Prospectus Supplement

(To prospectus dated January 9, 2012)

\$300,000,000

Lincoln National Corporation

4.20% Senior Notes due 2022

We are offering \$300,000,000 aggregate principal amount of our 4.20% Senior Notes due 2022 (the "notes").

Interest on the notes will accrue from March 29, 2012. The notes will bear interest at a rate of 4.20% per year and will mature on March 15, 2022.

We will pay interest on the notes on each March 15 and September 15, commencing on September 15, 2012.

The notes will be issued in denominations of \$2,000 and integral multiples of \$1,000 in excess thereof, will be our unsecured obligations and will rank equally in right of payment with all existing and future unsecured unsubordinated indebtedness.

We may redeem the notes in whole or in part prior to their maturity at any time at the redemption price described in "Description of Notes - Optional Redemption."

The notes are not savings accounts, deposits or other obligations of a bank or non-bank subsidiary of Lincoln National Corporation. They are not insured by the Federal Deposit Insurance Corporation or any other governmental agency.

The notes will not be subject to redemption at the option of the holder or to any sinking fund payments.

The notes will not be listed on any securities exchange. Currently, there is no public market for the notes.

Investing in the notes involves risks. See Risk Factors beginning on page S-4 of this prospectus supplement.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus supplement or the accompanying base prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Edgar Filing: LINCOLN NATIONAL CORP - Form 424B5

	Price to	Underwriting	Proceeds to
	public(1)	discounts and	us, before
		commissions	expenses
Per Note	100.000%	0.650%	99.350%
Total	\$300,000,000	\$1,950,000	\$298,050,000

(1) Plus accrued interest, if any, from the date of original issuance.

The underwriters expect to deliver the notes in book-entry form only, through the facilities of The Depository Trust Company, Clearstream, Luxembourg or Euroclear, as the case may be, on or about March 29, 2012 against payment therefor in immediately available funds.

No dealer, salesperson or other person is authorized to give any information or to represent anything not contained in this prospectus supplement and the accompanying base prospectus. You must not rely on any unauthorized information or representations. This prospectus supplement and the accompanying base prospectus are an offer to sell only the notes offered hereby, but only under circumstances and in jurisdictions where it is lawful to do so. The information contained in this prospectus supplement, the accompanying base prospectus and the documents incorporated by reference is accurate only as of their respective dates.

ABOUT THIS PROSPECTUS SUPPLEMENT

You should rely only on the information contained, or incorporated by reference, in this prospectus supplement and the accompanying base prospectus. We have not, and the underwriters have not, authorized anyone to provide you with information that is different. If anyone provides you with different or inconsistent information, you should not rely on it. We are not, and the underwriters are not, making an offer to sell the notes in any jurisdiction where the offer or sale is not permitted or in which the person making such offer or solicitation is not qualified to do so or to any person to whom it is unlawful to make such offer or solicitation. You should not assume that the information in this prospectus supplement, the accompanying base prospectus or any document incorporated by reference is accurate or complete as of any date other than the date of the applicable document. Our business, financial condition, results of operations and prospects may have changed since that date.

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of this offering and also adds to and updates information contained in the accompanying base prospectus and the documents incorporated by reference into this prospectus supplement and the accompanying base prospectus. The second part, the accompanying base prospectus, gives more general information, some of which may not apply to this offering. If the description of the offering varies between this prospectus supplement and the accompanying base prospectus, you should rely on the information contained in this prospectus supplement.

Unless otherwise indicated, or the context otherwise requires, references in this prospectus supplement and the accompanying base prospectus to LNC, we, us, and our or similar terms are to Lincoln National Corporation and not to its subsidiaries.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Except for historical information contained or incorporated by reference in this prospectus supplement and the accompanying base prospectus, statements made, or incorporated by reference, in this prospectus supplement and the accompanying base prospectus are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (PSLRA). A forward-looking statement is a statement that is not a historical fact and, without limitation, includes any statement that may predict, forecast, indicate or imply future results, performance or achievements, and may contain words like: believe, anticipate, expect, estimate, project, will, shall and other words or phrases with similar meaning in connection with a discussion of future operating or financial performance. In particular, these include statements relating to future actions, trends in our business, prospective services or products, future performance or financial results and the outcome of contingencies, such as legal proceedings. We claim the protection afforded by the safe harbor for forward-looking statements provided by the PSLRA.

Forward-looking statements involve risks and uncertainties that may cause actual results to differ materially from the results contained in the forward-looking statements. Risks and uncertainties that may cause actual results to vary materially, some of which are described within the forward-looking statements, include, among others:

Deterioration in general economic and business conditions that may affect account values, investment results, guaranteed benefit liabilities, premium levels, claims experience and the level of pension benefit costs, funding and investment results;

Adverse global capital and credit market conditions could affect our ability to raise capital, if necessary, and may cause us to realize impairments on investments and certain intangible assets, including goodwill and a valuation allowance against deferred tax assets, which may reduce future earnings and/or affect our financial condition and ability to raise additional capital or refinance existing debt as it matures;

Table of Contents

Because of our holding company structure, the inability of our subsidiaries to pay dividends to the holding company in sufficient amounts could harm the holding company's ability to meet its obligations;

Legislative, regulatory or tax changes, both domestic and foreign, that affect the cost of, or demand for, our subsidiaries' products, the required amount of reserves and/or surplus, or otherwise affect our ability to conduct business, including changes to statutory reserve requirements related to secondary guarantees under universal life such as a change to reserve calculations under Actuarial Guideline 38 (also known as The Application of the Valuation of Life Insurance Policies Model Regulation, or AG38) and variable annuity products such as Actuarial Guideline 43 (also known as Commissioners Annuity Reserve Valuation Method for Variable Annuities, or AG43); restrictions on revenue sharing and 12b-1 payments; and the potential for U.S. Federal tax reform;

Uncertainty about the effect of rules and regulations to be promulgated under the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) on us and the economy and the financial services sector in particular;

The initiation of legal or regulatory proceedings against us, and the outcome of any legal or regulatory proceedings, such as: adverse actions related to present or past business practices common in businesses in which we compete; adverse decisions in significant actions including, but not limited to, actions brought by federal and state authorities and class action cases; new decisions that result in changes in law; and unexpected trial court rulings;

Changes in or sustained low interest rates causing a reduction in investment income, the interest margins of our businesses, estimated gross profits and demand for our products;

A decline in the equity markets causing a reduction in the sales of our subsidiaries' products, a reduction of asset-based fees that our subsidiaries charge on various investment and insurance products, an acceleration of amortization of deferred acquisition costs (DAC), value of business acquired (VOBA), deferred sales inducements (DSI) and deferred front end sales loads (DFEL), and an increase in liabilities related to guaranteed benefit features of our subsidiaries' variable annuity products;

Ineffectiveness of our risk management policies and procedures, including various hedging strategies used to offset the effect of changes in the value of liabilities due to changes in the level and volatility of the equity markets and interest rates;

A deviation in actual experience regarding future persistency, mortality, morbidity, interest rates or equity market returns from the assumptions used in pricing our subsidiaries' products, in establishing related insurance reserves and in the amortization of DAC, VOBA, DSI and DFEL, which may reduce future earnings;

Changes in accounting principles generally accepted in the United States, or GAAP, including moving to International Financial Reporting Standards, that may result in unanticipated changes to our net income;

Lowering of one or more of our debt ratings issued by nationally recognized statistical rating organizations and the adverse effect such action may have on our ability to raise capital and on our liquidity and financial condition;

Lowering of one or more of the insurer financial strength ratings of our insurance subsidiaries and the adverse effect such action may have on the premium writings, policy retention, profitability of our insurance subsidiaries and liquidity;

Edgar Filing: LINCOLN NATIONAL CORP - Form 424B5

Significant credit, accounting, fraud, corporate governance or other issues that may adversely affect the value of certain investments in our portfolios as well as counterparties to which we are exposed to credit risk requiring that we realize losses on investments;

The effect of acquisitions and divestitures, restructurings, product withdrawals and other unusual items, including our ability to integrate acquisitions and to obtain the anticipated results and synergies from acquisitions;

S-iii

Table of Contents

The adequacy and collectibility of reinsurance that we have purchased;

Acts of terrorism, a pandemic, war or other man-made and natural catastrophes that may adversely affect our businesses and the cost and availability of reinsurance;

Competitive conditions, including pricing pressures, new product offerings and the emergence of new competitors, that may affect the level of premiums and fees that our subsidiaries can charge for their products;

The unknown effect on our subsidiaries' businesses resulting from changes in the demographics of their client base, as aging baby-boomers move from the asset-accumulation stage to the asset-distribution stage of life; and

Loss of key management, financial planners or wholesalers.

The risks included here are not exhaustive. Other sections of this prospectus supplement, including Risk Factors beginning on page S-4, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and other documents filed with the Securities and Exchange Commission (the SEC) include additional factors that could impact our business and financial performance. Moreover, we operate in a rapidly changing and competitive environment. New risk factors emerge from time to time, and it is not possible for management to predict all such risk factors.

Further, it is not possible to assess the impact of all risk factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results. In addition, we disclaim any obligation to update any forward-looking statements to reflect events or circumstances that occur after the date of this prospectus supplement.

Table of Contents

SUMMARY

This summary highlights information contained elsewhere in this prospectus supplement, the accompanying base prospectus and the documents incorporated by reference. This summary sets forth the material terms of this offering, but does not contain all of the information you should consider before investing in our notes. You should read carefully this entire prospectus supplement and the accompanying base prospectus, including the documents incorporated by reference in this prospectus supplement and the accompanying base prospectus, before making an investment decision to purchase our notes, especially the risks of investing in our notes discussed in the section entitled "Risk Factors" in this prospectus supplement as well as the consolidated financial statements and notes to those consolidated financial statements incorporated by reference in this prospectus supplement and the accompanying base prospectus.

LNC

For the latest financial statements of LNC, a detailed description of LNC's business, management's discussion and analysis of LNC's financial condition and results of operations, and other important information concerning LNC, please refer to our Annual Report on Form 10-K for the year ended December 31, 2011 and other documents filed with the SEC, which are incorporated by reference into this prospectus supplement and the accompanying base prospectus. For more information, see "Documents Incorporated by Reference" in the accompanying base prospectus.

LNC is a holding company, which operates multiple insurance and retirement businesses through subsidiary companies. Through our business segments, we sell a wide range of wealth protection, accumulation and retirement income products and solutions. These products include fixed and indexed annuities, variable annuities, universal life insurance (UL), variable universal life insurance (VUL), linked-benefit UL, term life insurance, mutual funds and group life, disability and dental. LNC was organized under the laws of the state of Indiana in 1968. We currently maintain our principal executive offices at 150 N. Radnor Chester Road, Radnor, Pennsylvania 19087, and our telephone number is (484) 583-1400. Lincoln Financial Group is the marketing name for LNC and its subsidiary companies. As of December 31, 2011, LNC had consolidated assets of \$202.9 billion and consolidated stockholders' equity of \$14.2 billion. For the year ended December 31, 2011, LNC had total revenue of \$10.6 billion and net income of \$294 million.

We provide products and services and report results through the following four business segments: Annuities, Retirement Plan Services, Life Insurance and Group Protection.

We also have Other Operations, which includes the financial data for operations that are not directly related to the business segments. Other Operations also includes investments related to the excess capital in our insurance subsidiaries; investments in media properties and other corporate investments; benefit plan net liability; the unamortized deferred gain on indemnity reinsurance related to the sale of reinsurance to Swiss Re Life & Health America Inc., referred to as Swiss Re, in 2001; the results of certain disability income business; our run-off institutional pension business; and debt costs.

Our former subsidiaries, Delaware Management Holdings, Inc. and Lincoln UK are reported in discontinued operations for all periods presented. See Part II Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Introduction Acquisitions and Dispositions and Part II Item 8. Financial Statements and Supplementary Data Note 3 in our Annual Report on Form 10-K for the year ended December 31, 2011.

Table of Contents

SUMMARY OF THE OFFERING

Issuer	Lincoln National Corporation.
Securities Offered	\$300,000,000 aggregate principal amount of 4.20% Senior Notes due 2022 (the notes).
Denominations	The notes will be issued in denominations of \$2,000 principal amount and integral multiples of \$1,000 in excess thereof.
Maturity Date	The notes will mature on March 15, 2022.
Interest	<p>Interest on the notes will accrue from the issue date until maturity at 4.20% per year.</p> <p>We will pay interest on the notes on each March 15 and September 15, commencing on September 15, 2012. Interest will be calculated using a 360-day year comprised of twelve 30-day months.</p>
Further Issuances	The notes will initially be limited to \$300,000,000 in aggregate principal amount. We may, however, without the consent of any then-existing holders of the notes, reopen the notes and issue an unlimited principal amount of additional notes in the future. These additional notes will be deemed part of the same series as the notes offered hereby.
Use of Proceeds	We estimate that, after deducting underwriting discounts and commissions and estimated expenses payable by us, our net proceeds from this offering will be approximately \$297 million. We intend to use the net proceeds from this offering to repay the \$300 million aggregate principal amount of our 5.65% senior notes maturing on August 27, 2012.
Risk Factors	See Risk Factors beginning on page S-4 of this prospectus supplement and other information included or incorporated by reference in this prospectus supplement and the accompanying base prospectus for a discussion of factors you should consider carefully before investing in the notes.
Indenture	We will issue the notes under an indenture between us and The Bank of New York Mellon, as indenture trustee.
Ranking	The notes will be our senior unsecured debt obligations and will rank equally among themselves and with all of our other present and future unsecured unsubordinated indebtedness.

As of December 31, 2011, our consolidated indebtedness aggregated approximately \$5.7 billion. See Capitalization for the pro forma effect of this offering on our capitalization.

Table of Contents

The indenture places no limitation on the amount of additional senior indebtedness that may be incurred by us, which will rank equally to the notes. We expect from time to time to incur additional indebtedness constituting senior indebtedness. In addition, the indenture does not limit our ability to grant security interests over our assets.

Optional Redemption

We may redeem the notes in whole or in part prior to maturity at any time at the redemption price described in Description of Notes Optional Redemption.

Form

The notes will be represented by one or more global securities registered in the name of Cede & Co., as nominee for The Depository Trust Company, referred to as DTC. Beneficial interests in the notes will be evidenced by, and transfers thereof will be effected only through, records maintained by participants in DTC.

Trustee and Principal Paying Agent

The Bank of New York Mellon.

Delivery and Clearance

We will deposit the global security representing the notes with DTC in New York. You may hold an interest in the notes through DTC, Clearstream, Luxembourg or Euroclear Bank, as operator of the Euroclear System, directly as a participant of any such system or indirectly through organizations that are participants in such systems.

Governing Law

New York.

Table of Contents

RISK FACTORS

Your investment in the notes involves risks. You should carefully consider the risks described below as well as other information contained or incorporated by reference in this prospectus supplement and the accompanying base prospectus, including our financial statements and the notes thereto, before making an investment decision. The risks and uncertainties described below and incorporated by reference into this prospectus supplement and the accompanying base prospectus are not the only ones facing our company. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business operations. If any of these risks actually occur, our business, financial condition and results of operations could be materially affected. In that case, the value of the notes could decline substantially.

Risk Factors Relating to the Ownership of the Notes

We operate through our subsidiaries and, as a result, the notes will effectively be subordinated to the liabilities of our subsidiaries.

We are a holding company operating primarily through our insurance subsidiaries, and our primary assets are our equity interests in those subsidiaries. As a result, our right to receive assets upon the liquidation or recapitalization of any of our subsidiaries and your consequent right to participate in those assets, is subject to the claims of such subsidiary's creditors. Accordingly, our obligations, including the notes, are effectively subordinated to all existing and future indebtedness and other liabilities, including insurance policy-related liabilities, of our subsidiaries, other than any such obligations guaranteed on a senior basis by our subsidiaries. As of December 31, 2011, our subsidiaries had approximately \$89 billion of outstanding liabilities that effectively rank and would effectively rank senior to our current and future senior debt securities. Our subsidiaries may incur further indebtedness in the future. The notes are exclusively obligations of LNC. Our subsidiaries are not guarantors of the notes and have no obligation to pay any amounts due on the notes. Our subsidiaries are not required to provide us with funds for our payment obligations, whether by dividends, distributions, loans or other payments. In addition, any payment of dividends, distributions, loans or advances by our subsidiaries to us could be subject to statutory or contractual restrictions. Payments to us by our subsidiaries will also be contingent upon our subsidiaries' earnings and business considerations. The notes are unsecured.

We and our subsidiaries may incur additional indebtedness that may adversely affect our ability to meet our financial obligations under the notes.

The terms of the indenture and the notes do not limit the incurrence by us or our subsidiaries of indebtedness. We and our subsidiaries may incur additional indebtedness in the future, which could have important consequences to holders of the notes. For example, we may have insufficient cash to meet our financial obligations, including our obligations under the notes. Furthermore, our ability to obtain additional financing for the repayment of the notes, working capital, capital expenditures or general corporate purposes could be impaired. Additional debt could make us more vulnerable to changes in general economic conditions and also could affect the financial strength ratings of our insurance subsidiaries and the ratings of our notes.

We may be unable to repay the notes if our subsidiaries are unable to pay dividends or make advances to us.

At maturity, the entire outstanding principal amount of the notes will become due and payable by us. We may not have sufficient funds to pay the principal amount due. If we do not have sufficient funds on hand or available through existing borrowing facilities or through the declaration and payment of dividends by our subsidiaries, we will need to seek additional financing. Additional financing may not be available to us in the amounts necessary. We, as a holding company, are dependent upon dividends from our subsidiaries to enable us to service our outstanding debt, including the notes. For more information, see [Liquidity and Capital Position](#). Because we are a holding company with no direct operations, the inability of our subsidiaries to pay dividends to us in sufficient amounts would harm our ability to meet our obligations [below](#).

Table of Contents

An active trading market for the notes may not develop.

The notes are a new issue of securities for which there is currently no public market. Any trading of the notes may be at a discount from their initial offering price, depending on prevailing interest rates, the market for similar securities, our performance and other factors. In addition, we do not know whether an active trading market will develop for the notes. To the extent that an active trading market does not develop, the liquidity and trading prices for the notes may be harmed.

We do not intend to apply for the notes to be listed on any securities exchange or to arrange for the notes to be quoted on any quotation system. The underwriters have advised us that they currently intend to make a market in the notes. However, they are not obligated to do so, and may discontinue any market making with respect to the notes at any time, for any reason or for no reason, without notice. If the underwriters cease to act as a market maker for the notes, we cannot assure you another firm or person will make a market in the notes.

The liquidity of any market for the notes will depend upon the number of holders of the notes, our results of operations and financial condition, the market for similar securities, the interest of securities dealers in making a market in the notes and other factors. An active or liquid trading market for the notes may not develop. We cannot assure you that you will be able to sell your notes at favorable prices or at all.

A downgrade, suspension or withdrawal of the rating assigned by a rating agency to the notes, if any, could cause the liquidity or market value of the notes to decline significantly.

Our credit ratings are an assessment by rating agencies of our ability to pay our debts when due. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of the notes. These credit ratings may not reflect the potential impact of risks relating to the structure or marketing of the notes. Credit ratings are not a recommendation to buy, sell or hold any security, and may be revised or withdrawn at any time by the issuing organization in its sole discretion. Neither we nor any underwriter undertakes any obligation to maintain the ratings or to advise holders of notes of any changes in ratings. Each agency's rating should be evaluated independently of any other agency's rating.

In addition, credit rating agencies continually review their ratings for the companies that they follow, including us. The credit rating agencies also evaluate the insurance industry as a whole and may change their credit rating for us based on their overall view of our industry. A negative change in our rating could have an adverse effect on the price of the notes.

The notes will be rated by Standard & Poor's Ratings Services (S&P), Moody's Investors Service, Inc. (Moody's) and/or Fitch Ratings (Fitch). There can be no assurance that these ratings will remain for any given period of time or that these ratings will not be lowered or withdrawn entirely by a rating agency if in that rating agency's judgment future circumstances relating to the basis of the rating, such as adverse changes in our company, so warrant. For more information, see Liquidity and Capital Position. A decrease in the capital and surplus of our insurance subsidiaries may result in a downgrade to our credit and insurer financial strength ratings below.

We have made only limited covenants in the indenture, which may not protect your investment if we experience significant adverse changes in our financial condition or results of operations.

The indenture governing the notes does not:

require us to maintain any financial ratios or specified levels of net worth, revenues, income, cash flow or liquidity, and therefore, does not protect holders of the notes in the event that we experience significant adverse changes in our financial condition, results of operations or liquidity;

limit our ability or the ability of any of our subsidiaries to incur additional indebtedness, including indebtedness that is equal in right of payment to the notes or, subject to certain exceptions, indebtedness that is secured by liens on capital stock of our subsidiaries; or

Table of Contents

limit the aggregate principal amount of senior debt securities that may be issued. Our ability to incur additional debt and take a number of other actions that are not limited by the terms of the notes could negatively affect the value of the notes.

Legislative, Regulatory and Tax

Our businesses are heavily regulated and changes in regulation may affect our insurance subsidiary capital requirements or reduce our profitability.

Our insurance subsidiaries are subject to extensive supervision and regulation in the states in which we do business. The supervision and regulation relate to numerous aspects of our business and financial condition. The primary purpose of the supervision and regulation is the protection of our insurance contract holders, and not our investors. The extent of regulation varies, but generally is governed by state statutes. These statutes delegate regulatory, supervisory and administrative authority to state insurance departments. This system of supervision and regulation covers, among other things:

Standards of minimum capital requirements and solvency, including RBC measurements;

Restrictions of certain transactions between our insurance subsidiaries and their affiliates;

Restrictions on the nature, quality and concentration of investments;

Restrictions on the types of terms and conditions that we can include in the insurance policies offered by our primary insurance operations;

Limitations on the amount of dividends that insurance subsidiaries can pay;

Licensing status of the company;

Certain required methods of accounting;

Reserves for unearned premiums, losses and other purposes; and

Assignment of residual market business and potential assessments for the provision of funds necessary for the settlement of covered claims under certain policies provided by impaired, insolvent or failed insurance companies.

Although we endeavor to maintain all required licenses and approvals our businesses may not fully comply with the wide variety of applicable laws and regulations or the relevant authority's interpretation of the laws and regulations, which may change from time to time. Also, regulatory authorities have relatively broad discretion to grant, renew or revoke licenses and approvals. If we do not have the requisite licenses and approvals or do not comply with applicable regulatory requirements, the insurance regulatory authorities could preclude or temporarily suspend us from carrying on some or all of our activities or impose substantial fines. Further, insurance regulatory authorities have relatively broad discretion to issue orders of supervision, which permit such authorities to supervise the business and operations of an insurance company. As of December 31, 2011, no state insurance regulatory authority had imposed on us any substantial fines or revoked or suspended any of our licenses to conduct insurance business in any state or issued an order of supervision with respect to our insurance subsidiaries, which would have a material adverse effect on our results of operations or financial condition.

Edgar Filing: LINCOLN NATIONAL CORP - Form 424B5

In addition, Lincoln Financial Advisors, Lincoln Financial Securities and Lincoln Financial Distributors, as well as our variable annuities and variable life insurance products, are subject to regulation and supervision by the SEC and the Financial Institutions Industry Regulatory Authority (FINRA). These laws and regulations generally grant supervisory agencies and self-regulatory organizations broad administrative powers, including the power to limit or restrict the subsidiaries from carrying on their businesses in the event that they fail to comply with such laws and regulations.

S-6

Table of Contents

Recently, there has been an increase in potential federal initiatives that would affect the financial services industry. On July 21, 2010, President Obama signed into law the Dodd-Frank Act, a wide-ranging Act that includes a number of reforms of the financial services industry and financial products. The Dodd-Frank Act includes, among other things, changes to the rules governing derivatives; restrictions on proprietary trading by certain entities; the imposition of capital and leverage requirements on bank and savings and loan holding companies; a study by the SEC of the rules governing broker-dealers and investment advisers with respect to individual investors and investment advice, followed potentially by rulemaking; the creation of a new Federal Insurance Office within the U.S. Treasury to gather information regarding the insurance industry; the creation of a resolution authority to unwind failing institutions, funded on a post-event basis; the creation of a new Consumer Financial Protection Bureau to protect consumers of certain financial products; and changes to executive compensation and certain corporate governance rules, among other things. The Dodd-Frank Act requires significant rulemaking across numerous agencies within the federal government. Although the rulemaking process began in the second half of 2010, it is proceeding substantially slower than the aggressive schedule contemplated at the time of enactment. Consequently, the ultimate impact of these provisions on our businesses (including product offerings), results of operations, liquidity or capital resources is currently indeterminable.

Many of the foregoing regulatory or governmental bodies have the authority to review our products and business practices and those of our agents and employees. In recent years, there has been increased scrutiny of our businesses by these bodies, which has included more extensive examinations, regular sweep inquiries and more detailed review of disclosure documents. These regulatory or governmental bodies may bring regulatory or other legal actions against us if, in their view, our practices, or those of our agents or employees, are improper. These actions can result in substantial fines, penalties or prohibitions or restrictions on our business activities and could have a material adverse effect on our business, results of operations or financial condition.

Changes to the calculation of reserves and attempts to mitigate the impact of Regulation XXX and Actuarial Guideline 38 may fail in whole or in part resulting in an adverse effect on our financial condition and results of operations.

The Valuation of Life Insurance Policies Model Regulation (XXX) requires insurers to establish additional statutory reserves for term life insurance policies with long-term premium guarantees and UL policies with secondary guarantees. In addition, Actuarial Guideline 38 (AG38), commonly known as AXXX, clarifies the application of XXX with respect to certain UL insurance policies with secondary guarantees. Virtually all of our newly issued term and the majority of our newly issued UL insurance products are now affected by XXX and AG38. The application of both AG38 and XXX involve numerous interpretations. In the fourth quarter of 2011, the Life Actuarial Task Force, an advisory group to the Life Insurance and Annuities (A) Committee of the NAIC, submitted a draft statement on the application of AG38 (the Statement) to the Committee. The NAIC's Executive Committee set up a joint working group (the Joint Working Group) comprised of members of the Life Insurance and Annuities (A) Committee and the Financial Condition (E) Committee to review the Statement and the current application of AG38 to determine whether new interim guidelines should be developed for the products within the scope of AG38. The Joint Working Group has developed a draft framework that proposes to evaluate in-force reserves based on an asset adequacy analysis incorporating moderately adverse scenarios. New business written after a certain date, yet to be specified, would be reserved using a formulaic approach consistent with the Statement, as modified or clarified by the NAIC. Any interim guidelines would be in place only until principles-based reserving is implemented. Because the draft framework contains many open issues, we cannot predict its impact on our statutory reserves. However, a change to the method for calculating reserves may require us to significantly increase our statutory reserves for UL policies with secondary guarantees. Further, changes in the method of calculating reserves may also impact the future profitability and sales of our UL insurance policies with secondary guarantees.

We have implemented reinsurance and capital management actions to mitigate the capital impact of XXX and AG38, including the use of letters of credit to support the reinsurance provided by captive reinsurance

Table of Contents

subsidiaries. Although formal details have not been provided, we anticipate the rating agencies may require a portion of these letters of credit to be included in our leverage calculations, which would pressure our leverage ratios and potentially our ratings. Therefore, we cannot provide assurance that there will not be regulatory, rating agency or other challenges to the actions we have taken to date. The result of those potential challenges could require us to increase statutory reserves or incur higher operating and/or tax costs.

We also cannot provide assurance that we will be able to continue to implement actions to mitigate the impact of XXX or AG38 on future sales of term and UL insurance products. If we are unable to continue to implement those actions, we may have lower returns on such products sold than we currently anticipate and/or reduce our sales of these products.

Changes in U.S. federal income tax law could increase our tax costs and make the products that we sell less desirable.

Changes to the Internal Revenue Code, administrative rulings or court decisions could increase our effective tax rate, make our products less desirable and lower our net income. For example, on February 13, 2012, the Obama Administration released its fiscal year 2013 budget proposal including proposals which, if enacted, would affect the taxation of life insurance companies and certain life insurance products. If enacted into law, the statutory changes contemplated by the Administration's revenue proposals would, among other things, change the method used to determine the amount of dividend income received by a life insurance company on assets held in separate accounts used to support products, including variable life insurance and variable annuity contracts, that are eligible for the dividend received deduction. The dividend received deduction reduces the amount of dividend income subject to tax and is a significant component of the difference between our actual tax expense and expected amount determined using the federal statutory tax rate of 35%. Our income tax provision for the year ended December 31, 2011 included a separate account dividend received deduction benefit of \$112 million. In addition, the proposals would affect the treatment of COLI policies by limiting the availability of certain interest deductions for companies that purchase those policies. If proposals of this type were enacted, our sale of COLI, variable annuities and variable life products could be adversely affected and our actual tax expense could increase, reducing earnings.

Legal and regulatory actions are inherent in our businesses and could result in financial losses or harm our businesses.

We are, and in the future may be, subject to legal and regulatory actions in the ordinary course of our insurance and retirement operations. Pending legal actions include proceedings relating to aspects of our businesses and operations that are specific to us and proceedings that are typical of the businesses in which we operate. Some of these proceedings have been brought on behalf of various alleged classes of complainants. In certain of these matters, the plaintiffs are seeking large and/or indeterminate amounts, including punitive or exemplary damages. Substantial legal liability in these or future legal or regulatory actions could have a material financial effect or cause significant harm to our reputation, which in turn could materially harm our business prospects. See Note 13 of our Annual Report on Form 10-K for the year ended December 31, 2011 for a description of legal and regulatory proceedings and actions. These actions include ongoing audits on behalf of multiple states' treasury and controllers' offices for compliance with laws and regulations concerning the identification, reporting and escheatment of unclaimed contract benefits or abandoned funds.

Changes in accounting standards issued by the Financial Accounting Standards Board or other standard-setting bodies may adversely affect our financial statements.

Our financial statements are prepared in accordance with GAAP as identified in the Financial Accounting Standards Board (FASB) Accounting Standards Codificationstm (ASC). From time to time, we are required to adopt new or revised accounting standards or guidance that are incorporated into the FASB ASC. It is possible

Table of Contents

that future accounting standards we are required to adopt could change the current accounting treatment that we apply to our consolidated financial statements and that such changes could have a material adverse effect on our financial condition and results of operations.

For example, the FASB issued Accounting Standards Update (ASU) No. 2010-26, Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts (ASU 2010-26), which clarifies the types of costs that insurance companies may capitalize and amortize over the life of the business. ASU 2010-26 significantly reduces the amount of acquisition cost that we will be able to defer in connection with sales of our insurance products. Although this will not affect the ultimate profitability of our products, we expect it could materially alter the pattern of our earnings. For further information, see Part II Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies DAC, VOBA, DSI and DFEL New DAC Methodology in our Annual Report on Form 10-K for the year ended December 31, 2011.

In addition, the FASB is working on several projects with the International Accounting Standards Board, which could result in significant changes as GAAP and International Financial Reporting Standards (IFRS) attempt to converge, including how we account for our insurance contracts and financial instruments and how our financial statements are presented. Furthermore, the SEC is considering whether and how to incorporate IFRS into the U.S. financial reporting system. The accounting changes being proposed by the FASB may result in a complete change to how we account for and report significant areas of our business, such as insurance contracts and deferred acquisition costs (DAC). The effective dates and transition methods are not known; however, issuers may be required to or may choose to adopt the new standards retrospectively. In this case, the issuer will report results under the new accounting method as of the effective date, as well as for all periods presented. The changes to GAAP and potential incorporation of IFRS into the U.S. financial reporting system will impose special demands on issuers in the areas of governance, employee training, internal controls, contract fulfillment and disclosure and will likely affect how we manage our business, as it will likely affect other business processes such as design of compensation plans, product design, etc.

Anti-takeover provisions could delay, deter or prevent our change in control, even if the change in control would be beneficial to LNC shareholders.

We are an Indiana corporation subject to Indiana state law. Certain provisions of Indiana law could interfere with or restrict takeover bids or other change in control events affecting us. Also, provisions in our articles of incorporation, bylaws and other agreements to which we are a party could delay, deter or prevent our change in control, even if a change in control would be beneficial to shareholders. In addition, under Indiana law, directors may, in considering the best interests of a corporation, consider the effects of any action on shareholders, employees, suppliers and customers of the corporation and the communities in which offices and other facilities are located, and other factors the directors consider pertinent. One statutory provision prohibits, except under specified circumstances, LNC from engaging in any business combination with any shareholder who owns 10% or more of our common stock (which shareholder, under the statute, would be considered an interested shareholder) for a period of five years following the time that such shareholder became an interested shareholder, unless such business combination is approved by the board of directors prior to such person becoming an interested shareholder. In addition, our articles of incorporation contain a provision requiring holders of at least three-fourths of our voting shares then outstanding and entitled to vote at an election of directors, voting together, to approve a transaction with an interested shareholder rather than the simple majority required under Indiana law.

In addition to the anti-takeover provisions of Indiana law, there are other factors that may delay, deter or prevent our change in control. As an insurance holding company, we are regulated as an insurance holding company and are subject to the insurance holding company acts of the states in which our insurance company subsidiaries are domiciled. The insurance holding company acts and regulations restrict the ability of any person to obtain control of an insurance company without prior regulatory approval. Under those statutes and

Table of Contents

regulations, without such approval (or an exemption), no person may acquire any voting security of a domestic insurance company, or an insurance holding company which controls an insurance company, or merge with such a holding company, if as a result of such transaction such person would control the insurance holding company or insurance company. Control is generally defined as the direct or indirect power to direct or cause the direction of the management and policies of a person and is presumed to exist if a person directly or indirectly owns or controls 10% or more of the voting securities of another person.

Market Conditions

Difficult conditions in the global capital markets and the economy generally may materially adversely affect our business and results of operations.

Our results of operations are materially affected by conditions in the global capital markets and the economy generally, both in the U.S. and elsewhere around the world. Concerns over the viability of the European Union and its ability to resolve the European debt crisis, the ability of the U.S. government to reign in the U.S. deficit, continued high unemployment and a stagnant real estate market in the U.S. have contributed to increased volatility and diminished expectations for the economy and the markets going forward. These events may have an adverse effect on us given our credit and equity market exposure. Our revenues are likely to decline in such circumstances and our profit margins could erode. In addition, in the event of extreme prolonged market events, such as the global credit crisis and recession that occurred during 2008 and 2009, we could incur significant losses. Even in the absence of a market downturn, we are exposed to substantial risk of loss due to market volatility.

Factors such as consumer spending, business investment, domestic and foreign government spending, the volatility and strength of the capital markets, the potential for inflation or deflation and uncertainty over domestic and foreign government actions all affect the business and economic environment and, ultimately, the amount and profitability of our business. In an economic downturn characterized by higher unemployment, lower family income, lower corporate earnings, lower business investment and lower consumer spending, the demand for our financial and insurance products could be adversely affected. In addition, we may experience an elevated incidence of claims and lapses or surrenders of policies. Our contract holders may choose to defer paying insurance premiums or stop paying insurance premiums altogether. Adverse changes in the economy could affect earnings negatively and could have a material adverse effect on our business, results of operations and financial condition.

Changes in interest rates and sustained low interest rates may cause interest rate spreads to decrease and changes in interest rates may also result in increased contract withdrawals.

Interest rate fluctuations and/or a sustained period of low interest rates could negatively affect our profitability. Some of our products, principally fixed annuities, interest-sensitive whole life, UL and the fixed portion of VUL, have interest rate guarantees that expose us to the risk that changes in interest rates will reduce our spread, or the difference between the amounts that we are required to pay under the contracts and the amounts we are able to earn on our general account investments intended to support our obligations under the contracts. Spreads are an important component of our net income. Declines in our spread or instances where the returns on our general account investments are not enough to support the interest rate guarantees on these products could have a material adverse effect on our businesses or results of operations.

In periods when interest rates are declining or remain at low levels, we may have to reinvest the cash we receive as interest or return of principal on our investments in lower yielding instruments reducing our spread. Moreover, borrowers may prepay fixed-income securities, commercial mortgages and mortgage-backed securities in our general account in order to borrow at lower market rates, which exacerbates this risk. Lowering interest crediting rates helps to mitigate the effect of spread compression on some of our products. However, because we are entitled to reset the interest rates on our fixed rate annuities only at limited, pre-established intervals, and since many of our contracts have guaranteed minimum interest or crediting rates, our spreads could

Table of Contents

still decrease. As of December 31, 2011, 85% of our annuities business, 93% of our retirement plan services business and 92% of our life insurance business with guaranteed minimum interest or crediting rates are at their guaranteed minimums.

Our expectation for future spreads is an important component in the amortization of DAC and value of business acquired (VOBA) as it affects the future profitability of the business. Currently, new money rates continue to be at historically low levels. The Federal Reserve Board recently announced that it will keep rates low until at least late 2014. If interest rates were to remain low over a sustained period of time, this will put additional pressure on our spreads, potentially resulting in unlocking of our DAC and VOBA assets, thereby reducing net income in the affected reporting period. We would expect the effect to be most pronounced in our Life Insurance segment. For additional information on interest rate risks, see Part II Item 7A. Quantitative and Qualitative Disclosures About Market Risk Interest Rate Risk in our Annual Report on Form 10-K for the year ended December 31, 2011.

A decline in market interest rates could also reduce our return on investments that do not support particular policy obligations. During periods of sustained lower interest rates, our recorded policy liabilities may not be sufficient to meet future policy obligations and may need to be strengthened, thereby reducing net income in the affected reporting period. Accordingly, declining interest rates may materially affect our results of operations, financial position and cash flows and significantly reduce our profitability.

Increases in market interest rates may also negatively affect our profitability. In periods of rapidly increasing interest rates, we may not be able to replace the assets in our general account with higher yielding assets needed to fund the higher crediting rates necessary to keep our interest-sensitive products competitive. We therefore may have to accept a lower spread and thus lower profitability or face a decline in sales and greater loss of existing contracts and related assets. Increases in interest rates may cause increased surrenders and withdrawals of insurance products. In periods of increasing interest rates, policy loans and surrenders and withdrawals of life insurance policies and annuity contracts may increase as contract holders seek to buy products with perceived higher returns. This process may lead to a flow of cash out of our businesses. These outflows may require investment assets to be sold at a time when the prices of those assets are lower because of the increase in market interest rates, which may result in realized investment losses. A sudden demand among consumers to change product types or withdraw funds could lead us to sell assets at a loss to meet the demand for funds. Furthermore, unanticipated increases in withdrawals and termination may cause us to unlock our DAC and VOBA assets, which would reduce net income. An increase in market interest rates could also have a material adverse effect on the value of our investment portfolio, for example, by decreasing the estimated fair values of the fixed income securities that comprise a substantial portion of our investment portfolio. An increase in interest rates could also result in decreased fee income associated with a decline in the value of variable annuity account balances invested in fixed income funds.

Because the equity markets and other factors impact the profitability and expected profitability of many of our products, changes in equity markets and other factors may significantly affect our business and profitability.

The fee revenue that we earn on equity-based variable annuities and VUL insurance policies is based primarily upon account values. Because strong equity markets result in higher account values, strong equity markets positively affect our net income through increased fee revenue. Conversely, a weakening of the equity markets results in lower fee income and may have a material adverse effect on our results of operations and capital resources.

The increased fee revenue resulting from strong equity markets increases the expected gross profits (EGPs) from variable insurance products as do better than expected lapses, mortality rates and expenses. As a result, higher EGPs may result in lower net amortized costs related to DAC, deferred sales inducements (DSI), VOBA, deferred front-end loads (DFEL) and changes in future contract benefits. However, a decrease in the equity markets, as well as worse than expected increases in lapses, mortality rates and expenses, depending upon

Table of Contents

their significance, may result in higher net amortized costs associated with DAC, DSI, VOBA, DFEL and changes in future contract benefits and may have a material adverse effect on our results of operations and capital resources. If we were to have unlocked our reversion to the mean (RTM) assumption in the corridor as of December 31, 2011, we would have recorded a favorable prospective unlocking of approximately \$175 million, pre-tax, for our Annuities segment, approximately \$20 million, pre-tax, for our Retirement Plan Services segment and approximately \$15 million, pre-tax, for our Life Insurance segment. For further information about our RTM process, see Critical Accounting Policies and Estimates DAC, VOBA, DSI and DFEL Reversion to the Mean in the Management's Discussion and Analysis (MD&A) in our Annual Report on Form 10-K for the year ended December 31, 2011.

Changes in the equity markets, interest rates and/or volatility affect the profitability of our products with guaranteed benefits; therefore, such changes may have a material adverse effect on our business and profitability.

Certain of our variable annuity products include guaranteed benefit riders. These include guaranteed death benefit (GDB), guaranteed withdrawal benefit (GWB) and guaranteed income benefit (GIB) riders. Our GWB, GIB and 4LATER (term of GIB rider) features have elements of both insurance benefits accounted for under the Financial Services Insurance Claim Costs and Liabilities for Future Policy Benefits Subtopic of the FASB ASC (benefit reserves) and embedded derivatives accounted for under the Derivatives and Hedging and the Fair Value Measurements and Disclosures Topics of the FASB ASC (embedded derivative reserves). We calculate the value of the embedded derivative reserve and the benefit reserves based on the specific characteristics of each guaranteed living benefit feature. The amount of reserves related to GDB for variable annuities is tied to the difference between the value of the underlying accounts and the GDB, calculated using a benefit ratio approach. The GDB reserves take into account the present value of total expected GDB payments, the present value of total expected GDB assessments over the life of the contract, claims paid to date and assessments to date. Reserves for our GIB and certain GWB with lifetime benefits are based on a combination of fair value of the underlying benefit and a benefit ratio approach that is based on the projected future payments in excess of projected future account values. The benefit ratio approach takes into account the present value of total expected GIB payments, the present value of total expected GIB assessments over the life of the contract, claims paid to date and assessments to date. The amount of reserves related to those GWB that do not have lifetime benefits is based on the fair value of the underlying benefit.

Both the level of expected payments and expected total assessments used in calculating the reserves not carried at fair value are affected by the equity markets. The liabilities related to fair value are impacted by changes in equity markets, interest rates and volatility. Accordingly, strong equity markets, increases in interest rates and decreases in volatility will generally decrease the reserves calculated using fair value. Conversely, a decrease in the equity markets along with a decrease in interest rates and an increase in volatility will generally result in an increase in the reserves calculated using fair value.

Increases in reserves would result in a charge to our earnings in the quarter in which the increase occurs. Therefore, we maintain a customized dynamic hedge program that is designed to mitigate the risks associated with income volatility around the change in reserves on guaranteed benefits. However, the hedge positions may not be effective to exactly offset the changes in the carrying value of the guarantees due to, among other things, the time lag between changes in their values and corresponding changes in the hedge positions, high levels of volatility in the equity markets and derivatives markets, extreme swings in interest rates, contract holder behavior different than expected, a strategic decision to under- or over-hedge in reaction to extreme market conditions or inconsistencies between economic and statutory reserving guidelines and divergence between the performance of the underlying funds and hedging indices. For example, for the years ended December 31, 2011, 2010 and 2009, we experienced a breakage on our variable annuity net derivatives results of \$(106) million, \$(27) million and \$103 million, respectively, pre-tax and before the associated amortization of DAC, VOBA, DSI and DFEL and changes in other contract holder funds and funds withheld reinsurance liabilities. Breakage is defined as the difference between the change in the value of the liabilities, excluding the amount related to the non-performance

Table of Contents

risk component, and the change in the fair value of the derivatives. Breakage can be positive or negative. The non-performance risk factor is required under the Fair Value Measurements and Disclosures Topic of the FASB ASC, which requires us to consider our own credit standing, which is not hedged, in the valuation of certain of these liabilities. A decrease in our own credit spread could cause the value of these liabilities to increase, resulting in a reduction to net income. Conversely, an increase in our own credit spread could cause the value of these liabilities to decrease, resulting in an increase to net income.

In addition, we remain liable for the guaranteed benefits in the event that derivative counterparties are unable or unwilling to pay, and we are also subject to the risk that the cost of hedging these guaranteed benefits increases, resulting in a reduction to net income. These, individually or collectively, may have a material adverse effect on net income, financial condition or liquidity.

Liquidity and Capital Position

Adverse capital and credit market conditions may affect our ability to meet liquidity needs, access to capital and cost of capital.

We need liquidity to pay our operating expenses, interest on our debt and dividends on our capital stock, to maintain our securities lending activities and to replace certain maturing liabilities. Without sufficient liquidity, we will be forced to curtail our operations, and our business will suffer. When considering our liquidity and capital position, it is important to distinguish between the needs of our insurance subsidiaries and the needs of the holding company.

For our insurance and other subsidiaries, the principal sources of liquidity are insurance premiums and fees, annuity considerations and cash flow from our investment portfolio and assets, consisting mainly of cash or assets that are readily convertible into cash.

In the event that current resources do not satisfy our needs, we may have to seek additional financing. The availability of additional financing will depend on a variety of factors such as market conditions, the general availability of credit, the volume of trading activities, the overall availability of credit to the financial services industry, our credit ratings and credit capacity, as well as the possibility that customers or lenders could develop a negative perception of our long- or short-term financial prospects if we incur large investment losses or if the level of our business activity decreases due to a market downturn. Similarly, our access to funds may be impaired if regulatory authorities or rating agencies take negative actions against us. See Item 7. MD&A Review of Consolidated Financial Condition Liquidity and Capital Resources Sources of Liquidity and Cash Flows in our Annual Report on Form 10-K for the year ended December 31, 2011 for a description of our credit ratings. Our internal sources of liquidity may prove to be insufficient, and in such case, we may not be able to successfully obtain additional financing on favorable terms, or at all.

Disruptions, uncertainty or volatility in the capital and credit markets may also limit our access to capital required to operate our business, most significantly our insurance operations. Such market conditions may limit our ability to replace, in a timely manner, maturing liabilities; satisfy statutory capital requirements; generate fee income and market-related revenue to meet liquidity needs; and access the capital necessary to grow our business. As such, we may be forced to delay raising capital, issue shorter term securities than we prefer or bear an unattractive cost of capital which could decrease our profitability and significantly reduce our financial flexibility. Our results of operations, financial condition, cash flows and statutory capital position could be materially adversely affected by disruptions in the financial markets.

Because we are a holding company with no direct operations, the inability of our subsidiaries to pay dividends to us in sufficient amounts would harm our ability to meet our obligations.

We are a holding company and we have no direct operations. Our principal asset is the capital stock of our insurance subsidiaries. Our ability to meet our obligations for payment of interest and principal on outstanding

Table of Contents

debt obligations and to pay dividends to shareholders, repurchase our securities and pay corporate expenses depends primarily on the ability of our subsidiaries to pay dividends or to advance or repay funds to us. Under Indiana laws and regulations, our Indiana insurance subsidiaries, including Lincoln National Life Insurance Company (LNL), our primary insurance subsidiary, may pay dividends to us without prior approval of the Indiana Insurance Commissioner (the Commissioner) up to a certain threshold, or must receive prior approval of the Commissioner to pay a dividend if such dividend, along with all other dividends paid within the preceding 12 consecutive months, exceed the statutory limitation. The current Indiana statutory limitation is the greater of 10% of the insurer s contract holders surplus, as shown on its last annual statement on file with the Commissioner, or the insurer s statutory net gain from operations for the prior calendar year.

In addition, payments of dividends and advances or repayment of funds to us by our insurance subsidiaries are restricted by the applicable laws of their respective jurisdictions requiring that our insurance subsidiaries hold a specified amount of minimum reserves in order to meet future obligations on their outstanding policies. These regulations specify that the minimum reserves shall be calculated to be sufficient to meet future obligations, after giving consideration to future required premiums to be received, and are based on certain specified mortality and morbidity tables, interest rates and methods of valuation, which are subject to change. In order to meet their claims-paying obligations, our insurance subsidiaries regularly monitor their reserves to ensure we hold sufficient amounts to cover actual or expected contract and claims payments. At times, we may determine that reserves in excess of the minimum may be needed to ensure sufficiency.

Changes in, or reinterpretations of, these laws can constrain the ability of our subsidiaries to pay dividends or to advance or repay funds to us in sufficient amounts and at times necessary to meet our debt obligations and corporate expenses. Requiring our insurance subsidiaries to hold additional reserves has the potential to constrain their ability to pay dividends to the holding company. See Legislative, Regulatory and Tax Changes to the calculation of reserves and attempts to mitigate the impact of Regulation XXX and Actuarial Guideline 38 may fail in whole or in part resulting in an adverse effect on our financial condition and results of operations in our Annual Report on Form 10-K for the year ended December 31, 2011 for additional information on potential changes in these laws.

The earnings of our insurance subsidiaries impact contract holders surplus. Lower earnings constrain the growth in our insurance subsidiaries capital, and therefore, can constrain the payment of dividends and advances or repayment of funds to us.

In addition, the amount of surplus that our insurance subsidiaries could pay as dividends is constrained by the amount of surplus they hold to maintain their financial strength ratings, to provide an additional layer of margin for risk protection and for future investment in our businesses. Notwithstanding the foregoing, we believe that our insurance subsidiaries have sufficient liquidity to meet their contract holder obligations and maintain their operations.

A decrease in the capital and surplus of our insurance subsidiaries may result in a downgrade to our credit and insurer financial strength ratings.

In any particular year, statutory surplus amounts and RBC ratios may increase or decrease depending on a variety of factors, including the amount of statutory income or losses generated by our insurance subsidiaries (which itself is sensitive to equity market and credit market conditions), the amount of additional capital our insurance subsidiaries must hold to support business growth, changes in reserving requirements, such as AG38 and principles based reserving, our inability to secure capital market solutions to provide reserve relief, such as issuing letters of credit to support captive reinsurance structures, changes in equity market levels, the value of certain fixed-income and equity securities in our investment portfolio, the value of certain derivative instruments that do not get hedge accounting, changes in interest rates and foreign currency exchange rates, as well as changes to the NAIC RBC formulas. The RBC ratio is also affected by the product mix of the in-force book of business (i.e., the amount of business without guarantees is not subject to the same level of reserves as the

Table of Contents

business with guarantees). Most of these factors are outside of our control. Our credit and insurer financial strength ratings are significantly influenced by the statutory surplus amounts and RBC ratios of our insurance company subsidiaries. The RBC ratio of LNL is an important factor in the determination of the credit and financial strength ratings of LNC and its subsidiaries. In addition, rating agencies may implement changes to their internal models that have the effect of increasing or decreasing the amount of statutory capital we must hold in order to maintain our current ratings. In addition, in extreme scenarios of equity market declines, the amount of additional statutory reserves that we are required to hold for our variable annuity guarantees may increase at a rate greater than the rate of change of the markets. Increases in reserves reduce the statutory surplus used in calculating our RBC ratios. To the extent that our statutory capital resources are deemed to be insufficient to maintain a particular rating by one or more rating agencies, we may seek to raise additional capital through public or private equity or debt financing, which may be on terms not as favorable as in the past. Alternatively, if we were not to raise additional capital in such a scenario, either at our discretion or because we were unable to do so, our financial strength and credit ratings might be downgraded by one or more rating agencies. For more information on risks regarding our ratings, see *Covenants and Ratings*. A downgrade in our financial strength or credit ratings could limit our ability to market products, increase the number or value of policies being surrendered and/or hurt our relationships with creditors below.

Assumptions and Estimates

Our reserves for future policy benefits and claims related to our current and future business as well as businesses we may acquire in the future may prove to be inadequate.

We establish and carry, as a liability, reserves based on estimates of how much we will need to pay for future benefits and claims. For our insurance products, we calculate these reserves based on many assumptions and estimates, including, but not limited to, estimated premiums we will receive over the assumed life of the policies, the timing of the events covered by the insurance policies, the lapse rate of the policies, the amount of benefits or claims to be paid and the investment returns on the assets we purchase with the premiums we receive.

The sensitivity of our statutory reserves and surplus established for our variable annuity base contracts and riders to changes in the equity markets will vary depending on the magnitude of the decline. The sensitivity will be affected by the level of account values relative to the level of guaranteed amounts, product design and reinsurance. Statutory reserves for variable annuities depend upon the cumulative equity market impacts on the business in force, and therefore, result in non-linear relationships with respect to the level of equity market performance within any reporting period.

The assumptions and estimates we use in connection with establishing and carrying our reserves are inherently uncertain. Accordingly, we cannot determine with precision the ultimate amount or the timing of the payment of actual benefits and claims or whether the assets supporting the policy liabilities will grow to the level we assume prior to payment of benefits or claims. If our actual experience is different from our assumptions or estimates, our reserves may prove to be inadequate in relation to our estimated future benefits and claims. Increases in reserves have a negative effect on income from operations in the quarter incurred.

If our businesses do not perform well and/or their estimated fair values decline or the price of our common stock does not increase, we may be required to recognize an impairment of our goodwill or to establish a valuation allowance against the deferred income tax asset, which could have a material adverse effect on our results of operations and financial condition.

Goodwill represents the excess of the acquisition price incurred to acquire subsidiaries and other businesses over the fair value of their net assets as of the date of acquisition. As of December 31, 2011, we had a total of \$2.3 billion of goodwill on our Consolidated Balance Sheets, of which \$1.5 billion related to our Life Insurance segment and \$440 million related to our Annuities segment. We test goodwill at least annually for indications of value impairment with consideration given to financial performance, mergers and acquisitions and other relevant

Table of Contents

factors. In addition, certain events, including a significant and adverse change in legal factors, accounting standards or the business climate, an adverse action or assessment by a regulator or unanticipated competition, would cause us to review the carrying amounts of goodwill for impairment. Impairment testing is performed based upon estimates of the fair value of the reporting unit to which the goodwill relates. As of December 31, 2011, we recorded a goodwill impairment of \$747 million, primarily related to our Life Insurance segment. Subsequent reviews of goodwill could result in impairment of goodwill, and such write downs could have a material adverse effect on our net income and book value, but will not affect the statutory capital of our insurance subsidiaries. For more information on goodwill, see Note 10 and Critical Accounting Policies and Estimates Goodwill and Other Intangible Assets in the MD&A in our Annual Report on Form 10-K for the year ended December 31, 2011.

Deferred income tax represents the tax effect of the differences between the book and tax basis of assets and liabilities. Deferred tax assets are assessed periodically by management to determine if they are realizable. As of December 31, 2011, we had a deferred tax asset of \$2.5 billion. Factors in management's determination include the performance of the business, including the ability to generate capital gains from a variety of sources and tax planning strategies. If, based on available information, it is more likely than not that the deferred income tax asset will not be realized, then a valuation allowance must be established with a corresponding charge to net income. Such valuation allowance could have a material adverse effect on our results of operations and financial position.

The determination of the amount of allowances and impairments taken on our investments is highly subjective and could materially impact our results of operations or financial position.

The determination of the amount of allowances and impairments varies by investment type and is based upon our periodic evaluation and assessment of known and inherent risks associated with the respective asset class. Such evaluations and assessments are revised as conditions change and new information becomes available. Management updates its evaluations regularly and reflects changes in allowances and impairments in operations as such evaluations are revised. There can be no assurance that our management has accurately assessed the level of impairments taken and allowances reflected in our financial statements. Furthermore, additional impairments may need to be taken or allowances provided for in the future. Historical trends may not be indicative of future impairments or allowances.

We regularly review our available-for-sale (AFS) securities for declines in fair value that we determine to be other-than-temporary. For an equity security, if we do not have the ability and intent to hold the security for a sufficient period of time to allow for a recovery in value, we conclude that an other-than-temporary-impairment (OTTI) has occurred, and the amortized cost of the equity security is written down to the current fair value, with a corresponding change to realized gain (loss) on our Consolidated Statements of Income (Loss). When assessing our ability and intent to hold the equity security to recovery, we consider, among other things, the severity and duration of the decline in fair value of the equity security as well as the cause of decline, a fundamental analysis of the liquidity, business prospects and overall financial condition of the issuer.

For a debt security, if we intend to sell a security or it is more likely than not we will be required to sell a debt security before recovery of its amortized cost basis and the fair value of the debt security is below amortized cost, we conclude that an OTTI has occurred and the amortized cost is written down to current fair value, with a corresponding charge to realized loss on our Consolidated Statements of Income. If we do not intend to sell a debt security or it is not more likely than not we will be required to sell a debt security before recovery of its amortized cost basis but the present value of the cash flows expected to be collected is less than the amortized cost of the debt security (referred to as the credit loss), we conclude that an OTTI has occurred and the amortized cost is written down to the estimated recovery value with a corresponding charge to realized loss on our Consolidated Statements of Income (Loss), as this is also deemed the credit portion of the OTTI. The remainder of the decline to fair value is recorded in other comprehensive income (loss) (OCI) to unrealized OTTI on AFS securities on our Consolidated Statements of Stockholders' Equity, as this is considered a noncredit (i.e.,

Table of Contents

recoverable) impairment. Net OTTI recognized in net income (loss) was \$118 million, \$152 million and \$392 million, pre-tax, for the years ended December 31, 2011, 2010 and 2009, respectively. The portion of OTTI recognized in OCI for the years ended December 31, 2011 and 2010 was \$47 million and \$88 million, pre-tax, respectively.

Related to our unrealized losses, we establish deferred tax assets for the tax benefit we may receive in the event that losses are realized. The realization of significant realized losses could result in an inability to recover the tax benefits and may result in the establishment of valuation allowances against our deferred tax assets. Realized losses or impairments may have a material adverse impact on our results of operations and financial position.

Our valuation of fixed maturity, equity and trading securities may include methodologies, estimations and assumptions which are subject to differing interpretations and could result in changes to investment valuations that may materially adversely affect our results of operations or financial condition.

Fixed maturity, equity and trading securities and short-term investments, which are reported at fair value on our Consolidated Balance Sheets, represented the majority of our total cash and invested assets. Pursuant to the Fair Value Measurements and Disclosures Topics of the FASB ASC, we have categorized these securities into a three-level hierarchy, based on the priority of the inputs to the respective valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

The determination of fair values in the absence of quoted market prices is based on valuation methodologies, securities we deem to be comparable and assumptions deemed appropriate given the circumstances. The fair value estimates are made at a specific point in time, based on available market information and judgments about financial instruments, including estimates of the timing and amounts of expected future cash flows and the credit standing of the issuer or counterparty. Factors considered in estimating fair value include coupon rate, maturity, estimated duration, call provisions, sinking fund requirements, credit rating, industry sector of the issuer and quoted market prices of comparable securities. The use of different methodologies and assumptions may have a material effect on the estimated fair value amounts.

During periods of market disruption, including periods of significantly increasing/decreasing or high/low interest rates, rapidly widening credit spreads or illiquidity, it may be difficult to value certain securities if trading becomes less frequent and/or market data becomes less observable. There may be certain asset classes that were in active markets with significant observable data that become illiquid due to the current financial environment. In such cases, more securities may fall to Level 3 and thus require more subjectivity and management judgment. As such, valuations may include inputs and assumptions that are less observable or require greater estimation, as well as valuation methods which are more sophisticated or require greater estimation, thereby resulting in values which may be less than the value at which the investments may be ultimately sold. Further, rapidly changing and unprecedented credit and equity market conditions could materially impact the valuation of securities as reported within our consolidated financial statements and the period-to-period changes in value could vary significantly. Decreases in value may have a material adverse effect on our results of operations or financial condition.

Significant adverse mortality experience may result in the loss of, or higher prices for, reinsurance.

We reinsure a significant amount of the mortality risk on fully underwritten, newly issued, individual life insurance contracts. We regularly review retention limits for continued appropriateness and they may be changed in the future. If we were to experience adverse mortality or morbidity experience, a significant portion of that would be reimbursed by our reinsurers. Prolonged or severe adverse mortality or morbidity experience could result in increased reinsurance costs, and ultimately, reinsurers not willing to offer coverage. If we are unable to maintain our current level of reinsurance or purchase new reinsurance protection in amounts that we consider

Table of Contents

sufficient, we would either have to be willing to accept an increase in our net exposures or revise our pricing to reflect higher reinsurance premiums. If this were to occur, we may be exposed to reduced profitability and cash flow strain or we may not be able to price new business at competitive rates.

Catastrophes may adversely impact liabilities for contract holder claims and the availability of reinsurance.

Our insurance operations are exposed to the risk of catastrophic mortality, such as a pandemic, an act of terrorism, natural disaster or other event that causes a large number of deaths or injuries. Significant influenza pandemics have occurred three times in the last century, but the likelihood, timing or severity of a future pandemic cannot be predicted. Additionally, the impact of climate change could cause changes in weather patterns, resulting in more severe and more frequent natural disasters such as forest fires, hurricanes, tornados, floods and storm surges. In our group insurance operations, a localized event that affects the workplace of one or more of our group insurance customers could cause a significant loss due to mortality or morbidity claims. These events could cause a material adverse effect on our results of operations in any period and, depending on their severity, could also materially and adversely affect our financial condition.

The extent of losses from a catastrophe is a function of both the total amount of insured exposure in the area affected by the event and the severity of the event. Pandemics, natural disasters and man-made catastrophes, including terrorism, may produce significant damage in larger areas, especially those that are heavily populated. Claims resulting from natural or man-made catastrophic events could cause substantial volatility in our financial results for any fiscal quarter or year and could materially reduce our profitability or harm our financial condition. Also, catastrophic events could harm the financial condition of our reinsurers and thereby increase the probability of default on reinsurance recoveries. Accordingly, our ability to write new business could also be affected.

Consistent with industry practice and accounting standards, we establish liabilities for claims arising from a catastrophe only after assessing the probable losses arising from the event. We cannot be certain that the liabilities we have established or applicable reinsurance will be adequate to cover actual claim liabilities, and a catastrophic event or multiple catastrophic events could have a material adverse effect on our business, results of operations and financial condition.

Operational Matters

Our enterprise risk management policies and procedures may leave us exposed to unidentified or unanticipated risk, which could negatively affect our businesses or result in losses.

We have devoted significant resources to develop our enterprise risk management policies and procedures and expect to continue to do so in the future. Nonetheless, our policies and procedures to identify, monitor and manage risks may not be fully effective. Many of our methods of managing risk and exposures are based upon our use of observed historical market behavior or statistics based on historical models. As a result, these methods may not predict future exposures, which could be significantly greater than the historical measures indicate, such as the risk of pandemics causing a large number of deaths. Other risk management methods depend upon the evaluation of information regarding markets, clients, catastrophe occurrence or other matters that is publicly available or otherwise accessible to us, which may not always be accurate, complete, up-to-date or properly evaluated. Management of operational, legal and regulatory risks requires, among other things, policies and procedures to record properly and verify a large number of transactions and events, and these policies and procedures may not be fully effective.

We face a risk of non-collectibility of reinsurance, which could materially affect our results of operations.

We follow the insurance practice of reinsuring with other insurance and reinsurance companies a portion of the risks under the policies written by our insurance subsidiaries (known as ceding). As of December 31, 2011,

Table of Contents

we ceded \$331.7 billion of life insurance in force to reinsurers for reinsurance protection. Although reinsurance does not discharge our subsidiaries from their primary obligation to pay contract holders for losses insured under the policies we issue, reinsurance does make the assuming reinsurer liable to the insurance subsidiaries for the reinsured portion of the risk. As of December 31, 2011, we had \$6.5 billion of reinsurance receivables from reinsurers for paid and unpaid losses, for which they are obligated to reimburse us under our reinsurance contracts. Of this amount, \$2.8 billion related to the sale of our reinsurance business to Swiss Re in 2001 through an indemnity reinsurance agreement. Swiss Re has funded a trust to support this business. The balance in the trust changes as a result of ongoing reinsurance activity and was \$2.2 billion as of December 31, 2011. Furthermore, approximately \$1.0 billion of the Swiss Re treaties are funds withheld structures where we have a right of offset on assets backing the reinsurance receivables.

The balance of the reinsurance is due from a diverse group of reinsurers. The collectibility of reinsurance is largely a function of the solvency of the individual reinsurers. We perform annual credit reviews on our reinsurers, focusing on, among other things, financial capacity, stability, trends and commitment to the reinsurance business. We also require assets in trust, letters of credit or other acceptable collateral to support balances due from reinsurers not authorized to transact business in the applicable jurisdictions. Despite these measures, a reinsurer's insolvency, inability or unwillingness to make payments under the terms of a reinsurance contract, especially Swiss Re, could have a material adverse effect on our results of operations and financial condition.

Competition for our employees is intense, and we may not be able to attract and retain the highly skilled people we need to support our business.

Our success depends, in large part, on our ability to attract and retain key people. Intense competition exists for the key employees with demonstrated ability, and we may be unable to hire or retain such employees. The unexpected loss of services of one or more of our key personnel could have a material adverse effect on our operations due to their skills, knowledge of our business, their years of industry experience and the potential difficulty of promptly finding qualified replacement employees. We compete with other financial institutions primarily on the basis of our products, compensation, support services and financial position. Sales in our businesses and our results of operations and financial condition could be materially adversely affected if we are unsuccessful in attracting and retaining key employees, including financial advisors, wholesalers and other employees, as well as independent distributors of our products.

We may not be able to protect our intellectual property and may be subject to infringement claims.

We rely on a combination of contractual rights and copyright, trademark, patent and trade secret laws to establish and protect our intellectual property. Although we use a broad range of measures to protect our intellectual property rights, third parties may infringe or misappropriate our intellectual property. We may have to litigate to enforce and protect our copyrights, trademarks, patents, trade secrets and know-how or to determine their scope, validity or enforceability, which represents a diversion of resources that may be significant in amount and may not prove successful. Additionally, complex legal and factual determinations and evolving laws and court interpretations make the scope of protection afforded our intellectual property uncertain, particularly in relation to our patents. While we believe our patents provide us with a competitive advantage, we cannot be certain that any issued patents will be interpreted with sufficient breadth to offer meaningful protection. In addition, our issued patents may be successfully challenged, invalidated, circumvented or found unenforceable so that our patent rights would not create an effective competitive barrier. The loss of intellectual property protection or the inability to secure or enforce the protection of our intellectual property assets could have a material adverse effect on our business and our ability to compete.

We also may be subject to costly litigation in the event that another party alleges our operations or activities infringe upon another party's intellectual property rights. Third parties may have, or may eventually be issued, patents that could be infringed by our products, methods, processes or services. Any party that holds such a

Table of Contents

patent could make a claim of infringement against us. We may also be subject to claims by third parties for breach of copyright, trademark, trade secret or license usage rights. Any such claims and any resulting litigation could result in significant liability for damages. If we were found to have infringed a third-party patent or other intellectual property rights, we could incur substantial liability, and in some circumstances could be enjoined from providing certain products or services to our customers or utilizing and benefiting from certain methods, processes, copyrights, trademarks, trade secrets or licenses, or alternatively could be required to enter into costly licensing arrangements with third parties, all of which could have a material adverse effect on our business, results of operations and financial condition.

Our information systems may experience interruptions or breaches in security.

Our information systems are critical to the operation of our business. We collect, process, maintain, retain and distribute large amounts of personal financial and health information and other confidential and sensitive data about our customers in the ordinary course of our business. Our business therefore depends on our customers' willingness to entrust us with their personal information. Any failure, interruption or breach in security could result in disruptions to our critical systems and adversely affect our customer relationships. While we employ a robust and tested information security program, there can be no assurance that any such failure, interruption or security breach will not occur or, if any does occur, that it can be sufficiently remediated. The occurrence of any such failure, interruption or security breach of our systems could damage our reputation, result in a loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and financial liability.

Covenants and Ratings

A downgrade in our financial strength or credit ratings could limit our ability to market products, increase the number or value of policies being surrendered and/or hurt our relationships with creditors.

Nationally recognized rating agencies rate the financial strength of our principal insurance subsidiaries and rate our debt. Ratings are not recommendations to buy our securities. Each of the rating agencies reviews its ratings periodically, and our current ratings may not be maintained in the future.

Our financial strength ratings, which are intended to measure our ability to meet contract holder obligations, are an important factor affecting public confidence in most of our products and, as a result, our competitiveness. A downgrade of the financial strength rating of one of our principal insurance subsidiaries could affect our competitive position in the insurance industry by making it more difficult for us to market our products as potential customers may select companies with higher financial strength ratings and by leading to increased withdrawals by current customers seeking companies with higher financial strength ratings. This could lead to a decrease in fees as net outflows of assets increase, and therefore, result in lower fee income. Furthermore, sales of assets to meet customer withdrawal demands could also result in losses, depending on market conditions. The interest rates we pay on our borrowings are largely dependent on our credit ratings. A downgrade of our debt ratings could affect our ability to raise additional debt, including bank lines of credit, with terms and conditions similar to our current debt, and accordingly, likely increase our cost of capital.

All of our ratings and ratings of our principal insurance subsidiaries are subject to revision or withdrawal at any time by the rating agencies, and therefore, no assurance can be given that our principal insurance subsidiaries or we can maintain these ratings. See Item 1. Business Financial Strength Ratings and Item 7. MD&A Review of Consolidated Financial Condition Liquidity and Capital Resources Sources of Liquidity and Cash Flows in our Annual Report on Form 10-K for the year ended December 31, 2011 for a description of our ratings.

Table of Contents

We will be required to pay interest on our capital securities with proceeds from the issuance of qualifying securities if we fail to achieve capital adequacy or net income and stockholders' equity levels.

As of December 31, 2011, we had approximately \$1.2 billion in principal amount of capital securities outstanding. All of the capital securities contain covenants that require us to make interest payments in accordance with an alternative coupon satisfaction mechanism (ACSM) if we determine that one of the following triggers exists as of the 30th day prior to an interest payment date, or the determination date :

1. LNL's RBC ratio is less than 175% (based on the most recent annual financial statement filed with the State of Indiana); or
2. (i) The sum of our consolidated net income for the four trailing fiscal quarters ending on the quarter that is two quarters prior to the most recently completed quarter prior to the determination date is zero or negative, and (ii) our consolidated stockholders' equity (excluding accumulated OCI and any increase in stockholders' equity resulting from the issuance of preferred stock during a quarter), adjusted stockholders' equity, as of (x) the most recently completed quarter and (y) the end of the quarter that is two quarters before the most recently completed quarter, has declined by 10% or more as compared to the quarter that is ten fiscal quarters prior to the last completed quarter, or the benchmark quarter.

The ACSM would generally require us to use commercially reasonable efforts to satisfy our obligation to pay interest in full on the capital securities with the net proceeds from sales of our common stock and warrants to purchase our common stock with an exercise price greater than the market price. We would have to utilize the ACSM until the trigger events above no longer existed, and, in the case of test 2 above, until our adjusted stockholders' equity amount increased or declined by less than 10% as compared to the adjusted stockholders' equity at the end of the benchmark quarter for each interest payment date as to which interest payment restrictions were imposed by test 2 above.

If we were required to utilize the ACSM and were successful in selling sufficient shares of common stock or warrants to satisfy the interest payment, we would dilute the current holders of our common stock. Furthermore, while a trigger event is occurring and if we do not pay accrued interest in full, we may not, among other things, pay dividends on or repurchase our capital stock. Our failure to pay interest pursuant to the ACSM will not result in an event of default with respect to the capital securities, nor will a nonpayment of interest, unless it lasts for ten consecutive years, although such breaches may result in monetary damages to the holders of the capital securities.

The calculations of RBC, net income (loss) and adjusted stockholders' equity are subject to adjustments and the capital securities are subject to additional terms and conditions as further described in supplemental indentures filed as exhibits to our Forms 8-K filed on March 13, 2007, May 17, 2006, and April 20, 2006.

Certain blocks of our insurance business purchased from third-party insurers under indemnity reinsurance agreements may require us to place assets in trust, secure letters of credit or return the business, if the financial strength ratings and/or capital ratios of certain insurance subsidiaries are not maintained at specified levels.

Under certain indemnity reinsurance agreements, one of our insurance subsidiaries, Lincoln Life & Annuity Co. of New York (LLANY), provides 100% indemnity reinsurance for the business assumed, however, the third-party insurer, or the cedent, remains primarily liable on the underlying insurance business. Under these types of agreements, as of December 31, 2011, we held statutory reserves of \$3.1 billion. These indemnity reinsurance arrangements require that our subsidiary, as the reinsurer, maintain certain insurer financial strength ratings and capital ratios. If these ratings or capital ratios are not maintained, depending upon the reinsurance agreement, the cedent may recapture the business, or require us to place assets in trust or provide letters of credit at least equal to the relevant statutory reserves. Under the largest indemnity reinsurance arrangement, we held

Table of Contents

\$2.1 billion of statutory reserves as of December 31, 2011. LLANY must maintain an A.M. Best financial strength rating of at least B+, an S&P financial strength rating of at least BB+ and a Moody's financial strength rating of at least Ba1, as well as maintain an RBC ratio of at least 160% or an S&P capital adequacy ratio of 100%, or the cedent may recapture the business. Under two other arrangements, by which we established approximately \$875 million of statutory reserves, LLANY must maintain an A.M. Best financial strength rating of at least B++, an S&P financial strength rating of at least BBB- and a Moody's financial strength rating of at least Baa3. One of these arrangements also requires LLANY to maintain an RBC ratio of at least 185%, or an S&P capital adequacy ratio of 115%. Each of these arrangements may require LLANY to place assets in trust equal to the relevant statutory reserves. As of December 31, 2011, LLANY's RBC ratio exceeded the required ratio. See Item 1. Business Financial Strength Ratings in our Annual Report on Form 10-K for the year ended December 31, 2011 for a description of our financial strength ratings.

If the cedent recaptured the business, LLANY would be required to release reserves and transfer assets to the cedent. Such a recapture could adversely impact our future profits. Alternatively, if LLANY established a security trust for the cedent, the ability to transfer assets out of the trust could be severely restricted, thus negatively impacting our liquidity.

Investments

Some of our investments are relatively illiquid and are in asset classes that have been experiencing significant market valuation fluctuations.

We hold certain investments that may lack liquidity, such as privately placed fixed maturity securities, mortgage loans, policy loans and other limited partnership interests. These asset classes represented 21% of the carrying value of our total cash and invested assets as of December 31, 2011.

If we require significant amounts of cash on short notice in excess of normal cash requirements or are required to post or return collateral in connection with our investment portfolio, derivatives transactions or securities lending activities, we may have difficulty selling these investments in a timely manner, be forced to sell them for less than we otherwise would have been able to realize, or both.

The reported value of our relatively illiquid types of investments, our investments in the asset classes described in the paragraph above and, at times, our high quality, generally liquid asset classes, do not necessarily reflect the lowest current market price for the asset. If we were forced to sell certain of our assets in the current market, there can be no assurance that we would be able to sell them for the prices at which we have recorded them and we might be forced to sell them at significantly lower prices.

We invest a portion of our invested assets in investment funds, many of which make private equity investments. The amount and timing of income from such investment funds tends to be uneven as a result of the performance of the underlying investments, including private equity investments. The timing of distributions from the funds, which depends on particular events relating to the underlying investments, as well as the funds' schedules for making distributions and their needs for cash, can be difficult to predict. As a result, the amount of income that we record from these investments can vary substantially from quarter to quarter. Recent equity and credit market volatility may reduce investment income for these types of investments.

Defaults on our mortgage loans and write downs of mortgage equity may adversely affect our profitability.

Our mortgage loans face default risk and are principally collateralized by commercial properties. The performance of our mortgage loan investments may fluctuate in the future. In addition, some of our mortgage loan investments have balloon payment maturities. An increase in the default rate of our mortgage loan investments could have a material adverse effect on our business, results of operations and financial condition.

Table of Contents

Further, any geographic or sector exposure in our mortgage loans may have adverse effects on our investment portfolios and consequently on our consolidated results of operations or financial condition. While we seek to mitigate this risk by having a broadly diversified portfolio, events or developments that have a negative effect on any particular geographic region or sector may have a greater adverse effect on the investment portfolios to the extent that the portfolios are exposed.

The difficulties faced by other financial institutions could adversely affect us.

We have exposure to many different industries and counterparties, and routinely execute transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks and other institutions. Many of these transactions expose us to credit risk in the event of default of our counterparty. In addition, with respect to secured transactions, our credit risk may be exacerbated when the collateral held by us cannot be realized upon or is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure due to it. We also may have exposure to these financial institutions in the form of unsecured debt instruments, derivative transactions and/or equity investments. These parties may default on their obligations to us due to bankruptcy, lack of liquidity, downturns in the economy or real estate values, operational failure, corporate governance issues or other reasons. A further downturn in the U.S. and other economies could result in increased impairments. There can be no assurance that any such losses or impairments to the carrying value of these assets would not materially and adversely affect our business and results of operations.

Our requirements to post collateral or make payments related to declines in market value of specified assets may adversely affect our liquidity and expose us to counterparty credit risk.

Many of our transactions with financial and other institutions, including settling futures positions, specify the circumstances under which the parties are required to post collateral. The amount of collateral we may be required to post under these agreements may increase under certain circumstances, which could adversely affect our liquidity. In addition, under the terms of some of our transactions, we may be required to make payments to our counterparties related to any decline in the market value of the specified assets.

Our investments are reflected within our consolidated financial statements utilizing different accounting bases, and, accordingly, there may be significant differences between cost and fair value that are not recorded in our consolidated financial statements.

Our principal investments are in fixed maturity and equity securities, mortgage loans on real estate, policy loans, short-term investments, derivative instruments, limited partnerships and other invested assets. The carrying value of such investments is as follows:

Fixed maturity and equity securities are classified as AFS, except for those designated as trading securities, and are reported at their estimated fair value. The difference between the estimated fair value and amortized cost of such securities (i.e., unrealized investment gains and losses) is recorded as a separate component of OCI, net of adjustments to DAC, contract holder related amounts and deferred income taxes;

Fixed maturity and equity securities designated as trading securities, which in certain cases support reinsurance arrangements, are recorded at fair value with subsequent changes in fair value recognized in realized gain (loss). However, in certain cases, the trading securities support reinsurance arrangements. In those cases, offsetting the changes to fair value of the trading securities are corresponding changes in the fair value of the embedded derivative liability associated with the underlying reinsurance arrangement. In other words, the investment results for the trading securities, including gains and losses from sales, are passed directly to the reinsurers through the contractual terms of the reinsurance arrangements. These types of securities represent 60% of our trading securities;

Short-term investments include investments with remaining maturities of one year or less, but greater than three months, at the time of acquisition and are stated at amortized cost, which approximates fair value;

Table of Contents

Mortgage loans on real estate are carried at unpaid principal balances, adjusted for any unamortized premiums or discounts and deferred fees or expenses, net of valuation allowances;

Policy loans are carried at unpaid principal balances;

Real estate joint ventures and other limited partnership interests are carried using the equity method of accounting; and

Other invested assets consist principally of derivatives with positive fair values. Derivatives are carried at fair value with changes in fair value reflected in income from non-qualifying derivatives and derivatives in fair value hedging relationships. Derivatives in cash flow hedging relationships are reflected as a separate component of OCI.

Investments not carried at fair value on our consolidated financial statements, principally, mortgage loans, policy loans and real estate, may have fair values which are substantially higher or lower than the carrying value reflected on our consolidated financial statements. In addition, unrealized losses are not reflected in net income unless we realize the losses by either selling the security at below amortized cost or determine that the decline in fair value is deemed to be other-than-temporary (i.e., impaired). Each of such asset classes is regularly evaluated for impairment under the accounting guidance appropriate to the respective asset class.

Competition

Intense competition could negatively affect our ability to maintain or increase our profitability.

Our businesses are intensely competitive. We compete based on a number of factors, including name recognition, service, the quality of investment advice, investment performance, product features, price, perceived financial strength and claims-paying and credit ratings. Our competitors include insurers, broker-dealers, financial advisors, asset managers and other financial institutions. A number of our business units face competitors that have greater market share, offer a broader range of products or have higher financial strength or credit ratings than we do.

In recent years, there has been substantial consolidation and convergence among companies in the financial services industry resulting in increased competition from large, well-capitalized financial services firms. Many of these firms also have been able to increase their distribution systems through mergers or contractual arrangements. Furthermore, larger competitors may have lower operating costs and an ability to absorb greater risk while maintaining their financial strength ratings, thereby allowing them to price their products more competitively. We expect consolidation to continue and perhaps accelerate in the future, thereby increasing competitive pressure on us.

Our sales representatives are not captive and may sell products of our competitors.

We sell our annuity and life insurance products through independent sales representatives. These representatives are not captive, which means they may also sell our competitors' products. If our competitors offer products that are more attractive than ours, or pay higher commission rates to the sales representatives than we do, these representatives may concentrate their efforts in selling our competitors' products instead of ours.

Table of Contents

USE OF PROCEEDS

We estimate that, after deducting underwriting discounts and commissions and estimated expenses payable by us, our net proceeds from this offering will be approximately \$297 million. We intend to use the net proceeds from this offering to repay the \$300 million aggregate principal amount of our 5.65% senior notes maturing on August 27, 2012.

S-25

Table of Contents**RATIO OF EARNINGS TO FIXED CHARGES**

	For the Years Ended December 31,				
	2011	2010	2009	2008	2007
	(dollars in millions)				
Income (loss) from continuing operations before taxes	\$ 599	\$ 1,234	\$ (521)	\$ (137)	\$ 1,675
Sub-total of fixed charges	308	307	292	303	325
Sub-total of adjusted income (loss)	907	1,541	(229)	166	2,000
Interest on annuities and financial products	2,488	2,499	2,513	2,538	2,525
Adjusted income base	\$ 3,395	\$ 4,040	\$ 2,284	\$ 2,704	\$ 4,525
Fixed Charges					
Interest and debt expense(1)	\$ 286	\$ 286	\$ 261	\$ 281	\$ 284
Interest expense related to uncertain tax positions	9	7	13	2	21
Portion of rent expense representing interest	13	14	18	20	20
Sub-total of fixed charges excluding interest on annuities and financial products	308	307	292	303	325
Interest on annuities and financial products	2,488	2,499	2,513	2,538	2,525
Total fixed charges	\$ 2,796	\$ 2,806	\$ 2,805	\$ 2,841	\$ 2,850
Ratio of sub-total of adjusted income to sub-total of fixed charges excluding interest on annuities and financial products(2)	2.94	5.02			6.15
Ratio of adjusted income base to total fixed charges(2)	1.21	1.44			1.59

- (1) Interest and debt expense excludes an \$8 million loss, a \$5 million loss and a \$64 million gain related to the early retirement of debt in 2011, 2010 and 2009, respectively.
- (2) The ratios of earnings to fixed charges for the years ended December 31, 2009 and 2008 indicated a less than one-to-one coverage and are therefore not presented. Additional earnings of \$521 million and \$137 million would have been required for the years ended December 31, 2009 and 2008, respectively, to achieve ratios of one-to-one coverage.

Table of Contents**CAPITALIZATION**

The following table sets forth our consolidated capitalization as of December 31, 2011:

on an actual basis; and

on an as adjusted basis to give effect to the receipt of estimated net proceeds of approximately \$297 million in this offering and to the use of the net proceeds from this offering.

The following data is qualified in its entirety by, and should be read in conjunction with, our audited consolidated financial statements and notes thereto incorporated in this prospectus supplement and the accompanying base prospectus by reference.

	As of December 31, 2011

- (1) Includes adjustments related to the notes offered hereby. Does not reflect other increases or decreases, including increases or decreases in our commercial paper balance, after December 31, 2011.
- (2) The weighted-average interest rate of commercial paper was 0.20% as of December 31, 2011.
- (3) We have the option to repurchase the outstanding notes by paying the greater of 100% of the principal amount of the notes to be redeemed or the make-whole amount (as defined in each indenture or supplemental indenture), plus in each case any accrued and unpaid interest as of the date of redemption.

Table of Contents**SELECTED CONSOLIDATED HISTORICAL FINANCIAL DATA OF LNC**

The following selected financial data should be read together with our consolidated financial statements and accompanying notes and Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended December 31, 2011 which are incorporated herein by reference. Our historical results are not necessarily indicative of our future results. The selected financial data set forth below are derived from our consolidated financial statements for the years ended December 31, 2011, 2010, 2009, 2008 and 2007. Some previously reported amounts have been reclassified to conform to the presentation as of and for the year ended December 31, 2011.

DESCRIPTION OF NOTES

The following description of the particular terms of the notes offered hereby supplements, and to the extent inconsistent therewith replaces, the description of the general terms and provisions described under the caption Description of Securities We May Sell Senior and Subordinated Debt Securities in the accompanying base prospectus.

General

The notes will be issued under an indenture dated as of March 10, 2009, between us and The Bank of New York Mellon, as trustee, referred to as the indenture. The notes will mature on March 15, 2022.

The notes will initially be limited to \$300,000,000 in aggregate principal amount. We may, however, without the consent of any then-existing holders of the notes, reopen the notes and issue an unlimited principal amount of additional notes in the future. These additional notes will be deemed part of the same series as the notes offered hereby.

Unless previously redeemed or purchased and cancelled, we will repay the notes in cash at 100% of their principal amount together with accrued and unpaid interest thereon at maturity. We will pay principal and interest on the notes in U.S. dollars.

The notes will be our senior unsecured debt obligations and will rank equally among themselves and with all of our other present and future unsecured unsubordinated obligations. The indenture does not limit the aggregate principal amount of senior debt securities that may be issued.

The notes will be redeemable by us at any time prior to maturity as described below under Optional Redemption.

The notes will not be subject to a sinking fund. The notes will be issued in fully registered book-entry form only in minimum denominations of \$2,000 and integral multiples of \$1,000 in excess thereof. The notes will be issued in the form of one or more global securities. The global security will be deposited with, or on behalf of, DTC, and registered in the name of DTC or a nominee, as further described below.

The provisions of the indenture relating to defeasance, which are described under the caption Description of the Securities We May Sell Senior and Subordinated Debt Securities Defeasance and Covenant Defeasance in the accompanying base prospectus, will apply to the notes.

If the scheduled maturity date falls on a day that is not a business day, the payment of interest and principal will be made on the next succeeding business day, and no interest on such payment shall accrue for the period from and after the scheduled maturity date.

Interest

The notes will bear interest at a rate of 4.20%. Interest on the notes will accrue from March 29, 2012 or from the most recent interest payment date to which interest has been paid or provided for, to but excluding the relevant interest payment date. We will make interest payments on the notes semi-annually in arrears on March 15 and September 15 of each year, beginning on September 15, 2012, to the person in whose name such notes are registered at the close of business on the immediately preceding March 1 or September 1, as applicable. Interest on the notes will be computed on the basis of a 360-day year comprised of twelve 30-day months.

Table of Contents

If an interest payment date for the notes falls on a day that is not a business day, the interest payment shall be postponed to the next succeeding business day, and no interest on such payment shall accrue for the period from and after such interest payment date.

Optional Redemption

The notes are redeemable, in whole or in part, at our option, at any time or from time to time, upon mailed notice to the registered holders of the applicable notes at their addresses as shown on the security register at least 30 days but not more than 60 days prior to the redemption. The redemption price will be the greater of (i) 100% of the principal amount of the notes to be redeemed and (ii) the make-whole amount, plus in each case accrued and unpaid interest to the date of redemption.

Make-whole amount means the sum of the present values of the remaining scheduled payments (as defined below) on the notes to be redeemed, discounted to the date of redemption on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months), at a rate equal to the sum of the applicable treasury rate (as defined below) plus 30 basis points.

Comparable treasury issue means the U.S. Treasury security selected by a reference treasury dealer as having an actual or interpolated maturity comparable to the remaining term of the notes, that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities with a term comparable to such period.

Comparable treasury price means, with respect to a redemption date, (1) the average of five reference treasury dealer quotations for such redemption date, after excluding the highest and lowest reference treasury dealer quotations, or (2) if the quotation agent obtains fewer than five such reference treasury dealer quotations, the average of all such quotations.

Quotation agent means the entity appointed by us, which in any case shall not be the trustee, to determine the make-whole amount.

Reference treasury dealer means (1) Credit Suisse Securities (USA) LLC and Morgan Stanley & Co. LLC and (2) any additional primary U.S. government securities dealers, including dealers outside New York City (each, a **primary treasury dealer**), selected by us and their successors; provided, however, that if any of them ceases to be a primary treasury dealer we will substitute another primary treasury dealer.

Reference treasury dealer quotations means, with respect to each reference treasury dealer and any redemption date, the average, as determined by the quotation agent, of the bid and ask prices for the comparable treasury issue (expressed in each case as a percentage of its principal amount) quoted in writing to the quotation agent at 5:00 p.m., New York City time, on the third business day preceding such redemption date.

Remaining scheduled payments means the remaining scheduled payments of principal and interest on the notes that would be due after the related redemption date but for that redemption. If that redemption date is not an interest payment date with respect to the notes called for redemption, the amount of the next succeeding scheduled interest payment on such notes will be reduced by the amount of interest accrued to such redemption date.

Treasury rate means, with respect to any redemption date, the rate per annum equal to the semi-annual equivalent yield to maturity (computed as of the third business day immediately preceding that redemption date) of the comparable treasury issue, assuming a price for the comparable treasury issue (expressed as a percentage of its principal amount) equal to the comparable treasury price for that redemption date.

Table of Contents

We will prepare and mail a notice of redemption to each holder of notes to be redeemed by first-class mail at least 30 but not more than 60 days prior to the date fixed for redemption. On and after a redemption date, interest will cease to accrue on the notes called for redemption (unless we default in the payment of the redemption price and accrued interest). On or before a redemption date, we will deposit with a paying agent (or the trustee) money sufficient to pay the redemption price of and accrued interest on the notes to be redeemed on that date. If less than all of the notes are to be redeemed, the notes to be redeemed shall be selected by the trustee pro rata or by lot or by a method the trustee deems to be fair and appropriate.

Regarding the Trustee

We and our affiliates maintain various commercial and service relationships with the trustee and its affiliates in the ordinary course of business. In particular, the trustee is a lender in our \$2 billion credit facility.

Book-Entry System

Upon issuance, the notes will be represented by one or more fully registered global certificates, each of which we refer to as a global security. Each such global security will be deposited with, or on behalf of, DTC, and registered in the name of DTC or a nominee thereof. Unless and until it is exchanged in whole or in part for notes in definitive form, no global security may be transferred except as a whole by DTC to a nominee of DTC or by a nominee of DTC to DTC or another nominee of DTC or by DTC or any such nominee to a successor of DTC or a nominee of such successor.

Beneficial interests in the notes will be represented through book-entry accounts of financial institutions acting on behalf of beneficial owners as direct and indirect participants in DTC. Investors may elect to hold interest in the notes held by DTC through Clearstream Bank, société anonyme, referred to as Clearstream, Luxembourg, or Euroclear Bank S.A./N.V., as operator of the Euroclear System, referred to as the Euroclear operator, if they are participants in such systems, or indirectly through organizations that are participants in such systems. Clearstream, Luxembourg and the Euroclear operator will hold interests on behalf of their participants through customers securities accounts in Clearstream, Luxembourg s and the Euroclear operator s names on the books of their respective depositaries, which in turn will hold such interests in customers securities accounts in the depositaries names on the books of DTC.

So long as DTC, or its nominee, is a registered owner of a note, DTC or its nominee, as the case may be, will be considered the sole owner or holder of the notes represented by such note for all purposes under the indenture or other governing documents. Except as provided below, the actual owners of the notes represented by a note, referred to as the beneficial owner, will not be entitled to have the notes represented by such note registered in their names, will not receive or be entitled to receive physical delivery of the notes in definitive form and will not be considered the registered owners or holders thereof under the indenture.

Accordingly, each person owning a beneficial interest in a note must rely on the procedures of DTC and, if such person is not a participant of DTC, referred to as a participant, on the procedures of the participant through which such person owns its interest, to exercise any rights of a holder under the indenture. We understand that under existing industry practices, in the event that LNC requests any action of holders or that an owner of a beneficial interest that a holder is entitled to give or take under the indenture, DTC would authorize the participants holding the relevant beneficial interests to give or take such action, and such participants would authorize beneficial owners owning through such participants to give or take such action or would otherwise act upon the instructions of beneficial owners. Conveyance of notices and other communications by DTC to participants, by participants to indirect participants, as defined below, and by participants and indirect participants to beneficial owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Table of Contents

The following is based on information furnished by DTC:

DTC will act as securities depository for the notes. Offered securities will be issued as fully registered securities registered in the name of Cede & Co. (DTC's partnership nominee) or such other name as may be requested by an authorized representative of DTC. One or more fully registered global securities will be issued for the notes, in the aggregate principal amount of the notes, and will be deposited with DTC.

DTC is a limited-purpose trust company organized under the New York Banking Law, a banking organization within the meaning of the New York Banking Law, a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code, and a clearing agency registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934, as amended. DTC holds securities that its participants deposit with DTC. DTC also facilitates the post-trade settlement among participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between participants' accounts, thereby eliminating the need for physical movement of securities certificates. Direct participants of DTC, referred to as direct participants, include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation, referred to as DTCC. DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to DTC's system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks and trust companies, and clearing corporations that clear through or maintain a custodial relationship with a direct participant, either directly or indirectly, referred to as indirect participants. The rules applicable to DTC and its participants are on file with the SEC.

Purchases of the notes under DTC's system must be made by or through direct participants, which will receive a credit for the notes on DTC's records. The ownership interest of each beneficial owner is in turn to be recorded on the records of direct participants and indirect participants. Beneficial owners will not receive written confirmation from DTC of their purchase, but beneficial owners are expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the direct participants or indirect participants through which such beneficial owner entered into the transaction. Transfers of ownership interests in the notes are to be accomplished by entries made on the books of direct participants and indirect participants acting on behalf of beneficial owners. Beneficial owners will not receive certificates representing their ownership interests in the notes, except in the event that the use of the book-entry system for the notes is discontinued or other limited circumstances that may be provided in the indenture.

To facilitate subsequent transfers, all notes deposited by direct participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co., or such other name as may be requested by an authorized representative of DTC. The deposit of the notes with DTC and their registration in the name of Cede & Co. or such other DTC nominee do not effect any change in beneficial ownership. DTC has no knowledge of the actual beneficial owners of the notes. DTC's records reflect only the identity of the direct participants to whose accounts such notes are credited, which may or may not be the beneficial owners. The direct participants and indirect participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to direct participants, by direct participants to indirect participants, and by direct participants and indirect participants to beneficial owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to the notes. Under its usual procedures, DTC mails an Omnibus Proxy to LNC as soon as possible after the applicable record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those direct participants to whose accounts securities are credited on the applicable record date (identified in a listing attached to the Omnibus Proxy).

Table of Contents

Payments on the notes will be made in immediately available funds to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit direct participants' accounts upon DTC's receipt of funds and corresponding detail information from LNC or the applicable agent, on the applicable payment date in accordance with their respective holdings shown on DTC's records. Payments by participants to beneficial owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in street name, and will be the responsibility of such participant and not of DTC, the applicable agent or LNC, subject to any statutory or regulatory requirements as may be in effect from time to time. Any payment to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of LNC or the applicable agent, disbursement of such payments to direct participants shall be the responsibility of DTC, and disbursement of such payments to the beneficial owners shall be the responsibility of direct participants and indirect participants.

DTC may discontinue providing its services as securities depository with respect to the notes at any time by giving reasonable notice to LNC or the applicable agent. Under such circumstances, in the event that a successor securities depository is not obtained, offered security certificates are required to be printed and delivered. LNC may decide to discontinue use of the system of book-entry transfers through DTC (or a successor securities depository). In that event, offered security certificates will be printed and delivered.

Clearstream, Luxembourg advises that it is incorporated under the laws of Luxembourg as a professional depository. Clearstream, Luxembourg holds securities for its participating organizations, referred to as Clearstream participants, and facilitates the clearance and settlement of securities transactions between Clearstream participants through electronic book-entry changes in accounts of Clearstream participants, thereby eliminating the need for physical movement of certificates. Clearstream, Luxembourg provides to Clearstream participants, among other things, services for safekeeping, administration, clearance and settlement of internationally traded securities and securities lending and borrowing. Clearstream, Luxembourg interfaces with domestic markets in several countries. As a professional depository, Clearstream, Luxembourg is subject to regulation by the Luxembourg Monetary Institute.

Clearstream participants are recognized financial institutions around the world, including underwriters, securities brokers and dealers, trust companies, clearing corporations and certain other organizations and may include the underwriters. Indirect access to Clearstream, Luxembourg is also available to others, such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a Clearstream participant either directly or indirectly.

Distributions with respect to the notes held beneficially through Clearstream, Luxembourg will be credited to cash accounts of Clearstream participants in accordance with its rules and procedures, to the extent received by the U.S. depository for Clearstream, Luxembourg.

Euroclear advises that it was created in 1968 to hold securities for its participants, referred to as Euroclear participants, and to clear and settle transactions between Euroclear participants through simultaneous electronic book-entry delivery against payment, thereby eliminating the need for physical movement of certificates and any risk from lack of simultaneous transfers of securities and cash. Euroclear includes various other services, including securities lending and borrowing and interfaces with domestic markets in several countries. Euroclear is owned by Euroclear Clearance System Public Limited Company and operated through a license agreement by the Euroclear operator.

Euroclear participants include banks (including central banks), securities brokers and dealers and other professional financial intermediaries and may include the underwriters or agents for the notes. Indirect access to Euroclear is also available to others that clear through or maintain a custodial relationship with a Euroclear participant, either directly or indirectly.

Table of Contents

The Euroclear operator is regulated and examined by the Belgian Banking and Finance Commission and the National Bank of Belgium. Securities clearance accounts and cash accounts with the Euroclear operator are governed by the Terms and Conditions Governing Use of Euroclear and the related Operating Procedures of Euroclear, and applicable Belgian law, collectively referred to as the Terms and Conditions. The Terms and Conditions govern transfers of securities and cash within Euroclear, withdrawals of securities and cash from Euroclear, and receipts of payments with respect to securities in Euroclear. All securities in Euroclear are held on a fungible basis without attribution of specific certificates to specific securities clearance accounts. The Euroclear operator acts under the Terms and Conditions only on behalf of Euroclear participants, and has no record of or relationship with persons holding through Euroclear participants.

Distributions with respect to the notes held beneficially through Euroclear will be credited to the cash accounts of Euroclear participants in accordance with the Terms and Conditions, to the extent received by the U.S. depository for Euroclear.

Global Clearance and Settlement Procedures

Initial settlement for the notes will be made in immediately available funds. Secondary market trading between DTC participants will occur in the ordinary way in accordance with DTC's rules and will be settled in immediately available funds using DTC's Same-Day Funds Settlement System. If and to the extent this prospectus supplement with respect to any of the notes indicates that investors may elect to hold interests in the notes through Clearstream, Luxembourg or Euroclear, secondary market trading between Clearstream participants and/or Euroclear participants will occur in the ordinary way in accordance with the applicable rules and operating procedures of Clearstream, Luxembourg and Euroclear and will be settled using the procedures applicable to conventional eurobonds in immediately available funds. No assurance can be given as to the effect, if any, of settlement in immediately available funds on trading activity in the notes.

Cross-market transfers between persons holding directly or indirectly through DTC, on the one hand, and directly or indirectly through Clearstream or Euroclear participants, on the other, will be effected in DTC in accordance with DTC rules on behalf of the relevant European international clearing system by its U.S. depository; however, such cross-market transactions will require delivery of instructions to the relevant European international clearing system by the counterparty in such system in accordance with its rules and procedures and within its established deadlines (European time). The relevant European international clearing system will, if the transaction meets its settlement requirements, deliver instructions to its U.S. depository to take action to effect final settlement on its behalf by delivering or receiving the notes in DTC, and making or receiving payment in accordance with normal procedures for same-day funds settlement applicable to DTC. Clearstream participants and Euroclear participants may not deliver instructions directly to DTC.

Because of time-zone differences, credits of the notes received in Clearstream, Luxembourg or Euroclear as a result of a transaction with a DTC participant will be made during subsequent securities settlement processing and will be credited the business day following the DTC settlement date. Such credits or any transactions in the notes settled during such processing will be reported to the relevant Euroclear or Clearstream participants on such business day. Cash received in Clearstream, Luxembourg or Euroclear as a result of sales of the notes by or through a Clearstream participant or a Euroclear participant to a DTC participant will be received with value on the DTC settlement date but will be available in the relevant Clearstream, Luxembourg or Euroclear cash account only as of the business day following settlement in DTC.

Although DTC, Clearstream, Luxembourg and Euroclear have agreed to the foregoing procedures in order to facilitate transfers of the notes among participants of DTC, Clearstream, Luxembourg and Euroclear, they are under no obligation to perform or continue to perform such procedures and such procedures may be discontinued at any time.

Table of Contents

MATERIAL U.S. FEDERAL INCOME TAX CONSEQUENCES

General

The following is a general summary of the material U.S. federal income tax consequences of the acquisition, ownership and disposition of the notes applicable to U.S. and non-U.S. beneficial owners who acquire such notes pursuant to this offering. This summary is based on the Internal Revenue Code of 1986, as amended, which we refer to as the Code, U.S. Treasury regulations promulgated thereunder, judicial opinions, published positions of the Internal Revenue Service (the IRS) and other applicable authorities, all of which are subject to change (possibly with retroactive effect).

This summary is for general information only and does not address all aspects of U.S. federal income taxation that may be relevant to a particular investor in light of that investor's individual circumstances, nor does it address the effects of any state, local or non-U.S. tax laws or any U.S. federal estate, gift, generation-skipping transfer or alternative minimum tax considerations. This discussion deals only with notes held as capital assets, within the meaning of Section 1221 of the Code, and does not purport to be applicable to holders subject to special rules, such as banks, financial institutions, insurance companies, tax-exempt entities, dealers in securities or currencies, traders in securities that elect the mark-to-market method of accounting for their securities holdings, persons subject to the alternative minimum tax, entities classified as partnerships, controlled foreign corporations or passive foreign investment companies for U.S. federal income tax purposes, pass-through entities, certain former citizens or long-term residents of the United States subject to tax as expatriates, persons holding the notes through a hybrid entity, or persons holding the notes as a hedge against currency risks, as a position in a straddle or as part of a wash sale, hedging, conversion, constructive sale, or integrated transaction for tax purposes.

If a partnership or an entity treated as a partnership for U.S. federal income tax purposes holds the notes, the tax treatment of a partner in the partnership or an equity interest owner of such other entity will generally depend upon the status of the person and the activities of the partnership or other entity treated as a partnership. Thus, persons who are partners in a partnership or equity interest owners of another entity treated as a partnership holding any of the notes should consult their own tax advisors. We have not sought any ruling from the IRS with respect to the statements made and the conclusions reached in this discussion and there can be no assurance that the IRS will agree with such statements and conclusions.

Under certain circumstances, we will be discharged from any and all obligations in respect of the indenture. Such discharge may be treated as a taxable exchange for U.S. federal income tax purposes. Holders should consult their own tax advisors regarding the U.S. federal, state, and local tax consequences of such a discharge.

THIS SUMMARY OF U.S. FEDERAL INCOME TAX ISSUES IS FOR GENERAL INFORMATION ONLY AND IS NOT INTENDED TO CONSTITUTE A COMPLETE DESCRIPTION OF ALL TAX CONSEQUENCES FOR U.S. AND NON-U.S. HOLDERS RELATING TO THE PURCHASE, OWNERSHIP AND DISPOSITION OF THE NOTES. PROSPECTIVE HOLDERS SHOULD CONSULT WITH THEIR TAX ADVISORS REGARDING THE TAX CONSEQUENCES TO THEM OF THE PURCHASE, OWNERSHIP AND DISPOSITION OF THE NOTES, INCLUDING THE APPLICATION AND EFFECT OF ANY STATE, LOCAL, FOREIGN INCOME, ESTATE AND OTHER TAX LAWS.

U.S. Holder of the Notes

As used in this discussion, the term U.S. holder means a holder that is a beneficial owner of a note that is, for U.S. federal income tax purposes:

an individual who is a citizen or resident of the United States;

Table of Contents

a corporation (or any other entity treated as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia (and certain non-U.S. entities taxed as U.S. corporations under specialized sections of the Code);

an estate, the income of which is subject to U.S. federal income taxation regardless of its source; or

a trust, if it (1) is subject to the primary supervision of a court within the United States and one or more U.S. persons have authority to control all substantial decisions of the trust or (2) has a valid election in effect under applicable U.S. Treasury regulations to be treated as a U.S. person.

Interest on the Notes. It is expected, and this discussion assumes, that the notes will be issued with no more than a de minimis amount of original issue discount for U.S. federal tax purposes. Accordingly, a U.S. holder will generally be required to recognize as ordinary income any interest paid or accrued on the notes in accordance with its regular method of accounting for U.S. federal income tax purposes.

In certain circumstances, we may pay amounts on the notes that are in excess of the stated interest on or principal of the notes. We intend to take the position that the possibility that any such payment will be made is deemed not to occur under applicable U.S. Treasury regulations. Therefore, such possibility will not affect the timing or amount of interest income that you recognize, as discussed above, unless and until any such excess payment is made. If we do pay amounts on the notes that are in excess of the stated interest on or principal of the notes, you should consult your own tax advisor about the tax treatment of such amounts.

Disposition of Notes. Upon the sale, exchange, redemption, retirement or other disposition of a note, a U.S. holder generally will recognize taxable gain or loss equal to the difference between the amount realized on the sale, exchange, redemption, retirement or other disposition (except to the extent of accrued but unpaid interest, which will be taxable as ordinary income) and such holder's adjusted tax basis in the notes. Any such gain or loss will be capital gain or loss, and will be long-term capital gain or loss if a U.S. holder has held the note for more than one year. Long-term capital gains of noncorporate U.S. holders are generally subject to tax at preferential rates. In addition, for taxable years beginning after December 31, 2012, a 3.8% Medicare tax will be imposed on interest income and capital gains (other than on property held in a trade or business) realized by certain noncorporate taxpayers whose income exceeds certain thresholds. The deductibility of capital losses is subject to limitations.

Information Reporting and Backup Withholding. Information reporting requirements generally apply in connection with payments on the notes to, and the proceeds from a sale, exchange or other disposition of the notes by, noncorporate U.S. holders. Under the Code and applicable U.S. Treasury regulations, a U.S. holder may be subject to backup withholding (currently at a rate of 28%) with respect to any payments on the notes, or the proceeds of a sale, exchange or other disposition of the notes, unless such U.S. holder (a) comes within certain exempt categories and, when required, demonstrates this fact in the manner required, or (b) within a reasonable period of time, provides a correct taxpayer identification number, certifies that it is not subject to backup withholding and otherwise complies with applicable requirements of the backup withholding rules. The amount of any backup withholding from a payment to a U.S. holder will generally be allowed as a credit against such U.S. holder's U.S. federal income tax liability and may entitle such U.S. holder to a refund, provided that the required information is timely furnished to the IRS.

Non-U.S. Holder of the Notes

As used in this discussion, the term non-U.S. holder means a beneficial owner of a note that is not, for U.S. federal income tax purposes, a U.S. holder as defined above, other than an entity or arrangement that is treated as a partnership for U.S. federal income tax purposes.

Table of Contents

Interest on the Notes. Subject to the discussion of backup withholding below, U.S. federal withholding tax will not apply to any payment of interest on a note to a non-U.S. holder if the interest qualifies for the portfolio interest exemption. This will be the case provided that the non-U.S. holder:

does not actually or constructively own 10% or more of the total combined voting power of all classes of our stock entitled to vote;

is not a controlled foreign corporation that is related directly or constructively to us through stock ownership;

is not a bank that acquired the notes in consideration for an extension of credit made pursuant to a loan agreement entered into in the ordinary course of its trade or business; and

either (a) provides its name and address, and certifies, under penalties of perjury, that it is not a U.S. person, which certification may be made on an IRS Form W-8BEN or other appropriate form, or (b) holds its notes through various foreign intermediaries and satisfies the certification requirements of applicable U.S. Treasury regulations.

Special certification and other rules apply to certain non-U.S. holders that are entities rather than individuals, particularly entities treated as partnerships for U.S. federal income tax purposes and certain other flow through entities, and to non-U.S. holders acting as (or holding notes through) intermediaries.

If the portfolio interest exemption does not apply, payments of interest will be subject to U.S. federal withholding tax at a 30% tax rate, unless the non-U.S. holder provides us with a properly executed: (1) IRS Form W-8BEN, or successor form, claiming an exemption from or reduction in withholding under the benefit of a tax treaty or (2) IRS Form W-8ECI, or successor form, stating that interest paid on the note is not subject to withholding tax because it is effectively connected with its conduct of a trade or business in the United States.

If a non-U.S. holder is engaged in a trade or business in the United States and interest on a note is effectively connected with the conduct of that trade or business (and, if an income tax treaty applies, is attributable to a U.S. permanent establishment maintained by the non-U.S. holder), such holder (although exempt from U.S. federal withholding tax at the 30% tax rate) will be subject to U.S. federal income tax on that interest on a net income basis in the same manner as if the holder were a U.S. holder. In addition, if such holder is a foreign corporation, it may be subject to a branch profits tax equal to 30% of its dividend equivalent amount, as determined under the Code, for the taxable year. However, any branch profits tax that would otherwise apply may not apply, or may apply at a reduced rate, under an applicable income tax treaty.

Disposition of Notes. Subject to the discussion of backup withholding below, any gain realized on the disposition of a note by a non-U.S. holder generally will not be subject to U.S. federal income tax unless: (i) that gain is effectively connected with the conduct of a trade or business in the United States by the holder (and, if an income tax treaty applies, is attributable to a U.S. permanent establishment maintained by the non-U.S. holder), or (ii) the holder is an individual who is present in the United States for 183 days or more in the taxable year of that disposition and other conditions are met in which case such holder will generally be subject to a U.S. federal income tax of 30% (or, if applicable, a lower treaty rate) on such gain. If (i) applies and the non-U.S. holder is a corporation, such holder may be subject to the branch profits tax referred to above, unless the holder qualifies for a lower rate or an exemption from such branch profits tax under an applicable income tax treaty.

Backup Withholding, Information Reporting and Other Reporting Requirements. In general, backup withholding will not apply to a payment of interest on a note to a non-U.S. holder, or to proceeds from the disposition of a note by a non-U.S. holder, in each case, if the holder certifies under penalties of perjury that it is a non-U.S. holder and neither we nor our paying agent has actual knowledge to the contrary. Any amounts withheld under the backup withholding rules will be allowed as a credit against the non-U.S. holder's U.S. federal income tax liability and may entitle the non-U.S. holder to a refund, provided the required information is timely furnished to the IRS.

Table of Contents

Information reporting and backup withholding generally are not required with respect to the amount of any proceeds from the sale or other disposition of our notes by a non-U.S. holder outside the United States through a foreign office of a foreign broker that does not have certain specified connections to the United States unless the proceeds are transferred to an account maintained by the holder in the United States, the payment of proceeds or the confirmation of the sale is mailed to the holder at a United States address or the sale has some other specified connection to the United States. However, if a non-U.S. holder sells or otherwise disposes of our notes through a U.S. broker or the U.S. offices of a foreign broker, the broker will generally be required to report the amount of proceeds paid to the non-U.S. holder to the IRS and also to backup withhold on that amount unless such non-U.S. holder provides appropriate certification to the broker of its status as a non-U.S. person or otherwise establishes an exemption (and the payor does not have actual knowledge or reason to know that such holder is a U.S. person as defined under the Code). Information reporting will also apply if a non-U.S. holder sells our notes through a foreign broker which derives more than a specified percentage of its income from U.S. sources or having certain other connections to the United States, unless such broker has documentary evidence in its records that such non-U.S. holder is a non-U.S. person and certain other conditions are met, or such non-U.S. holder otherwise establishes an exemption (and the payor does not have actual knowledge or reason to know that such holder is a U.S. person as defined under the Code).

Backup withholding is not an additional income tax. Any amounts withheld under the backup withholding rules from a payment to a non-U.S. holder generally can be credited against the non-U.S. holder's U.S. federal income tax liability, if any, or refunded, provided that the required information is furnished to the IRS in a timely manner. Non-U.S. holders should consult their tax advisors regarding the application of the information reporting and backup withholding rules to them.

THE FOREGOING SUMMARY DOES NOT DISCUSS ALL ASPECTS OF U.S. FEDERAL INCOME TAXATION THAT MAY BE RELEVANT TO INVESTORS IN LIGHT OF THEIR PARTICULAR CIRCUMSTANCES AND INCOME TAX SITUATION. INVESTORS SHOULD CONSULT THEIR OWN TAX ADVISORS AS TO THE SPECIFIC TAX CONSEQUENCES THAT WOULD RESULT FROM THEIR PURCHASE, OWNERSHIP AND DISPOSITION OF THE NOTES, INCLUDING THE APPLICATION AND EFFECT OF STATE, LOCAL AND OTHER TAX LAWS AND THE POSSIBLE EFFECTS OF CHANGES IN FEDERAL OR OTHER TAX LAWS.

Table of Contents

CERTAIN ERISA CONSIDERATIONS

Each person considering the use of plan assets of a pension, profit-sharing or other employee benefit plan, individual retirement account, Keogh plan or other retirement plan, account or arrangement, or a plan, to acquire or hold the notes should consider whether an investment in the notes would be consistent with the documents and instruments governing the plan and with its fiduciary duties, including satisfaction of applicable prudence and diversification requirements, and whether the investment would involve a prohibited transaction under Section 406 of the Employee Retirement Income Security Act of 1974, as amended (ERISA) or Section 4975 of the Code, or under any other applicable federal, state, local or non-U.S. or other laws, rules or regulations that are similar to the provisions of ERISA or Section 4975 of the Code, or Similar Laws.

Section 406 of ERISA and Section 4975 of the Code prohibit plans subject to Title I of ERISA and/or Section 4975 of the Code, including entities such as collective investment funds, partnerships and separate accounts or insurance company pooled separate accounts or insurance company general accounts whose underlying assets include the assets of such plans, or collectively, Plans, from engaging in certain transactions involving Plan assets with persons who are parties in interest under ERISA or disqualified persons under the Code with respect to the Plan. A violation of these prohibited transaction rules may result in civil penalties or other liabilities under ERISA, loss of tax-exempt status and/or an excise tax under Section 4975 of the Code for those persons, unless exemptive relief is available under an applicable statutory, regulatory or administrative exemption. Certain plans including those that are governmental plans (as defined in Section 3(32) of ERISA), certain church plans (as defined in Section 3(33) of ERISA) and foreign plans (as described in Section 4(b)(4) of ERISA) are not subject to the requirements of ERISA or Section 4975 of the Code, but may be subject to similar provisions under Similar Laws.

The acquisition or holding of the notes by or on behalf of a Plan with respect to which we or certain of our affiliates are or become a party in interest or a disqualified person may constitute or result in prohibited transactions under ERISA or Section 4975 of the Code, unless the notes are acquired or held pursuant to and in accordance with an applicable exemption.

Certain prohibited transaction class exemptions (PTCEs) issued by the U.S. Department of Labor may provide exemptive relief for direct or indirect prohibited transactions resulting from the purchase or holding of the notes. Those class exemptions are PTCE 96-23 (for certain transactions determined by in-house asset managers), PTCE 95-60 (for certain transactions involving insurance company general accounts), PTCE 91-38 (for certain transactions involving bank collective investment funds), PTCE 90-1 (for certain transactions involving insurance company separate accounts) and PTCE 84-14 (for certain transactions determined by independent qualified asset managers). In addition, ERISA Section 408(b)(17) and Section 4975(d)(20) of the Code may provide a limited exemption for the purchase and sale of the notes and related lending transactions, provided that neither the issuer of the notes nor any of its affiliates have or exercise any discretionary authority or control or render any investment advice with respect to the assets of the Plan involved in the transaction and provided further that the Plan pays no more, and receives no less, than adequate consideration in connection with the transaction (the so-called service provider exemption). There can be no assurance that any of these statutory or class exemptions will be available with respect to transactions involving the notes.

Accordingly, the notes may not be purchased or held by any Plan, any entity whose underlying assets include Plan assets by reason of any Plan s investment in the entity or any person investing Plan assets of any Plan, unless (i) such purchase or holding is eligible for the exemptive relief available under PTCE 96-23, 95-60, 91-38, 90-1 or 84-14 or the service-provider exemption or there is some other basis on which the purchase and holding of the notes will not constitute a non-exempt prohibited transaction under ERISA or Section 4975 of the Code.

Each purchaser or holder of the notes or any interest therein, and each person making the decision to purchase or hold the notes on behalf of any such purchaser or holder, will be deemed to have represented and

Table of Contents

warranted in both its individual capacity and its representative capacity (if any), that on each day from the date on which the purchaser or holder acquires its interest in the notes to the date on which the purchaser disposes of its interest in the notes, that such purchaser and holder, by its purchase or holding of the notes or any interest therein, that (i) it is not a Plan and its purchase and holding of the notes is not made on behalf of or with Plan assets of any Plan, or (ii) if it is a Plan or its purchase and holding of the notes is made on behalf of or with Plan assets of a Plan, then (A) its purchase and holding of the notes will not result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code and (B) neither LNC nor any of our affiliates is acting as a fiduciary (within the meaning of Section 3(21) of ERISA) in connection with the purchase or holding of the notes and has not provided any advice that has formed or may form a basis for any investment decision concerning the purchase or holding of the notes. Each purchaser and holder of the notes or any interest therein, and each person making the decision to purchase or hold the notes on behalf of any such purchaser or holder, on behalf of any governmental plan, church plan or foreign plan, will be deemed to have represented and warranted in both its individual capacity and its representative capacity (if any), by its purchase or holding of the notes or any interest therein, that such purchase and holding does not violate any applicable Similar Laws.

Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is important that fiduciaries or other persons considering purchasing the notes on behalf of or with Plan assets of any Plan consult with their counsel regarding the relevant provisions of ERISA, the Code and any Similar Laws and the availability of exemptive relief under any of the PTCEs listed above, the service provider exemption or other applicable exemption or basis on which the acquisition and holding will not constitute a non-exempt prohibited transaction under ERISA, Section 4975 of the Code or a violation of any applicable Similar Laws.

Each purchaser and holder of the notes has exclusive responsibility for ensuring that its purchase, holding and subsequent disposition of the notes does not violate the fiduciary or prohibited transaction rules of ERISA, the Code or any applicable Similar Laws. The sale of any notes to any Plan is in no respect a representation by us or any of our affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by Plans generally or any particular Plan, or that such an investment is appropriate for Plans generally or any particular Plan.

Table of Contents**UNDERWRITING**

Under the terms and subject to the conditions contained in an underwriting agreement dated March 26, 2012, Credit Suisse Securities (USA) LLC and Morgan Stanley & Co. LLC, have severally agreed to purchase, and we have agreed to sell to them, severally, the respective aggregate principal amount listed opposite their names below.

Underwriter	Principal Amount of Senior Notes
Credit Suisse Securities (USA) LLC	\$ 150,000,000
Morgan Stanley & Co. LLC	150,000,000
 Total	 \$ 300,000,000

Under the terms and conditions of the underwriting agreement, if the underwriters purchase any of the notes, then the underwriters are committed to purchase all of the notes. The underwriting agreement also provides that if an underwriter defaults, the purchase commitment of the non-defaulting underwriter may be increased or the offering may be terminated.

Notes sold by the underwriters to the public will initially be offered at the initial public offering price set forth on the cover of this prospectus supplement. Any notes sold by the underwriters to securities dealers may be sold at a discount from the initial public offering price of up to 0.40% of the principal amount of the notes. Any such securities dealers may resell any notes to certain other brokers or dealers at a discount from the initial public offering price of up to 0.25% of the principal amount of the notes. If all the notes are not sold at the initial offering price, the underwriters may change the offering price and the other selling terms. The offering of the notes by the underwriters is subject to receipt and acceptance and subject to the underwriters' right to reject any order in whole or in part.

The aggregate proceeds to us are set forth on the cover page hereof before deducting our expenses in offering the notes. We estimate that the total expenses of this offering, including registration and filing fees, printing fees, rating agency, trustee and legal and accounting fees, but excluding underwriting discounts and commissions, will be approximately \$1 million.

We have agreed to indemnify the several underwriters against certain liabilities, including liabilities under the Securities Act of 1933, as amended, or to contribute to payments the underwriters may be required to make in respect thereof.

The notes are offered for sale only in those jurisdictions in the United States where it is legal to make such offers. The notes are a new issue of securities with no established trading market. We do not intend to apply for the notes to be listed on any national securities exchange or to arrange for the notes to be quoted on any quotation system. We have been advised by the underwriters that they intend to make a market in the notes but they are not obligated to do so and may discontinue market-making at any time without notice. No assurance can be given as to the liquidity of, or the trading market for, the notes.

In connection with the offering, the underwriters may purchase and sell notes in the open market. These transactions may include short sales, stabilizing transactions and purchases to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of notes than they are required to purchase in the offering. Stabilizing transactions consist of certain bids or purchases made for the purpose of preventing or retarding a decline in the market price of the notes while the offering is in progress.

The underwriters may impose a penalty bid. This occurs when an underwriter repays to the other underwriter a portion of the underwriting discount received by it because such underwriter has repurchased notes sold by or for the account of that underwriter in stabilizing or short covering transactions.

Table of Contents

These activities, as well as other purchases by the underwriters for their own account, may stabilize, maintain or otherwise affect the market price of the notes. As a result, the price of the notes may be higher than the price that otherwise might exist in the open market. If these activities are commenced, they may be discontinued by the underwriters at any time. These transactions may be effected in the over-the-counter market or otherwise.

Neither we nor any of the underwriters make any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of the notes. In addition, neither we nor any of the underwriters make any representation that the underwriters will engage in these transactions or that these transactions, once commenced, will not be discontinued without notice.

The underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, financing and brokerage activities.

From time to time, in the ordinary course of their business, certain of the underwriters and their affiliates have provided, and may in the future provide, various financial advisory, investment banking, commercial banking or investment management services to us and our affiliates, for which they have received and may continue to receive customary fees and commissions. In particular, affiliates of Credit Suisse Securities (USA) LLC and Morgan Stanley & Co. LLC act as lenders under our \$2 billion credit facility, affiliates of Credit Suisse Securities (USA) LLC are lenders under an approximately \$925 million letter of credit and affiliates of Morgan Stanley & Co. LLC are parties to a debt swap agreement. In addition, the underwriters and their affiliates may, from time to time, engage in transactions with or perform services for us in the ordinary course of business, including acting as distributors of various life, annuity, defined contribution and investment products of our subsidiaries. From time to time, certain of the underwriters and their affiliates may effect transactions for their own account or the account of customers, and hold on behalf of themselves or their customers, long or short positions in our debt or equity securities or loans, and may do so in the future.

In the ordinary course of their various business activities, the underwriters and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers, and such investment and securities activities may involve securities and/or instruments of the issuer. The underwriters and their respective affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

Notice to Prospective Investors in the European Economic Area

In relation to each Member State of the European Economic Area which has implemented the Prospectus Directive, each, a Relevant Member State, from and including the date on which the European Union Prospectus Directive, or the EU Prospectus Directive, is implemented in that Relevant Member State, or the Relevant Implementation Date, an offer of notes described in this prospectus supplement may not be made to the public in that Relevant Member State prior to the publication of a prospectus in relation to the notes which has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State, all in accordance with the EU Prospectus Directive, except that it may, with effect from and including the Relevant Implementation Date, make an offer of notes to the public in that Relevant Member State at any time:

to legal entities which are authorized or regulated to operate in the financial markets or, if not so authorized or regulated, whose corporate purpose is solely to invest in securities;

Table of Contents

to any legal entity which has two or more of (1) an average of at least 250 employees during the last financial year; (2) a total balance sheet of more than 43,000,000 and (3) an annual net turnover of more than 50,000,000, as shown in its last annual or consolidated accounts;

to fewer than 100 natural or legal persons (other than qualified investors as defined in the EU Prospectus Directive) subject to obtaining the prior consent of the book-running managers for any such offer; or

in any other circumstances which do not require the publication by the issuer of a prospectus pursuant to Article 3 of the Prospectus Directive.

For the purposes of this provision, the expression an offer of notes to the public in relation to any notes in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the notes to be offered so as to enable an investor to decide to purchase or subscribe for the notes, as the same may be varied in that Relevant Member State by any measure implementing the EU Prospectus Directive in that Relevant Member State, and the expression EU Prospectus Directive means Directive 2003/71/EC and includes any relevant implementing measure in each Relevant Member State.

The sellers of the notes have not authorized and do not authorize the making of any offer of notes through any financial intermediary on their behalf, other than offers made by the underwriters with a view to the final placement of the notes as contemplated in this prospectus supplement. Accordingly, no purchaser of the notes, other than the underwriters, is authorized to make any further offer of the notes on behalf of the sellers or the underwriters.

Notice to Prospective Investors in the United Kingdom

This prospectus supplement and the accompanying base prospectus are only being distributed to and are only directed at (i) persons who are outside the United Kingdom or (ii) to investment professionals falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, or the Order, or (iii) high net worth entities, and other persons to whom it may lawfully be communicated, falling within Article 49(2)(a) to (d) of the Order, all such persons together being referred to as relevant persons. The notes are only available to, and any invitation, offer or agreement to subscribe, purchase or otherwise acquire such notes will be engaged in only with, relevant persons. Any person who is not a relevant person should not act or rely on this prospectus supplement and the accompanying base prospectus or any of their contents.

Notice to Prospective Investors in Hong Kong

The notes may not be offered or sold by means of any document other than (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies Ordinance (Cap.32, Laws of Hong Kong), or (ii) to professional investors within the meaning of the Securities and Futures Ordinance (Cap.571, Laws of Hong Kong) and any rules made thereunder, or (iii) in other circumstances which do not result in the document being a prospectus within the meaning of the Companies Ordinance (Cap.32, Laws of Hong Kong), and no advertisement, invitation or document relating to the notes may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the laws of Hong Kong) other than with respect to notes which are or are intended to be disposed of only to persons outside Hong Kong or only to professional investors within the meaning of the Securities and Futures Ordinance (Cap.571, Laws of Hong Kong) and any rules made thereunder.

Notice to Prospective Investors in Japan

The notes have not been and will not be registered under the Financial Instruments and Exchange Law of Japan (the Financial Instruments and Exchange Law) and each underwriter has agreed that it will not offer or sell

Table of Contents

any notes, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan (which term as used herein means any person resident in Japan, including any corporation or other entity organized under the laws of Japan), or to others for re-offering or resale, directly or indirectly, in Japan or to a resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the Financial Instruments and Exchange Law and any other applicable laws, regulations and ministerial guidelines of Japan.

Notice to Prospective Investors in Singapore

Where the notes are subscribed or purchased under Section 275 by a relevant person which is: (a) a corporation (which is not an accredited investor) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an accredited investor, shares, debentures and units of shares and debentures of that corporation or the beneficiaries' rights and interest in that trust shall not be transferable for 6 months after that corporation or that trust has acquired the notes under Section 275 except: (1) to an institutional investor under Section 274 of the SFA or to a relevant person, or any person pursuant to Section 275(1A), and in accordance with the conditions, specified in Section 275 of the SFA; (2) where no consideration is given for the transfer; or (3) by operation of law.

VALIDITY OF NOTES

The validity of the notes will be passed upon for us by Wachtell, Lipton, Rosen & Katz and for the underwriters by Sullivan & Cromwell LLP. Wachtell, Lipton, Rosen & Katz and Sullivan & Cromwell LLP will rely upon the opinion of Marcie Weber, Vice President and Senior Counsel of LNC, as to matters of Indiana law. As of March 26, 2012, Ms. Weber beneficially owned approximately 3,554 shares of our common stock, including options exercisable within sixty days of March 26, 2012.

EXPERTS

The consolidated financial statements of Lincoln National Corporation appearing in its Annual Report on Form 10-K for the year ended December 31, 2011 (including schedules appearing therein) and the effectiveness of Lincoln National Corporation's internal control over financial reporting as of December 31, 2011 have been audited by Ernst & Young LLP, independent registered public accounting firm, as set forth in their reports thereon included therein, and incorporated herein by reference. Such consolidated financial statements (and schedules) are incorporated herein by reference in reliance upon such reports given on the authority of such firm as experts in accounting and auditing.

fully and unconditionally guaranteed, as described herein,

by Lincoln National Corporation

We will provide you with more specific terms of these securities in supplements to this prospectus. The securities we may offer may be convertible into or exercisable or exchangeable for our other securities.

By this prospectus, we or the selling securityholders may offer, from time to time, the securities described in this prospectus separately or together in any combination. Lincoln National Capital VII, Lincoln National Capital VIII and Lincoln National Capital IX are Delaware statutory trusts which may offer from time to time trust preferred securities representing preferred undivided beneficial interests in the assets of the applicable trust.

We, the selling securityholders or the trusts may offer and sell these securities to or through one or more underwriters, dealers and agents, or directly to purchasers, on a continuous or delayed basis, at prices and on other terms to be determined at the time of offering. We, the selling securityholders or the trusts reserve the sole right to accept, and together with any agents, dealers and underwriters, reserve the right to reject, in

whole or in part, any proposed purchase of securities. If any agents, dealers or underwriters are involved in the sale of any securities, the applicable prospectus supplement will set forth any applicable commissions or discounts. The net proceeds to us, the selling securityholders or the trusts from the sale of securities also will be set forth in the applicable prospectus supplement.

Unless otherwise stated in a prospectus supplement, none of these securities will be listed on any securities exchange. Our common stock is listed on the New York Stock Exchange under the symbol LNC.

Before you invest, you should carefully read this prospectus, any applicable prospectus supplement and information described under the headings Where You Can Find More Information and Documents Incorporated by Reference.

Investing in our securities involves risks. See Risk Factors beginning on page 6 of this prospectus.

For North Carolina Residents: The Commissioner of Insurance for the State of North Carolina has not approved or disapproved these securities nor has the Commissioner ruled upon the accuracy or adequacy of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

The date of this prospectus is January 9, 2012.

ABOUT THIS PROSPECTUS

This prospectus is one part of a shelf registration statement that we have filed on Form S-3 with the Securities and Exchange Commission, or the SEC, under the Securities Act of 1933, as amended, or the Securities Act. Under the shelf registration statement, we, the selling security holders, and the trusts are registering an unspecified amount of each class of the securities described in this prospectus, as applicable, and we and the selling security holders may sell, from time to time, in one or more offerings, any combination of the securities described in this prospectus and the trusts may sell the trust preferred securities. In addition, we or the trusts or any of their respective affiliates may use this prospectus and the applicable prospectus supplement in a remarketing or other sale transaction involving the securities after their initial sale.

This prospectus provides you with a general description of the securities we or the trusts may offer. Each time we, the selling security holders, or the trusts sell securities, we, the selling security holders, or the trusts will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add to, update, supplement or clarify information contained in this prospectus. This prospectus does not contain all of the information set forth in the registration statement and the exhibits to the registration statement. For further information concerning us, the trusts and the securities, you should read the entire registration statement and the additional information described under Documents Incorporated by Reference below.

You should rely only on the information contained or incorporated by reference in this prospectus. We have not, and any underwriter, dealer, agent or remarketing firm has not, authorized any person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not, and any underwriter, dealer, agent or remarketing firm is not, making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted or in which the person making such offer or solicitation is not qualified to do so or to any person to whom it is unlawful to make such offer or solicitation. You should assume that the information appearing in this prospectus is accurate as of the date on the front cover. Our business, financial condition, results of operations and prospects may have changed since that date.

Unless otherwise indicated, or the context otherwise requires, all references in this prospectus to LNC, we, our, us, or similar terms refer to Lincoln National Corporation. Unless otherwise indicated, or the context otherwise requires, references in this prospectus to the trusts are to Lincoln National Capital VII, Lincoln National Capital VIII and Lincoln National Capital IX, collectively, and, references to a trust are to Lincoln National Capital VII, Lincoln National Capital VIII and Lincoln National Capital IX, individually.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information and documents with the SEC. You may read and copy any document we file with the SEC:

in the public reference room maintained by the SEC in Washington, D.C. (100 F Street, N.E., Room 1580, Washington, D.C. 20549). Copies of such materials can be obtained from the SEC's public reference section at prescribed rates. You may obtain information on the operation of the public reference room by calling the SEC at (800) SEC-0330, or

on the SEC website located at www.sec.gov.

This Prospectus is part of a Registration Statement filed on Form S-3 with the SEC under the Securities Act. This prospectus does not contain all of the information set forth in the Registration Statement and the exhibits and schedules to the Registration Statement. For further information concerning us, the trusts and the securities, you should read the entire Registration Statement and the additional information described under Documents Incorporated by Reference below. The Registration Statement has been filed electronically and may be obtained in any manner listed above. Any statements contained in this prospectus concerning the provisions of any document are not necessarily complete, and,

Table of Contents

in each instance, reference is made to the copy of such document filed as an exhibit to the Registration Statement or otherwise filed with the SEC. Each such statement is qualified in its entirety by such reference.

Information about us is also available on our website at <http://www.lincolnfinancial.com>. This URL and the SEC's URL above are intended to be inactive textual references only. Information on our or the SEC's website is not a part of this prospectus.

DOCUMENTS INCORPORATED BY REFERENCE

The SEC's rules allow us to incorporate by reference information into this prospectus. This means that we can disclose important information to you by referring you to another document. Any information referred to in this way is considered part of this prospectus from the date we file that document. Any reports filed by us with the SEC after the date of this prospectus and before the date that the offering of the securities by means of this prospectus is terminated will automatically update and, where applicable, supersede any information contained in this prospectus or incorporated by reference in this prospectus.

We incorporate by reference into this prospectus the following documents or information filed (File No. 1-6028) with the SEC (other than, in each case, information deemed to have been furnished or not filed in accordance with the SEC rules):

Those portions of our Proxy Statement for our 2011 Annual Meeting of Shareholders which were also incorporated by reference into Part III of our Annual Report on Form 10-K for the fiscal year ended December 31, 2010;

Our Annual Report on Form 10-K for the fiscal year ended December 31, 2010;

Our Quarterly Reports on Form 10-Q for the quarters ended March 31, June 30, and September 30, 2011; and

Our Current Reports on Form 8-K filed with the SEC on May 31, June 15, June 24, as amended on June 28, and November 15, 2011, except that Items 2.02 and 7.01 in the Current Report on Form 8-K dated November 18, 2011 shall not be incorporated herein by reference; and

The description of our Common Stock contained in Form 10 filed with the SEC on April 28, 1969, including any amendments or reports filed for the purpose of updating that description.

Each document filed subsequent to the date of this Registration Statement pursuant to Sections 13(a), 13(c), 14 and 15(d) of the Securities Exchange Act of 1934, as amended, prior to the filing of a post-effective amendment which indicates that all securities offered have been sold or which deregisters all securities then remaining unsold, shall be deemed to be incorporated by reference in this Registration Statement and to be a part hereof from the date of the filing of such documents. Any statement contained in a document incorporated or deemed to be incorporated herein by reference shall be deemed to be modified or superseded for purposes of this Registration Statement to the extent that a statement contained herein (or in any other subsequently filed document which also is or is deemed to be incorporated by reference herein) modifies or supersedes such statement. Any such statement so modified or superseded shall not be deemed, except as so modified or superseded, to constitute part of this Registration Statement.

We will provide without charge to each person to whom this prospectus is delivered, upon the written or oral request of such person, a copy of the documents incorporated by reference as described above (other than exhibits to such documents unless such exhibits are specifically incorporated by reference into such documents). Please direct your oral or written request to:

Table of Contents

LNC

LNC is a holding company which operates multiple insurance and retirement businesses through subsidiary companies. Through our business segments, we sell a wide range of wealth protection, accumulation and retirement income products and solutions. These products include fixed and indexed annuities, variable annuities, universal life insurance (UL), variable universal life insurance, linked-benefit UL, term life insurance, employer-sponsored retirement plan services and group life, disability and dental. LNC was organized under the laws of the state of Indiana in 1968. We currently maintain our principal executive offices at 150 N. Radnor Chester Road, Radnor, Pennsylvania 19087, and our telephone number is (484) 583-1400. Lincoln Financial Group is the marketing name for LNC and its subsidiary companies. As of September 30, 2011, LNC had consolidated assets of \$197.7 billion and consolidated stockholders' equity of \$14.9 billion. For the year ended December 31, 2010, LNC had total revenue of \$10.4 billion and net income of \$980 million.

We provide products and services and report results through four business segments, as follows:

Annuities

Defined Contribution

Life Insurance

Group Protection

We also have Other Operations, which includes the financial data for operations that are not directly related to the business segments.

THE LINCOLN TRUSTS

We created Lincoln National Capital VII, Lincoln National Capital VIII and Lincoln National Capital IX. Each trust is a statutory trust formed under Delaware law pursuant to a trust agreement executed by LNC, as sponsor of the trust, and the Delaware trustee described below, and the filing of a certificate of trust with the Delaware Secretary of State. We will execute amended and restated trust agreements for the trusts substantially in the form filed as an exhibit to the registration statement that includes this prospectus. We refer to the trust agreements, each as amended and restated, in this prospectus as the trust agreements. These trust agreements will state the terms and conditions for the trusts to issue and sell their trust preferred securities and common securities, which we refer to collectively in this prospectus as the trust securities. Each trust agreement will be qualified as an indenture under the Trust Indenture Act of 1939.

Each trust exists for the exclusive purposes of:

issuing and selling its trust securities;

using the proceeds from the sale of its trust securities to acquire a series of corresponding junior subordinated debt securities issued by LNC, which we refer to as corresponding junior subordinated debt securities; and

engaging in only those other activities necessary, convenient or incidental to the above purposes.

Unless otherwise specified in the applicable prospectus supplement, each trust has a term of approximately 55 years, but may terminate earlier as provided in the applicable trust agreement. Each trust's business and affairs are conducted by its trustees, each appointed by LNC as holder of the trust's common securities. Unless otherwise specified in the applicable prospectus supplement, there are four trustees of each trust, which we collectively refer to as the issuer trustees, as follows:

Administrative Trustees: Two of the trustees, whom we refer to as administrative trustees, are persons who are employees or officers of or who are affiliated with LNC.

Table of Contents

Property, Guarantee and Indenture Trustee: The third trustee is The Bank of New York Mellon (as successor in interest to Bank One Trust Company, National Association), a financial institution that is unaffiliated with LNC, and which serves as the property trustee under the trust agreement. The Bank of New York Mellon (as successor in interest to Bank One Trust Company, National Association) also acts as the guarantee trustee under the guarantee agreement, and the indenture trustee under a junior subordinated indenture.

Delaware Trustee: The fourth trustee, BNY Mellon Trust of Delaware (as successor in interest to Bank One Trust Company, National Association), that is unaffiliated with LNC, serves as the Delaware trustee under the trust agreement.

LNC will hold directly or indirectly all of the common securities of each of the trusts. Unless otherwise indicated in the applicable prospectus supplement, the common securities will represent an aggregate liquidation amount equal to at least 3% of each trust's total capital. As the direct or indirect holder of the common securities of a trust, LNC will generally have the sole right to appoint, remove or replace the property trustee and/or the Delaware trustee for the trust. However, if a subordinated debt security event of default under the trust agreement for the trust has occurred and is continuing, the holders of a majority in liquidation preference of the related trust preferred securities will be entitled to appoint, remove or replace the property trustee and/or the Delaware trustee for the trust. In no event will the holders of the trust preferred securities have the right to vote to appoint, remove or replace the administrative trustees; such voting rights are vested exclusively in LNC, as the direct or indirect owner of the common securities of the trust. The duties and obligations of each issuer trustee are governed by the applicable trust agreement. LNC will pay all fees and expenses related to each trust and the offering of the trust preferred securities and will pay, directly or indirectly, all ongoing costs, expenses and liabilities of each trust.

The common securities of a trust owned directly or indirectly by LNC will rank equally, and payments will be made on such common securities proportionately with the trust preferred securities of the trust, except as provided below. Upon the occurrence and continuance of an event of default under a trust agreement resulting from a subordinated debt security event of default, periodic cash distributions (which we refer to as distributions) and payments upon liquidation, redemption or otherwise with respect to the trust securities of a trust must be paid or delivered to the holders of the trust preferred securities of that trust before the holders of the common securities of that trust. See Description of Securities We May Sell Trust Preferred Securities Subordination of Common Securities.

Except as otherwise provided in the applicable prospectus supplement:

each trust will sell its trust preferred securities to the public and its common securities to LNC;

concurrently with the issuance by a trust of its trust preferred securities, the trust will use the proceeds from these sales to buy a series of corresponding junior subordinated debt securities from LNC with the same financial terms as the trust preferred securities;

LNC will pay interest on the corresponding junior subordinated debt securities at the same rate and at the same times as the trust makes payments on the trust preferred securities. The trust will use the payments it receives on the corresponding subordinated debt securities to make the corresponding payments on the trust preferred securities;

LNC will, on a subordinated basis, fully and unconditionally guarantee the payment by the trust of the trust preferred securities to the extent described in this prospectus. We refer to this as the guarantee. Both the corresponding subordinated debt securities and the guarantee will be subordinated to LNC's existing and future senior indebtedness, and will effectively be subordinated to existing and future obligations of LNC's subsidiaries;

the corresponding junior subordinated debt securities will be the sole assets of each trust; and

payments under the corresponding junior subordinated debt securities and the related expense agreement with LNC will be the only revenue of each trust.

Table of Contents

LNC may redeem the corresponding subordinated debt securities (and cause the redemption of the trust securities) or may terminate each trust and cause the corresponding subordinated debt securities to be distributed to the holders of trust preferred securities in liquidation of their interests in such trust in certain circumstances. See Description of Securities We May Sell Trust Preferred Securities Liquidation Distribution Upon Termination.

The rights of the holders of trust preferred securities are described in the applicable trust agreement and the Delaware Statutory Trust Act. The principal executive office of each trust is located at 150 N. Radnor Chester Road, Radnor, Pennsylvania 19087, and its telephone number is (484) 583-1400.

RATIO OF EARNINGS TO FIXED CHARGES**Lincoln National Corporation and Subsidiaries****Historical Ratio of Earnings to Fixed Charges**

(dollars in millions)

(dollars in millions)	For the Nine Months Ended September 30,		For the Years Ended December 31,				
	2011	2010	2010	2009	2008	2007	2006
Income (loss) from continuing operations before taxes	\$ 1,050	\$ 982	\$ 1,234	\$ (521)	\$ (137)	\$ 1,675	\$ 1,631
Sub-total of fixed charges	232	227	307	292	303	325	242
Sub-total of adjusted income (loss)	1,282	1,209	1,541	(229)	166	2,000	1,873
Interest on annuities and financial products	1,860	1,873	2,496	2,512	2,532	2,519	2,260
Adjusted income (loss) base	\$ 3,142	\$ 3,082	\$ 4,037	\$ 2,283	\$ 2,698	\$ 4,519	\$ 4,133
Fixed Charges							
Interest and debt expense ⁽¹⁾	\$ 215	\$ 212	\$ 286	\$ 261	\$ 281	\$ 284	\$ 223
Interest expense related to uncertain tax positions	7	4	7	13	2	21	
Portion of rent expense representing interest	10	11	14	18	20	20	19
Sub-total of fixed charges excluding interest on annuities and financial products	232	227	307	292	303	325	242
Interest on annuities and financial products	1,860	1,873	2,496	2,512	2,532	2,519	2,260
Total fixed charges	\$ 2,092	\$ 2,100	\$ 2,803	\$ 2,804	\$ 2,835	\$ 2,844	\$ 2,502
Ratio of sub-total of adjusted income to sub-total of fixed charges excluding interest on annuities and financial products ⁽²⁾	5.53	5.33	5.02			6.15	7.74
Ratio of adjusted income base to total fixed charges ⁽²⁾	1.50	1.47	1.44			1.59	1.65

(1) Interest and debt expense for the years ended December 31, 2010, 2009 and 2006 excludes (i) a \$5 million loss, (ii) a \$64 million gain and (iii) a \$5 million gain, respectively, and for the nine months ended September 30, 2011 an \$8 million loss, each related to the early retirement of debt.

(2) The ratios of earnings to fixed charges for the years ended December 31, 2009 and 2008 indicated less than one-to-one coverage and are therefore not presented. Additional earnings of \$521 million and \$137 million would have been required for the years ended December 31, 2009 and 2008, respectively, to achieve ratios of one-to-one coverage.

Table of Contents

RISK FACTORS

Investing in our securities involves risks. You should carefully consider the risks described in any prospectus supplement and those incorporated by reference into this prospectus before making an investment decision. The risks and uncertainties described in any prospectus supplement and incorporated by reference into this prospectus are not the only ones facing our company. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business operations. If any of these risks actually occur, our business, financial condition and results of operations could be materially affected. In that case, the value of our securities could decline substantially.

USE OF PROCEEDS

We intend to use the net proceeds from the sales of the securities as set forth in the applicable prospectus supplement.

DESCRIPTION OF SECURITIES WE MAY SELL

Senior and Subordinated Debt Securities

General

We may issue senior debt securities in one or more series under the indenture, dated as of March 10, 2009, between LNC and The Bank of New York Mellon, as trustee, which we refer to as the senior indenture. We may also issue subordinated debt securities in one or more series under the indenture to be entered into between LNC and The Bank of New York Mellon, as trustee, which we refer to as the subordinated indenture and together with the senior indenture as the indentures or each of the senior indenture and the subordinated indenture individually, as the applicable indenture. For purposes of this section, we refer to: (i) the senior debt securities together with the subordinated debt securities as the debt securities; and (ii) The Bank of New York Mellon, or any succes
