## CHICAGO RIVET &amp; MACHINE CO.

## NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. In the opinion of the Company, the accompanying unaudited interim financial statements contain all adjustments necessary to present fairly the financial position of the Company as of June 30, 2012 (unaudited) and December 31, 2011 (audited) and the results of operations and changes in cash flows for the indicated periods. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted from these unaudited financial statements in accordance with applicable rules. Please refer to the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The results of operations for the three and six-month period ending June 30, 2012 are not necessarily indicative of the results to be expected for the year.

2. The Company extends credit on the basis of terms that are customary within our markets to various companies doing business primarily in the automotive industry. The Company has a concentration of credit risk primarily within the automotive industry and in the Midwestern United States.

3. The Company is, from time to time, involved in litigation, including environmental claims and contract disputes, in the normal course of business. While it is not possible at this time to establish the ultimate amount of liability with respect to contingent liabilities, including those related to legal proceedings, management is of the opinion that the aggregate amount of any such liabilities, for which provision has not been made, will not have a material adverse effect on the Company's financial position.

4. The Company's effective tax rates were approximately 32.8% and 32.7% for the second quarter of 2012 and 2011, respectively, and 32.6% and 32.9% for the six months ended June 30, 2012 and 2011, respectively. Rates were lower than the U.S. federal statutory rate primarily due to the Domestic Production Activities Deduction allowed under Internal Revenue Code Section 199.

The Company's federal income tax returns for the 2009, 2010 and 2011 tax years are subject to examination by the Internal Revenue Service (IRS). While it may be possible that a reduction could occur with respect to the Company's unrecognized tax benefits as an outcome of an IRS examination, management does not anticipate any adjustments that would result in a material change to the results of operations or financial condition of the Company. No statutes have been extended on any of the Company's federal income tax filings. The statute of limitations on the Company's 2009, 2010 and 2011 federal income tax returns will expire on September 15, 2013, 2014 and 2015, respectively.

The Company's state income tax returns for the 2009 through 2011 tax years remain subject to examination by various state authorities with the latest closing period on October 31, 2015. The Company is not currently under examination by any state authority for income tax purposes and no statutes for state income tax filings have been extended.

5. Inventories are stated at the lower of cost or net realizable value, cost being determined by the first-in, first-out method. A summary of inventories is as follows:

	June 30, 2012	December 31, 2011
Raw material	\$ 1,969,458	\$ 2,016,032
Work-in-process	1,965,002	1,984,368
Finished goods	1,868,018	1,760,640
Inventories, Gross	5,802,478	5,761,040
Less: Valuation reserves	(575,000)	(549,000)

Edgar Filing: CHICAGO RIVET & MACHINE CO - Form 10-Q

CHICAGO RIVET & MACHINE CO.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Revenues for the second quarter of 2012, as well as for the current year to date, reflect continued growth compared to the year earlier periods. Net sales for the second quarter of 2012 were \$8,429,201, an increase of \$295,097, or 3.6%, compared with the year earlier quarter. For the first half of 2012, net sales totaled \$17,629,519, an improvement of \$1,681,047, or 10.5%, compared with the first half of 2011. The increase in sales reflects the continued improvement in our operations, as well as an increase in U.S. automotive production, upon which we rely for the majority of our revenue. Net income for the second quarter of 2012 was \$440,432, or \$0.46 per share, compared with \$587,521, or \$0.61 per share, in the second quarter of 2011. The decline was primarily due to certain gains reported in the second quarter of 2011. Net income for the first half of 2012 increased to \$934,166, or \$0.97 per share, compared with \$704,543, or \$0.73 per share, reported in 2011.

Fastener segment revenues for the second quarter of 2012 improved 4.1% to \$7,605,981, from the \$7,307,006 reported in the second quarter of 2011. This marks the eleventh consecutive quarter of increased sales for the fastener segment compared with the year earlier quarter. With the majority of such revenues derived from the automotive industry, the segment has benefited from increased production and sales of domestic autos and trucks during the current year. For the first six months of the year, fastener segment revenues were \$15,940,101, an increase of \$1,523,440, or 10.6%, compared to the first half of 2011. While recent increases in raw material prices eased somewhat in the second quarter, higher labor, supplies and repair expenses offset the increase in sales during the second quarter, resulting in a fastener segment gross margin of \$1,576,126 compared to \$1,640,684 in the second quarter of 2011. For the first six months of 2012, fastener segment gross margin has improved to \$3,369,087, from \$2,887,645 a year earlier, as the growth in sales has more than offset increases in costs of sales.

Assembly equipment segment revenues were \$823,220 in the second quarter of 2012, a decline of less than 1% compared to the second quarter of 2011, when revenues were \$827,098. However, the strong results reported in the first quarter have resulted in a 10.3% overall increase in assembly equipment segment sales, to \$1,689,418, for the first half of 2012 compared to the \$1,531,811 reported for the first half of 2011. By reducing certain manufacturing overhead items from year earlier levels, segment gross margin improved in the second quarter compared to last year by approximately \$32,000. For the first half of the year, the increase in sales and overhead reductions combined to improve the assembly equipment segment gross margin by approximately \$120,000 compared to the first half of 2011.

Selling and administrative expenses for the second quarter of 2012 were \$1,280,038, an increase of \$21,535, or 1.7%, compared with the year earlier quarter. The increase is primarily related to higher payroll and related expenses. For the first six months of the year, selling and administrative expenses have increased \$128,128, from \$2,543,508 in 2011 to \$2,671,636 in 2012. Payroll and related expenses account for approximately \$48,000 of the increase while profit sharing expense has increased by \$41,000 due to improved profitability, compared to last year. The remaining net increase includes \$29,000 related to computer system upgrades, and various smaller items. Selling and administrative expenses as a percentage of net sales for the first half of 2012 declined to 15.2%, from 15.9% in 2011.

Gains from the disposal of property and equipment were \$27,500 in the second quarter of 2012 and \$57,500 for the current year to date, compared to \$187,073 and \$189,063 for the respective periods of 2011. Included in the second quarter of 2011 and the first six months of that year was a gain of approximately \$142,000 from the sale of our Jefferson, Iowa property.

Working capital at June 30, 2012 amounted to \$15.6 million, an increase of approximately \$.6 million from the beginning of the year. Most of the net increase is due to a \$1 million greater accounts receivable balance, related to the increase in sales during the quarter, compared to the seasonally lower sales late in the fourth quarter of 2011. Partially offsetting this change are increases in accounts payable of approximately \$.4 million and accrued payroll of \$.3 million that reflect the increased level of operations. The net result of these changes and other cash flow items on cash, cash equivalents and certificates of deposit was a \$.2 million increase in such total balances from the beginning of the year, to \$6.8 million. Management believes that current cash, cash equivalents and operating cash flow will provide adequate working capital for the foreseeable future.

We are pleased to report improved sales in both the second quarter and the current year to date. While net income in the second quarter declined compared to the prior year quarter, primarily due to the larger gains reported in 2011, net income for the first half of 2012 has improved 32.6% over 2011. The recovery in the domestic economy remains weak, due in part to high unemployment and low consumer confidence. Most published reports see little

**Table of Contents**

improvement in the near term in that regard, although projections for domestic automotive sales remain well ahead of last year's totals, which is a positive factor for us. We are cautious in our outlook due to factors over which we have little influence, but by having maintained a sound financial condition in this challenging environment, we will be able to continue to invest in our business and pursue opportunities to improve our operations and bottom line. We will make adjustments to our activities which we feel are necessary based on conditions in our markets, while maintaining the high level of quality and reliability of service our customers demand.

*This discussion contains certain forward-looking statements which are inherently subject to risks and uncertainties that may cause actual events to differ materially from those discussed herein. Factors which may cause such differences in events include, those disclosed under Risk Factors in our Annual Report on Form 10-K and in the other filings we make with the United States Securities and Exchange Commission. These factors, include among other things: conditions in the domestic automotive industry, upon which we rely for sales revenue, the intense competition in our markets, the concentration of our sales to two major customers, the price and availability of raw materials, labor relations issues, losses related to product liability, warranty and recall claims, costs relating to environmental laws and regulations, the loss of the services of our key employees and difficulties in achieving expected cost savings. Many of these factors are beyond our ability to control or predict. Readers are cautioned not to place undue reliance on these forward-looking statements. We undertake no obligation to publish revised forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.*

Item 4. Controls and Procedures.

(a) Disclosure Controls and Procedures. The Company's management, with the participation of the Company's Chief Executive Officer and President, Chief Operating Officer and Treasurer (the Company's principal financial officer), has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on such evaluation, the Company's Chief Executive Officer and President, Chief Operating Officer and Treasurer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act.

(b) Internal Control Over Financial Reporting. There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
