incurred.

Shipping and Handling Costs

Andrea incurs shipping and handling costs in its operations. These costs are included in Cost of revenues in the Consolidated Statements of Operations. \$85,809 and \$78,382 were billed to customers and are included in net revenues for the years ended December 31, 2006 and 2005, respectively.

Advertising Expenses

In accordance with SOP 93-7, Reporting on Advertising Costs, all media costs of newspaper and magazine advertisements as well as trade show costs are expensed as incurred. Total advertising and marketing expenses for the years ended December 31, 2006 and 2005 were \$16,087 and \$6,881, respectively.

F-9

ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2006

Fair Value of Financial Instruments

Andrea calculates the fair value of financial instruments and includes this additional information in the notes to financial statements when the fair value is different than the book value of those financial instruments. When the book value approximates fair value, no additional disclosure is made. Andrea uses quoted market prices whenever available to calculate these fair values. When quoted market prices are not available, Andrea uses standard pricing models for various types of financial instruments which take into account the present value of estimated future cash flows. As of December 31, 2006 and 2005, the carrying value of all financial instruments approximated fair value.

Recently Issued Accounting Pronouncements

In June 2006, the FASB issued Interpretation No. 48 *Accounting for Uncertainty in Income Taxes* an Interpretation of FASB Statement No. 109 (the *Interpretation*). The Interpretation establishes for all entities a minimum threshold for financial statement recognition of the benefit of tax positions, and requires certain expanded disclosures. The Interpretation is effective for fiscal years beginning after December 31, 2006, and is to be applied to all open tax years as of the date of effectiveness. The Company is in the process of evaluating the impact of the application of the Interpretation to its consolidated financial statements and is currently not yet in a position to determine such effects.

In September 2006, the FASB issued SFAS No. 157 *Fair Value Measurements* , which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. Adoption is required for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption of SFAS No. 157 is encouraged. The Company is currently evaluating the expected effect of SFAS No. 157 on its consolidated financial statements and is currently not yet in a position to determine such effects.

In September 2006, the Staff of the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108 (*SAB 108*), which provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. SAB 108 is effective for fiscal years ending on or after November 15, 2006. The adoption of SAB 108 did not have a material impact on the Company's consolidated financial position, results of operations or cash flows.

In December 2006, the FASB issued FASB Staff Position (*FSP*) EITF 00-19-2 *Accounting for Registration Payment Arrangements* (*FSP EITF 00-19-2*) which specifies that the contingent obligation to make future payments or otherwise transfer consideration under a registration payment arrangement should be separately recognized and measured in accordance with SFAS No. 5, *Accounting for Contingencies*. Adoption of FSP EITF 00-19-02 is required for fiscal years beginning after December 15, 2006. The Company is currently evaluating the expected effect of FSP EITF 00-19-02 on its consolidated financial statements and is currently not yet in a position to determine such effects.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115*. This Statement permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The fair value option established by this Statement permits all entities to choose to measure eligible items at fair value at specified election dates. A business entity shall report unrealized gains and losses on items for which the fair value option has been elected in earnings. Most of the provisions of this Statement apply only to entities that elect the fair value option. However, the amendment to FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, applies to all entities with available-for-sale and trading securities. This Statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company does not expect the adoption of SFAS No. 159 to have a material impact on its consolidated financial position, results of operations or cash flows.

In November 2006, the Emerging Issues Taskforce (*EITF*) reached a final consensus in EITF Issue 06-6 *Debtor's Accounting for a Modification (or Exchange) of Convertible Debt Instruments* (*EITF 06-6*). EITF 06-6 addresses the modification of a convertible debt instrument that changes the fair value of an embedded conversion option and the subsequent recognition of interest expense for the associated debt instrument when the modification does not result in a debt extinguishment pursuant to EITF 96-19, *Debtor's Accounting for a Modification or Exchange of Debt*

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

Instruments. The consensus should be applied to modifications or exchanges of debt instruments occurring in interim or annual periods beginning after November 29, 2006. Andrea does not expect the adoption of EITF 06-6 to have a material impact on our consolidated financial position, results of operations or cash flows.

F-10

Table of Contents**ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

DECEMBER 31, 2006

In November 2006, the FASB ratified EITF Issue No. 06-7, Issuer's Accounting for a Previously Bifurcated Conversion Option in a Convertible Debt Instrument When the Conversion Option No Longer Meets the Bifurcation Criteria in FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities (EITF 06-7). At the time of issuance, an embedded conversion option in a convertible debt instrument may be required to be bifurcated from the debt instrument and accounted for separately by the issuer as a derivative under SFAS No. 133, based on the application of EITF 00-19. Subsequent to the issuance of the convertible debt, facts may change and cause the embedded conversion option to no longer meet the conditions for separate accounting as a derivative instrument, such as when the bifurcated instrument meets the conditions of Issue 00-19 to be classified in stockholders' equity. Under EITF 06-7, when an embedded conversion option previously accounted for as a derivative under SFAS No. 133 no longer meets the bifurcation criteria under that standard, an issuer shall disclose a description of the principal changes causing the embedded conversion option to no longer require bifurcation under SFAS No. 133 and the amount of the liability for the conversion option reclassified to stockholders' equity. EITF 06-7 should be applied to all previously bifurcated conversion options in convertible debt instruments that no longer meet the bifurcation criteria in FAS 133 in interim or annual periods beginning after December 15, 2006, regardless of whether the debt instrument was entered into prior or subsequent to the effective date of EITF 06-7. Earlier application of EITF 06-7 is permitted in periods for which financial statements have not yet been issued. The Company is currently evaluating the impact of this guidance on our consolidated financial position, results of operations or cash flows.

Reclassifications

Certain prior year amounts have been reclassified to conform to the current year presentation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America, requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Management bases its estimates on historical experience and on various assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. The most significant estimates, among other things, are used in accounting for allowances for bad debts, inventory valuation and obsolescence, product warranty, depreciation, deferred income taxes, expected realizable values for assets (primarily intangible assets), contingencies, revenue recognition as well as the recording and presentation of our convertible preferred stock. Estimates and assumptions are periodically reviewed and the effects of any material revisions are reflected in the consolidated financial statements in the period that they are determined to be necessary. Actual results could differ from those estimates and assumptions.

3. INTANGIBLE ASSETS

Intangible assets, net, consists of the following:

	December 31,	
	2006	2005
Core Technology	\$ 8,567,448	\$ 8,567,448
Trademarks and Patents	516,496	493,728
	9,083,944	9,061,176
Less: accumulated amortization	(5,646,512)	(5,174,683)

The changes in the carrying amount of intangible assets during the years ended December 31, 2006 and 2005 were as follows:

	Core Technology	Trademarks and Patents	Totals
Balance as of January 1, 2005	\$ 3,972,790	\$ 372,556	\$ 4,345,346
Additions during the period		11,620	11,620
Amortization	(441,421)	(29,052)	(470,473)
Balance as of December 31, 2005	3,531,369	355,124	3,886,493
Additions during the period		22,768	22,768
Amortization	(441,421)	(30,408)	(471,829)
Balance as of December 31, 2006	\$ 3,089,948	\$ 347,484	\$ 3,437,432

Table of Contents**ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

DECEMBER 31, 2006

Andrea accounts for its long-lived assets in accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets for purposes of determining and measuring impairment of its long-lived assets (primarily intangible assets) other than goodwill. Andrea's policy is to periodically review the value assigned to its long-lived assets to determine if they have been permanently impaired by adverse conditions which may affect Andrea. If Andrea identifies a permanent impairment such that the carrying amount of Andrea's long lived assets are not recoverable using the sum of an undiscounted cash flow projection (gross margin dollars from product revenues), a new cost basis for the impaired asset will be established. If required, an impairment charge is recorded based on an estimate of future discounted cash flows. This new cost basis will be net of any recorded impairment.

In 2006, management compared the sum of Andrea's undiscounted cash flow projections (gross margin dollars from product sales) of the Andrea DSP Microphone and Audio Software core technology to the carrying value of that technology. The results of this test indicated that there was no impairment. However, this process utilized probability weighted undiscounted cash flow projections which include a significant amount of management's judgment and estimates as to future revenue. If these probability weighted projections do not come to fruition, the Company could be required to record an impairment charge in the near term and such impairment could be material.

In 2005, because the revenues from the Andrea DSP Microphone and Audio Software Products business segment were lower than expected and this business segment was still operating at a loss, management compared the sum of Andrea's undiscounted cash flow projections (gross margin dollars from product sales) of the Andrea DSP Microphone and Audio Software core technology to the carrying value of that technology. The results of this test indicated that there was not an impairment. However, this process utilized probability weighted undiscounted cash flow projections which include a significant amount of management's judgment and estimates as to future revenue. If these probability weighted projections do not come to fruition, the Company could be required to record an impairment charge in the near term and such impairment could be material.

Amortization expense was \$471,829 and \$470,473 for the years ended December 31, 2006 and 2005, respectively. Amortization of core technology is expected to be approximately \$441,421 per year for seven years. Trademarks and patents are amortized on a straight-line basis over 17 years. Assuming no changes in the Company's intangible assets, estimated amortization expense for each of the five succeeding fiscal years ending December 31 is expected to be approximately \$471,763 per year.

4. INVENTORIES, net

Inventories, net, consist of the following:

	December 31,	
	2006	2005
Raw materials	\$ 40,237	\$ 112,929
Work-in-process		
Finished goods	1,640,521	1,239,890
	1,680,758	1,352,819
Less: reserve for obsolescence	(591,980)	(673,817)
	\$ 1,088,778	\$ 679,002

5. PROPERTY AND EQUIPMENT, net

Property and equipment, net, consists of the following:

	December 31,	
	2006	2005
Machinery and equipment	\$ 459,119	\$ 437,521
Less: accumulated depreciation and amortization	(419,876)	(403,283)
	\$ 39,243	\$ 34,238

At December 31, 2006 and 2005, the Company had \$24,382 of its property and equipment under capital leases, with accumulated amortization of \$7,992 and \$2,302, respectively.

Depreciation and amortization of property and equipment was \$16,593 and \$44,587 for the years ended December 31, 2006 and 2005, respectively.

Table of Contents**ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2006

6. OTHER CURRENT LIABILITIES

Other current liabilities consist of the following:

	December 31,	
	2006	2005
Accrued payroll and related expenses	\$ 45,766	\$ 31,299
Accrued bonus for Chief Executive Officer (Note 12)	121,349	100,000
Accrued professional and other service fees	77,450	71,034
Accrued interest and dividend expense	168,296	176,652
Customer deposits		63,532
Accrued other	305	14,695
	\$ 413,166	\$ 457,212

7. SERIES C CONVERTIBLE PREFERRED STOCK

On October 10, 2000, Andrea issued and sold in a private placement \$7,500,000 of Series C Redeemable Convertible Preferred Stock (the Series C Preferred Stock). Each of these shares of Series C Preferred Stock had a stated value of \$10,000 plus \$671.23 increase in the stated value, which sum is convertible into Common Stock at a conversion price of \$0.2551. The Series C Preferred Stock currently has no dividends. Prior to the amendment there was a dividend of 5% per annum on the stated value. The additional amount of \$671.23 represents the 5% per annum from October 10, 2000 through the amendment.

On May 24, 2006, 5 shares of Series C Preferred Stock, together with \$8,356 of previously accrued dividends, were converted into 228,758 shares of Common Stock at the conversion price of \$0.2551. As of December 31, 2006, there were 100.701477 shares of Series C Preferred Stock outstanding, which were convertible into 4,607,252 shares of Common Stock and remaining accrued dividends of \$168,296.

8. SERIES D CONVERTIBLE PREFERRED STOCK

On February 17, 2004, Andrea entered into a Securities Purchase Agreement with certain holders of the Series C Preferred Stock and other investors (collectively, the Buyers) pursuant to which the Buyers agreed to invest a total of \$2,500,000. In connection with this agreement, on February 23, 2004, the Buyers purchased, for a purchase price of \$1,250,000, an aggregate of 1,250,000 shares of a new class of preferred stock, the Series D Preferred Stock, convertible into 5,000,000 shares of Common Stock (an effective conversion price of \$0.25 per share) and Common Stock warrants exercisable for an aggregate of 2,500,000 shares of Common Stock. The warrants are exercisable at any time after August 17, 2004 and before February 23, 2009 at an exercise price of \$0.38 per share.

In addition, on June 4, 2004, the Buyers purchased for an additional \$1,250,000, an additional 1,250,000 shares of Series D Preferred Stock convertible into 5,000,000 shares of Common Stock (an effective conversion price of \$0.25 per share) and Common Stock warrants exercisable for an aggregate of 2,500,000 shares of Common Stock. The warrants are exercisable at any time after December 4, 2004 and before June 4, 2009 at an exercise price of \$0.17 per share.

Knightsbridge Capital served as a financial advisor to Andrea in connection with the aforementioned transactions and the initial issuance of the Series D Preferred Stock and related warrants. In connection with these transactions, Andrea agreed to pay Knightsbridge Capital \$300,000 in cash and to issue warrants exercisable for an aggregate of 377,094 shares of Common Stock. The warrants are exercisable at any time after August 17, 2004 and before February 23, 2009 at an exercise price of \$0.38 per share.

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

From the time of issuance through June 4, 2009, the Company is required to maintain effective registration statements. Prior to 2006, there were 281,250 exercises of Series D Preferred Stock Warrants. On December 1, 2006, 85,714 shares of Series D Preferred Stock were converted into 342,856 shares of Common Stock at a conversion price of \$0.25. There were no Series D Preferred Stock Warrant exercises during the year ended December 31, 2006. There were no conversions or exercises during the year ended December 31, 2005. As of December 31, 2006, there are 1,242,858 shares of Series D Preferred Stock and 5,158,344 related warrants outstanding, which are convertible and exercisable into 10,129,776 shares of Common Stock.

On March 15, 2007, 25,000 shares of Series D Preferred Stock were converted into 100,000 shares of Common Stock at a conversion price of \$0.25. As of March 26, 2007, there are 1,217,858 shares of Series D Preferred Stock and 5,158,344 related warrants outstanding, which are convertible and exercisable into 10,029,776 shares of Common Stock.

9. LICENSING AGREEMENTS

Analog

In December 2001 and March 2002, Andrea entered into two agreements with Analog Devices, Inc. (Analog). These license agreements relate to Andrea s high performance noise canceling technologies that enable clear voice communications and high-performance audio in small home-office and regular office environments. Under these agreements, Analog paid Andrea a total of \$5 million in license fees during 2002. All license revenues were being recognized on a straight-line basis over three-years, \$3.0 million of which started to be recognized during the first quarter of 2002, and \$2.0 million which started in the third quarter of 2002. During the years ended December 31, 2006 and 2005, \$0 and \$713,284, respectively, of license revenues were recognized.

Table of Contents

ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2006

In November 2004, Andrea entered into a license agreement with Analog Devices to integrate our VoiceCenter technology with one of Analog's audio codec products for one of Analog Devices' customers (VoiceCenter Licensed Product). In consideration for this license Analog will pay Andrea a royalty for each VoiceCenter Licensed Product shipped. During the years ended December 31, 2006 and 2005, Andrea recognized \$0 and \$7,468, respectively, of revenues under this agreement.

In November 2004, Andrea entered into a license agreement with Analog to integrate its EchoStop technology with certain Analog products for one of Analog's customers (EchoStop Licensed Products). As consideration of this license, Analog will pay Andrea a royalty for each EchoStop Licensed Product shipped. During the first year of the agreement, Analog will pay Andrea a minimum of \$100,000 in royalty payments, payable in payments of \$25,000 per quarter. During the three months ended June 30, 2006 Andrea received the final \$25,000 of the minimum royalty payment due under this agreement. Andrea will continue to receive royalty payments based on the number of EchoStop Licensed Products shipped until either party terminates the agreement per the terms of the agreement. During the years ended December 31, 2006 and 2005, Andrea has recognized \$34,017 and \$75,000, respectively, of revenues under this agreement.

In January 2006, Andrea entered into a license agreement with Analog to integrate our DSDA and EchoStop technologies with certain of Analog products for specific Analog PC Original Equipment Manufacturer (OEM) customers (DSDA/EchoStop Licensed Product). In consideration of this license, Analog will pay Andrea a royalty for each DSDA/EchoStop Licensed Product shipped. During the years ended December 31, 2006 and 2005, Andrea has recognized \$100,000 and \$0, respectively, of revenues under this agreement. When the royalties paid to Andrea from DSDA/EchoStop Licensed Products amount to \$500,000, no further payments will be required under this agreement.

Marconi

In December 2002, Andrea entered into a license agreement with Marconi Communications to provide and integrate a number of our proprietary audio software technologies into the Marconi ViPr Virtual Presence System (ViPr). The ViPr conference system is a new network appliance developed by Marconi that enables secure, high resolution, real-time, multimedia communications between people in geographically dispersed locations. The addition of our hands-free audio system includes an advanced stereo version of Andrea's patented EchoStop, as well as its patented Digital Super Directional Array (DSDA) and PureAudio noise canceling algorithms, among others. The implementation of Andrea's microphone array, which is embedded in the monitor of the ViPr system allows users to carry on discussions at normal conversation levels, even in a noisy environment. . In 2006, Ericsson Inc. purchased certain assets and liabilities of Marconi Communication Inc. In conjunction with this purchase, Andrea, Marconi Communications Inc. and Ericsson Inc. executed a Novation Agreement in which the 2002 license agreement is now between Ericsson and Andrea. During the years ended December 31, 2006 and 2005, \$30,800 and \$6,240, respectively, of license revenues were recognized.

Creative

In October 2004 Andrea entered into a Production and Distribution Agreement with Creative Technology Ltd. (Creative). This agreement was modified in January 2005 to incorporate additional license rights. This agreement grants Creative a non-exclusive license to VoiceCenter, PureAudio and DSDA as well as the right to purchase and resell certain of our other products. VoiceCenter will be distributed with Creative's Sound Blaster Live! ADVANCED MB, a simple online upgrade allowing PC users with motherboard audio produced by Dell to upgrade to Sound Blaster audio quality. The Sound Blaster Live! ADVANCED MB audio solution is available for PCs equipped with this configuration. The features of PureAudio and DSDA will be distributed in certain of Creative's other products to enable optimized far-field voice input. In consideration of this agreement, Creative pays Andrea a royalty for each VoiceCenter license shipped with the Soundblaster Live and each webcam shipped with Andrea's licensed technologies. During the years ended December 31, 2006 and 2005, \$582,569 and \$586, respectively of licensing revenue related to this agreement was recognized.

Samsung

In October 2005, Andrea entered into a license agreement with Samsung Electronics Co., LTD (Samsung) to integrate our DSDA and EchoStop technologies with certain notebook/laptop PC products incorporating directional microphone and speaker phone functions for use in conjunction

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

with PC software voice driven applications. During the years ended December 31, 2006 and 2005, Andrea has recognized \$29,844 and \$0, respectively of revenues under this agreement.

10. RETIREMENT PLAN

Andrea has a defined contribution profit sharing plan that is qualified under Section 401(k) of the Internal Revenue Code and is available to substantially all of its employees. Andrea did not make any contributions to this plan for the years ended December 31, 2006 and 2005.

F-14

Table of Contents**ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2006

11. **INCOME TAXES**

The components of earnings before income taxes are as follows:

	For the Years Ended	
	December 31,	
	2006	2005
Domestic	\$ (530,560)	\$ (627,508)
Foreign	612,413	
Income (loss) before income taxes	\$ 81,853	\$ (627,508)

The provision for income tax consists of the following:

	For the Years Ended	
	December 31,	
	2006	2005
Current:		
Federal	\$	\$
Foreign	63,187	
State and Local:		
Deferred		
Federal	(228,000)	(140,000)
Foreign		
State and Local:		
Adjustment to valuation allowance related to net deferred tax assets	228,000	140,000
	\$ 63,187	\$

A reconciliation between the effective rate for income taxes and the amount computed by applying the statutory Federal income tax rate to loss from continuing operations before provision (benefit) for income taxes is as follows:

	For the Years Ended	
	December 31,	
	2006	2005
Tax provision at statutory rate	34%	(34)%
State and local taxes	32%	(2)%
Core technology amortization	184%	24%
Foreign income and withholding taxes	77%	%
Change in valuation allowance for net deferred tax assets	(250)%	12%

77% %

The increase in the effective tax rate for the year ended December 31, 2006 is a result of certain licensing revenues that are subject to withholding of income tax as mandated by the respective foreign jurisdiction in which the revenues are earned. There is no provision for income taxes for the year ending December 31, 2005, as Andrea did not have revenue subject to these withholding taxes in 2005.

The components of temporary differences that give rise to significant portions of the deferred tax asset, net, are as follows:

	For the Years Ended	
	December 31,	
	2006	2005
Deferred tax assets:		
Reserve for accrued expenses and trade credit	\$ 91,000	\$ 661,000
Allowance for doubtful accounts	7,000	7,000
Reserve for obsolescence	231,000	263,000
Foreign tax credit	63,000	
NOL carryforward	19,580,000	19,206,000
	19,972,000	20,137,000
Less: valuation allowance	(19,972,000)	(20,137,000)
Deferred tax asset, net	\$	\$

Table of Contents**ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2006

The change in the valuation allowance for deferred tax assets are summarized as follows:

	For the Years Ended	
	December 31,	
	2006	2005
Beginning Balance	\$ 20,137,000	\$ 20,277,000
Change in Allowance	(165,000)	(140,000)
Ending Balance	\$ 19,972,000	\$ 20,137,000

SFAS No. 109 requires that a valuation allowance be established when it is more likely than not that all or a portion of deferred tax assets will not be realized. A review of all available positive and negative evidence needs to be considered, including a company's performance, the market environment in which the company operates, the length of carryback and carryforward periods, and expectations of future profits, etc.

SFAS No. 109 further states that forming a conclusion that a valuation allowance is not needed is difficult when there is negative evidence such as cumulative losses in recent years. Therefore, cumulative losses weigh heavily in the overall assessment. Andrea will provide a full valuation allowance on future tax benefits until it can sustain a level of profitability that demonstrates its ability to utilize the assets, or other significant positive evidence arises that suggests Andrea's ability to utilize such assets.

As of December 31, 2006, Andrea had net operating loss and credit carryforwards of approximately \$50.2 million expiring in varying amounts beginning in 2008 through 2026. Andrea has a foreign tax credit of approximately \$63,000 which will expire in 2016. Included in the fully reserved deferred tax asset of approximately \$20.0 million, is approximately \$5.6 million related to tax benefits associated with the exercise of stock options, which will not result in a tax benefit in the consolidated statements of operations in future periods but, rather, will result in further increases to additional paid-in capital, if and when realized. Internal Revenue Code Section 382 rules limit the utilization of net operating losses upon a change of control of a company. Andrea has not performed an evaluation of whether a change of control has taken place, however, utilization of its net operating losses are likely subject to substantial limitation in future periods.

12. COMMITMENTS AND CONTINGENCIES**Leases**

In March 2005, Andrea entered into an assignment of lease and assumption agreement with respect to its previous corporate headquarters in Melville, New York. Under this agreement, Andrea vacated the premises on March 26, 2005 and the assignee took over the current lease, as amended. Andrea recorded a non-cash reversal of \$330,807 related to deferred rent charges, proceeds from the sale of property and equipment of \$9,000, a non-cash charge of \$33,281 related to the write off of certain property and equipment including leasehold improvements related to this operating lease and a cash charge of \$219,224 for lease termination costs. The net effect of these items of approximately \$112,000 is included in operating expenses for the year ended December 31, 2005. Rent expense under this operating lease was approximately \$0 and \$153,420 for the years ended December 31, 2006 and 2005, respectively.

Additionally, in March 2005 Andrea entered into a new lease for its new corporate headquarters located in Bohemia, New York, where Andrea leases space for warehousing, sales and executive offices from an unrelated party. The lease is for approximately 11,000 square feet and expires in April 2010. Rent expense under this operating lease was approximately \$78,911 and \$57,881 for the year ended December 31, 2006 and 2005, respectively.

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

As of December 31, 2006, the minimum annual future lease payments, under this lease and all other noncancellable operating leases, are as follows:

2007	\$ 99,807
2008	90,374
2009	89,557
2010	29,171
Total	\$ 308,909

ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2006

Employment Agreements

In June 2004, the Company entered into a one-year employment contract with the Chairman of the Board, Douglas J. Andrea, which automatically renewed for one additional one-year term and expired June 2006. Pursuant to this employment agreement, Mr. Andrea received an annual base salary of \$225,000 per annum, a minimum annual prorated bonus of \$50,000. Mr. Andrea was also entitled to a change in control payment equal to one time his base salary with continuation of health and medical benefits for one year in the event of a change in control and subsequent termination of employment other than for cause. In accordance with Amendment 1 of Mr. Andrea's employment agreement, Mr. Andrea did not receive a \$50,000 bonus for the periods ended December 31, 2005 and 2004, and instead is entitled to \$100,000 bonus when the Company has positive cash flows. At December 31, 2006, the future minimum cash commitments under this agreement aggregate \$115,000 (including the unpaid portion of Mr. Andrea's prorated 2006, 2005 and 2004 bonuses), which is included in other liabilities at December 31, 2006 and 2005.

In November 2006, the Company entered into a new employment agreement with Mr. Andrea. The employment agreement expires July 31, 2008 and is subject to renewal as approved by the Compensation Committee of the Board of Directors. Pursuant to his employment agreement, Mr. Andrea will receive an annual base salary of \$300,000 per annum. In addition, upon execution of the employment agreement, Mr. Andrea is entitled to a salary adjustment from August 1, 2006 through the date of the employment agreement. The employment agreement provides for quarterly bonuses equal to 25% of the Company's pre-bonus net after tax quarterly earnings in excess of \$25,000 for a total quarterly bonus amount not to exceed \$12,500; and annual bonuses equal to 10% of the Company's annual pre-bonus net after tax earnings in excess of \$300,000. All bonuses shall be payable as soon as the Company's cash flow permits. All bonus determinations or any additional bonus in excess of the above will be made in the sole discretion of the Compensation Committee. On November 2, 2006, in accordance with his employment agreement, Mr. Andrea was granted 1,000,000 stock options. This grant provides for a three year vesting period, an exercise price of \$0.12 per share, which was fair market value at the date of grant, and a term of 10 years. On November 16, 2006, in accordance with his employment agreement, Mr. Andrea was granted 1,000,000 stock options. This grant provides for a three year vesting period, an exercise price of \$0.12 per share, which was fair market value at the date of grant, and a term of 10 years. Mr. Andrea is also entitled to a change in control payment equal to two times his salary with continuation of health and medical benefits for two years in the event of a change in control. At December 31, 2006, the future minimum cash commitments under this agreement aggregate \$481,349, of which \$6,349 is included in other liabilities at December 31, 2006.

In November 1999, the Company entered into a change in control agreement with the Chief Financial Officer, Corisa L. Guiffre. This agreement provides for a change in control payment equal to three times her average annual compensation for the five preceding taxable years, with continuation of health and medical benefits for three years in the event of a change in control of the Company, as defined in the agreement, and subsequent termination of employment other than for cause.

Legal Proceedings

Andrea is involved in routine litigation incidental to the normal course of business. While it is not feasible to predict or determine the final outcome of the claims, Andrea believes the resolution of these matters will not have a material adverse effect on Andrea's financial position, results of operations or liquidity.

13. STOCK PLANS AND STOCK-BASED COMPENSATION

In 1991, the Board of Directors of Andrea (the Board) adopted the 1991 Performance Equity Plan (1991 Plan), which was approved by the shareholders. The 1991 Plan, as amended, authorizes the granting of awards, the exercise of which would allow up to an aggregate of 4,000,000 shares of Andrea's Common Stock to be acquired by the holders of those awards. Stock options granted to employees and directors under the 1991 Plan were granted for terms of up to 10 years at an exercise price equal to the market value at the date of grant. No further awards will be granted under the 1991 Plan.

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

In 1998, the Board adopted the 1998 Stock Option Plan (1998 Plan), which was subsequently approved by the shareholders. The 1998 Plan, as amended, authorizes the granting of awards, the exercise of which would allow up to an aggregate of 6,375,000 shares of Andrea s Common Stock to be acquired by the holders of those awards. The awards can take the form of stock options, stock appreciation rights, restricted stock, deferred stock, stock reload options or other stock-based awards. Awards may be granted to key employees, officers, directors and consultants. At December 31, 2006, there were 9,984 shares available for further issuance under the 1998 Plan.

In October 2006, the Board adopted the Andrea Electronics Corporation 2006 Equity Compensation Plan (2006 Plan), which was subsequently approved by the shareholders. The 2006 Plan authorizes the granting of awards, the exercise of which would allow up to

F-17

Table of Contents

ANDREA ELECTRONICS CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2006

an aggregate of 10,000,000 shares of Andrea's Common Stock to be acquired by the holders of those awards. The awards can take the form of stock options, stock appreciation rights, restricted stock or other stock-based awards. Awards may be granted to key employees, officers, directors and consultants. At December 31, 2006, there were 8,070,000 shares available for further issuance under the 2006 Plan.

During the years ended December 31, 2006 and 2005, pursuant to Andrea's compensation policy for outside directors, Andrea granted 166,668 shares of Common Stock with a fair market value of \$0.12 and 400,000 shares of Common Stock with a fair market value of \$0.05, respectively. Compensation expense related to these awards was \$20,000 and \$13,334 for the years ended December 31, 2006 and 2005, respectively.

On August 4, 2005, in accordance with his employment agreement, Mr. Andrea was granted 250,000 stock options. This grant provides for a six month vesting period, an exercise price of \$0.04 per share, which was fair market value at the date of grant, and a term of 10 years. The compensation expense related to the award was \$1,333 for the year ended December 31, 2006

On August 10, 2005, the Board granted 600,000 stock options to Mr. Andrea, 250,000 stock options to the Vice President and Chief Financial Officer, 815,000 stock options to employees of the Company, 300,000 stock options to outside directors and 120,000 stock options to an outside consultant. Each option grant provides for a three month vesting period, an exercise price of \$0.05 per share, which was fair market value at the date of grant, and a term of 10 years. The compensation expense related to the stock option grant to the outside consultant was \$6,000 for the year ended December 31, 2005.

On November 1, 2005, the Board granted 40,000 stock options to each chairperson on the Nominating and Audit Committees. The grants provide for a six-month vesting period, an exercise price of \$0.05 per share, which was fair market value at the date of grant, and a term of 10 years. The compensation expense related to these awards was \$2,667 for the year ended December 31, 2006.

In November 2006, in accordance with his employment agreement, Mr. Andrea was granted 2,000,000 stock options. These grants provide for three year vesting, an exercise price of \$0.12 per share, which was fair market value at the date of grant, and a term of 10 years. The compensation expense related to these awards was \$61,082 for the year ended December 31, 2006.

During 2006, the Board granted 400,000 stock options to the Vice President and Chief Financial Officer and 755,000 stock options to employees of the Company. Each option grant provides for vesting periods of up to three years, a weighted average exercise price of \$0.12 per share, the exercise price of each option grant was equal to the fair market value at the date of grant, and a term of 10 years. The compensation expense related to these awards was \$16,793 for the year ended December 31, 2006.

On November 16, 2006, the Board granted 16,667 stock options to each chairperson on the Nominating and Compensation Committees and 41,667 stock options to the chairperson on the Audit Committee. The grants provide for an eighteen-month vesting period, an exercise price of \$0.12 per share, which was fair market value at the date of grant, and a term of 10 years. The compensation expense related to these awards was \$1,832 for the year ended December 31, 2006.

Total compensation expense recognized related to stock option awards was \$83,707 and \$6,000 for the year ended December 31, 2006 and 2005, respectively. The 2005 expense is included in general, administrative and selling expenses in the accompanying consolidated statement of operations. In the accompanying consolidated statement of operations \$74,348 of the 2006 expense is included in general, administrative and selling expenses, \$8,668 is included in research and development expenses and \$691 is included in cost of revenues.

The fair values of the stock options granted were estimated on the date of grant using the Black-Scholes option-pricing model that uses the following weighted-average assumptions for the year ended December 31, 2006 and 2005:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2006

As of December 31, 2006, there was \$304,493 of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the 1998 and 2006 Plans. This unrecognized compensation cost is expected to be recognized over the next 3 years (\$193,801 in 2007, \$83,602 in 2008 and \$27,810 in 2009).

14. SEGMENT INFORMATION

Andrea follows the provisions of SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information. Reportable operating segments are determined based on Andrea's management approach. The management approach, as defined by SFAS No. 131, is based on the way that the chief operating decision-maker organizes the segments within an enterprise for making operating decisions and assessing performance. While Andrea's results of operations are primarily reviewed on a consolidated basis, the chief operating decision-maker also manages the enterprise in two segments: (i) Andrea DSP Microphone and Audio Software Products and (ii) Andrea Anti-Noise Products. Andrea DSP Microphone and Audio Software Products primarily include products based on the use of some, or all, of the following technologies: Andrea Digital Super Directional Array microphone technology (DSDA), Andrea Direction Finding and Tracking Array microphone technology (DFTA), Andrea PureAudio noise filtering technology, and Andrea EchoStop, an advanced acoustic echo cancellation technology. Our Andrea Anti-Noise Products include noise cancellation and active noise cancellation computer headset products and related computer peripheral products. The following represents selected consolidated financial information for Andrea's segments for the years ended December 31, 2006 and 2005:

	Andrea DSP Microphone and Audio Software Products	Andrea Anti- Noise Products	Total 2006
2006 Segment Data			
Net revenues from external customers	\$ 2,363,851	\$ 2,591,055	\$ 4,954,906

Edgar Filing: ANDREA ELECTRONICS CORP - Form 10KSB

Management of Andrea assesses assets and non-operating income statement data on a consolidated basis only. International revenues are based on the country in which the end-user is located. For the years ended December 31, 2006 and 2005, and as of each respective year-end, net revenues and accounts receivable by geographic area are as follows:

Geographic Data	2006	2005
Net Revenues:		
United States	\$ 2,923,120	\$ 3,948,569
Foreign ⁽¹⁾	2,812,170	359,416
	\$ 5,735,290	\$ 4,307,985
Accounts receivable:		
United States	\$ 231,416	\$ 579,892
Foreign	608,183	26,071
	\$ 839,599	\$ 605,963

-
- (1) Net revenue to the People's Republic of China and Singapore represented 21% and 11%, respectively of total net revenues for year ended December 31, 2006. Net revenues to any one foreign country did not exceed 10% of total net revenues for the year ended December 31, 2005.
