(I.R.S. Employer Identification No.)

One i2 Place
11701 Luna Road

75234
(Zip code)

Dallas, Texas
(Address of principal executive offices)

Registrant's telephone number, including area code: **(469) 357-1000**

Securities registered pursuant to Section 12(b) of the Act: **None**

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, \$0.00025 par value

Preferred Share Purchase Rights

(Title of Class)

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer (as defined in Rule 12b-2 of the Act).

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the common equity held by non-affiliates (affiliates being, for these purposes only, directors, executive officers and holders of more than 5% of the registrant's Common Stock) on June 30, 2006, was \$175.5 million.

As of March 1, 2007, the registrant had approximately 21,102,579 outstanding shares of Common Stock.

DOCUMENTS INCORPORATED BY REFERENCE

Selected designated portions of the registrant's definitive proxy statement to be filed on or before April 30, 2007 in connection with the registrant's 2007 Annual Meeting of Stockholders are incorporated by reference into Part III of this Annual Report.

Table of Contents

The disclosures set forth in this report are qualified by Item 1A, Risk Factors, and by the section captioned Forward-Looking Statements in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as other cautionary statements set forth elsewhere in this report.

References in this report to the terms optimal and optimization and words to that effect are not necessarily intended to connote the mathematically optimal solution, but may connote near-optimal solutions, which reflect practical considerations such as customer requirements as to response time, precision of the results and other commercial factors.

All references to common stock and per share amounts for periods prior to February 17, 2005 have been retroactively restated to reflect the 1-for-25 reverse stock split we implemented on February 16, 2005. See Item 5, Market For Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity.

ITEM 1. BUSINESS

Nature of Operations. We are a provider of supply chain management solutions, including various supply chain solutions consisting of software and service offerings. We operate our business in one business segment. Supply chain management is the set of processes, technology and expertise involved in managing supply, demand and fulfillment throughout divisions within a company and with its customers, suppliers and partners. The goals of our solutions include increasing supply chain efficiency and enhancing customer and supplier relationships by managing variability, reducing complexity, improving operational visibility, increasing operating velocity and integrating planning and execution. Our offerings are designed to help customers better achieve the following critical business objectives:

Visibility a clear and unobstructed view up and down the supply chain

Planning supply chain optimization to match supply and demand considering system-wide constraints

Collaboration interoperability with supply chain partners and elimination of functional silos

Control management of data and business processes across the extended supply chain

Our application software is often bundled with other product offerings we provide such as business optimization and technical consulting, training, solution maintenance, software upgrades and development.

Globally, we have approximately 500 customers in a variety of industries including:

Technology

Computer & Electronics

Telecommunications Equipment and Services

Semiconductor

Consumer Electronics & Consumer Durables

Contract Manufacturers

Automotive, Aerospace and Industrial

Automotive Original Equipment Manufacturers

Suppliers

Aerospace and Defense

Industrial Manufacturers

Process Industries

Metals

Table of Contents

Consumer Industries & Retail

Retailers

Consumer Packaged Goods

Soft Goods (Textiles/Apparel & Footwear)

No individual customer accounted for more than 10% of our total revenues during 2006, 2005 or 2004.

i2 was founded in 1988 and incorporated in Delaware in 1989. Our executive offices are located at One i2 Place, 11701 Luna Road, Dallas, Texas 75234, and our telephone number is (469) 357-1000.

Industry Background

Today's competitive business environment has led many companies in diverse industries to seek ways to make their businesses more agile and offer greater operating efficiency while improving flexibility and responsiveness to changing market conditions. Many companies are facing higher competitive standards as the economy becomes more consumer-driven. Consumers are increasingly more specific about when and where they want a product, what they want that product to be and do, and the price they will pay for a product. These demands impact the extended supply chain, leading businesses to seek improvements in asset utilization, lower the cost of goods, reduce inventories, shorten lead times and reduce the cost of fulfilling orders. Furthermore, a company's extended supply chain may span multiple continents, requiring suppliers in one part of the world to collaborate with a plant in another to serve customers in yet a third location. These forces are prompting companies to collaborate with a broad range of suppliers and customers to improve visibility and efficiency across multi-enterprise supply chains.

We believe that traditional enterprise resource planning (ERP) systems fail to provide both the forward visibility across divisions or enterprises and the high-speed decision-support capabilities that we believe are necessary to quickly plan and execute decisions. To increase competitiveness, we believe companies are looking for solutions that can be integrated with their existing systems to provide tools for managing the variability in their supply chains, allowing them to monitor events throughout the life of a product, from the point of order, through manufacturing and distribution and until it reaches a customer's hands. Companies need visibility into order, inventory and transportation systems so they can evaluate tradeoffs for fast and accurate decision-making and execute their plans across the critical processes in their supply chains.

The growth of the internet and the proliferation of software applications have accelerated many companies' efforts to increase efficiencies by leveraging information technology based on open standards. We believe this has prompted demands for a dynamic, open and integrated environment among customers, suppliers and designers. In response to these evolving market forces, many companies have sought to re-engineer their business processes to reduce manufacturing cycle times, shift from mass production to order-driven manufacturing, increase the use of outsourcing and share information more readily with vendors and customers.

Integration and business process management have become an increasingly important issue for enterprises to lower costs and realize value from their diverse environment of applications and distributed systems. Customers seek integration at several levels—business process (design, execution and monitoring), applications, user interface, data and technology. A wide variety of companies are pursuing the integration market opportunity, including ERP companies, leading Independent Software Vendors (ISVs), Enterprise Application Integration (EAI) vendors, Systems Integrators (SIs) and other information technology (IT) services organizations, but no single company has demonstrated a complete solution to the various requirements sought by customers. i2 provides a single design, development and integration framework utilizing service oriented architecture—the i2 Agile Business Process Platform.

Leading software and technology companies are developing offshore (global) workforces, in part to take advantage of the technical talent and lower costs of human resources in India, China and other locations. This has led many companies to initiate their own offshore operations or outsource some development and implementation activities to Offshore IT Services (OIS) firms.

Table of Contents

Development of the i2 Solutions

Advanced Planning and Scheduling. We have offered a set of supply chain management solutions since our company was founded nearly 19 years ago. Our founders, Sanjiv Sidhu and Ken Sharma, sought to expand enterprise application software beyond traditional ERP systems, which were basically transaction accounting and processing systems that did not consider production constraints or offer more sophisticated monitoring, decision-support and execution capabilities. We took the first step beyond ERP with the development of an advanced planning and scheduling application that took into account actual constraints to improve the flow of materials within a factory. That solution, i2 Factory Planner, has assisted many of our customers in improving the efficiency and profitability of their factories while reducing their materials and inventory costs.

Supply Chain Planning/Supply Chain Management. Our applications evolved into solutions for supply chain planning that encompassed constraint-based planning and scheduling for multiple factories, distribution centers and warehouses. With the addition of supply chain design and execution capabilities for logistics, demand planning and fulfillment, we became a leader in enterprise solutions for supply chain management.

Supplier Relationship Management. We continued to expand our product base by applying our solutions for the extended supply chain to the supplier relationship processes and functions. To facilitate cost-effective sourcing and product design, we acquired and developed technologies that help customers to more efficiently source, negotiate the pricing of and procure materials and components from suppliers, thereby enabling them to make design decisions while cognizant of the effect on the supply chain of existing products and the total product portfolio.

Distributed Fulfillment and Revenue Management. Our distributed order execution technology has enabled us to develop integrated, closed-loop planning and execution solutions. These solutions are designed to help companies support an order from anywhere, fulfill from anywhere, return to anywhere strategy to meet the demands of dynamic multi-channel selling models. We continue to invest in this technology, which provides a scalable and flexible framework for creating new solutions and is used by our customers across multiple entities for transaction processing, visibility and event management capabilities. We have also invested in solutions that help customers optimize merchandising, revenue and pricing.

Supply and Demand Synchronization. i2's new-generation supply chain management solutions focus on the multi-echelon value chain, encompassing the customer's customer and the supplier's supplier. Our new-generation solutions are designed to enable businesses to manage and tune their supply chains simultaneously so that they can quickly change parameters to meet their dynamic business needs. These solutions are built on the i2 Agile Business Process Platform, a unique service-oriented architecture (SOA) that includes a layer of technology services for integration and data management, user interface development and a visual business process workflow engine. The platform is business process management (BPM) compliant and has been designed to interoperate with legacy, ERP and other enterprise architectures.

Products

Our solutions bundles of software products and technology services are designed to help customers address various supply chain problems and opportunities, including:

Linking certain aspects of planning and decision-making to execution of such plans and the monitoring of changing conditions across the supply chain

Improving current business processes, return on assets and profitability

Creating an environment for continuous process improvement

Improving customer service levels and delivering on commitments to customers

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

Enhancing competitive advantage

Increasing market share

Enhancing time to value for process redesign and acquisition integration

3

Table of Contents

Our primary products are focused on optimizing the following business processes: manufacturing and planning; transportation and distribution management; execution, collaboration and visibility; supplier relationship management; as well as data management and business analytics. Our products are complemented by our business process consulting and our technology and services.

Manufacturing and Planning: i2 solutions for manufacturing and planning help businesses coordinate the production and distribution of goods and materials throughout the supply chain to final delivery to the customer. They also help businesses analyze their revenues with merchandising, planning and pricing tools.

Solutions for supply planning are designed to provide multi-enterprise visibility, collaboration, decision-support and execution capabilities. Using these tools, a business may estimate future demand for its products to help planners more accurately estimate future supply needs. As a result, businesses can make better decisions about how much of what products to make, when and where to make them, and what parts to utilize to make those products. Solutions for supply planning include i2 Factory Planner, i2 Supply Chain Planner, i2 Inventory Optimization and various scheduling products.

Solutions for demand management and retail management provide tools designed to forecast and continuously manage demand, plan merchandising strategies, manage markdowns and promotions pricing, and optimize price quoting. Using these products, companies can begin to optimize their revenues by selling products at prices set by analytic products. Demand management products include i2 Demand Manager, i2 Markdown Optimizer, i2 Merchandise Planner, i2 Inventory Optimization, i2 Sales and Operations Planning, i2 Merchandise Financial Planning, i2 Buying and Assortment Management, and i2 Allocation and Replenishment.

Transportation and Distribution Management: Solutions for transportation and distribution management help businesses optimize the flow of goods between suppliers, enterprise supply chain locations and customers. These tools provide integrated products for planning and executing transportation and distribution activities, as well as tools for strategic supply chain design and transportation modeling. Using i2 solutions, a business can procure, plan, execute and monitor freight movements across multiple modes, borders and enterprises. As a result, businesses can make better decisions about where and how to ship products, reducing their transportation costs while executing supply chain plans and achieving customer service objectives. Transportation and distribution management products include i2 Supply Chain Strategist, i2 Transportation Bid Collaboration, i2 Transportation Planner, i2 Transportation Modeler, i2 Transportation Manager and i2 New-Generation Transportation.

Execution, Collaboration and Visibility: Solutions to optimize plan execution and collaboration help businesses integrate the planning and execution processes, creating a closed-loop environment. These solutions provide tools designed to stage inventory, plan replenishment, manage orders and provide visibility to lower fulfillment costs, improve on-time delivery performance and enhance customer satisfaction. The i2 Collaborative Supply Execution solution is designed to provide inventory and plan collaboration, transaction processing, visibility, event management, integration and workflow capabilities. Other solutions in this category include i2 Supply Chain Visibility, i2 Customer Order Management, i2 Collaborative Replenishment and i2 Configurator.

Supplier Relationship Management: Supplier relationship management solutions help companies and their suppliers collaborate on sourcing and procurement for supply management. This solution is designed to bridge product development, sourcing, supply planning and procurement across the supply chain, providing the ability to create, execute and sustain global sourcing strategies. Sourcing solutions provide decision-support and optimization tools that are designed to help companies improve decision-making on supplies and the parts to use in products. During product development, these products can help to optimize designs by considering sourcing and supply chain constraints, as well as allowing design collaboration when outsourcing manufacturing or custom parts. During procurement, supplier relationship management solutions help companies to define sourcing strategies to reduce supply risks and costs, negotiate terms and streamline the requisitioning and buying of materials. Sourcing products include i2 Strategic Sourcing, i2 Product Sourcing and i2 Negotiate.

Data Management: We offer a data management solution that is designed to provide customers with the ability to manage data from multiple sources including legacy, ERP and other applications. i2 Master Data

Table of Contents

Management can be deployed: to create and maintain application-specific data; to consolidate data from multiple disparate sources; to cleanse, transform, synchronize and validate data; as well as to filter unwanted data. Other data management products include i2 MDM Enterprise, i2 Product Management and i2 Vendor Management.

On-Demand and Software as a Service: i2 offers several on-demand and software as a service (SaaS) solutions. i2 FreightMatrix uses private branded internet marketplaces in which companies gain access to i2's broad logistics footprint in a secure private-labeled, shared-hosting environment, allowing companies to reduce costs, increase efficiencies and manage their supply chain, or their customer's supply chain, online. With i2 Multi-Enterprise Interactive, i2 provides data center services along with hardware and software required to operate the solution. The solution can be tailored to each customer's requirements and is backed by service-level agreements.

In the old generation of supply chain management, process had to adapt to the software. In the new generation of supply chain management, the software adapts to the process. We offer new-generation supply chain management solutions that enable companies to take control of their extended supply chain horizontally with their trading partners and vertically within their enterprise. New-generation solutions provide: (1) visibility across the extended value chain, (2) demand-driven and demand-shaping planning strategies, (3) deep operational collaboration, as well as (4) closed-loop control and synchronization of planning and execution. i2 New-Generation Supply Chain Management solutions are built on the i2 Agile Business Process Platform, a service-oriented architecture (SOA) that includes a layer of technology services and a business process workflow engine. The platform is business process management (BPM) compliant and interoperates with legacy, ERP and other enterprise architectures. The i2 Business Content Library is a collection of i2 workflows and solutions that have incorporated best practices for business processes and can be accessed via the i2 Agile Business Process Platform. These workflows enable systems and individuals to interact and collaborate to do a piece of standardized work. The workflows can be implemented on top of a company's pre-existing IT systems and applications.

Product Development

We focus our ongoing product development efforts on meeting the requests of, and delivering on our commitments to, our current customers, enhancing our solutions and the underlying technology across our products, and developing or enhancing products that will enable us to enter new markets. In order to address customer recommendations, we have developed a User Enhancement Voting Process in collaboration with the i2 User Group. This process allows customers to provide input so that our solutions evolve to meet our customers' business challenges and opportunities. In addition, we invest in solutions that help us more fully complete our solution offerings and enable cross-product workflows. We have continued to invest in products and technologies that we anticipate will be important and differentiated in the future.

Our Solutions Operations activities are primarily conducted in North America and India. Most product management and product marketing employees are based in North America, but many development and services teams are based in India. The India location offers many benefits to i2, including centralization of development efforts and cost structure advantages. For the years ended December 31, 2006, 2005 and 2004, our research and development expense totaled approximately \$35.2 million, \$37.3 million and \$56.3 million, respectively.

Services and Maintenance

Our customer service and support program includes software maintenance, the delivery of functional enhancements and updates, and around-the-clock availability for high severity issues.

We maintain a technical support team that operates through our service and support centers located in North America, Latin America, Greater Asia Pacific, Europe and Africa. Our customer service and support activities consist of the following:

Consulting Services. We offer our customers both on-site and off-site consulting services for assisting in the implementation of our products and services and integration with the customers' existing systems. We and our customers also use third-party consulting firms.

Table of Contents

Development Services. Customers may also contract with us for services to provide custom development of our applications. In some cases, the modifications or additions to the software may be incorporated into future releases of our products.

Managed Services. We offer our customers outsourced supply chain management planning services providing reports, analysis and recommendations in the on-going operation of business processes.

Training. We offer education and training programs for our customers and third-party implementation providers with classes offered at our offices or at customer locations. We also offer web-based and self-paced learning programs. These classes focus on the fundamental principles of our software products as well as their implementation and use.

Maintenance and Product Updates. We provide ongoing support services for our products. Maintenance contracts are typically sold to customers at the time of the initial license and may be renewed for additional periods. Our maintenance agreements with our customers provide the right to receive most product updates and enhancements to the products purchased by the customer, as well as telephone and online support. Our support services are packaged into three tiers (silver, gold and platinum), which offer customers the ability to choose the level of service they desire.

Sales and Marketing

We sell our software and services through a direct customer-facing organization that is augmented by other sales channels, including systems consulting and integration firms and other industry-related partners. Our direct customer-facing organization consists of account representatives and client managers that are supported by a team of personnel that includes solution and industry specialists.

We currently have joint marketing agreements with software vendors and other industry-related firms such as IBM and Microsoft. Additionally, we have alliances with top global and regional systems consulting and integration, hardware, software, and other relevant services firms including Accenture, IBM Global Services, Infosys and Tata Consulting Services, among others. These joint-marketing agreements and alliances generally provide the vendors with the ability to market our products and access our marketing materials and product training. By using these indirect sales channels, we seek to capitalize on the installed base of other companies and obtain favorable product recommendations from the business partners, thereby increasing the market coverage of our products.

In addition, we have a partner program with Value Added Resellers (VARs) to serve mid-market customers, provide increased coverage around the world and expand into new industries.

Competition

The markets in which we operate are highly competitive. Our competitors are diverse and offer a variety of solutions targeting various segments of the extended supply chain as well as the enterprise as a whole. Some competitors compete with suites of applications, while most offer solutions designed specifically to target particular functions or industries. We believe our principal competitors are as follows:

ERP Software Vendors. These include companies such as Oracle and SAP, which have added or are attempting to add capabilities for supply chain planning or collaboration to their transaction system products. In addition, both companies are engaged in a multi-year effort to re-deploy their solutions on a Service Oriented Architecture platform.

Other Software Vendors. These include companies such as Adexa which compete principally with our production, logistics and fulfillment optimization products; companies such as Red Prairie, Manhattan Associates and JDA Software which compete with our transportation and distribution management products; companies such as JDA Software which compete primarily with our retail applications; and companies such as Manhattan Associates and Kinaxis which compete principally with our fulfillment and certain of our demand optimization products.

Table of Contents

Custom and Offshore Development. Increasingly we compete with internal development efforts by corporate IT departments. Additionally, we also compete with independent developers of enterprise application software such as Infosys, Satyam, Wipro and other entities in countries with relatively low wage structures.

Proprietary Rights and Licenses

We regard our trademarks, copyrights, patents, trade secrets, technology and other proprietary rights as critical to our business. To protect our proprietary rights, we primarily rely on a combination of copyright, patent, trademark and trade secret laws, confidentiality procedures and contractual provisions. We license our software products in object code (machine-readable) format to customers under license agreements and we generally do not sell or otherwise transfer title to our software products to our customers. Our non-exclusive license agreements generally allow the use of our software products solely by the customer for specified purposes without the right to sublicense or transfer our software products.

Trademarks are important to our business as we use them in our marketing and promotional activities as well as with the delivery of our software products. Our registered trademarks include i2, i2 and the i2 logo and PLANET.

We hold over 100 U.S. patents and have more than 100 pending patent applications. These patents predominantly relate to planning, scheduling optimization, demand fulfillment, collaboration, e-commerce and data management and reporting. These patents expire at various times through 2021. We also depend on trade secrets and proprietary know-how for certain unpatented aspects of our business. To protect our proprietary information, we enter into confidentiality agreements with our employees, consultants and licensees, and generally control access to and distribution of our proprietary information. We sublicense some software that we license from third parties and incorporate in, or license in conjunction with, our products.

In connection with our efforts to protect our proprietary rights, on September 5, 2006, we announced that we had filed a lawsuit against SAP AG and SAP Americas, Inc. The lawsuit, filed in the United States District Court for the Eastern District of Texas, alleges infringement of seven patents related to supply chain management.

International Operations

We have international offices in Australia, Belgium, Canada, China, Finland, France, Germany, India, Japan, Korea, Netherlands, Singapore, South Africa, Taiwan and the United Kingdom. Total assets related to our international operations accounted for 34%, 37% and 32% of our total consolidated assets as of December 31, 2006, 2005 and 2004, respectively. International revenue totaled \$120.3 million, or 43% of total revenue, in 2006; \$158.2 million, or 47% of total revenue, in 2005; and \$144.8 million, or 40% of total revenue, in 2004. See *Note 14 Segment Information, International Operations and Customer Concentrations* in our Notes to Consolidated Financial Statements.

Employees

At December 31, 2006, we had approximately 1,340 full-time employees. Our future success depends in significant part upon the continued service of our key technical, sales and senior management personnel and our ability to attract, train and retain other highly qualified personnel.

Our employees in Germany are represented by a Works Council. Although there are no formal employee representative bodies in other countries, the employees of certain of our foreign subsidiaries are covered by national, regional or sectoral collective agreements as required by statute or standard local practice.

We have never experienced a work stoppage. We believe employee relations to be satisfactory.

Table of Contents

Seasonality

We typically experience lower bookings, revenue and cash collections during the first and third quarters of each year.

Available Information

We make available, free of charge, through our investor relations web site, our reports on Forms 10-K, 10-Q and 8-K, and amendments to those reports, as soon as reasonably practicable after they are filed with the Securities and Exchange Commission (SEC). The address for our investor relations web site is <http://www.i2.com/investor>.

The information contained on our website is not part of, and is not incorporated in, this or any other report we file with or furnish to the SEC.

In June 2003, we adopted a Code of Business Conduct and Ethics. The Code of Business Conduct and Ethics applies to, among others, our Chief Executive Officer and Chief Financial Officer. The full text of the Code of Business Conduct and Ethics is available at our investor relations web site, <http://www.i2.com/investor>. We intend to disclose any amendment to, or waiver from, a provision of the Code of Business Conduct and Ethics that applies to our Chief Executive Officer or Chief Financial Officer on our investor relations web site.

Item 1A. RISK FACTORS

Any investment in our company will be subject to risks inherent to our business. Before making an investment decision, you should carefully consider the risks described below together with all of the other information included in this report. The risks and uncertainties described below are not the only ones facing our company. Additional risks and uncertainties that we are not aware of or focused on or that we currently deem immaterial may also impair our business operations. This report is qualified in its entirety by these risk factors.

If any of the following risks actually occur, they could have a material adverse effect on our business, financial condition, cash flow or results of operations. In that case, the trading price of our securities could decline and you may lose all or part of your investment.

Risks Related To Our Business

Our Financial Results Have Varied And May Continue To Vary Significantly From Quarter To Quarter And We May Fail To Meet Analysts And Investors Expectations.

Our operating results have varied significantly from quarter to quarter in the past, and we expect our operating results to continue to vary from quarter to quarter in the future due to a variety of factors, some of which are outside of our control. Although our revenues are subject to fluctuation, significant portions of our expenses are not variable in the short term, such as our lease and purchase commitments. If we cannot reduce expenses quickly to respond to decreases in revenues, a revenue shortfall is likely to adversely and disproportionately affect our operating results. These factors have caused our operating results to be below the expectations of securities analysts and investors in the past and may do so again in the future.

We Have Historically Experienced Negative Cash Flows. A Failure To Maintain Profitability And Achieve Consistent Positive Cash Flows Would Have A Significant Adverse Effect On Our Business, Impair Our Ability To Support Our Operations And Adversely Affect Our Liquidity.

We experienced negative cash flows during the quarter ended September 30, 2006, the quarter ended March 31, 2006 and each of the five years ended December 31, 2005, primarily due to sharp declines in our revenues and our historical inability to reduce our expenses to a level at or below the level of our revenues. A failure to maintain profitability and achieve consistent positive cash flows could impair our ability to support our operations, adversely affect our liquidity and threaten our ability to repay our debts when they come due.

Table of Contents

Negative cash flows and the adverse market perception associated therewith may negatively affect our ability to sell our products and maintain existing customer relationships, and may adversely affect our ability to obtain additional debt or equity financing on advantageous terms. There can be no assurance that we will be successful in obtaining or maintaining an adequate level of cash resources and we may be forced to act more aggressively in the future in the area of expense reduction in order to conserve cash resources.

We May Require Additional Private Or Public Debt Or Equity Financing. Such Financing May Only Be Available On Disadvantageous Terms, Or May Not Be Available At All. Any New Financing Could Have A Substantial Dilutive Effect On Our Existing Stockholders.

At December 31, 2006, we had cash and cash equivalents of \$109.4 million and a working capital balance of \$17.4 million. Our cash position may decline in the future, and we may not be successful in maintaining an adequate level of cash resources.

We had \$86.3 million in face value of our 5% senior convertible notes outstanding as of December 31, 2006. Holders of our 5% senior convertible notes have the right to require us to repurchase all or any portion of the senior convertible notes on November 15, 2010 and may convert the senior convertible notes at any time on or after May 15, 2010. In addition, holders of the senior convertible notes may convert the senior convertible notes prior to May 15, 2010 upon the occurrence of any of the following events:

if the senior convertible notes have been called for redemption;

upon certain dividends or distributions to all holders of our common stock;

upon the occurrence of specified corporate transactions constituting a fundamental change (the occurrence of a change in control or a termination of trading, each as defined in the indenture governing our senior convertible notes);

if the average of the trading prices for the senior convertible notes during any five consecutive trading-day period is less than 98% of the average of the conversion values for the senior convertible notes (the product of the last reported sale price of our common stock and the conversion rate) during that period; or

at any time after May 15, 2008 if the closing sale price of our common stock is equal to or greater than \$23.21 for at least 20 trading days in the 30 consecutive trading day period ending on the last trading day of the immediately preceding fiscal quarter.

Upon conversion of the senior convertible notes, we will be required to satisfy our conversion obligation with respect to the principal amount of the senior convertible notes to be converted in cash, with any remaining amount to be satisfied in shares of our common stock.

We may be required to seek private or public debt or equity financing in order to support our operations, satisfy the conversion obligation with respect to our senior convertible notes and/or repay our senior convertible notes. The debt incurrence restrictions imposed by the indenture governing our senior convertible notes could restrict or impede our ability to incur additional debt. We may not be able to obtain additional debt or equity financing on satisfactory terms, or at all, and any new financing could have a substantial dilutive effect on our existing stockholders.

Our 5% Senior Convertible Notes Contain Covenants That Restrict The Incurrence Of Additional Indebtedness.

The indenture governing our 5% senior convertible notes contains a debt incurrence covenant that places restrictions on the amount and type of additional indebtedness that we can incur. Such covenant specifies that we shall not, and that we shall not permit any of our subsidiaries to, directly or indirectly, incur or guarantee or assume any indebtedness other than permitted indebtedness. Permitted indebtedness is defined in the indenture

Table of Contents

to include, among others, the following categories of indebtedness: (i) all indebtedness outstanding on November 23, 2005; (ii) indebtedness under our 5% senior convertible notes; (iii) indebtedness under our \$15.0 million letter of credit line; (iv) between \$25.0 million and \$50.0 million of additional senior secured indebtedness (the maximum permitted amount to be determined by application of a formula contained in the indenture); and (v) at least \$100.0 million of additional subordinated indebtedness (the maximum permitted amount to be determined by application of a formula contained in the indenture). The debt incurrence restrictions imposed by the indenture governing our senior convertible notes could restrict or impede our ability to incur additional debt, which in turn could impair our ability to support our operations, adversely affect our liquidity and threaten our ability to repay our debts when they become due.

If We Are Unable To Develop And Generate Additional Demand For Our Products, Serious Harm Could Result To Our Business.

We have invested significant resources in developing and marketing our products and services. The demand for, and market acceptance of, our products and services is subject to a high level of uncertainty. Adoption of software solutions, particularly by those individuals and enterprises that have historically relied upon traditional means of commerce and communication, requires a broad acceptance of substantially different methods of conducting business and exchanging information. Our products and services are often considered complex and may involve a new approach to the conduct of business by our customers. As a result, intensive marketing and sales efforts may be necessary to educate prospective customers regarding the uses and benefits of these products and services in order to generate additional demand. The market for our products and services may weaken, competitors may develop superior products and services or we may fail to develop acceptable solutions to address new market conditions. Any one of these events could have a material adverse effect on our business, results of operations, cash flow and financial condition.

We May Not Be Competitive, And Increased Competition Could Seriously Harm Our Business.

Relative to us, some of our competitors have one or more of the following advantages:

Longer operating history

Greater financial, technical, marketing, sales and other resources

More consistent positive cash flows

Longer history of profitable operations

Greater name recognition

A broader range of products to offer

Better product functionality and performance in certain areas

A larger installed base of customers

Current and potential competitors have established, or may establish, cooperative relationships among themselves or with third parties to enhance their products, which may result in increased competition. In addition, we expect to experience increasing price competition as we compete for market share. We understand that some competitors are offering enterprise application software at no charge as components of product bundles. Further, traditional enterprise resource planning vendors have focused more resources on the development and marketing of enterprise application software, particularly in the product and industry segments in which we compete, and, increasingly, corporate information technology departments are undertaking internal development efforts. As a result of these and other factors, we may be unable to compete

successfully with our existing or new competitors.

Table of Contents

We Have Been And Continue To Be Subject To Product Quality And Performance Claims And Other Litigation, Which Could Seriously Harm Our Business.

From time to time, customers make claims pertaining to the quality and performance of our software and services, citing a variety of issues. Whether customer claims regarding the quality and performance of our products and services are founded or unfounded, they may adversely impact customer demand and affect the market perception of our company, our products and our services. Any such damage to our reputation could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Our software products generally are used by our customers in mission-critical applications where component failures or software errors could cause significant damages. Although we conduct testing and quality assurance through a release management process, we may not discover errors until our customers install and use a given product or until the volume of services that a product provides increases. Errors could result in loss of customers and reputation, adverse publicity, loss of revenues, delays in market acceptance, diversion of development and consulting resources and claims against us by customers. To mitigate this exposure, our license agreements typically seek to limit our exposure to product liability claims from our customers. However, these contract provisions may not preclude all potential claims. Additionally, our insurance policies may be inadequate to protect us from all liability that we may face. Product liability claims could require us to spend significant time and money in litigation or to pay significant damages. As a result, any claim, whether or not successful, could harm our reputation and have a material adverse effect on our business, results of operations, cash flow and financial condition.

On March 7, 2007, a purported shareholder derivative lawsuit was filed in the Delaware Chancery Court against certain of our current and former officers and directors, naming the company as a nominal defendant. The complaint alleges breach of fiduciary duty and unjust enrichment in connection with stock option grants to certain of the defendant officers and directors on three dates in 2004 and 2005. The complaint states that those stock option grants were manipulated so as to work to the recipients' favor when material non-public information about the company was later disclosed to positive or negative effect. The complaint is derivative in nature and does not seek relief from the company, but does seek damages and other relief from the defendant officers and directors. We have entered into indemnification agreements in the ordinary course of business with certain of the defendant officers and directors and may be obligated throughout the pendency of this action to advance payment of legal fees and costs incurred by the defendants pursuant to our obligations under the indemnification agreements and/or applicable Delaware law.

We may face other claims and litigation in the future that could harm our business and impair our liquidity. Defending against existing and potential litigation and other proceedings may continue to require us to spend significant time and money and to pay significant damages. We cannot assure you that the time, effort and financial resources that could be required will not adversely affect our business, results of operations, cash flow and financial condition.

The Loss Of Key Personnel Or Our Failure To Attract Additional Personnel Could Seriously Harm Our Company.

We rely upon the continued service of a relatively small number of key technical, sales and senior management personnel. However, our employees can typically resign with little or no previous notice and our voluntary attrition rate is believed to be higher than the software industry's average. Our future success depends on our ability to retain our key employees and to attract, train and retain other highly qualified personnel. Our loss of any of our key employees or our inability to attract, train and retain other highly qualified personnel could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Table of Contents

Because Our Software Products Are Intended To Work Within Complex Business Processes, Implementation Or Upgrades Of Our Products Can Be Difficult, Time-Consuming And Expensive, And Customers May Be Unable To Implement Or Upgrade Our Products Successfully Or Otherwise Achieve The Benefits Attributable To Our Products. This May Result In Customer Dissatisfaction, Harm To Our Reputation And Cause Non-Payment Issues.

Our products typically must integrate with the many existing computer systems and software programs of our customers. This can be complex, time-consuming and expensive, and may cause delays in the deployment of our products. As a result, some customers may have difficulty implementing our products successfully or otherwise achieving the benefits attributable to our products. Delayed or ineffective implementation or upgrades of our software and services may limit our future sales opportunities, impact revenues, result in customer dissatisfaction and harm to our reputation, or cause non-payment issues.

Failure To Complete Development Projects As Planned Could Harm Our Operating Results And Create Business Distractions And Negative Publicity That Could Harm Our Business.

Risks associated with our software solutions and other development projects include, but are not limited to:

Customers may withhold cash payments or cancel contracts if we fail to meet our delivery commitments, the customers have financial difficulties or change strategy, or the functionality delivered is not acceptable to the customers. We are particularly susceptible to this with respect to arrangements where payments are scheduled to occur later in the engagement.

The cancellation or scaling back of one or more of our larger software solutions or other development projects could have a material adverse impact on future software solutions revenues.

We may be unable to recognize revenue associated with software solutions and other development projects in accordance with expectations. We generally recognize revenue from software solutions and other development projects over time using the percentage of completion method of contract accounting. Failure to complete project phases in accordance with the overall project plan can create variability in our expected revenue streams if we are not able to recognize revenues related to particular projects because of delays in development.

Many of our software solutions and other development projects are fixed-price arrangements. If we fail to accurately estimate the resources required for a fixed-price project or the customer attempts to change the scope of the project, the profit, if any, realized from the project would be adversely affected to the extent that we have to add additional resources to complete the project.

If We Fail To Adequately Protect Our Intellectual Property Rights Or Face A Claim Of Intellectual Property Infringement By A Third Party, We Could Lose Our Intellectual Property Rights Or Be Liable For Significant Damages.

We rely primarily on a combination of copyright, trademark and trade secret laws, confidentiality procedures and contractual provisions to protect our proprietary rights. However, unauthorized parties may attempt to copy aspects of our products or to obtain and use information that we regard as proprietary. Policing unauthorized use of our products is difficult, and we cannot be certain that the steps we have taken will prevent misappropriation of our intellectual property. This is particularly true in India, where a significant portion of our Solutions Operations are located, and other foreign countries such as China and Russia where the laws do not protect proprietary rights to the same extent as the laws of the United States and may not provide us with an effective remedy against piracy. The misappropriation or duplication of our intellectual property could disrupt our ongoing business, distract our management and employees, reduce our revenues and increase our expenses. In connection with our efforts to protect our proprietary rights, on September 5, 2006 we filed a lawsuit against SAP AG and SAP Americas, Inc. alleging infringement of seven patents related to supply chain management. This and any other litigation to defend our intellectual property rights could be time-consuming and costly.

Table of Contents

There has been a substantial amount of litigation in the software industry regarding intellectual property rights. As a result, we may be subject to claims of intellectual property infringement. Although we are not aware that any of our products infringe upon the proprietary rights of third parties, third parties may claim infringement by us with respect to current or future products. Any infringement claims, with or without merit, could be time-consuming, result in costly litigation or damages, cause product shipment delays or the loss or deferral of sales, or require us to enter into royalty or licensing agreements. If we enter into royalty or licensing agreements in settlement of any litigation or claims, these agreements may not be on terms favorable to us. Unfavorable royalty and licensing agreements could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Serious Harm To Our Business Could Result If Our Encryption Technology Fails To Ensure The Security Of Our Customers Online Transactions.

The secure exchange of confidential information over public networks is a significant concern of consumers engaging in on-line transactions and interaction. Some of our software applications use encryption technology to provide the security necessary to effect the secure exchange of valuable and confidential information. Advances in computer capabilities, new discoveries in the field of cryptography or other events or developments could result in a compromise or breach of the algorithms that these applications use to protect customer transaction data. If any compromise or breach were to occur, it could have a material adverse effect on our business, results of operations, cash flow and financial condition.

We Are Dependent On Third-Party Software That We Incorporate Into And Include With Our Products And Solutions, And Impaired Relations With These Third Parties, Defects In Third-Party Software Or The Inability To Enhance Their Software Over Time Could Harm Our Business.

We incorporate and include third-party software into and with certain of our products and solutions. Additionally, we may incorporate and include additional third-party software into and with our products and solutions in future product offerings. The operation of our products could be impaired if errors occur in the third-party software that we utilize. It may be more difficult for us to correct any defects in third-party software because the development and maintenance of the software is not within our control. Accordingly, our business could be adversely affected in the event of any errors in this software. There can be no assurance that these third parties will continue to make their software available to us on acceptable terms, to invest the appropriate levels of resources in their products and services to maintain and enhance the software capabilities, or to remain in business. Further, it may be difficult for us to replace any third-party software if a vendor seeks to terminate our license to the software or our ability to license the software to customers. Any impairment in our relationship with these third parties could have a material adverse effect on our business, results of operations, cash flow and financial condition.

We Face Risks Associated With International Sales And Operations That Could Harm Our Company.

International revenues accounted for approximately 43% of our total revenues during 2006, and we expect to continue to generate a significant portion of our revenues from international sales in the future. Our international operations are subject to risks inherent in international business activities, including the tendency of markets outside of the U.S. to be more volatile and difficult to forecast than the U.S. market. Any of the following factors, among other things, could adversely affect the success of our international operations:

Difficulties and costs of staffing and managing geographically disparate operations

Extended accounts receivable collection cycles in certain countries

Compliance with a variety of foreign business practices, laws and regulations

Overlap of different tax structures and regimes, including transfer pricing

Meeting import and export licensing requirements

Trade restrictions

13

Table of Contents

Changes in tariff and tax rates

Changes in general economic and political conditions in international markets

In addition, we conduct a large portion of our software solutions development and services operations in India. The distributed nature of our development and consulting resources could create operational challenges and complications since we have a heightened risk exposure to changes in the economic, security and political conditions of India. Operational issues, recruiting and retention issues, ability to obtain work permits, economic and political instability, military actions and other unforeseen occurrences in India could impair our ability to develop and introduce new software applications and functionality in a timely manner, or hinder our ability to provide cost-competitive services, either of which could put our products at a competitive disadvantage and cause us to lose existing customers or fail to attract new customers.

We May Make Future Acquisitions Or Enter Into Joint Ventures That Are Not Successful, Which Could Seriously Harm Our Business.

Historically, we have acquired technology or businesses to supplement and expand our product offerings. In the future, we could acquire additional products, technologies or businesses, or enter into joint venture arrangements, for the purpose of complementing or expanding our business. Negotiation of potential acquisitions or joint ventures and our integration of acquired products, technologies or businesses could divert management's time and resources. Future acquisitions could cause us to issue equity securities that would dilute existing stockholders, incur debt or contingent liabilities, amortize intangible assets, or write off in-process research and development and other acquisition-related expenses that could have a material adverse affect on our business, results of operations, cash flow and financial condition. We may not be able to properly integrate acquired products, technologies or businesses with our existing products and operations, train, retain and motivate personnel from the acquired businesses, or combine potentially different corporate cultures. Failure to do so could deprive us of the intended benefits of those acquisitions. In addition, we may be required to write-off acquired research and development if further development of purchased technology becomes unfeasible, which may adversely affect our business, results of operations, cash flow and financial condition.

Changes In The Value Of The U.S. Dollar, As Compared To The Currencies Of Foreign Countries Where We Transact Business, Could Harm Our Operating Results.

To date, our international revenues have been denominated primarily in U.S. Dollars. However, the majority of our international expenses, including the wages of approximately 62% of our employees, have been denominated in currencies other than the U.S. Dollar. Therefore, changes in the value of the U.S. Dollar as compared to these other currencies may adversely affect our operating results. We have implemented limited hedging programs to mitigate our exposure to currency fluctuations affecting international accounts receivable, cash balances and intercompany accounts, but we do not hedge our exposure to currency fluctuations affecting future international revenues and expenses and other commitments. For the foregoing reasons, currency exchange rate fluctuations have caused, and likely will continue to cause, variability in our foreign currency denominated revenue streams and our cost to settle foreign currency denominated liabilities.

We May Not Be Able to Fully Realize The Benefits Of Our Deferred Tax Assets.

Our ability to utilize our domestic net operating loss carryforwards during their remaining life is dependent upon our ability to generate sufficient domestic taxable income during the carryforward periods. If we do not generate sufficient domestic taxable income, the remaining net operating loss carryforwards may expire without being fully utilized.

In addition, pursuant to section 382 of the Internal Revenue Code, the amount of and benefit from our domestic net operating loss carryforwards, and other tax attributes, may be impaired or limited in certain circumstances. Events which cause limitations on the amount of net operating losses and other tax attributes that we may utilize in the future include, but are not limited to, a cumulative change in ownership of greater than 50%

Table of Contents

in the value of the company (for those instruments that constitute equity for section 382 purposes), over the lesser of a three-year period ending on a specific testing date or a previous ownership change date. A testing date generally occurs upon the issuance, transfer or repurchase of the company's securities or debt that is treated as a security for purposes of determining an ownership change. A cumulative change in ownership of greater than 50% would limit our ability to fully utilize our domestic net operating loss carryforwards.

Failure Or Circumvention Of Our Controls And Procedures Or Failure To Comply With Regulations Related To Controls And Procedures Could Seriously Harm Our Business.

Over time, we have made significant changes in and may consider making additional changes to our internal controls, our disclosure controls and procedures, and our corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, and not absolute, assurances that the objectives of the system are met. Any failure of our controls, policies and procedures could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Risks Related To Our Industry

If Our Products Are Not Able To Deliver Fast, Demonstrable Value To Our Customers, Our Business Could Be Seriously Harmed.

Enterprises are requiring their application software vendors to provide faster time to value on their technology investments. We must continue to improve the speed of our implementations and the pace at which our products deliver value or our competitors may gain important strategic advantages over us. If we cannot successfully respond to these market demands, or if our competitors do so more effectively than we do, our business, results of operations, cash flow and financial condition could be materially and adversely affected.

Releases Of And Problems With New Products May Cause Purchasing Delays, Which Would Harm Our Revenues.

Our practice and the practice in the industry is to periodically develop and release new products and enhancements. As a result, customers may delay their purchasing decisions in anticipation of our new or enhanced products, or products of competitors. Delays in customer purchasing decisions could seriously harm our business and operating results. Moreover, significant delays in the general availability of new releases, significant problems in the installation or implementation of new releases, or customer dissatisfaction with new releases could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Risks Related To Our Stock

Our Stock Price Historically Has Been Volatile, Which May Make It More Difficult To Resell Common Stock At Attractive Prices.

The market price of our common stock has been highly volatile in the past, and may continue to be volatile in the future. The following factors could significantly affect the market price of our common stock:

Continued quarterly variations in our results of operations and cash flows

Technological innovations by our competitors or us

Announcement of new customers, new products, product enhancements, joint ventures and other alliances by our competitors or us

Additional equity or debt financing transactions, or the absence thereof

Stock valuations or performance of our competitors

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

General market conditions, geopolitical events or market conditions specific to particular industries

Perceptions in the marketplace of performance problems involving our products and services

Table of Contents

The Price Of Our Common Stock May Decline Due To Shares Eligible For Future Sale.

Sales of substantial amounts of our common stock in the public market, or the appearance that a large number of our shares are available for sale, could adversely affect the market price for our common stock. In addition to the adverse effect a price decline could have on holders of common stock, that decline would likely impede our ability to raise capital by issuing additional shares of common stock or other equity securities.

Our Executive Officers And Directors, In Particular Sanjiv Sidhu And An Affiliate Of Q Investments, Have Significant Influence Over Stockholder Votes.

As of December 31, 2006, our current executive officers and directors together beneficially controlled approximately 22.3% of the total voting power of our company, approximately 21.6% of which was controlled by Sanjiv Sidhu, our current Chairman and former Chief Executive Officer and President, and entities that he controls. Further, an affiliate of Q Investments beneficially controls approximately 17.8% of the voting power of the company, and has the right to appoint two directors to our Board of Directors. Accordingly, Mr. Sidhu, the Q Investments affiliate and our officers and directors holding or controlling holdings of stock in our company have had and will have significant influence in determining the composition of our Board of Directors and other significant matters requiring stockholder approval or acquiescence, including amendments to our certificate of incorporation, a substantial sale of assets, a merger or similar corporate transaction or a non-negotiated takeover attempt. Such concentration of ownership may discourage a potential acquirer from making an offer to buy our company that other stockholders might find favorable, which in turn could adversely affect the market price of our common stock.

Our Charter And Bylaws Have Anti-Takeover Provisions And We Have A Stockholder Rights Plan Which, In Combination, Effectively Inhibit A Non-Negotiated Merger Or Business Combination.

Provisions of our certificate of incorporation and our bylaws, Delaware law and our stockholder rights plan could make it more difficult for a third party to acquire us, even if doing so would be beneficial to our stockholders. We are subject to the provisions of Section 203 of the Delaware General Corporation Law, which restricts certain business combinations with interested stockholders. The combination of these provisions effectively inhibits a non-negotiated merger or other business combination.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our corporate headquarters, located in Dallas, Texas, is occupied under a lease that expires in 2010. This facility houses our executive and administrative staff as well as sales, marketing, research and development and consulting personnel. We also lease space for our other offices in the U.S., Australia, Belgium, Canada, China, Finland, France, Germany, India, Japan, Korea, Netherlands, Singapore, South Africa, Taiwan and the United Kingdom primarily to provide sales, customer support, consulting services and research and development activities. We consider our properties suitable and adequate for our present needs.

ITEM 3. LEGAL PROCEEDINGS

Derivative Action

On March 7, 2007, a purported shareholder derivative lawsuit was filed in the Delaware Chancery Court against certain of our current and former officers and directors, naming the company as a nominal defendant. The complaint, entitled George Keritsis and Mark Kert v. Michael E. McGrath, Michael J. Berry, Pallab K. Chatterjee, Robert C. Donohoo, Hiten D. Varia, M. Miriam Wardak, Sanjiv S. Sidhu, Stephen P. Bradley, Harvey B. Cash, Richard L. Clemmer, Lloyd G. Waterhouse, Jackson L. Wilson Jr., Robert L. Crandall and i2 Technologies, Inc., alleges breach of fiduciary duty and unjust enrichment in connection with stock option grants

Table of Contents

to certain of the defendant officers and directors on three dates in 2004 and 2005. The complaint states that those stock option grants were manipulated so as to work to the recipients' favor when material non-public information about the company was later disclosed to positive or negative effect. The complaint is derivative in nature and does not seek relief from the company, but does seek damages and other relief from the defendant officers and directors. As discussed below, we have entered into indemnification agreements in the ordinary course of business with certain of our officers, directors and employees, including certain of the defendant officers and directors, and may be obligated throughout the pendency of this action to advance payment of legal fees and costs incurred by the defendants pursuant to our obligations under the indemnification agreements and/or applicable Delaware law. Based on the stage of the litigation, it is not possible to estimate the amount or range of possible loss that might result from an adverse judgment or a settlement of this matter.

Governmental Investigations and Actions

On June 9, 2004, the company settled an SEC enforcement proceeding brought against the company in connection with matters relating to the 2003 restatement of our consolidated financial statements. Without admitting or denying the SEC's substantive findings against it, the company consented to a cease-and-desist order requiring future compliance with specific provisions of the federal securities laws and paid a \$10.0 million civil penalty. The settlement of the SEC enforcement proceedings covered the company only. On July 15, 2005, the SEC filed a civil action against three former officers of the company relating to events that occurred prior to the restatement of the company's financial statements in 2003. The civil charges against each of such former officers were settled on various dates in 2006 and early 2007. The most recent of such settlements, involving the civil charges against Gregory A. Brady, occurred on February 15, 2007.

Indemnification Agreements

We have indemnification agreements with certain of our officers, directors and employees that may require us, among other things, to indemnify such officers, directors and employees against certain liabilities that may arise by reason of their status or service as directors, officers or employees and to advance their expenses incurred as a result of any proceeding against them as to which they could be indemnified. We have also entered into agreements regarding the advancement of costs with certain other officers and employees.

Pursuant to these indemnification and cost-advancement agreements, we have advanced fees and expenses incurred by certain current and former directors, officers and employees in connection with the governmental investigations and actions related to the 2003 restatement of our consolidated financial statements and other matters. We incurred approximately \$14.0 million, \$4.9 million and \$4.5 million of expense for legal fees and expenses for current and former employees during 2006, 2005 and 2004, respectively.

In an effort to reduce our future obligations in respect of such legal fees and expenses, on December 15, 2006 the company entered into a Settlement Agreement With Mutual Releases with Mr. Brady (the Settlement Agreement). The Settlement Agreement provided for (i) certain payments by the company to finally settle various issues of advancement and indemnification under existing agreements by the company to provide Mr. Brady with indemnification as well as an existing court order, and (ii) mutual general releases by Mr. Brady and the company, each in favor of the other. Pursuant to the terms of the Settlement Agreement, in January 2007 the company paid an aggregate of \$2.5 million in full settlement and compromise of all claims of Mr. Brady under the existing indemnification agreements and the court order. We had accrued the \$2.5 million as of December 31, 2006. Under the terms of the Settlement Agreement, the company shall have no further obligation to advance costs, fees or expenses to Mr. Brady or to indemnify Mr. Brady in connection with any present, threatened or future litigation by virtue of the fact that Mr. Brady was a director, officer, employee or agent of the company or was serving at any time at the request of the company as a director, officer, employee or agent of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise.

We may continue to advance fees and expenses incurred by certain other current and former directors, officers and employees in the future. The maximum potential amount of future payments we could be required to

Table of Contents

make under these indemnification and cost-advancement agreements is unlimited. Additionally, our corporate by-laws allow us to choose to indemnify any employee for certain events or occurrences while the employee is, or was, serving at our request in such capacity.

Internal Revenue Service Audit

In 2004, we filed a protest in response to an Internal Revenue Service examination report regarding matters relating to the timing of our remittance of withholding taxes associated with the exercise of certain stock options by employees in the 2000 tax year. Ultimately, our protest regarding the IRS's position on the matter was reviewed by the IRS Appeals Division. On December 14, 2006, the IRS notified us that no deficiency or over-assessment exists and that no further action is required of i2.

India Tax Assessments

We are under tax examinations in India primarily related to our intercompany pricing for services rendered by our Indian subsidiary to other i2 companies and our qualification for a tax holiday. We have been assessed approximately \$3.3 million, \$1.1 million, and \$2.0 million for the Indian statutory fiscal years ended March 31, 2002, 2003 and 2004, respectively. We have paid approximately \$3.1 million of the assessments related to the Indian statutory fiscal year ended March 31, 2002.

We believe the Indian tax authorities' positions regarding our intercompany transactions and tax holiday qualification are without merit and that all intercompany transactions were conducted at appropriate pricing levels and that our operations qualify for the tax holiday claimed. Accordingly, we have appealed all of the assessments discussed above and expect the ultimate resolution will not exceed the tax contingency reserves we have established for these matters.

We have also sought assistance from the United States competent authority under the mutual agreement procedure of the income tax treaty between the United States and India. This assistance does not guarantee favorable resolution of these assessments but provides us with an opportunity to resolve these matters in an environment which includes governmental representatives of both countries. By invoking the mutual agreement procedure and pursuant to our requests for a Stay of Demand for Payment, we are required to issue a bank guarantee in favor of the Indian government in an amount equal to the assessed tax and interest. We have issued such bank guarantee regarding the assessment related to the Indian statutory fiscal year ended March 31, 2003. A similar bank guarantee for the Indian statutory fiscal year ended March 31, 2004 is likely to be issued in the future.

Japan Tax Examination

In January 2006, the tax examination by the National Tax Agency in Japan regarding withholding taxes on intercompany payments made by our subsidiary in Japan was closed and no assessment was made.

Certain Accruals

We have accrued for estimated losses in the accompanying consolidated financial statements for matters where we believe the likelihood of an adverse outcome is probable and the amount of the loss is reasonably estimable. We are subject to various claims and legal proceedings that arise in the ordinary course of our business from time to time, including claims and legal proceedings that have been asserted against us by former employees and certain customers, and have been in negotiations to settle certain of those contingencies. The adverse resolution of any one or more of those matters or the matters described in this Item 3 over and above the amount, if any, that has been estimated and accrued in our consolidated financial statements could have a material adverse effect on our business, financial condition, results of operations or cash flows.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock trades on the NASDAQ Global Market under the ticker symbol ITWO. During the period from May 9, 2003 to July 25, 2005, our common stock was quoted on the over-the-counter Pink Sheets under the ticker symbol ITWH.PK.

The following table lists the high and low per share intra-day sales prices for our common stock as reported by the NASDAQ Global Market or as quoted in the over-the-counter Pink Sheets, as applicable, for the periods indicated. All references to common stock and per share amounts for periods prior to February 17, 2005 have been retroactively restated to reflect the 1-for-25 reverse stock split we implemented on February 16, 2005.

	High	Low
2006		
Fourth quarter	\$ 23.13	\$ 18.09
Third quarter	18.92	11.74
Second quarter	17.98	12.48
First quarter	17.67	14.48
2005		
Fourth quarter	\$ 22.25	\$ 10.83
Third quarter	24.88	7.80
Second quarter	8.80	6.75
First quarter	17.50	7.77

As of March 1, 2007, there were approximately 21,102,579 shares of our common stock outstanding held by approximately 421 holders of record.

Dividends

We have never declared or paid cash dividends on our common stock. We currently intend to retain any earnings for use in our business and do not anticipate paying any cash dividends in the foreseeable future. Future dividends, if any, will be determined by our Board of Directors.

Table of Contents*Stock Performance Graph*

The graph depicted below shows a comparison of cumulative total stockholder returns for i2 common stock, the NASDAQ Global Market (U.S. Companies) Index and the NASDAQ Computer and Data Processing Services Group Index. The graph assumes that \$100 was invested in i2 common stock on December 31, 2001 and in each index, and that all dividends were reinvested. No cash dividends have been declared on shares of i2 common stock. The graph covers the period from December 31, 2001, the last trading day before our 2002 fiscal year, to December 29, 2006, the last trading day before our 2007 fiscal year. The data for the graph was provided to us by Research Data Group, Inc. The comparisons in the graph are required by regulations of the SEC and are not intended to forecast or to be indicative of the possible future performance of our common stock.

Stock Performance Graph Data Points:

	12/31/01	12/31/02	12/31/03	12/31/04	12/30/05	12/29/06

Table of Contents*Stock Option Plans*

Information regarding stock-based compensation awards (including both stock options and stock rights awards) outstanding and available for future grants as of December 31, 2006, segregated between stock-based compensation plans approved by stockholders and stock-based compensation plans not approved by stockholders, is presented in the table below (in thousands, except per share amounts). Included in the table are stock options granted to former employees of acquired companies that were assumed by us. We do not intend to grant additional stock options under any of the assumed plans of acquired companies. While our stockholders approved certain of our acquisitions of the companies from which these plans were assumed, our stockholders have not approved any of the assumed plans. See *Note 10 Employee Benefit Plans*, in our Notes to Consolidated Financial Statements for a description of our stock option plans.

Plan Category	Number of Shares to be Issued Upon Exercise of Outstanding Awards	Weighted Average Exercise Price of Outstanding Awards	Number of Shares Available for Future Grants
Plans approved by stockholders:			
1995 Plan	3,847	\$ 18.48	3,483
Plans not approved by stockholders:			
2001 Plan	142	57.40	651
Assumed plans of acquired companies	1	340.04	616
Total	3,990	\$ 19.96	4,750

Stock Rights Plan

On January 17, 2002, our Board of Directors approved adoption of a stockholder rights plan and declared a dividend of one preferred share purchase right for each outstanding share of common stock. After adjusting for the 1-for-25 reverse stock split we implemented on February 16, 2005, each share of common stock has attached to it one right to purchase 25 units of one one-thousandth of a share of Series A junior participating preferred stock at a price of \$75.00 per unit. The rights, which expire on January 17, 2012, will only become exercisable upon distribution. Distribution of the rights will not occur until ten days after the earlier of (i) the public announcement that a person or group has acquired beneficial ownership of 15.0% or more of our outstanding common stock or (ii) the commencement of, or announcement of an intention to make, a tender offer or exchange offer that would result in a person or group acquiring the beneficial ownership of 15.0% or more of our outstanding common stock.

Shares of Series A preferred stock purchasable upon exercise of the rights are not redeemable. Each share of Series A preferred stock will be entitled to a dividend of 40 times the dividend declared per share of common stock. In the event of liquidation, each share of Series A preferred stock will be entitled to a payment of the greater of (i) 40 times the payment made per share of common stock or (ii) \$1,000. Each share of Series A preferred stock will have 40 votes, voting together with the common stock. Finally, in the event of any merger, consolidation or other transaction in which shares of common stock are exchanged, each share of Series A preferred stock will be entitled to receive 40 times the amount received per share of common stock. Because of the nature of the dividend, liquidation and voting rights, the value of the 25 units of Series A preferred stock purchasable upon exercise of each right should approximate the value of one share of common stock.

If, after the rights become exercisable, we are acquired in a merger or other business combination transaction, or 50% or more of our consolidated assets or earning power are sold, proper provision will be made so that each holder of a right will thereafter have the right to receive upon exercise that number of shares of common stock of the acquiring company having a market value of two times the exercise price of the right.

Table of Contents

If any person or group becomes the beneficial owner of 15.0% or more of the outstanding shares of common stock, proper provision will be made so that each holder of a right, other than rights beneficially owned by the acquiring person (which will thereafter be void), will have the right to receive upon exercise that number of shares of common stock or units of Series A preferred stock (or cash, other securities or property) having a market value of two times the exercise price of the right.

The rights have significant anti-takeover effects by causing substantial dilution to a person or group that attempts to acquire us on terms not approved by our Board of Directors. The rights should not interfere with any merger or other business combination approved by the Board of Directors since the rights may be redeemed by us at the redemption price of \$0.25 per right prior to the occurrence of a distribution date. Additional details of this stock rights plan are presented in *Note 9 Stockholders' Deficit and Income (Loss) per Common Share* in our Notes to Consolidated Financial Statements.

Convertible Debt

On December 15, 2006, we retired the remaining \$21.9 million of our 5.25% convertible subordinated notes.

As of December 31, 2006, we had approximately \$86.3 million in face value of outstanding indebtedness that is convertible into shares of our common stock. Details of this debt are presented in *Note 6 Borrowings and Debt Issuance Costs* in our Notes to Consolidated Financial Statements included elsewhere in this report.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

The following table presents selected consolidated financial data for the periods indicated. The selected consolidated financial data set forth below should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and related notes included elsewhere in this report. Amounts shown are in thousands, except per share data. The revenue amounts and certain expense amounts for years prior to 2006 have been reclassified from previously reported amounts. See *Note 2 Reclassification of Certain Revenue and Expense* in our Notes to Consolidated Financial Statements.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical or current facts, including, without limitation, statements about our business strategy, plans, objectives and future prospects, are forward-looking statements. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from these expectations, which could have a material adverse effect on our business, results of operations, cash flow and financial condition. Such risks and uncertainties include, without limitation, the following:

Our financial results have varied and may continue to vary significantly from quarter-to-quarter. We may fail to meet analysts' and investors' expectations.

We have historically experienced negative cash flows. A failure to maintain profitability and achieve consistent positive cash flows would have a significant adverse effect on our business, impair our ability to support our operations and adversely affect our liquidity.

Holders of our 5% senior convertible notes may convert the senior convertible notes upon the occurrence of certain events prior to May 15, 2010, and at any time on or after May 15, 2010, and have the right to require us to repurchase all or any portion of the senior convertible notes on November 15, 2010. There is no assurance that at the time of conversion or required repurchase, we will have the ability to satisfy the cash portion of any such conversion obligation or to make any such required repurchase.

We may require additional private or public debt or equity financing. Such financing may only be available on disadvantageous terms, or may not be available at all. Any new financing could have a substantial dilutive effect on our existing shareholders.

The indenture governing our 5% senior convertible notes contains a debt incurrence covenant that places restrictions on the amount and type of additional indebtedness that we can incur. The debt incurrence restrictions imposed by the indenture could restrict or impede our ability to incur additional debt, which in turn could impair our ability to support our operations, adversely affect our liquidity and threaten our ability to repay our debts when they become due.

If we are unable to develop and generate additional demand for our products, serious harm could result to our business.

We may not be competitive, and increased competition could seriously harm our business. Our strategy to sell new-generation solutions may not be successful.

We face risks related to product quality and performance claims and other litigation that could have a material adverse effect on our relationships with customers and our business, results of operations, cash flow and financial condition. We may face other claims and litigation in the future that could harm our business and impair our liquidity.

Loss of key personnel or our failure to attract, train and retain additional personnel could negatively affect our operating results and revenues and seriously harm our company.

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

We face other risks indicated in Item 1A., Risk Factors, and in our other filings with the SEC. Many of these risks and uncertainties are beyond our control and, in many cases, we cannot accurately predict the risks and uncertainties that could cause our actual results to differ materially from those indicated by the forward-looking statements. When used in this document, the words believes, plans, expects, anticipates, intends, continue, may, will, should or the negative of such terms and similar expressions relate to us, our customers or our management are intended to identify forward-looking statements.

Table of Contents

References in this report to the terms “optimal” and “optimization” and words to that effect are not intended to connote the mathematically optimal solution, but may connote near-optimal solutions, which reflect practical considerations such as customer requirements as to response time, precision of the results and other commercial factors.

Overview

We are a provider of supply chain management solutions, including various supply chain solutions consisting of software and service offerings. We operate our business in one business segment. Supply chain management is the set of processes, technology and expertise involved in managing supply, demand and fulfillment throughout divisions within a company and with its customers, suppliers and partners. The goals of our solutions include increasing supply chain efficiency and enhancing customer and supplier relationships by managing variability, reducing complexity, improving operational visibility, increasing operating velocity and integrating planning and execution. Our offerings are designed to help customers better achieve the following critical business objectives:

Visibility – a clear and unobstructed view up and down the supply chain

Planning – supply chain optimization to match supply and demand considering system-wide constraints

Collaboration – interoperability with supply chain partners and elimination of functional silos

Control – management of data and business processes across the extended supply chain

Our application software is often bundled with other product offerings we provide such as business optimization and technical consulting, training, solution maintenance, software upgrades and development.

Application of Critical Accounting Policies and Accounting Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and judgments related to the application of certain accounting policies.

While we base our estimates on historical experience, current information and other factors deemed relevant, actual results could differ from those estimates. We consider accounting estimates to be critical to our reported financial results if (i) the accounting estimate requires us to make assumptions about matters that are uncertain and (ii) different estimates that we reasonably could have used for the accounting estimate in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, would have a material impact on our financial statements.

We consider our policies for revenue recognition to be critical due to the continuously evolving standards and industry practice related to revenue recognition, changes to which could materially impact the way we report revenues. Accounting policies related to: allowance for doubtful accounts, deferred taxes, goodwill and intangible assets, loss contingencies, and restructuring charges are also considered to be critical as these policies involve considerable subjective judgment and estimation by management. Critical accounting policies, and our procedures related to these policies, are described in detail below. Also, see *Note 1 – Summary of Significant Accounting Policies* and *Note 2 – Reclassification of Certain Revenue and Expense* in our Notes to Consolidated Financial Statements.

Revenue Recognition. We derive revenues from licenses of our software and related services, which include assistance in implementation, integration, customization, maintenance, training and consulting. We recognize revenue for software and related services in accordance with *Statement of Position (SOP) 81-1, Accounting for Certain Construction Type and Certain Production Type Contracts, SOP 97-2, Software Revenue Recognition*, as modified by *SOP 98-9, Modification of SOP 97-2, Software Revenue Recognition with Respect to Certain Transactions, SEC Staff Accounting Bulletin (SAB) 104, Revenue Recognition*, and *SAB 103, Update of Codification of Staff Accounting Bulletins*.

Table of Contents

Software Solutions Revenue. Recognition of software solutions revenue occurs under SOP 81-1 and under SOP 97-2, as amended.

Software solutions revenue recognized under SOP 81-1 includes both fees associated with licensing of our products, as well as any fees received to deliver the licensed functionality (for example, the provision of essential services). Essential services involve customizing or enhancing the software so that the software performs in accordance with specific customer requirements. Arrangements accounted for under SOP 81-1 follow either the percentage-of-completion method or the completed contract method. The percentage-of-completion method is used when the required services are quantifiable, based on the estimated number of labor hours necessary to complete the project, and under that method revenues are recognized using labor hours incurred as the measure of progress towards completion but is limited to revenue that has been earned by the attainment of any milestones included in the contract. We do not capitalize costs associated with services performed where milestones have not been attained. The completed contract method is used when the required services are not quantifiable, and under that method revenues are recognized only when we have satisfied all of our product and/or service delivery obligations to the customer. Similar to the treatment of milestones, we do not capitalize or defer costs associated with services performed on contracts recognized under the completed contract method that have not been completed.

Under SOP 97-2, software license revenues are generally recognized upon delivery, provided persuasive evidence of an arrangement exists, fees are fixed or determinable and collection is deemed probable. We evaluate each of these criteria as follows:

Evidence of an arrangement: We consider a non-cancelable agreement signed by the customer to be evidence of an arrangement.

Delivery: Delivery is considered to occur when media containing the licensed programs is provided to a common carrier or, in the case of electronic delivery, the customer is given access to the licensed programs. Our typical end user license agreement does not include customer acceptance provisions.

Fixed or determinable fee: We consider the fee to be fixed or determinable if the fee is not subject to refund or adjustment and the payment terms are within our normal established practices. If the fee is not fixed or determinable, we recognize the revenue as amounts become due and payable.

Collection is deemed probable: We conduct a credit review for significant transactions at the time of the arrangement to determine the credit-worthiness of the customer. Collection is deemed probable if we expect that the customer will pay amounts under the arrangement as payments become due. If we determine that collection is not probable, we defer the revenue and recognize the revenue upon receipt of cash. Based on our collections history in certain countries, we apply a cash-basis recognition requirement for software solutions agreements in those countries.

Revenue for software solution arrangements that include one or more additional elements (i.e., services and maintenance) to be delivered at a future date is generally recognized using the residual method as set forth in SOP 98-9. Under the residual method, the fair value of the undelivered element(s) is deferred, and the remaining portion of the arrangement fee is recognized as license revenue. If fair values have not been established for the undelivered element(s), all revenue associated with the arrangement is deferred until all element(s) have been delivered or the fair value of the undelivered elements has been determined. Fair value for an individual element within an arrangement may be established when that element, when contracted for separately, is priced in a consistent manner. Fair value for our maintenance and consulting services has been established based on our maintenance renewal rates and consulting billing rates, respectively. Arrangements that include a right to unspecified future products are accounted for as subscriptions and recognized ratably over the term of the arrangement. Software solution license fees from reseller arrangements are generally based on the sublicenses granted by the reseller and recognized when the license is sold to the end customer.

Services Revenue. Services revenue is primarily derived from fees for implementation, integration, consulting and training services as well as fees received to customize or enhance a previously purchased licensed

Table of Contents

product that result from arrangements negotiated and executed subsequent to the license arrangement. Also included is reimbursable expense revenue representing travel expenses incurred by our consultants and billed to our customers for reimbursement pursuant to a signed agreement. Services revenue is generally recognized when services are performed. Contractual terms may include the following payment arrangements: fixed fee, full-time equivalent, milestone, and time and material. In order to recognize service revenue, the following criteria must be met:

Signed agreement: The agreement must be signed by the customer.

Fee is determinable: The signed agreement must specify the fees to be received for the services.

Delivery has occurred: Delivery is substantiated by time cards and, where applicable, supplemented by an acceptance from the customer that milestones as agreed in the statement of work have been met.

Collectibility is probable: We conduct a credit review for significant transactions at the time of the engagement to determine the credit-worthiness of the customer. We monitor collections over the term of each project, and if a customer becomes delinquent, the revenue may be deferred.

Maintenance Revenue. Maintenance revenue consists of fees generated by providing software maintenance, upgrades and support to customers, such as telephone support, new releases of software and updated user documentation. A customer typically prepays maintenance and support fees for an initial period, and the related revenue is deferred and generally recognized over the term of such initial period. Maintenance is renewable by the customer on an annual basis thereafter. Rates for maintenance, including subsequent renewal rates, are typically established based upon a specified percentage of net license fees as set forth in the contract.

Contract Revenue. Contract revenue consists of fees generated from license, services and maintenance revenue attributable to those transactions for which we determined to change the accounting from revenue recognition under SOP 97-2 to contract accounting under SOP 81-1 in connection with the 2003 restatement of our consolidated financial statements for the years ended December 31, 2001 and 2000 and the first three quarters of 2002. As of December 31, 2006, \$3.2 million of contract revenue remained on our balance sheet as deferred revenue.

Royalties and Affiliate Commissions. Royalties paid for third-party software products integrated with our technology are expensed when the products are shipped. Commissions payable to affiliates in connection with sales assistance are generally expensed when the commission becomes payable. Accrued royalties payable totaled \$2.1 million as of December 31, 2006 and 2005, while accrued affiliate commissions payable totaled \$1.1 million and \$0.4 million as of December 31, 2006 and 2005, respectively.

Concurrent Transactions. We occasionally enter into transactions which are concluded at or about the same time as other arrangements with the same customer. These concurrent transactions are accounted for under Accounting Principles Board (APB) Opinion No. 29, *Accounting for Non-monetary Transactions*, as interpreted by EITF 01-02 *Interpretations of APB Opinion No. 29*. Generally, the recognition of a gain or loss on the exchange is measured based on the fair value of the assets involved to the extent that the fair value can be reasonably determined. A transaction that is not a culmination of the earnings process is recorded based on the net book value of the asset relinquished.

Allowance for Doubtful Accounts. The allowance for doubtful accounts is a reserve established through a provision for bad debts charged to expense and represents our best estimate of probable losses resulting from non-payment of amounts recorded in the existing accounts receivable portfolio. In estimating the allowance for doubtful accounts, we consider our historical write-off experience, accounts receivable aging reports, the credit-worthiness of individual customers, economic conditions affecting specific customer industries and general economic conditions, among other factors. Should any of these factors change, our estimate of probable losses due to bad debts could also change, which could affect the level of our future provisions for bad debts.

Table of Contents

Deferred Taxes. Deferred tax assets and liabilities represent estimated future tax amounts attributable to the differences between the carrying amounts of assets and liabilities in the consolidated financial statements and their respective tax bases. These estimates are computed using the tax rates in effect for the applicable period. Realization of our deferred tax assets is, for the most part, dependent upon our U.S. consolidated tax group of companies having sufficient federal taxable income in future years to utilize our domestic net operating loss carry-forwards before they expire. We adjust our deferred tax valuation allowance on a quarterly basis in light of certain factors, including our financial performance.

Goodwill. On January 1, 2002, in accordance with Statement of Financial Accounting Standard (SFAS) No. 142 *Goodwill and Intangible Assets*, we ceased amortizing goodwill and adopted a new policy for measuring goodwill for impairment. No goodwill impairment was recorded in conjunction with the adoption of the new accounting standard. Under our policy, we test for impairment once annually or more frequently if an event occurs or circumstances change that may indicate that the fair value of our reporting unit is below its carrying value. Goodwill is tested for impairment using a two-step approach. The first step is to compare the fair value of the reporting unit to its carrying amount, including goodwill. If the fair value of the reporting unit is greater than its carrying amount, goodwill is not considered impaired and the second step is not required. If the fair value of the reporting unit is less than its carrying amount, the second step of the impairment test measures the amount of the impairment loss, if any. The second step of the impairment test is to compare the implied fair value of goodwill to its carrying amount. If the carrying amount of goodwill exceeds its implied fair value, an impairment loss is recognized equal to that excess. The implied fair value of goodwill is calculated in the same manner that goodwill is calculated in a business combination, whereby the fair value of the reporting unit is allocated to all of the assets and liabilities of that unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price. The excess purchase price over the amounts assigned to assets and liabilities would be the implied fair value of goodwill.

As stated above, we currently operate as a single reporting unit and all of our goodwill is associated with the entire company. Accordingly, we generally assume that the minimum fair value of our single reporting unit is our market capitalization, which is the product of (i) the number of shares of common stock issued and outstanding and (ii) the market price of our common stock.

Stock-based compensation. On January 1, 2006, we adopted the provisions of SFAS No. 123(R) to account for our stock based compensation plans, including restricted stock, and our employee stock purchase plan, which requires the recognition of the fair value of stock-based compensation in our statement of operations. The fair value of stock options and stock purchase rights pursuant to our stock plans and the employee stock purchase plan is estimated using the Black-Scholes stock valuation model. This model requires the input of highly subjective assumptions, including the expected life of the award and expected stock price volatility. The fair value of restricted stock units is determined based upon our closing stock price on the grant date. The expense calculated, based on the valuation model or on the closing stock price, is reduced by an estimated forfeiture rate.

Loss Contingencies. There are times when non-recurring events occur that require management to consider whether an accrual for a loss contingency is appropriate. Accruals for loss contingencies typically relate to certain legal proceedings, customer and other claims and litigation. As required by SFAS No. 5, we determine whether an accrual for a loss contingency is appropriate by assessing whether a loss is deemed probable and can be reasonably estimated. We analyze our legal proceedings, warranty and other claims and litigation based on available information to assess potential liability. We develop our views on estimated losses in consultation with outside counsel handling our defense in these matters, which involves an analysis of potential results assuming a combination of litigation and settlement strategies. The adverse resolution of any one or more of these matters over and above the amounts that have been estimated and accrued in the current consolidated financial statements could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Table of Contents

Restructuring Charges. We recognize restructuring charges consistent with applicable accounting standards. We reduce charges for obligations on leased properties with estimated sublease income. Furthermore, we analyze current market conditions, including current lease rates in the respective geographic regions, vacancy rates and costs associated with subleasing, when evaluating the reasonableness of future sublease income. The accrual for office closure and consolidation is an estimate that assumes certain facilities will be subleased or the underlying leases will otherwise be favorably terminated prior to the contracted lease expiration date. Significant subjective judgment and estimates must be made and used in calculating future sublease income. While the current accrual represents our best estimate of our expected costs to exit these obligations, variances between our expected and actual sublease income may result in significant restructuring charge adjustments in future periods.

Discontinued Operations. On July 1, 2005, we completed the sale of Trade Service Corporation (TSC), which had been operated as a part of our content and data services business, for approximately \$3.0 million. This transaction led to a gain on sale, net of write-offs of associated assets and liabilities, of approximately \$2.2 million. The sale was to a group of investors led by TSC's then-current management team.

On December 1, 2005 and December 16, 2005, respectively, the company and i2 Technologies Software Private Limited, an India corporation and a subsidiary of the company, sold to IHS Parts Management, Inc. (IHS) certain assets associated with our subsidiary's content and data services business (CDS). In addition, we agreed to license certain software and patents associated with the CDS business to IHS. IHS paid us approximately \$30 million in cash and assumed certain liabilities associated with the CDS business. As part of the transaction, IHS agreed to sublease certain office space located in India from our subsidiary. In addition, we agreed to perform certain transition and hosting services for IHS to assist in the transition of CDS to IHS.

The historical operating results of TSC and CDS, including the gain on the sale of TSC, have been reported as discontinued operations in our financial statements. Income from discontinued operations was \$43.9 million in 2005 and \$3.4 million in 2004. See *Note 15 Discontinued Operations* in our Notes to Consolidated Financial Statements. The analysis presented below excludes all revenues and expenses from discontinued operations.

Revenues

We derive revenues from licenses of our software and related services, which include assistance in implementation, integration, customization, training, consulting and maintenance. We recognize revenue for software and related services in accordance with *Statement of Position (SOP) 81-1, Accounting for Certain Construction Type and Certain Production Type Contracts*, *SOP 97-2, Software Revenue Recognition*, as modified by *SOP 98-9, Modification of SOP 97-2, Software Revenue Recognition with Respect to Certain Transactions*, and *SEC Staff Accounting Bulletin Topic 13, Revenue Recognition*.

The following table sets forth revenues and the percentages of total revenues of selected items reflected in our consolidated statements of operations and comprehensive income. The year-to-year comparisons of financial results are not necessarily indicative of future results.

	Twelve Months		Twelve Months		Twelve Months	
	Ended December 31, 2006	Percent of Total Revenue	Ended December 31, 2005	Percent of Total Revenue	Ended December 31, 2004	Percent of Total Revenue
SOP 97-2 recognition	\$ 19,962	7%	\$ 25,736	8%	\$ 18,075	5%
SOP 81-1 recognition	22,305	8%	43,810	13%	20,765	6%
Recurring items	33,976	12%	20,391	6%	15,315	4%
Total software solutions	76,243	27%	89,937	27%	54,155	15%
Services	106,493	38%	103,792	31%	118,731	33%
Maintenance	92,828	33%	100,612	30%	116,765	32%
Contract	4,113	2%	42,526	12%	72,877	20%
Total revenues	\$ 279,677	100%	\$ 336,867	100%	\$ 362,528	100%

Table of Contents

Total revenues decreased \$57.2 million, or 17%, in 2006 and \$25.7 million, or 7%, in 2005. These revenue changes are discussed below.

Software Solutions. Software solutions revenue includes core license revenue, recurring license revenue, and fees received to develop the licensed functionality. We recognize these revenues under SOP 97-2 or SOP 81-1 based on our evaluation of whether the associated services are essential to the licensed software as described within SOP 97-2. If the services are considered essential, revenue is generally recognized on a percentage of completion basis under SOP 81-1. Services are considered essential to the software when they involve significant modifications or additions to the software features and functionality. We also have several subscription and other recurring revenue transactions which are recognized ratably over the life of each contract.

Software solutions revenue recognized under SOP 97-2 decreased \$5.8 million, or 22%, in 2006 and increased \$7.7 million, or 42%, in 2005. We have experienced variability in the timing of recognition of revenue from software solutions under SOP 97-2 and we expect this variability to continue. Variability is caused by the timing and amount of software solutions bookings, and whether the software solutions require essential services. Variability is also caused by the timing of cash receipts for arrangements where significant uncertainty exists regarding collectibility of license fees.

Software solutions revenue recognized under SOP 81-1 decreased \$21.5 million, or 49%, in 2006 and increased \$23.0 million, or 110%, in 2005. Software solutions revenue for the twelve months ended December 31, 2005 included \$13.8 million of revenue recognized upon the achievement of significant contractual milestones on separate agreements and \$8.5 million of revenue related to an agreement with Shell Global Solutions International B.V.

We have also experienced variability in the timing of recognition of revenue from software solutions under SOP 81-1 and expect this variability to continue. Since the majority of the SOP 81-1 revenue is recognized on a percentage of completion basis, our revenue is highly dependent on the amount of prior period bookings in our backlog, our progress toward completion of the development and delivery of licensed features and functionality, including the achievement of contractual milestones, and cash receipts for arrangements where significant uncertainty exists regarding collectibility of fees. Another source of variability for software solutions revenue is the mix of products included in our bookings. We are focused on selling new-generation solutions, where there is a high likelihood of providing essential services associated with the new products. Accordingly, the license fees received for these arrangements, together with fees for the essential services, will be recognized under SOP 81-1 over the period in which the services are performed instead of being recognized upon delivery of the software.

Revenue from recurring items increased \$13.6 million, or 67%, in 2006 and \$5.1 million, or 33%, in 2005. Included in the 2006 increase was \$10.5 million of revenue recognized from \$10.5 million in platform technology bookings in the second quarter of 2006. Recurring items include revenue from our supply chain leader and other subscription transactions, for which the revenue is deferred and recognized ratably over the contractual term of the transaction. Recurring revenue related to supply chain leader transactions for each of the twelve-month periods ended December 31, 2006 and December 31, 2005 was \$12.4 million. These supply chain leader transactions have varying lives and begin expiring in the second quarter of 2007.

Services. Services revenue is primarily derived from fees for implementation, integration, consulting and training services and is generally recognized when services are performed. In addition, service revenue includes fees received from arrangements to customize or enhance previously purchased licensed software. Services revenue also includes reimbursable expense revenue, with the related costs of reimbursable expenses included in cost of services.

Services revenue increased \$2.7 million, or 3%, in 2006 and decreased \$14.9 million, or 13%, during 2005. The increase in 2006 reflects growth in the average number of services personnel during the second half of 2006, when compared to the comparable period in 2005, as we attempted to match the levels of services personnel with

Table of Contents

the market demand for our services. The decrease in 2005 was primarily related to lower average headcount for the twelve months ended December 31, 2005 when compared to the twelve months ended December 31, 2004. This lower average headcount in 2005, compared to 2004, is reflective of a lower volume of license sales, which led to fewer implementations. Our volume of upgrade projects also declined as many of our customers had migrated to newer versions of our projects. Based on our historical trends, we expect services revenue to continue to fluctuate on a quarterly basis due to the timing of booking new projects and the timing of revenue recognition on these projects. In any period, services revenue is dependent upon a variety of factors, including:

The number and value of services transactions booked during the current and preceding periods

The number and availability of services resources actively engaged on billable projects

The timing of milestone acceptance for engagements contractually requiring customer sign-off, and

The timing of cash payments when collectibility is uncertain

Maintenance. Maintenance revenue decreased \$7.8 million, or 8%, in 2006 and \$16.2 million, or 14%, in 2005. The decrease in maintenance revenue during 2006 and 2005 resulted from a continuing decline in both the number and dollar amount of maintenance renewals, mainly due to cost cutting efforts by our customers. In 2005, we also experienced lower volumes and dollar amounts of software solutions bookings, which contributed to the decrease in maintenance revenue in 2006 and 2005. In addition, we concluded four supply chain leader transactions in 2004, which are being recorded as subscription revenue. These transactions were executed with customers who were previously utilizing our software through perpetual license agreements with annual maintenance contracts. There can be no assurance that maintenance revenues will not continue to decline.

Contract. Contract revenue consists of license, services, and maintenance revenue attributable to those transactions for which we determined to change the accounting from revenue recognition under SOP 97-2 to contract accounting under SOP 81-1 in connection with the 2003 restatement of our consolidated financial statements for the years ended December 31, 2000 and 2001 and the first three quarters of 2002. Contract revenue is not indicative of the current performance of our business, as it reflects the recognition of deferred revenues for which cash was collected in prior periods. Contract revenue decreased \$38.4 million, or 90%, during 2006 and \$30.4 million, or 42%, during 2005. The decrease in contract revenue during 2006 and 2005 was a result of the lower amount of remaining deferred contract revenue, the decreased number of deferred transactions and the occurrence of fewer events that allow the recognition of this revenue. As of December 31, 2006, the deferred contract revenue balance was \$3.2 million, consisting of one transaction.

International Revenue. Our international revenues, included in the categories discussed above, primarily are generated from customers located in Europe, Asia, Latin America and Canada. International revenue totaled \$120.3 million, or 43% of total revenue, in 2006; \$158.2 million, or 47% of total revenue, in 2005; and \$144.8 million, or 40% of total revenue, in 2004. International revenue remained relatively consistent, as a percentage of total revenue, in 2006, 2005 and 2004.

Customer Concentration. No individual customer accounted for more than 10% of annual revenues in 2006, 2005 or 2004.

Table of Contents**Costs of Revenues**

The following table sets forth cost of revenues and the gross margins of selected items reflected in our consolidated statements of operations and comprehensive income. The year-to-year comparisons of financial results are not necessarily indicative of future results.

	Twelve Months Ended December 31, 2006		Twelve Months Ended December 31, 2005		Twelve Months Ended December 31, 2004	
		Gross Margin		Gross Margin		Gross Margin
Software solutions	\$ 12,862	83%	\$ 14,720	84%	\$ 20,137	63%
Services and maintenance	97,960	51%	103,758	49%	121,504	48%
Contract	311	92%	1,575	96%	4,718	94%
Amortization of acquired technology	21				369	
Total cost of revenues	\$ 111,154		\$ 120,053		\$ 146,728	

Cost of Software Solutions. Cost of software solutions consists of:

Salaries and other related costs of employees who provide essential services to customize or enhance the software for the customer

Commissions paid to non-customer third parties in connection with joint marketing and other related agreements, which are generally expensed when they become payable

Royalty fees associated with third-party software utilized with our technology. Such royalties are generally expensed when the products are shipped; however, royalties associated with fixed cost arrangements are generally expensed over the period of the arrangement.

The cost of user product documentation

The cost of delivery of software

Provisions for the estimated costs of servicing customer claims, which we accrue on a case-by-case basis

Cost of software solutions decreased \$1.9 million, or 13%, in 2006 and \$5.4 million, or 27%, in 2005. The decreases in 2006 and in 2005 were due to renegotiated prepaid third-party royalty agreements resulting in a lower expense run rate. Also included in cost of software solutions during 2004 was \$2.3 million of costs related to a large project that involved a customer dispute.

Cost of Services and Maintenance. Cost of services and maintenance includes expenses related to implementation, training, and customization and enhancement of previously licensed software solutions, as well as providing telephone support, upgrades and updated user documentation. The cost of services and maintenance decreased \$5.8 million, or 6%, in 2006. The decrease in 2006 includes decreases in payroll related costs of \$4.7 million, travel and entertainment of \$2.0 million and subcontractors of \$1.2 million. These decreases were partially offset by non-cash stock option expense of \$2.7 million. Average services and maintenance headcount decreased 5% in 2006 when compared to 2005.

The total cost of services and maintenance decreased \$17.7 million, or 15% in 2005. The decrease in 2005 includes decreases in payroll related costs of \$11.4 million, travel and entertainment of \$4.1 million and contract labor of \$1.4 million. Average services and maintenance headcount decreased 16% in 2005 when compared to 2004 which contributed to the reduction of payroll-related costs. In addition, our increased utilization

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

of India-based personnel to provide services and maintenance support contributed to the decrease in this expense.

Cost of Contract. Cost of contract decreased \$1.3 million, or 80%, in 2006 and \$3.1 million, or 67%, in 2005. Because contract expenses are recorded when the corresponding revenue is recognized, we expect cost of contract to vary. As of December 31, 2006, we had no remaining deferred contract costs.

Table of Contents

Amortization of Acquired Technology. In connection with our business acquisitions, we acquired developed technology that we offer as a part of our solutions. In accordance with applicable accounting standards, the amortization of acquired technology is included as a part of our cost of revenues because it relates to software products that are marketed to potential customers.

Operating Expenses

The following table sets forth operating expenses and the percentages of total revenue for those operating expenses as reported in our consolidated statements of operations and comprehensive income. The year-to-year comparisons of financial results are not necessarily indicative of future results:

	Twelve Months Ended December 31, 2006	Percent of Total Revenue	Twelve Months Ended December 31, 2005	Percent of Total Revenue	Twelve Months Ended December 31, 2004	Percent of Total Revenue
Sales and marketing	\$ 48,185	17%	\$ 51,727	15%	\$ 74,946	21%
Research and development	35,200	13%	37,337	11%	56,279	16%
General and administrative	56,129	20%	61,117	18%	71,646	20%
Amortization of intangibles	17				39	
Restructuring charges and adjustments	(403)		11,269	3%	2,688	1%
Total operating expenses	\$ 139,128		\$ 161,450		\$ 205,598	

Sales and Marketing Expense. Sales and marketing expense consists primarily of personnel costs, commissions, office facilities, travel, and promotional events such as trade shows, seminars, technical conferences, advertising and public relations programs. Sales and marketing expense decreased \$3.5 million, or 7%, in 2006. The decrease in 2006 includes decreases in payroll-related costs of \$5.6 million and decreases in overhead costs of \$1.2 million. These decreases were partially offset by an increase in non-cash stock option expense of \$3.5 million. Average sales and marketing staff decreased approximately 17% in 2006 when compared to 2005.

Sales and marketing expense decreased \$23.2 million, or 31%, in 2005. The decrease in expense includes decreases in payroll-related costs of \$12.7 million and decreases in travel and entertainment of \$4.1 million. Average sales and marketing headcount decreased 34% in 2005 when compared to 2004. Lower headcount and lower levels of sales led to reduced commissions based on lower bookings.

Research and Development Expense. Research and development expense consists of costs related to continued software development and product enhancements to existing software. Software development costs are expensed as incurred until technological feasibility has been established, at which time such costs are capitalized until the product is available for general release to customers. To date, the establishment of technological feasibility of our products and general release of such software has substantially coincided. As a result, software development costs qualifying for capitalization have been insignificant; therefore, we have not capitalized any software development costs other than those recorded in connection with our acquisitions.

Research and development expense decreased \$2.1 million, or 6%, in 2006. This decrease in expense includes a decrease in overhead expense of \$4.6 million, a decrease in facilities expense of \$1.0 million, a decrease in communications expense of \$0.4 million and a decrease in travel and entertainment expense of \$0.4 million. These decreases in expense were partially offset by an increase in payroll-related expense of \$1.1 million and non-cash stock option expense of \$3.5 million.

Research and development expense decreased \$18.9 million, or 34%, in 2005. This decrease in expense includes decreases in payroll-related expenses of \$14.5 million, contractor expense of \$1.3 million, and travel

Table of Contents

and entertainment expense of \$1.0 million. Average research and development headcount decreased 40% in 2005 when compared to 2004. In addition, our increased utilization of India-based personnel to provide research and development support also contributed to the decrease in this expense in 2005.

General and Administrative Expenses. General and administrative expense includes the personnel and other costs of our finance, legal, accounting, human resources, information systems and executive departments, as well as external litigation costs. General and administrative expense decreased \$5.0 million, or 8%, in 2006. This decrease reflects an accrual made in 2005 of approximately \$10.0 million for the estimated settlement of certain outstanding contingent liabilities. In addition, payroll-related expense decreased \$3.1 million and facilities expense decreased \$2.4 million in 2006. These decreases in the components of general and administrative expense were partially offset by an increase in stock compensation expense of \$5.7 million and an increase in indemnification expense of \$9.1 million.

General and administrative expenses decreased \$10.5 million, or 15%, in 2005. This decrease includes \$9.2 million of payroll related costs and a decrease of \$1.9 million of facilities expense. The decrease in payroll-related expenses is related to a decrease of 16% in average general and administrative headcount as compared to 2004, partially offset by the increased cost of our executive department.

Amortization of Intangible Assets and Impairment of Intangible Assets. From time to time, we have sought to enhance our product offerings through technology and business acquisitions. When an acquisition of a business is accounted for using the purchase method, the amount of the purchase price is allocated to the fair value of assets acquired, net of liabilities assumed. Any excess purchase price is allocated to goodwill. Intangible assets are amortized over their estimated useful lives, while goodwill is only written down when it is deemed to be impaired.

In accordance with Statement of Financial Accounting Standards (SFAS) No. 142, *Goodwill and Other Intangible Assets*, we test goodwill for impairment annually. Impairment is deemed to exist if the net book value of a reporting unit exceeds its estimated fair value. At December 31, 2006 we performed a review for impairment of goodwill and concluded there was no evidence of impairment related to the goodwill balance of \$14.8 million. Impairment testing was also conducted in 2005 and 2004 and no impairment was deemed necessary.

Restructuring Charges

SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities* (SFAS 146), requires that a liability for a cost associated with an exit or disposal activity be recognized and measured initially at fair value only when the liability is incurred. The statement applies to costs associated with an exit activity that does not involve an entity newly acquired in a business combination. An exit activity includes but is not limited to a restructuring, which is defined as a program that is planned and controlled by management, and materially changes either (a) the scope of a business undertaken by an enterprise, or (b) the manner in which the business is conducted.

In March 2004 we initiated a global workforce reduction plan to reduce our operating expenses and bring them in line with our revenue levels. In the first and second quarter of 2004, 163 employees were involuntarily terminated. During this period, severance costs of approximately \$5.1 million were recorded related to the severance payments to be paid to the employees involuntarily terminated.

In March 2005, we implemented a restructuring plan to resize our infrastructure and reduce our overhead to improve efficiencies and reduce operating expense. The restructuring included the involuntary termination of 184 employees and closing or partially vacating four office locations. During the first quarter of 2005, we recorded a restructuring charge of \$10.4 million for the involuntary terminations and \$2.1 million for the office closures.

Table of Contents

As of December 31, 2006, an accrual of approximately \$0.3 million, including \$0.1 million related to our 2001 and 2002 restructuring plans, remained in accrued liabilities. Additional details of the restructuring charges and remaining accruals are presented in *Note 11 Restructuring Charges and Adjustments* in our Notes to Consolidated Financial Statements.

Non-operating Expense, Net

Non-operating expense, net, was as follows:

	Twelve Months Ended December 31, 2006	Percent Change	Twelve Months Ended December 31, 2005	Percent Change	Twelve Months Ended December 31, 2004
Interest income	\$ 5,305	-31%	\$ 7,697	84%	\$ 4,179
Interest expense	(6,069)	-63%	(16,315)	-9%	(17,873)
Realized gains on investments, net	475	-95%	10,144	12741%	79
Foreign currency hedge and transaction losses, net	(219)	-95%	(4,217)	31%	(3,212)
(Loss) gain on extinguishment of debt		-100%	(3,017)	-236%	2,223
Other expense, net	(850)	-45%	(1,547)	45%	(1,069)
Total non-operating expense, net	\$ (1,358)		\$ (7,255)		\$ (15,673)

The decrease in interest income in 2006 as compared to 2005 was primarily the result of lower average balances of invested funds, partially offset by higher average interest rates earned on invested funds. The decrease in interest expense in 2006 as compared to 2005 is the result of lower debt levels. The decrease in realized gains on investments in 2006 as compared to 2005 is due to the sale of an investment in 2005 for approximately \$11.0 million that was non-recurring in nature. During 2006, foreign currency losses decreased due to favorable foreign currency exchange rate movements in 2006 when compared to 2005, relative to our foreign currency positions, and improved hedge effectiveness.

The increase in interest income in 2005 compared to 2004 was the result of higher market interest rates and cash balances. The decrease in interest expense in 2005 compared to 2004 was due to the repurchase of \$51.0 million of our 5.25% convertible subordinated notes during the year. The repurchase, of the \$51.0 million of our 5.25% convertible subordinated notes, together with the retirement of an additional \$235.0 million of the notes on December 28, 2005, resulted in a loss on debt extinguishment of \$3.0 million due to a 75 basis point call premium on the \$235.0 million and the write off of \$1.2 million of unamortized debt issuance costs. The increase in realized gains on investments in 2005 compared to 2004 is due to the sale of an investment in 2005 for approximately \$11.0 million that was non-recurring in nature. Foreign currency losses increased \$1.0 million in 2005 compared to 2004. The increased loss was due mainly to declining foreign currency exchange rates in 2005, relative to our foreign currency positions.

The market interest rates on investments and the relative exchange values of foreign currencies are influenced by the monetary and fiscal policies of the governments in the countries in which we operate. The nature, timing and extent of any impact on our financial statements resulting from changes in those governments' policies are not predictable. Risks associated with market interest rates and foreign exchange rates are discussed below under the section captioned *Sensitivity to Market Risks*.

Provision (Benefit) for Income Taxes

We recognized income tax expense of \$3.8 million and \$4.7 million in 2006 and 2005, respectively, and an income tax benefit of \$0.7 million in 2004, representing effective income tax rates of 13.6% in 2006, 5.1% in 2005 and 33.3% in 2004.

Table of Contents

The effective income tax rates during 2006, 2005 and 2004 differ from the U.S. statutory rate (35% for 2006 and 2005, and 34% for 2004) due to several factors. These factors include, among others, changes in our valuation allowance, the effect of foreign operations, state income taxes (net of federal income tax benefits), non-deductible meals and entertainment, and research and development tax credits. The effect of these factors on the income tax rate is detailed in *Note 13 Income Taxes* in our Notes to Consolidated Financial Statements.

At December 31, 2006, we maintained a full valuation allowance against our domestic net deferred tax assets and a valuation allowance of approximately \$1.1 million against our foreign net deferred tax assets. Each quarter, we review the necessity and amounts of the domestic and foreign valuation allowances. Despite the valuation allowance, the future tax-deductible benefits related to these deferred tax assets remain available to offset future taxable income over the remaining useful lives of the underlying deferred tax assets.

At December 31, 2006, we have recorded approximately \$7.4 million in tax contingency reserves in our taxes payable accounts relating to tax positions we have taken during tax years that remain open for examination by tax authorities.

Contractual Obligations

The following table summarizes our significant contractual obligations at December 31, 2006, and the effect such obligations are expected to have on our liquidity and cash flows in future periods. This table excludes amounts already recorded on our balance sheet as current liabilities at December 31, 2006.

			1-3	3-5	More Than
	Total	Less Than One Year	Years	Years	5 Years
Operating lease obligations (excluding restructured facilities)	\$ 36,242	\$ 13,061	\$ 19,211	\$ 3,772	\$
Operating leases for restructured facilities	2,529	981	619	619	310
Sub-lease income related to non-restructured facilities	(112)	(112)			
Sub-lease income related to restructured facilities	(2,314)	(765)	(619)	(619)	(310)
Long-term debt obligations (1)	124,523	4,313	8,625	8,625	102,961
Other purchase obligations (2)	13,489	11,793	1,696		
Total	\$ 174,358	\$ 29,271	\$ 29,532	\$ 12,397	\$ 102,961

¹ Included in the long-term debt obligations are semi-annual interest payments through December 15, 2015.

² Other purchase obligations and commitments include payments due under various types of licenses and maintenance obligations.

The expected timing of payment of the obligations discussed above is estimated based on current information. Timing of payments and actual amounts paid may be different depending on the time of receipt of goods or services or changes to agreed-upon amounts for some obligations.

Off-Balance-Sheet Arrangements

As of December 31, 2006, we did not have any significant off-balance-sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

Liquidity and Capital Resources

Our working capital was \$17.4 million at December 31, 2006, compared to a working capital deficiency of \$34.3 million at December 31, 2005, a change of \$51.7 million or 151%. The improvement resulted from a decrease in current liabilities of \$65.8 million (primarily comprised of decreases of \$25.8 million in deferred revenue, \$25.0 million in the current portion of long-term debt and \$14.7 million in accrued liabilities), partially offset by a decrease in current assets of \$14.1 million (primarily comprised of decreases of \$10.0 million in other current assets and \$3.5 million in cash and cash equivalents).

Table of Contents

Our working capital balance at December 31, 2006 included deferred revenue. At December 31, 2006, we had approximately \$74.0 million of deferred revenue recorded as a current liability, representing pre-paid revenue for all of our different revenue categories. Our deferred revenue balance includes a margin to be earned when it is recognized, so the conversion of the liability to revenue will require cash outflows that are less than the amount of the liability.

Cash and cash equivalents were \$109.4 million at December 31, 2006 compared to \$112.9 million at December 31, 2005, a decrease of \$3.5 million. The decrease in cash and cash equivalents was the result of \$14.8 million of cash provided by operating activities offset by \$2.1 million of cash used in investing activities and \$16.7 million of cash used in financing activities. Exchange rates had a positive impact on cash of \$0.6 million.

We had positive cash flow from operating activities of \$14.8 million during 2006. Cash inflows included \$10.5 million for platform technology licensing. We are pursuing other similar transactions, but there can be no assurance we will be successful at entering into additional platform technology transactions. Cash outflows for 2006 included \$12.0 million of employees bonuses accrued in 2005 and \$8.0 million for bonuses accrued during 2006, \$4.0 million related to the settlement of our outstanding litigation with Kmart, and \$3.8 million related to our 2006 director and officer insurance premium.

We used approximately \$2.1 million of cash in investing activities during 2006, including the purchase of premises and equipment of \$2.4 million and a business acquisition of \$0.6 million. These uses of cash were partially offset by proceeds of \$0.5 million from the sale of securities, \$0.2 million from the disposal of premises and equipment and \$0.1 million in decreases in restricted cash.

We used approximately \$16.7 million of cash in financing activities during 2006, including the \$25.0 million repurchase of debt and the payment of \$1.3 million of dividends on our Series B preferred stock. These uses of cash were partially offset by the issuance of an additional \$7.5 million of our 5% senior convertible notes.

We maintain a \$15.0 million letter of credit line. We are charged fees of 0.375% per year on the face amount of any outstanding letters of credit and 0.15% per year on the average daily unused amount of the line. Under the line, we are required to maintain restricted cash in a depository account maintained by the lender to secure letters of credit issued in connection with the line. The line has no financial covenants and expires on December 15, 2008. As of December 31, 2006, \$2.9 million in letters of credit were outstanding under this line and \$4.0 million in restricted cash was pledged as collateral.

We had \$86.3 million in face value of our 5% senior convertible notes outstanding at December 31, 2006. Holders of our senior convertible notes have the right to require us to repurchase all or any portion of the senior convertible notes on November 15, 2010 and may convert the senior convertible notes at any time on or after May 15, 2010. In addition, holders of the senior convertible notes may convert the senior convertible notes prior to May 15, 2010 upon the occurrence of any of the following events:

if the senior convertible notes have been called for redemption;

upon certain dividends or distributions to all holders of our common stock;

upon the occurrence of specified corporate transactions constituting a fundamental change (the occurrence of a change in control or a termination of trading, each as defined in the indenture governing our senior convertible notes);

if the average of the trading prices for the senior convertible notes during any five consecutive trading-day period is less than 98% of the average of the conversion values for the senior convertible notes (the product of the last reported sale price of our common stock and the conversion rate) during that period; or

at any time after May 15, 2008 if the closing sale price of our common stock is equal to or greater than \$23.21 for at least 20 trading days in the 30 consecutive trading day period ending on the last trading day of the immediately preceding fiscal quarter.

Table of Contents

Upon conversion of the senior convertible notes, we will be required to satisfy our conversion obligation with respect to the principal amount of the senior convertible notes to be converted in cash, with any remaining amount to be satisfied in shares of our common stock.

The indenture governing the 5% senior convertible notes contains a debt incurrence covenant that places restrictions on the amount and type of additional indebtedness that we can incur. Such covenant specifies that we shall not, and that we shall not permit any of our subsidiaries to, directly or indirectly, incur or guarantee or assume any indebtedness other than permitted indebtedness. Permitted indebtedness is defined in the indenture to include, among others, the following categories of indebtedness: (i) all indebtedness outstanding on November 23, 2005; (ii) indebtedness under the senior convertible notes; (iii) indebtedness under our \$15.0 million letter of credit line; (iv) between \$25.0 million and \$50.0 million of additional senior secured indebtedness (the maximum permitted amount to be determined by application of a formula contained in the indenture); and (v) at least \$100.0 million of additional subordinated indebtedness (the maximum permitted amount to be determined by application of a formula contained in the indenture).

We experienced negative cash flows during the quarter ended September 30, 2006, the quarter ended March 31, 2006 and each of the five years ended December 31, 2005, primarily due to sharp declines in our revenues and our historical inability to reduce our expenses to a level at or below the level of our revenues. We may be required to seek private or public debt or equity financing in order to support our operations, satisfy the conversion obligation with respect to our senior convertible notes and/or repay our senior convertible notes. The debt incurrence restrictions imposed by the indenture governing our senior convertible notes could restrict or impede our ability to incur additional debt. We may not be able to obtain additional debt or equity financing on satisfactory terms, or at all, and any new financing could have a substantial dilutive effect on our existing stockholders.

Sensitivity to Market Risks

Foreign Currency Risk. Revenues originating outside of the United States totaled 43%, 47% and 40% of total revenues in 2006, 2005 and 2004, respectively. Since we conduct business on a global basis in various foreign currencies, we are exposed to movements in foreign currency exchange rates. We utilize a foreign currency-hedging program that utilizes foreign currency forward exchange contracts to hedge various nonfunctional currency exposures. The objective of this program is to reduce the effect of changes in foreign currency exchange rates on our results of operations. Furthermore, our goal is to offset foreign currency transaction gains and losses recorded for accounting purposes with gains and losses realized on the forward contracts. Our hedging activities cannot completely protect us from the risk of foreign currency losses as our currency exposures are constantly changing and not all of these exposures are hedged. Details of our foreign currency risk management program are presented in *Note 12 Foreign Currency Risk Management* in our Notes to Consolidated Financial Statements.

Interest Rate Risk. Our investments are subject to interest rate risk. Interest rate risk is the risk that our financial condition and results of operations could be adversely affected due to movements in interest rates. We invest our cash in a variety of interest-earning financial instruments, including bank time deposits, money market funds and taxable and tax-exempt variable-rate and fixed-rate obligations of corporations, municipalities and local, state and national governmental entities and agencies. These investments are primarily denominated in U.S. Dollars. Cash balances in foreign currencies overseas are primarily operating balances and are generally invested in short-term time deposits of the local operating bank.

Due to the demand nature of our money market funds and the short-term nature of our time deposits and debt securities portfolio, these assets are sensitive to changes in interest rates. The Federal Reserve Board influences the general direction of market interest rates in the U.S. where the majority of our cash and investments are held. The Federal Reserve Board increased the discount rate by 100 basis points between December 31, 2005 and December 31, 2006. As of December 31, 2006, the weighted-average yield on time

Table of Contents

deposits and debt securities we held was 5.18% compared to 3.70% for time deposits and debt securities held as of December 31, 2005. If overall interest rates fall by 100 basis points in 2007, our interest income will decline approximately \$1.1 million, assuming investment levels consistent with December 31, 2006 levels.

Credit Risk. Financial assets that potentially subject us to a concentration of credit risk consist principally of investments and accounts receivable. Cash on deposit is held with financial institutions with high credit standings. Debt security investments are generally in highly-rated corporations and municipalities as well as agencies of the U.S. government; however, a significant portion of these investments are in corporate debt securities, which carry a higher level of risk compared to municipal and U.S. government-backed securities. Our customer base consists of large numbers of geographically diverse enterprises dispersed across many industries. As a result, concentration of credit risk with respect to accounts receivable is not significant. However, we periodically perform credit evaluations for most of our customers and maintain reserves for potential losses. In certain situations we may seek letters of credit to be issued on behalf of some customers to mitigate our exposure to credit risk. We currently use foreign exchange contracts to hedge the risk associated with receivables denominated in foreign currencies. Risk of non-performance by counterparties to such contracts is minimal due to the size and credit standings of the financial institutions involved.

Market Price Risk. We maintain minority equity investments in various publicly traded companies for business and strategic purposes. The remaining carrying value of minority equity investments was zero at December 31, 2006.

We also invested in several privately-held companies, many of which can still be considered in the start-up or development stages or may no longer be viable or operational. As a result of significant declines in the expected realizable amounts of these investments, in previous periods we wrote off the book value of most of these investments as the decline in fair value was considered other than temporary. During the fourth quarter of 2005, we wrote off the book value of our \$1.0 million investment in Integrated Development Enterprise, Inc. (IDe) preferred stock. This investment was initially made during 2005 in connection with the employment of our CEO, Michael McGrath. See *Note 16 Related Party Transactions* in our Notes to Consolidated Financial Statements.

Inflation. Inflation has not had a material impact on our results of operations or financial condition.

Recently Issued Accounting Pronouncements

See *Note 1 Summary of Significant Accounting Policies* in our Notes to Consolidated Financial Statements for details of recently issued accounting pronouncements and their expected impact on our financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information required by this Item is included in the section captioned *Sensitivity to Market Risks* in Part II, Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The information required by this Item is included in Part IV, Item 15(a)(1) and (2).

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

Table of Contents**ITEM 9A. CONTROLS AND PROCEDURES**

Evaluation of Disclosure Controls and Procedures. As required by Rule 13a-15(b) under the Securities Exchange Act of 1934 (Exchange Act), our management, including our Chief Executive Officer and Chief Financial Officer, carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. As defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, disclosure controls and procedures are controls and other procedures of our company that are designed to ensure that information required to be disclosed by our company in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by our company in the reports we file or submit under the Exchange Act is accumulated and communicated to our company's management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report in that they were designed to provide reasonable assurance that information required to be disclosed by our company in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. It should be noted that any system of controls, however well designed and operated, is based in part upon certain assumptions and can provide only reasonable, and not absolute, assurance that the objectives of the system are met.

Management's Report on Internal Control Over Financial Reporting. Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. Our management, including our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of our internal control over financial reporting based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on our evaluation under the framework in *Internal Control - Integrated Framework*, our management concluded that our internal control over financial reporting was effective at December 31, 2006. Our management's assessment of our internal control over financial reporting as of December 31, 2006 was audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report which is included herein.

Our internal control system is designed to provide reasonable assurance to our management and Board of Directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation and may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Changes in Internal Control over Financial Reporting. Except as described in the next sentence, during our most recent fiscal quarter there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. During the three months ended December 31, 2006, we took steps to enhance our internal expertise and we remediated our previously disclosed material weakness through additional hiring and training of qualified finance and accounting personnel, including the hiring of a certified public accountant into a newly-created position to review and advise on emerging trends and concepts within generally accepted accounting principles.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

i2 Technologies, Inc.

Dallas, Texas

We have audited management's assessment, included in the accompanying Management's Report on Internal Control over Financial Reporting, that i2 Technologies, Inc. and subsidiaries (the Company) maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the accompanying consolidated financial statements as of and for the year ended December 31,

Table of Contents

2006 of the Company and our report dated March 30, 2007 expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding the Company's adoption of SFAS No. 123(R), *Share Based Payment*, in 2006.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

i2 Technologies, Inc.

Dallas, Texas

We have audited the accompanying consolidated balance sheets of i2 Technologies, Inc. and subsidiaries (the Company) as of December 31, 2006 and 2005, and the related consolidated statements of operations and comprehensive income, stockholders' deficit, and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2006 and 2005, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, in 2006 the Company adopted Statement of Financial Accounting Standards No. 123(R), *Share-Based Payment*.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2006, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 30, 2007 expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

i2 TECHNOLOGIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Table dollars in thousands, except per share data)

1. Summary of Significant Accounting Policies

Nature of Operations. We are a provider of supply chain management solutions, including various supply chain solutions consisting of software and service offerings. We operate our business in one business segment. Supply chain management is the set of processes, technology and expertise involved in managing supply, demand and fulfillment throughout divisions within a company and with its customers, suppliers and partners. The goals of our solutions include increasing supply chain efficiency and enhancing customer and supplier relationships by managing variability, reducing complexity, improving operational visibility, increasing operating velocity and integrating planning and execution. Our offerings are designed to help customers better achieve the following critical business objectives:

Visibility a clear and unobstructed view up and down the supply chain

Planning supply chain optimization to match supply and demand considering system-wide constraints

Collaboration interoperability with supply chain partners and elimination of functional silos

Control management of data and business processes across the extended supply chain

Our application software is often bundled with other product offerings we provide such as business optimization and technical consulting, training, solution maintenance, software upgrades and development.

Principles of Consolidation. The consolidated financial statements include the accounts of i2 Technologies, Inc. and its wholly-owned subsidiaries. All inter-company balances and transactions have been eliminated in consolidation.

Use of Estimates. Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to revenue recognition, provision for doubtful accounts and sales returns, fair value of investments, fair value of acquired intangible assets and goodwill, useful lives of intangible assets and property and equipment, income taxes, restructuring obligations, fair value of stock options, warrants and derivatives, and contingencies and litigation, among others. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ significantly from the estimates made by management with respect to these items and other items that require management's estimates.

Cash and cash equivalents. Cash and cash equivalents include cash on hand, demand deposits with financial institutions, short-term time deposits and other liquid investments in debt securities with initial maturities of less than three months when acquired by us.

Restricted Cash. At December 31, 2006 restricted cash totaled \$4.0 million pledged as collateral for outstanding letters of credit. At December 31, 2005, restricted cash totaled \$4.8 million, of which \$4.6 million was pledged as collateral for outstanding letters of credit and \$0.2 million was in a restricted employee benefit account. (See Note 6 *Borrowings and Debt Issuance Costs*)

Allowance for Doubtful Accounts. The allowance for doubtful accounts is a reserve established through a provision for bad debts charged to expense and represents our best estimate of probable losses resulting from non-payment of amounts recorded in the existing accounts receivable portfolio. The allowance, in our judgment,

Table of Contents

i2 TECHNOLOGIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

is necessary to reserve for known and inherent collection risks in the accounts receivable portfolio. In estimating the allowance for doubtful accounts, we consider our historical write-off experience, accounts receivable aging reports, the credit-worthiness of individual customers, economic conditions affecting specific customer industries and general economic conditions, among other factors. Should any of these factors change, our estimate of probable losses due to bad debts could also change, which could affect the level of our future provisions for bad debts.

Financial Instruments. Financial assets that potentially subject us to a concentration of credit risk consist principally of investments and accounts receivable. Cash on deposit is held with financial institutions with high credit standings. Debt security investments are generally in highly rated corporations and municipalities as well as agencies of the U.S. government. Our customer base consists of large numbers of geographically diverse customers dispersed across many industries. As a result, concentration of credit risk with respect to accounts receivable is not significant. However, we periodically perform credit evaluations for most of our customers and maintain reserves for potential losses. In certain situations we may require letters of credit to be issued on behalf of some customers to mitigate our exposure to credit risk. We may also use foreign exchange contracts to hedge the risk in receivables denominated in foreign currencies. Risk of non-performance by counterparties to such contracts is minimal due to the size and credit standings of the financial institutions used.

Premises and Equipment. Premises and equipment are recorded at cost and are depreciated over their useful lives ranging from three to seven years using the straight-line method. Leasehold improvements are amortized over the shorter of the expected term of the lease or estimated useful life.

Goodwill. We test goodwill for impairment once annually, or more frequently if an event occurs or circumstances change that may indicate that the fair value of our reporting unit is below its carrying value. Goodwill is tested for impairment using a two-step approach. The first step is to compare the fair value of the reporting unit to its carrying amount, including goodwill. If the fair value of the reporting unit is greater than its carrying amount, goodwill is not considered impaired and the second step is not required. If the fair value of the reporting unit is less than its carrying amount, the second step of the impairment test measures the amount of the impairment loss, if any. The second step of the impairment test is to compare the implied fair value of goodwill to its carrying amount. If the carrying amount of goodwill exceeds its implied fair value, an impairment loss is recognized equal to that excess. The implied fair value of goodwill is calculated in the same manner that goodwill is calculated in a business combination, whereby the fair value of the reporting unit is allocated to all of the assets and liabilities of that unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price. The excess purchase price over the amounts assigned to assets and liabilities would be the implied fair value of goodwill.

As stated above, we currently operate as a single reporting unit and all of our goodwill is associated with the entire company. Accordingly, we generally assume that the minimum fair value of our single reporting unit is our market capitalization, which is the product of (i) the number of shares of common stock issued and outstanding and (ii) the market price of our common stock.

Goodwill totaled \$14.8 million and \$14.4 million at December 31, 2006 and December 31, 2005, respectively. This increase was due to the goodwill attributable to the purchase of RiverOne. We performed an impairment test on goodwill at December 31, 2006 and December 31, 2005, and determined there was no evidence of impairment.

Capitalized Research and Development Costs. Software development costs are expensed as incurred until technological feasibility has been established, at which time such costs are capitalized until the product is

Table of Contents

i2 TECHNOLOGIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

available for general release to customers. To date, the establishment of technological feasibility of our products has coincided with the general release of such software. As a result, we have not capitalized any such costs other than those recorded in connection with our acquisitions.

Revenue Recognition. We derive revenues from licenses of our software and related services, which include assistance in implementation, integration, customization, maintenance, training and consulting. We recognize revenue for software and related services in accordance with Statement of Position (SOP) 81-1, *Accounting for Certain Construction Type and Certain Production Type Contracts*, SOP 97-2, *Software Revenue Recognition*, as modified by SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition with Respect to Certain Transactions*, SEC Staff Accounting Bulletin (SAB) 104, *Revenue Recognition*.

Software Solutions Revenue. Recognition of software solutions revenue occurs under SOP 81-1 and under SOP 97-2, as amended.

Software solutions revenue recognized under SOP 81-1 includes both fees associated with licensing of our products, as well as any fees received to deliver the licensed functionality (for example, the provision of essential services). Essential services involve customizing or enhancing the software so that the software performs in accordance with specific customer requirements. Arrangements accounted for under SOP 81-1 follow either the percentage-of-completion method or the completed contract method. The percentage-of-completion method is used when the required services are quantifiable, based on the estimated number of labor hours necessary to complete the project, and under that method revenues are recognized using labor hours incurred as the measure of progress towards completion but is limited to revenue that has been earned by the attainment of any milestones included in the contract. We do not capitalize costs associated with services performed where milestones have not been attained. The completed contract method is used when the required services are not quantifiable, and under that method revenues are recognized only when we have satisfied all of our product and/or service delivery obligations to the customer. Similar to the treatment of milestones, we do not capitalize or defer costs associated with services performed on contracts recognized under the completed contract method that have not been completed.

Under SOP 97-2, software license revenues are generally recognized upon delivery, provided persuasive evidence of an arrangement exists, fees are fixed or determinable and collection is deemed probable. We evaluate each of these criteria as follows:

Evidence of an arrangement: We consider a non-cancelable agreement signed by the customer to be evidence of an arrangement.

Delivery: Delivery is considered to occur when media containing the licensed programs is provided to a common carrier or, in the case of electronic delivery, the customer is given access to the licensed programs. Our typical end user license agreement does not include customer acceptance provisions.

Fixed or determinable fee: We consider the fee to be fixed or determinable if the fee is not subject to refund or adjustment and the payment terms are within our normal established practices. If the fee is not fixed or determinable, we recognize the revenue as amounts become due and payable.

Collection is deemed probable: We conduct a credit review for significant transactions at the time of the arrangement to determine the credit-worthiness of the customer. Collection is deemed probable if we expect that the customer will pay amounts under the arrangement as payments become due. If we determine that collection is not probable, we defer the revenue and recognize the revenue upon receipt of cash. Based on our collections history in certain countries, we apply a cash-basis recognition requirement for software solutions agreements in those countries.

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Revenue for software solution arrangements that include one or more additional elements (i.e., services and maintenance) to be delivered at a future date is generally recognized using the residual method as set forth in SOP 98-9. Under the residual method, the fair value of the undelivered element(s) is deferred, and the remaining portion of the arrangement fee is recognized as license revenue. If fair values have not been established for the undelivered element(s), all revenue associated with the arrangement is deferred until the earlier of the point at which all element(s) have been delivered or the fair value of the undelivered elements has been determined. Fair value for an individual element within an arrangement may be established when that element, when contracted for separately, is priced in a consistent manner. Fair value for our maintenance and consulting services has been established based on our maintenance renewal rates and consulting billing rates, respectively. Arrangements that include a right to unspecified future products are accounted for as subscriptions and recognized ratably over the term of the arrangement. Software solution license fees from reseller arrangements are generally based on the sublicenses granted by the reseller and recognized when the license is sold to the end customer.

Services Revenue. Services revenue is primarily derived from fees for implementation, integration, consulting and training services as well as fees received to customize or enhance a previously purchased licensed product that result from arrangements negotiated and executed subsequent to the license arrangement. Also included is reimbursable expense revenue representing travel expenses incurred by our consultants and billed to our customers for reimbursement pursuant to a signed agreement. Services revenue is generally recognized when services are performed. Contractual terms may include the following payment arrangements: fixed fee, full-time equivalent, milestone, and time and material. In order to recognize service revenue, the following criteria must be met:

Signed agreement: The agreement must be signed by the customer.

Fee is determinable: The signed agreement must specify the fees to be received for the services.

Delivery has occurred: Delivery is substantiated by time cards and, where applicable, supplemented by an acceptance from the customer that milestones as agreed in the statement of work have been met.

Collectibility is probable: We conduct a credit review for significant transactions at the time of the engagement to determine the credit-worthiness of the customer. We monitor collections over the term of each project, and if a customer becomes delinquent, the revenue may be deferred.

Maintenance Revenue. Maintenance revenue consists of fees generated by providing software maintenance, upgrades and support to customers, such as telephone support, new releases of software and updated user documentation. A customer typically prepays maintenance and support fees for an initial period, and the related revenue is deferred and generally recognized over the term of such initial period. Maintenance is renewable by the customer on an annual basis thereafter. Rates for maintenance, including subsequent renewal rates, are typically established based upon a specified percentage of net license fees as set forth in the contract.

Contract Revenue. Contract revenue consists of fees generated from license, services and maintenance revenue attributable to those transactions for which we determined to change the accounting from revenue recognition under SOP 97-2 to contract accounting under SOP 81-1 in connection with the 2003 restatement of our consolidated financial statements for the years ended December 31, 2001 and 2000 and the first three quarters of 2002. As of December 31, 2006, \$3.2 million of contract revenue remained on our balance sheet as deferred revenue.

Royalties and Affiliate Commissions. Royalties paid for third-party software products integrated with our technology are expensed when the products are shipped. Commissions payable to affiliates in connection with sales assistance are generally expensed when the commission becomes payable. Accrued royalties payable totaled \$2.1 million as of December 31, 2006 and 2005, while accrued affiliate commissions payable totaled \$1.1 million and \$0.4 million as of December 31, 2006 and 2005, respectively.

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Concurrent Transactions. We occasionally enter into transactions which are concluded at or about the same time as other arrangements with the same customer. These concurrent transactions are accounted for under Accounting Principles Board (APB) Opinion No. 29, *Accounting for Non-monetary Transactions*, as interpreted by EITF 01-02 *Interpretations of APB Opinion No. 29*. Generally, the recognition of a gain or loss on the exchange is measured based on the fair value of the assets involved to the extent that the fair value can be reasonably determined. A transaction that is not a culmination of the earnings process is recorded based on the net book value of the asset relinquished.

Deferred Taxes. Deferred tax assets and liabilities represent estimated future tax amounts attributable to the differences between the carrying amounts of assets and liabilities in the consolidated financial statements and their respective tax bases. These estimates are computed using the tax rates in effect for the applicable period. Realization of our deferred tax assets is, for the most part, dependent upon our U.S. consolidated tax group of companies having sufficient federal taxable income in future years to utilize our domestic net operating loss carry-forwards before they expire. We adjust our deferred tax valuation allowance on a quarterly basis in light of certain factors, including our financial performance.

Loss Contingencies. There are times when non-recurring events occur that require management to consider whether an accrual for a loss contingency is appropriate. Accruals for loss contingencies typically relate to certain legal proceedings, customer and other claims and litigation. Accruals for loss contingencies are included in accrued liabilities on our consolidated balance sheet. As required by SFAS No. 5, *Accounting for Contingencies*, we determine whether an accrual for a loss contingency is appropriate by assessing whether a loss is deemed probable and can be reasonably estimated. We analyze our legal proceedings, warranty and other claims and litigation based on available information to assess potential liability. We develop our views on estimated losses in consultation with outside counsel handling our defense in these matters, which involves an analysis of potential results assuming a combination of litigation and settlement strategies. The adverse resolution of any one or more of these matters over and above the amounts that have been estimated and accrued in the current consolidated financial statements could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Restructuring Charges. We recognize restructuring charges consistent with applicable accounting standards. We reduce charges for obligations on leased properties with estimated sublease income. Furthermore, we analyze current market conditions, including current lease rates in the respective geographic regions, vacancy rates and costs associated with subleasing, when evaluating the reasonableness of future sublease income. The accrual for office closure and consolidation is an estimate that assumes certain facilities will be subleased or the underlying leases will otherwise be favorably terminated prior to the contracted lease expiration date. Significant subjective judgment and estimates must be made and used in calculating future sublease income. While the current accrual represents our best estimate of our expected costs to exit these obligations, variances between our expected and actual sublease income may result in significant restructuring charge adjustments in future periods.

Net Income (Loss) Per Common Share. We calculate net income (loss) per share in accordance with SFAS No. 128, *Earnings per Share*, and EITF 03-6, *Participating Securities and the Two Class Method under FASB Statement No. 128, Earnings per Share*. EITF 03-6 clarifies the use of the two-class method of calculating earnings per share as originally prescribed in SFAS No. 128. Effective for periods beginning after March 31, 2004, EITF 03-6 provides guidance on how to determine whether a security should be considered a participating security for purposes of computing earnings per share and how earnings should be allocated to a participating security when using the two-class method for computing earnings per share. We have determined that our redeemable preferred stock represents a participating security because it has voting rights and, therefore, we have calculated basic net income (loss) per share consistent with the provisions of EITF 03-6 for all periods presented. Diluted net income (loss) per common share includes (i) the dilutive effect of stock options, stock rights and warrants granted using the treasury stock method, (ii) the effect of contingently issuable shares earned

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

during the period and (iii) shares issuable under the conversion feature of our convertible notes and preferred stock using the if-converted method. A reconciliation of the weighted-average shares used in calculating basic earnings per common share and the weighted average common shares used in calculating diluted earnings per common share for 2006, 2005 and 2004 is provided in *Note 9 Stockholders' Deficit and Income (Loss) Per Common Share*.

Stock-Based Compensation Plans. Prior to January 1, 2006, employee compensation expense under stock option plans was reported only if options were granted below market price at grant date in accordance with the intrinsic value method of APB No. 25, *Accounting for Stock Issued to Employees*, and related interpretations. Because the exercise price of our employee stock options equaled the market price of the underlying stock on the date of grant, no compensation expense was recognized on options granted.

Effective January 1, 2006, we adopted SFAS No. 123(R), *Share-Based Payment*, which is a revision to SFAS No. 123, *Accounting for Stock Based Compensation*. See *Note 10, Stock Based Compensation Plans* for further discussion.

Foreign Currency Translation. The functional currency for the majority of our foreign subsidiaries is the local currency. Assets and liabilities are translated at exchange rates in effect at the balance sheet date while income and expense amounts are translated at average exchange rates during the period. The resulting foreign currency translation adjustments are disclosed as a separate component of stockholders' deficit and other comprehensive income. The functional currency of one significant foreign subsidiary is the US dollar; therefore, there is no translation adjustment required for this subsidiary. Transaction gains and losses arising from transactions denominated in a non-functional currency and due to changes in exchange rates are recorded in foreign currency hedge and transaction losses, net in our consolidated statements of operations.

Fair Values of Financial Instruments. Fair values of financial instruments are estimated using relevant market information and other assumptions. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates. The estimated fair value approximates carrying value for all financial instruments except investment securities and long-term debt. Fair values of securities are based on quoted market prices or dealer quotes, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar instruments. The fair value of long-term debt is based on quoted market prices, if available. If a quoted market price is not available, fair value is estimated by discounting future cash flows using the interest rates currently offered for similar debt of similar remaining maturity. At December 31, 2006, the fair value of our outstanding 5% convertible notes approximates their carrying value.

Comprehensive Income. Comprehensive income includes all changes in equity during a period, except those resulting from investments by and distributions to owners.

Recent Accounting Pronouncements

On July 13, 2006, the FASB issued FIN No. 48 *Accounting for Uncertainty in Income Taxes – an Interpretation of FASB Statement No. 109* (FIN 48). FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 utilizes a two-step approach for evaluating tax positions. Recognition (Step 1) occurs when an enterprise concludes that a tax position, based solely on its technical merits, is more likely than not to be sustained upon examination. Measurement (Step 2) is only addressed if Step 1 has been satisfied. Under Step 2, the tax benefit is measured at the largest amount of benefit, determined on a cumulative probability basis, that is more likely than not to be realized upon final settlement. FIN 48's use of the term "more likely than not" in Steps 1 and 2 is consistent with how the term is used in FAS 109 (i.e., the likelihood of an occurrence greater than 50%). FIN 48 applies to all tax positions related to income taxes subject to FAS 109, and is effective for

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

fiscal years beginning after December 15, 2006. We will adopt FIN 48 effective January 1, 2007, as required. Upon adoption, the cumulative effect of this change in accounting principle will be accounted for as an adjustment to our accumulated deficit. We continue to evaluate the potential impact of this standard on our financial statements.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. This Statement applies to other accounting pronouncements that require or permit fair value measurements, the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. SFAS No. 157 is effective for fiscal years beginning after December 15, 2007. We plan to adopt SFAS No. 157 beginning in the first quarter of 2008. We are currently evaluating the impact of SFAS No. 157 on our financial statements.

In September 2006, the SEC issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements* (SAB 108), which provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. SAB 108 is effective for fiscal years ending after November 15, 2006. Adoption of this guidance was not material to our financial position or results of operations.

In September 2006, the FASB issued SFAS 158, *Employers Accounting for Defined Benefit Pension and Other Postretirement Plans an amendment of FASB Statements No. 87, 88, 106, and 132(R)*. SFAS 158 was effective for fiscal years ending after December 15, 2006. The adoption of SFAS No. 158 had no impact on our financial statements.

In February 2007, the FASB issued SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115*. SFAS No. 159 permits an entity to choose to measure certain financial assets and liabilities at fair value. This statement is effective for fiscal years beginning after November 15, 2007. We have not yet evaluated the potential impact of this standard.

2. Other Non-Current Assets

Other non-current assets includes unamortized debt issuance costs, long-term lease deposits, software, information databases and installed customer base/relationships acquired from third parties or in business combinations. Unamortized debt issuance costs of \$4.2 million, as of December 31, 2006, are being amortized to interest expense over the life of the debt at a rate of approximately \$1.1 million per year. This unamortized debt issuance cost will be fully amortized in approximately 4 years. Other non-current assets include intangible assets that are evaluated for impairment in accordance with SFAS No. 144 *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS No. 144). SFAS No. 144 requires that we evaluate long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable based on expected undiscounted cash flows attributable to that asset. The amount of any impairment is measured as the difference between the carrying value and the fair value of the impaired asset. Details of other non-current assets at December 31, 2006 and December 31, 2005 are below:

	December 31,	
	2006	2005
Unamortized debt issuance costs	\$ 4,203	\$ 4,906
Lease deposits	3,119	
Capitalized product development and technology	250	
Other	33	
	\$ 7,605	\$ 4,906

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****3. Investment Securities**

Short-term time deposits and other liquid investments in debt securities with original maturities of less than three months when acquired by us are classified as available-for-sale and reported as cash and cash equivalents in our consolidated balance sheets. Based on their maturities, interest rate movements do not affect the balance sheet valuation of these investments. Investment securities reported as cash and cash equivalents as of December 31, 2006 and 2005 were as follows:

	2006	2005
Short-term time deposits	\$ 4,048	\$ 7,244
Commercial paper	86,376	28,094
	\$ 90,424	\$ 35,338

In addition to our investment securities, the company holds minority equity investments in several privately-held companies, many of which can still be considered in the start-up or development stages or may no longer be viable or operational. At December 31, 2006, the remaining carrying amount of our investments was zero.

4. Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable at December 31, 2006 and 2005 include billed receivables of approximately \$24.1 million and approximately \$23.0 million, respectively and unbilled receivables of approximately \$1.8 million and approximately \$2.9 million, respectively. Unbilled receivables relate to revenues that have been recognized, but not invoiced. Such receivables are generally invoiced in the month following recognition as revenue.

Activity in the allowance for doubtful accounts was as follows:

	2006	2005	2004
Balance at beginning of period	\$ 901	\$ 985	\$ 3,098
Credit for bad debts charged to costs and expenses	(479)	(45)	(1,623)
Write-offs, net of recoveries and other adjustments	(229)	(39)	(490)
Balance at end of period	\$ 193	\$ 901	\$ 985

5. Premises and Equipment and Lease Commitments

Premises and equipment as of December 31, 2006 and 2005 consisted of the following:

	2006	2005
Computer equipment and software	\$ 39,714	\$ 38,362
Furniture and fixtures	23,015	23,508
Leasehold improvements	19,589	19,976
	82,318	81,846

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

Less: Accumulated depreciation	(71,627)	(67,790)
	\$ 10,691	\$ 14,056

Depreciation of premises and equipment totaled \$5.9 million in 2006, \$6.3 million in 2005 and \$11.4 million in 2004. Depreciation is calculated using the straight-line method. We disposed of net premises and equipment totaling \$0.2 million in 2006, \$1.1 million in 2005 and \$1.4 million in 2004.

F-13

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

We lease our office facilities and certain office equipment under operating leases that expire at various dates through 2011. We have renewal options for most of our operating leases. We incurred total rent expense of \$10.2 million in 2006, \$11.8 million in 2005 and \$12.9 million in 2004.

Future minimum lease payments under all non-cancellable operating leases, excluding estimated sublease income of \$2.4 million, as of December 31, 2006 are as follows:

2007	14,042
2008	10,945
2009	8,885
2010	3,803
2011	588
Thereafter	507
Total	\$ 38,770

6. Borrowings and Debt Issuance Costs*5% Senior Convertible Notes*

In November and December 2005 we issued \$78.8 million and in January 2006 we issued \$7.5 million of 5% senior convertible notes with a maturity date of November 15, 2015. In connection therewith, in November 2005, we issued 484,889 detachable warrants for common stock with an exercise price of \$15.4675 per share, subject to adjustment, and a 10-year life to the purchasers of the notes, on a pro-rata basis in accordance with their investment in the notes. The notes are effectively junior to any of our secured obligations to the extent of the value of the assets securing such obligations. There are no subsidiary company guarantees related to the 5% senior convertible notes.

The notes are convertible, subject to certain conditions, into cash and shares, if any, of our common stock at an initial conversion price of \$15.4675 per share, which is subject to adjustment. Upon conversion, we will satisfy our conversion obligation with respect to the principal amount of the notes to be converted in cash, with any remaining amount to be satisfied in shares of our common stock.

Holders of the notes may convert their notes at any time on or after May 15, 2010. In addition, holders of the notes may convert the notes at any time prior to May 15, 2010 upon the occurrence of any of the following events:

if the notes have been called for redemption;

upon certain dividends or distributions to all holders of our common stock;

upon the occurrence of specified corporate transactions constituting a fundamental change (the occurrence of a change in control or a termination of trading, each as defined in the indenture governing the notes);

Edgar Filing: I2 TECHNOLOGIES INC - Form 10-K

if the average of the trading prices for the notes during any five consecutive trading-day period is less than 98% of the average of the conversion values for the notes (the product of the last reported sale price of our common stock and the conversion rate) during that period; or

at any time after May 15, 2008 if the closing sale price of our common stock is equal to or greater than \$23.21 for at least 20 trading days in the 30 consecutive trading day period ending on the last trading day of the immediately preceding fiscal quarter.

i2 TECHNOLOGIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Holders of the notes have the right to require us to repurchase all or any portion of the notes on November 15, 2010 at a purchase price equal to 100% of the principal amount of the notes to be repurchased plus any accrued and unpaid interest to but excluding such repurchase date.

If we redeem our Series B Preferred Stock, we must also offer to repurchase the notes for cash at a purchase price equal to 100% of the principal amount of the notes plus shares equal to the conversion value, if any, plus accrued and unpaid interest to but excluding the repurchase date; provided, that if we redeem less than all of the outstanding shares of our Series B Preferred Stock, we shall be obligated to repurchase only an equivalent and proportionate amount of the notes.

The notes contain provisions that allow the holders, upon a change in control or a termination of trading of our common stock, to require us to repurchase for cash any or all of the notes at 100% of the principal amount plus accrued and unpaid interest. If the change in control or termination of trading occurs prior to November 15, 2010, a holder who elects to convert will be entitled to receive a make-whole premium, equal to the approximate lost option time value.

Prior to May 20, 2008, the Notes are not redeemable at our option. On or after May 20, 2008, we may redeem the Notes at any time or from time to time in whole or in part, for cash, at a redemption price equal to 100% of the principal amount plus accrued and unpaid interest to but excluding the redemption date, so long as (i) the last reported sale price of our Common Stock has exceeded 175% of the conversion price then in effect for at least 20 trading days in the 30 consecutive trading days ending on the trading day prior to the date upon which we deliver to the holders the notice of redemption and (ii) on the date that we deliver a redemption notice through the date of redemption, the Common Stock issuable upon conversion of the Notes is either (1) covered by a registration statement covering resales thereof that is effective and available for use and is expected to remain effective and available for use for the 30 days following the date of such redemption notice or (2) eligible to be resold by non-affiliates pursuant to Rule 144(k) under the Securities Act of 1933, as amended.

The indenture governing our 5% senior convertible notes contains a debt incurrence covenant that places restrictions on the amount and type of additional indebtedness that we can incur. Such covenant specifies that we shall not, nor shall we permit any of our subsidiaries to, directly or indirectly, incur or guarantee or assume any indebtedness other than permitted indebtedness. Permitted indebtedness is defined in the indenture to include, among others, the following categories of indebtedness: (i) all indebtedness outstanding on November 23, 2005; (ii) indebtedness under the senior convertible notes; (iii) indebtedness under our \$15.0 million letter of credit line; (iv) between \$25.0 million and \$50.0 million of additional senior secured indebtedness (the maximum permitted amount to be determined by application of a formula contained in the indenture); and (v) at least \$100.0 million of additional subordinated indebtedness (the maximum permitted amount to be determined by application of a formula contained in the indenture).

In accounting for the 5% notes, we determined that components of the notes, including the over-allotment option, a portion of the conversion option and a portion of the liquidated damages clause were derivatives. Derivative instruments are contractual commitments or payment exchange agreements between counterparties that derive their value from an underlying asset, index, interest rate or exchange rate. Derivatives must be valued separately and accounted for as an asset, liability or equity, depending on their characteristics. We determined each derivative component should be recorded as a liability. We valued the derivative components using a Black Scholes model or using a model determining what penalties would be incurred if certain conditions were not met. We determined the derivatives to be immaterial.

We assessed the characteristics of the warrants and determined that they should be reflected in the stockholders' deficit portion of our Consolidated Balance Sheet, valued using a Black Scholes model. In the

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Black Scholes valuation we used a then current stock price of \$13.36, a strike price of \$15.4675, an estimated life of 2 years, a risk free rate of 4.35% and a volatility rate of 94.7919%. The effect of recording the warrants as equity is that the debt is recorded at a discount to its liquidation value and this discount of \$3.1 million is being accreted through earnings over five years. We determined a five year life to be appropriate due to the conversion features in the debt and the probability that the debt would be converted prior to the ultimate maturity.

5.25% Convertible Subordinated Notes

On August 18, 2004, we repurchased \$40.0 million of our 5.25% convertible subordinated notes due on December 15, 2006. We recognized a net \$2.2 million gain for the early retirement of this debt due to a 6.5% purchase discount. In September and October of 2005, we repurchased \$51.0 million of this debt. The repurchase, of the \$51.0 million, together with the retirement of an additional \$235.0 million of the notes on December 28, 2005, resulted in a loss on debt extinguishment of \$3.0 million due to a 75 basis point call premium on the \$235.0 million and the write off of \$1.2 million of unamortized debt issuance costs. The \$235.0 million was retired with proceeds from the sale of our 5% notes, the sale of Trade Services Corporation (TSC) and the sale of our content and data services business as well as with existing cash balances. These gains and losses are reported in non-operating income (expense), on the consolidated statements of operations and comprehensive income. After these retirements, \$25.0 million of the 5.25% convertible subordinated notes remained outstanding at December 31, 2005, and were classified as a current liability at that date. During 2006, we retired the remaining 5.25% convertible subordinated notes. We repurchased \$1.1 million and \$2.0 million at approximately par during March 2006 and May 2006, respectively. On December 15, 2006, we repaid the remaining \$21.9 million of the convertible subordinated notes at maturity.

Note Payable

On December 6, 2005, we retired a \$6.8 million non-negotiable promissory note due and payable on December 15, 2006.

Other

We maintain a \$15.0 million letter of credit line. We are charged fees of 0.375% per year on the face amount of any outstanding letters of credit and 0.15% per year on the average daily unused amount of the line. Under the line, we are required to maintain restricted cash in a depository account maintained by the lender to secure letters of credit issued in connection with the line. The line has no financial covenants and expires on December 15, 2008. As of December 31, 2006, \$2.9 million in letters of credit were outstanding under this line and \$4.0 million in restricted cash was pledged as collateral.

7. Commitments and Contingencies*Governmental Investigations and Actions*

On June 9, 2004, the company settled an SEC enforcement proceeding brought against the company in connection with matters relating to the 2003 restatement of our consolidated financial statements. Without admitting or denying the SEC's substantive findings against it, the company consented to a cease-and-desist order requiring future compliance with specific provisions of the federal securities laws and paid a \$10.0 million civil penalty. The settlement of the SEC enforcement proceedings covered the company only. On July 15, 2005, the SEC filed a civil action against three former officers of the company relating to events that occurred prior to the restatement of the company's financial statements in 2003. The civil charges against each of such former officers were settled on various dates in 2006 and early 2007. The most recent of such settlements, involving the civil charges against Gregory A. Brady, occurred on February 15, 2007.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Indemnification Agreements

We have indemnification agreements with certain of our officers, directors and employees that may require us, among other things, to indemnify such officers, directors and employees against certain liabilities that may arise by reason of their status or service as directors, officers or employees and to advance their expenses incurred as a result of any proceeding against them as to which they could be indemnified. We have also entered into agreements regarding the advancement of costs with certain other officers and employees.

Pursuant to these indemnification and cost-advancement agreements, we have advanced fees and expenses incurred by certain current and former directors, officers and employees in connection with the governmental investigations and actions related to the 2003 restatement of our consolidated financial statements and other matters. We incurred approximately \$14.0 million, \$4.9 million and \$4.5 million of expense for legal fees and expenses for current and former employees during 2006, 2005 and 2004, respectively.

In an effort to reduce our future obligations in respect of such legal fees and expenses, on December 15, 2006 the company entered into a Settlement Agreement With Mutual Releases with Mr. Brady (the Settlement Agreement). The Settlement Agreement provided for (i) certain payments by the company to finally settle various issues of advancement and indemnification under existing agreements by the company to provide Mr. Brady with indemnification as well as an existing court order, and (ii) mutual general releases by Mr. Brady and the company, each in favor of the other. Pursuant to the terms of the Settlement Agreement, in January 2007 the company paid an aggregate of \$2.5 million in full settlement and compromise of all claims of Mr. Brady under the existing indemnification agreements and the court order. We had accrued the \$2.5 million as of December 31, 2006. Under the terms of the Settlement Agreement, the company shall have no further obligation to advance costs, fees or expenses to Mr. Brady or to indemnify Mr. Brady in connection with any present, threatened or future litigation by virtue of the fact that Mr. Brady was a director, officer, employee or agent of the company or was serving at any time at the request of the company as a director, officer, employee or agent of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise.

We may continue to advance fees and expenses incurred by certain other current and former directors, officers and employees in the future. The maximum potential amount of future payments we could be required to make under these indemnification and cost-advancement agreements is unlimited. Additionally, our corporate by-laws allow us to choose to indemnify any employee for certain events or occurrences while the employee is, or was, serving at our request in such capacity.

Under the terms of our software license agreements with our customers, we agree that in the event the licensed software infringes upon any patent, copyright, trademark, or any other proprietary right of a third-party, it will indemnify our customer licensees against any loss, expense, or liability from any damages that may be awarded against our customer. We include this infringement indemnification in substantially all of our software license agreements and selected managed service arrangements. In the event the customer cannot use the software or service due to infringement and we can not obtain the right to use, replace or modify the license or service in a commercially feasible manner so that it no longer infringes then we may terminate the license and provide the customer a pro-rata refund of the fees paid by the customer from the infringing license or service. We have recorded no liability associated with this indemnification, as we are not aware of any pending or threatened infringement actions that are probable losses. We believe the estimated fair value of these intellectual property indemnification clauses is minimal.

If we believe a liability associated with any of the aforementioned indemnification obligations becomes probable and the amount of the liability is reasonably estimable or the maximum amount of a range of loss is reasonably estimable, then an appropriate liability will be established.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Internal Revenue Service Audit

In 2004, we filed a protest in response to an Internal Revenue Service examination report regarding matters relating to the timing of our remittance of withholding taxes associated with the exercise of certain stock options by employees in the 2000 tax year. Ultimately, our protest regarding the IRS's position on the matter was reviewed by the IRS Appeals Division. On December 14, 2006, the IRS notified us that no deficiency or over-assessment exists and that no further action is required of i2.

India Tax Assessments

We are under tax examinations in India primarily related to our intercompany pricing for services rendered by our Indian subsidiary to other i2 companies and our qualification for a tax holiday. We have been assessed approximately \$3.3 million, \$1.1 million, and \$2.0 million for the Indian statutory fiscal years ended March 31, 2002, 2003 and 2004, respectively. We have paid approximately \$3.1 million of the assessments related to the Indian statutory fiscal year ended March 31, 2002.

We believe the Indian tax authorities' positions regarding our intercompany transactions and tax holiday qualification are without merit and that all intercompany transactions were conducted at appropriate pricing levels and that our operations qualify for the tax holiday claimed. Accordingly, we have appealed all of the assessments discussed above and expect the ultimate resolution will not exceed the tax contingency reserves we have established for these matters.

We have also sought assistance from the United States competent authority under the mutual agreement procedure of the income tax treaty between the United States and India. This assistance does not guarantee favorable resolution of these assessments but provides us with an opportunity to resolve these matters in an environment which includes governmental representatives of both countries. By invoking the mutual agreement procedure and pursuant to our requests for a Stay of Demand for Payment, we are required to issue a bank guarantee in favor of the Indian government in an amount equal to the assessed tax and interest. We have issued such bank guarantee regarding the assessment related to the Indian statutory fiscal year ended March 31, 2003. A similar bank guarantee for the Indian statutory fiscal year ended March 31, 2004 is likely to be issued in the future.

Japan Tax Examination

In January 2006, the tax examination by the National Tax Agency in Japan regarding withholding taxes on intercompany payments made by our subsidiary in Japan was closed and no assessment was made.

Certain Accruals

We have accrued for estimated losses in the accompanying consolidated financial statements for matters where we believe the likelihood of an adverse outcome is probable and the amount of the loss is reasonably estimable. We are subject to various claims and legal proceedings that arise in the ordinary course of our business from time to time, including claims and legal proceedings that have been asserted against us by former employees and certain customers, and have been in negotiations to settle certain of those contingencies. The adverse resolution of any one or more of those matters or the matters described in this Note 7 over and above the amount, if any, that has been estimated and accrued in our consolidated financial statements could have a material adverse effect on our business, financial condition, results of operations or cash flows.

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****8. Stock Transactions**

On June 28, 2005 we entered into a Common Stock Purchase Agreement with R² Investments, LDC, an affiliate of Q Investments. Pursuant to the terms and conditions of the Purchase Agreement, R² purchased 1,923,077 shares of i2's common stock, par value \$0.00025 per share, at \$7.80 per share, the closing price on June 23, 2005 when the transaction was approved by i2's Board of Directors. The sale resulted in proceeds of \$14.9 million after issuance costs of approximately \$0.1 million.

On June 3, 2004, we sold 100,000 shares of our 2.5% Series B Convertible Preferred Stock to R² Investments, LDC, pursuant to a Preferred Stock Purchase Agreement, dated April 27, 2004. The purchase price for the Series B preferred stock was \$1,000 per Series B share, or \$100.0 million in the aggregate. Pursuant to the terms of the Preferred Stock Purchase Agreement, R² Investments, LDC has certain preemptive rights upon the issuance of certain of our securities during the three-year period ending June 3, 2007. Dividends on the Series B preferred stock, which may be paid in cash or in additional shares of Series B preferred stock, at our option, will be payable semi-annually at the rate of 2.5% per year. The Series B preferred stock will automatically convert into shares of our common stock on June 3, 2014 and will be convertible into shares of common stock at the option of the holder at any time prior thereto. The conversion price of \$23.15 per share, is subject to certain adjustments, including but not limited to adjustments for certain issuances of our equity securities at a price per share that is less than the conversion price then in effect during the two year period ending June 3, 2006. If we were entitled to effect a conversion we would issue approximately 4.5 million shares in 2006 and 2005, with a value of approximately \$103.8 million at December 31, 2006 and \$63.4 million at December 31, 2005. Under certain circumstances, we will also have the right to redeem the Series B preferred stock. Upon a change in control, unless otherwise agreed to by holders of a majority of outstanding Series B shares, we will be required to exchange the outstanding shares of Series B preferred stock for cash at 110% of face value plus all accrued but unpaid dividends. The exchange amount pursuant to this provision as of December 31, 2006 and December 31, 2005 would be approximately \$115.8 million and \$114.4 million, respectively. We may, at our option, redeem the Series B shares at any time after June 3, 2008 for cash at 104% of face value plus all accrued but unpaid dividends. The redemption amount pursuant to this provision as of December 31, 2006 and December 31, 2005 would be \$109.5 million and \$108.2 million, respectively. The Series B preferred stock is recorded net of \$4.7 million of issuance costs, consisting of legal and investment banking fees incurred to complete the transaction. The issuance costs are being accreted over a ten-year period through the date of automatic conversion. In 2006, 2005 and 2004 we recorded issuance cost accretion of approximately \$0.4 million, \$0.5 million and \$0.3 million, respectively, and issued 1,289 shares or \$1.3 million, 2,551 shares or \$ 2.6 million and 1,448 or \$1.4 million, respectively, of our Series B preferred stock as payment of our dividend to R² Investments, LDC. In 2006 we also paid a cash dividend of \$1.3 million on our Series B preferred stock. Subsequent to this transaction, R² Investments, LDC became a related party.

9. Stockholders' Deficit and Income (Loss) Per Common Share

Reverse Stock Split. All references to common stock and per share amounts for periods prior to February 17, 2005 have been retroactively restated to reflect the 1-for-25 reverse stock split of our common stock we implemented on February 16, 2005.

Stock Rights Plan. On January 17, 2002, our Board of Directors approved adoption of a stockholder rights plan and declared a dividend of one preferred share purchase right for each outstanding share of common stock. After adjusting for the 1-for-25 reverse stock split we implemented on February 16, 2005, each share of common stock has attached to it one right to purchase 25 units of one one-thousandth of a share of Series A junior participating preferred stock at a price of \$75.00 per unit. The rights, which expire on January 17, 2012, will only become exercisable upon distribution. Distribution of the rights will not occur until ten days after the earlier of

Table of Contents

i2 TECHNOLOGIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(i) the public announcement that a person or group has acquired beneficial ownership of 15.0% or more of our outstanding common stock or
(ii) the commencement of, or announcement of an intention to make, a tender offer or exchange offer that would result in a person or group acquiring the beneficial ownership of 15.0% or more of our outstanding common stock.

The purchase price payable, and the number of units of Series A preferred stock issuable, upon exercise of the rights are subject to adjustment from time to time to prevent dilution in the event of a stock dividend or the grant of certain rights to purchase units of Series A preferred stock at a price less than the then current market price of the units of Series A preferred stock, among other things. The number of outstanding rights and the number of units of Series A preferred stock issuable upon exercise of each right are also subject to adjustment in the event of a stock split of the common stock or a stock dividend on the common stock payable in common stock prior to the distribution date.

Shares of Series A preferred stock purchasable upon exercise of the rights are not redeemable. Each share of Series A preferred stock will be entitled to a dividend of 40 times the dividend declared per share of common stock. In the event of liquidation, each share of Series A preferred stock will be entitled to a payment of the greater of (i) 40 times the payment made per share of common stock or (ii) \$1,000. Each share of Series A preferred stock will have 40 votes, voting together with the common stock. Finally, in the event of any merger, consolidation or other transaction in which shares of common stock are exchanged, each share of Series A preferred stock will be entitled to receive 40 times the amount received per share of common stock. These rights are protected by customary anti-dilution provisions. Because of the nature of the dividend, liquidation and voting rights, the value of the 25 units of Series A preferred stock purchasable upon exercise of each right should approximate the value of one share of common stock.

If, after the rights become exercisable, we are acquired in a merger or other business combination transaction, or 50% or more of our consolidated assets or earning power are sold, proper provision will be made so that each holder of a right will thereafter have the right to receive upon exercise that number of shares of common stock of the acquiring company having a market value of two times the exercise price of the right.

If any person or group becomes the beneficial owner of 15.0% or more of the outstanding shares of common stock, proper provision will be made so that each holder of a right, other than rights beneficially owned by the acquiring person (which will thereafter be void), will have the right to receive upon exercise that number of shares of common stock or units of Series A preferred stock (or cash, other securities or property) having a market value of two times the exercise price of the right.

We may redeem the rights in whole, but not in part, at a price of \$0.25 per right at the sole discretion of our Board of Directors at any time prior to distribution of the rights. At December 31, 2006 and December 31, 2005, none of the rights had been exercisable. The terms of the rights may be amended by our Board of Directors without the consent of the holders of the rights except that after the distribution of the rights, no amendment may adversely affect the interests of the holders of the rights. Until a right is exercised, the holder of a right will have no rights by virtue of ownership as a stockholder of the company, including, without limitation, the right to vote or to receive dividends.

The rights have significant anti-takeover effects by causing substantial dilution to a person or group that attempts to acquire us on terms not approved by our Board of Directors. The rights should not interfere with any merger, or other business combination approved by the Board of Directors. The rights may be redeemed by us at the redemption price of \$0.25 per right prior to the occurrence of a distribution date.

Net Income (Loss) Per Common Share. Basic net income (loss) per common share was computed by dividing net income (loss) applicable to common stockholders by the weighted average number of common

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

shares outstanding for the reporting period following the two-class method. Under the two-class method, participating convertible securities are required to be included in the calculation of basic net income when the effect is dilutive. Accordingly, for the year ended December 31, 2006 and December 31, 2005, the effect of the convertible preferred stock is included in the calculation of basic net income per share. The convertible preferred stock was not dilutive for the year ended December 31, 2004.

Diluted income (loss) per common share includes the dilutive effect of stock options, share rights awards, and warrants granted using the treasury stock method, and the effect of contingently issuable shares earned during the period and shares issuable under the conversion feature of our convertible debt and convertible preferred stock using the if-converted method. A loss causes all common stock equivalents to be anti-dilutive due to an increase of the weighted average shares from the potential dilution that could occur if securities or other contracts were exercised or converted into common stock. EITF 04-8 requires the inclusion of the effect of contingently convertible instruments in the calculation of diluted income per share including when the market price of our common stock is below the conversion price of the convertible security and the effect is not anti-dilutive. Accordingly, the effect of our convertible debt is included in the calculation of diluted earnings per share. The effect of our convertible preferred stock is included in basic earnings per share under the two-class method per EITF 03-6,

Participating Securities and the Two-Class Method under FASB No. 128 *Earnings per Share*; therefore, it is similarly included in diluted income (loss) per share when the effect is dilutive.

The following is a reconciliation of the number of shares used in the calculation of basic income (loss) per share under the two-class method and diluted earnings (loss) per share and the number of anti-dilutive shares excluded from such computations for 2006, 2005 and 2004.

	December 31,		
	2006	2005	2004
Common and common equivalent shares outstanding using two-class method basic:			
Weighted average common shares outstanding	20,808	19,675	18,004
Participating convertible preferred stock	4,520	4,409	
Total common and common equivalent shares outstanding using two-class method basic	25,328	24,084	18,004
Effect of dilutive securities:			
Outstanding stock option and share right awards	527	281	
Warrants	27	104	
Weighted average common and common equivalent shares outstanding diluted	25,883	24,469	18,004
Anti-dilutive shares excluded from calculation:			
Outstanding stock option and share right awards	1,145	3,653	4,300
Convertible debt	1,820	5,333	368
Convertible preferred stock			2,519
Total anti-dilutive shares excluded from calculation	2,965	8,986	7,187

Table of Contents

i2 TECHNOLOGIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

10. Stock-Based Compensation Plans.

Employee Stock Purchase Plans. We maintain stock purchase plans for the benefit of our employees and the employees of our wholly-owned subsidiaries. The purchase plans are designed to allow eligible employees to purchase shares of our common stock through periodic payroll deductions. Payroll deductions may not exceed 15% of a participant's base salary, and employees may purchase a maximum of 320 shares per purchase period under the purchase plans. The purchase price per share is 85% of the lesser of the fair market value of our common stock at the start of the purchase period or the fair market value at the end of the purchase period. Participation may be terminated at any time by a participating employee and automatically ends upon termination of employment. Unless extended or terminated earlier, the plan will terminate on the last business day in April 2007.

1995 Stock Option/Stock Issuance Plan. The 1995 Stock Option/Stock Issuance Plan, a stockholder approved stock-based compensation plan, replaced our original 1992 Stock Plan. All options outstanding under the 1992 Plan were incorporated into the 1995 Plan; however, all outstanding options under the 1992 Plan continue to be governed by the terms and conditions of the existing option agreements for those options. The 1995 Plan is divided into three equity programs: (i) the Discretionary Option Grant Program, (ii) the Stock Issuance Program and (iii) the Automatic Option Grant Program.

The Discretionary Option Grant Program provides for the grant of incentive stock options to employees and for the grant of nonqualified stock options to employees, directors and consultants. Exercise prices may not be less than 100% and 85% of the fair market value per share of our common stock on the date of grant for incentive options and nonqualified stock options, respectively. Options granted under this program generally expire ten years after the date of grant. Prior to March 2001, options granted under the Discretionary Option Grant Program generally vested in four equal annual increments. Options granted after March 2001 generally vest 1% on the date of grant, 24% on the first anniversary of the grant date and the remaining options vest in 36 equal monthly increments thereafter. Some options granted under the Discretionary Option Grant Program may be immediately exercisable, subject to a right of repurchase at the original exercise price for all unvested shares.

The Stock Issuance Program provides for the issuance of shares of our common stock to any person at any time, at such prices and on such terms as established by the plan administrator. The purchase price per share cannot be less than 85% of the fair market value of our common stock on the issuance date. Shares of our common stock may also be issued pursuant to share right awards, such as restricted stock units that entitle the recipients to receive those shares upon the attainment of designated performance goals or the satisfaction of specified service requirements.

The Automatic Option Grant Program provides that each person who is first elected or appointed as a non-employee member of our Board of Directors shall automatically be granted nonqualified options to purchase 6,000 shares of our common stock at the fair market value on the date of grant. On the date of each Annual Meeting of Stockholders, each non-employee member of the Board of Directors will automatically be granted additional options to purchase 4,250 shares of our common stock, subject to certain conditions. Options granted to eligible non-employee Board members under the Automatic Option Grant Program vest in three equal annual installments, with the first such installment vesting one year from the option grant date. On January 16, 2007, the Board of Directors approved an amendment to the Automatic Option Grant Program of the i2 Technologies 1995 Stock Option/Stock Issuance Plan, subject to stockholder approval, to revise the automatic option grant program. See *Note 17 Subsequent Events*.

The 1995 Plan has an automatic share increase feature whereby the number of shares of our common stock reserved for issuance under the plan will automatically increase on the first trading day of January each calendar year by an amount equal to 5.0% of the sum of (a) the total number of shares of our common stock outstanding

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

on the last trading day in December of the immediately preceding calendar year, plus (b) the total number of shares of our common stock repurchased by us on the open market during the immediately preceding calendar year pursuant to a stock repurchase program. In no event shall any such annual increase exceed 1,600,000 shares of our common stock or such lesser number of shares of our common stock as determined by our Board of Directors in its discretion. Based upon the number of shares reserved for issuance under the plan at December 31, 2005, we limited the number of additional shares reserved in January 2006 to 10,000. Through December 31, 2006, we have reserved a total of 11,824,212 shares of our common stock for issuance under the plan. The number of shares for which an individual may receive options, stock appreciation rights and other stock-based awards in his or her initial year of hire is limited to 1,000,000. Unless extended or terminated earlier, the plan will terminate on October 14, 2014.

2001 Non-officer Stock Option/Stock Issuance Plan. In March 2001, the Board of Directors adopted the 2001 Non-officer Stock Option/Stock Issuance Plan. Based on the provisions of the 2001 Plan, its adoption did not require stockholder approval and accordingly such approval was not obtained. Under the provisions of this plan, 800,000 shares have been reserved for issuance. The 2001 Plan is divided into two equity programs: (i) the Discretionary Option Grant Program and (ii) the Stock Issuance Program.

The Discretionary Option Grant Program provides for the grant of nonqualified stock options to non-officer employees and consultants. Exercise prices may be less than, equal to or greater than the fair market value per share of our common stock on the date of grant. Options granted under this program generally expire ten years after the date of grant. Prior to March 2001, options granted under the Discretionary Option Grant Program generally vested 25% on the first anniversary of the grant date with the remaining options vesting in 36 equal monthly increments. Options granted after March 2001 generally vest 1% on the date of grant, 24% on the first anniversary of the grant date and the remaining options vest in 36 equal monthly increments thereafter. Some options granted under the Discretionary Option Grant Program may be immediately exercisable, subject to a right of repurchase at the original exercise price for all unvested shares.

The Stock Issuance Program provides for the issuance of shares of our common stock to non-officer employees and consultants at any time, at such prices and on such terms as established by the plan administrator. Shares of our common stock may also be issued pursuant to share right awards that entitle the recipients to receive those shares upon the attainment of designated performance goals or the satisfaction of specified service requirements.

Assumed Stock Option Plans. We have assumed the stock option plans of various companies we have acquired. While our stockholders approved some of the acquisitions, our stockholders have not specifically approved any of the assumed stock option plans. A total of approximately 1,500,000 shares of our common stock have been reserved for issuance under the assumed plans.

Modification of Stock Options Granted to CEO. On December 21, 2006, we entered into an amendment to the employment agreement with our CEO to modify the period during which the CEO's vested equity instruments are exercisable following a termination of the CEO's employment resulting from death or disability, a voluntary termination or a termination without cause. Following any such termination, such equity instruments shall be exercisable until the later of: (a) the 15th day of the third month following the 90th day after the later of the date of such termination event or the date that the CEO has a termination of service, for any or no reason, as Chairman of the Board of Directors of the Company (subject to the CEO having been previously elected as Chairman), or (b) December 31 of the calendar year in which occurs the 90th day after the later of the date of such termination event or the date that the CEO has a termination of service, for any or no reason, as Chairman of the Board of Directors of the Company (subject to the CEO having been previously elected as Chairman).

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Notwithstanding the foregoing, any equity instrument shall be cancelled and no longer exercisable upon the expiration of the stated term of such equity instrument. In connection with the amended employment agreement we recorded non-cash stock option expense of \$1.3 million in December 2006 and expect to record an additional \$0.5 million during the first half of 2007.

Exchange of Stock Options for Restricted Stock Units. In April 2006, we announced that we filed an exchange offer with the SEC under which eligible employees had the opportunity to exchange certain stock options for restricted stock units. We offered to exchange restricted stock units for outstanding options with exercise prices per share equal to or greater than \$45.00. The number of restricted stock units issued in exchange for a properly tendered eligible option was based on exchange ratios that depended on the exercise price of the tendered option. The exchange ratios represented the number of option shares to be exchanged for one restricted stock unit and ranged from 5-for-1 to 72-for-1. The exchange offer expired on May 31, 2006; 797 employees were eligible to participate and 549 employees participated, 1,033,498 options were tendered and cancelled, and 133,033 restricted stock units were issued under such exchange offer. Through the twelve months ended December 31, 2006, we recorded \$1.9 million of expense related to the amortization of the grant date fair value of options subject to exchange and the restricted stock units issued. An additional approximately \$0.9 million of expense associated with the restricted stock units will be recognized over the remainder of the two-year vesting period of those awards.

Adoption of SFAS No. 123(R). Effective January 1, 2006, we adopted SFAS No. 123(R), *Share-Based Payment*, which is a revision to SFAS No. 123, *Accounting for Stock Based Compensation*, using the modified prospective method of transition. Under the provisions of SFAS No. 123(R), the estimated fair value of share based awards granted under stock incentive plans are recognized as compensation expense over the vesting period. Using the modified prospective method, compensation expense is recognized beginning with the effective date of adoption of SFAS No. 123(R) for all share based payments (i) granted after the effective date of adoption and (ii) granted prior to the effective date of adoption and that remain unvested on the date of adoption.

Prior to January 1, 2006, we accounted for stock based compensation plans using the intrinsic value method of accounting in accordance with Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25), and its related interpretations. Under the provisions of APB 25, no compensation expense was recognized when stock options were granted with exercise prices equal to or greater than the fair market value per share of our common stock on the date of grant.

We have elected to apply the simplified method to determine the hypothetical additional paid-in capital (APIC) pool provided by FSP FAS 123(R) 3, *Transition Election Related to Accounting for the Tax Effects of Share-Based Payment Awards*. There was no effect on our financial statements from making this election. Since we have significant tax net operating loss carryforwards, any excess tax benefit will not be realized until the period in which the losses have been fully utilized and the benefit reduces income taxes payable. In the event of a shortfall (i.e., the tax benefit realized is less than the amount previously recognized through periodic stock compensation expense recognition and related deferred tax accounting), the shortfall would be charged against APIC to the extent of previous excess benefits, if any, including the hypothetical APIC pool, and then to income tax expense. During 2006, the shortfalls had no net impact on income tax expense because of our valuation allowance. We intend to settle our stock-based awards with new shares.

We recorded approximately \$16.3 million of total stock based compensation expense for the twelve-month period ended December 31, 2006, as required by the provisions of SFAS No. 123(R). Included in the stock compensation expense was \$0.9 million in restricted stock expense for the twelve months ended December 31, 2006. Due to our net operating losses, there was no tax expense or benefit recorded in connection with our stock-based compensation expense. The stock-based compensation expense is calculated on a straight-line basis over

Table of Contents**i2 TECHNOLOGIES, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

the vesting periods of the related options. This charge had no impact on our reported cash flow. The allocation of the stock-based compensation expense for the twelve months ended December 31, 2006 is as follows:

	Year Ended December 31, 2006
Cost of services and maintenance	\$ 2,800
Sales and marketing	3,644
Research and development	3,743
General and administrative	6,106
Total	\$ 16,293

Under the modified prospective method of SFAS No. 123(R), we are not required to restate prior financial statements to reflect expensing of share-based compensation. As required by SFAS No. 123(R), we have presented pro forma disclosures of our net income (loss) and net income (loss) per share for the years ended December 31, 2005 and 2004 assuming the estimated fair value of the options granted prior to January 1, 2006 was amortized to expense over the option-vesting period as illustrated below:

	2005	2004
Net income (loss) applicable to common stockholders	\$ 84,309	\$ (3,072)
Add: Total stock-based employee compensation expense included in reported net income (loss)	997	1,299
Less: Total stock-based employee compensation expense determined under fair value based method for all awards	(30,401)	(47,113)
 Pro forma net income (loss)	 \$ 54,905	 \$ (48,886)
 Net income (loss) per common share Basic		
As reported	\$ 3.50	\$ (0.17)
Pro forma	\$ 2.17	\$ (2.72)
 Net income (loss) per common share Diluted		
As reported	\$ 3.45	\$ (0.17)
Pro forma	\$ 2.12	\$ (2.72)

Fair values of stock options and employee stock purchase plan (ESPP) shares are estimated at the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:
