Fair Value Measurements - Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial reporting purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Trust's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to the Trust's most recent financial statements as contained in its semi-annual report.

The following tables summarize the Trust's investments and derivative financial instruments categorized in the disclosure hierarchy as of July 31, 2012:

<b>Assets:</b>				
Cash	\$ 7,341			\$ 7,341

Such valuations are based on unobservable inputs. A significant change in the unobservable inputs could result in a significantly lower or higher value in such Level 3 investments.

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

<sup>1</sup> Transfers into and transfers out of Level 3 represent the values as of the beginning of the reporting period. Prior to January 31, 2012, only significant transfers into and out of Level 3 were required to be disclosed. For the interim period, February 1, 2012 through July 31, 2012, all transfers into and out of Level 3 are required to be disclosed. As of January 31, 2012, the Trust used significant unobservable inputs in determining the value of certain investments. As of July 31, 2012, the Trust used observable inputs in determining the value on the same investments. As a result, investments with a beginning of period value of \$12,900,828 transferred from Level 3 to Level 2 in the disclosure hierarchy.

<sup>2</sup> The change in unrealized appreciation/depreciation on investments still held as of July 31, 2012 was \$43,228.

A reconciliation of Level 3 investments is presented when the Trust had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets.
