PART I

ITEM 1. BUSINESS
INTRODUCTION

Harte-Hanks, Inc. (Harte-Hanks) is a worldwide direct and targeted marketing company that provides direct marketing services and shopper advertising opportunities to a wide range of local, regional, national and international consumer and business-to-business marketers. We manage our operations through two operating segments: Direct Marketing, which operates both nationally and internationally, and Shoppers, which operates in local and regional markets in California and Florida.

Marketing today is under intense focus in many organizations. Many corporations have a chief-level executive charged with marketing who is under pressure to utilize a combination of data, technology, channels and resources to demonstrate a return on marketing investment. This has led many to use direct and targeted marketing, as accountability and measurability are hallmarks of the discipline, allowing customer insight to be leveraged to create and accelerate value. Direct Marketing, which represented 63% of our total revenues in 2007, is a leader in the movement toward highly targeted marketing. Our Shoppers business applies geographic targeting principles. Our strategy is based on six key elements:

Being a market leader in each of our businesses;

Increasing revenues through growing our base businesses;

Introducing new services, products and innovations;

Entering new markets and making acquisitions;

Using technology to create competitive advantages; and

Employing people who understand our clients' businesses and markets;

Harte-Hanks is the successor to a newspaper business begun in Texas in the early 1920s by Houston Harte and Bernard Hanks. In 1972, Harte-Hanks went public and was listed on the New York Stock Exchange (NYSE). We became private in a leveraged buyout initiated by management in 1984. In 1993, we again went public and listed our common stock on the NYSE. In 1997, we sold all of our remaining traditional media operations (consisting of newspapers, television and radio companies) in order to focus all of our efforts on two business segments: Direct Marketing and Shoppers. See segment financial information in Note O: Business Segments in the Notes to Consolidated Financial Statements.

Harte-Hanks provides public access to all reports filed with the Securities and Exchange Commission (SEC) under the Securities Exchange Act of 1934, as amended (the 1934 Act). These documents may be accessed free of charge on our website at the following address: <http://www.harte-hanks.com>. Since November 15, 2002, these documents have been provided as soon as practical after they are filed with the SEC. The documents may also be found at the SEC's website at <http://www.sec.gov>. Additionally, we have adopted and posted on our website a code of ethics that applies to our principal executive officer, principal financial officer and principal accounting officer. Our website also includes our corporate governance guidelines and the charters for each of our audit, compensation, and nominating and corporate governance committees. We will provide a printed copy of any of the aforementioned documents to any requesting stockholder.

DIRECT MARKETING

General

Edgar Filing: HARTE HANKS INC - Form 10-K

Direct marketing services are targeted to specific industries or markets with services and software products tailored to each industry or market. Our Direct Marketing clients include many of the largest retailers; financial companies including banks, financing companies, mutual funds and insurance companies; high-tech and telecommunications companies; and pharmaceutical companies and healthcare organizations. Direct Marketing

Table of Contents

clients are also from such selected markets as automotive, consumer packaged goods, government/not-for-profit, business services, energy, publishing, travel/hospitality and utilities. We believe that we generally have the ability to provide services to new industries and markets by modifying our services and applications as opportunities are presented. In 2007, 2006 and 2005, Harte-Hanks Direct Marketing had revenues of \$732.5 million, \$709.7 million, and \$694.6 million, respectively, which accounted for approximately 63%, 60%, and 61% of our total revenues, respectively.

Depending on the needs of our clients, our Direct Marketing capabilities are provided in an integrated approach through more than 30 facilities worldwide, more than 10 of which are located outside of the United States. Each of these centers possesses some specialization and is linked with others to support the needs of our clients.

We use various capabilities and technologies to enable our clients to identify, reach, influence and nurture their customers. Harte-Hanks Direct Marketing improves the return on its clients' marketing investment by increasing their prospect and customer value through solutions and services organized around five groupings of integrated activities:

Information (data collection/management);

Opportunity (data access/utilization);

Insight (data analysis/interpretation);

Engagement (program and campaign creation and development); and

Interaction (program execution).

Harte-Hanks Direct Marketing uses various capabilities and technologies as enablers to capture, analyze and disseminate customer and prospect data across all points of customer contact. Using both proprietary software and open software solutions, we build contact databases for our clients using the information gained from the client's marketing and communication activities across different media such as mail, websites, e-mail, inbound and outbound teleservices, trade shows, point-of-sale and other sources. We believe that these databases enable clients to measure the return on their marketing communications investments and make more informed decisions about future marketing efforts. We help clients manage the inquiries they receive from a myriad of sources related to their marketing efforts. These inquiries, or leads, are qualified, tracked and distributed both to appropriate sales channels and to client management for analysis, decision-making and/or additional interaction in order for clients to manage their customer and prospect relationships more effectively. These leads are also developed for business-to-business clients through our CI Technology Database and through research efforts of our Aberdeen business.

Our Direct Marketing activities often start with the development of a roadmap, followed by building customized marketing databases for specific clients and providing them with easy-to-use tools to perform analysis and to target their best customers and prospects. Using our proprietary name and address matching software, the Trillium Software System[®], we investigate and standardize large numbers of customer records from multiple sources, integrate them into a single database for each client and, if needed, append demographic and lifestyle information.

Our Allink[®] databases are built for clients and tailored to specific market segments. These databases are moved to the client's site or maintained at Harte-Hanks with online access from client locations. In addition to building a client's database and providing solutions for analytics and campaign management, we perform regular database updates.

These solutions are linked to our service bureau. Our service bureau services include preparing list selections, maximizing deliverability and reducing clients' mailing costs through our Advanced Data Quality services, including Trillium Software and Global Address capabilities in addition to sophisticated postal coding, hygiene and address updates through a non-exclusive National Change of Address license with the U.S. Postal Service.

Table of Contents

As a further extension of the client's marketing arm, we provide customer insight by using marketing research and analytics services. Specific capabilities include tracking and reporting, media analysis, modeling, database profiling, primary data collection, marketing applications, consulting and program development.

We engage with our client's customers by offering direct marketing agency services that combine information-based strategy and brand-building creative efforts that are channel independent, using both traditional direct and interactive media.

In addition, Harte-Hanks provides a variety of services to help clients develop and execute targeted marketing communication programs. These include services such as telephone, email using our proprietary Postfuture® offering, website development and search marketing, personalization of communication pieces using laser and inkjet printing, targeted mail and fulfillment, transportation logistics, and print-on-demand as well as traditional printing.

Our mail tracking capability and long-standing relationship with the U.S. Postal Service assist our customer's mailings to reach their destinations on time. By controlling the final stage of the print distribution process through its logistics operations, we facilitate the delivery of our clients materials while also managing costs.

Customers

Direct marketing services are marketed to specific industries or markets with services and software products tailored to each industry or market. We believe that we are generally able to provide services to new industries and markets by modifying our existing services and applications. We currently provide direct marketing services to the retail, high-tech/telecom, financial services and pharmaceutical/healthcare vertical markets, in addition to a range of selected markets. Our Direct Marketing business is not overly dependent on any one client or any group of clients. The largest client, measured in revenue, comprised 8% of total Direct Marketing revenues in 2007 and 5% of our total revenues in 2007. The largest 25 clients, measured in revenue, comprised 41% of total Direct Marketing revenues in 2007 and 26% of our total revenues in 2007.

Sales and Marketing

Our national direct marketing sales force is headquartered in Cincinnati, Ohio, with additional offices maintained throughout the United States. There are also product specific sales forces and sales groups in Europe, Australia, South America and Asia. The sales forces, with industry-specific knowledge and experience, emphasize the cross-selling of a full range of direct marketing services and are supported by employees in each sector. The overall sales focus is to position Harte-Hanks as a marketing partner offering various services and solutions (including end-to-end) as required to meet our client's targeted marketing needs.

Table of Contents

Competition

Our Direct Marketing business faces competition in all of its offerings and within each of its vertical markets. Direct marketing is a dynamic business, subject to technological advancements, high turnover of client personnel who make buying decisions, client consolidations, changing client needs and preferences, continual development of competing products and services and an evolving competitive landscape. This competition comes from numerous local, national and international direct marketing and advertising companies against whom we compete for individual projects, entire client relationships and marketing expenditures by clients and prospective clients. There are various competitive factors in our industry, including the quality and scope of services, technical and strategic expertise, the value of the services provided as compared to the price of the services, reputation and brand recognition. We also compete against print and electronic media and other forms of advertising for marketing and advertising dollars in general. Failure to continually improve our current processes, advance and upgrade our technology applications and to develop new products and services in a timely and cost-effective manner could result in the loss of our clients or prospective clients to current or future competitors. In addition, failure to gain market acceptance of new products and services could adversely affect our growth. Although we believe that our capabilities and breadth of services, combined with our national and worldwide production capability, industry focus and ability to offer a broad range of integrated services enable us to compete effectively, our business results may be adversely impacted by competition. Please refer to Item 1A, **Risk Factors** for additional information regarding risks related to competition.

Seasonality

Our Direct Marketing business is somewhat seasonal as revenues in the fourth quarter tend to be higher than revenues in other quarters during a given year. This increased revenue is a result of overall increased marketing activity prior to and during the holiday season, primarily related to our retail vertical.

SHOPPERS

General

Harte-Hanks Shoppers is North America's largest owner, operator and distributor of shopper publications, based on weekly circulation and revenues. Shoppers are weekly advertising publications delivered free by Standard Mail to households and businesses in a particular geographic area. Shoppers offer advertisers a targeted, cost-effective local advertising system, with virtually 100% penetration in their area of distribution. Shoppers are particularly effective in large markets with high media fragmentation in which major metropolitan newspapers generally have low penetration.

As of December 31, 2007, Shoppers delivered approximately 13 million shopper packages in five major markets each week covering the greater Los Angeles market (Los Angeles County, Orange County, Riverside County, San Bernardino County, Ventura County and Kern County), the greater San Diego market, Northern California (San Jose, Sacramento, Stockton and Modesto), South Florida (Dade County and Broward County) and the greater Tampa market. Two editions of the shopper publication are delivered to approximately 239,000 households and businesses in South Orange County where both an early and late edition *PennySaverUSA.com* are published each week. Our California publications account for approximately 80% of Shoppers' weekly circulation.

Harte-Hanks publishes 1,077 individual shopper editions each week distributed to zones with circulation of approximately 12,000 each. This allows single-location, local advertisers to saturate a single geographic zone, while enabling multiple-location advertisers to saturate multiple zones. This unique delivery system gives large and small advertisers alike a cost-effective way to reach their target markets. We believe that our zoning capabilities and production technologies have enabled us to saturate and target areas in a number of ways including geographic, demographic, lifestyle, behavioral and language allowing our advertisers to effectively target their customers. Our strategy is to increase our share of local advertising in our existing circulation areas, and, over time, to increase circulation through internal expansion into contiguous areas. In 2007, 2006, and 2005, Harte-Hanks Shoppers had revenues of \$430.4 million, \$475.0 million, and \$440.4 million, respectively, accounting for approximately 37%, 40%, and 39% of our total revenues, respectively.

Table of Contents

As a result of the difficult economic environment in California, we shut down approximately 600,000 of unprofitable circulation at the end of June 2007. This consisted of approximately 380,000 of circulation in the greater Los Angeles market and approximately 220,000 of circulation in the Northern California market. We will continue to evaluate all of our circulation performance, but do not currently anticipate further circulation reductions of this magnitude in the near future. Despite this recent circulation reduction, we continue to believe that future expansions may provide increased revenue opportunities in the long term.

Publications

The following table sets forth certain information with respect to Shoppers publications:

Market	Publication Name	December 31, 2007	
		Circulation	Number of Zones
Greater Los Angeles	PennySaverUSA.com	5,650,000	504
Northern California	PennySaverUSA.com	2,600,500	207
Greater San Diego	PennySaverUSA.com	1,887,500	157
South Florida	TheFlyer.com	1,459,500	116
Greater Tampa	TheFlyer.com	1,314,500	93
Total		12,912,000	1,077

Our Shopper publications contain classified and display advertising and are delivered by Standard Mail saturation. The typical shopper publication contains approximately 41 pages and is 7 by 9-1/2 inches in size. Each edition, or zone, is targeted around a natural neighborhood marketing pattern. Shoppers also serve as a distribution vehicle for multiple ads from national and regional advertisers; "print and deliver" single-sheet inserts designed and printed by us, coupon books, preprinted inserts, and four-color glossy flyers printed by third party printers. In addition, our Shoppers also provide advertising and other services online through our websites *PennySaverUSA.com* and *TheFlyer.com*. *PennySaverUSA.com* displays the ads published in the print versions of the *PennySaverUSA.com* (California) and *TheFlyer.com* (Florida) publications, and is a leader in the aggregation of online classified ads from free community papers and shoppers across the country. It is our current policy that customers who purchase a classified ad in one of our weekly publications, also receive a posting on our website.

We have acquired, developed and applied innovative technology and customized equipment in the publication of our Shoppers, contributing to efficiency and growth. A proprietary pagination system has made it possible for over a thousand weekly zoned editions to be designed, built and output to plate-ready negatives in a paperless, digital environment. Automating the production process saves on labor, newsprint, and overweight postage. This software also allows for better ad tracking, immediate checks on individual zone and ad status, and more on-time press starts with less manpower.

Customers

Shoppers serves both business and individual advertisers in a wide range of industries, including real estate, employment, automotive, retail, high-tech/telecom, financial services, and a number of other industries. Shoppers is not overly dependent on any one client or any group of clients. The largest client, measured in revenue, comprised 2% of total Shoppers revenue in 2007 and 1% of our total revenue in 2007. The top 25 clients in terms of revenue comprised 15% of Shoppers revenues in 2007 and 6% of our total revenues in 2007.

Table of Contents

Sales and Marketing

We maintain local Shoppers sales offices throughout our geographic markets and employ more than 700 commissioned sales representatives who develop both targeted and saturation advertising programs for clients. The sales organization provides service to national, regional and local advertisers through its telemarketing departments and field sales representatives. Shoppers clients vary from individuals with a single item for sale to local neighborhood advertisers to large multi-location advertisers. The core clients continue to be local service businesses and small retailers. We also focus our marketing efforts on larger national accounts by emphasizing our ability to deliver saturation advertising in defined zones, or even partial zones for inserts, in combination with advertising in the Shopper publication.

Additional focus is placed on particular industries/categories through the use of sales specialists. These sales specialists are primarily used to target automotive, real estate and employment advertisers.

We utilize proprietary sales and marketing systems to enter client orders directly from the field, instantly checking space availability, ad costs and other pertinent information. These systems efficiently facilitate the placement of advertising into multiple-zoned editions and include built-in error-reducing safeguards that aid in minimizing costly sales adjustments. In addition to allowing advertising information to be entered for immediate publication, these systems feed a relational client database enabling sales personnel to access client history by designated variables to facilitate the identification of similar potential clients and to assist with timely follow-up on existing clients.

Shoppers Facilities

Our Shoppers are produced at owned or leased facilities in the markets they serve. We have six production facilities three in Southern California, one in Northern California, one in Southern Florida and one in Tampa, Florida and more than 30 sales offices.

For more information please refer to Item 2 Properties.

Competition

Our Shoppers business competes for advertising, as well as for readers, with other print and electronic media. Competition comes from local and regional newspapers, magazines, radio, broadcast, satellite and cable television, other shoppers, the internet, other communications media and other advertising printers that operate in our markets. The extent and nature of such competition are, in large part, determined by the location and demographics of the markets targeted by a particular advertiser, and the number of media alternatives in those markets. Failure to continually improve our current processes, advance and upgrade our technology applications and to develop new products and services in a timely and cost-effective manner could result in the loss of our clients to current or future competitors. In addition, failure to gain market acceptance of new products and services and geographic areas could adversely affect our growth. We believe that our production systems and technology, which enable us to publish separate editions in narrowly targeted zones, and our local ad content, allow us to compete effectively, particularly in large markets with high media fragmentation. However, our business results may be adversely impacted by competition. Please refer to Item 1A, Risk Factors for additional information regarding risks related to competition.

Seasonality

Our Shoppers business is somewhat seasonal in that revenues from the last two publication dates in December and first two to three publication dates in January each year are affected by a slowdown in advertising by businesses and individuals after the holidays. In general the second and third quarters are the highest revenue quarters for our Shopper business.

Table of Contents

U.S. AND FOREIGN GOVERNMENT REGULATIONS

As a company with business activities around the world, we are subject to a variety of domestic and international legal and regulatory requirements that impact our business, including, for example, regulations governing consumer protection and unfair business practices, contracts, e-commerce, intellectual property, labor and employment, securities, tax, and other laws that are generally applicable to commercial activities.

We are also subject to, or affected by, numerous domestic and foreign laws, regulations and industry standards that regulate direct marketing activities, including those that address privacy, data security and unsolicited marketing communications. Examples of some of these laws and regulations that may be applied to, or affect, our business or the businesses of our clients include the following:

The Financial Services Modernization Act of 1999, or Gramm-Leach-Bliley Act (GLB), which, among other things, regulates the use for marketing purposes of non-public personal financial information of consumers that is held by financial institutions. Although Harte-Hanks is not considered a financial institution, many of our clients are subject to the GLB. The GLB also includes rules relating to the physical, administrative and technological protection of non-public personal financial information.

The Health Insurance Portability and Accountability Act of 1996 (HIPAA), which regulates the use of personal health information for marketing purposes and requires reasonable safeguards designed to prevent intentional or unintentional use or disclosure of protected health information.

Federal and state laws governing the use of the Internet and regulating telemarketing, including the federal Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003 (CAN-SPAM), which regulates commercial email and requires that commercial emails give recipients an opt-out method. Telemarketing activities are regulated by, among other requirements, the Federal Trade Commission's Telemarketing Sales Rule (TSR), the Federal Communications Commission's Telephone Consumer Protection Act (TCPA) and various state do-not-call laws.

A number of states in the U.S. have passed versions of security breach notification laws, which generally require timely notifications to affected persons in the event of data security breaches or other unauthorized access to certain types of protected personal data.

The Fair Credit Reporting Act (FCRA), which governs among other things, the sharing of consumer report information, access to credit scores, and requirements for users of consumer report information.

The Fair and Accurate Credit Transactions Act of 2003 (FACT Act), which amended the FCRA and requires, among other things, consumer credit report notice requirements for creditors that use consumer credit report information in connection with risk-based credit pricing actions and also prohibits a business that receives consumer information from an affiliate from using that information for marketing purposes unless the consumer is first provided a notice and an opportunity to direct the business not to use the information for such marketing purposes, subject to certain exceptions.

The European Union (EU) data protection laws, including the comprehensive EU Directive on Data Protection (1995), which imposes a number of obligations with respect to use of personal data, and includes a prohibition on the transfer of personal information from the EU to other countries that do not provide consumers with an adequate level of privacy or security. The EU standard for adequacy is generally stricter and more comprehensive than that of the U.S. and most other countries.

There are additional consumer protection, privacy and data security regulations domestically and in other countries in which we or our clients do business. These laws regulate the collection, use, disclosure and

Table of Contents

retention of personal data and may require consent from consumers and grant consumers other rights, such as the ability to access their personal data and to correct information in the possession of data controllers. We and many of our clients also belong to trade associations that impose guidelines that regulate direct marketing activities, such as the Direct Marketing Association's Commitment to Consumer Choice.

Federal, state and foreign governmental and industry organizations continue to consider new legislative and regulatory proposals that would impose additional restrictions on direct marketing services and products. We anticipate that such proposals will continue to be introduced in the future, some of which may be adopted. In addition, our business may be affected by the impact of these restrictions on our clients and their marketing activities. These additional regulations could increase compliance requirements and restrict or prevent the collection, management, aggregation, transfer, use or dissemination of information or data that is currently legally available. Additional regulations may also restrict or prevent current practices regarding unsolicited marketing communications. For example, many states are considering implementing do-not-mail legislation that could impact our Direct Marketing and Shoppers businesses and the businesses of our clients and customers. In addition, public interest in individual privacy rights and data security may result in the adoption of further voluntary industry guidelines that could impact our direct marketing activities and business practices.

We cannot predict the scope of any new legislation, regulations or industry guidelines or how courts may interpret existing and new laws. Additionally, enforcement priorities by governmental authorities may change and also impact our business. Compliance with regulations is costly and time-consuming, and we may encounter difficulties, delays or significant expenses in connection with our compliance. There could be a material adverse impact on our business due to the enactment or enforcement of legislation or industry regulations, the issuance of judicial or governmental interpretations, enforcement priorities of governmental agencies or a change in customs arising from public concern over consumer privacy and data security issues.

INTELLECTUAL PROPERTY RIGHTS

Our intellectual property assets include, for example, trademarks and service marks that identify our company and our products and services, software and other technology that we develop, our proprietary collections of data and intellectual property licensed from third parties, such as prospect list providers. We generally seek to protect our intellectual property through a combination of license agreements and trademark, service mark, copyright, patent and trade secret laws. We also enter into confidentiality agreements with many of our employees, vendors and clients and seek to limit access to and distribution of intellectual property and other proprietary information. We pursue the protection of our trademarks and other intellectual property in the United States and internationally. We have also filed certain patent applications in the United States.

Despite our efforts to protect our intellectual property, unauthorized parties may attempt to copy or otherwise obtain and use our proprietary information and technology. Monitoring unauthorized use of our intellectual property is difficult and unauthorized use of our intellectual property may occur. We cannot be certain that patents or trademark registrations will be issued, nor can we be certain that any issued patents or trademark registrations will give us adequate protection from competing products. For example, issued patents may be circumvented or challenged and declared invalid or unenforceable. In addition, others may develop competing technologies or databases on their own. Moreover, there is no assurance that our confidentiality agreements with our employees or third parties will be sufficient to protect our intellectual property and proprietary information.

We may also be subject to infringement claims against us by third parties and may incur substantial costs and devote significant management resources in responding to such claims. We are obligated under some agreements to indemnify our clients as a result of claims that we infringe on the proprietary rights of third parties. These costs and diversions could cause our business to suffer. If any party asserts an infringement claim, we may need to obtain licenses to the disputed intellectual property. We cannot assure you, however, that we will be able to obtain these licenses on commercially reasonable terms or that we will be able to obtain any licenses at all. The failure to obtain necessary licenses or other rights may have an adverse affect on our ability to provide our products and services.

Table of Contents

EMPLOYEES

As of December 31, 2007, Harte-Hanks employed 6,579 full-time employees and 447 part-time employees, as follows: Direct Marketing 4,365 full-time and 105 part-time employees; Shoppers 2,193 full-time and 341 part-time employees; and corporate office 21 full-time employees and 1 part-time employee. None of the work force is represented by labor unions. We consider our relations with our employees to be good.

ITEM 1A. RISK FACTORS

Cautionary Note Regarding Forward-Looking Statements

This report, including the Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A), contains forward-looking statements within the meaning of the federal securities laws. All such statements are qualified by this cautionary note, which is provided pursuant to the safe harbor provisions of Section 27A of the Securities Act of 1933 (1933 Act) and Section 21E of the 1934 Act. Forward-looking statements may also be included in our other public filings, press releases, our website and oral and written presentations by management. Statements other than historical facts are forward-looking and may be identified by words such as may, will, expects, believes, anticipates, plans, estimates, seeks, could, intends, or words of similar meaning. Examples include statements regarding (1) our strategies, initiatives, (2) our financial outlook, (3) planned adjustments to our cost structure and other actions designed to respond to market conditions and improve our performance, (4) expectations for our businesses and for the industries in which we operate, including with regard to the recent negative performance trends in our Shoppers business, (5) competitive factors, (6) acquisition and development plans, (7) our stock repurchase program, (8) expectations regarding legal proceedings and other contingent liabilities, and (9) other statements regarding future events, conditions or outcomes.

These forward-looking statements are based on current information, expectations and estimates and involve risks, uncertainties, assumptions and other factors that are difficult to predict and that could cause actual results to vary materially from what is expressed in or indicated by the forward-looking statements. In that event, our business, financial condition, results of operations or liquidity could be materially adversely affected and investors in our securities could lose part or all of their investments. Some of these risks, uncertainties, assumptions and other factors can be found in our filings with the SEC, including the factors discussed below in this "Item 1A. Risk Factors" and any updates thereto in our Forms 10-Q. The forward-looking statements included in this report and those included in our other public filings, press releases, our website and oral and written presentations by management are made only as of the respective dates thereof, and we undertake no obligation to update publicly any forward-looking statement in this report or in other documents, our website or oral statements for any reason, even if new information becomes available or other events occur in the future.

In addition to the information set forth elsewhere in this report, including in the MD&A section, the factors described below should be considered carefully in making any investment decisions with respect to our securities. The risks described below are not the only ones we face or may face in the future. Additional risks and uncertainties that are not presently anticipated, or that we may currently believe are immaterial, could also impair our business operations and financial performance.

We face significant competition for individual projects, entire client relationships and advertising dollars in general.

Our Direct Marketing business faces significant competition in all of its offerings and within each of its vertical markets. Direct marketing is a dynamic business, subject to technological advancements, high turnover of client personnel who make buying decisions, client consolidations, changing client needs and preferences, continual development of competing products and services and an evolving competitive landscape. This competition comes from numerous local, national and international direct marketing and advertising companies

Table of Contents

against whom we compete for individual projects, entire client relationships and marketing expenditures by clients and prospective clients. We also compete against print and electronic media and other forms of advertising for marketing and advertising dollars in general. In addition, our ability to attract new clients and to retain existing clients may, in some cases, be limited by clients' policies on or perceptions of conflicts of interest. These policies can prevent us from performing similar services for competing products or companies. Our Shoppers business competes for advertising, as well as for readers, with other print and electronic media. Competition comes from local and regional newspapers, magazines, radio, broadcast, satellite and cable television, other shoppers, the internet, other communications media and other advertising printers that operate in our markets. The extent and nature of such competition are, in large part, determined by the location and demographics of the markets targeted by a particular advertiser and the number of media alternatives in those markets. Our failure to improve our current processes or to develop new products and services could result in the loss of our clients to current or future competitors. In addition, failure to gain market acceptance of new products and services could adversely affect our growth.

Current and future competitors may have significantly greater financial and other resources than we do, and they may sell competing products and services at lower prices or at lower profit margins, resulting in pressures on our prices and margins.

The sizes of our competitors vary across market segments. Therefore, some of our competitors may have significantly greater financial, technical, marketing or other resources than we do in one or more of our market segments, or overall. As a result, our competitors may be in a position to respond more quickly than we can to new or emerging technologies and changes in customer requirements, or may devote greater resources than we can to the development, promotion, sale and support of products and services. Moreover, new competitors or alliances among our competitors may emerge and potentially reduce our market share, revenue or margins. Some of our competitors also may choose to sell products or services competitive to ours at lower prices by accepting lower margins and profitability, or may be able to sell products or services competitive to ours at lower prices given proprietary ownership of data, technical superiority or economies of scale. Price reductions or pricing pressure by our competitors could negatively impact our margins and results of operations, and could also harm our ability to obtain new customers on favorable terms.

We must maintain technological competitiveness, continually improve our processes and develop and introduce new products and services in a timely and cost-effective manner.

We believe that our success depends on, among other things, maintaining technological competitiveness in our Direct Marketing and Shopper products, processing functionality and software systems and services. Technology changes rapidly and there are continuous improvements in computer hardware, network operating systems, programming tools, programming languages, operating systems, database technology and the use of the Internet. Advances in information technology may result in changing client preferences for products and product delivery formats in our industry. We must continually improve our current processes and develop and introduce new products and services in order to match our competitors' technological developments and other improvements in competing product and service offerings and the increasingly sophisticated requirements of our clients. We may be unable to successfully identify, develop and bring new and enhanced services and products to market in a timely and cost-effective manner, such services and products may not be commercially successful and services, products and technologies developed by others may render our services and products noncompetitive or obsolete.

Our success depends on our ability to consistently and effectively deliver our products and services to our clients.

Our success depends on our ability to effectively and consistently staff and execute client engagements within the agreed upon timeframe and budget. Depending on the needs of our clients, our Direct Marketing engagements may require customization, integration and coordination of a number of complex product and service offerings and execution across many of our facilities worldwide. Moreover, in some of our engagements, we rely on subcontractors and other third parties to provide a portion of our overall services, and we cannot guarantee that these third parties will effectively deliver their services or that we will have adequate

Table of Contents

recourse against these third parties in the event they fail to effectively deliver their services. Other contingencies and events outside of our control may also impact our ability to provide our products and services. Our failure to effectively and timely staff, coordinate and execute our client engagements may adversely impact existing client relationships, the amount or timing of payments from our clients, our reputation in the marketplace and ability to secure additional business and our resulting financial performance. In addition, our contractual arrangements with our Direct Marketing clients and other customers may not provide us with sufficient protections against claims for lost profits or other claims for damages.

If we lose key management or are unable to attract and retain the talent required for our business, our operating results could suffer.

Our prospects depend in large part upon our ability to attract, train and retain experienced technical, client services, sales, consulting, research and development, marketing, administrative and management personnel. While the demand for personnel is dependent on employment levels, competitive factors and general economic conditions, qualified personnel historically have been in great demand and from time to time and in the foreseeable future may remain a limited resource. The loss or prolonged absence of the services of these individuals could have a material adverse effect on our business, financial position or operating results.

We have previously experienced, and may experience in the future, reduced demand for our products and services because of general economic conditions, the financial conditions and marketing budgets of our clients and other factors that may impact the industry verticals that we serve.

Economic downturns often severely affect the marketing services industry. In the past, our customers have responded, and may respond in the future, to weak economic conditions by reducing their marketing budgets, which are generally discretionary in nature and easier to reduce in the short-term than other expenses. In addition, revenues from our Shoppers business are largely dependent on local advertising expenditures in the markets in which they operate. Such expenditures are substantially affected by the strength of the local economies in those markets. Direct Marketing revenues are dependent on national, regional and international economies and business conditions. A lasting economic recession or downturn in the United States economy and the economies we operate in abroad, could have material adverse effects on our business, financial position or operating results. Similarly, there may be industry or company-specific factors that negatively impact our clients and prospective clients or their industries and result in reduced demand for our products and services. We may also experience reduced demand as a result of consolidation of clients and prospective clients in the industry verticals that we serve.

Our Shoppers business is geographically concentrated and is subject to the California and Florida economies.

Our Shoppers business is concentrated geographically in California and Florida. An economic downturn in these states or a large disaster, such as a flood, hurricane, earthquake or other disaster or condition that disables our facilities, immobilizes the United States Postal Service or causes a significant negative change in the economies of these regions, could have a material adverse effect on our business, financial position or operating results.

Our business plan requires us to effectively manage our costs. If we do not achieve our cost management objectives, our financial results could be adversely affected.

Our business plan and expectations for the future require that we effectively manage our cost structure, including our operating expenses and capital expenditures across our operations. To the extent that we do not effectively manage our costs, our financial results may be adversely affected.

Privacy, security and other direct marketing regulatory requirements may prevent or impair our ability to offer our products and services.

We are subject to, or affected by, numerous laws, regulations and industry standards that regulate direct marketing activities, including those that address privacy, data security and unsolicited marketing communications. Please refer to the section above entitled, U.S. and Foreign Government Regulations, for additional information regarding these regulations.

Table of Contents

Federal, state and foreign governmental and industry organizations continue to consider new legislative and regulatory proposals that would impose additional restrictions on direct marketing services and products. We anticipate that such proposals will continue to be introduced in the future, some of which may be adopted. In addition, our business may be affected by the impact of these restrictions on our clients and their marketing activities. These additional regulations could increase compliance requirements and restrict or prevent the collection, management, aggregation, transfer, use or dissemination of information or data that is currently legally available. Additional regulations may also restrict or prevent current practices regarding unsolicited marketing communications. For example, many states are considering implementing do-not-mail legislation that could impact our Direct Marketing and Shoppers businesses and the businesses of our clients and customers. In addition, public interest in individual privacy rights and data security may result in the adoption of further voluntary industry guidelines that could impact our direct marketing activities and business practices.

We cannot predict the scope of any new legislation, regulations or industry guidelines or how courts may interpret existing and new laws. Additionally, enforcement priorities by governmental authorities may change and also impact our business. Compliance with regulations is costly and time-consuming, and we may encounter difficulties, delays or significant expenses in connection with our compliance. There could be a material adverse impact on our business due to the enactment or enforcement of legislation or industry regulations, the issuance of judicial or governmental interpretations, enforcement priorities of governmental agencies or a change in customs arising from public concern over consumer privacy and data security issues.

Consumer perceptions regarding the privacy and security of their data may prevent or impair our ability to offer our products and services.

Pursuant to various federal, state, foreign and industry regulations, consumers have control as to how certain data regarding them is collected, used and shared for marketing purposes. If due to privacy or security concerns, consumers exercise their ability to prevent such data collection, use or sharing, this may impair our ability to provide direct marketing to those consumers and limit our clients' requirements for our services. Additionally, privacy and security concerns may limit consumers' voluntarily providing data to our customers or marketing companies. Some of our services depend on voluntarily provided data and may be impaired without such data.

Our reputation and business results may be adversely impacted if we, or subcontractors upon whom we rely, do not effectively protect sensitive personal information of our clients and our clients' customers.

Current privacy and data security laws and industry standards impact the manner in which we capture, handle, analyze and disseminate customer and prospect data as part of our client engagements. In many instances, client contracts also mandate privacy and security practices. If we fail to effectively protect and control sensitive personal information (such as personal health information, social security numbers or credit card numbers) of our clients and their customers or prospects in accordance with these requirements, we may incur significant expenses, suffer reputational harm and loss of business, and, in certain cases, be subjected to regulatory or governmental sanctions or litigation. These risks may be increased due to our reliance on subcontractors and other third parties in providing a portion of our overall services in certain engagements. We cannot guarantee that these third parties will effectively protect and handle sensitive personal information or other confidential information, or that we will have adequate recourse against these third parties in that event.

We may not be able to adequately protect our information systems.

Our ability to protect our information systems against damage from a data loss, security breach, computer virus, fire, power loss, telecommunications failure or other disaster is critical to our future success. Some of these systems may be outsourced to third-party providers from time to time. Any damage to our information systems that causes interruptions in our operations or a loss of data could affect our ability to meet our clients' requirements, which could have a material adverse effect on our business, financial position or operating results. While we take precautions to protect our information systems, such measures may not be effective and existing measures may become inadequate because of changes in future conditions.

Table of Contents

Breaches of security, or the perception that e-commerce is not secure, could harm our business and reputation.

Business-to-business and business-to-consumer electronic commerce, including that which is Internet-based, requires the secure transmission of confidential information over public networks. Some of our products and services are accessed through the Internet. Security breaches in connection with the delivery of our products and services, or well-publicized security breaches that may affect us or our industry, such as database intrusion, could be detrimental to our business, operating results and financial condition. We cannot be certain that advances in criminal capabilities, new discoveries in the field of cryptography or other developments will not compromise or breach the technology protecting the information systems that access our products, services and proprietary database information.

Data suppliers could withdraw data that we rely on for our products and services.

We purchase or license much of the data we use. There could be a material adverse impact on our Direct Marketing business if owners of the data we use were to withdraw or cease to allow access to the data, or materially restrict the authorized uses of their data. Data providers could withdraw their data if there is a competitive reason to do so, if there is pressure from the consumer community or if additional legislation is passed restricting the use of the data. We also rely upon data from other external sources to maintain our proprietary and non-proprietary databases, including data received from customers and various government and public record sources. If a substantial number of data providers or other key data sources were to withdraw or restrict their data, if we were to lose access to data due to government regulation, or if the collection of data becomes uneconomical, our ability to provide products and services to our clients could be materially adversely affected, which could result in decreased revenues, net income and earnings per share.

We must successfully evaluate acquisition targets and integrate acquisitions.

We frequently evaluate acquisition opportunities to expand our product and service offerings and geographic locations, including potential international acquisitions. Acquisition activities, even if not consummated, require substantial amounts of management time and can distract from normal operations. In addition, we may be unable to achieve the profitability goals, synergies and other objectives initially sought in acquisitions, and any acquired assets, data or businesses may not be successfully integrated into our operations. Acquisitions may result in the impairment of relationships with employees and customers. Moreover, although we review and analyze assets or companies we acquire, such reviews are subject to uncertainties and may not reveal all potential risks and we may incur unanticipated liabilities and expenses as a result of our acquisition activities. The failure to identify appropriate candidates, to negotiate favorable terms, or to successfully integrate future acquisitions into existing operations could result in not achieving planned revenue growth and could negatively impact our net income and earnings per share.

We are vulnerable to increases in paper prices.

In recent years, newsprint prices have fluctuated widely. We maintain, on average, less than 30 days of paper inventory and do not purchase our paper pursuant to long-term paper contracts. Because we have a limited ability to protect ourselves from fluctuations in the price of paper or to pass increased costs along to our clients, these fluctuations could materially affect the results of our operations.

We are vulnerable to increases in postal rates and disruptions in postal services.

Our Shoppers and Direct Marketing services depend on the United States Postal Service to deliver products. Our Shoppers are delivered by Standard Mail, and postage is the second largest expense, behind payroll, in our Shoppers business. Standard postage rates have increased in recent years and are expected to increase again in the first half of 2008. Overall Shoppers postage costs may increase as a result of increases in postage rates, circulation and insert volumes. Postage rates also influence the demand for our Direct Marketing services even though the cost of mailings is typically borne by our clients and is not directly reflected in our revenues or expenses. Accordingly, future postal increases or disruptions in the operations of the U.S. Postal Service may have an adverse impact on us.

Table of Contents

Our indebtedness may adversely impact our ability to react to changes in our business or changes in general economic conditions.

The amount of our indebtedness and the terms under which we have borrowed money under our credit facilities or other agreements could have important consequences for our business. Our debt covenants require that we maintain certain financial measures and ratios. As a result of these covenants and ratios, we may be limited in the manner in which we can conduct our business, and we may be unable to engage in favorable business activities or finance future operations or capital needs. A failure to comply with these restrictions or to maintain the financial measures and ratios contained in the debt agreements could lead to an event of default that could result in an acceleration of outstanding indebtedness. In addition, the amount and terms of our indebtedness could:

limit our flexibility in planning for, or reacting to, changes in our business and the industries in which we operate, including limiting our ability to invest in our strategic initiatives, and, consequently, place us at a competitive disadvantage;

reduce the availability of our cash flows that would otherwise be available to fund working capital, capital expenditures, acquisitions and other general corporate purposes; and

result in higher interest expense in the event of increases in interest rates because some of our borrowings are at variable rates of interest, as discussed below under Interest rate increases could affect our results of operations, cash flows and financial position.

We may incur additional indebtedness in the future and, if new debt is added to our current debt levels, the above risks could be increased.

Interest rate increases could affect our results of operations, cash flows and financial position.

Interest rate movements in Europe and the United States can affect the amount of interest we pay related to our debt and the amount we earn on cash equivalents. Our primary interest rate exposure is to interest rate fluctuations in Europe, specifically Eurodollar rates due to their impact on interest related to our credit facilities. As of December 31, 2007, we had \$259.1 million of debt outstanding, all of which was at variable interest rates. We manage a portion of our interest rate exposures by entering into an interest rate swap for a total notional amount of \$150.0 million, resulting in a net amount of \$109.1 million of variable-rate debt at December 31, 2007. To the extent that we have debt with variable interest rates that is not hedged, our results of operations, cash flows and financial position could be materially adversely affected by significant increases in interest rates. We also have exposure to interest rate fluctuations in the United States, specifically money market, commercial paper and overnight time deposit rates, as these affect our earnings on excess cash. Even with the offsetting increase in earnings on excess cash in the event of an interest rate increase, we cannot be assured that future interest rate increases will not have a material adverse impact on our business, financial position or operating results.

We could fail to adequately protect our intellectual property rights and may face claims for intellectual property infringement.

Our ability to compete effectively depends in part on the protection of our technology, products, services and brands through intellectual property right protections, including patents, copyrights, database rights, trade secrets and trademarks. The extent to which such rights can be protected and enforced varies in different jurisdictions. There is also a risk of litigation relating to our use or future use of intellectual property rights of third parties. Third-party infringement claims and any related litigation against us could subject us to liability for damages, restrict us from using and providing our technologies, products or services or operating our business generally, or require changes to be made to our technologies, products and services. Please refer to the section above entitled, Intellectual Property Rights, for additional information regarding our intellectual property and associated risks.

Table of Contents

Our international operations subject us to risks associated with operations outside the U.S.

Harte Hanks Direct Marketing conducts business outside of the United States. During 2007, approximately 8.5% of Harte Hanks Direct Marketing's revenues were derived from businesses outside the United States, primarily Europe, Asia and South America. We may expand our international operations in the future as part of our growth strategy. Accordingly, our future operating results could be negatively affected by a variety of factors, some of which are beyond our control, including:

social, economic and political instability;

changes in U.S. and foreign governmental legal requirements or policies resulting in burdensome government controls, tariffs, restrictions, embargoes or export license requirements;

inflation;

the potential for nationalization of enterprises;

potentially adverse tax treatment;

less favorable foreign intellectual property laws that would make it more difficult to protect our intellectual properties from appropriation by competitors;

more onerous or differing data privacy and security requirements or other marketing regulations;

longer payment cycles for sales in foreign countries; and

the costs and difficulties of managing international operations.

In addition, exchange rate movements may have an impact on our future costs or on future cash flows from foreign investments. We have not entered into any foreign currency forward exchange contracts or other derivative instruments to hedge the effects of adverse fluctuations in foreign currency exchange rates. The various risks that are inherent in doing business in the United States are also generally applicable to doing business outside of the United States, and may be exaggerated by the difficulty of doing business in numerous sovereign jurisdictions due to differences in culture, laws and regulations.

We must maintain effective internal controls.

In designing and evaluating our internal controls over financial reporting, we recognize that any internal control or procedure, no matter how well designed and operated, can provide only reasonable assurance of achieving desired control objectives and that no system of internal controls can be designed to provide absolute assurance of effectiveness. If we fail to maintain a system of effective internal controls, it could have a material adverse effect on our business, financial position or operating results. Additionally, adverse publicity related to a failure in our internal controls over financial reporting could have a negative impact on our reputation and business.

Fluctuation in our revenue and operating results may impact our stock price.

Edgar Filing: HARTE HANKS INC - Form 10-K

From time to time, we may provide forward-looking statements regarding our anticipated or targeted financial and operating performance, including with respect to our earnings per share and revenue growth. Fluctuations in our quarterly revenues and operating results in any future period that fall below the performance indicated by our forward-looking statements or the expectations of securities analysts and investors could cause a decline in our stock price. These fluctuations could be caused by a variety of factors, including unanticipated variations in the size, budget, or progress toward the completion of our engagements, variability in the market demand for our services, client consolidations, the unanticipated termination of several major client engagements or other factors discussed in this Item 1A. Risk Factors.

The granting of stock-based awards to our employees affects our expenses and our stock price.

Effective January 1, 2006, we became subject to new stock-based compensation accounting rules that require that compensation costs related to stock-based payment transactions, including stock options, restricted stock and performance stock units, be recognized in our financial statements. Previously, we accounted for stock-based

Table of Contents

compensation of employees using the intrinsic value method, which resulted in no compensation expense charged against income for stock option grants to employees where the exercise price was equal to the market price of the underlying stock at the date of grant. Beginning January 1, 2006, grants of options, stock or other forms of equity have been recognized as compensation expense in our statement of operations, increasing our reported expenses for the same activities and negatively impacting our earnings per share. These increased expenses could affect the price of our common shares.

War or terrorism could affect our business.

War and/or terrorism or the threat of war and/or terrorism involving the United States could have a significant impact on our business, financial position or operating results. War or the threat of war could substantially affect the levels of advertising expenditures by clients in each of our businesses. In addition, each of our businesses could be affected by operation disruptions and a shortage of supplies and labor related to such a war or threat of war.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our headquarters are located in San Antonio, Texas and we occupy approximately 17,000 square feet of leased premises at that location. Our business is conducted in facilities worldwide containing aggregate space of approximately 3.6 million square feet. Approximately 3.4 million square feet are held under leases, which expire at dates through 2023. The balance of the properties, used in our Southern California Shopper operations and Hasselt, Belgium Direct Marketing operations, are owned.

ITEM 3. LEGAL PROCEEDINGS

We are subject to various legal proceedings in the course of conducting our businesses and, from time to time, we may become involved in additional claims and lawsuits incidental to our businesses. In the opinion of management, after consultation with counsel, any ultimate liability arising out of currently pending claims and lawsuits is not currently expected to have a material effect on our consolidated financial position or results of operations. Nevertheless, we cannot predict the impact of future developments affecting our pending or future claims and lawsuits.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of security holders during the fourth quarter of 2007.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Common Stock**

Our common stock is listed on the NYSE (symbol: HHS). The reported high and low quarterly sales price ranges for 2007 and 2006 were as follows:

	2007		2006	
	High	Low	High	Low
First Quarter	28.78	25.81	31.00	25.60
Second Quarter	27.85	25.07	28.21	24.33
Third Quarter	26.67	19.62	27.17	22.35
Fourth Quarter	20.52	15.50	27.84	25.03

In 2007, quarterly dividends were paid at the rate of 7.0 cents per share. In 2006, quarterly dividends were paid at the rate of 6.0 cents per share.

In January 2008, we announced an increase in the regular quarterly dividend from 7.0 cents per share to 7.5 cents per share, payable March 14, 2008 to holders of record on February 29, 2008.

As of February 1, 2008, there are approximately 2,750 holders of record.

Issuer Purchases of Equity Securities

The following table contains information about our purchases of our equity securities during the fourth quarter of 2007:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan (1)	Maximum Number of Shares that May Yet Be Purchased Under the Plan(2)
October 1 - 31, 2007	860,000	\$ 18.69	860,000	5,651,991
November 1 - 30, 2007	1,564,136	\$ 16.61	1,451,300	4,200,691
December 1 - 31, 2007(3)	1,300,000	\$ 16.97	1,300,000	2,900,691
Total	3,724,136	\$ 17.21	3,611,300	

- (1) During the fourth quarter of 2007, 3,611,300 shares were purchased through our stock repurchase program that was publicly announced in January 1997. Under this program shares can be purchased in the open market or through privately negotiated transactions. As of December 31, 2007, our Board had authorized the repurchase of up to 61.9 million shares of our outstanding common stock. As of December 31, 2007, we had repurchased a total of 59.0 million shares at an average price of \$19.11 per share under this program.
- (2) Subsequent to year end, on January 29, 2008, our Board authorized an additional 12.5 million shares under our stock repurchase program, bringing the total repurchase authorization to 74.4 million shares.
- (3) On December 10, 2007, we purchased 0.1 million shares of our common stock from The Shelton Family Foundation (Foundation) and 0.1 million shares of our common stock from The Scottie Ann Shelton Trust (Trust). These purchases were made at a price of \$16.93 per

Edgar Filing: HARTE HANKS INC - Form 10-K

share (the closing price per share of our common stock on December 10, 2007). Mr. Larry D. Franklin, the Chairman of our Board of Directors, and David L. Copeland, a member of our Board of Directors, both served as directors on the Foundation and trustees of the Trust at the time of these purchases and both disclaim beneficial ownership of any shares held by the Foundation or the Trust. In January 2008, Mr. Franklin resigned from the Board of the Foundation.

Comparison of Stockholder Returns

The material under this heading is not soliciting material, is not deemed filed with the SEC, and is not to be incorporated by reference into any filing under the 1933 Act or the 1934 Act, whether made before or after the date hereof and irrespective of any general incorporation language in such filing.

The following graph compares the cumulative total return of our common stock during the period December 31, 2002 to December 31, 2007 with the Standard & Poor's 500 Stock Index (S&P 500 Index) and with two peer groups. We made modifications to our peer group in this 2007 Annual Report on Form 10-K compared to our previous peer group in order to be consistent with the modified 2008 peer group used by our Compensation Committee in evaluating management compensation.

Our former peer group included Acxiom Corporation, Catalina Marketing Corporation, Choicepoint, Inc., Convergys Corporation, Equifax, Inc., Fair Isaac and Company, Incorporated, infoUSA, Inc., Sykes Enterprises, Incorporated, and Teletch Holdings, Inc.

Our current peer group includes Acxiom Corporation, Alliance Data Systems Corporation, Catalina Marketing Corporation, Choicepoint, Inc., Consolidated Graphics, Inc., Dun & Bradstreet Corporation, Equifax, Inc., Fair Isaac and Company, Incorporated, ICT Group, Inc., infoUSA, Inc., Interpublic Group of Companies, Inc., PC Mall, Inc., R.H. Donnelley Corporation, Source Interlink Companies, Inc., Sykes Enterprises, Incorporated, Teletch Holdings, Inc., Valassis Communications, Inc., ValueClick, Inc., and Viad Corp.

The S&P Index includes 500 United States companies in the industrial, transportation, utilities and financial sectors and is weighted by market capitalization. The peer groups are also weighted by market capitalization.

Table of Contents

The graph depicts the results of investing \$100 in our common stock, the S&P 500 Index and the peer groups at closing prices on December 31, 2002.

	Years Ending

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
Cautionary Note About Forward-Looking Statements

This report, including this Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A), contains forward-looking statements within the meaning of the federal securities laws. All such statements are qualified by the cautionary note included under Item 1A. above, which is provided pursuant to the safe harbor provisions of Section 27A of the 1933 Act and Section 21E of the 1934 Act. Actual results may vary materially from what is expressed in or indicated by the forward-looking statements.

Overview

The following MD&A section is intended to help the reader understand the results of operations and financial condition of Harte-Hanks, Inc. (Harte-Hanks). This section is provided as a supplement to, and should be read in conjunction with, our financial statements and the accompanying notes to the financial statements.

Harte-Hanks is a worldwide direct and targeted marketing company that provides direct marketing services and shopper advertising opportunities to a wide range of local, regional, national and international consumer and business-to-business marketers. We manage our operations through two operating segments: Direct Marketing and Shoppers.

In 2007, Harte-Hanks Direct Marketing had revenues of \$732.5 million, which accounted for approximately 63% of our total revenues. Direct Marketing services are targeted to specific industries or markets with services and software products tailored to each industry or market. Currently, our Direct Marketing business services various vertical markets including retail, high-tech/telecom, financial services, pharmaceutical/healthcare, and a wide range of selected markets. We believe that we are generally able to provide services to new industries and markets by modifying our services and applications as opportunities are presented. Depending on the needs of our clients, our Direct Marketing capabilities are provided in an integrated approach through more than 30 facilities worldwide, more than 10 of which are located outside of the United States. Each of these centers possesses some specialization and is linked with others to support the needs of our clients.

We use various capabilities and technologies to enable our clients to identify, reach, influence and nurture their customers. Harte-Hanks Direct Marketing improves the return on its clients' marketing investment by increasing their prospect and customer value through solutions and services organized around five groupings of integrated activities:

Information (data collection/management);

Opportunity (data access/utilization);

Insight (data analysis/interpretation);

Engagement (program and campaign creation and development); and

Interaction (program execution).

We execute these activities by providing a range of products and services including:

Database design and development;

Data processing and service bureau;

Software;

Data enhancements and list brokerage;

Analytics, modeling, research and strategy;

E-Care including online technical support and inbound email management;

Table of Contents

Events management including registration and promotion;

Website design, management and hosting services;

Loyalty program management;

Sales lead management;

Web-based database marketing;

Technology databases;

Creative services;

Traditional and interactive media planning, placement and buying;

Fulfillment and distribution;

Graphics and printing solutions;

Inbound and outbound telemarketing including telesales and order processing;

Lettershop services including laser personalization;

Logistics; and

Email marketing.

Harte-Hanks Shoppers is North America's largest owner, operator and distributor of shopper publications, based on weekly circulation and revenues. Shoppers are weekly advertising publications delivered free by Standard Mail to households and businesses in a particular geographic area. Shoppers offer advertisers a targeted, cost-effective local advertising system, with virtually 100% penetration in their area of distribution. Shoppers are particularly effective in large markets with high media fragmentation in which major metropolitan newspapers generally have low penetration. Our Shoppers segment also provides advertising and other services online through our websites, *ThePennySaverUSA.com* and *TheFlyer.com*. *PennySaverUSA.com* displays the ads published in the print versions of the *PennySaverUSA.com* (California) and *TheFlyer.com* (Florida) publications, and is a leader in the aggregation of online classified ads from free community papers and shoppers across the country. In 2007, our Shoppers segment had revenues of \$430.4 million, which represented 37% of our total revenue.

As of December 31, 2007, our Shoppers are zoned into 1,077 separate editions with total circulation of approximately 13 million in California and Florida each week. As a result of the difficult economic environment in California, we shut down approximately 600,000 of unprofitable circulation at the end of June 2007. This consisted of approximately 380,000 of circulation in the greater Los Angeles market and approximately

Edgar Filing: HARTE HANKS INC - Form 10-K

220,000 of circulation in the Northern California market. We will continue to evaluate all of our circulation performance, but do not currently anticipate further circulation reductions of this magnitude in the near future. Despite this recent circulation reduction, we continue to believe that future expansions may provide increased revenue opportunities in the long term.

We derive revenues from the sale of direct marketing services and shopper advertising services. As a worldwide business, direct marketing is affected by general national and international economic trends. Our Shoppers operate in regional markets in California and Florida and are largely affected by the strength of the local economies.

Our overall strategy is based on six key elements:

Being a market leader in each of our businesses;

Increasing revenues through growing our base businesses;

Introducing new services and products;

Entering new markets and making acquisitions;

Using technology to create competitive advantages; and

Employing people who understand our clients' business and markets.

Our principal operating expense items are labor, postage and transportation.

Table of Contents**Results of Operations**

Operating results were as follows:

In thousands except

<i>per share amounts</i>	2007	% Change	2006	% Change	2005
Revenues	\$ 1,162,886	-1.8	\$ 1,184,688	4.4	\$ 1,134,993

Operating income	\$ 164,927	-11.4	\$ 186,052	-2.1	\$ 190,013
Net income	\$ 92,640	-17.1	\$ 111,792	-2.3	\$ 114,458
Diluted earnings per share	\$ 1.26	-9.4	\$ 1.39	3.7	\$ 1.34

Year ended December 31, 2007 vs. Year ended December 31, 2006*Revenues*

Consolidated revenues decreased 1.8%, to \$1,162.9 million, in 2007 when compared to 2006. Our overall results reflect decreased revenues of 9.4% from our Shoppers segment, partially offset by increased revenues of 3.2% from our Direct Marketing segment. The revenue performance from Shoppers was the result of decreased sales in established markets, primarily attributable to the challenging economic environments in the California and Florida geographies in which we operate, circulation reductions, and the discontinuation of commercial printing operations in our Tampa facility. Direct Marketing comparisons were affected by \$7.0 million of revenue recognized in the second quarter of 2006 relating to a contract termination fee received from one of our customers in the financial vertical. Excluding revenues from this contract termination, Direct Marketing's revenues in 2007 were up \$29.7 million, or 4.2%, and consolidated revenues would have been down 1.3% compared to 2006.

Operating Expenses

Overall operating expenses decreased 0.1%, to \$998.0 million, in 2007 compared to 2006. This year-over-year change includes \$8.4 million of restructuring and transition costs, including compensation costs recognized during the third quarter of 2007 associated with the announced retirement of our former President and Chief Executive Officer, severance in both businesses and approximately \$1.0 million recognized in our Shoppers segment in the second quarter of 2007 related to the shut down of approximately 600,000 of unprofitable circulation at the end of June 2007. The remaining overall decrease in operating expenses was driven by decreased production and labor costs in Shoppers, attributable to the decline in Shoppers revenues. Direct Marketing operating expenses increased \$23.4 million, or 3.9%, and general corporate expense increased \$2.4 million or 19.9%, while Shoppers operating expenses decreased \$26.5 million or 6.9%. Direct Marketing's results were impacted by \$2.4 million of operating expense recognized in the second quarter of 2006 as a result of the contract termination discussed above.

Net Income/Earnings Per Share

Net income decreased 17.1%, to \$92.6 million, while diluted earnings per share were down 9.4%, to \$1.26 per share, in 2007 when compared to 2006. The decrease in net income was a result of decreased operating income, increased interest expense, and a higher effective tax rate in 2007 when compared to 2006.

On a consolidated basis, we incurred \$8.4 million of expenses in 2007 related to actions designed to improve short-term performance and better position us for longer-term growth in revenue and profits. In Direct Marketing, actions were aimed at flattening our organizational structure to improve efficiency and bring our sales, marketing and operations closer to our customers. In Shoppers, in addition to the circulation shut down, actions were taken to reduce fixed costs and headcount, and included streamlining our structure from six operating units into three operating units: the California PennySaver unit, the Florida Flyer unit and the Shopper digital unit. For the full year 2007, these costs exceeded the overall benefit we experienced as a result of these initiatives.

Table of Contents**Year ended December 31, 2006 vs. Year ended December 31, 2005***Revenues*

Consolidated revenues increased 4.4%, to \$1,184.7 million, in 2006 when compared to 2005. Our overall results reflect increased revenues of 7.8% from our Shoppers segment and 2.2% from our Direct Marketing segment. The acquisition of *The Flyer*, located in Tampa, Florida (The Tampa Flyer) in April 2005 contributed a little more than a third of the Shoppers revenue growth. The remaining Shoppers revenue increases primarily were the result of improved sales in established markets, year-over-year geographic expansions and household growth in California and Florida, and new products. Direct Marketing results were affected by (i) \$7.0 million of revenue recognized in the second quarter of 2006 relating to a contract termination fee received from one of our financial vertical customers that was acquired in 2006, and (ii) a large, complex, world-wide project that was launched and substantially completed in the first quarter of 2005 for a client in the high-tech vertical market.

Operating Expenses

Overall operating expenses increased 5.7%, to \$998.6 million, in 2006 compared to 2005. The increase in consolidated operating expenses was a result of increased operating expenses of 11.5% from the Shoppers segment and 2.4% from the Direct Marketing segment, partially offset by a 0.8% decrease in general corporate expense. The primary drivers of the increase in operating expenses were the acquisition of The Tampa Flyer in April 2005, higher Shoppers postage costs due to the postal rate increase in January 2006, higher Shoppers payrolls to support increased revenues, higher circulation volumes and expansions, \$7.4 million of stock-based compensation as a result of our adoption of Statement of Financial Accounting Standards (SFAS) No. 123, as revised, *Share-Based Payment* (SFAS 123R), higher paper costs due to higher rates, and expenses related to the contract termination discussed above.

Net Income/Earnings Per Share

Net income decreased 2.3%, to \$111.8 million, while diluted earnings per share were up 3.7%, to \$1.39 per share, in 2006 when compared to 2005. The decrease in net income was a result of decreased operating income and increased interest expense, partially offset by a lower effective tax rate in 2006 when compared to 2005. In 2006 we began expensing stock options and other equity-compensation, which impacted 2006 diluted earnings per share by approximately \$0.06 per share.

Direct Marketing

Direct Marketing operating results were as follows:

<i>In thousands</i>	2007	% Change	2006	% Change	2005
Revenues	\$ 732,461	3.2	\$ 709,728	2.2	\$ 694,558
Operating expenses	623,665	3.9	600,270	2.4	586,463
Operating income	\$ 108,796	-0.6	\$ 109,458	1.3	\$ 108,095

Year ended December 31, 2007 vs. Year ended December 31, 2006*Revenues*

Direct Marketing revenues increased \$22.7 million, or 3.2%, in 2007 compared to 2006. These results were affected by \$7.0 million of revenue recognized in the second quarter of 2006 relating to the contract termination fee discussed above. Excluding revenues from this contract termination, 2007 revenues were up \$29.7 million, or 4.2%, compared to 2006. Our high tech/telecom vertical, which was helped by our September 2006 acquisition of Aberdeen Group, Inc. (Aberdeen), was up double-digits, and our select vertical grew in the high-single digits. Our retail vertical was essentially flat, while our pharma/healthcare vertical was down in the low-single digits. Excluding the impact of the contract termination fee, our financial vertical was down in the mid-single digits.

Table of Contents

From a service offering perspective, Direct Marketing experienced increased revenues from telesales, market research, software sales, internet services and fulfillment. Partially offsetting these increases were declines in revenues from print, data and database processing, and data sales.

The acquisitions of StepDot Software GmbH in June 2006, Global Address in July 2006 and Aberdeen in September 2006 positively affected our revenues in 2007 compared to 2006. The sale of a print operation in October 2006 negatively affected our revenues in 2007 compared to 2006.

Revenues from our vertical markets in 2007 were impacted by the economic fundamentals of each industry, various market factors, including the demand for services by our clients, and the financial condition of and budgets available to specific clients. In general, revenues for Direct Marketing are affected by general national and international economic trends.

2008 revenues will depend on, among other factors, how successful we are at growing business with existing clients, acquiring new clients, meeting client demands and the strength of the national and international economy. We believe that in the long term we will continue to benefit from marketing and advertising expenditures being moved from other advertising media to the targeted media space, the results of which can be more effectively tracked, enabling measurement of the return on marketing investment. Standard postage rates increased in January 2006 and May 2007 and are expected to increase again in the first half of 2008. Postage rates influence the demand for our Direct Marketing services even though the cost of mailings is borne by our clients and is not directly reflected in our revenues or expenses. There is no assurance that future postal increases will not have an adverse impact on us.

Operating Expenses

Operating expenses increased \$23.4 million, or 3.9%, in 2007 compared to 2006. The results were affected by approximately \$4.2 million of costs, primarily severance and lease termination costs, recognized in 2007 as part of the restructuring initiative discussed above. Labor costs increased \$33.7 million, or 11.4%, in 2007 compared to 2006 due to severance and higher payrolls and temporary labor due to the relative increase in revenues from more labor intensive service lines. Production and distribution costs decreased \$14.8 million, or 6.5%, due to lower logistics-related transportation costs and less expense related to printing materials. The shift in revenues from high production cost, less labor intensive work done at our divested print facility to more labor intensive, lower production cost work done at Aberdeen also contributed to the changes in labor and production and distribution costs. General and administrative expense increased \$2.5 million, or 5.0%, due primarily to increased employee expenses including travel, recruiting and training costs, increased business service costs and higher bad debt expense due primarily to timing. Depreciation and amortization expense increased \$2.0 million, or 7.7%, due to additional intangible amortization related to 2006 acquisitions, primarily Aberdeen, and additional depreciation of assets related to our facility in Manila that was opened in the last half of 2006.

The acquisitions of StepDot Software GmbH in June 2006, Global Address in July 2006 and Aberdeen in September 2006 contributed to the increase in operating expenses in 2007 compared to 2006. The sale of a print operation in October 2006 partially offset the increase in operating expenses in 2007 compared to 2006.

Direct Marketing's largest cost components are labor and transportation costs. Labor costs are partially variable and tend to fluctuate with revenues and the demand for our Direct Marketing services. Fuel costs have increased significantly in the last few years and were near historic levels throughout 2007. Fuel costs are expected to remain at high levels for the foreseeable future which will continue to impact Direct Marketing's total production costs and total operating expenses.

Table of Contents**Year ended December 31, 2006 vs. Year ended December 31, 2005***Revenues*

Direct Marketing revenues increased \$15.2 million, or 2.2%, in 2006 compared to 2005. These results were affected by (i) \$7.0 million of revenue recognized in the second quarter of 2006 relating to a contract termination fee received from one of our financial vertical customers that was acquired in the second quarter of 2006, and (ii) a large, complex, world-wide project that was launched and substantially completed in the first quarter of 2005 for a client in the high-tech vertical market. Our pharma/healthcare vertical was up over 15%, and our select vertical grew in the mid-single digits compared to 2005. Retail, our largest vertical in terms of annual revenue, grew in the low single digits. Our financial vertical (excluding the termination fee) was down in the mid-single digits, and our high-tech vertical (excluding the one-time project) was down in the low single digits compared to 2005.

From a service offering perspective, Direct Marketing experienced increased revenues from data processing, software sales, logistics and telesales. Partially offsetting these increases were declines in revenues from account management and database sales.

The acquisitions of StepDot Software GmbH in June 2006, Global Address in July 2006 and Aberdeen in September 2006 positively affected our revenues in 2006 compared to 2005. The sale of a print operation in October 2006 negatively affected our revenues in 2006 compared to 2005.

Operating Expenses

Operating expenses increased \$13.8 million, or 2.4%, in 2006 compared to 2005. These results include (i) \$3.0 million of operating expense recognized as a result of the contract termination discussed above, and (ii) \$3.9 million of stock-based compensation recorded in 2006 as a result of our adoption of SFAS 123R. Excluding these two factors, operating expense increased \$6.9 million, or 1.2%. Labor costs increased \$7.8 million, or 2.7% in 2006 compared to 2005. Excluding the additional labor costs associated with the contract termination and stock-based compensation, labor costs increased \$1.8 million, or 0.6% as salary increases and increased healthcare costs were partially offset by decreased incentive compensation. Production and distribution costs increased \$2.0 million, or 0.9%, due to increased outsource costs and production services, partially offset by lower job printing costs. General and administrative expense increased \$2.5 million, or 5.2%, due to losses on the sale of a print operation in October 2006, increased facility costs from our new facility in Manila, and higher utility costs at existing facilities. These increases were partially offset by decreased insurance expense, due to better experience, and bad debt expense, primarily due to timing of collections. Depreciation and amortization expense increased \$1.6 million, or 6.5%, due to accelerated depreciation of assets associated with the contract termination, additional intangible amortization due to recent acquisitions, depreciation of assets related to the new facility in Manila, and amortization beginning on a new release of our Trillium software.

The acquisitions of StepDot Software GmbH in June 2006, Global Address in July 2006 and Aberdeen in September 2006 also contributed to the increase in our operating expenses in 2006 compared to 2005.

Shoppers

Shoppers operating results were as follows:

<i>In thousands</i>	2007	% Change	2006	% Change	2005
Revenues	\$ 430,425	-9.4	\$ 474,960	7.8	\$ 440,435
Operating expenses	359,641	-6.9	386,146	11.5	346,204
Operating income	\$ 70,784	-20.3	\$ 88,814	-5.7	\$ 94,231

Year ended December 31, 2007 vs. Year ended December 31, 2006*Revenues*

Shoppers revenues decreased \$44.5 million, or 9.4%, in 2007 compared to 2006. The decrease in revenues was the result of decreased sales in established markets, the discontinuation of commercial printing operations in

Table of Contents

our Tampa facility, and circulation reductions. Our Shoppers business continues to be impacted by the difficult economic environments primarily attributable to the condition of the real estate and associated financing markets in California and Florida. The impact became more pronounced throughout 2007, and affected virtually all revenue categories. The 600,000 circulation reduction at the end of June 2007 discussed above represented approximately \$3.0 million of revenue in the first half of 2007. At December 31, 2007, our Shoppers circulation reached approximately 13 million in California and Florida each week. We will continue to evaluate all of our circulation performance. Despite this recent circulation reduction, we continue to believe that future expansions may provide increased revenue opportunities in the long term.

In 2007, the economic environment faced by our Shoppers business was the most difficult we have seen in well over a decade. We do not believe the Shoppers revenue environment will improve in any meaningful fashion in 2008 given the current cyclical issues impacting the California and Florida markets. In fact, this revenue environment may deteriorate from 2007 levels.

Operating Expenses

Operating expenses decreased \$26.5 million, or 6.9%, in 2007 compared to 2006. This decrease was partially offset by approximately \$1.8 million of costs recognized in 2007 related to the restructuring and circulation shut down described above. Total labor costs decreased \$7.9 million, or 5.7%, due to lower sales commissions and lower incentive compensation related to the revenue decline. This decline was partially offset by severance costs throughout the Shoppers segment, and labor investments associated with the Shopper digital unit. Total production costs decreased \$16.0 million, or 7.8%, due primarily to decreased paper costs resulting from the overall decline in revenues and the discontinuation of commercial printing operations in our Tampa facility, decreased offload printing costs due to decreased print-and-deliver volumes, and decreased postage costs due to a decline in distribution revenues. This decrease was partially offset by costs incurred to terminate several office leases related to the circulation reduction. Total general and administrative costs decreased \$3.3 million, or 9.2%, due to lower promotion costs and lower employee expenses including travel, recruiting and training costs. Depreciation and amortization expense increased \$0.7 million, or 8.4%, due to increased capital expenditures in recent years to support growth, a change in how we address our publications, and the write-off of assets related to the circulation shut down.

Shoppers' largest cost components are labor, postage and paper. Shoppers' labor costs are partially variable and tend to fluctuate with the number of zones, circulation, volumes and revenues. Standard postage rates increased in January 2006 and again in May 2007. However, we changed the manner in which we address our Shoppers publications from detached cards to individual labels, and as a result our per-piece postage rates remained steady when the May 2007 rates were put into effect. Standard postage rates are expected to increase in the first half of 2008, which will increase Shoppers' production costs. Paper prices declined in the second half of 2007, contributing to lower production costs. Paper prices are expected to remain at these levels for the first six months of 2008, and increase in the second half.

Year ended December 31, 2006 vs. Year ended December 31, 2005

Revenues

Shoppers revenues increased \$34.5 million, or 7.8%, in 2006 compared to 2005. The acquisition of The Tampa Flyer in April 2005 contributed a little more than a third of this revenue growth. The remaining revenue increases primarily were the result of improved sales in established markets, year-over-year geographic expansions and household growth in California and Florida, and new products. Total Shoppers circulation increased by 870,000 during 2006, including 555,000 in California and 315,000 in Florida. During the year the Harte-Hanks Shoppers *PennySaverUSA.com* publication in Southern California increased circulation by 357,000. The Harte-Hanks Shoppers *PennySaver.com* publication in Northern California increased geographic circulation by 198,000. The Harte-Hanks Shoppers publication *TheFlyer.com*, located in South Florida, increased circulation by 17,000. The Harte-Hanks Shoppers publication *TheFlyer.com*, located in the Tampa, Florida area increased circulation by 298,000. At December 31, 2006, Shoppers circulation reached over 13.4 million in California and Florida each week.

Table of Contents

From a product-line perspective, Shoppers had growth from both run-of-press (ROP, or in-book) advertising, including core sales and employment, real estate and automotive advertising, and from distribution products.

Operating Expenses

Operating expenses increased \$39.9 million, or 11.5%, in 2006 compared to 2005 as a result of increased labor costs, production and distribution costs, depreciation and amortization expense, stock-based compensation and the acquisition of The Tampa Flyer in April 2005. Total labor costs increased \$14.7 million, or 12.1%. Excluding the Tampa acquisition, labor costs increased \$9.3 million, or 8.2%. \$1.8 million of this increase relates to stock-based compensation recorded in 2006 as a result of our adoption of SFAS 123R. The remaining increase in labor costs relates to higher payroll costs to support increased revenues, higher circulation volumes and expansions and higher healthcare costs. The increase in labor costs was partially offset by lower incentive compensation. Total production costs increased \$24.1 million, or 13.3%. Excluding the Tampa acquisition, production costs increased \$17.1 million, or 10.1%, including increased postage costs, increased offload printing expense due to increased print-and-deliver volumes and higher printing rates, and higher paper costs due to increased newsprint and job paper rates and circulation growth. Excluding the Tampa acquisition, postage expense was up \$10.3 million, or 11.2%, due to the postal rate increase in January 2006 and circulation growth. Total general and administrative costs were down slightly, 0.1%. Excluding the Tampa acquisition, general and administrative costs decreased \$1.2 million, or 3.4%, primarily due to lower insurance expense and lower bad debt expense, partially offset by increased facilities costs and promotion expense. Total depreciation expense was up \$0.8 million, or 12.2%, with a little less than a third of the increase attributable to the Tampa acquisition. Intangible amortization related to the Tampa acquisition was \$1.2 million during 2006 compared to \$0.8 million during 2005.

General Corporate Expense

Year ended December 31, 2007 vs. Year ended December 31, 2006

General corporate expense increased \$2.4 million, or 19.9%, during 2007 compared to 2006. The increase was primarily due to \$2.5 million of compensation costs recognized during the third quarter of 2007 associated with the announced retirement of our former President and Chief Executive Officer, Mr. Richard Hochhauser.

Year ended December 31, 2006 vs. Year ended December 31, 2005

General corporate expense decreased \$0.1 million, or 0.8%, during 2006 compared to 2005. The decrease in general corporate expense was primarily due to decreased labor, as a result of lower incentive compensation, and decreased insurance expense. Partially offsetting this decrease was \$1.5 million of additional stock-based compensation recorded in 2006 as a result of our adoption of SFAS 123R.

Interest Expense

Interest expense increased \$6.7 million, or 105.1%, in 2007 compared to 2006, and \$4.4 million, or 223.6%, in 2006 compared to 2005. These increases were due to higher outstanding debt levels, primarily due to the repurchases of our common stock, and higher interest rates than in the previous years. Our debt at December 31, 2007 and 2006 is described in Note C of the Notes to Consolidated Financial Statements, included herein.

Interest Income

Interest income increased \$0.3 million, or 133%, in 2007 compared to 2006 due to normal variances in cash levels and higher interest rates on investments. Interest income was essentially unchanged in 2006 compared to 2005 as a result of the combination of normal variances in cash levels and an increase in rates on investments.

Other Income and Expense

Other net expense for 2007 and 2006 primarily consists of balance-based bank charges and stockholders' expenses.

Table of Contents

Income Taxes

Year ended December 31, 2007 vs. Year ended December 31, 2006

Income taxes decreased \$9.0 million in 2007 compared to 2006 due to lower pretax income levels. The effective income tax rate for 2007 was 38.7% compared to 37.6% in 2006. The increase in the effective tax rate from 2006 to 2007 was principally due to higher production activities tax deductions in 2006, a favorable resolution of a state tax matter in 2006 and the ability to use a one time favorable permanent timing item in 2006. The effective income tax rate calculated is higher than the federal statutory rate of 35% due to the addition of state taxes.

Year ended December 31, 2006 vs. Year ended December 31, 2005

Income taxes decreased \$4.6 million in 2006 compared to 2005 due to lower pretax income levels. The effective tax rate for 2006 was 37.6% compared to 38.6% in 2005. Tax expense in 2006 was positively impacted by a favorable resolution to a state tax matter and production activities tax deductions, resulting in the lower effective tax rate compared to 2005. The effective income tax rate calculated is higher than the federal statutory rate of 35% due to the addition of state taxes.

Acquisitions

We made several acquisitions in 2006 and 2005. We did not make any acquisitions in 2007.

Subsequent to year end, in January 2008, we acquired Mason Zimble Limited, a full-service integrated digital marketing agency specializing in the technology sector. With offices in Bristol, UK and Reading, UK, Mason Zimble provides technology companies with a full range of integrated digital marketing services, including direct marketing, advertising and branding, incorporating Web site development, e-mail lead generation, viral, channel incentive programs, media planning and buying, research and other services. We have not yet completed the purchase accounting for this transaction. This acquisition is not expected to have a material impact on our results of operations for 2008.

In September 2006, we acquired Aberdeen, a provider of technology market research, intelligence, and demand generation services located in Boston, Massachusetts. Aberdeen offers market information and services through research channels, and prepares reports based on primary research and benchmarking data from more than 25,000 companies. We believe this acquisition has provided synergy opportunities with our CI Technology Database, which now tracks technology infrastructure, business profiles and technology purchase plans at 680,000 locations in North America, South America and Europe expanding their base globally for research. The results of Aberdeen's reports on current marketplace experiences and trends are used to generate qualified leads by its clients, and we believe this intelligence assists our clients in their own marketing efforts. Goodwill of \$32.3 million, intangible assets not subject to amortization of \$5.0 million, and intangible assets subject to amortization of \$4.3 million have been recognized in this transaction and assigned to the Direct Marketing segment.

In July 2006, we acquired Global Address, a provider of global postal address data quality software and services incorporating standards for more than 230 nations and territories worldwide. Global Address, located in Bristol, UK, and with additional operations in Mountain View, CA, focuses on international address data, and has provided key components of Harte-Hanks Global Data Management, one of our data services offerings. We continue to integrate elements of Global Address into our existing international offerings, among them Global Data Management and our Trillium Software data quality solutions, while continuing to support stand-alone Global Address products and services in the marketplace. The total amount of goodwill recognized in this transaction was \$8.1 million and was assigned to the Direct Marketing segment. No intangible assets were recognized in this transaction.

In June 2006, we acquired StepDot Software GmbH of Germany and integrated it into our Trillium Software operations. Based in Böblingen, Germany, StepDot was a value-added reseller specializing in data quality and integration solutions for Harte-Hanks since 2002. The acquisition provided us with a more strategic presence in Central Europe and Germany. The total amount of goodwill recognized in this transaction was \$0.4 million and was assigned to the Direct Marketing segment. No intangible assets were recognized in this transaction.

Table of Contents

In April 2006, we acquired certain assets of PrintSmart, Inc., a full-service print-on-demand provider located in East Bridgewater, Massachusetts, in an effort to expand and enhance our digital printing capabilities. No goodwill was recognized in this transaction. Intangible assets recognized in this transaction which are subject to amortization, relating to a service contract, totaled approximately \$1.0 million and were assigned to the Direct Marketing segment.

In April 2005, we acquired substantially all of the assets of Flyer Printing Company, Inc. related to *The Flyer* publication, located in Tampa, Florida. *TheFlyer.com*, our current name for this publication, is a weekly shopper publication delivered by mail with circulation at the time of the acquisition of 955,000 in the Tampa, Florida metropolitan area. The total amount of goodwill recognized in this transaction was \$41.6 million. Intangible assets recognized in this transaction that are subject to amortization, relating to client relationships and non-compete agreements, totaled \$8.3 million. Intangible assets recognized in this transaction that are not subject to amortization, relating to trademarks and trade names, totaled \$7.6 million. All goodwill and intangibles recognized as part of this acquisition were assigned to the Shoppers segment.

In February 2005, we acquired long-standing Australian partner Communiqué Direct pursuant to a purchase option we acquired in June 2003. Founded in 1992, Communiqué Direct, located in a north suburb of Sydney, Australia, was a privately held firm that provided a range of marketing and information services for the business-to-business sector across the Asia-Pacific region. Since 1998, Harte-Hanks and Communiqué Direct had worked with each other on many Pacific Rim marketing applications, focusing on our high-tech clients.

The total cost of acquisitions in 2006 and 2005 was \$53.9 million and \$63.3 million, respectively, and all were paid in cash. We did not make any acquisition-related payments in 2007. The operating results of these acquisitions have been included in the accompanying Consolidated Financial Statements from the date of the acquisitions.

Liquidity and Capital Resources

Sources and Uses of Cash

As of December 31, 2007, cash and cash equivalents were \$22.8 million, decreasing \$15.4 million from cash and cash equivalents at December 31, 2006. This net decrease was a result of net cash provided by operating activities of \$143.2 million, offset by net cash used in investing activities of \$28.1 million and net cash used in financing activities of \$130.8 million.

Operating Activities

Net cash provided by operating activities in 2007 was \$143.2 million, compared to \$146.4 million in 2006. The \$3.2 million year-over-year decrease was attributable to lower net income, partially offset by changes within working capital assets and liabilities.

In 2007, our principal working capital changes, which directly affected net cash provided by operating activities, were as follows:

An increase in accounts receivable, primarily attributable to timing. Days sales outstanding of approximately 60 days at December 31, 2007 compared to 56 days at December 31, 2006;

A decrease in inventory due to sales of paper inventory related to the print operation that was sold in October 2006;

A decrease in prepaid expenses and other current assets due to timing of payments;

An increase in accounts payable due to a reclassification of a net overdraft cash position and higher health insurance reserves due to a change in provider and manner and timing of payments;

Table of Contents

A decrease in accrued payroll and related expenses due to a lower bonus accrual at December 31, 2007 than at December 31, 2006;

An increase in customer deposits and unearned revenue due to timing of receipts; and

An increase in income taxes payable due to the timing of quarterly estimated federal and state taxes payments.

Investing Activities

Net cash used in investing activities was \$28.1 million in 2007, compared to \$86.8 million in 2006. The difference is the result of less acquisition-related expenditures and capital spending in 2007 than in 2006.

Financing Activities

Net cash outflows from financing activities were \$130.8 million in 2007 compared to net cash outflows of \$46.2 million in 2006. The difference is attributable primarily to \$88.9 million less net borrowing in 2007 than in 2006.

Credit Facilities

On August 12, 2005, we entered into a five-year \$125 million revolving credit facility (Revolving Credit Facility) with JPMorgan Chase Bank, N.A., as Administrative Agent. The Revolving Credit Facility allows us to obtain revolving credit loans. For each borrowing under the Revolving Credit Facility, we can generally choose to have the interest rate for that borrowing calculated based on either JPMorgan Chase Bank's publicly announced New York prime rate or on a Eurodollar (as defined in the Revolving Credit Agreement) rate plus a spread. The spread is determined based on our total debt-to-EBITDA (as defined in the Revolving Credit Agreement) ratio then in effect, and ranges from .315% to .60% per annum. There is a facility fee that we are also required to pay under the Revolving Credit Facility that is based on a rate applied to the total commitment amount under the Revolving Credit Facility, regardless of how much of that commitment we have actually drawn upon. The facility fee rate ranges from .085% to .15% per annum, depending on our total debt-to-EBITDA ratio then in effect.

On September 6, 2006, we entered into a five-year term loan facility (Term Loan Facility) with Wells Fargo Bank, N.A., as Administrative Agent. The Term Loan Facility originally provided for a commitment of up to \$200 million. On December 31, 2007, we began making the scheduled quarterly principal payments as follows:

Quarterly Installments	Percentage of Drawn Amounts
1 8	2.50% each
9 12	3.75% each
13 15	5.00% each
Maturity Date	Remaining Principal Balance

As we have capacity under our Revolving Credit Facility and the intent to use the Revolving Credit Facility to fund the required quarterly principal payments under the Term Loan Facility through 2008, we have classified our entire debt balance at December 31, 2007 as long-term.

The Term Loan Facility matures on September 6, 2011. For each borrowing under the Term Loan Facility, we can generally choose to have the interest rate for that borrowing calculated based on either (i) a Eurodollar (as defined in the Term Loan Agreement) rate, plus a spread which is determined based on our total debt-to-EBITDA ratio (as defined in the Term Loan Agreement) then in effect, and ranges from .315% to .60% per annum, or (ii) the higher of Wells Fargo Bank's prime rate in effect on such date or the Federal Funds rate in effect on such date plus .50%. There is a facility fee that we are also required to pay under the Term Loan Facility that is based on a facility fee rate applied to the outstanding principal balance owed under the Term Loan Facility. The facility fee rate ranges from .085% to .15% per annum, depending on our total debt-to-EBITDA ratio then in effect. We may elect to prepay the Term Loan Facility at any time without incurring any prepayment penalties. Once an amount has been prepaid, it may not be reborrowed.

Table of Contents

Subsequent to year end, on January 18, 2008, we entered into a six-month \$50 million revolving credit facility (Bridge Loan Facility) with Wells Fargo Bank, N.A., as Administrative Agent. The Bridge Loan Facility matures on July 18, 2008 and allows us to obtain revolving credit loans up to that date. We intend to utilize the availability under the Bridge Loan Facility primarily to repurchase shares of our common stock and for other general corporate purposes. For each borrowing under the Bridge Loan Facility, we can generally choose to have the interest rate for that borrowing calculated based on either (i) a Eurodollar (as defined in the Bridge Loan Agreement) rate, plus a spread which is determined based on our total debt-to-EBITDA ratio (as defined in the Bridge Loan Agreement) then in effect, and ranges from .40% to .75% per annum, or (ii) the higher of Wells Fargo Bank's prime rate in effect on such date or the Federal Funds rate in effect on such date plus .50%. There is a facility fee that we are also required to pay under the Bridge Loan Facility that is based on a rate applied to the total commitment amount under the Bridge Loan Facility. Prior to termination of the commitment under the Bridge Loan Facility, the facility rate is applied to the total commitment amount under the Bridge Loan Facility, regardless of how much of that commitment we have actually drawn upon. Commencing upon termination of the commitment under the Bridge Loan Facility, the facility rate is applied to the outstanding principal balance owed under the Bridge Loan Facility. The facility fee rate ranges from .10% to .25% per annum, depending on our total debt-to-EBITDA ratio then in effect.

Under the credit facilities we are required to maintain an interest coverage ratio of not less than 2.75 to 1 and a total debt-to-EBITDA ratio of not more than 3.0 to 1. The credit facilities also contain covenants restricting our and our subsidiaries' ability to grant liens and enter into certain transactions and limit the total amount of indebtedness of our subsidiaries to \$20 million.

The credit facilities each also include customary covenants regarding reporting obligations, delivery of notices regarding certain events, maintaining our corporate existence, payment of obligations, maintenance of our properties and insurance thereon at customary levels with financially sound and reputable insurance companies, maintaining books and records and compliance with applicable laws. The credit facilities each also provide for customary events of default including nonpayment of principal or interest, breach of representations and warranties, violations of covenants, failure to pay certain other indebtedness, bankruptcy and material judgments and liabilities, certain violations of environmental laws or ERISA or the occurrence of a change of control prevent of default under existing agreements. As of December 31, 2007, we were in compliance with all of the covenants of our credit facilities.

In September 2007, we entered into a two-year interest rate swap with a notional amount of \$150 million and a fixed rate of 4.655% in order to limit a portion of our interest rate exposure by converting a portion of our variable-rate debt to fixed-rate debt.

Contractual Obligations

Contractual obligations at December 31, 2007 are as follows:

<i>In thousands,</i>	Total	2008	2009	2010	2011	2012	Thereafter
Debt	\$ 259,125	\$ 19,500	\$ 21,938	\$ 100,687	\$ 117,000	\$	\$
Interest on fixed-rate long-term debt	12,394	7,099	5,295				
Operating leases	90,768	23,972	21,406	16,455	9,586	7,044	12,305
Deferred compensation liability	5,267	702	702	702	702	702	1,757
Unfunded pension plan benefit payments	20,502	577	671	1,075	1,112	1,231	15,836
Other long-term obligations	9,400	4,511	3,613	1,276			
Total contractual cash obligations	\$ 397,456	\$ 56,361	\$ 53,625	\$ 120,195	\$ 128,400	\$ 8,977	\$ 29,898

At December 31, 2007, we had letters of credit in the amount of \$24.9 million. No amounts were drawn against these letters of credit at December 31, 2007. These letters of credit renew annually and exist to support insurance programs relating to workers' compensation, automobile and general liability, and leases. We had no other off-balance sheet arrangements at December 31, 2007.

Table of Contents

Dividends

We paid a quarterly dividend of 7.0 cents per common share and 6.0 cents per common share in each of the quarters in the years ended December 31, 2007 and 2006, respectively. In January 2008, we announced an increase in the regular quarterly dividend from 7.0 cents per share to 7.5 cents per share, payable March 14, 2008 to holders of record on February 29, 2008.

Share Repurchase

During 2007, we repurchased 8.4 million shares of our common stock for \$183.9 million under our stock repurchase program. As of December 31, 2007, we have repurchased 59.0 million shares since the beginning of our January 1997 stock repurchase program. In May 2007, our Board of Directors authorized an additional 6 million shares under our stock repurchase program, increasing the total authorization to 61.9 million shares. Under this program, we had authorization to repurchase approximately 2.9 million additional shares at December 31, 2007. In January 2008, our Board authorized an additional 12.5 million shares under our stock repurchase program, bringing the total repurchase authorization to 74.4 million shares.

During 2007, we received 0.1 million shares of our common stock, with an estimated market value of \$1.9 million, in connection with stock option exercises. Since January 1997, we have received 1.6 million shares in connection with stock option exercises.

Outlook

We consider such factors as current assets, current liabilities, total debt, revenues, operating income, cash flows from operations, investing activities and financing activities when assessing our liquidity. Our primary sources of liquidity have historically been cash and cash equivalents on hand and cash generated from operating activities. Our management of cash is designed to optimize returns on cash balances and to ensure that it is readily available to meet our operating, investing and financing requirements as they arise. Capital resources are also available from and provided through our unsecured credit facilities, subject to the terms and conditions of those facilities.

The amount of cash on hand and borrowings available under our credit facilities are influenced by a number of factors, including fluctuations in our operating results, revenue growth, accounts receivable collections, capital expenditures, tax payments, share repurchases, acquisitions and dividends.

Based on our current operational plans, we believe that our credit facilities, together with cash provided by operating activities, will be sufficient to fund operations and anticipated capital expenditures, payments of principal and interest on our borrowings, and dividends on our common stock for at least the next twelve months. As of December 31, 2007, we had \$56.0 million of unused borrowing capacity under our Revolving Credit Facility. As of December 31, 2007, we did not have any unused borrowing capacity under our Term Loan Facility. As of February 15, 2008, we had \$50 million of unused borrowing capacity under our Bridge Facility that we entered into in January 2008, which matures on July 18, 2008.

Subject to market conditions, we anticipate entering into an approximately \$100 million, longer-term credit facility prior to the maturity date of the Bridge Loan Facility, at which time we intend to repay any amounts then owed under the Bridge Loan Facility. We intend to utilize the availability under this anticipated longer-term credit facility primarily to continue to repurchase shares of our common stock and for other general corporate purposes.

Critical Accounting Policies

Critical accounting policies are defined as those that, in our judgment, are most important to the portrayal of our company's financial condition and results of operations and which require complex or subjective judgments or

Table of Contents

estimates. The areas that we believe involve the most significant management estimates and assumptions are detailed below. Actual results could differ materially from those estimates under different assumptions and conditions. Historically, actual results have not differed significantly from our estimates.

Revenue Recognition

We recognize revenue when all of the following criteria are satisfied: (i) persuasive evidence of an arrangement exists; (ii) the price is fixed or determinable; (iii) collectibility is reasonably assured; and (iv) the service has been performed or the product has been delivered.

Payments received in advance of the performance of services or delivery of the product are recorded as deferred revenue until such time as the services are performed or the product is delivered.

Our accounting policy for revenue recognition has an impact on our reported results and relies on certain estimates that require judgments on the part of management. The portion of our revenue that is most subject to estimates and judgments is revenue recognized using the proportional performance method, as discussed below.

Direct Marketing revenue is derived from a variety of services and products, and may be billed at hourly rates, monthly rates or a fixed price. For all sales, we require either a purchase order, a statement of work signed by the client, a written contract, or some other form of written authorization from the client.

Revenue from database design and development, market research, agency services, analytical services, and creative are typically billed based on time and materials or at a fixed price. If billed at a fixed price, revenue is recognized on a proportional performance basis as the services specified in the arrangement are performed. Proportional performance is based on the ratio of direct costs incurred to total estimated costs where the costs incurred, primarily labor hours and outsourced services, represent a reasonable surrogate for output measures or contract performance. Progress on a contract is matched against project costs and costs to complete on a periodic basis. Provision for estimated contract losses, if any, is made in the period such losses are determined. Management estimates and judgments are used in connection with determining the revenue recognized in these instances. Should actual costs differ significantly from the original estimated costs, the timing of revenues and overall profitability of the contract could be impacted. Contracts accounted for under the proportional performance method constituted less than 7.5% of total Direct Marketing revenue and less than 4.5% of our total revenue for the years ended December 31, 2007, 2006 and 2005.

Revenue from technology database subscriptions is based on a fixed price and is recognized ratably over the term of the subscription. Revenue from database and website hosting services is recognized ratably over the contractual hosting period, and pricing is typically based on a fixed price per month or price per contract.

Revenue from services such as data processing, printing, personalization of communication pieces using laser and inkjet printing, targeted mail, fulfillment, email marketing and transportation logistics are recognized as the work is performed. Revenue from these services is typically based on a fixed price or rate given to the client.

Revenue related to E-Care (including online technical support and inbound email management), inbound and outbound telemarketing, and sales lead management is also typically based on a fixed price per transaction or service provided. Revenue from these services is recognized as the service or activity is performed.

Revenue from software is recognized in accordance with the American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) 97-2 Software Revenue Recognition, as amended by SOP 98-9 Modification of SOP 97-2, Software Revenue Recognition. SOP 97-2 generally requires revenue earned on software arrangements involving multiple elements to be allocated to each element based on the vendor-specific objective evidence of fair values of the respective elements. For software sales with multiple elements (for example, software licenses with undelivered post-contract customer support or PCS), we allocate revenue to each component of the arrangement using the residual value method based on the fair value

Table of Contents

of the undelivered elements. This means we defer revenue from the software sale equal to the fair value of the undelivered elements. The fair value of PCS is based upon separate sales of renewals to other clients. The fair value of services, such as training and consulting, is based upon separate sales of these services to other clients.

The revenue allocated to PCS is recognized ratably over the term of the support period. Revenue allocated to professional services is recognized as the services are performed. The revenue allocated to software products, including time-based software licenses, is recognized, if collection is probable, upon execution of a licensing agreement and shipment of the software or ratably over the term of the license, depending on the structure and terms of the arrangement. If the licensing agreement is for a term of one year or less and includes PCS, we recognize the software and the PCS revenue ratably over the term of the license.

We apply the provisions of Emerging Issues Task Force Issue No. 00-03 Application of AICPA Statement of Position 97-2 to Arrangements that Include the Right to Use Software Stored on Another Entity's Hardware to our hosted software service transactions.

For certain non-software arrangements, we enter into contracts that include delivery of a combination of two or more of our service offerings. Typically, such multiple element arrangements incorporate the design and development of data management tools or systems and an ongoing obligation to manage, host or otherwise run solutions for our customer. Such arrangements are divided into separate units of accounting, provided that the delivered item has stand-alone value and there is objective and reliable evidence of the fair value of the undelivered items. The total arrangement fee is allocated to the undelivered elements based on their fair values and to the initial delivered elements using the residual method. Revenue from these services is recognized separately, and in accordance with our revenue recognition policy, for each element.

As described above, sometimes our customer arrangements have multiple deliverables, including service elements. Generally, our multiple-element arrangements fall within the scope of specific accounting standards that provide guidance regarding the separation of elements in multiple-deliverable arrangements and the allocation of consideration among those elements (e.g., AICPA SOP 97-2 Software Revenue Recognition). If not, we apply the provisions of Emerging Issues Task Force Issue No. 00-21, Accounting for Revenue Arrangements with Multiple Deliverables (EITF 00-21). The provisions of EITF 00-21 require us to unbundle multiple element arrangements into separate units of accounting when the delivered element(s) has stand-alone value and fair value of the undelivered element(s) exist(s). When we are able to unbundle the arrangement into separate units of accounting, we apply one of the accounting policies described above to each unit. If we are unable to unbundle the arrangement into separate units of accounting, we apply one of the accounting policies described above to the entire arrangement. This might impact the timing of revenue recognition, but would not change the total revenue recognized from the arrangement.

Shopper services are considered rendered, and the revenue recognized, when all printing, sorting, labeling and ancillary services have been provided and the mailing material has been received by the United States Postal Service.

Taxes collected from customers and remitted to governmental authorities are not reflected in our revenues or expenses.

Allowance for Doubtful Accounts

We maintain our allowance for doubtful accounts at a balance adequate to reduce accounts receivable to the amount of cash expected to be realized upon collection. The methodology used to determine the minimum allowance balance is based on our prior collection experience and is generally related to the accounts receivable balance in various aging categories. The balance is also influenced by specific clients' financial strength and circumstance. Accounts that are determined to be uncollectible are written off in the period in which they are determined to be uncollectible. Periodic changes to the allowance balance are recorded as increases or decreases to bad debt expense, which is included in the Advertising, selling, general and administrative line

Table of Contents

of our Consolidated Statements of Operations. We recorded bad debt expense of \$3.5 million, \$2.5 million and \$4.2 million for the years ended December 31, 2007, 2006 and 2005, respectively. While we believe our reserve estimate to be appropriate, we may find it necessary to adjust the allowance for doubtful accounts if future bad debt expense exceeds the estimated reserve. Given the significance of accounts receivable to the consolidated financial statements, the determination of net realizable values is considered to be a critical accounting estimate.

Reserve for Healthcare, Workers Compensation, Automobile and General Liability

Our deductible for individual healthcare claims is \$0.2 million. Our deductible for workers compensation is \$0.5 million. We have a \$0.3 million deductible for automobile and general liability claims. Our insurance administrator provides us with estimated loss reserves, based upon its experience dealing with similar types of claims, as well as amounts paid to date against these claims. Management makes various subjective judgments about a number of factors in determining our reserve for healthcare, workers compensation, automobile and general liability insurance, and the related expense. If ultimate losses were 10% higher than our estimate at December 31, 2007, net income would be impacted by approximately \$0.9 million, net of taxes. The amount that earnings would be impacted is dependent on the claim year and our deductible levels for that plan year. Periodic changes to the reserve for workers compensation, automobile and general liability are recorded as increases or decreases to insurance expense, which is included in the "Advertising, selling, general and administrative" line of our Consolidated Statement of Operations. Periodic changes to the reserve for healthcare are recorded as increases or decreases to employee benefits expense, which is included in the Payroll line of our Consolidated Statement of Operations.

Goodwill

Goodwill is recorded to the extent that the purchase price exceeds the fair value of the assets acquired in accordance with SFAS No. 141, *Business Combinations* (SFAS 141). Pursuant to SFAS No. 142, *Goodwill and Other Intangible Assets* (SFAS 142), goodwill and other intangibles with indefinite useful lives are periodically tested for impairment.

We assess the impairment of our goodwill in accordance with SFAS 142, by determining the fair value of each of our reporting units and comparing the fair value to the carrying value for each reporting unit. We have identified our reporting units as Direct Marketing and Shoppers. Fair value is determined using projected discounted future cash flows and cash flow multiple models, based on historical performance and management's estimate of future performance, giving consideration to existing and anticipated competitive and economic conditions. If a reporting unit's carrying amount exceeds its fair value, we must calculate the implied fair value of the reporting unit's goodwill by allocating the reporting unit's fair value to all of its assets and liabilities (recognized and unrecognized) in a manner similar to a purchase price allocation, and then compare this implied fair value to its carrying amount. To the extent that the carrying amount of goodwill exceeds its implied fair value, an impairment loss is recorded.

Both the Direct Marketing and Shoppers segments were tested for impairment using November 30 as our valuation date. We have not recorded an impairment loss in any of the three years ended December 31, 2007. Significant estimates utilized in our discounted cash flow model include weighted-average cost of capital and the long-term rate of growth for each of our reporting segments. These estimates require management's judgment. Any significant changes in key assumptions about our businesses and their prospects, or changes in market conditions, could have an impact on this annual analysis.

At December 31, 2007 and 2006, our goodwill balance was \$543.6 million and \$545.3 million, respectively. Based upon our analysis, the estimated fair values of our reporting units as of December 31, 2007 were well in excess of the reporting units' carrying values.

Table of Contents

Stock-based Compensation

Beginning January 1, 2006, we account for stock-based compensation in accordance with SFAS 123R. Under the fair value recognition provisions of SFAS 123R, stock-based compensation cost is measured at the grant date based on the value of the award and is recognized as expense over the requisite service period. Prior to January 1, 2006, we accounted for share-based awards under the recognition and measurement principles of Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB No. 25) and related interpretations. Accordingly, prior to January 1, 2006, no compensation expense was recognized for share-based awards granted where the exercise price was equal to the market price of the underlying stock on the date of grant. Determining the fair value of share-based awards requires judgment, including in some cases estimating expected term, volatility and dividend yield. In addition, judgment is required in estimating the amount of stock-based awards that are expected to be forfeited. If actual results differ significantly from some of these estimates, stock-based compensation expense and our results of operations could be materially impacted. For the years ended December 31, 2007, 2006 and 2005, we recorded total stock-based compensation expense of \$7.1 million, \$7.4 million and \$0.2 million, respectively.

New Accounting Pronouncements

As discussed in Note A of the Notes to Consolidated Financial Statements, certain new financial accounting pronouncements have been issued which either have already been reflected in the accompanying consolidated financial statements, or will become effective for our financial statements at various dates in the future. Our adoption of SFAS 141R, *Business Combinations*, in 2009 will affect the way we account for acquisitions, including acquisition-related costs, contractual contingencies and contingent consideration, and may also impact the amount of information we disclose about acquisitions.

The adoption of the remaining new accounting pronouncements discussed in Note A of the Notes to Consolidated Financial Statements have not and are not expected to have a material effect on our consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk includes the risk of loss arising from adverse changes in market rates and prices. We face market risks related to interest rate variations and to foreign exchange rate variations. From time to time, we may utilize derivative financial instruments as described below to manage our exposure to such risks.

We are exposed to market risk for changes in interest rates related to our credit facilities. Our earnings are affected by changes in short-term interest rates as a result of our credit facilities, which bear interest at variable rates based on Eurodollar rates (effective rate of 5.24% at December 31, 2007). The five-year \$125 million Revolving Credit Facility has a maturity date of August 12, 2010. At December 31, 2007, our debt balance related to the Revolving Credit Facility was \$69.0 million. The five-year \$200 million Term Loan Facility has a maturity date of September 6, 2011. At December 31, 2007, our debt balance related to the Term Loan Facility was \$190.1 million. In September 2007, we entered into a two-year interest rate swap with a notional amount of \$150 million and a fixed rate of 4.655% in order to limit a portion of our interest rate exposure by converting a portion of our variable-rate debt to fixed-rate debt.

We are also subject to interest rate risk on our swap if interest rates decrease. To manage this risk, we may refinance all or a portion of this swap at then-existing market interest rates.

Assuming the actual level of borrowing throughout 2007, and assuming a one percentage point change in the year's average interest rates, it is estimated that our 2007 net income would have changed by approximately \$1.1 million. Due to our interest rate swap, overall debt level at December 31, 2007, anticipated cash flows from operations, and the various financial alternatives available to management should there be an adverse change in interest rates, we do not believe that we currently have significant exposure to market risks associated with changing interest rates.

Table of Contents

Our earnings are also affected by fluctuations in foreign exchange rates as a result of our operations in foreign countries, a portion of which are conducted in foreign currencies. We monitor these risks throughout the normal course of business. Due to the current level of operations conducted in foreign currencies, we do not believe that the impact of fluctuations in foreign exchange rates is significant to our overall earnings.

We do not enter into derivative instruments for any purpose other than cash flow hedging. We do not speculate using derivative instruments.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The Financial Statements required to be presented under Item 8 are presented in the Consolidated Financial Statements and the notes thereto beginning at page F-1 of this Form 10-K (Financial Statements).

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the 1934 Act). It should be noted that, because of inherent limitations, our disclosure controls and procedures, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the disclosure controls and procedures are met. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the design and operation of these disclosure controls and procedures were effective, at the reasonable assurance level, to ensure information required to be disclosed by us in the reports that we file or submit under the 1934 Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms.

As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of our internal control over financial reporting to determine whether any changes occurred during the fourth quarter of 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Based on that evaluation, there were no changes in our internal control over financial reporting or in other factors that have materially affected or are reasonably likely to materially affect our internal control over financial reporting. We may make changes in our internal control processes from time to time in the future. It should also be noted that, because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements, and controls may become inadequate because of changes in conditions or in the degree of compliance with the policies or procedures.

Management's Report on Internal Control Over Financial Reporting and the Report of Independent Registered Public Accounting Firm thereon are set forth in the Consolidated Financial Statements beginning on page F-1.

ITEM 9B. OTHER INFORMATION

None.

Table of Contents

PART III

Some of the information required by Items 10 through 14 of this Part III is incorporated by reference from our definitive proxy statement to be filed for our 2008 annual meeting of stockholders (2008 Proxy Statement), as indicated below. Our 2008 Proxy Statement will be filed with the SEC not later than 120 days after December 31, 2007. Because the 2008 Proxy Statement has not yet been finalized and filed, there may be certain minor discrepancies between the currently anticipated section headings specified below and the final section headings contained in the 2008 Proxy Statement.

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Directors and Executive Officers

The information required by this item regarding our directors and executive officers will be set forth in our 2008 Proxy Statement under the caption *Directors and Executive Officers*, which information is incorporated herein by reference.

Section 16(a) Compliance

The information to appear in our 2008 Proxy Statement under the caption *General Information - Section 16(a) Beneficial Ownership Reporting Compliance* is incorporated herein by reference.

Code of Ethics and Other Governance Information

The information required by this item regarding the Supplemental Code of Ethics for our Senior Financial Officers (Code of Ethics), audit committee financial experts, audit committee members and procedures for stockholder recommendations of nominees to our Board of Directors will be set forth in our 2008 Proxy Statement under the caption *Corporate Governance*, which information is incorporated herein by reference.

Our Code of Ethics may be found on our website at www.harte-hanks.com by clicking on the link *About Us* and then the link *Corporate Governance*, and a copy of our Code of Ethics is also available in print, without charge, upon written request to Harte-Hanks, Inc., Attn: Corporate Secretary, 200 Concord Plaza Drive, San Antonio, Texas 78216. In accordance with the rules of the NYSE and the SEC, we currently intend to disclose any future amendments to our Code of Ethics, or waivers from our Code of Ethics for our Chief Executive Officer, Chief Financial Officer and Controller, by posting such information on our website (www.harte-hanks.com) within the time period required by applicable SEC and NYSE rules.

Management Certifications

In accordance with the Sarbanes-Oxley Act of 2002 and SEC rules thereunder, our Chief Executive Officer and Chief Financial Officer have signed certifications under Sarbanes-Oxley Section 302, which have been filed as exhibits to this Form 10-K. In addition, our Chief Executive Officer submitted his most recent annual certification to the NYSE under Section 303A.12(a) of the NYSE listing standards on May 21, 2007.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item regarding the compensation of our named executive officers and directors and other required information will be set forth in our 2008 Proxy Statement under the captions *Executive Compensation*, and *Director Compensation*, which information is incorporated herein by reference. In accordance with the rules of the SEC, information to be contained in the 2008 Proxy Statement under the caption *Compensation Committee Report* is not deemed to be filed with the SEC or subject to the liabilities of the 1934 Act.

Table of Contents

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Beneficial Ownership Tables

The information required by this item regarding security ownership of certain beneficial owners, management and directors will be set forth in our 2008 Proxy Statement under the caption Security Ownership of Management and Principal Stockholders, which information is incorporated herein by reference.

Equity Compensation Plan Information

The information required by this item regarding securities authorized for issuance under equity compensation plans will be set forth in our 2008 Proxy Statement under the caption Executive Compensation Equity Compensation Plan Information at Year-End 2007, which information is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Transactions with Related Persons

The information required by this item regarding transactions with related persons, including our policies and procedures for the review, approval or ratification of related person transactions that are required to be disclosed under the SEC's rules and regulations, will be set forth in our 2008 Proxy Statement under the caption Corporate Governance Certain Relationships and Related Transactions, which information is incorporated herein by reference.

Director Independence

The information required by this item regarding director independence will be set forth in our 2008 Proxy Statement under the caption Corporate Governance Independence of Directors, which information is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this item regarding the audit committee's pre-approval policies and procedures and the disclosures of fees billed by our principal independent auditor will be set forth in our 2008 Proxy Statement under the caption Audit Committee and Independent Registered Public Accounting Firm, which information is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

15(a)(1) Financial Statements:

The financial statements filed as part of this report and referenced in Item 8 are presented in the Consolidated Financial Statements and the notes thereto beginning at page F-1 of this Form 10-K (Financial Statements).

15(a)(2) Financial Statement Schedules

All schedules for which provision is made in the applicable rules and regulations of the SEC have been omitted as the schedules are not required under the related instructions, are not applicable, or the information required thereby is set forth in the Consolidated Financial Statements or notes thereto.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Harte-Hanks, Inc.:

We have audited the accompanying consolidated balance sheets of Harte-Hanks, Inc. and subsidiaries (the Company) as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2007. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Harte-Hanks, Inc. and subsidiaries as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles.

As discussed in Note A to the consolidated financial statements, the Company adopted the provisions of Statement of Financial Accounting Standards No. 123, as revised, *Share-Based Payment*, effective January 1, 2006, and Statement of Financial Accounting Standards No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, as of December 31, 2006.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 29, 2008, expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

We are responsible for the preparation and integrity of the consolidated financial statements appearing in our Annual Report. The consolidated financial statements were prepared in conformity with U.S. generally accepted accounting principles and include amounts based on management's estimates and judgments. All other financial information in this report has been presented on a basis consistent with the information included in the consolidated financial statements.

We are also responsible for establishing and maintaining adequate internal controls over financial reporting. We maintain a system of internal controls that is designed to provide reasonable assurance as to the fair and reliable preparation and presentation of the consolidated financial statements, as well as to safeguard assets from unauthorized use or disposition.

Our control environment is the foundation for our system of internal controls over financial reporting. It sets the tone of our organization and includes factors such as integrity and ethical values. Our internal controls over financial reporting are supported by formal policies and procedures that are reviewed, modified and improved as changes occur in business conditions and operations.

The Audit Committee of the Board of Directors, which is composed solely of outside directors, meets periodically with members of management, the internal auditors and the independent auditors to review and discuss internal controls over financial reporting and accounting and financial reporting matters. Our independent registered public accounting firm and internal auditors report to the Audit Committee and accordingly have full and free access to the Audit Committee at any time.

We conducted an evaluation of the effectiveness of our internal controls over financial reporting based on criteria established in *Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)*. This evaluation included review of the documentation of controls, evaluation of the design effectiveness of controls, testing of the operating effectiveness of controls and a conclusion on this evaluation. Based on our evaluation, we concluded that internal control over financial reporting was effective as of December 31, 2007.

KPMG LLP, an independent registered public accounting firm, has issued a report on the effectiveness of the Company's internal control over financial reporting, which is included on page F-4 of this Form 10-K.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Harte-Hanks, Inc.:

We have audited Harte-Hanks, Inc. and subsidiaries (the Company) internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Harte-Hanks, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Harte-Hanks, Inc. and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2007, and our report dated February 29, 2008 expressed an unqualified opinion on those consolidated financial statements.
