QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2012

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission File Number 000-08467

WESBANCO, INC.

(Exact name of Registrant as specified in its charter)

WEST VIRGINIA
(State of incorporation)

55-0571723
(IRS Employer Identification No.)

1 Bank Plaza, Wheeling, WV
(Address of principal executive offices)

26003
(Zip Code)

Registrant's telephone number, including area code: **304-234-9000**

NOT APPLICABLE

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: WESBANCO INC - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined by Rule 12b-2 of the Exchange Act). Yes No

As of April 25, 2012, there were 26,627,689 shares of WesBanco, Inc. common stock, \$2.0833 par value, outstanding.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION The accompanying unaudited interim financial statements of WesBanco, Inc. and its consolidated subsidiaries (WesBanco) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements and should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2011.

WesBanco's interim financial statements have been prepared following the significant accounting policies disclosed in Note 1 of the Notes to the Consolidated Financial Statements of its 2011 Annual Report on Form 10-K filed with the Securities and Exchange Commission. In the opinion of management, the accompanying interim financial information reflects all adjustments, including normal recurring adjustments, necessary to present fairly WesBanco's financial position and results of operations for each of the interim periods presented. Results of operations for interim periods are not necessarily indicative of the results of operations that may be expected for a full year.

Certain prior period amounts have been reclassified to conform to the current period presentation. The reclassifications had no effect on net income.

RECENT ACCOUNTING PRONOUNCEMENTS In December 2011, the Financial Accounting Standards Board (FASB) issued an accounting pronouncement which requires entities to disclose both gross and net information about instruments and transactions eligible for offset in the statement of financial position, including instruments and transactions subject to master netting arrangements. The scope would include derivatives, sale and repurchase agreements and reverse sale and repurchase agreements, and securities borrowing and securities lending arrangements. The objective of this disclosure is to enhance disclosures required by GAAP by requiring improved information about financial instruments and derivative instruments that are either offset in accordance with existing GAAP or subject to an enforceable master netting arrangement or similar agreement. This information will enable users of an entity's financial statements to evaluate the effect or potential effect of netting arrangements on an entity's financial position, including the effect or potential effect of rights of setoff associated with certain financial instruments and derivative instruments. The pronouncement should be applied retrospectively effective for fiscal years, and interim periods within those years, beginning after January 1, 2013. The adoption of this pronouncement is not expected to have a material impact on WesBanco's consolidated financial statements.

In September 2011, the FASB issued an accounting pronouncement to simplify how an entity tests goodwill for impairment by permitting an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. Under previous guidance an entity was required to test goodwill for impairment by comparing the fair value of a reporting unit with its carrying amount, including goodwill. If the fair value was less than its carrying amount, then the second step of the test was performed to measure the amount of the impairment loss. Under the new accounting pronouncement an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. The pronouncement was effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this pronouncement did not have a material impact on WesBanco's consolidated financial statements.

In June 2011, the FASB issued an accounting pronouncement that requires all non-owner changes in stockholders' equity to be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. Under the two-statement approach, the first statement should present total net income and its components followed consecutively by a second statement that should present total other comprehensive income, the components of other comprehensive income, and the total of comprehensive income. In December 2011, an amendment to the June 2011 accounting pronouncement was issued which deferred the requirement that entities present reclassification adjustments for each component of accumulated other comprehensive income in both net income and other comprehensive income on the face of the financial statements. Entities should continue to report reclassifications relating to accumulated other comprehensive income consistent with the presentation requirements in effect before the June 2011 accounting pronouncement. The disclosures in the original June 2011 pronouncement that were not deferred in the December 2011 pronouncement should be applied retrospectively effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. WesBanco has adopted a single continuous statement of comprehensive income for interim periods.

In May 2011, the FASB issued an accounting pronouncement which amends the fair value measurement and disclosure requirements to achieve common disclosure requirements between U.S. GAAP and International Financial Reporting Standards. The accounting pronouncement requires certain disclosures about transfers between Level 1 and Level 2 of the fair value hierarchy, sensitivity of fair value measurements categorized

Edgar Filing: WESBANCO INC - Form 10-Q

within Level 3 of the fair value hierarchy, and categorization by level of items that are reported at cost but are required to be disclosed at fair value. The disclosures are to be applied prospectively effective in the first interim and annual periods beginning after December 15, 2011. The adoption of this pronouncement did not have a material impact on WesBanco's consolidated financial statements.

Table of Contents**NOTE 2. EARNINGS PER COMMON SHARE**

Earnings per common share are calculated as follows:

	For the Three Months Ended	
	2012	March 31, 2011

Other residential collateralized mortgage obligations	679	9	-	688	783	9	(1)	791	

Edgar Filing: WESBANCO INC - Form 10-Q

Obligations of state and political subdivisions	352,981	23,283	(289)	375,975	342,752	21,459	(138)	364,073
Corporate debt securities	1,452	85	-	1,537	1,452	82	-	1,534
Total held-to-maturity securities	\$ 577,923	\$ 30,602	\$ (339)	\$ 608,186	\$ 592,925	\$ 28,773	\$ (226)	\$ 621,472
Total securities	\$ 1,646,946	\$ 51,027	\$ (1,951)	\$ 1,696,022	\$ 1,591,216	\$ 48,473	\$ (1,877)	\$ 1,637,812

At March 31, 2012, and December 31, 2011, there were no holdings of any one issuer, other than the U.S. government and its agencies, in an amount greater than 10% of WesBanco's shareholders' equity.

Table of Contents

The following table presents the fair value of available-for-sale and held-to-maturity securities by contractual maturity at March 31, 2012. In many instances, the issuers may have the right to call or prepay obligations without penalty prior to the contractual maturity date.

<i>(unaudited, in thousands)</i>	March 31, 2012				Total
	Within One Year	After One But Within Five Years	After Five But Within Ten Years	After Ten Years	
Available-for-sale (1)					
Other government agencies	\$ 2,599	\$ 5,002	\$ 25,525	\$ 114,271	\$ 147,397
Residential mortgage-backed securities and collateralized mortgage obligations of government agencies (2)	19,872	655,941	34,629	966	711,408
Obligations of states and political subdivisions	6,281	53,703	66,237	54,693	180,914
Corporate debt securities	3,283	34,553	1,674	2,914	42,424
Total available-for-sale securities	\$ 32,035	\$ 749,199	\$ 128,065	\$ 172,844	\$ 1,082,143
Held-to-maturity (3)					
Residential mortgage-backed securities and collateralized mortgage obligations of government agencies (2)	\$ 4,500	\$ 177,360	\$ 48,126	\$ -	\$ 229,986
Other residential collateralized mortgage obligations (2)	-	688	-	-	688
Obligations of states and political subdivisions	1,192	7,816	54,523	312,444	375,975
Corporate debt securities	-	-	-	1,537	1,537
Total held-to-maturity securities	\$ 5,692	\$ 185,864	\$ 102,649	\$ 313,981	\$ 608,186
Total securities	\$ 37,727	\$ 935,063	\$ 230,714	\$ 486,825	\$ 1,690,329

(1) Equity securities totaling \$5.7 million are excluded from this schedule because they have an indefinite maturity.

(2) Mortgage-backed and collateralized mortgage securities, which have prepayment provisions, are assigned to maturity categories based on current estimated average lives.

(3) The held-to-maturity portfolio is carried at an amortized cost of \$577.9 million.

Securities with aggregate par values of \$713.5 million and \$666.9 million at March 31, 2012 and December 31, 2011, respectively, were pledged as security for public and trust funds, and securities sold under agreements to repurchase. Proceeds from the sale of available-for-sale securities were \$3.1 million for the three months ended March 31, 2012. There were no sales of securities in the first quarter of 2011. Net unrealized gains on available-for-sale securities included in accumulated other comprehensive income, net of tax, as of March 31, 2012 and December 31, 2011 were \$11.8 million and \$11.3 million, respectively. Gross security gains and losses on available-for-sale securities were immaterial for the three months ended March 31, 2012 and 2011.

Table of Contents

The following table provides information on unrealized losses on investment securities that have been in an unrealized loss position for less than twelve months and twelve months or more as of March 31, 2012 and December 31, 2011:

<i>(unaudited, dollars in thousands)</i>	Less than 12 months			March 31, 2012 12 months or more			Total

Equity securities	4	(1)	2	-	-	-	4	(1)	2
Total temporarily impaired securities	\$ 191,987	\$ (951)	75	\$ 15,800	\$ (926)	11	\$ 207,787	\$ (1,877)	86

Unrealized losses on debt securities in the table represent temporary fluctuations resulting from changes in market rates in relation to fixed yields. Unrealized losses in the available-for-sale portfolio are accounted for as an adjustment to other comprehensive income in shareholders equity.

WesBanco does not believe the securities presented above are impaired due to reasons of credit quality, as all debt securities are of investment grade quality and all are paying principal and interest according to their contractual terms. WesBanco does not intend to sell, nor is it more likely than not that it will be required to sell, loss position securities prior to recovery of their cost, and therefore, management believes the unrealized losses detailed above are temporary and no impairment loss relating to these securities has been recognized.

Securities that do not have readily determinable fair values and for which WesBanco does not exercise significant influence are carried at cost. Cost method investments consist primarily of FHLB of Pittsburgh and FHLB of Cincinnati stock totaling \$20.9 million and \$21.9 million at March 31, 2012 and December 31, 2011, respectively, and are included in other assets in the Consolidated Balance Sheets. Cost-method investments are evaluated for impairment whenever events or circumstances suggest that their carrying value may not be recoverable.

Table of Contents**NOTE 4. LOANS AND THE ALLOWANCE FOR CREDIT LOSSES**

The recorded investment in loans is presented in the Consolidated Balance Sheets net of deferred loan fees and costs of \$3.2 million at March 31, 2012 and \$3.1 million at December 31, 2011.

The following table presents the recorded investment in loans by category:

<i>(unaudited, in thousands)</i>	December 31, March 31, 2012	December 31, December 31, 2011
Commercial real estate:		
Land and construction	\$ 193,386	\$ 175,867

(1) Commercial loans greater than \$1 million that are reported as non-accrual or as a troubled debt restructuring (TDR) are individually evaluated for impairment. WesBanco maintains an internal loan grading system to reflect the credit quality of commercial loans. Commercial loan risk grades are determined based on an evaluation of the relevant characteristics of each loan, assigned at the inception of each loan and adjusted thereafter at any time to reflect changes in the risk profile throughout the life of each loan. The primary factors used to determine the risk grade are the reliability and sustainability of the primary source of repayment and overall financial strength of the borrower. This includes an analysis of cash flow available to repay debt, profitability, liquidity, leverage, and overall financial trends. Other factors include management, industry or property type risks, an assessment of secondary sources of repayment such as collateral or guarantees, other terms and conditions of the loan that may increase or reduce its risk, and economic conditions and other external factors that may influence repayment capacity and financial condition.

Commercial real estate land and construction consists of loans to finance investments in vacant land, land development, construction of residential housing, and construction of commercial buildings. Commercial real estate improved property consists of loans for the purchase or refinance of all types of improved owner-occupied and investment properties. Factors that are considered in assigning the risk grade vary depending on the type of property financed. The risk grade assigned to construction and development loans is based on the overall viability of the project, the experience and financial capacity of the developer or builder to successfully complete the project, project specific and market absorption rates and comparable property values, and the amount of pre-sales for residential housing construction or pre-leases for commercial investment property. The risk grade assigned to commercial investment property loans is based primarily on the adequacy of net rental income generated by the property to service the debt, the type, quality, industry and mix of tenants, and the terms of leases, but also considers the overall financial capacity of the investors and their experience in owning and managing investment property. The risk grade assigned to owner-occupied commercial real estate and commercial and industrial loans is based primarily on historical and projected earnings, the adequacy of operating cash flow to service all of the business debt, and the capital resources, liquidity and leverage of the business, but also considers the industry in which the business operates, the business specific competitive advantages or disadvantages, the quality and experience of management, and external influences on the business such as economic conditions. Other factors that are considered for commercial and industrial loans include the type, quality and marketability of non-real estate collateral and whether the structure of the loan increases or reduces its risk. The type, age, condition, location and any environmental risks associated with a property are also considered for all types of commercial real estate. The overall financial condition and repayment capacity of any guarantors is also evaluated to determine the extent to which they mitigate other risks of the loan. The following descriptions of risk grades apply to commercial real estate and commercial and industrial loans.

Excellent or minimal risk loans are fully secured by liquid or readily marketable collateral and therefore have virtually no risk of loss. Good or desirable risk loans are extended in the normal course of business to creditworthy borrowers that exhibit a history of positive financial results that are at least comparable to the average for their industry or type of real estate. These loans are expected to perform satisfactorily during most economic cycles and there are no significant external factors that are expected to adversely affect these borrowers more than others in the same industry. Any minor unfavorable characteristics of these loans are outweighed or mitigated by strong positive factors including but not limited to adequate secondary sources of repayment or guarantees.

Fair or acceptable risk loans have a somewhat higher credit risk profile due to specific weaknesses or uncertainties that could adversely impact repayment capacity. Loans in this category generally warrant additional attention or monitoring, or a more rigid loan structure. These loans

Table of Contents

represent the maximum level of risk accepted in the normal course of lending. Specific issues that may warrant this grade include financial results that are less favorable than the average for the borrower's industry or type of real estate, cyclical financial results, loans based on projections that have a reasonable probability of being achieved, start-up businesses, construction projects, and other external factors that indicate a higher level of credit risk. Loans that are underwritten primarily on the basis of the repayment capacity or financial condition of guarantors may also be assigned this grade.

Criticized or marginal loans are currently protected but have weaknesses, which if not corrected, may inadequately protect the Bank at some future date. These loans represent an unwarranted credit risk and would generally not be extended in the normal course of lending. Specific issues which may warrant this grade include declining financial results, increased reliance on secondary sources of repayment or guarantor support and adverse external influences that may negatively impact the business or property.

Substandard and doubtful loans are equivalent to the classifications used by banking regulators. Substandard loans are inadequately protected by the current repayment capacity and equity of the borrower or collateral pledged, if any. Substandard loans have one or more well-defined weaknesses that jeopardize their repayment or collection in full. These loans may or may not be reported as non-accrual. Doubtful loans have all the weaknesses inherent to a substandard loan with the added characteristic that full repayment is highly questionable or improbable on the basis of currently existing facts, conditions and collateral values. However, recognition of loss may be deferred if there are reasonably specific pending factors that will reduce the risk if they occur.

The following tables summarize commercial loans by their assigned risk grade:

Commercial Loans by Internally Assigned Risk Grade

<i>(unaudited, in thousands)</i>	Commercial Real Estate- Land and Construction	Commercial Real Estate- Improved Property	Commercial & Industrial	Total Commercial Loans
As of March 31, 2012

Total	\$ 175,867	\$ 1,509,698	\$ 426,315	\$ 2,111,880

Residential real estate, home equity and consumer loans are not assigned internal risk grades other than as required by regulatory guidelines that are based primarily on the age of past due loans. WesBanco primarily evaluates the credit quality of residential real estate, home equity and consumer loans based on repayment performance and historical loss rates. The aggregate amount of residential real estate, home equity and consumer loans classified as substandard in accordance with regulatory guidelines were \$15.9 million at March 31, 2012 and \$18.2 million at December 31, 2011, of which \$2.8 and \$4.2 million were accruing, for each period respectively.

Table of Contents

The following table summarizes the age analysis of all categories of loans.

Non-performing loans included above are as follows:

Non-accrual loans	\$ 12,377	\$ 1,629	\$ 2,818	\$ 40,668	\$ 45,115	\$ 57,492
TDRs accruing interest ⁽¹⁾	26,893	1,434	354	730	2,518	29,411

(1) Loans 90 days or more past due and accruing interest exclude TDRs.

Impaired Loans A loan is considered impaired, based on current information and events, if it is probable that WesBanco will be unable to collect the payments of principal and interest when due according to the contractual terms of the loan agreement. Impaired loans generally included all non-accrual loans and TDRs.

Loans are generally placed on non-accrual status when they become past due 90 days or more unless they are both well-secured and in the process of collection. Loans may also be placed on non-accrual when full collection of principal is in doubt even if payments on such loans remain current.

Loans are categorized as TDRs when the Bank, for economic or legal reasons related to a borrower's financial difficulties, grants a concession to the borrower that it would not otherwise consider.

Table of Contents

The following tables summarize impaired loans:

<i>(unaudited, in thousands)</i>	Impaired Loans					
	March 31, 2012			December 31, 2011		
	Unpaid Principal Balance (1)	Recorded Investment (2)	Related Allowance	Unpaid Principal Balance (1)	Recorded Investment (2)	Related Allowance
With no related allowance recorded:

Total	\$ 27,900	\$ 16,935	\$ 44,835	\$ 29,411	\$ 17,287	\$ 46,698

As of March 31, 2012, there were ten TDRs greater than \$1.0 million representing \$20.0 million or 44.6% of total TDRs comprised of three commercial real estate land and construction loans and seven commercial real estate improved property loans with specific reserves of \$2.4 million. The concessions granted in the majority of the top ten TDRs were either extensions of maturity combined with interest only for a period of less than a year, or a reduction in payments through an extension of maturity date by re-amortizing principal and interest.

The following table presents details related to loans identified as TDRs during the three months ended March 31, 2012:

<i>(unaudited, dollars in thousands)</i>	New TDRs (1)		
	For the Three Months Ended March 31, 2012		
	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
Commercial real estate:			

Edgar Filing: WESBANCO INC - Form 10-Q

Land and construction	-	\$ -	\$ -
Improved Property	6	903	909
Total commercial real estate	6	903	909
Commercial and industrial	-	-	-

Home equity	-	-	-
Consumer	-	-	-
Total	10	\$ 1,298	\$ 1,312

(1) Excludes loans that were either paid off or charged-off by period end. The pre-modification balance represents the balance outstanding at the beginning of the period. The post-modification balance represents the outstanding balance at period end.

Table of Contents

The following table summarizes TDRs which defaulted (defined as past due 90 days or more) during the three months ended March 31, 2012 that were restructured within the last twelve months prior to March 31, 2012:

<i>(unaudited, dollars in thousands)</i>	Defaulted TDRs ⁽¹⁾	
	For the Three Months Ended March 31, 2012	
	Number of Defaults	Recorded Investment
Commercial real estate:		
Land and construction	1	\$ 139
Improved property	10	2,627
Total commercial real estate	11	2,766
Commercial and industrial	3	488
Residential real estate	-	-
Home equity	-	-
Consumer	-	-
Total	14	\$ 3,254

(1) Excludes loans that were either charged-off or cured by period end. The recorded investment is as of March 31, 2012.

TDRs that defaulted during the three month period and that were restructured within the last twelve months represented 7.3% of the balance at March 31, 2012. Generally these loans are placed on non-accrual status unless they are both well-secured and in the process of collection. At March 31, 2012, only two loans in the table above were accruing interest.

WesBanco had unfunded commitments to debtors whose loans were classified as TDRs of \$21 thousand and \$25 thousand at March 31, 2012 and December 31, 2011, respectively.

The following table summarizes other real estate owned and repossessed assets included in other assets:

<i>(unaudited, in thousands)</i>	March 31,	December 31,
	2012	2011
Other real estate owned	\$ 2,813	\$ 2,786
Repossessed assets	365	243
Total other real estate owned and repossessed assets	\$ 3,178	\$ 3,029

Table of Contents**NOTE 5. FEDERAL HOME LOAN BANK BORROWINGS**

WesBanco is a member of the FHLB System. WesBanco's FHLB borrowings, which consist of borrowings from both the FHLB of Pittsburgh and the FHLB of Cincinnati, are secured by a blanket lien by the FHLB on certain residential mortgages and other loan types or securities with a market value in excess of the outstanding balances of the borrowings. At March 31, 2012 and December 31, 2011, WesBanco had FHLB borrowings of **\$147.9** million and \$168.2 million, with a weighted-average interest rate of **3.88%** and 3.58% respectively. The decline in borrowings from December 31, 2011 was due to scheduled maturities and their payoff. The terms of the security agreement with the FHLB include a specific assignment of collateral that requires the maintenance of qualifying mortgage and other types of loans as pledged collateral with unpaid principal amounts in excess of the FHLB advances, when discounted at certain pre-established percentages of the loans' unpaid principal balances. FHLB stock owned by WesBanco totaling **\$20.9** million at March 31, 2012 and \$21.9 at December 31, 2011 is also pledged as collateral on these advances. The remaining maximum borrowing capacity by WesBanco with the FHLB at March 31, 2012 and December 31, 2011 was estimated to be approximately **\$1.0** billion for both periods.

Certain FHLB advances contain call features, which allow the FHLB to call the outstanding balance or convert a fixed rate borrowing to a variable rate advance if the strike rate goes beyond a certain predetermined rate. The probability that these advances will be called depends primarily on the level of related interest rates during the call period. Of the **\$147.9** million outstanding at March 31, 2012, **\$106.1** million in FHLB convertible advances are subject to call or conversion to a variable rate advance by the FHLB.

The following table presents the aggregate annual maturities and weighted-average interest rates of FHLB borrowings at March 31, 2012 based on their contractual maturity dates and effective interest rates:

<i>(unaudited, dollars in thousands)</i>	Scheduled Maturity	Weighted Average Rate
Year		
2012	\$ 56,505	4.45%
2013	50,243	3.27%
2014	16,165	3.40%
2015	921	4.69%
2016	129	4.35%
2017 and thereafter	23,950	4.09%
Total	\$ 147,913	3.88%

The majority of the 2012 maturities are in the third quarter, and most of the 2013 maturities are in the first quarter.

NOTE 6. PENSION PLAN

The following table presents the net periodic pension cost for WesBanco's Defined Benefit Pension Plan (the Plan) and the related components:

<i>(unaudited, in thousands)</i>	For the Three Months Ended	
	2012	March 31, 2011
Service cost – benefits earned during year	\$ 681	\$ 636
Interest cost on projected benefit obligation	965	896
Expected return on plan assets	(1,378)	(1,396)
Amortization of prior service cost	11	15
Amortization of net loss	569	315
Net periodic pension cost	\$ 848	\$ 466

The Plan covers all employees of WesBanco and its subsidiaries who were hired on or before August 1, 2007 who satisfy minimum age and length of service requirements, and is not available to employees hired after such date.

Edgar Filing: WESBANCO INC - Form 10-Q

A minimum required contribution of **\$5.3** million is due for 2012 which will be partially funded by the Plan's **\$2.1** million available credit balance. No decision has been made as of March 31, 2012 relative to the level of contribution in excess of the required minimum that will be made to the Plan, if any.

Table of Contents

NOTE 7. FAIR VALUE MEASUREMENT

Fair value estimates are based on quoted market prices, if available, quoted market prices of similar assets or liabilities, or the present value of expected future cash flows and other valuation techniques. These valuations are significantly affected by discount rates, cash flow assumptions, and risk assumptions used. Therefore, fair value estimates may not be substantiated by comparison to independent markets and are not intended to reflect the proceeds that may be realizable in an immediate settlement of the instruments.

Fair value is determined at one point in time and is not representative of future value. These amounts do not reflect the total value of a going concern organization. Management does not have the intention to dispose of a significant portion of its assets and liabilities and therefore, the unrealized gains or losses should not be interpreted as a forecast of future earnings and cash flows.

The following is a discussion of assets and liabilities measured at fair value on a recurring basis and valuation techniques applied:

Securities available-for-sale: The fair value of securities available-for-sale which are measured on a recurring basis are determined primarily by obtaining quoted prices on nationally recognized securities exchanges or matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities relationship to other similar securities. These securities are classified within Level 1 or 2 of the fair value hierarchy. Positions that are not traded in active markets for which valuations are generated using assumptions not observable in the market or management's best estimate are classified within level 3 of the fair value hierarchy. This includes certain specific municipal debt issues for which the credit quality and discount rate must be estimated.

We may be required from time to time to measure certain assets at fair value on a nonrecurring basis in accordance with GAAP. These adjustments to fair value usually result from application of lower-of-cost-or-market accounting or write-downs of individual assets.

Impaired loans: Impaired loans are carried at the lower of cost or the fair value of the collateral for collateral-dependent loans. Collateral may be in the form of real estate or business assets including equipment, inventory and accounts receivable. The use of independent appraisals, discounted cash flow models and management's best judgment are significant inputs in arriving at the fair value measure of the underlying collateral and impaired loans are therefore classified within level 3 of the fair value hierarchy.

Other real estate owned and repossessed assets: Other real estate owned and repossessed assets are carried at the lower of the investment in the assets or the fair value of the assets less estimated selling costs. The use of independent appraisals and management's best judgment are significant inputs in arriving at the fair value measure of the underlying collateral and therefore other real estate owned and repossessed assets are classified within level 3 of the fair value hierarchy.

Mortgage servicing rights: The fair value of mortgage servicing rights is based on an independent valuation model that calculates the present value of estimated net servicing income. The valuation model incorporates assumptions based on management's best judgment that are significant inputs to the discounting calculations. If the carrying value exceeds fair value, they are considered impaired and are classified within level 3 of the fair value hierarchy as a result.

Loans held for sale: Loans held for sale are carried, in aggregate, at the lower of cost or fair value. The use of a valuation model using quoted prices of similar instruments are significant inputs in arriving at the fair value and therefore loans held for sale are classified within level 2 of the fair value hierarchy.

Table of Contents

The following tables set forth WesBanco's financial assets and liabilities that were accounted for at fair value on a recurring and nonrecurring basis by level within the fair value hierarchy as of March 31, 2012:

		March 31, 2012		
		Fair Value Measurements Using:		
		Quoted Prices in		
		Active Markets	Significant Other	Significant
		for	Observable	Unobservable
		Identical	Inputs	Inputs
		Assets	(Level 2)	(Level 3)
		(Level

Loans held for sale	8,611	-	8,611	-
Total nonrecurring fair value measurements	\$ 23,895	\$ -	\$ 8,611	\$ 15,284

WesBanco's policy is to recognize transfers between levels as of the actual date of the event or change in circumstances that caused the transfer. There were no transfers between level 1 and 2 for the three months ended March 31, 2012. For the three months ended March 31, 2012 loans held for sale were transferred from level 3 to level 2 due to improvements in the valuation model, which utilizes quoted prices for similar loans.

The following tables set forth the WesBanco's financial assets and liabilities that were accounted for at fair value on a recurring and nonrecurring basis by level within the fair value hierarchy as of December 31, 2011:

Table of Contents

December 31, 2011

Assets measured at fair value on a recurring basis and for which WesBanco has utilized Level 3 inputs to determine fair value were immaterial at March 31, 2012.				

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which WesBanco has utilized Level 3 inputs to determine fair value:

Quantitative Information about Level 3 Fair Value Measurements				
Unobservable				
<i>(unaudited, in thousands)</i>	Fair Value Estimate	Valuation Techniques	Input	Range (Weighted Average)
March 31, 2012:				
Impaired loans	10,916	Appraisal of collateral (1)	Appraisal adjustments (2)	0% to -55.4% (-28.8%)
			Liquidation expenses (2)	-1.9% to -8.0% (-5.6%)
Other real estate owned and repossessed assets	3,178	Appraisal of collateral (1), (3)		
Mortgage servicing rights	1,190	Discounted cash flow	Remaining term Discount rate	3.1 yrs to 27.5 yrs (15.8yrs) 9.0% to 12.0% (9.6%)

Edgar Filing: WESBANCO INC - Form 10-Q

- (1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various level 3 inputs which are not identifiable.
- (2) Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses. The range and weighted average of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal.
- (3) Includes qualitative adjustments by management and estimated liquidation expenses.

Table of Contents

The estimated fair values of WesBanco's financial instruments are summarized below:

	Fair Value Measurements at				
	March 31, 2012				
<i>(unaudited, in thousands)</i>	Carrying Amount	Fair Value Estimate	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Cash and due from banks	\$ 140,325	\$ 140,325
Securities available-for-sale	1,016,340	1,016,340
Securities held-to-maturity	592,925	621,472
Net loans	3,184,558	3,068,799
Loans held for sale	6,084	6,084
Accrued interest receivable	19,268	19,268
Bank owned life insurance	110,074	110,074
Financial liabilities:		
Deposits	4,393,866	4,420,102
Federal Home Loan Bank borrowings	168,186	174,926
Other borrowings	196,887	197,922
Junior subordinated debt	106,066	56,515
Accrued interest payable	4,975	4,975

The following methods and assumptions were used to measure the fair value of financial instruments recorded at cost on WesBanco's consolidated balance sheets:

Cash and due from banks: The carrying amount for cash and due from banks is a reasonable estimate of fair value.

Edgar Filing: WESBANCO INC - Form 10-Q

Securities held-to-maturity: Fair values for securities held-to-maturity are determined in the same manner as securities available-for-sale which is described above.

Net loans: Fair values for loans are estimated using a discounted cash flow methodology. The discount rates take into account interest rates currently being offered to customers for loans with similar terms, the credit risk associated with the loan and market factors, including liquidity. The valuation of the loan portfolio reflects discounts that WesBanco believes are consistent with transactions occurring in the marketplace for both performing and distressed loan types. The carrying value that fair value is compared to is net of the allowance for loan losses and other associated premiums and discounts. Due to the significant judgment involved in evaluating credit quality, loans are classified within level 3 of the fair value hierarchy.

Accrued interest receivable: The carrying amount of accrued interest receivable approximates its fair value.

Bank-Owned Life Insurance: The carrying value of bank-owned life insurance represents the net cash surrender value of the underlying insurance policies, should these policies be terminated. Management believes that the carrying value approximates fair value.

Deposits: The carrying amount is considered a reasonable estimate of fair value for demand, savings and other variable rate deposit accounts. The fair value of fixed maturity certificates of deposit is estimated by a discounted cash flow method using the rates currently offered for deposits of similar remaining maturities.

Table of Contents

Federal Home Loan Bank borrowings: The fair value of FHLB borrowings is based on rates currently available to WesBanco for borrowings with similar terms and remaining maturities.

Other borrowings: The carrying amount of federal funds purchased and overnight sweep accounts generally approximate fair value. Other repurchase agreements are based on quoted market prices if available. If market prices are not available, for certain fixed and adjustable rate repurchase agreements, then quoted market prices of similar instruments are used.

Junior subordinated debt owed to unconsolidated subsidiary trusts: Due to the pooled nature of these instruments, which are not actively traded, estimated fair value is based on broker prices from recent similar sales.

Accrued interest payable: The carrying amount of accrued interest payable approximates its fair value.

Off-balance sheet financial instruments: Off-balance sheet financial instruments consist of commitments to extend credit including letters of credit. Fair values for commitments to extend credit are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit standing of the counterparties. The estimated fair value of the commitments to extend credit and letters of credit are insignificant and therefore are not presented in the above table.

Table of Contents**NOTE 8. COMMITMENTS AND CONTINGENT LIABILITIES**

Commitments In the normal course of business, WesBanco offers off-balance sheet credit arrangements to enable its customers to meet their financing objectives. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the financial statements. WesBanco's exposure to credit losses in the event of non-performance by the other parties to the financial instruments for commitments to extend credit and standby letters of credit is limited to the contractual amount of those instruments. WesBanco uses the same credit policies in making commitments and conditional obligations as for all other lending. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The allowance for credit losses associated with commitments was **\$0.5** million as of both March 31, 2012 and December 31, 2011, respectively, and is included in other liabilities on the Consolidated Balance Sheets.

Letters of credit are conditional commitments issued by banks to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements, including normal business activities, bond financing and similar transactions. Letters of credit are considered guarantees. The liability associated with letters of credit is recorded at its estimated fair value of **\$0.1** million as of both March 31, 2012 and December 31, 2011, respectively, and is included in other liabilities on the Consolidated Balance Sheets.

Contingent obligations to purchase loans funded by other entities include affordable housing plan guarantees and credit card guarantees. Affordable housing plan guarantees are performance guarantees for various building project loans. The guarantee amortizes as the loan balances decrease. Credit card guarantees are credit card balances not owned by WesBanco, whereby the Bank guarantees the performance of the cardholder.

The following table presents total commitments to extend credit, guarantees and various letters of credit outstanding:

<i>(unaudited, in thousands)</i>	March 31, 2012	December 31, 2011
Lines of credit	\$ 623,328	\$ 602,923
Loans approved but not closed	109,349	113,113
Overdraft limits	80,549	85,981
Letters of credit	37,100	37,719
Contingent obligations to purchase loans funded by other entities	7,629	7,685

Contingent Liabilities WesBanco and its subsidiaries are parties to various legal and administrative proceedings and claims. While any litigation contains an element of uncertainty, management believes that the outcome of such proceedings or claims pending or known to be threatened will not have a material adverse effect on WesBanco's consolidated financial position, results of operations or cash flows.

Table of Contents**NOTE 9. BUSINESS SEGMENTS**

WesBanco operates two reportable segments: community banking and trust and investment services. WesBanco's community banking segment offers services traditionally offered by full-service commercial banks, including commercial demand, individual demand and time deposit accounts, as well as commercial, mortgage and individual installment loans, and certain non-traditional offerings, such as insurance and securities brokerage services. The trust and investment services segment offers trust services as well as various alternative investment products including mutual funds. The market value of assets managed or held in custody by the trust and investment services segment was approximately \$3.2 billion and \$3.1 billion at March 31, 2012 and 2011, respectively. These assets are held by WesBanco in fiduciary or agency capacities for their customers and therefore are not included as assets on WesBanco's Consolidated Balance Sheets.

Condensed financial information by business segment is presented below:

<i>(unaudited, in thousands)</i>	Community Banking	Trust and Investment Services	Consolidated
For the Three Months ended March 31, 2012:			
Interest income	\$ 53,680	\$ -	\$ 53,680
Interest expense	11,850	-	11,850
Net interest income	41,830	-	41,830
Provision for credit losses	6,202	-	6,202
Net interest income after provision for credit losses	35,628	-	35,628
Non-interest income	10,569	4,753	15,322
Non-interest expense	32,808	2,857	35,665
Income before provision for income taxes	13,389	1,896	15,285
Provision for income taxes	2,536	759	3,295
Net income	\$ 10,853	\$ 1,137	\$ 11,990
For the Three Months ended March 31, 2011:			
Interest income	\$ 56,098	\$ -	\$ 56,098
Interest expense	14,622	-	14,622
Net interest income	41,476	-	41,476
Provision for credit losses	8,041	-	8,041
Net interest income after provision for credit losses	33,435	-	33,435
Non-interest income	9,742	4,762	14,504
Non-interest expense	32,914	2,577	35,491
Income before provision for income taxes	10,263	2,185	12,448
Provision for income taxes	1,334	874	2,208
Net income	\$ 8,929	\$ 1,311	\$ 10,240

Total non-fiduciary assets of the trust and investment services segment were \$2.9 million and \$2.6 million at March 31, 2012 and 2011, respectively. All goodwill and other intangible assets were allocated to the community banking segment.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis represents an overview of the results of operations and financial condition of WesBanco for the three months ended March 31, 2012. This discussion and analysis should be read in conjunction with the Consolidated Financial Statements and Notes thereto.

FORWARD-LOOKING STATEMENTS

Forward-looking statements in this report relating to WesBanco's plans, strategies, objectives, expectations, intentions and adequacy of resources, are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The information contained in this report should be read in conjunction with WesBanco's Form 10-K for the year ended December 31, 2011 and documents subsequently filed by WesBanco with the Securities and Exchange Commission (SEC), which are available at the SEC's website, www.sec.gov or at WesBanco's website, www.wesbanco.com. Investors are cautioned that forward-looking statements, which are not historical fact, involve risks and uncertainties, including those detailed in WesBanco's most recent Annual Report on Form 10-K filed with the SEC under "Risk Factors" in Part I, Item 1A. Such statements are subject to important factors that could cause actual results to differ materially from those contemplated by such statements, including without limitation, the effects of changing regional and national economic conditions; changes in interest rates, spreads on earning assets and interest-bearing liabilities, and associated interest rate sensitivity; sources of liquidity available to WesBanco and its related subsidiary operations; potential future credit losses and the credit risk of commercial, real estate, and consumer loan customers and their borrowing activities; actions of the Federal Reserve Board, the Federal Deposit Insurance Corporation, the SEC, Financial Institution Regulatory Authority, Municipal Securities Rulemaking Board, Securities Investors Protection Corporation, and other regulatory bodies; potential legislative and federal and state regulatory actions and reform, including, without limitation, the impact of the implementation of the Dodd-Frank Act; adverse decisions of federal and state courts; fraud, scams and schemes of third parties; internet hacking; competitive conditions in the financial services industry; rapidly changing technology affecting financial services; marketability of debt instruments and corresponding impact on fair value adjustments; and/or other external developments materially impacting WesBanco's operational and financial performance. WesBanco does not assume any duty to update forward-looking statements.

OVERVIEW

WesBanco is a multi-state bank holding company operating through 112 branches, one loan production office and 121 ATM machines in West Virginia, Ohio and western Pennsylvania, offering retail banking, corporate banking, personal and corporate trust services, brokerage services, mortgage banking and insurance. WesBanco's businesses are significantly impacted by economic factors such as market interest rates, federal monetary and regulatory policies, local and regional economic conditions and the competitive environment's effect upon WesBanco's business volumes. WesBanco's deposit levels are affected by numerous factors including personal savings rates, personal income, and competitive rates on alternative investments, as well as competition from other financial institutions within the markets we serve and liquidity needs of WesBanco. Loan levels are also subject to various factors including construction demand, business financing needs, consumer spending and interest rates, as well as loan terms offered by competing lenders.

APPLICATION OF CRITICAL ACCOUNTING POLICIES AND ESTIMATES

WesBanco's critical accounting policies involving the significant judgments and assumptions used in the preparation of the Consolidated Financial Statements as of March 31, 2012 have remained unchanged from the disclosures presented in WesBanco's Annual Report on Form 10-K for the year ended December 31, 2011 under the section "Management's Discussion and Analysis of Financial Condition and Results of Operations."

RESULTS OF OPERATIONS

EARNINGS SUMMARY

Net income for the three months ended March 31, 2012 was \$12.0 million as compared to \$10.2 million for the first quarter of 2011, representing an increase of 17.1%, while diluted earnings per share were \$0.45, as compared to \$0.39 per share for the first quarter of 2011, representing an increase of 15.4%. The increased earnings improved the return on average assets by 10 basis points from the first quarter of last year to 0.87% and the return on average equity grew by 73 basis points to 7.54%.

Net interest income increased \$0.4 million or 0.9% in the first quarter compared to the first quarter of 2011. This increase was due to an increase in average earning assets of \$152.3 million or 3.2%. Primarily through balance sheet management strategies, WesBanco was able to increase net interest income in spite of the low interest rate environment. In addition, cost of funds continued to improve due to lower offered rates on

Edgar Filing: WESBANCO INC - Form 10-Q

maturing certificates of deposit, an increase in balances of lower-cost products and lower balances of higher cost FHLB borrowings which were reduced through scheduled maturities. The average balance for FHLB borrowings, which have an average interest cost of 3.38% and represent 11.6% of interest expense, decreased by \$76.1 million or 31.7% compared to the first quarter of 2011. The net interest margin was relatively unchanged in the first quarter compared to the fourth quarter of 2011, but declined by 10 basis points compared to the first quarter of 2011 as the low interest rate environment has resulted in reduced rates earned on the securities and loan portfolios and a decline in rates on interest bearing liabilities. In addition, the margin declined compared to the first quarter due to a change in asset mix towards more securities as a result of the significant increase in deposits over the past two years.

Table of Contents

The provision for credit losses decreased \$1.8 million in the first quarter of 2012 compared to the same quarter of 2011, and decreased \$3.4 million compared to the fourth quarter of 2011. The decrease in the provision was due to significant improvement in all major credit quality metrics in the current quarter. Net charge-offs for the first quarter decreased 20.3% compared to the first quarter of 2011 and 33.3% compared to the fourth quarter of 2011. In the last twelve months classified and criticized loans decreased 23.4% and non-performing loans decreased 15.8%, primarily due to principal reductions, orderly exits of certain loans, and charge-offs. In addition, loans past due 30 days or more and accruing interest at March 31, 2012 decreased 33.3% compared to March 31, 2011. All of these measures of credit quality were at their lowest level in the last five quarters. The improvement in credit quality resulted in the strengthening of coverage ratios while also supporting the lower provision for credit losses in the current quarter. The allowance for loan losses to non-performing loans, and the allowance for loan losses to the total of non-performing loans and loans past due, were both at their highest levels in the last five quarters.

Non-interest income increased \$0.8 million or 5.6% as compared to the first quarter of 2011. This increase was principally due to a \$0.5 million increase in electronic banking fees due to increased transaction volume and a \$0.6 million improvement in the net gain / (loss) on other real estate owned, partially offset by a \$0.3 million decrease in net gains on sale of mortgage loans. While mortgage loan originations increased from the prior year, WesBanco retained more loans with terms of 15 years or less for our portfolio resulting in the decline in gains on sale of mortgage loans. Non-interest expense was nearly unchanged in the first quarter as compared to the first quarter of 2011. Reduced FDIC insurance of \$0.6 million, due to a new calculation by the FDIC effective in April of 2011, and reductions in many other expense categories were offset by increased salaries and wages due to routine annual adjustments to compensation and increased pension plan expense.

NET INTEREST INCOME**TABLE 1. NET INTEREST INCOME**

	For the Three Months Ended March 31,	
	2012	2011
<i>(unaudited, dollars in thousands)</i>		
Net interest income	\$ 41,830	\$ 41,476
Taxable equivalent adjustments to net interest income	1,658	1,608
Net interest income, fully taxable equivalent	\$ 43,488	\$ 43,084
Net interest spread, non-taxable equivalent	3.26%	3.33%
Benefit of net non-interest bearing liabilities	0.17%	0.20%
Net interest margin	3.43%	3.53%
Taxable equivalent adjustment	0.14%	0.14%
Net interest margin, fully taxable equivalent	3.57%	3.67%

Net interest income, which is WesBanco's largest source of revenue, is the difference between interest income on earning assets, primarily loans and securities, and interest expense on liabilities, comprised of deposits and short and long-term borrowings. Net interest income is affected by the general level of and changes in interest rates, the steepness of the yield curve, changes in the amount and composition of interest earning assets and interest bearing liabilities, as well as the frequency of repricing and turnover of those assets and liabilities. Net interest income increased \$0.4 million or 0.9% in the first quarter of 2012 compared to the first quarter of 2011. This increase was due to an increase in average earning assets of \$152.3 million or 3.2%, primarily through increased investments in taxable securities funded by deposit increases. Total average deposits increased by \$220.5 million or 5.3% compared to the first quarter of 2011, primarily through increases in demand deposit accounts as a result of marketing campaigns, customer incentives and wealth management and business initiatives. In addition, cost of funds continued to improve due to lower offered rates on maturing certificates of deposit, an increase in balances of lower-cost products and lower balances of higher-cost FHLB borrowings. The net interest margin was relatively unchanged in the first quarter compared to the fourth quarter of 2011, but declined by 10 basis points to 3.57% compared to the first quarter of 2011. Over the last four quarters the low interest rate environment resulted in reduced rates earned on the securities and loan portfolios and a decrease in average rates paid on interest bearing liabilities. The average rate on earning assets decreased by 38 basis points while the rate on interest bearing liabilities declined by 30 basis points. In addition, the 2012 first quarter reflects a change in asset mix, with a higher percentage of shorter duration investments.

Interest income decreased \$2.4 million or 4.3% in the first quarter of 2012 compared to the same quarter in 2011 due to the lower yields, partially offset by the increase in average earning assets. Rates decreased on all significant earning asset categories from reduced rates on new and repriced assets due to competition and the lower interest rate environment. In addition, the percentage of earning assets invested in lower-yielding securities increased, as compared to typically higher-yielding loans. Securities yields decreased, primarily due to the

Edgar Filing: WESBANCO INC - Form 10-Q

reinvestment of funds from investment maturities and calls at current lower available interest rates. Taxable securities yields decreased 43 basis points in the first quarter while tax-exempt securities yields declined only 20 basis points due to the longer average life of the tax-exempt portfolio and limited additions to this portfolio. In addition, rate spread opportunities were available in collateralized mortgage securities, offsetting significant calls of other government agencies and resulting in an increase in average taxable securities. Repricing of loans and the competitive necessity of offering lower rates on quality credits in an increasingly competitive and lower interest rate environment caused a decline in loan yields of 32 basis points in the first quarter of 2012. In addition, proceeds from loan maturities, payoffs and principal reductions have been reinvested at lower yields, thus reducing the overall yield of earning assets.

Loan production increased 62% in the first quarter of 2012 compared to the first quarter of 2011 with increases in all loan categories. In addition, the Bank continued to retain more residential mortgage loans in the portfolio, rather than selling them to the secondary market. However, due to payoffs of performing commercial real estate loans due to property sales by borrowers or refinancing in the secondary market, bank sales or charge-offs of non-performing loans, and reduced usage of our customers' commercial lines of credit, average loan balances decreased slightly in the first quarter compared to the first quarter of 2011.

Table of Contents

In the first quarter of 2012, interest expense decreased \$2.8 million or 19.0% compared to the first quarter of 2011 due to decreases in rates paid and a change in the liability mix towards less expensive sources of funding, partially offset by an increase in the average balances. The average rate paid on interest bearing liabilities decreased to 1.14% in the 2012 quarter from 1.44% in the first quarter of 2011, while interest bearing liabilities increased 1.2%. Rates paid on deposits declined by 28 basis points due to declines in rates paid in all deposit categories. These declines were due to management reducing offered interest rates in all categories of deposits. Improvements in the deposit funding mix also lower the cost of funds, with average CDs decreasing to 36.1% of total average deposits from 40.1% in the first quarter of 2011, while all other account types increased to 63.9%. The overall increase in average interest bearing liabilities was primarily due to the increases in average interest bearing deposits of \$113.2 million or 3.2% in the first quarter of 2012, partially offset by decreases in FHLB borrowings. In addition, average non-interest bearing demand deposits increased by \$107.3 million. Deposit increases were used to pay down higher-cost maturing FHLB borrowings, significantly contributing to the reduced cost of funds. FHLB borrowings were 3.9% of average interest bearing liabilities in 2012 compared to 5.8% in the 2011 first quarter. Average deposits increased significantly in every product category other than CDs, even as offered rates were reduced. CDs decreased by \$88.1 million due to reductions in rate offerings, a focus on customers with multiple banking relationships as opposed to single service CD customers and customer demand for other shorter-term deposit products.

(1) Taxable equivalent basis is calculated on tax-exempt securities using a tax rate of 35% for each year presented.

PROVISION FOR CREDIT LOSSES

The provision for credit losses is the amount to be added to the allowance for credit losses after net charge-offs have been deducted to bring the allowance to a level considered appropriate to absorb probable losses inherent in the loan portfolio. The provision for credit losses decreased \$1.8 million in the first quarter of 2012 compared to the same quarter of 2011, and decreased \$3.4 million compared to the fourth quarter of 2011. The decrease in the provision was due to significant improvement in all major credit quality metrics in the current quarter as a result of a consistent focus on improving credit quality in both new loan origination and administration of existing loans. Net charge-offs for the first quarter decreased \$1.7 million or 20.3% compared to the first quarter of 2011 and \$3.3 million or 33.3% compared to the fourth quarter of 2011. In the last twelve months classified and criticized loans decreased 23.4% and non-performing loans decreased 15.8% due to principal reductions, orderly exits of certain loans including the sale of \$17.1 million of non-performing loans in the third quarter of 2011, and charge-offs. In addition, loans past due 30 days or more and accruing interest, excluding TDRs at March 31, 2012 decreased \$9.1 million or 33.3% compared to March 31, 2011. All of these measures of credit quality were at their lowest level in the last five quarters. The improvement in credit quality resulted in the strengthening of coverage ratios and supported a lower overall allowance and a lower provision for credit losses in the current quarter. The allowance for loan losses to non-performing loans, and the allowance for loan losses to the total of non-performing loans and loans past due, were both at their highest levels in the last five quarters. (Please see the Allowance for Credit Losses section of this MD&A for additional discussion).

Table of Contents**NON-INTEREST INCOME****TABLE 4. NON-INTEREST INCOME**

<i>(unaudited, dollars in thousands)</i>	For the Three Months Ended

<i>Other income:</i>				
Net insurance services revenue	688	625	63	10.1%
Other	770	566	204	36.0%
Total non-interest income	\$ 15,322	\$ 14,504	\$ 818	5.6%

Non-interest income is a significant source of revenue and an important part of WesBanco's results of operations. WesBanco offers its customers a wide range of retail, commercial, investment and electronic banking services, which are viewed as a vital component of WesBanco's ability to attract and maintain customers, as well as providing additional fee income beyond normal spread-related income to WesBanco. In the first quarter of 2012 non-interest income increased \$0.8 million as compared to the first quarter of 2011 due to a \$0.5 million increase in electronic banking fees from increased transaction volume, and a decrease in losses on other real estate owned of \$0.6 million. These improvements were partially offset by a \$0.3 million decrease in net gains on sales of mortgage loans as more loans with terms of 15 years and less are being retained in 2012, and a \$0.2 million decrease in service charges on deposits.

Trust fees were nearly unchanged from the first quarter of 2011. Trust assets at March 31, 2012 increased to \$3.2 billion from \$3.1 billion at March 31, 2011. At March 31, 2012, trust assets include managed assets of \$2.5 billion and non-managed (custodial) assets of \$0.7 billion. Assets managed for the WesMark funds, a proprietary group of mutual funds that are advised by WesBanco's trust and investment services group, were \$791.4 million as of March 31, 2012 and \$772.0 million at March 31, 2011 and are included in trust managed assets.

Electronic banking fees, which include debit card interchange fees, improved by \$0.5 million in the first quarter of 2012 as compared to the same period in the prior year, due to a higher volume of debit card transactions during the period which have continued to grow as customers move more towards electronic transactions from checks and other forms of payment. Regulatory changes, which became effective October 1, 2011 for card issuers with more than \$10 billion in assets, place a cap on debit card interchange fees. WesBanco anticipates some market-related long-term impact on its electronic banking fees in the future from these changes even though it is not directly subject to the new regulations.

Service charges on deposits, which are primarily customer overdraft fees, were 5.4% lower in the first three months of 2012 as compared to the same period in 2011 due to changes in customer behavior. Higher overall customer deposit balances, usage of mobile and internet banking technologies by our customers, and changes in marketing strategies may have also had an impact.

Net losses on the sale of other real estate owned and other assets decreased by \$0.6 million for the three months ended March 31, 2012 as compared to the same period in 2011 due to ongoing property liquidation efforts. Other real estate owned balances have increased slightly since December 31, 2011, but have been reduced by almost 45% since March 31, 2011.

Gains on the sale of mortgage loans decreased by 54.0% in 2012 as compared to the same period in 2011 primarily from a strategic decision to retain more residential mortgage loans, with terms of 15 years or less, in the portfolio instead of selling most of these originations to the secondary market.

Table of Contents**NON-INTEREST EXPENSE****TABLE 5. NON-INTEREST EXPENSE**

<i>(unaudited, dollars in thousands)</i>	For the Three Months Ended			
	March 31,		\$ Change	% Change
	2012	2011		
Salaries and wages	\$ 14,315	\$ 13,653	\$ 662	4.8%
Employee benefits	5,618	5,156	462	9.0%

Equipment	2,174	2,300	(126)	(5.5%)
Marketing	771	1,005	(234)	(23.3%)
FDIC Insurance	1,045	1,654	(609)	(36.8%)
Amortization of intangible assets	537	618	(81)	(13.1%)
<i>Other operating expenses:</i>				
Miscellaneous, franchise, and other taxes	1,452	1,363	89	6.5%
Postage	728	873	(145)	(16.6%)
Consulting, regulatory, accounting and advisory fees	1,037	905	132	14.6%
Other real estate owned and foreclosure expenses	393	730	(337)	(46.2%)
Legal fees	687	639	48	7.5%
Communications	658	668	(10)	(1.5%)
ATM and interchange expenses	833	671	162	24.1%
Supplies	625	592	33	5.6%
Other	2,016	1,743	273	15.7%
Total other operating expenses	8,429	8,184	245	3.0%
Total non-interest expense	\$ 35,665	\$ 35,491	\$ 174	0.5%

Non-interest expense increased \$0.2 million or 0.5% in the first quarter, as compared to the same period in 2011 due to higher salaries and wages and employee benefits, which were offset by decreased FDIC insurance, marketing and other real estate owned and foreclosure expenses. Expense reductions were achieved in many other expense categories. WesBanco's efficiency ratio improved to 60.6% in the first quarter of 2012 as compared to 61.6% in the first quarter of 2011.

Salaries and wages increased 4.8% for the three months ended March 31, 2012 compared 2011, primarily due to regular employee compensation increases and higher stock compensation expense. Employee benefits increased 9.0% primarily due to higher pension expense resulting from a higher projected benefit obligation due to expected lower pension asset growth and lower discount rate assumptions.

FDIC insurance decreased \$0.6 million due to the new calculation of FDIC insurance expense, effective April 1, 2011. FDIC insurance expense is expected to normalize quarter-over-quarter beginning in the second quarter 2012.

Marketing expenses decreased \$0.2 million in the first quarter of 2012 compared to 2011 primarily due to higher free checking incentives and advertising expenses due to timing of marketing campaigns early in 2011.

Other real estate owned and foreclosure expenses decreased due to ongoing liquidation efforts including the sale of a hospitality property in the fourth quarter of 2011 which operated at a loss in the first quarter of 2011.

ATM and interchange expenses, which include debit card processing fees, increased \$0.2 million or 24.1% due to a higher volume of debit card transactions during the period, which have continued to grow as customers move more towards electronic transactions.

INCOME TAXES

The provision for federal and state income taxes increased to \$3.3 million in 2012 compared to \$2.2 million in 2011. The increase in income tax expense was due to a \$2.8 million increase in pre-tax income, and a higher effective tax rate of 21.6% compared to 17.7% for 2011. The increase in the effective tax rate was primarily due to higher expected 2012 pre-tax income resulting in a lower percentage of tax-exempt income to total

income.

Table of Contents**FINANCIAL CONDITION**

Total assets increased 1.2% in the first three months of 2012 primarily as a result of a 4.2% increase in investment securities and cash and due from banks, which was funded by a 1.8% increase in deposits. Loan production increased significantly during the quarter, however, the net loan portfolio declined 0.5% from December 31, 2011 as the low interest rate environment and continued competition for high quality credits resulted in payoffs of certain performing commercial real estate loans that were refinanced in the secondary market or as a result of borrowers selling properties, and pay-downs on commercial lines of credit. The increase in deposits was primarily due to a 6.2% increase in savings deposits, which, combined with a 4.6% increase in money market deposits, and a 3.7% increase in demand deposits, more than offset a 2.9% decrease in CDs. The reduction in CDs was due to anticipated reductions through lower offered rates for new and rollover CDs, and customers' desire to shorten interest rate maturities. FHLB borrowings decreased 12.1% from December 31, 2011 as higher cost FHLB borrowings were paid down using available funding provided by the increase in deposits. Total shareholders' equity increased by approximately \$8.2 million, or 1.3%, as compared to December 31, 2011 due to net income exceeding dividends for the period by \$7.5 million, coupled with a \$0.8 million increase in unrealized gains in the available-for-sale portfolio, which are included net of the tax effect in accumulated other comprehensive income.

TABLE 6. COMPOSITION OF SECURITIES (1)

<i>(unaudited, dollars in thousands)</i>	March 31, 2012	December 31, 2011	\$ Change	% Change
Available-for-sale (at fair value)				
Other government agencies	\$ 147,397	\$ 198,720	\$ (51,323)	(25.8%)
Residential mortgage-backed securities and collateralized mortgage obligations of government agencies	711,408	588,092	123,316	21.0%
Obligations of states and political subdivisions	180,914	180,433	481	0.3%

Edgar Filing: WESBANCO INC - Form 10-Q

(1) At March 31, 2012 and December 31, 2011, there were no holdings of any one issuer, other than the U.S. government and certain federal or federally-related agencies, in an amount greater than 10% of WesBanco's shareholders' equity.

(2) Weighted average yields have been calculated on a taxable-equivalent basis using the federal statutory tax rate of 35%.

Total investment securities, which are a source of liquidity for WesBanco as well as a contributor to interest income, increased by \$56.5 million or 3.5% from December 31, 2011 to March 31, 2012. The overall increase was due to a 7.0% increase in the available-for-sale portfolio, while the held-to-maturity portfolio declined by 2.5%, particularly due to paydowns on residential mortgage-backed securities. The increase in total securities was funded by increases in deposit balances. For the three months ended March 31, 2012, security purchases totaled \$217.9 million. These purchases were partially offset by sales of \$3.1 million, and maturities, pay-downs, and calls totaling \$157.0 million.

Table of Contents**TABLE 7. COMPOSITION OF MUNICIPAL SECURITIES**

The following table presents the allocation of the municipal bond portfolio based on the combined S&P and Moody's ratings of the individual bonds:

<i>(unaudited, dollars in thousands)</i>	March 31, 2012		December 31, 2011	
	Amount	% of Total	Amount	% of Total
Municipal bonds (at fair value):				
AAA rating	\$ 56,576	10.2%	\$ 52,791	9.7%
AA rating	402,358	72.2%	388,659	71.4%
A rating	62,429	11.2%	64,125	11.7%
Below an A rating (1)	20,028	3.6%	24,351	4.5%
No rating	15,498	2.8%	14,580	2.7%
Total municipal bond portfolio	\$ 556,889	100.0%	\$ 544,506	100.0%

(1) All securities noted as below an A rating are rated as investment grade.

WesBanco's municipal bond portfolio consists of both taxable (primarily Build America Bonds) and tax-exempt general obligation and revenue bonds. The following table presents additional information regarding the municipal bond type and issuer (at fair value):

<i>(unaudited, dollars in thousands)</i>	March 31, 2012		December 31, 2011	
	Amount	% of Total	Amount	% of Total
Municipal bond type:				
General Obligation	\$ 399,258	71.7%	\$ 393,755	72.3%
Revenue	157,631	28.3%	150,751	27.7%
Total municipal bond portfolio	\$ 556,889	100.0%	\$ 544,506	100.0%
Municipal bond issuer:				
State Issued	\$ 43,504	7.8%	\$ 45,993	8.4%
Local Issued	513,385	92.2%	498,513	91.6%
Total municipal bond portfolio	\$ 556,889	100.0%	\$ 544,506	100.0%

The amortized cost of the municipal bond portfolio at March 31, 2012 and December 31, 2011 was \$525.2 million and \$514.5 million, respectively. The municipal bond portfolio is broadly spread across the U.S. with 60% of the portfolio's fair value in the top five states of Pennsylvania, Ohio, Texas, Illinois, and Michigan, respectively.

WesBanco uses prices from independent pricing services and, to a lesser extent, indicative (non-binding) quotes from independent brokers, to measure the fair value of its securities. WesBanco validates prices received from pricing services or brokers using a variety of methods, including, but not limited to, comparison to secondary pricing services, corroboration of pricing by reference to other independent market data such as secondary broker quotes and relevant benchmark indices, review of pricing by personnel familiar with market liquidity and other market-related conditions, review of pricing service methodologies, review of independent auditor reports received from the pricing service regarding its internal controls, and through review of inputs and assumptions used in pricing certain securities thinly traded or with limited observable data points. The procedures in place provide management with a sufficient understanding of the valuation models, assumptions, inputs and pricing to reasonably measure the fair value of WesBanco's securities. For additional disclosure relating to fair value measurements, refer to Note 7, Fair Value Measurements in the Consolidated Financial Statements.

Table of Contents**LOANS AND CREDIT RISK**

Loans represent WesBanco's single largest balance sheet asset classification and the largest source of interest income. Business purpose loans consist of commercial real estate (CRE) loans and other commercial and industrial (C&I) loans that are not secured by real estate. CRE loans are further segmented into land and construction loans, and loans for improved property. Consumer purpose loans consist of residential real estate loans, home equity lines of credit and other consumer loans. Loans held for sale generally consist of residential real estate loans originated for sale in the secondary market, but at times may also include other types of loans. The outstanding balance of each major category of the loan portfolio is summarized in Table 8.

The risk that borrowers will be unable or unwilling to repay their obligations and default on loans is inherent in all lending activities. Credit risk arises from many sources including general economic conditions, external events that impact businesses or industries, isolated events that impact a major employer, individual loss of employment or other personal calamities as well as changes in interest rates or the value of collateral. Credit risk is also impacted by a concentration of exposure within a geographic market or to one or more borrowers, industries or collateral types. The primary goal in managing credit risk is to minimize the impact of default by an individual borrower or group of borrowers. Credit risk is managed through the initial underwriting process as well as through ongoing monitoring and administration of the portfolio that varies by the type of loan. The Bank's credit policies establish standard underwriting guidelines for each type of loan and require an appropriate evaluation of the credit characteristics of each borrower. This evaluation includes the borrower's primary source of repayment capacity; the adequacy of collateral, if any, to secure the loan; the potential value of personal guarantees as secondary sources of repayment, and other factors unique to each loan that may increase or mitigate its risk. Credit bureau scores are also considered when evaluating consumer purpose loans as well as guarantors of business purpose loans. However, the Bank does not periodically update credit bureau scores subsequent to when loans are made to determine changes in credit history.

Credit risk is mitigated for all types of loans by continuously monitoring delinquency levels and pursuing collection efforts at the earliest stage of delinquency. The Bank also monitors general economic conditions, including employment, housing activity and real estate values in its market. The Bank also periodically evaluates and changes its underwriting standards when warranted based on market conditions, the historical performance of a category of the portfolio, or other external factors. Credit risk is also regularly evaluated for the impact of adverse economic and other events that increase the risk of default and the potential loss in the event of default to understand their impact on the Bank's earnings and capital.

TABLE 8. COMPOSITION OF LOANS (1)

<i>(unaudited, dollars in thousands)</i>	March 31, 2012		December 31, 2011	
	Amount	% of Loans	Amount	% of Loans
Commercial real estate:				
Land and construction	\$ 193,386	6.0%	\$ 175,867	5.4%
Improved property	1,481,955	45.8%	1,509,698	46.5%
Total commercial real estate	1,675,341	51.8%	1,685,565	51.9%
Commercial and industrial	410,369	12.7%	426,315	13.1%
Residential real estate:				
Land and construction	9,414	0.3%	9,654	0.3%
Other	628,465	19.4%	611,729	18.9%
Home equity	250,757	7.8%	251,785	7.8%
Consumer	249,351	7.7%	254,320	7.8%
Total portfolio loans	3,223,697	99.7%	3,239,368	99.8%
Loans held for sale	8,611	0.3%	6,084	0.2%
Total loans	\$ 3,232,308	100.0%	\$ 3,245,452	100.0%

(1) Loans are presented gross of the allowance for loan losses and net of unearned income, credit valuation adjustments, and unamortized net deferred loan fee income and loan origination costs.

Loan production increased 5% in the first quarter of 2012 compared to the fourth quarter of 2011 and 62% from the first quarter of 2011. However, total loans outstanding decreased 0.5% from December 31, 2011 to March 31, 2012 as the low interest rate environment and significant competition for high quality credits resulted in payoffs of certain performing CRE loans; and usage of C&I lines of credit declined

Edgar Filing: WESBANCO INC - Form 10-Q

from 48% to 43% of total line of credit availability between March 31, 2011 and March 31, 2012. CRE land and construction loans increased \$17.5 million or 10.0% as a result of the staged funding of new commercial construction loans for apartment buildings, pre-leased investment property and owner-occupied commercial real estate, net of \$2.1 million in charge-offs of non-performing land development loans. CRE improved property loans decreased \$27.7 million or 1.8% due primarily to early payoffs of certain performing loans. C&I loans decreased \$15.9 million or 3.7% due to the reduction in the usage of lines of credit. Other residential real estate increased \$16.7 million or 2.7% primarily due to management's decision to retain new 15 year fixed rate loans in the portfolio and selling fewer loans into the secondary market. Approximately 30% of all mortgage originations were sold into the secondary market in the first quarter of 2012, compared to 52% in the comparable 2011 period. Additionally, overall mortgage production during the three months ended March 31, 2012 increased 90% over the comparable 2011 period. Home equity lines of credit were relatively unchanged, while consumer loans decreased \$5.0 million or 2.0% due to reduced loan demand as consumers continued to deleverage, as well as stricter underwriting standards for certain types of consumer loans. Loans held for sale increased \$2.5 million due to timing differences on scheduled closings and seasonal factors influencing total volumes. All loan categories were also impacted by a continued focus on improving the overall profitability and quality of the loan portfolio through disciplined underwriting and pricing practices.

Table of Contents**NON-PERFORMING ASSETS, IMPAIRED LOANS AND LOANS PAST DUE 90 DAYS OR MORE**

Non-performing assets consist of non-accrual loans and TDRs, other real estate acquired through or in lieu of foreclosure, bank premises held for sale, and repossessed automobiles acquired to satisfy defaulted consumer loans.

TABLE 9. NON-PERFORMING ASSETS

<i>(unaudited, dollars in thousands)</i>	March 31, 2012	December 31, 2011
Non-accrual loans:		
Commercial real estate - land and construction	\$ 7,692	\$ 10,135
Commercial real estate - improved property	25,534	25,122
Commercial and industrial	6,758	8,238
Residential real estate	11,764	12,377
Home equity	1,068	1,331
Consumer	258	289
Total non-accrual loans	53,074	57,492
TDRs accruing interest:		
Commercial real estate-land and construction	7,120	7,410
Commercial real estate-improved property	15,641	17,318
Commercial and industrial	818	839
Residential real estate	4,321	3,844
Home equity	-	-
Consumer	-	-
Total TDRs accruing interest (1)	27,900	29,411
Total non-performing loans	\$ 80,974	\$ 86,903
Other real estate owned and repossessed assets	3,178	3,029
Total non-performing assets	\$ 84,152	\$ 89,932
Non-performing loans/total loans	2.51%	2.68%
Non-performing assets/total assets	1.50%	1.62%
Non-performing assets/total loans, other real estate and repossessed assets	2.61%	2.77%

(1) TDRs on nonaccrual of \$16.9 million and \$17.3 million at March 31, 2012 and December 31, 2011, respectively, are included in total nonaccrual loans.

Non-performing loans, which consist of non-accrual loans and TDRs, decreased \$5.9 million from December 31, 2011 to March 31, 2012 primarily due to principal reductions and charge-offs exceeding the migration of loans to those categories. At March 31, 2012, non-performing loans were at their lowest level since 2009. (Please see the Notes to the Consolidated Financial Statements for additional discussion.)

Other real estate owned and repossessed assets were relatively unchanged from December 31, 2011 to March 31, 2012, and decreased 42.8% from March 31, 2011 as a result of the sale of properties.

Table of Contents

The following table presents non-performing asset activity.

TABLE 10. NON-PERFORMING ASSET ACTIVITY

<i>(unaudited, in thousands)</i>	For the Three Months Ended March 31, 2012					
	TDRs	Non-Accrual Loans Other	Total	Accruing TDRs	Other Real Estate and Repossessed Assets	Total Non- Performing Assets
Beginning balance	\$ 17,287	\$ 40,205	\$ 57,492	\$ 29,411	\$ 3,029	\$ 89,932
Activity during the period:						
Additions to non-accrual or TDR	638	3,307	3,945	1,166	-	5,111
Foreclosed real estate	-	-	-	-	750	750
Repossessed other collateral	-	-	-	-	936	936
Charge-offs or charge-downs	(2,025)	(3,643)	(5,668)	-	-	(5,668)
Loans returned to accrual	(115)	(348)	(463)	-	-	(463)
Other real estate sold	-	-	-	-	(723)	(723)
Repossessed assets sold	-	-	-	-	(814)	(814)
Transfer between categories	1,621	-	1,621	(1,621)	-	-
Principal payments / other changes, net	(471)	(3,382)	(3,853)	(1,056)	-	(4,909)
Ending balance	\$ 16,935	\$ 36,139	\$ 53,074	\$ 27,900	\$ 3,178	\$ 84,152

TABLE 11. PAST DUE AND ACCRUING LOANS EXCLUDING TDRs

<i>(unaudited, dollars in thousands)</i>	March 31, 2012	December 31, 2011
Loans past due 90 days or more:		
Commercial real estate - land and construction	\$ 291	\$ -
Commercial real estate - improved property	-	18
Commercial and industrial	45	939
Residential real estate	1,609	2,881
Home equity	854	498
Consumer	347	799
Total portfolio loans	3,146	5,135
Loans held for sale	-	-
Total loans past due 90 days or more	\$ 3,146	\$ 5,135
Loans past due 30 to 89 days:		
Commercial real estate-land and construction	\$ 588	\$ 180
Commercial real estate-improved property	2,786	4,599
Commercial and industrial	1,275	1,442
Residential real estate	4,904	5,902
Home equity	1,774	2,266
Consumer	3,707	5,499
Total portfolio loans	15,034	19,888
Loans held for sale	-	-
Total loans past due 30 to 89 days	\$ 15,034	\$ 19,888
Loans past due 90 days or more and accruing to total loans	0.10%	0.16%
Loans past due 30-89 days to total loans	0.47%	0.61%

Loans past due 90 days or more and accruing interest excluding TDRs decreased \$2.0 million or 38.7% from December 31, 2011. These loans continue to accrue interest because they are both well secured and in the process of collection. Loans past due 30-89 days decreased \$4.9 million

Edgar Filing: WESBANCO INC - Form 10-Q

or 24.4% between December 31, 2011 and March 31, 2012 as a result of a continued focus on controlling early stage delinquency and moderate improvement in economic conditions.

Table of Contents**ALLOWANCE FOR CREDIT LOSSES**

The allowance for loan losses decreased \$0.4 million from December 31, 2011 to March 31, 2012 and represented 1.69% of total loans which was unchanged from December 31, 2011 and down from 1.89% at March 31, 2011. The allowance for loans individually evaluated increased by \$0.1 million to \$3.5 million from December 31, 2011 to March 31, 2012 while the allowance for loans collectively evaluated decreased \$0.5 million to \$50.9 million due to lower delinquency, reduced levels of classified and criticized loans, and lower net charge-offs.

The allowance for loan commitments from December 31, 2011 to March 31, 2012 was unchanged.

The allowance for credit losses by loan category, presented in Note 4 to the Consolidated Financial Statements, summarizes the impact of changes in various factors that affect the allowance for loan losses in each segment of the portfolio. The allowance for all segments is impacted by changes in loan balances as well as changes in historical loss rates adjusted for qualitative factors such as economic conditions. The CRE and C&I segments of the portfolio are also impacted by changes in the risk grading distribution of the portfolio.

Net charge-offs for the first quarter decreased \$1.7 million compared to the first quarter of 2011 and \$3.3 million compared to the fourth quarter of 2011. The decline in net charge-offs and improvements in credit quality enabled a decrease in the provision for credit losses of \$1.8 million for the first quarter of 2012 compared to the same quarter of 2011, and a decrease of \$3.4 million compared to the fourth quarter of 2011. Net annualized loan charge-offs to average loans were 0.82% for the three months ended March 31, 2012 compared to 1.03% for same period last year.

The internal risk rating is the primary factor for establishing the allowance for all commercial loans and portfolio segment loss history is the primary factor for establishing the allowance for residential real estate, home equity and consumer loans. The categorization of loans as non-performing is not as significant a factor as is the internal risk grade of the loan, although certain non-performing loans carry established specific reserves and they are also typically considered classified under the Bank's risk grading system. Total commercial criticized and classified loans at March 31, 2012 decreased \$72.5 million from March 31, 2011, and \$21.1 million from December 31, 2011 from principal reductions, orderly exits of certain loans, and charge-offs.

Table 12 summarizes the allocation of the allowance for credit losses to each category of the loan portfolio. The allowance allocated to CRE land and construction decreased despite an increase in loans and delinquencies in the category, due to the charge-off of two loans with specific reserves totaling \$1.8 million. The allowance for home equity loans also increased due to continued concerns about declining property values in certain markets. The allowance allocated to other segments of the portfolio as reductions in historical loss rates were offset by growth in the residential real estate segment and increased specific reserves in the CRE improved property segment.

TABLE 12. ALLOCATION OF THE ALLOWANCE FOR CREDIT LOSSES

<i>(unaudited, dollars in thousands)</i>	March 31, 2012	Percent of Total	December 31, 2011	Percent of Total
Allowance for loan losses:				
Commercial real estate - land and construction	\$ 4,431	8.1%	\$ 4,842	8.8%
Commercial real estate - improved property	24,899	45.4%	24,748	44.8%
Commercial and industrial	11,131	20.3%	11,414	20.7%
Residential real estate	5,709	10.4%	5,638	10.2%
Home equity	2,272	4.1%	1,962	3.5%
Consumer	5,414	9.8%	5,410	9.8%
Deposit account overdrafts	539	1.0%	796	1.4%
Total allowance for loan losses	\$ 54,395	99.1%	\$ 54,810	99.2%
Allowance for loan commitments:				
Commercial real estate - land and construction	\$ 53	0.1%	\$ 74	0.1%
Commercial real estate - improved property	6	0.0%	21	0.0%
Commercial and industrial	346	0.7%	323	0.6%
Residential real estate	4	0.0%	4	0.0%
Home equity	44	0.1%	33	0.1%

Edgar Filing: WESBANCO INC - Form 10-Q

Consumer		15	0.0%	13	0.0%
Total allowance for loan commitments		468	0.9%	468	0.8%
Total allowance for credit losses	\$	54,863	100.0%	\$ 55,278	100.0%

Although the allowance for credit losses is allocated as described in Table 12, the total allowance is available to absorb actual losses in any category of the loan portfolio. However, differences between management's estimation of probable losses and actual incurred losses in subsequent periods for any category may necessitate future adjustments to the provision for loan losses applicable to the category. Management believes the allowance for credit losses is appropriate to absorb probable losses at March 31, 2012.

Table of Contents**DEPOSITS****TABLE 13. DEPOSITS**

<i>(unaudited, dollars in thousands)</i>	March 31,		December 31,	
	2012	2011	\$ Change	% Change
Non-interest bearing demand	\$ 749,733	\$ 705,415	\$ 44,318	6.3%
Interest bearing demand	706,117	698,114	8,003	1.1%
Money market	825,577	789,036	36,541	4.6%
Savings deposits	633,504	596,549	36,955	6.2%
Certificates of deposit	1,558,926	1,604,752	(45,826)	(2.9%)
Total deposits	\$ 4,473,857	\$ 4,393,866	\$ 79,991	1.8%

Deposits, which represent WesBanco's primary source of funds, are offered in various account forms at various rates through WesBanco's 112 branches in West Virginia, Ohio and Western Pennsylvania. Total deposits increased by \$80.0 million or 1.8% during the quarter ended March 31, 2012.

Savings deposits, money market deposits and demand deposits increased by 6.2%, 4.6% and 3.7%, respectively, in the first three months of 2012 due to marketing, incentive compensation and focused retail and business banking strategies to obtain more account relationships and customers preference for short-term maturities.

The decline in certificates of deposit of 2.9% is due to the effects of an overall corporate strategy designed to re-mix retail deposit relationships with a focus on overall products that can be offered at a lower cost to the Bank. The decline in certificates of deposit is also impacted by customer preferences in the current low interest rate environment and other alternatives in the marketplace. WesBanco does not typically solicit brokered or other deposits out-of-market or over the internet, but does participate in the CDARS® program, which had \$256.0 million in total outstanding balances at March 31, 2012 of which \$180.5 million represented one-way buys, as compared to \$276.6 million in total outstanding balances at December 31, 2011. Certificates of deposit greater than \$250,000 were approximately \$161.6 million at March 31, 2012 as compared to \$162.5 million at December 31, 2011. Certificates of deposit of \$100,000 or more were approximately \$784.3 million at March 31, 2012 as compared to \$797.0 million at December 31, 2011. Certificates of deposit totaling approximately \$640.3 million at March 31, 2012 at an average cost of 0.97% are scheduled to mature within the next year. WesBanco will continue to focus on its core deposit strategies and improving its overall mix of transaction accounts to total deposits. From time to time the Bank may offer special promotions on certain certificates of deposit maturities and savings products based on competition, sales strategies, liquidity needs and wholesale borrowing costs, although in the current interest rate environment, CD rate offerings are generally lower for all maturities and types as compared to rates paid on existing CDs and the Bank has also recently lowered its money market and savings account rates to further improve its cost of deposits.

BORROWINGS**TABLE 14. BORROWINGS**

<i>(unaudited, dollars in thousands)</i>	March 31,		December 31,	
	2012	2011	\$ Change	% Change
Federal Home Loan Bank borrowings	\$ 147,913	\$ 168,186	\$ (20,273)	(12.1%)
Other short-term borrowings	187,632	196,887	(9,255)	(4.7%)
Junior subordinated debt owed to unconsolidated subsidiary trusts	106,074	106,066	8	0.0%
Total borrowings	\$ 441,619	\$ 471,139	\$ (29,520)	(6.3%)

Borrowings are currently a less significant source of funding for WesBanco compared to total deposits. During the first quarter of 2012, WesBanco reduced other short-term borrowings and paid down Federal Home Loan Bank borrowings scheduled to mature utilizing funds provided by lower cost deposits or other available cash flows for their payoff. Additional maturities of \$106.5 million are scheduled for the remainder of the year, mostly in the second half of 2012, which will result in a further lowering of the cost of wholesale borrowings as these borrowings are paid off with available funds or renewed at lower market rates.

Other short-term borrowings, which consist primarily of federal funds purchased and securities sold under agreements to repurchase were \$187.6 million at March 31, 2012 as compared to \$196.9 million at December 31, 2011. The decrease in these borrowings has occurred primarily as a result of a \$6.2 million decrease in securities sold under agreements to repurchase. A revolving line of credit with another bank is available at the parent company. The revolving line of credit, which accrues interest at an adjusted LIBOR rate, provides for aggregate borrowings secured by a pledge of WesBanco's banking subsidiary common stock of up to \$25.0 million. There were no outstanding balances as of March 31, 2012 or December 31, 2011.

Table of Contents**OFF-BALANCE SHEET ARRANGEMENTS**

WesBanco enters into financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, letters of credit, loans approved but not closed, overdraft limits and contingent obligations to purchase loans funded by other entities. Since many of these commitments expire unused or partially used, these commitments may not reflect future cash requirements. Please refer to Note 8, Commitments and Contingent Liabilities, of the Consolidated Financial Statements and the Loans and Credit Risk section of this MD&A for additional information.

CAPITAL RESOURCES

Shareholders' equity was \$642.0 million at March 31, 2012 compared to \$633.8 million at December 31, 2011. Total equity increased due to net income during the current three month period of \$12.0 million and a \$0.6 million other comprehensive income gain. The increase was partially offset by the declaration of common shareholder dividends totaling \$4.5 million for the three months ended March 31, 2012. WesBanco also increased its quarterly dividend rate to \$0.17 per share in February, representing a 6.3% increase over the prior quarter rate.

WesBanco is subject to regulatory promulgated leverage and risk-based capital guidelines that measure capital relative to risk-weighted assets and off-balance sheet instruments. The Bank, as well as WesBanco maintain Tier 1, total capital and leverage ratios well above minimum regulatory levels. There are various legal limitations under federal and state laws that limit the payment of dividends from the Bank to WesBanco. As of March 31, 2012, under FDIC regulations, WesBanco could receive, without prior regulatory approval, a dividend of approximately \$19.8 million from the Bank. WesBanco seeks to continue improving its consolidated and Bank capital ratios primarily from retaining a majority of its increasing earnings.

The following table summarizes risk-based capital amounts and ratios for WesBanco and the Bank for the periods indicated:

(unaudited, dollars in thousands)	Minimum Value ⁽¹⁾	Well Capitalized ⁽²⁾	March 31, 2012		December 31, 2011		Minimum Amount ⁽¹⁾	Amount	Ratio	Amount ⁽¹⁾
			Amount	Ratio	Amount	Ratio				
WesBanco, Inc.										
Tier 1 leverage	4.00% ⁽³⁾	N/A	\$ 465,555	8.81%	\$ 211,475	\$ 457,568	8.71%	\$ 210,108		
Tier 1 capital to risk-weighted assets	4.00%	6.00%	465,555	12.89%	144,463	457,568	12.68%	144,335		
Total capital to risk-weighted assets	8.00%	10.00%	510,821	14.14%	288,926	502,800	13.93%	288,669		
WesBanco Bank, Inc.										
Tier 1 leverage	4.00%	5.00%	\$ 421,842	8.01%	\$ 210,697	\$ 417,241	7.97%	\$ 209,339		
Tier 1 capital to risk-weighted assets	4.00%	6.00%	421,842	11.75%	143,564	417,241	11.62%	143,672		
Total capital to risk-weighted assets	8.00%	10.00%	466,831	13.01%	287,128	462,268	12.87%	287,344		

(1) Minimum to remain adequately capitalized.

(2) Well capitalized under prompt corrective action regulations.

(3) Minimum requirement is 3% for certain highly-rated bank holding companies.

Table of Contents**LIQUIDITY RISK**

Liquidity is defined as a financial institution's capacity to meet its cash and collateral obligations at a reasonable cost. Liquidity risk is the risk that an institution's financial condition or overall safety and soundness is adversely affected by an inability, or perceived inability, to meet its obligations. An institution's obligations, and the funding sources to meet them, depend significantly on its business mix, balance sheet structure, and the cash flows of its on- and off-balance sheet obligations. Institutions confront various internal and external situations that can give rise to increased liquidity risk including funding mismatches, market constraints on funding sources, contingent liquidity events, changes in economic conditions, and exposure to credit, market, operation, legal and reputation risk. WesBanco actively manages liquidity risk through its ability to provide adequate funds to meet changes in loan demand, unexpected outflows in deposits and other borrowings as well as to take advantage of market opportunities and meet operating cash needs. This is accomplished by maintaining liquid assets in the form of securities, sufficient borrowing capacity and a stable core deposit base. Liquidity is centrally monitored by WesBanco's Asset/Liability Committee (ALCO).

WesBanco determines the degree of required liquidity by the relationship of total holdings of liquid assets to the possible need for funds to meet unexpected deposit losses and/or loan demands. The ability to quickly convert assets to cash at a minimal loss is a primary function of WesBanco's investment portfolio management. Federal funds sold and U.S. Treasury and government agency securities maturing within three months are classified as secondary reserve assets. These secondary reserve assets, combined with the cash flow from the loan portfolio and the remaining sectors of the investment portfolio, and other sources, adequately meet the liquidity requirements of WesBanco.

Securities are the principal source of short-term liquidity for WesBanco. Securities totaled \$1.7 billion at March 31, 2012, of which \$1.1 billion were classified as available-for-sale, including net unrealized pretax gains of \$18.8 million. The remaining securities were classified as held-to-maturity. At March 31, 2012, WesBanco has approximately \$13.1 million in securities scheduled to mature within one year; however, additional cash flows may be anticipated from approximately \$199.0 million in callable bonds which have call dates within the next year, from projected prepayments on mortgage-backed securities and collateralized mortgage obligations of approximately \$149.4 million based on current prepayment speeds, from loans held for sale totaling \$8.6 million, from accruing loans scheduled to mature within the next year of \$506.8 million and from normal loan repayments anticipated to be \$649.9 million within the next year. At March 31, 2012, WesBanco had \$157.2 million of cash and cash equivalents, which serves as operating cash for the branches and an additional source of liquidity. Sources of liquidity within the next year listed above approximate \$1.7 billion at March 31, 2012.

Deposit flows are another principal factor affecting overall WesBanco liquidity. Deposits totaled \$4.5 billion at March 31, 2012. Deposit flows are impacted by current interest rates, products and rates offered by WesBanco versus various forms of competition, as well as customer behavior. Certificates of deposit scheduled to mature within one year totaled \$640.3 million at March 31, 2012 which includes jumbo regular certificates of deposit totaling \$168.2 million with a weighted-average cost of 0.97% and jumbo CDARS[®] deposits of \$101.5 million with a cost of 1.18%. In addition to the historically relatively stable core deposit base, WesBanco maintains a line of credit with the FHLB as an additional funding source. Available lines of credit with the FHLB at March 31, 2012 approximated \$1.0 billion, which is unchanged from December 31, 2011. At March 31, 2012, the Bank had unpledged available-for-sale securities with an amortized cost of \$579.7 million, a portion of which is an available liquidity source, or could be pledged to secure additional FHLB borrowings. In addition, WesBanco participates in the Federal Reserve Bank's Borrower-in-Custody Program (BIC) whereby WesBanco pledges certain consumer loans as collateral for borrowings. At March 31, 2012, WesBanco had a BIC line of credit totaling \$147.1 million, none of which was outstanding. Alternative funding sources may include the utilization of existing overnight lines of credit with third party banks totaling \$165.0 million, none of which was outstanding at March 31, 2012, along with seeking other lines of credit, borrowings under repurchase agreement lines, increasing deposit rates to attract additional funds, accessing brokered deposits, or selling securities available-for-sale or certain types of loans.

Other short-term borrowings of \$187.6 million at March 31, 2012 consisted of callable repurchase agreements and several overnight sweep checking accounts for large commercial customers. There has not been a significant fluctuation in the average deposit balance of these overnight sweep checking accounts during 2012. The repurchase agreements require securities to be pledged equal to or greater than the instrument's purchase price and may be called within the next year. The overnight sweep checking accounts require securities to be pledged equal to or greater than the deposit balance. During 2011, new regulatory guidelines permitted, for the first time, the payment of interest on certain corporate checking accounts. These regulations did not significantly impact sweep account and related deposit account balances.

The FHLB requires securities to be specifically pledged to the FHLB and maintained in a FHLB approved custodial arrangement if the member wishes to include such securities in the maximum borrowings capacity calculation. WesBanco has elected not to specifically pledge to the FHLB otherwise unpledged securities. To increase its remaining capacity, WesBanco can at any time decide to pledge a portion of its unpledged securities to the FHLB.

The principal sources of parent company liquidity are dividends from the Bank, \$29.9 million in cash and investments on hand, and a \$25 million revolving line of credit with another bank, which did not have an outstanding balance at March 31, 2012. WesBanco is in compliance with all loan covenants. There are various legal limitations under federal and state laws that limit the payment of dividends from the Bank to the

Edgar Filing: WESBANCO INC - Form 10-Q

parent company. As of March 31, 2012, under FDIC and state of West Virginia regulations, WesBanco could receive, without prior regulatory approval, dividends of approximately \$19.8 million from the Bank.

At March 31, 2012, WesBanco had outstanding commitments to extend credit in the ordinary course of business approximating \$858.0 million, compared to \$847.4 million at December 31, 2011. On a historical basis, only a small portion of these commitments will result in an outflow of funds. Please refer to Note 8, Commitments and Contingent Liabilities, of the Consolidated Financial Statements and the Loans and Credit Risk section of this MD&A for additional information.

Federal financial regulatory agencies recently issued guidance to provide sound practices for managing funding and liquidity risk and strengthening liquidity risk management practices. The guidance recommends that financial institutions maintain a comprehensive management process for identifying, measuring, monitoring, and controlling liquidity risk and that liquidity risk management be fully integrated into its risk

Table of Contents

management process. WesBanco has completed the implementation of these policies, and management believes WesBanco has sufficient current liquidity to meet current obligations to borrowers, depositors and others as of March 31, 2012 and that WesBanco's current liquidity risk management policies and procedures adequately address the recently issued guidance.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The disclosures set forth in this item are qualified by the section captioned "Forward-Looking Statements" included in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, of this report.

MARKET RISK

The primary objective of WesBanco's ALCO is to maximize net interest income within established policy parameters. This objective is accomplished through the management of balance sheet composition, market risk exposures arising from changing economic conditions and liquidity risk.

Market risk is defined as the risk of loss due to adverse changes in the fair value of financial instruments resulting from fluctuations in interest rates and equity prices. Management considers interest rate risk to be WesBanco's most significant market risk. Interest rate risk is the exposure to adverse changes in net interest income due to changes in interest rates. The relative consistency of WesBanco's net interest income is largely dependent on effective management of interest rate risk. As interest rates change in the market, rates earned on interest rate sensitive assets and rates paid on interest rate sensitive liabilities do not necessarily move concurrently. Differing rate sensitivities may arise because fixed rate assets and liabilities may not have the same maturities, or because variable rate assets and liabilities differ in the timing and/or the percentage of rate changes.

WesBanco's ALCO, comprised of senior management from various functional areas, monitors and manages interest rate risk within Board approved policy limits. Interest rate risk is monitored primarily through the use of an earnings simulation model. The model is highly dependent on various assumptions, which change regularly as the balance sheet and market interest rates change. The key assumptions and strategies employed are analyzed bi-monthly and reviewed and documented by the ALCO.

The earnings simulation model projects changes in net interest income resulting from the effect of changes in interest rates. Forecasting changes in net interest income requires management to make certain assumptions regarding loan and security prepayment rates, bond call dates, and adjustments to non-maturing deposit rates, which may not necessarily reflect the manner in which actual yields and costs respond to changes in market interest rates. Assumptions used are based primarily on historical experience and current market rates. Security portfolio maturities and prepayments are assumed to be reinvested in similar instruments and callable bond forecasts are adjusted at varying levels of interest rates. While management believes such assumptions to be reasonable, there can be no assurance that assumed prepayment rates, callable bond forecasts and non-maturing deposit rates will approximate actual future results. Moreover, the net interest income sensitivity chart presented in Table 1, "Net Interest Income Sensitivity," assumes the composition of interest sensitive assets and liabilities existing at the beginning of the period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve, regardless of the duration of the maturity or re-pricing of specific assets and liabilities. Since the assumptions used in the model relative to changes in interest rates are uncertain, the simulation analysis may not be indicative of actual results. In addition, the analysis may not consider all actions that management could employ in response to changes in interest rates and various earning asset and costing liability balances.

Management is aware of the significant effect inflation or deflation has upon interest rates and ultimately upon financial performance. WesBanco's ability to cope with inflation or deflation is best determined by analyzing its capability to respond to changing market interest rates, as well as its ability to manage the various elements of non-interest income and expense during periods of increasing or decreasing inflation or deflation. WesBanco monitors the level and mix of interest-rate sensitive assets and liabilities through ALCO in order to reduce the impact of inflation or deflation on net interest income. Management also controls the effects of inflation or deflation by conducting periodic reviews of the prices and terms of its various products and services, both in terms of the costs to offer the services as well as outside market influences upon such pricing, by introducing new products and services or reducing the availability of existing products and services, and by controlling overhead expenses.

Interest rate risk policy limits are determined by measuring the anticipated change in net interest income over a twelve month period assuming an immediate and sustained 100 and 200 basis point increase or decrease in market interest rates compared to a stable rate environment or base model. WesBanco's current policy limits this exposure to a reduction of 5.0% and 12.5% or less, respectively, of net interest income from the base model over a twelve month period. The table below shows WesBanco's interest rate sensitivity at March 31, 2012 and December 31, 2011 assuming both a 100 and 200 basis point interest rate change, compared to a base model. Due to the current low interest rate environment,

Edgar Filing: WESBANCO INC - Form 10-Q

particularly for short-term rates, the 200 basis point decreasing change is not calculated, and instead a 300 basis point rising rate environment is shown. The policy limit for an increasing 300 basis point rising rate environment is a negative 25%.

Table of Contents**TABLE 1. NET INTEREST INCOME SENSITIVITY**

Immediate Change in Interest Rates (basis points)	Percentage Change in Net Interest Income from Base over One Year		ALCO
	March 31, 2012	December 31, 2011	Guidelines
+300	(0.1%)	0.5%	- 25%
+200	0.7%	1.3%	- 12.5%
+100	0.9%	1.7%	- 5%
-100	(4.0%)	(3.5%)	- 5%

As per the table above, the earnings simulation model at March 31, 2012 currently projects that net interest income for the next twelve month period would decrease by 4.0% if interest rates were to fall immediately by 100 basis points, compared to a decrease of 3.5% for the same scenario as of December 31, 2011.

For rising rate scenarios, net interest income would increase by 0.9% and 0.7%, and decrease by 0.1% if rates increased by 100, 200 and 300 basis points, respectively, as of March 31, 2012 compared to increases of 1.7%, 1.3% and 0.5% in a 100, 200 and 300 basis point increasing rate environment as of December 31, 2011.

The balance sheet is slightly less asset sensitive as of March 31, 2012, compared to December 31, 2011 due to duration extension and higher balances in the investment portfolio, and changes in the deposit mix and the overall level and term of short-term borrowings, offset somewhat by greater cash and due from banks. Should rates rise more rapidly and by a higher amount, which is not currently anticipated in the short term, the asset sensitivity may be somewhat neutralized due to slower anticipated prepayment speeds and extension risk associated with residential mortgages and mortgage-backed securities. In addition, variable rate commercial loans with rate floors approximated \$972.1 million at March 31, 2012, which represented approximately 47% of commercial loans with an average floor of 4.93%. In the current flat to decreasing interest rate environment, WesBanco expects that the net interest margin may be somewhat negatively impacted throughout 2012, as short term interest rates are not anticipated to increase until sometime in 2014, and loan runoff and investment security maturities are necessarily reinvested at lower rates. The bank continues to experience pricing competition for new quality loans which may also result in reduced spread income from the loan portfolio.

The Bank has significant additional borrowing capacity with the FHLB of Pittsburgh, the Federal Reserve Bank of Cleveland, and various correspondent banks, and may utilize these funding sources as necessary to mitigate the impact on our balance sheet of embedded options in commercial and residential loans and to lengthen liabilities to help offset mismatches in various asset maturities. CDARS[®] deposits have also been used to lengthen maturities in certificates of deposit, more so in prior periods.

Current balance sheet strategies to reduce the impact of decreasing margins in a low rate environment, where asset yields continue to reduce as reinvestment of cash flows occur and liability costs are not able to be reduced in the same proportion, include:

increasing fixed rate loans; primarily commercial and residential;

investing non-essential available short-term liquidity;

marketing programs to increase the mix of certain types of transaction accounts versus short-term CDs;

reinvestment of securities cash flows into a mix of short to intermediate term collateralized mortgage obligations and 10-15 year state and municipal securities;

utilizing swaps for certain new commercial real estate loans; and

paying down maturing FHLB and other short-term borrowings with available cash.

As an alternative to the immediate rate shock analysis, the ALCO monitors interest rate risk by ramping or increasing interest rates 200 basis points gradually over a twelve month period. WesBanco's current policy limits this exposure to 5.0% of net interest income from the base model for a twelve month period. Management believes that the ramping analysis reflects a more realistic movement of interest rates, whereas the immediate rate shock reflects a less likely scenario. The simulation model at March 31, 2012, using the 200 basis point increasing rate ramp analysis, projects that net interest income would increase 1.1% over the next twelve months, compared to a 2.0% increase at December 31, 2011.

WesBanco also periodically measures the economic value of equity, which is defined as the market value of tangible equity in various increasing and decreasing rate scenarios. At March 31, 2012, the market value of tangible equity as a percent of base in a 200 basis point rising rate environment indicates an increase of 11.6% compared to an increase of 12.4% at December 31, 2011. In a 100 basis point falling rate environment, the model indicates an increase of 3.6%, compared to an increase of 5.3% as of December 31, 2011. WesBanco's policy is to limit such change to minus 25% for a 200 basis point change in interest rates, as long as the Tier 1 leverage capital ratio is not forecasted to decrease below 5.0% as a result of the change. Recent improvements in economic value of tangible equity is as a result of changes in assumptions about market values associated with certain deposit liabilities, specifically reflecting growth in non-interest bearing demand deposits and other transaction account types, while short term maturing CDs and the payoff of maturing FHLB borrowings also improved the total liability valuation. In a rising rate environment, non-interest bearing deposits and other low cost transaction accounts are worth more than in the current low interest rate environment or if rates were to drop by 100 basis points. For liabilities, this equates to a below cost fair market value as rates rise, which results in increased equity fair value.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES WesBanco's Chief Executive Officer (CEO) and Chief Financial Officer (CFO) have concluded that WesBanco's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended), based on their evaluation of these controls and procedures as of the end of the period covered by this Form 10-Q, are effective at the reasonable assurance level as discussed below to ensure that information required to be disclosed by WesBanco in the reports it files under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to WesBanco's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

LIMITATIONS ON THE EFFECTIVENESS OF CONTROLS WesBanco's management, including the CEO and CFO, does not expect that WesBanco's disclosure controls and internal controls will prevent all errors and all fraud. While WesBanco's disclosure controls and procedures are designed to provide reasonable assurance of achieving their objective, no control system, no matter how well conceived and operated, can provide absolute assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls.

CHANGES IN INTERNAL CONTROLS There were no changes in WesBanco's internal control over financial reporting that occurred during our fiscal quarter ended March 31, 2012 as required to be reported by paragraph (d) of Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934, that materially affected, or are reasonably likely to materially affect, WesBanco's internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

WesBanco is involved in lawsuits, claims, investigations and proceedings which arise in the ordinary course of business. There are no such matters pending that WesBanco expects to be material in relation to its business, financial condition or results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

As of March 31, 2012, WesBanco had a current stock repurchase plan in which up to one million shares can be acquired. The plan was originally approved by the Board of Directors on March 21, 2007 and provides for shares to be repurchased for general corporate purposes, which may include a subsequent resource for potential acquisitions, shareholder dividend reinvestment and employee benefit plans. The timing, price and quantity of purchases are at the discretion of WesBanco, and the plan may be discontinued or suspended at any time. There were no repurchases during the first quarter of 2012, other than those for KSOP, dividend reinvestment plans and repurchases from employees for the payment of withholding taxes to facilitate the vesting of restricted stock.

The following table presents the monthly share purchase activity during the quarter ended March 31, 2012:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Maximum Number of Shares that May Yet Be Purchased Under the Plans
Balance at December 31, 2011				584,325
January 1, 2012 to January 31, 2012				
Open market repurchases	-	-	-	584,325
Other transactions (1)	20,321	\$ 20.57	N/A	N/A
February 1, 2012 to February 29, 2012				
Open market repurchases	-	-	-	584,325
Other transactions (1)	3,832	\$ 19.90	N/A	N/A
March 1, 2012 to March 31, 2012				
Open market repurchases	-	-	-	584,325
Other repurchases (2)	493	\$ 19.07	493	583,832
Other transactions (1)	2,349	19.36	N/A	N/A
First Quarter 2012				
Open market repurchases	-	-	-	584,325
Other repurchases (2)	493	\$ 19.07	493	583,832
Other transactions (1)	26,502	20.37	N/A	N/A
Total	26,995	\$ 20.35	493	583,832

(1) Consists of open market purchases transacted in the KSOP and dividend reinvestment plans.

(2) Consists of repurchases from employees for the payment of withholding taxes to facilitate the vesting of restricted stock.
