NOTES TO SCHEDULE OF INVESTMENTS

NOTE 1 -- SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principals generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates and those differences could be significant.

A. Security Valuation:

Equity securities are valued at the official closing price (typically last sale) on the exchange on which the securities are primarily traded, or if no closing price is available, at the last bid price.

Debt securities are valued on the basis of broker quotations or valuations provided by a pricing service, which utilizes information with respect to recent sales, market transactions in comparable securities, quotations from dealers, and various relationships between securities in determining value.

As required, some securities and other assets may be valued at fair value as determined in good faith by or under the direction of the Directors.

Certain foreign common stocks may be fair valued in cases where closing prices are not readily available or are deemed not reflective of readily available market prices. For example, significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time that the Fund calculates its net asset value (generally, the close of the NYSE) that may impact the value of securities traded in these foreign markets. In these cases, information from an external vendor may be utilized to adjust closing market prices of certain foreign common stocks to reflect their fair value. Because the frequency of significant events is not predictable, fair valuation of certain foreign common stocks may occur on a frequent basis.

Short-term investments having a remaining maturity of 60 days or less are valued at amortized cost, which approximates market.

Investments in underlying money market mutual funds are valued at each fund's closing net asset value.

The Fund has adopted the provisions of the Statement of Financial Accounting Standards No. 157 (SFAS 157). This standard clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosures about the use of fair value measurements. To increase consistency and comparability in fair value measurements and related disclosures, the Fund utilizes a fair value hierarchy which prioritizes

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

the inputs to valuation techniques used to measure fair value into three broad levels:

- . Level 1 -- quoted prices in active markets for identical securities

5

- . Level 2 -- prices determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- . Level 3 -- prices determined using significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The following is a summary of the inputs used to value the Fund's net assets as of March 31, 2009. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

NOTE 2 -- RECENTLY ISSUED ACCOUNTING STANDARDS

In April 2009, FASB issued FASB Staff Position No. 157-4, Determining Fair Value when the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly, ("FSP 157-4"). FSP 157-4 is effective for fiscal years and interim periods ending after June 15, 2009. FSP 157-4 provides additional guidance for estimating fair value in accordance with SFAS 157 (See Note 1 A), when the volume and level of activity for the asset or liability have significantly decreased. FSP 157-4 also includes guidance on identifying circumstances that indicate a transaction is not orderly. FSP 157-4 requires entities to describe the inputs used in valuation techniques used to measure fair value and changes in inputs over the period. FSP 157-4 expands the three-level hierarchy disclosure and the level three-roll forward disclosure for each major security type as described in paragraph 19 of FAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. Management is currently evaluating

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-Q

the impact the implementation of FSP 157-4 will have on the Funds' financial statement disclosures.

In March 2008, Statement of Financial Accounting Standards No. 161, "Disclosures about Derivative Instruments and Hedging Activities" (FAS 161) was issued and is effective for fiscal years and interim periods beginning after November 15, 2008. FAS 161 is intended to improve financial reporting for derivative instruments by requiring enhanced disclosure that enables investors to understand how and why a fund uses derivatives, how derivatives are accounted for, and how derivative instruments affect a fund's results of operations and financial position. Management is currently evaluating the impact, if any, of FAS 161 on financial statement disclosures.
