PART I

Item 1. Business Overview

We are a leading provider of information technology (IT), consulting and business process services, dedicated to helping the world's leading companies build stronger businesses. Our clients engage us to help them build more efficient operations, provide solutions to critical business and technology problems, and to help them drive technology-based innovation and growth. Our core competencies include: Business, Process, Operations and IT Consulting, Application Development and Systems Integration, Enterprise Information Management, or EIM, Application Testing, Application Maintenance, IT Infrastructure Services, or IT IS, and Business Process Services, or BPS. We tailor our services to specific industries and utilize an integrated global delivery model. This seamless global sourcing model combines client service teams based on-site at the client locations with delivery teams located at dedicated near-shore and offshore global delivery centers that are located primarily in India, China, the United States, Canada, Argentina, Brazil, Hungary, France and the Philippines.

Industry Background

In today's complex business environment, many companies face intense competitive pressure and rapidly changing market dynamics, driven by such factors as changes in the economy, government regulations, globalization, virtualization and other technology innovations. At the same time, companies must evaluate the effect of emerging technologies such as social networks, mobile devices, advanced analytics and cloud computing, or SMAC, on their business operations. These technologies represent a new IT stack that will profoundly change the way companies relate to their customers, engage with employees, and bring innovative products and services to market. In response to these challenges, many companies are focused on improving efficiencies, enhancing effectiveness and driving innovation through technology to favorably impact both the bottom-line and the top-line. Companies need to build agility into both the cost and revenue sides of their models. In this context, they increasingly view the global sourcing model as a key to their efforts to operate more cost-effectively and productively. Separately, to confront secular industry shifts, changing demographics and new technologies, companies are looking to innovate and build new and different capabilities with emerging technologies to ensure their business models stay relevant.

Companies increasingly seek to meet the dual mandate of more efficient and effective operations, including cost reduction, along with technology-based innovation and business transformation in a comprehensive, integrated manner. Achieving these objectives presents major challenges and requires companies to have highly skilled professionals trained in many diverse and new technologies and specialized industries. Increasingly, companies are relying on service providers, like us, operating with global delivery models, to help them meet these ever-changing objectives.

Global demand for high quality, lower cost technology services from outside providers has created a significant opportunity for IT service providers that can successfully leverage the benefits of and address the challenges in using a global talent pool. The effective use of personnel from across the globe can offer a variety of benefits, including lower costs, faster delivery of new IT solutions and innovations in industry-specific solutions, processes and technologies. Certain countries, particularly India, the Philippines, Singapore and China, have large talent pools of highly qualified technical professionals who can provide high quality IT and business process services at a lower cost. India is a leader in IT services and is regarded as having one of the largest and highest quality pools of talent in the world. Historically, IT service providers have used offshore labor pools primarily to supplement the internal staffing needs of customers. However, evolving customer demands have led to the increasing acceptance and use of offshore resources for higher value-added services. These services include application design, development, testing and systems integration, technology consulting and infrastructure management.

Table of Contents

The Cognizant Approach

Our approach is built on a global network of delivery centers, deep domain expertise and a robust portfolio of services.

Global Delivery Model. Our geographic reach extends across the globe, with more than 50 delivery centers worldwide. We have a four-tiered global architecture for service delivery and operations, consisting of employees co-located at clients' sites, local or in-country delivery centers, regional delivery centers and global delivery centers. We are continuously expanding global delivery capacity in our centers in India, China and the Philippines. In 2013, we added more regional delivery capabilities in Latin America and in-country delivery centers in the United States and Europe and increased our presence in other regions throughout the world. We use our proprietary Cognizant 2.0 knowledge-sharing and project-management platform to unite all of our operations around the globe, access capabilities across the company, and streamline workflow. Our extensive facilities, technology and communications infrastructure facilitate the seamless integration of our global workforces.

Domain Expertise. Our business is organized and managed primarily around our four industry-oriented business segments:

Financial Services;

Healthcare;

Manufacturing, Retail and Logistics; and

Other, which includes Communications, Information, Media and Entertainment, and High Technology.

This industry focus has been central to our revenue growth and high client satisfaction. As the IT services industry continues to mature, clients are looking for service providers who understand their businesses, industry initiatives, customers, markets and cultures, and can create solutions tailored to meet their individual business needs. To strengthen our industry practices, we hire professionals who are deeply experienced in the industries we serve, thus establishing a broad base of business analysts and consultants. We continually invest in industry training for our staff and build out industry-specific services and solutions. This approach is central to our high levels of on-time delivery and client satisfaction, as we understand the full context of our clients' challenges and have deep experience in addressing them.

Portfolio of Services. We offer a broad range of services designed to help clients address business challenges and enhance their ability to pursue growth opportunities. Our key service areas, Consulting and Technology Services and Outsourcing Services, are delivered to our clients across our four business segments in a standardized, high-quality manner through our global delivery model. We continually invest in the expansion of our service portfolio to anticipate and meet clients' evolving needs. In recent years, in addition to our traditional offerings, we have begun to provide services that enable clients to harness emerging SMAC technologies. Our current service areas include:

Consulting and Technology Services

Business, Process, Operations and IT Consulting

Application Development and Systems Integration

Application Testing

Outsourcing Services

Application Maintenance

IT Infrastructure Services

Business Process Services

Table of Contents**Business Segments**

We are organized around our four industry-oriented business segments, and we report the operations of our business as follows:

Financial Services	Healthcare	Manufacturing/Retail/Logistics	Other
Banking	Healthcare	Manufacturing and Logistics	Communications
Insurance	Life Sciences	Retail, Travel and Hospitality	Information, Media and Entertainment
		Consumer Goods	High Technology

Financial Services

Our Financial Services business segment serves leading financial institutions throughout the world. Our clients include banks, investment firms and insurance companies. In 2013, this segment represented approximately 42.0% of our total revenues. Revenues from our Financial Services business segment were \$3,717.6 million, \$3,035.4 million, and \$2,518.4 million for the years ended December 31, 2013, 2012, and 2011, respectively. This business segment provides services to our customers operating in the following industries:

Banking. We focus on serving traditional retail and commercial banks, diversified financial enterprises, broker-dealers, asset management firms, depositories, clearing organizations and exchanges. Our clients engage us to help make their operations as effective, productive and cost-efficient as possible, and to support new capabilities. We assist these clients in such areas as: Retail Banking, Wholesale Banking, Consumer Lending, Cards and Payments, Risk Management, Investment Banking and Brokerage, Asset and Wealth Management, and Securities Services.

The demand for our services in the banking sector is being driven by several significant changes in the industry. In response to the global economic crisis, central banks and government bodies have adopted policies designed to maintain low interest rates, raise capital requirements, impose new regulations, and institute risk-mitigation measures, such as restricting proprietary trading. Such actions have the effect of curtailing some revenue sources and increasing compliance costs for most financial institutions. In addition, financial institutions must consider adopting new technologies, such as SMAC, which will impact the way they interface with customers and employees, and how they manage their operations. We help our customers adapt to these changes by providing technology-based industry-specific solutions. In addition to Application Development and Maintenance, the services increasingly in demand in this sector include EIM, Testing, Customer Relationship Management, or CRM, Enterprise Resource Planning, or ERP, BPS, IT IS, and Business and Technology Consulting.

Insurance. We serve the needs of global property and casualty insurers, life insurers, reinsurance firms and insurance brokers who turn to us for assistance in improving the efficiency and effectiveness of their operations and in achieving business transformation. We focus on such aspects of our clients' operations as: Business Acquisition, Policy Administration, Claims Processing, Management Reporting, Regulatory Compliance and Reinsurance.

Among the factors driving the need for our services in the insurance industry is a desire to improve the sales and marketing process, both by deepening direct retail customer relationships and strengthening interactions with networks of independent and captive insurance agents, often through the use of social and mobile technologies. Insurers also seek to enhance their profitability by differentiating their products and services, resulting in a need for specialized underwriting models and systems. Additionally, many insurers seek to improve business effectiveness by reducing expense ratios and exiting non-core lines of business and operations. Our services which are most in demand in this sector include: Application Development and Integration, Consulting, BPS, IT IS, EIM, and SMAC services.

Table of Contents

Healthcare

Our Healthcare segment serves many leading healthcare and life sciences companies. In 2013, our Healthcare business segment represented approximately 25.6% of our total revenues. Revenues from our Healthcare business segment were \$2,264.8 million, \$1,934.9 million, and \$1,622.2 million for the years ended December 31, 2013, 2012, and 2011, respectively. This business segment provides services to our clients operating in the following industries:

Healthcare. We work with many leading global healthcare organizations, including healthcare payers, providers and pharmacy benefit managers. The healthcare industry today faces the dual challenge of improving the quality of care while lowering the cost of care and making healthcare affordable to a larger population. A key factor driving this transformation has been the Affordable Care Act.

Our Healthcare Practice focuses on providing a broad range of services and solutions to the industry to address regulatory requirements and emerging industry trends such as: Regulatory Compliance (including compliance with the Affordable Care Act and work related to state health insurance exchanges), Integrated Health Management (including establishing health information exchanges), EIM, Claims Investigative Services (aimed at preventing fraud and abuse and strengthening administrative processes), and Operational Improvement (in areas such as claims processing, enrollment, membership and billing). We also partner with our clients to enable their systems and processes to deal with the retail orientation of health care, such as the support of individual mandates and the adoption of mobile and analytics solutions to improve access to health information and decision making by end consumers.

Life Sciences. We partner with leading pharmaceutical, biotech, and medical device companies, as well as providers of generics, animal health and consumer health products to assist them in transforming their business by helping them be more efficient and effective from an IT and business operations perspective while helping them drive innovation and virtualization in growing their business.

Among the industry forces generating demand for our services are: financial pressures caused by payer and government pricing pressures, patent expiry and competition from generics; the drive to expand into new geographic markets; the need for more targeted or personalized therapies leading to R&D innovation; continued diversification of product portfolios and the related high cost of product development; and a dynamic regulatory environment with greater emphasis on product safety, ethics and compliance, transparency of pricing and promotional activity. Our Life Sciences solutions help transform many of the business processes in the life sciences value chain (Research, Clinical Development, Manufacturing and Supply Chain, Sales and Marketing) as well as regulatory and administrative functions and general IT. Among our services most often in demand are Consulting, EIM, Customer Solutions, BPS, IT IS, Application Maintenance, Application Development and Systems Integration, Testing and SMAC services.

Manufacturing/Retail/Logistics

Our Manufacturing, Retail and Logistics segment provides outsourcing, business consulting and technology services for global leaders in a range of sub-sectors, including industrial, automotive, process logistics and retail. In 2013, this segment represented approximately 21.1% of our total revenues. Revenues from our Manufacturing/Retail/Logistics business segment were \$1,868.3 million, \$1,498.7 million, and \$1,197.5 million for the years ended December 31, 2013, 2012, and 2011, respectively. This business segment services customers in the following industry groups:

Manufacturing and Logistics. Clients in this sector include manufacturers of automobiles and industrial products, and processors of natural resources, chemicals and raw materials. In logistics, our clients include rail, truck, marine and other transportation and distribution companies. We also serve many leading energy utilities, as well as oil and gas producers. Our clients seek our help in implementing business-relevant changes that will make them more productive, competitive and cost-effective. To that

Table of Contents

end, we help organizations improve operational efficiencies, enhance responsiveness, and collaborate with trading partners to better serve their markets and end customers. We leverage a comprehensive understanding of the business and technology drivers of the industry. Some of our Manufacturing and Logistics solutions for Industrial and Automotive clients include: Warranty Management, Dealer Systems Integration, Supply Chain Management, Sales and Operations Planning, and Mobility. For transportation and logistics clients, our service areas include Warehouse and Yard Management, Transportation Asset Management, Transportation Network Design, Global Trade Management and Analytics.

Industry trends that influence the demand for our services in this sector include the increasing globalization of sourcing and the desire of clients to further penetrate emerging markets, leading to longer and more complex supply chains. In the power generation sector, industry trends include the continued drive toward energy conservation, including smart meter installations, the need for better grid reliability and security, regulatory changes and the need to relieve cost pressures through better asset performance and web-based customer care systems. Clients also wish to optimize their supply chains to better manage inventory, support growing eCommerce operations and improve customer-supplier collaboration. They seek to apply intelligent systems to manufacturing and logistics operations, enable mobile platforms to support field sales and use data analytics to make better informed decisions. These trends are driving demand for offerings such as Enterprise Application Services, or EAS, EIM, Consulting and SMAC technologies.

Retail, Travel and Hospitality. We serve a wide spectrum of retailers and distributors, including supermarkets, specialty premium retailers, department stores and large mass-merchandise discounters, who seek our assistance in becoming more efficient and cost-effective and in helping to drive business transformation. Current trends affecting demand in the retail industry include a need for greater cost-efficiency to combat the industry's traditionally narrow profit margins, changes in supply chain management to facilitate direct store delivery, the ability to accommodate multi-channel (in-store and on-line) models, and the impact of SMAC technologies on customer and employee interaction.

Services in high demand in the retail sector include Consulting, eCommerce, EAS, Systems Integration, Testing, BPS and EIM. We also serve the entire travel and hospitality industry including airlines, hotels and restaurants, as well as online and retail travel, global distribution systems and intermediaries and real estate companies, providing solutions such as CRM, EIM and BPS.

Consumer Goods. We work with many of the world's premier consumer goods manufacturers, creating innovative solutions and strategies that help them build and sustain strong brands while enhancing their price-competitiveness, category leadership and consumer loyalty. Principal segments served include consumer durables, food and beverage, footwear and apparel, and home and personal care products. Our expertise in these areas spans a wide range, from demand-driven supply chains, to revenue-creating trade promotion management systems, to analytics systems and mobility solutions that anticipate and serve ever-changing customer needs.

The demand for our services in this sector is being propelled by such factors as the need of consumer goods companies to accelerate product innovation to remain competitive and deliver top-line growth, the continuing drive to optimize global sourcing and supply chain management, the impact of SMAC technologies on consumer interaction, marketing and sales processes, the use of data analytics to increase the effectiveness of product development and marketing, as well as ongoing pressures to curtail IT costs. In response to these needs, we provide solutions including Application Development and Systems Integration, Consulting, CRM, EIM, Testing, BPS, IT IS and SMAC services.

Other

The Other business segment includes the Communications, Information, Media and Entertainment, and High Technology operating segments. In 2013, our Other business segment represented approximately 11.2% of our total revenues. Revenues from our Other business segment were \$992.5 million, \$877.5 million, and

Table of Contents

\$783.1 million for the years ended December 31, 2013, 2012, and 2011, respectively. The Other business segment is an aggregation of operating segments each of which, individually, represents less than 10.0% of consolidated revenues and segment operating profit. Descriptions of the key operating segments included in the Other business segment are as follows:

Communications. Our communications industry practice serves some of the world's leading communications service (cable, wireless and wireline) providers, equipment vendors, and software vendors. We help our clients address the important changes in the communications industry, such as: transition to new network technologies; designing, developing, testing and introducing new products and channels; improving customer service and increasing customer satisfaction; transforming Business Support Systems (BSSs) and Operations Support Systems (OSSs); transitioning to agile development methodologies; and enabling applications for cloud deployment. Customer Solutions, Mobility, IT IS, Testing, ERP Implementation, EIM, and Cloud services have been in particular demand.

Information, Media and Entertainment. We work with some of the world's largest media and entertainment companies, including information service providers, publishers, broadcasters, and movie, music and video game companies. The growth of digital platforms is causing significant change to these industries and we are working with clients to help meet these challenges and help transform their businesses. Additional trends affecting the industry include a decline of traditional print publishing, the need for digital asset management and the impact of SMAC technologies on the consumption of entertainment content.

We provide services in critical areas such as the Digital Content Supply Chain and Media Asset Management. Some of our other services include: Business Solutions (such as Advertising Management, Online Media, and e-Business); Digital Distribution, Workflow Automation; Intellectual Property Management, Anti-Piracy Initiatives; and Operational Systems (Advertising Sales, Studio Management, Billing and Payments, Content Management and Delivery).

High Technology. We serve some of the world's leading independent software vendors, or ISVs, technology equipment manufacturers, and online service providers. We assist the ISVs with their transitions to new business models (such as Software-as-a-Service, or SaaS, models) and facilitate their license management and sales processes. We help the high-technology manufacturers take on complex, transformational business process and product engineering initiatives. The technology sector is largely driven by product development. This creates strong demand for Analytical, Engineering, Testing, Go to Market strategies, and Content Management services. Other in-demand services include CRM, Product Technical Support, Supply Chain Management and the application of SMAC technologies to the customer experience, as well as Application Development, Systems Integration and Application Maintenance.

Across our business segments, we are highly dependent upon our foreign operations. The majority of our development and delivery centers and technical professionals are located in India, and we also have facilities in Europe, Asia Pacific, the Middle East and Latin America. Our operations in India and the rest of the world expose us to various risks, including regulatory, economic and political instability, potentially unfavorable tax, import and export policies, fluctuations in foreign exchange and inflation rates, international and civil hostilities, terrorism, natural disasters and pandemics.

See Note 14 to our consolidated financial statements for additional information related to our business segments, including a discussion of segment operating profit.

Our Solutions and Services

Across each of our business segments, we provide a broad and expanding range of consulting, information technology and outsourcing services, including:

Table of Contents

Consulting and Technology Services

IT Strategy and Business Consulting. Our global consulting team, Cognizant Business Consulting, or CBC, helps clients re-imagine and transform their businesses to gain competitive advantage. With these new operating models, the value chain is being disaggregated to drive speed to market and agility.

CBC is built on a foundation of deep thought leadership and actionable strategies. CBC works with clients to improve business performance and operational productivity in order to exceed business goals. We also provide assistance with Strategy Consulting, Business and Operations Consulting, IT Strategy & Change Management, and Program Management Consulting.

Key factors driving the demand for CBC's services are the following:

The need to run the business better while increasing operational flexibility and reducing time to market;

Optimizing big data and predictive analytics to gain competitive insight;

Large business transformations, impacting business and IT operating models;

Increased demands to collaborate and compete in the market for customers, capabilities and talent;

Desire to remove roadblocks in the Business/IT relationship to increase the return on technology investments, both directly and through positioning IT as a source of digital business innovation;

Readiness to embrace virtualization capabilities, including greater infrastructure outsourcing and cloud solutions, with a focus on identifying and managing risk and cost; and

Ongoing regulatory shifts, which require enhanced risk management and compliance frameworks, as well as greater organizational resilience.

In this environment, the services currently provided by CBC include:

IT strategy consulting to define new IT target operating models, new delivery models and to optimize IT to business alignment, sourcing strategies and IT costs;

Program management consulting, including post-acquisition integration, business and IT integration, business transformation, and large scale business transformation;

Operations improvement consulting for business process management, operations strategy, global sourcing and supply chain management, and change management;

Edgar Filing: COGNIZANT TECHNOLOGY SOLUTIONS CORP - Form 10-K

Strategy consulting with respect to re-imagining new business and operating models, market growth, mergers and acquisitions, product innovation and sustainability initiatives; and

Business consulting related to finance, risk advisory, human resources, marketing and analytics functions.

CBC is also expanding new services and capabilities in areas such as BPS, Supply Chain Management, Enterprise Analytics, EAS, and consulting related to the management of core assets and intellectual property, or IP.

Application Development and Systems Integration. We offer a full range of Application Design, Application Development and Systems Integration services, which enable customers to focus on and invest in their core business activities and in growth-producing innovation, while ensuring that their IT functions operate in the most efficient, responsive and cost-effective manner. We have particular depth of skills in implementing large, complex, business-critical IT development and integration programs.

Table of Contents

Demand for our Application Development and Systems Integration services is being driven by the growing need of customers to access outside capabilities to respond to the impact of changes in markets, regulation, competition and SMAC technologies on their businesses.

As part of our Application Development services, we define customer requirements, write specifications and design, develop, test and integrate software across multiple platforms including Internet technologies. We modify and test applications to enable systems to function in new operating environments. In addition, these services include ERP and CRM implementation services. We follow one of two alternative approaches to application development and systems integration:

full life-cycle application development, in which we assume start-to-finish responsibility for analysis, design, implementation, testing and integration of systems; or

cooperative development, in which our employees work with a customer's in-house IT personnel to jointly analyze, design, implement, test and integrate new systems.

In both of these approaches, our on-site team members work closely and collaboratively with our clients. Detailed design, implementation and testing are generally performed at dedicated near-shore and offshore development and delivery centers. In addition, we maintain an on-site presence at each customer location in order to address evolving client needs and resulting changes to the project.

A key part of our application development and systems integration offering is a suite of services to help organizations build and integrate business applications with the rest of their operations. Using this suite of services, we leverage our skills in business application development and enterprise application integration to build sophisticated business applications and to integrate these new applications and websites with client server and legacy systems. We build and deploy robust, scalable and extensible architectures for use in a wide range of industries. We maintain competency centers specializing in various areas such as: Microsoft solutions; IBM, SAP, Oracle and Java applications; and Cloud Computing and Mobile solutions. These competency centers enable us to provide application development and integration services to a broad spectrum of clients.

Our re-engineering service offerings assist customers migrating from systems based on legacy computing environments to newer standards-based distribution architectures, often in response to the more stringent demands of business. Our re-engineering tools automate many of the processes required to implement advanced technology platforms. We believe that this automation substantially reduces the time and cost to perform re-engineering services. These tools also enable us to perform source code analysis and to re-design target databases and convert certain programming languages. If necessary, our programmers also help clients re-design and convert user interfaces.

Enterprise Information Management. Our EIM practice focuses on helping clients harness the vast amounts of data available on their operations, customers and markets, and to convert that data into information and insights that are valuable to their businesses and can be used to drive management decisions. We help clients identify the types of data available both within their organizations and from outside sources, including social media, and to bring that data together in a meaningful data to foresight continuum. Among the trends driving this business are: the desire of companies to better understand consumer demands and market opportunities in order to create new products and services, the explosion of differently structured types of data from newly crafted business processes, the need to manage reporting requirements in regulated industries such as healthcare and financial services, and the pressures to manage operations more efficiently and cost-effectively through the use of analytical tools. Among the services we provide in the EIM area are the following:

Strategic, advisory and management consulting services across Information Management, Business Intelligence & Analytics;

Enterprise Data Management, including the creation of data warehouses, data marts, operational stores, enterprise master data management platforms, enterprise metadata platforms as well as enterprise data governance;

Table of Contents

Descriptive Analytics/ Business Intelligence that involves the strategy, design, build and management of information assets that drive day to day decision making;

Strategic Corporate Performance Management, enabling clients to create executive dashboards or scorecards to better manage operations;

Packaged Analytics designed to provide solutions to specific business problems leveraging technologies such as Mobile and Cloud; and

Big Data to assist clients in managing and deriving actionable insights from the explosion in the volume, variety, velocity and complexity of data.

Application Testing. Our Application Testing practice offers a comprehensive suite of services in testing, consulting and engineering. Our Quality Assurance, or QA, transformation services help clients develop deep, agile QA capabilities that create or extend their competitive advantage. QA is driven by six strategic themes: integrated automation, user advocacy, IP-based intelligent platform, a factory model, end-to-end quality focus, and an on-demand infrastructure model. Our business-aligned services in the areas of system and integration testing, package testing, user acceptance, automation, performance testing and test data management address our clients' critical quality needs. Consulting and infrastructure solutions in quality management, test tools and test infrastructure enable our clients to capitalize on emerging opportunities. Factors driving the demand for our testing services include the adoption of SMAC technologies, the need for testing of new regulatory compliance processes, and the desire of clients for more cost-effective and nimble on-demand testing. Accordingly, among the functions we provide are: testing related to integration of SAP, Seibel and other systems, IT process and quality consulting, testing of customized mobile and cloud-based applications, and Testing as a Service. We focus our Managed Test Centers on specific domains (e.g., specific industries and software solutions), ensuring we tailor our testing solutions to the particular needs of our clients. We help our clients achieve significant reduction in time to market as well as cost of quality, and realize significant improvements in the maturity of their quality processes.

Social, Mobile, Analytics and Cloud-based Services. We are aiding clients in adapting SMAC technologies to their businesses. Such new technologies are becoming fundamental components of the enterprise IT architecture. These technologies are profoundly changing the way companies relate to their customers, interact with employees, and bring products and services to market. As such, the SMAC stack holds the promise of innovation and the potential for innovation-driven top line growth and efficiencies that improve the bottom line. We help clients analyze social media sentiment and build those insights into their customer relationship management process. In other cases, we are enabling clients to manage and analyze vast accumulations of data and to use that data to drive management decisions. We also offer end-to-end services to enable cloud-based processes, from consulting and implementation to ongoing support activities.

Outsourcing Services

Application Maintenance. Our Application Maintenance service offering supports some or all of a client's applications, ensuring that systems remain operational and responsive to changing user requirements and provide on-going enhancements as required by the client. Beyond the traditional view of IT outsourcing as a cost-saving measure, our Application Maintenance services enable clients to improve the overall agility, responsiveness, productivity and efficiency of their IT infrastructure. Increasingly, we also are assisting clients in adapting their IT systems to SMAC technologies.

By supporting some or all of a client's applications, our services help ensure that a user's core operational systems are free of defects and responsive to changing needs. As part of this process, we are often able to introduce product and process enhancements and improve service levels to customers requesting modifications and on-going support. We also provide Application Value Management Solutions that can help balance cost, complexity and capacity and can help clients reduce cost of ownership, improve service levels and create new operational efficiencies.

Table of Contents

Our global delivery business model enables us to provide a range of rapid response and cost-effective support services to our clients. Our on-site team members often provide help-desk services at the client's facility. These team members typically are available in the event of an emergency service request and are able to quickly resolve customer problems from remote locations. In the case of more complex maintenance services, including modifications, enhancements and documentation, which typically have longer turnaround times, we take full advantage of our offshore resources to develop solutions more cost-effectively than would be possible relying on higher cost local professionals.

As part of our Application Maintenance services, we assist clients in renovating their core systems to meet the requirements imposed by new regulations, new standards or other external events. We seek to anticipate the operational environment of our clients' IT systems as we design and develop such systems. We also offer diagnostic services to clients to assist them in identifying shortcomings in their IT systems and optimizing the performance of their systems.

IT Infrastructure Services. We provide end-to-end IT Infrastructure Management Outsourcing services and anticipate growing demand for these services in the coming years. We provide service capability in redundant Global Operating Centers, or GOCs, worldwide, through which we are able to provide significant scale, quality and cost savings to our clients in IT IS. Clients are increasingly seeking IT IS to sharpen their focus on core business operations, reallocate overhead costs to growth investments, enable businesses to respond more quickly to changing demands, decrease time to market, ensure that the IT infrastructure can scale as the business evolves, and access skill sets that lie outside the organization. The major services we provide include Data Center, Infrastructure Security, Network and Convergence, End-User Computing Services, and Mobility. We also have a new set of Cloud Services offerings that embrace virtualization technologies across delivery solutions including private cloud, enterprise multi-tenant cloud and public cloud models.

Business Process Services. We provide BPS services through unique industry-aligned solutions that integrate process, domain and technology expertise to enable our clients to respond in a nimble and flexible manner to market opportunities and challenges, while also creating variable cost structures to drive greater effectiveness and cost-efficiency. We have extensive domain-specific expertise in core front office, middle office and back office functions including, but not limited to: Finance and Accounting, Procurement, Data Administration, Data Management, and Research and Analytics. Our industry-specific solutions include clinical data management, pharmacovigilance, equity research support, commercial operations and order management. In addition to BPS, related services include Consulting to ensure process excellence, and a range of platform-based services. Our goals for our client relationships are customer satisfaction, operational productivity, strategic value, and business transformation. Among the factors driving growth in our services are the desire to improve cost-effectiveness, the emergence of SMAC technologies, and the need for clients to access capabilities beyond their organizations to adapt to rapid changes in technologies, markets and customer demands.

Business Strategies

Our objectives are to maximize stockholder value and enhance our position as a leading provider of information technology, consulting and business process services. We implement the following core strategies to achieve these objectives:

Growth through Reinvestment. We aim to invest our profits above the 19% to 20% non-GAAP operating margin level, excluding stock-based compensation expense and acquisition-related charges, back into our business. We believe this to be a significant contributing factor to our strong revenue growth. This investment is primarily focused in the areas of: strengthening and expanding our portfolio of services; continuing to expand our geographic presence for both sales and delivery; hiring client partners and relationship personnel with specific industry experience or domain expertise; training our technical staff in a broader range of service offerings; recognizing and

Table of Contents

rewarding exceptional performance by our employees; and maintaining a level of resources, trained in a broad range of service offerings, to be well positioned to respond to our client requests, as described below.

Expand Service Offerings and Solutions: We have several teams dedicated to creating technology-based innovative solutions and developing new, high value services. The teams collaborate with customers to develop these services. For example, we are currently developing new offerings in Business and IT Consulting and industry-oriented IT solutions atop innovative technologies. We invest in internal research and development and promote knowledge building and sharing across the organization to advance the development of new services and solutions. Furthermore, we continue to enhance our capabilities and service offerings in the areas of CRM, ERP, EIM, Software Testing, Infrastructure Management, industry-oriented BPS services and SMAC technologies.

We believe that the continued expansion of our service offerings will provide new sources of revenue, reduce our reliance on any one technology initiative and help foster long-term relationships with our customers by allowing us to better serve their needs. Additionally, as part of our vision to continue our growth and anticipate our clients' and the markets' rapidly changing demands in the near-term, mid-term and long-term, we are investing in emerging opportunities which seek to transform client and user platforms to Internet, cloud and mobile-based experiences.

Expand Domestic and International Geographic Presence: We have established sales and marketing offices in various metropolitan areas in the United States and internationally. As we expand our customer base, we plan to open additional sales and marketing offices globally to support the demands of our clients and markets. This expansion is expected to facilitate sales and services to existing and new customers.

Research and Development and Competency Centers: We have project experience and expertise across multiple architectures and technologies, and have made significant investments in our competency centers and in research and development to keep abreast of the latest technology developments. Most of our technical staff is trained in multiple technologies and architectures. As a result, we are able to react to clients' needs quickly and efficiently redeploy our technical staff to different technologies. Also, to develop and maintain this flexibility, we have made a substantial investment in our competency centers so that the experience gained from particular projects and research and development efforts is leveraged across our entire organization. Through our investment in research and development activities and the continuing education of our technical personnel, we enlarge our knowledge base and develop the necessary skills to keep pace with emerging technologies. We believe that our ability to work in new technologies allows us to foster long-term relationships by having the capacity to continually address the needs of both existing and new clients.

Enhance Processes, Methodologies and Productivity Toolsets: We have a comprehensive process framework that addresses the entire software engineering life cycle and support activities, which are scalable for projects of different sizes and complexities. This proprietary framework, which we refer to as Process Space (part of Cognizant 2.0), is supported by in-house project management, metrics management and workflow tools and is available to all our programmers globally. Process Space has evolved since its original release in 1996 in breadth, depth and maturity, based on the implementation feedback from projects and findings of internal quality audits and external assessments. Process capabilities are monitored at the sub-process level and performance targets are monitored at the process level. Performance targets are aligned with the overall business objectives. Statistical process controls are used extensively to continuously monitor, predict and improve performance. Our Delivery Assurance Group facilitates process implementation from project inception and audits the projects periodically to ensure that the implementation is effective and the risks are being managed. With the globalization of business, we are committed to improving and enhancing our proprietary Process Space software engineering process and other methodologies and toolsets. In light of the rapid evolution of technology, we believe that continued investment in research and development is critical to our continued success. We are constantly designing and developing additional productivity software tools to automate testing processes and improve project estimation and risk assessment techniques.

Table of Contents

We have invested considerably in automation to improve process institutionalization across the organization. For example, we have built and deployed Cognizant 2.0, an intelligent delivery ecosystem which orchestrates processes, methodologies and best practices driving effective usage of knowledge, while providing a collaborative framework for our world-wide client service personnel. Our process framework has been extensively adapted to cater to different types of projects managed by the organization across different service lines, such as Application Development, Managed Services, Application Testing, BPS and IT IS.

Global Delivery Model. We have a four-tiered global architecture for service delivery and operations, consisting of employees co-located at clients' sites, local or in-country delivery centers, regional delivery centers and global delivery centers. Our extensive facilities, technology and communications infrastructure facilitate the seamless integration of our global workforces. This is accomplished by permitting team members in different locations to access common project information and to work directly on client projects. This infrastructure allows for rapid completion of projects, highest level of quality, efficient use of clients' technological resources and real-time access to project information by the on-site account manager or the client. In addition, for large projects with short time frames, our offshore facilities allow for parallel processing of various development phases to accelerate delivery time.

Two-in-a-Box: Our proprietary client engagement model, called Two-in-a-Box™, or TIB, represents our commitment to providing superior service to help our clients reduce IT operational costs, embrace best practices and undergo sustainable business transformation. Centered on the needs of the client's organization, TIB is designed specifically to help the client quickly reduce IT budgets, revamp IT operations and re-deploy freed-up assets to more strategic initiatives that generate business value. The TIB model begins with a relationship management team, led by the Client Partner, or CP, with deep industry expertise, working onsite to absorb the client's culture, operational processes, challenges and business goals and to assist with strategic planning. Another critical TIB team member is the dedicated global delivery manager, or DM. The relationship between the CP and DM is essential to ensure that our IT services are delivered with precision and that they are tailored to each client's unique needs.

Highly-Skilled Workforce: Our managers and senior technical personnel provide in-depth project management expertise to clients. To maintain this level of expertise, we place significant emphasis on recruiting and training our workforce of highly-skilled professionals. We have approximately 23,700 project managers and senior service delivery staff around the world, many of whom have significant work experience in North America, Europe and Asia. We also maintain programs and personnel to hire and train the best available technical professionals in both legacy systems and emerging technologies. We provide extensive combined classroom and on-the-job training to newly-hired technical staff, as well as additional annual training programs designed to enhance the business practices, tools, technology and consulting skills of our professional staff.

Continue to be an Employer of Choice in the Industry: As a rapidly growing professional services firm, a key attribute of our continued success is the ability to continually hire, assimilate, motivate and retain the best talent possible in the industry. We have developed strong relationships with key universities around the world, particularly in India, to provide a continual pipeline of talented staff from Tier One schools. In addition, we have established an active lateral recruiting program in North America, Europe and India and an on-campus recruiting program in North America. We continue to expand our presence and brand in our key supply markets, further enhancing our ability to hire experienced professionals from competing IT services firms and industry to support our client needs and growth. We invest heavily in training programs, motivational programs and career development to ensure personal professional growth for each of our employees.

Further Develop Long-Term Client Relationships. We have strong long-term strategic relationships with our clients and business partners. We seek to establish long-term relationships that present recurring revenue opportunities, frequently trying to establish relationships with our clients' chief information officers, or other IT and business decision makers, by offering a wide array of cost-effective high quality services. Approximately 97.2% of our revenues for the year ended December 31, 2013 were derived from clients who had been using our

Table of Contents

services at the end of 2012. We also seek to leverage our experience with a client's IT systems into new business opportunities. Knowledge of a client's processes and IT systems gained during the performance of application maintenance services, for example, may provide us with a competitive advantage in securing additional maintenance, development and other projects from that client.

Pursue Selective Strategic Acquisitions, Joint Ventures and Strategic Alliances. We believe that opportunities continue to exist in the fragmented market in which we operate to expand our business through selective strategic acquisitions, joint ventures and strategic alliances. We believe that acquisition and joint venture candidates may enable us to expand our geographic presence, service offering and capabilities more rapidly. For example, in February 2013, we completed an acquisition of the C1 Group Companies. This transaction expanded our local presence in Germany and Switzerland and deepened our expertise in enterprise application services and high-end testing services. In October 2013, we acquired Equinox Consulting, a financial services consulting firm based in France. In addition to expanding our presence in Europe, this transaction strengthened our financial services management and regulatory consulting practice.

Sales and Marketing

We market and sell our services directly through our professional staff, senior management and direct sales personnel operating out of our Teaneck, New Jersey headquarters and our business development offices which are strategically located in various metropolitan areas around the world. The sales and marketing group works with our client delivery team as the sales process moves closer to the customer's selection of a services provider. The duration of the sales process varies depending on the type of service, ranging from approximately two months to over one year.

Customers

The number of customers served by us has increased significantly in recent years. As of December 31, 2013, we were providing services to approximately 1,197 clients, as compared to approximately 821 clients as of December 31, 2012, and approximately 785 clients as of December 31, 2011. As of December 31, 2013, we increased the number of strategic clients to 243. We define a strategic client as one offering the potential to generate at least \$5 million to \$50 million or more in annual revenues at maturity. Accordingly, we provide a significant volume of services to many customers in each of our business segments. Therefore, a loss of a significant customer or a few significant customers in a particular segment could materially reduce revenues for such segment. However, no individual customer exceeded 10.0% of our consolidated revenues for the years ended December 31, 2013, 2012, and 2011. In addition, the services we provide to our larger customers are often critical to the operations of such customers and a termination of our services generally would require an extended transition period with gradually declining revenues. For the years ended December 31, 2013, 2012, and 2011, 77.6%, 79.4%, and 78.5% of our revenue, respectively, was from North American customers. See Note 14 to our consolidated financial statements for additional financial information by geographic area.

For the year ended December 31, 2013, we derived our revenues from the following business segments: 42.0% from Financial Services, 25.6% from Healthcare, 21.1% from Manufacturing/Retail/Logistics and 11.2% from Other.

We generally provide our services on a time-and-material, fixed price, or per-transaction basis. The volume of work performed for specific customers is likely to vary from year to year, and a significant customer in one year may not use our services in a subsequent year. Presented in the table below is additional information about our customers.

	Year Ended December 31,		
	2013	2012	2011
Revenues from top five customers as a percentage of total revenues	13.2%	14.0%	16.3%
Revenues from top ten customers as a percentage of total revenues	22.6%	25.0%	27.7%
Revenues under fixed-bid contracts as a percentage of total revenues	34.0%	33.1%	31.7%

Table of Contents

Competition

The intensely competitive IT services and outsourcing market includes a large number of participants and is subject to rapid change. This market includes participants from a variety of market segments, including:

systems integration firms;

contract programming companies;

application software companies;

traditional large consulting firms;

the professional services groups of computer equipment companies; and

facilities management and outsourcing companies.

Our direct competitors include, among others, Accenture, Capgemini, Computer Sciences Corporation, Genpact, HCL Technologies, HP Enterprise (formerly Electronic Data Systems), IBM Global Services, Infosys Technologies, Tata Consultancy Services and Wipro. In addition, we compete with numerous smaller local companies in the various geographic markets in which we operate.

Some of our competitors have significantly greater financial, technical and marketing resources and/or greater name recognition. The principal competitive factors affecting the markets for our services include:

performance and reliability;

quality of technical support, training and services;

responsiveness to customer needs;

reputation and experience;

financial stability and strong corporate governance; and

competitive pricing of services.

We rely on the following to compete effectively:

a well-developed recruiting, training and retention model;

a successful service delivery model;

a broad referral base;

continual investment in process improvement and knowledge capture;

investment in infrastructure and research and development;

financial stability and strong corporate governance;

continued focus on responsiveness to customer needs, quality of services, competitive prices; and

project management capabilities and technical expertise.

Intellectual Property

We provide value to our clients based, in part, on our proprietary innovations, methodologies, reusable knowledge capital and other intellectual property assets. We recognize the importance of intellectual property and its ability to differentiate us from our competitors. We rely on a combination of intellectual property laws, as well as confidentiality procedures and contractual provisions, to protect our intellectual property and our brand. We have registered, and applied for the registration of, U.S. and international trademarks, service marks, domain

Table of Contents

names, and copyrights. As of December 31, 2013, we have also applied for or obtained a total of 521 trademark registrations in 60 countries. In addition, we have filed 20 U.S. and international patent applications covering certain of our proprietary technology assets. Although the company believes the ownership of such patents, copyrights, trademarks and service marks is an important factor in its business and that its success does depend in part on the ownership thereof, the company relies primarily on the innovative skills, technical competence and marketing abilities of its personnel.

Employees

We finished the 2013 year with approximately 171,400 employees. We employed approximately 133,000 persons in the Asia Pacific region, approximately 31,500 persons in various locations throughout North America and Latin America and approximately 6,900 persons in various locations throughout Europe. We are not party to any significant collective bargaining agreements. We consider our relations with our employees to be good.

Our Executive Officers

The following table identifies our current executive officers:

			In Current
Name	Age	Capacities in Which Served	Position Since
Lakshmi Narayanan ⁽¹⁾	60	Vice Chairman of the Board of Directors	2007
Francisco D. Souza ⁽¹⁾	45	Chief Executive Officer	2007
Gordon Coburn ⁽³⁾	50	President	2012
Karen McLoughlin ⁽⁴⁾	49	Chief Financial Officer	2012
Ramakrishnan Chandrasekaran ⁽⁵⁾	56	Executive Vice Chairman, Cognizant India	2013
Rajeev Mehta ⁽⁶⁾	47	Chief Executive Officer, IT Services	2013
Malcolm Frank ⁽⁷⁾	47	Executive Vice President, Strategy and Marketing	2012
Steven Schwartz ⁽⁸⁾	46	Executive Vice President, Chief Legal and Corporate Affairs Officer	2013
Sridhar Thiruvengadam ⁽⁹⁾	50	Chief Operating Officer	2013
Ramakrishna Prasad Chintamaneni ⁽¹⁰⁾	44	Executive Vice President and President, Banking and Financial Services	2013
Venkat Krishnaswamy ⁽¹¹⁾	60	Executive Vice President and President, Healthcare & Life Sciences	2013
Debashis Chatterjee ⁽¹²⁾	48	Executive Vice President and President, Technology Solutions	2013
Dharmendra Kumar Sinha ⁽¹³⁾	51	Executive Vice President and President, Client Services	2013
Sumithra Gomatam ⁽¹⁴⁾	46	Executive Vice President and President, Industry Solutions	2013

- (1) Lakshmi Narayanan was appointed Vice Chairman of the Board of Directors, effective January 1, 2007. Mr. Narayanan served as our Chief Executive Officer from December 2003 through December 2006 and as our President from March 1998 through December 2006. Mr. Narayanan joined our Indian subsidiary as Chief Technology Officer in 1994 and was elected President of such subsidiary on January 1, 1996. Prior to joining us, from 1975 to 1994, Mr. Narayanan was the regional head of Tata Consultancy Services, a large consulting and software services company located in India. Mr. Narayanan serves on the board of directors and as the Chairman of the Governance Committee of TVS Capital Funds Limited. Mr. Narayanan is the Chairman of the Board of ICT Academy of Tamil Nadu, a not for profit training and research institution established in a partnership model between the Government of India, IT Industry and the Confederation of Indian Industry. Mr. Narayanan holds a Bachelor of Science degree, a Master of Science degree and a Management degree from the Indian Institute of Science.

Table of Contents

- (2) Francisco D. Souza was appointed Chief Executive Officer and became a member of the Board of Directors, effective January 1, 2007. Mr. D. Souza served as our President from January 1, 2007 through February 6, 2012 and as our Chief Operating Officer from December 2003 through December 2006. Prior to that, from November 1999 to December 2003, he served as our Senior Vice President, North American Operations and Business Development. From March 1998 to November 1999, he served as our Vice President, North American Operations and Business Development and as our Director-North American Operations and Business Development from June 1997 to March 1998. From January 1996 to June 1997, Mr. D. Souza was engaged as our consultant. From February 1995 to December 1995, Mr. D. Souza was employed as Product Manager at Pilot Software. Between 1992 and 1995, Mr. D. Souza held various marketing, business development and technology management positions as a Management Associate at The Dun & Bradstreet Corporation. While working at The Dun & Bradstreet Corporation, Mr. D. Souza was part of the team that established the software development and maintenance business conducted by us. Mr. D. Souza serves on the Board of Directors of General Electric Company. Mr. D. Souza serves on the Board of Trustees of Carnegie Mellon University, the Board of Trustees of The New York Hall of Science and the Board of Directors of the U.S.-India Business Council. Mr. D. Souza also is a member of the Business Roundtable. Mr. D. Souza holds a Bachelor of Business Administration degree from the University of Macau (formerly known as the University of East Asia) and a Master of Business Administration degree from Carnegie Mellon University.
- (3) Gordon Coburn was appointed President of the company, effective February 6, 2012. From March 1998 until February 6, 2012, Mr. Coburn served as the company's Chief Financial Officer and Treasurer and from January 2007 until February 6, 2012, Mr. Coburn also held the position of Chief Operating Officer. Mr. Coburn also served as the company's Executive Vice President from December 2003 through December 2006. From November 1999 to December 2003, he served as our Senior Vice President. He previously was our Vice President from 1996 to November 1999. Mr. Coburn served as Senior Director - Group Finance and Operations for Cognizant Corporation from November 1996 to December 1997. From 1990 to October 1996, Mr. Coburn held key financial positions with The Dun & Bradstreet Corporation. Mr. Coburn serves on the Board of Directors of The Corporate Executive Board Company. He also served on the Board of Directors of ICT Group, Inc. until its acquisition on February 2, 2010. Mr. Coburn holds a Bachelor of Arts degree from Wesleyan University and a Master of Business Administration degree from the Amos Tuck School at Dartmouth College, where he serves as a member of its MBA Advisory Board.
- (4) Karen McLoughlin was appointed Chief Financial Officer of the company, effective February 6, 2012. She previously served as the company's Senior Vice President of Finance and Enterprise Transformation, a role she held since January 2010. In such role, Ms. McLoughlin was responsible for the company's worldwide financial planning and analysis, enterprise risk management and enterprise transformation functions, including the facilitation and execution of various internal reengineering and transformation initiatives designed to enable the company's strategic vision. From August 2008 to January 2010, Ms. McLoughlin served as the company's Senior Vice President of Finance, responsible for overseeing the Company's global financial planning and analysis team and enterprise risk management, and from October 2003 until August 2008, Ms. McLoughlin served as the company's Vice President of Global Financial Planning and Analysis. Prior to joining Cognizant in October 2003, Ms. McLoughlin held various financial management positions at Spherion Corporation from August 1997 to October 2003 and at Ryder System Inc. from July 1994 to August 1997. Prior to joining Ryder, she spent six years in the South Florida Practice of Price Waterhouse (now PricewaterhouseCoopers). Ms. McLoughlin has a Bachelor of Arts degree in Economics from Wellesley College and a Master of Business Administration degree from Columbia University.
- (5) Ramakrishnan Chandrasekaran was appointed Executive Vice Chairman, Cognizant India, effective December 4, 2013. In this role, Mr. Chandrasekaran will focus on strengthening our strong relationship with industry bodies, driving strategic initiatives that strengthen outreach to the government, and further enhancing our brand equity through public relations in India. From February 2012 to December 2013, Mr. Chandrasekaran served as Group Chief Executive-Technology and Operations. In this role, Mr. Chandrasekaran was responsible for leading our solutions and delivery teams world-wide. From August 2006 to February 2012, he served as our President and Managing Director, Global Delivery, responsible for leading our global delivery organization, spearheading new solutions, and championing

Table of Contents

- process improvements. Mr. Chandrasekaran served as our Executive Vice President and Managing Director from January 2004 through July 2006. Prior to that, from November 1999 to January 2004, he served as our Senior Vice President responsible for ISV relationships, key alliances, capacity growth, process initiatives, business development and offshore delivery. Mr. Chandrasekaran joined us as Assistant Vice President in December 1994, before being promoted to Vice President in January 1997. Prior to joining us, Mr. Chandrasekaran worked with Tata Consultancy Services. Mr. Chandrasekaran holds a Mechanical Engineering degree and Master of Business Administration degree from the Indian Institute of Management.
- (6) Rajeev Mehta was appointed Chief Executive Officer, IT Services, effective December 4, 2013. In this role, Mr. Mehta will have responsibility for market facing activities across the company as well as for delivery across our IT Services business. From February 2012 to December 2013, Mr. Mehta served as Group Chief Executive-Industries and Markets. In this role, Mr. Mehta was responsible for leading our industry vertical and geographic market operations on a global basis. From August 2006 to February 2012, he served as our Chief Operating Officer, Global Client Services, responsible for our sales, business development and client relationship management organizations. Mr. Mehta served as Senior Vice President and General Manager of our Financial Services business segment from June 2005 to August 2006. From November 2001 to June 2005, he served as our Vice President and General Manager of our Financial Services business segment. From January 1998 to November 2001, Mr. Mehta served as our Director of the U.S. Central Region. Mr. Mehta served as our Senior Manager of Business Development from January 1997 to January 1998. Prior to joining Cognizant in 1997, Mr. Mehta was involved in implementing GE Information Services offshore outsourcing program and also held consulting positions at Deloitte & Touche and Andersen Consulting. Mr. Mehta holds a Bachelor of Science degree from the University of Maryland and a Master of Business Administration degree from Carnegie Mellon University.
- (7) Malcolm Frank was appointed Executive Vice President, Strategy and Marketing, effective February 6, 2012. Mr. Frank served as our Senior Vice President of Strategy and Marketing from August 2005 to February 2012. In both these roles, Mr. Frank's responsibilities have included, and continue to include, directing all aspects of our corporate marketing function, including strategy and branding, industry and media relations, corporate communications and corporate marketing. From August 2005 until June 2009, Mr. Frank was also responsible for leading our field marketing function. Prior to joining Cognizant in August 2005, Mr. Frank was co-founder, President and Chief Executive Officer of CXO Systems, Inc., an independent software vendor providing dashboard solutions for senior managers, from March 2002 to July 2005. From June 1999 to September 2002, Mr. Frank was the founder, President, Chief Executive Officer and Chairman of Nervewire Inc. (Nervewire), a management consulting and systems integration firm. Prior to founding Nervewire, Mr. Frank was a co-founder, executive officer, and Senior Vice President at Cambridge Technology Partners, where he ran Worldwide Marketing, Business Development, and several business units, from January 1990 to June 1999. Mr. Frank graduated from Yale University with a degree in Economics.
- (8) Steven Schwartz was appointed Executive Vice President, Chief Legal and Corporate Affairs Officer on December 4, 2013. In this role, Mr. Schwartz will have responsibility for our global legal teams, our global government affairs efforts and our global security team. From July 2007 to December 2013, Mr. Schwartz served as Senior Vice President, General Counsel and Secretary, having global responsibility for managing Cognizant's legal function. Mr. Schwartz, who joined Cognizant in 2001, previously served as Vice President and General Counsel, a position he held from March 2003 to July 2007. From April 2002 to March 2003, he served as our Vice President and Chief Corporate Counsel. From October 2001 to December 2002, he served as our Chief Corporate Counsel. Mr. Schwartz serves on the Board of Directors of Information Technology Industry Council and Citizen Schools. Mr. Schwartz holds a Bachelor of Business Administration degree from the University of Miami, a Juris Doctor degree from Fordham University School of Law and a Master of Law (in Taxation) degree from the New York University School of Law.
- (9) Sridhar Thiruvengadam was appointed Chief Operating Officer of the company, effective May 8, 2013. Previously, from January 2012 to May 2013, Mr. Thiruvengadam served as an Executive Vice President of the company, leading the global delivery operations for several of the company's industry verticals, and head of the company's BPS practice. From January 2010 to January 2012, Mr. Thiruvengadam served as a Senior Vice President and global head of BPS, infrastructure and testing services. From April 2007 to January 2010, Mr. Thiruvengadam served as the company's Chief People Officer in charge of talent

Table of Contents

- acquisition, management, training and staffing. From March 2001 to March 2007, Mr. Thiruvengadam held several positions in the company's banking, financial services, healthcare and insurance practices, including Vice President and head of the company's insurance industry vertical. Mr. Thiruvengadam joined the company as a project manager in November 1994. Mr. Thiruvengadam holds a M.Tech degree from the Indian Institute of Technology, Madras.
- (10) Ramakrishna Prasad Chintamaneni was appointed Executive Vice President and President, Banking and Financial Services, effective December 04, 2013. In this role, Mr. Chintamaneni is responsible for leading Banking and Financial Services. From 2011 to December 2013, Mr. Chintamaneni served as our Global Head of Banking and Financial Services Practice and was responsible for the practice's sales, business development, consulting, client relationships, management and delivery, and global profit and loss. Previously, from 2010 to 2011, Mr. Chintamaneni served as our Global Head of Markets for the Banking and Financial Services Practice. From 2006 to 2009, he served as our Head of Banking and Financial Services Practice for North America. From 1999 through 2006, Mr. Chintamaneni served as our Client Partner, managing the relationships with several of our key Banking and Financial Services clients, and also led our U.S. Eastern Region's Banking and Financial Services Practice. Prior to joining Cognizant in 1999, Mr. Chintamaneni spent seven years in the investment banking and financial services industry, including working at Merrill Lynch and its affiliates for five years as an Investment Banker and a member of Merrill's business strategy committee in India. Mr. Chintamaneni serves on the Board of Directors of NPower, a nonprofit that helps nonprofits, schools and individuals build technology skills by harnessing the power of the technology community. Mr. Chintamaneni obtained his Bachelor of Technology degree in Chemical Engineering from the Indian Institute of Technology, Kanpur and a Postgraduate Diploma in Business Management from XLRI School of Management in India.
- (11) Venkat Krishnaswamy was appointed President, Healthcare & Life Sciences, effective December 4, 2013. In this role, Mr. Krishnaswamy is focused on delivering solutions and services to the healthcare industry. From February 2012 to December 2013, Mr. Krishnaswamy served as Executive Vice President of Healthcare and Life Sciences. From April 2007 to February 2012, Mr. Krishnaswamy served as Senior Vice President and General Manager of Healthcare and Life Sciences. Mr. Krishnaswamy served as Vice President - Projects from January 2003 to April 2007 and as Director of Projects from April 1999 to January 2003. Upon joining Cognizant in 1997, Mr. Krishnaswamy served as Senior Manager until April 1999. Between 1997 and 2003, Mr. Krishnaswamy served in our Banking & Financial Services Practice. Prior to joining Cognizant in 1997, Mr. Krishnaswamy spent over ten years in retail and commercial banking with Colonial State Bank (now Commonwealth Bank of Australia). Mr. Krishnaswamy holds a Bachelor of Engineering degree from the University of Madras and a Masters degree in Electrical Engineering from the Indian Institute of Technology New Delhi.
- (12) Debashis Chatterjee was appointed Executive Vice President and President, Technology Solutions, effective December 4, 2013. In this role, Mr. Chatterjee has responsibility for all of our horizontal practices within IT Services and is responsible for implementing best practices in service delivery and creating solutions across our horizontal practices. From May 2013 until his current appointment, Mr. Chatterjee served as Senior Vice President and Global Head, Technology and Information Services. From March 2012 to April 2013, he was Senior Vice President, Transformational Services. Previously, from April 2011 to January 2012, Mr. Chatterjee served as Vice President and Sectors Leader, Global Business Services, Global Delivery at IBM, a multinational technology and consulting company. From January 2010 to March 2011, Mr. Chatterjee was Senior Vice President and Global Head of Cognizant's Banking and Financial Services practice, or BFS, from April 2007 to December 2009, he was Senior Vice President and Global Delivery Head of BFS, and from April 2004 to March 2007, he was Vice President and Global Delivery Head of BFS. Prior to that, Mr. Chatterjee held various key management roles at Cognizant since joining us in 1996. Mr. Chatterjee has a Bachelor of Engineering in Mechanical Engineering from Jadavpur University in India.
- (13) Dharmendra Kumar Sinha was appointed Executive Vice President and President, Client Services, effective December 4, 2013. In this role, Mr. Sinha leads our global sales, field marketing and intermediary relations teams. He is also responsible for our strategic partnerships and alliances organization. From 2007 to December 2013, Mr. Sinha served as Senior Vice President and General Manager, Global Sales and Field Marketing. From 2004 to 2007, Mr. Sinha served as our Vice President, responsible for our Manufacturing,

Table of Contents

- Logistics, Retail, Hospitality, and Technology verticals. In addition, he assumed the role of Head of Sales and managed our Field Marketing function. From January 2008 to December 2008, Mr. Sinha additionally managed the Insurance business unit. Prior to that, from 1998 to 2004, Mr. Sinha served as Director and subsequently as Vice President of the U.S. Western Region. From 1997 to 1998, Mr. Sinha served in various operational and business development positions. Prior to joining Cognizant in 1997, Mr. Sinha worked with Tata Consultancy Services and CMC Limited, an end-to-end IT solutions provider. Mr. Sinha has a Bachelor of Science Degree from Patna Science college, Patna and a Master's Degree in Business Administration from Birla Institute of Technology, Mesra.
- (14) Sumithra Gomatam was appointed Executive Vice President and President, Industry Solutions, effective December 04, 2013. In this role, Ms. Gomatam oversees global delivery for all of our industry verticals and is responsible for implementing best practices in services delivery and for creating solutions across our industry practices. Ms. Gomatam also leads our Communications and High Technology business units. From July 2008 to December 2013, Ms. Gomatam served as Senior Vice President, Projects. In this role, Ms. Gomatam served initially as our Global Delivery Head and then as Global Practice Leader for our testing practice. From March 2006 to July 2008, Ms. Gomatam served as Vice President, Projects, leading global delivery and building out the testing practice. From 2001 to March 2006, Ms. Gomatam served as an Account Relationship Manager and as part of our Core Delivery Leadership Team in our banking and financial services practices. From 1995, when Ms. Gomatam joined us, until 2001, she held various key positions within The Dun & Bradstreet Corporation and Cognizant, including serving our banking and financial services clients on application development and application maintenance projects. Ms. Gomatam received her B.E. in Electronics and Communication from Anna University.
- None of our executive officers are related to any other executive officer or to any of our Directors. Our executive officers are elected annually by the Board of Directors and serve until their successors are duly elected and qualified.

Corporate History

We began our IT development and maintenance services business in early 1994, as an in-house technology development center for The Dun & Bradstreet Corporation and its operating units. In 1996, we, along with certain other entities, were spun-off from The Dun & Bradstreet Corporation to form a new company, Cognizant Corporation. On June 24, 1998, we completed an initial public offering of our Class A common stock. On June 30, 1998, a majority interest in us, and certain other entities were spun-off from Cognizant Corporation to form IMS Health. Subsequently, Cognizant Corporation was renamed Nielsen Media Research, Incorporated.

On January 30, 2003, we filed a tender offer in which IMS Health stockholders could exchange IMS Health shares held by them for our Class B common stock held by IMS Health. On February 13, 2003, IMS Health distributed all of our Class B common stock that IMS Health owned in an exchange offer to its stockholders. On February 21, 2003, pursuant to the terms of our Restated Certificate of Incorporation, all of the shares of Class B common stock automatically converted into shares of Class A common stock. Since February 21, 2003, there have been no outstanding shares of Class B common stock. Effective May 26, 2004, pursuant to our Certificate of Incorporation, there are no authorized shares of Class B common stock.

Available Information

We make available the following public filings with the Securities and Exchange Commission, or the SEC, free of charge through our website at www.cognizant.com as soon as reasonably practicable after we electronically file such material with, or furnish such material to, the SEC:

our Annual Reports on Form 10-K and any amendments thereto;

our Quarterly Reports on Form 10-Q and any amendments thereto; and

our Current Reports on Form 8-K and any amendments thereto.

In addition, we make available our code of business conduct and ethics entitled "Cognizant's Core Values and Standards of Business Conduct" free of charge through our website. We intend to disclose any amendments to, or waivers from, our code of business conduct and ethics that are required to be publicly disclosed pursuant to rules of the SEC and the NASDAQ Global Select Market by posting it on our website.

No information on our website is incorporated by reference into this Form 10-K or any other public filing made by us with the SEC.

Table of Contents

Item 1A. Risk Factors **Factors That May Affect Future Results**

In addition to the risks and uncertainties described elsewhere in this Annual Report on Form 10-K, if any of the following risks occur, our business, financial condition, results of operations or prospects could be materially adversely affected. In such case, the trading price of our common stock could decline.

Our global operations are subject to complex risks, some of which might be beyond our control.

We have offices and operations in various countries around the world and provide services to clients globally. In 2013, approximately 77.6% of our revenues were attributable to the North American region, 17.9% were attributable to the European region, and 4.6% were attributable to the rest of the world, primarily the Asia Pacific region. If we are unable to manage the risks of our global operations, including regulatory, economic, political and other uncertainties in India, fluctuations in foreign exchange and inflation rates, international hostilities, terrorism, natural disasters, and multiple legal and regulatory systems, our results of operations could be adversely affected.

A substantial portion of our assets and operations are located in India and we are subject to regulatory, economic, political and other uncertainties in India.

We intend to continue to develop and expand our offshore facilities in India where a majority of our technical professionals are located. While wage costs are lower in India than in the United States and other developed countries for comparably skilled professionals, wages in India have historically increased at a faster rate than in the United States and other countries in which we operate. If this trend continues in the future, it would result in increased costs for our skilled professionals and thereby potentially reduce our operating margins. Also, there is no assurance that, in future periods, competition for skilled professionals will not drive salaries higher in India, thereby resulting in increased costs for our technical professionals and reduced operating margins.

India has also recently experienced civil unrest and terrorism and has been involved in conflicts with neighboring countries. In recent years, there have been military confrontations between India and Pakistan that have occurred in the region of Kashmir and along the India-Pakistan border. The potential for hostilities between the two countries has been high in light of tensions related to recent terrorist incidents in India and the unsettled nature of the regional geopolitical environment, including events in and related to Afghanistan and Iraq. If India becomes engaged in armed hostilities, particularly if these hostilities are protracted or involve the threat of or use of weapons of mass destruction, it is likely that our operations would be materially adversely affected. In addition, companies may decline to contract with us for services in light of international terrorist incidents or armed hostilities, even where India is not involved, because of more generalized concerns about relying on a service provider utilizing international resources that may be viewed as less stable than those provided domestically.

In the past, the Indian economy has experienced many of the problems that commonly confront the economies of developing countries, including high inflation, erratic gross domestic product growth and shortages of foreign exchange. The Indian government has exercised, and continues to exercise, significant influence over many aspects of the Indian economy and Indian government actions concerning the economy could have a material adverse effect on private sector entities like us. In the past, the Indian government has provided significant tax incentives and relaxed certain regulatory restrictions in order to encourage foreign investment in specified sectors of the economy, including the software development services industry. Programs that have benefited us include, among others, tax holidays, liberalized import and export duties and preferential rules on foreign investment and repatriation. Notwithstanding these benefits, as noted above, India's central and state governments remain significantly involved in the Indian economy as regulators. In recent years, the Indian government has introduced non-income related taxes, including new service taxes, and income-related taxes,

Table of Contents

including the Minimum Alternative Tax, or MAT. In addition, a change in government leadership in India or a change in policies of the existing government in India that results in the elimination of any of the benefits realized by us from our Indian operations or the imposition of new taxes applicable to such operations could have a material adverse effect on our business, results of operations and financial condition.

In addition, the emergence of a widespread health emergency or pandemic, which may be more difficult to prevent or contain in a country like India as compared to more developed countries, could create economic or financial disruption that could negatively affect our revenue and operations or impair our ability to manage our business in certain parts of the world.

Our international sales and operations are subject to many uncertainties.

Revenues from customers outside North America represented approximately 22.4% of our revenues for the year ended December 31, 2013. We anticipate that revenues from customers outside North America will continue to account for a material portion of our revenues in the foreseeable future and may increase as we expand our international presence, particularly in Europe, the Asia Pacific region and the Latin America region. In addition, the majority of our employees, along with our development and delivery centers, are located in India. As a result, we may be subject to risks inherently associated with international operations, including risks associated with foreign currency exchange rate fluctuations, which may cause volatility in our reported income, and risks associated with the application and imposition of protective legislation and regulations relating to import or export or otherwise resulting from foreign policy or the variability of foreign economic conditions. From time to time, we may engage in hedging transactions to mitigate our risks relating to exchange rate fluctuations. The use of hedging contracts is intended to mitigate or reduce transactional level volatility in the results of our foreign operations, but does not completely eliminate volatility and risk. In addition, the use of hedging contracts includes the risk of non-performance by the counterparty. Additional risks associated with international operations include difficulties in enforcing intellectual property and/or contractual rights, the burdens of complying with a wide variety of foreign laws, potentially adverse tax consequences, tariffs, quotas and other barriers and potential difficulties in collecting accounts receivable. In addition, we may face competition in other countries from companies that may have more experience with operations in such countries or with international operations. Additionally, such companies may have long-standing or well-established relationships with local officials and/or desired clients, which may put us at a competitive disadvantage. We may also face difficulties integrating new facilities in different countries into our existing operations, as well as integrating employees that we hire in different countries into our existing corporate culture. Our international expansion plans may not be successful and we may not be able to compete effectively in other countries. There can be no assurance that these and other factors will not impede the success of our international expansion plans, limit our ability to compete effectively in other countries or otherwise have a material adverse effect on our business, results of operations and financial condition.

Our operating results may be adversely affected by fluctuations in the Indian rupee and other foreign currency exchange rates and restrictions on the deployment of cash across our global operations.

Although we report our operating results in U.S. dollars, a portion of our revenues and expenses are denominated in currencies other than the U.S. dollar. Fluctuations in foreign currency exchange rates can have a number of adverse effects on us. Because our consolidated financial statements are presented in U.S. dollars, we must translate revenues, expenses and income, as well as assets and liabilities, into U.S. dollars at exchange rates in effect during or at the end of each reporting period. Therefore, changes in the value of the U.S. dollar against other currencies will affect our revenues, income from operations, other income (expense), net and the value of balance sheet items originally denominated in other currencies. There is no guarantee that our financial results will not be adversely affected by currency exchange rate fluctuations or that any efforts by us to engage in currency hedging activities will be effective. In addition, in some countries we could be subject to strict restrictions on the movement of cash and the exchange of foreign currencies, which could limit our ability to use these funds across our global operations. Finally, as we continue to leverage our global delivery model, more of

Table of Contents

our expenses are incurred in currencies other than those in which we bill for the related services. An increase in the value of certain currencies, such as the Indian rupee, against the U.S. dollar could increase costs for delivery of services at offshore sites by increasing labor and other costs that are denominated in local currency.

Our operating results may be adversely affected by our use of derivative financial instruments.

We have entered into a series of foreign exchange forward contracts that are designated as cash flow hedges of certain rupee denominated payments in India. These contracts are intended to partially offset the impact of the movement of the exchange rates on future operating costs. In addition, we also entered into foreign exchange forward contracts in order to mitigate foreign currency risk on foreign currency denominated net monetary assets. The hedging strategies that we have implemented, or may in the future implement, to mitigate foreign currency exchange rate risks may not reduce or completely offset our exposure to foreign exchange rate fluctuations and may expose our business to unexpected market, operational and counterparty credit risks. Accordingly, we may incur losses from our use of derivative financial instruments that could have a material adverse effect on our business, results of operations and financial condition.

Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violations of these regulations could harm our business.

Because we provide services to clients throughout the world, we are subject to numerous, and sometimes conflicting, legal rules on matters as diverse as import/export controls, content requirements, trade restrictions, tariffs, taxation, sanctions, government affairs, internal and disclosure control obligations, data privacy and labor relations. Violations of these laws or regulations in the conduct of our business could result in fines, criminal sanctions against us or our officers, prohibitions on doing business, damage to our reputation and other unintended consequences such as liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Due to the varying degrees of development of the legal systems of the countries in which we operate, local laws might be insufficient to protect our rights. Our failure to comply with applicable legal and regulatory requirements could have a material adverse effect on our business, results of operations and financial condition.

Among other anti-corruption laws and regulations, including the U.K. Bribery Act, we are subject to the United States Foreign Corrupt Practices Act, or FCPA, which prohibits improper payments or offers of improper payments to foreign officials to obtain business or any other benefit. The FCPA also requires covered companies to make and keep books and records that accurately and fairly reflect the transactions of the company and to devise and maintain an adequate system of internal accounting controls. In many parts of the world, including countries in which we operate, practices in the local business community might not conform to international business standards and could violate these anti-corruption laws or regulations. Although we have policies and procedures in place that are designed to promote legal and regulatory compliance, our employees, subcontractors and agents could take actions that violate these policies or procedures or applicable anti-corruption laws or regulations. Furthermore, the U.S. government may seek to hold us liable for successor liability FCPA violations committed by companies in which we invest or that we acquire. Violations of these laws or regulations could subject us to criminal or civil enforcement actions, including fines and suspension or disqualification from government contracting or contracting with private entities in certain highly regulated industries, any of which could have a material adverse effect on our business.

International hostilities, terrorist activities, other violence or war, natural disasters, pandemics and infrastructure disruptions, could delay or reduce the number of new service orders we receive and impair our ability to service our customers, thereby adversely affecting our business, financial condition and results of operations.

Hostilities involving the United States and acts of terrorism, violence or war, such as the attacks of September 11, 2001 in the United States, the attacks of July 7, 2005 in the United Kingdom, the attacks of

Table of Contents

November 26, 2008 and July 13, 2011 in Mumbai, India, and the continuing conflict in the Middle East and Afghanistan, natural disasters, global health risks or pandemics or the threat or perceived potential for these events could materially adversely affect our operations and our ability to provide services to our customers. Such events may cause customers to delay their decisions on spending for information technology, consulting, and business process services and give rise to sudden significant changes in regional and global economic conditions and cycles. These events also pose significant risks to our people and to physical facilities and operations around the world, whether the facilities are ours or those of our clients, which could affect our financial results. By disrupting communications and travel, giving rise to travel restrictions, and increasing the difficulty of obtaining and retaining highly-skilled and qualified personnel, these events could make it difficult or impossible for us to deliver services to some or all of our clients. As noted above, the majority of our technical professionals are located in India, and the vast majority of our technical professionals in the United States and Europe are Indian nationals who are able to work in the United States and Europe only because they hold current visas and work permits. Travel restrictions could cause us to incur additional unexpected labor costs and expenses or could restrain our ability to retain the skilled professionals we need for our operations. In addition, any extended disruptions of electricity, other public utilities or network services at our facilities, as well as system failures at, or security breaches in, our facilities or systems, could also adversely affect our ability to serve our clients.

Although we continue to believe that we have a strong competitive position in the United States, we continue to increase our efforts to geographically diversify our clients and revenue. Despite our efforts to diversify, hostilities involving the United States, the United Kingdom, India and other countries in which we provide services to our clients, and other acts of terrorism, violence or war, natural disasters, global health risks or pandemics may reduce the demand for our services and negatively affect our revenues and profitability. While we plan and prepare to defend against each of these occurrences, we might be unable to protect our people, facilities and systems against all such occurrences. If these disruptions prevent us from effectively serving our clients, our operating results could be adversely affected.

Anti-outsourcing legislation, if adopted, and negative perceptions associated with offshore outsourcing could adversely affect our business, financial condition and results of operations and impair our ability to service our customers.

The issue of companies outsourcing services to organizations operating in other countries is a topic of political discussion in many countries, including the United States, which is our largest market. For example, measures aimed at limiting or restricting outsourcing by United States companies are periodically considered in the U.S. Congress and in numerous state legislatures to address concerns over the perceived association between offshore outsourcing and the loss of jobs domestically. On August 13, 2010, President Barack Obama signed legislation which imposed additional fees of \$2,000 for certain H-1B petitions and \$2,250 for certain L-1A and L-1B petitions beginning in August 2010 through September 20, 2014. These fees were later extended through September 20, 2015. Given the ongoing debate over outsourcing, the introduction and consideration of other restrictive legislation or regulations is possible. If enacted, such measures may: broaden existing restrictions on outsourcing by federal and state government agencies and on government contracts with firms that outsource services directly or indirectly, or impact private industry with measures that include, but are not limited to, tax disincentives, fees or penalties, intellectual property transfer restrictions, mandatory government audit requirements, and new standards that have the effect of restricting the use of certain business and/or work visas. In the event that any of these measures become law, our business, results of operations and financial condition could be adversely affected and our ability to provide services to our customers could be impaired.

In addition, from time to time, there has been publicity about negative experiences associated with offshore outsourcing, such as domestic job loss, and theft and misappropriation of sensitive client data, particularly involving service providers in India. Current or prospective clients may elect to perform certain services themselves or may be discouraged from utilizing global service delivery providers due to negative perceptions that may be associated with using global service delivery models or firms. Any slowdown or reversal of existing industry trends toward global service delivery would seriously harm our ability to compete effectively with competitors that provide the majority of their services from within the country in which our clients operate.

Table of Contents

Existing and future legislative and administrative/ regulatory policies restricting the performance of business process services from an offshore location in jurisdictions in Europe, the Asia Pacific, or any other region in which we have clients could also have a material adverse effect on our business, results of operations and financial condition. For example, legislation enacted in the United Kingdom, based on the 1977 EC Acquired Rights Directive, has been adopted in some form by many European Union, or EU, countries, and provides that if a company outsources all or part of its business to a service provider or changes its current service provider, the affected employees of the company or of the previous service provider are entitled to become employees of the new service provider, generally on the same terms and conditions as their original employment. In addition, dismissals of employees who were employed by the company or the previous service provider immediately prior to that transfer are automatically considered unfair dismissals that entitle such employees to compensation. As a result, to avoid unfair dismissal claims, we may have to offer, and become liable for, voluntary redundancy payments to the employees of our clients who outsource business to us in the United Kingdom and other EU countries that have adopted similar laws. These types of policies may materially affect our ability to obtain new business from companies in the United Kingdom and EU and to provide outsourced services to companies in the United Kingdom and EU in a cost-effective manner.

Our growth may be hindered by immigration restrictions.

Our future success continues to depend on our ability to attract and retain employees with technical and project management skills, including those from developing countries, especially India. The ability of foreign nationals to work in the United States and Europe depends on their ability and our ability to obtain the necessary visas and work permits.

The H-1B visa classification enables United States employers to hire certain qualified foreign workers in positions that require an education at least equal to a four-year bachelor degree in the United States in specialty occupations such as IT systems engineering and computer systems analysis. The H-1B visa usually permits an individual to work and live in the United States for a period of up to six years. Under certain limited circumstances, H-1B visa extensions after the six-year period may be available. There is a limit on the number of new H-1B petitions that the United States Citizenship and Immigration Services, or CIS, may approve in any federal fiscal year, and in years in which this limit is reached, we may be unable to obtain H-1B visas necessary to bring foreign employees to the United States. Currently, the limit is 65,000 for holders of United States or United States-equivalent bachelor degrees (the general cap), and an additional 20,000 for holders of advanced degrees from United States post-secondary educational institutions. CIS announced on April 5, 2013 that the agency had reached its general cap of 65,000 H-1B visas and its advanced degree cap of 20,000 H-1B visas for the fiscal year (FY) 2014. We will begin filing H-1B petitions with CIS against the fiscal year (FY) 2015 caps beginning April 1, 2014 for work in H-1B status beginning on October 1, 2014. As part of our advanced planning process, we believe that we have a sufficient number of employees who are work permit-ready to meet our anticipated business growth in the current year. In addition, there are strict labor regulations associated with the H-1B visa classification. Larger users of the H-1B visa program, like us, face additional/higher legal and regulatory standards, and are often subject to investigations by the Wage and Hour Division of the United States Department of Labor (DOL) and unannounced random site inspections by CIS's parent agency, the United States Department of Homeland Security (DHS). A finding by DOL, DHS, and/ or another governmental agency of willful or substantial failure to comply with existing regulations on the H-1B classification may result in back-pay liability, substantial fines, and/ or a ban on future use of the H-1B program and/ or other immigration benefits.

We also regularly transfer foreign professionals to the United States to work, including work on projects at client sites, using the L-1 visa classification. Companies abroad are allowed to transfer certain managers and executives through the L-1A visa, and employees with specialized company knowledge through the L-1B visa to related United States companies, such as a parent, subsidiary, affiliate, joint venture, or branch office. We have an approved Blanket L petition, under which the corporate relationships of our transferring and receiving entities have been pre-approved by CIS, thus enabling individual L-1 visa applications to be presented directly to

Table of Contents

a visa-issuing United States consular post abroad rather than undergoing a pre-approval process through CIS in the United States. In recent years, both the United States consular posts in India that review initial L-1 applications and CIS, which adjudicates individual petitions for initial grants and extensions of L-1 visa status, have become increasingly restrictive with respect to this category, particularly the L-1B specialized knowledge standard. As a result, the rate of refusals of initial individual L-1 petitions and extensions for Indian nationals has increased. In addition, even where L-1 visas are ultimately granted and issued, security measures undertaken by United States consular posts around the world have delayed or prevented visa issuances. Our inability to bring qualified technical personnel into the United States to staff on-site customer locations would have a material adverse effect on our business, results of operations and financial condition.

Pursuant to the L-1 Visa Reform Act, we must meet a number of restrictions and requirements to obtain L-1 visas for our personnel. For example, all L-1 applicants, including those brought to the United States under a Blanket L Program, must have worked abroad with the related company for one full year in the prior three years. In addition, L-1B specialized knowledge visa holders may not be primarily stationed at the work site of another employer if the L-1B visa holder will be principally controlled and supervised by an employer other than the petitioning employer. Finally, L-1B status may not be granted where placement of the L-1B visa holder at a third party site is part of an arrangement to provide labor for the third party, rather than placement at the site in connection with the provision of a product or service involving specialized knowledge specific to the petitioning employer.

We do not place L-1B workers at third party sites where they are under the primary supervision of a different employer, nor do we place L-1B workers at third party sites in an arrangement to provide labor for the third party without providing a service involving our workers specialized knowledge. Since implementation of the L-1 Visa Reform Act, we consistently have established this fact to CIS's satisfaction. However, if CIS and/ or the United States Department of State, through its visa-issuing consular posts abroad, decide to interpret these provisions in a very restrictive fashion, this could impair our ability to effectively staff our projects in the United States with personnel from abroad. New guidance governing these and related statutory provisions from CIS is anticipated, and if such guidance is restrictive in nature, our ability to staff our projects in the United States with personnel from abroad will be impaired.

We also process immigrant visas for lawful permanent residence (Green Cards) in the United States for employees to fill positions for which there are an insufficient number of able, willing, and qualified United States workers available to fill the positions. Compliance with existing United States immigration and labor laws, changes in those laws, and/ or increase in governmental scrutiny, making it more difficult to hire foreign nationals or limiting our ability to successfully obtain permanent residence for our foreign employees in the United States, could require us to incur additional unexpected labor and/ or other costs and expenses, and/ or could restrain our ability to retain the skilled professionals we need for our operations in the United States. Any of these restrictions or limitations on our hiring practices could have a material adverse effect on our business, results of operations and financial condition.

In addition to immigration restrictions in the United States, there are certain restrictions on transferring employees to work in the United Kingdom, where we have experienced significant growth. The United Kingdom currently requires that all employees who are not nationals of European Union countries (plus nationals of Bulgaria and Romania), or EEA nationals, obtain work permission before obtaining a visa/entry clearance to travel to the United Kingdom. European nations such as Hungary, Poland, Lithuania, Slovakia, and the Czech Republic do not have a work permit requirement but employees need to register to work within 30 days of arrival. The United Kingdom has a points-based system under which certain certificates of sponsorship are issued by licensed employer sponsors, provided the employees they seek to employ in the United Kingdom can accumulate a certain number of points based on certain attributes. Where the employee has not worked for a Cognizant group company outside the United Kingdom for at least 6 months, we must carry out a resident labor market test to confirm that the intended role cannot be filled by an EEA national. We are currently an A-rated sponsor and were allocated certificates of sponsorship which we believe are sufficient to meet our current and

Table of Contents

expected demand for transfers to the United Kingdom. On November 23, 2010, the United Kingdom announced new restrictions to control annual net migration, but allowed for temporary intra-company transfers of employees from outside the European Economic Area for up to five years as long as the employees meet certain compensation requirements.

Immigration and work permit laws and regulations in the United States, the United Kingdom, the EU, Switzerland and other countries are subject to legislative and administrative changes as well as changes in the application of standards and enforcement. Immigration and work permit laws and regulations can be significantly affected by political forces and levels of economic activity. Our international expansion strategy and our business, results of operations, and financial condition may be materially adversely affected if changes in immigration and work permit laws and regulations or the administration or enforcement of such laws or regulations impair our ability to staff projects with professionals who are not citizens of the country where the work is to be performed.

Our revenues are highly dependent on clients primarily located in the United States and Europe, as well as on clients concentrated in certain industries, including the financial services industry. Continuing or worsening economic conditions or factors that negatively affect the economic health of the United States, Europe or these industries may adversely affect our business.

Approximately 77.6% of our revenues during the year ended December 31, 2013 were derived from customers located in North America. In the same period, approximately 17.9% of our revenues were derived from customers located in Europe. If the United States or European economy weakens or slows and conditions in the financial markets deteriorate, pricing for our services may be depressed and our customers may reduce or postpone their technology spending significantly, which may in turn lower the demand for our services and negatively affect our revenues and profitability. Additionally, any prolonged recession in the United States and Europe could have an adverse impact on our revenues because our revenues are primarily derived from the United States and Europe. In addition, during the year ended December 31, 2013, we earned approximately 42.0% of our revenues from the financial services industry, which includes insurance. Deterioration in the financial services industry or significant consolidation in that industry, or a decrease in growth or consolidation in other industry segments on which we focus, may reduce the demand for our services and negatively affect our revenues and profitability. In addition, if we are unable to successfully anticipate changing economic and political conditions affecting the industries and markets in which we operate, we may be unable to effectively plan for or respond to those changes, and our business could be negatively affected.

We face intense competition from other service providers.

We operate in intensely competitive industries that experience rapid technological developments, changes in industry standards, and changes in customer requirements. The intensely competitive information technology, consulting and business process professional services markets include a large number of participants and are subject to rapid change. These markets include participants from a variety of market segments, including:

systems integration firms;

contract programming companies;

application software companies;

internet solutions providers;

large or traditional consulting companies;

professional services groups of computer equipment companies; and

infrastructure management and outsourcing companies.

Table of Contents

These markets also include numerous smaller local competitors in the various geographic markets in which we operate which may be able to provide services and solutions at lower costs or on terms more attractive to clients than we can. Our direct competitors include, among others, Accenture, Capgemini, Computer Sciences Corporation, Genpact, HCL Technologies, HP Enterprise (formerly Electronic Data Systems), IBM Global Services, Infosys Technologies, Tata Consultancy Services and Wipro. Many of our competitors have significantly greater financial, technical and marketing resources and greater name recognition and, therefore, may be better able to compete for new work and skilled professionals. There is a risk that increased competition could put downward pressure on the prices we can charge for our services and on our operating margins. Similarly, if our competitors develop and implement methodologies that yield greater efficiency and productivity, they may be able to offer services similar to ours at lower prices without adversely affecting their profit margins. Even if our offerings address industry and client needs, our competitors may be more successful at selling their services. If we are unable to provide our clients with superior services and solutions at competitive prices or successfully market those services to current and prospective clients, our results of operations may suffer. Further, a client may choose to use its own internal resources rather than engage an outside firm to perform the types of services we provide. We cannot be certain that we will be able to sustain our current levels of profitability or growth in the face of competitive pressures, including competition for skilled technology professionals and pricing pressure from competitors employing an on-site/offshore business model.

In addition, we may face competition from companies that increase in size or scope as the result of strategic mergers or acquisitions. These transactions may include consolidation activity among hardware manufacturers, software companies and vendors, and service providers. The result of any such vertical integration may be greater integration of products and services that were once offered separately by independent vendors. Our access to such products and services may be reduced as a result of such an industry trend, which could adversely affect our competitive position. These types of events could have a variety of negative effects on our competitive position and our financial results, such as reducing our revenue, increasing our costs, lowering our gross margin percentage, and requiring us to recognize impairments on our assets.

We may not be able to sustain our current level of profitability.

For the year ended December 31, 2013, we reported an operating margin of 19.0%. Our operating margin may decline if we experience declines in demand and pricing for our services, an increase in our operating costs, including imposition of new non-income related taxes, or due to adverse fluctuations in foreign currency exchange rates. In addition, historically, wages in India have increased at a faster rate than in the United States. Additionally, the number and type of equity-based compensation awards and the assumptions used in valuing equity-based compensation awards may change resulting in increased stock-based compensation expense and lower margins. Although we have historically been able to partially offset wage increases and foreign currency fluctuations through further leveraging the scale of our operating structure, obtaining price increases, and issuing a lower number of stock-based compensation awards in proportion to our overall headcount, we cannot be sure that we will be able to continue to do so in the future.

Our profitability could suffer if we are not able to control our costs or improve our efficiency.

Our ability to control our costs and improve our efficiency affects our profitability. If we are unable to control our costs or improve our efficiency, our profitability could be negatively affected.

Our business will suffer if we fail to develop new services and enhance our existing services in order to keep pace with the rapidly evolving technological environment.

The information technology, consulting and business process professional services markets are characterized by rapid technological change, evolving industry standards, changing customer preferences and new product and service introductions. Our future success will depend on our ability to develop solutions that keep pace with changes in the markets in which we provide services. We cannot be sure that we will be

Table of Contents

successful in developing new services addressing evolving technologies in a timely or cost-effective manner or, if these services are developed, that we will be successful in the marketplace. In addition, we cannot be sure that products, services or technologies developed by others will not render our services non-competitive or obsolete. Our failure to address the demands of the rapidly evolving technological environment could have a material adverse effect on our business, results of operations and financial condition.

Our ability to remain competitive will also depend on our ability to design and implement, in a timely and cost-effective manner, solutions for customers that both leverage their legacy systems and appropriately utilize newer technologies such as cloud-based services, Web 2.0 models, and software-as-a-service. Our failure to design and implement solutions in a timely and cost-effective manner could have a material adverse effect on our business, results of operations and financial condition.

We may face difficulties in providing end-to-end business solutions or delivering complex and large projects for our clients that could cause clients to discontinue their work with us, which in turn could harm our business.

We have been expanding the nature and scope of our engagements and have added new service offerings, such as consulting, business process services, systems integration and outsourcing of entire portions of IT infrastructure. The success of these service offerings is dependent, in part, upon continued demand for such services by our existing, new and prospective clients and our ability to meet this demand in a cost-competitive and effective manner. In addition, our ability to effectively offer a wider breadth of end-to-end business solutions depends on our ability to attract existing or new clients to these service offerings. To obtain engagements for such end-to-end solutions, we also are more likely to compete with large, well-established international consulting firms, resulting in increased competition and marketing costs. Accordingly, we cannot be certain that our new service offerings will effectively meet client needs or that we will be able to attract existing and new clients to these service offerings.

The increased breadth of our service offerings may result in larger and more complex projects with our clients. This will require us to establish closer relationships with our clients and a thorough understanding of their operations. Our ability to establish such relationships will depend on a number of factors, including the proficiency of our professionals and our management personnel. Our failure to understand our client requirements or our failure to deliver services that meet the requirements specified by our clients could result in termination of client contracts, and we could be liable to our clients for significant penalties or damages.

Larger projects may involve multiple engagements or stages, and there is a risk that a client may choose not to retain us for additional stages or may cancel or delay additional planned engagements. These terminations, cancellations or delays may result from factors that have little or nothing to do with the quality of our services, such as the business or financial condition of our clients or the economy generally. Such cancellations or delays make it difficult to plan for project resource requirements and inaccuracies in such resource planning and allocation may have a negative impact on our profitability.

If our clients are not satisfied with our services, our business could be adversely affected.

Our business model depends in large part on our ability to attract additional work from our base of existing clients. Our business model also depends on our account teams' ability to develop relationships with our clients that enable us to understand our clients' needs and deliver solutions and services that are tailored to those needs. If a client is not satisfied with the quality of work performed by us, or with the type of services or solutions delivered, then we could incur additional costs to address the situation, the profitability of that work might be impaired, and the client's dissatisfaction with our services could damage our ability to obtain additional work from that client. In particular, clients that are not satisfied might seek to terminate existing contracts prior to their scheduled expiration date and could direct future business to our competitors. In addition, negative publicity related to our client services or relationships, regardless of its accuracy, may further damage our business by affecting our ability to compete for new contracts with current and prospective clients.

Table of Contents

We rely on a few customers for a large portion of our revenues.

Our top five and top ten customers generated approximately 13.2% and 22.6%, respectively, of our revenues for the year ended December 31, 2013. The volume of work performed for specific customers is likely to vary from year to year, and a major customer in one year may not use our services in a subsequent year. The loss of one of our large customers could have a material adverse effect on our business, results of operations and financial condition.

We generally do not have long-term contracts with our customers and our results of operations could be adversely affected if our clients terminate their contracts with us on short notice.

Consistent with industry practice, we generally do not enter into long-term contracts with our customers. A majority of our contracts can be terminated by our clients with short notice and without significant early termination cost. Terminations may result from factors that are beyond our control and unrelated to our work product or the progress of the project, including the business or financial conditions of the client, changes in ownership or management at our clients, changes in client strategies or the economy or markets generally. When contracts are terminated, we lose the anticipated revenues and might not be able to eliminate our associated costs in a timely manner. Consequently, our profit margins in subsequent periods could be lower than expected. If we are unable to replace the lost revenue with other work on terms we find acceptable or effectively eliminate costs, we may not be able to maintain our level of profitability.

Our results of operations may be affected by the rate of growth in the use of technology in business and the type and level of technology spending by our clients.

Our business depends, in part, upon continued growth in the use of technology in business by our clients and prospective clients as well as their customers and suppliers. In challenging economic environments, our clients may reduce or defer their spending on new technologies in order to focus on other priorities. At the same time, many companies have already invested substantial resources in their current means of conducting commerce and exchanging information, and they may be reluctant or slow to adopt new approaches that could disrupt existing personnel, processes and infrastructures. If the growth of technology usage in business, or our clients' spending on technology in business, declines, or if we cannot convince our clients or potential clients to embrace new technological solutions, our results of operations could be adversely affected.

If we are unable to collect our receivables from, or bill our unbilled services to, our clients, our results of operations and cash flows could be adversely affected.

Our business depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. We evaluate the financial condition of our clients and usually bill and collect on relatively short cycles. We maintain allowances against receivables and unbilled services. Actual losses on client balances could differ from those that we currently anticipate and, as a result, we might need to adjust our allowances. There is no guarantee that we will accurately assess the creditworthiness of our clients. Macroeconomic conditions, such as the continued credit crisis and related turmoil in the global financial system, could also result in financial difficulties, including limited access to the credit markets, insolvency or bankruptcy, for our clients, and, as a result, could cause clients to delay payments to us, request modifications to their payment arrangements that could increase our receivables balance, or default on their payment obligations to us. Timely collection of client balances also depends on our ability to complete our contractual commitments and bill and collect our contracted revenues. If we are unable to meet our contractual requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience an increase in the time to bill and collect for our services, our cash flows could be adversely affected.

Table of Contents

We are investing substantial cash in new facilities and physical infrastructure, and our profitability could be reduced if our business does not grow proportionately.

We have made and continue to make significant contractual commitments related to capital expenditures on construction or expansion of our development and delivery centers. We may encounter cost overruns or project delays in connection with new facilities. These expansions will likely increase our fixed costs and if we are unable to grow our business and revenues proportionately, our profitability may be reduced.

Competition for highly-skilled technical personnel is intense and the success of our business depends on our ability to attract and retain highly-skilled professionals.

Our future success will depend to a significant extent on our ability to attract, train and retain highly-skilled professionals so as to keep our supply of skills and resources in balance with client demand. In particular, we must attract, train and retain appropriate numbers of talented people, including project managers, IT engineers and other senior technical personnel, with diverse skills in order to serve client needs and grow our business. We are particularly dependent on retaining our senior executives and other experienced managers with the skill sets required by our business, and if we are unable to do so, our ability to develop new business and effectively lead our current projects could be jeopardized. Similarly, the profitability of our business model depends on our ability to effectively utilize personnel with the right mix of skills and experience to support our projects. The processes and costs associated with recruiting, training and retaining employees place significant demands on our resources.

We believe there is a shortage of, and significant competition for, professionals with the advanced technological skills necessary to perform the services we offer. We have subcontracted to a limited extent in the past, and may do so in the future, with other service providers in order to meet our obligations to our customers. Our ability to maintain and renew existing engagements and obtain new business will depend, in large part, on our ability to attract, train and retain technical personnel with the skills that keep pace with continuing changes in information technology, evolving industry standards and changing customer preferences. Further, we must train and manage our growing work force, requiring an increase in the level of responsibility for both existing and new management personnel. We cannot guarantee that the management skills and systems currently in place will be adequate or that we will be able to train and assimilate new employees successfully. Our profits and ability to compete for and manage client engagements could be adversely affected if we cannot manage employee hiring and attrition to achieve a stable and efficient workforce structure.

Our ability to operate and compete effectively could be impaired if we lose key personnel or if we cannot attract additional qualified personnel.

Our future performance depends to a significant degree upon the continued service of the key members of our management team, as well as marketing, sales and technical personnel, and our ability to attract and retain new management and other personnel. We do not maintain key man life insurance on any of our executive officers or significant employees. Competition for personnel is intense, and there can be no assurance that we will be able to retain our key employees or that we will be successful in attracting and retaining new personnel in the future. The loss of any one or more of our key personnel or the failure to attract and retain key personnel could have a material adverse effect on our business, results of operations and financial condition.

Restrictions in non-competition agreements with our executive officers may not be enforceable.

Currently we have entered into non-competition agreements with the majority of our executive officers. We cannot be certain, however, that the restrictions in these agreements prohibiting such executive officers from engaging in competitive activities are enforceable. Further, substantially all of our professional non-executive staff are not covered by agreements that would prohibit them from working for our competitors. If any of our key professional personnel leaves our employment and joins one of our competitors, our business could be adversely affected.

Table of Contents

Our earnings may be adversely affected if we change our intent not to repatriate foreign earnings or if such earnings become subject to U.S. tax on a current basis.

We earn a significant amount of our earnings outside of the United States. Other than amounts for which we have already accrued U.S. taxes, we consider foreign earnings to be indefinitely reinvested outside of the United States. While we have no plans to do so, events may occur that could effectively force us to change our intent not to repatriate such earnings. If such earnings are repatriated in the future or are no longer deemed to be indefinitely reinvested, we may have to accrue taxes associated with such earnings at a substantially higher rate than our projected effective income tax rate in 2013. These increased taxes could have a material adverse effect on our business, results of operations and financial condition.

Our earnings may be negatively impacted by the loss of certain tax benefits provided by India to companies in our industry as well as by possible changes in Indian tax laws.

Our Indian subsidiaries, collectively referred to as Cognizant India, are primarily export-oriented and are eligible for certain income tax holiday benefits granted by the Indian government for export activities conducted within Special Economic Zones, or SEZs, for periods of up to 15 years. Changes in Indian tax laws that would reduce or deny SEZ tax benefits could have a material adverse effect on our business, results of operations and financial condition. In addition, all Indian profits, including those generated within SEZs, are subject to the MAT, at the current rate of approximately 20.0%. Any MAT paid is creditable against future corporate income tax, subject to limitations. Currently, we anticipate utilizing our existing MAT balances against future corporate income tax. Our ability to fully do so may be influenced by possible changes to the Indian tax laws as well as the future financial results of Cognizant India. Our inability to fully utilize our deferred income tax assets related to the MAT could have a material adverse effect on our business, results of operations and financial condition.

Our earnings and financial condition may be negatively impacted by certain tax related matters.

We are subject to income taxes in both the United States and numerous foreign jurisdictions. The provision for income taxes and cash tax liability could be adversely affected by numerous factors including, but not limited to, income before taxes being lower than anticipated in countries with lower statutory tax rates and higher than anticipated in countries with higher statutory tax rates, changes in the valuation of deferred tax assets and liabilities, and changes in tax laws, regulations, accounting principles or interpretations thereof, which could adversely impact our results of operations and financial condition in future periods. In addition, our income tax returns are subject to examination in the jurisdictions in which we operate. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. An unfavorable outcome of one or more of these examinations may have an adverse effect on our business, results of operations and financial condition.

If our pricing structures are based on inaccurate expectations and assumptions regarding the cost and complexity of performing our work, then our contracts could be unprofitable.

We negotiate pricing terms with our clients utilizing a range of pricing structures and conditions. We predominantly contract to provide services either on a time-and-materials basis or on a fixed-price basis. Our pricing is highly dependent on our internal forecasts and predictions about our projects and the marketplace, which might be based on limited data and could turn out to be inaccurate. If we do not accurately estimate the costs and timing for completing projects, our contracts could prove unprofitable for us or yield lower profit margins than anticipated. We face a number of risks when pricing our contracts, as many of our projects entail the coordination of operations and workforces in multiple locations and utilizing workforces with different skill sets and competencies across geographically diverse service locations. Our pricing, cost and profit margin estimates for the work that we perform frequently include anticipated long-term cost savings from transformational and other initiatives that we expect to achieve and sustain over the life of the contract. There is a risk that we will underprice our projects, fail to accurately estimate the costs of performing the work or fail to

Table of Contents

accurately assess the risks associated with potential contracts. In particular, any increased or unexpected costs, delays or failures to achieve anticipated cost savings, or unexpected risks we encounter in connection with the performance of this work, including those caused by factors outside our control, could make these contracts less profitable or unprofitable, which could have an adverse effect on our profit margin.

In addition, a significant portion of our projects are contracted on a fixed-price basis, subjecting us to the foregoing risks to an even greater extent. Fixed-price contracts accounted for approximately 34.0% of our revenues for the twelve months ended December 31, 2013. We expect that an increasing number of our future projects will be contracted on a fixed-price basis. In addition to the other risks described in the paragraph above, we bear the risk of cost over-runs and operating cost inflation in connection with projects covered by fixed-price contracts. Our failure to estimate accurately the resources and time required for a fixed-price project, or our failure to complete our contractual obligations within the time frame committed, could have a material adverse effect on our business, results of operations and financial condition.

Our profitability could suffer if we are not able to maintain favorable pricing rates.

Our profit margin, and therefore our profitability, is dependent on the rates we are able to recover for our services. If we are not able to maintain favorable pricing for our services, our profit margin and our profitability could suffer. The rates we are able to recover for our services are affected by a number of factors, including:

our clients' perceptions of our ability to add value through our services;

competition;

introduction of new services or products by us or our competitors;

our competitors' pricing policies;

our ability to accurately estimate, attain and sustain contract revenues, margins and cash flows over increasingly longer contract periods;

bid practices of clients and their use of third-party advisors;

the use by our competitors and our clients of offshore resources to provide lower-cost service delivery capabilities;

our ability to charge premium prices when justified by market demand or the type of service; and

general economic and political conditions.

Our profitability could suffer if we are not able to maintain favorable utilization rates.

The cost of providing our services, including the utilization rate of our professionals, affects our profitability. If we are not able to maintain an appropriate utilization rate for our professionals, our profit margin and our profitability may suffer. Our utilization rates are affected by a number of factors, including:

our ability to efficiently transition employees from completed projects to new assignments;

our ability to hire and assimilate new employees;

our ability to accurately forecast demand for our services and thereby maintain an appropriate headcount in each of our geographies and workforces;

our ability to effectively manage attrition; and

our need to devote time and resources to training, professional development and other non-chargeable activities.

Table of Contents

If we do not continue to improve our operational, financial and other internal controls and systems to manage our rapid growth and size or if we are unable to enter, operate and compete effectively in new geographic markets, our business may suffer and the value of our stockholders' investment in our Company may be harmed.

Our anticipated growth will continue to place significant demands on our management and other resources. Our growth will require us to continue to develop and improve our operational, financial and other internal controls in the United States, Europe, India and elsewhere. In particular, our continued growth will increase the challenges involved in:

recruiting, training and retaining technical, finance, marketing and management personnel with the knowledge, skills and experience that our business model requires;

maintaining high levels of client satisfaction;

developing and improving our internal administrative infrastructure, particularly our financial, operational, communications and other internal systems;

preserving our culture, values and entrepreneurial environment; and

effectively managing our personnel and operations and effectively communicating to our personnel worldwide our core values, strategies and goals.

In addition, the increasing size and scope of our operations increase the possibility that a member of our personnel will engage in unlawful or fraudulent activity, breach our contractual obligations, or otherwise expose us to unacceptable business risks, despite our efforts to train our people and maintain internal controls to prevent such instances. If we do not continue to develop and implement the right processes and tools to manage our enterprise, our ability to compete successfully and achieve our business objectives could be impaired.

As part of our growth strategy, we plan to continue expanding our operations in Europe, Asia, the Middle East, and Latin America. We may not be able to compete effectively in these markets and the cost of entering these markets may be substantially greater than we expect. If we fail to compete effectively in the new markets we enter, or if the cost of entering those markets is substantially greater than we expect, our business, results of operations and financial condition could be adversely affected. In addition, if we cannot compete effectively, we may be required to reconsider our strategy to invest in our international expansion plans and change our intent on the repatriation of our earnings.

Our operating results may experience significant quarterly fluctuations.

Historically, we have experienced significant quarterly fluctuations in our revenues and results of operations and expect these fluctuations to continue. Among the factors causing these variations have been:

the nature, number, timing, scope and contractual terms of the projects in which we are engaged;

delays incurred in the performance of those projects;

the accuracy of estimates of resources and time required to complete ongoing projects; and

general economic conditions.

In addition, our future revenues, operating margins and profitability may fluctuate as a result of:

changes in pricing in response to customer demand and competitive pressures;

changes to the financial condition of our clients;

the mix of on-site and offshore staffing;

the ratio of fixed-price contracts versus time-and-materials contracts;

Table of Contents

employee wage levels and utilization rates;

changes in foreign exchange rates, including the Indian rupee versus the U.S. dollar;

the timing of collection of accounts receivable;

enactment of new taxes;

changes in domestic and international income tax rates and regulations; and

changes to levels and types of stock-based compensation awards and assumptions used to determine the fair value of such awards. A high percentage of our operating expenses, particularly personnel and rent, are relatively fixed in advance of any particular period. As a result, unanticipated variations in the number and timing of our projects or in employee wage levels and utilization rates may cause significant variations in our operating results in any particular period, and could result in losses. Any significant shortfall of revenues in relation to our expectations, any material reduction in utilization rates for our professional staff or variance in the on-site/offshore staffing mix, an unanticipated termination of a major project, a customer's decision not to pursue a new project or proceed to succeeding stages of a current project or the completion of several major customer projects during a quarter could require us to pay underutilized employees and could therefore have a material adverse effect on our business, results of operations and financial condition.

As a result of these factors, it is possible that in some future periods, our revenues and operating results may be significantly below the expectations of public market analysts and investors. In such an event, the price of our common stock would likely be materially and adversely affected.

We could be held liable for damages or our reputation could be damaged by disclosure of confidential information or personal data, security breaches or system failures.

We are dependent on information technology networks and systems to process, transmit and securely store electronic information and to communicate among our locations around the world and with our clients. Security breaches of this infrastructure could lead to shutdowns or disruptions of our systems and potential unauthorized disclosure of confidential information or data, including personal data. In addition, many of our engagements involve projects that are critical to the operations of our customers' businesses and provide benefits that are difficult to quantify. The theft and/or unauthorized use or publication of our, or our clients', confidential information or other proprietary business information as a result of such an incident could adversely affect our competitive position and reduce marketplace acceptance of our services. Any failure in the networks or computer systems used by us or our customers could result in a claim for substantial damages against us and significant reputational harm, regardless of our responsibility for the failure. Although we attempt to limit by contract our liability for damages arising from negligent acts, errors, mistakes or omissions in rendering our services, we cannot assure you that any such damages are subject to a contractual limitation or that any such contractual limitations on liability will be enforceable or will otherwise protect us from liability for damages.

In addition, we often have access to or are required to manage, utilize, collect and store sensitive or confidential client or employee data, including nonpublic personal data. As a result, we are subject to numerous U.S. and foreign jurisdiction laws and regulations designed to protect this information, such as the European Union Directive on Data Protection and various U.S. federal and state laws governing the protection of health or other individually identifiable information. If any person, including any of our employees, negligently disregards or intentionally breaches controls or procedures with which we are responsible for complying with respect to such data or otherwise mismanages or misappropriates that data, or if unauthorized access to or disclosure of data in our possession or control occurs, we could be subject to significant liability to our clients or our clients' customers for breaching contractual confidentiality and security provisions or privacy laws, as well as liability and penalties in connection with any violation of applicable privacy laws and/or criminal prosecution. Unauthorized disclosure of sensitive or confidential client or employee data, whether through breach of computer

Table of Contents

systems, systems failure, employee negligence, fraud or misappropriation, or otherwise, could damage our reputation and cause us to lose clients. Similarly, unauthorized access to or through our information systems and networks or those we develop or manage for our clients, whether by our employees or third parties, could result in negative publicity, legal liability and damage to our reputation.

Although we have general liability insurance coverage, including coverage for errors or omissions, there can be no assurance that our coverage will cover all claims, continue to be available on reasonable terms or will be sufficient in amount to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. The successful assertion of one or more large claims against us that exceed or are not covered by our insurance coverage or changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could have a material adverse effect on our business, results of operations and financial condition.

Our business could be negatively affected if we incur legal liability, including with respect to our contractual obligations, in connection with providing our solutions and services.

If we fail to meet our contractual obligations or otherwise breach obligations to our clients, we could be subject to legal liability. We may enter into non-standard agreements because we perceive an important economic opportunity by doing so or because our personnel did not adequately adhere to our guidelines. In addition, the contracting practices of our competitors may cause contract terms and conditions that are unfavorable to us to become standard in the marketplace. If we cannot or do not perform our obligations, we could face legal liability and our contracts might not always protect us adequately through limitations on the scope and/or amount of our potential liability. If we cannot, or do not, meet our contractual obligations to provide solutions and services, and if our exposure is not adequately limited through the enforceable terms of our agreements, we might face significant legal liability and our business could be adversely affected.

In the normal course of business and in conjunction with certain client engagements, we have entered into contractual arrangements through which we may be obligated to indemnify clients or other parties with whom we conduct business with respect to certain matters. These arrangements can include provisions whereby we agree to hold the indemnified party and certain of their affiliated entities harmless with respect to third-party claims related to such matters as our breach of certain representations or covenants, or out of our intellectual property infringement, our gross negligence or willful misconduct or certain other claims made against certain parties. Payments by us under any of these arrangements are generally conditioned on the client making a claim and providing us with full control over the defense and settlement of such claim. It is not possible to determine the maximum potential amount under these indemnification agreements due to the unique facts and circumstances involved in each particular agreement. Historically, we have not made payments under these indemnification agreements so they have not had any impact on our operating results, financial position, or cash flows. However, if events arise requiring us to make payment for indemnification claims under our indemnification obligations in contracts we have entered, such payments could have a material impact on our operating results, financial position, and cash flows.

We could incur liability or our reputation could be damaged if our provision of services and solutions to our clients contributes to our clients' internal control deficiencies.

Our clients may perform audits or require us to perform audits and provide audit reports with respect to the controls and procedures that we use in the performance of services for such clients, especially when we process data belonging to them. Our ability to acquire new clients and retain existing clients may be adversely affected and our reputation could be harmed if we receive a qualified opinion, or if we cannot obtain an unqualified opinion, with respect to our controls and procedures in connection with any such audit in a timely manner. Additionally, we could incur liability if our controls and procedures, or the controls and procedures we manage for a client, were to result in internal controls failures or impair our client's ability to comply with its own internal control requirements.

Table of Contents

We may not be able to enforce or protect our intellectual property rights, which may harm our ability to compete and harm our business.

Our future success will depend, in part, on our ability to protect our proprietary methodologies and other valuable intellectual property. We presently hold no issued patents. However, we have filed patent applications and we intend to file additional patent applications. There is no guarantee that any patents will issue in the United States or in any other country we may seek protection or that they will serve as a barrier from competition from other organizations. Additionally, the protection afforded by international patent laws as well as the enforcement actions differ from country to country. There is no guarantee that we will be able to maintain adequate protection or enforcement of our intellectual property rights.

We also rely upon a combination of copyright and trade secret laws, non-disclosure and related contractual arrangements, and other security measures to protect our intellectual property rights. Existing laws of some countries in which we provide services or solutions, such as China, might offer only limited protection of our intellectual property rights. India is a member of the Berne Convention, and has agreed to recognize protections on copyrights conferred under the laws of foreign countries, including the laws of the United States. We believe that laws, rules, regulations and treaties in effect in the United States, India and other countries in which we operate are adequate to protect us from misappropriation or unauthorized use of our intellectual property. However, there can be no assurance that these laws will not change in ways that may prevent or restrict the transfer of software components, libraries and toolsets and other technology or data we use in the performance of our services among the countries in which we operate and provide services. There can be no assurance that the steps we have taken to protect our intellectual property rights will be adequate to deter misappropriation of any of our intellectual property, or that we will be able to detect unauthorized use and take appropriate steps to enforce our rights. Enforcing our rights might also require considerable time, money and oversight.

Unauthorized use of our intellectual property may result in development of technology, products or services that compete with our products and services and unauthorized parties may infringe upon or misappropriate our products, services or proprietary information. If we are unable to protect our intellectual property, our business may be adversely affected and our ability to compete may be impaired.

Depending on the circumstances, we might need to grant a specific client greater rights in intellectual property developed or used in connection with a contract than we normally do. In certain situations, we might forego all rights to the use of intellectual property we create and intend to reuse across multiple client engagements, which would limit our ability to reuse that intellectual property for other clients. Any limitation on our ability to provide a service or solution could cause us to lose revenue-generating opportunities and require us to incur additional expenses to develop new or modified solutions for future projects.

Our ability to enforce our software license agreements, service agreements, and other intellectual property rights is subject to general litigation risks, as well as uncertainty as to the enforceability of our intellectual property rights in various countries. To the extent that we seek to enforce our rights, we could be subject to claims that an intellectual property right is invalid, otherwise not enforceable, or is licensed to the party against whom we are pursuing a claim. In addition, our assertion of intellectual property rights may result in the other party seeking to assert alleged intellectual property rights or assert other claims against us, which could harm our business. If we are not successful in defending such claims in litigation, we may not be able to sell or license a particular service or solution due to an injunction, or we may have to pay damages that could, in turn, harm our results of operations. In addition, governments may adopt regulations, or courts may render decisions, requiring compulsory licensing of intellectual property to others, or governments may require that products meet specified standards that serve to favor local companies. Our inability to enforce our intellectual property rights under these circumstances may harm our competitive position and our business.

Table of Contents

Our services or solutions could infringe upon the intellectual property rights of others and we may be subject to claims of infringement of third-party intellectual property rights.

We cannot be sure that our services and solutions, or the solutions of others that we offer to our clients, do not infringe on the intellectual property rights of others. Third parties may assert against us or our customers claims alleging infringement of patent, copyright, trademark, or other intellectual property rights to technologies or services that are important to our business. Infringement claims could harm our reputation, cost us money and prevent us from offering some services or solutions. In our contracts, we generally agree to indemnify our clients for certain expenses or liabilities resulting from potential infringement of the intellectual property rights of third parties. In some instances, the amount of our liability under these indemnities could be substantial. Any claims that our products, services or processes infringe the intellectual property rights of others, regardless of the merit or resolution of such claims, may result in significant costs in defending and resolving such claims, and may divert the efforts and attention of our management and technical personnel from our business. In addition, as a result of such intellectual property infringement claims, we could be required or otherwise decide that it is appropriate to:

pay third-party infringement claims;

discontinue using, licensing, or selling particular products subject to infringement claims;

discontinue using the technology or processes subject to infringement claims;

develop other technology not subject to infringement claims, which could be costly or may not be possible; and/or

license technology from the third party claiming infringement, which license may not be available on commercially reasonable terms.

The occurrence of any of the foregoing could result in unexpected expenses or require us to recognize an impairment of our assets, which would reduce the value of our assets and increase expenses. In addition, if we alter or discontinue our offering of affected items or services, our revenue could be affected. If a claim of infringement were successful against us or our clients, an injunction might be ordered against our client or our own services or operations, causing further damages.

We expect that the risk of infringement claims against us will increase if our competitors are able to obtain patents or other intellectual property rights for software products and methods, technological solutions, and processes. We may be subject to intellectual property infringement claims from certain individuals or companies who have acquired patent portfolios for the primary purpose of asserting such claims against other companies. The risk of infringement claims against us may also increase as we continue to develop and license our intellectual property to our clients and other third parties. Any infringement claim or litigation against us could have a material adverse effect on our business, results of operations and financial condition.

We might lose our ability to utilize the intellectual property of others, which could harm our business.

We could lose our ability, or be unable to secure the right, to utilize the intellectual property of others. Third-party suppliers of software, hardware or other intellectual property assets could be unwilling to permit us to use their intellectual property and this could impede or disrupt use of their products or services by us and our clients. If our ability to provide services and solutions to our clients is impaired as a result of any such denial, our operating results could be adversely affected.

We may not be able to successfully acquire target companies or integrate acquired companies or technologies into our company, and we may become subject to certain liabilities assumed or incurred in connection with our acquisitions that could harm our operating results.

If we are unable to complete the number and kind of acquisitions for which we plan, or if we are inefficient or unsuccessful at integrating any acquired businesses into our operations, we may not be able to achieve our

Table of Contents

planned rates of growth or improve our market share, profitability or competitive position in specific markets or services. We expect to continue pursuing strategic acquisition and joint venture opportunities designed to enhance our capabilities, expand our capacity and geographic presence and/or enter new technology areas. We cannot predict or guarantee that we will successfully identify suitable acquisition candidates or consummate any acquisition or joint venture. We may need to divert and/or dedicate management and other resources to complete the transactions. Once we have consummated an acquisition transaction or entered into a joint venture transaction, we may not be able to integrate the acquired business or joint venture (and personnel) into our operations, recognize anticipated efficiencies and/or benefits, realize our strategic objectives or achieve the desired financial and operating results, in each case, both generally and as a result of our unique organizational structure. Acquisitions and joint ventures involve a number of special risks, including diversion of management's attention, failure to retain key personnel and the potential assumption or incurrence of liabilities and/or obligations.

Although we conduct due diligence in connection with each of our acquisitions, there may be liabilities that we fail to discover, that we inadequately assess in our due diligence efforts or that are not properly disclosed to us. In particular, to the extent that any acquired business (or any properties thereof) (i) failed to comply with or otherwise violated applicable laws or regulations, (ii) failed to fulfill contractual obligations to customers or (iii) incurred material liabilities or obligations to customers that are not identified during the diligence process, we, as the successor owner, may be financially responsible for these violations, failures and liabilities and may suffer financial and/or reputational harm or otherwise be adversely affected. In addition, as part of an acquisition, we may assume responsibilities and obligations of the acquired business pursuant to the terms and conditions of services agreements entered by the acquired entity that are not consistent with the terms and conditions that we typically accept and require. Although we attempt to structure acquisitions in such a manner as to minimize our exposure to, among other things, the factors and conditions contemplated by the foregoing two sentences (including through indemnification protection), we cannot predict or guarantee that our efforts will be effective or will protect us from liability. The discovery of any material liabilities associated with our acquisitions for which we are unable to recover indemnification amounts could harm our operating results.

System failure or disruptions in communications could disrupt our business and result in lost customers and curtailed operations which would reduce our revenue and profitability.

To deliver our services to our customers, we must maintain a high speed network of satellite, fiber optic and land lines and active voice and data communications twenty-four hours a day between our main operating offices in Chennai, our other development and delivery centers and the offices of our customers worldwide. Although we maintain redundancy facilities and satellite communications links, any systems failure or a significant lapse in our ability to transmit voice and data through satellite and telephone communications could result in lost customers and curtailed operations which would reduce our revenue and profitability.

Consolidation in the industries that we serve could adversely affect our business.

Companies in the industries that we serve may seek to achieve economies of scale and other synergies by combining with or acquiring other companies. If two or more of our current clients merge or consolidate and combine their operations, it may decrease the amount of work that we perform for these clients. If one of our current clients merges or consolidates with a company that relies on another provider for its consulting, systems integration and technology, or outsourcing services, we may lose work from that client or lose the opportunity to gain additional work. The increased market power of larger companies could also increase pricing and competitive pressures on us. Any of these possible results of industry consolidation could adversely affect our business.

Our ability to attract and retain business may depend on our reputation in the marketplace.

Our services are marketed to clients and prospective clients based on a number of factors. Since many of our specific client engagements involve unique services and solutions, our corporate reputation is a significant factor

Table of Contents

in our clients' evaluation of whether to engage our services. We believe the Cognizant brand name and our reputation are important corporate assets that help distinguish our services from those of our competitors and also contribute to our efforts to recruit and retain talented employees. However, our corporate reputation is potentially susceptible to damage by actions or statements made by current or former clients, competitors, vendors, adversaries in legal proceedings, government regulators, former and current employees and personnel as well as members of the investment community and the media. There is a risk that negative information about our company, even if based on false rumor or misunderstanding, could adversely affect our business. In particular, damage to our reputation could be difficult and time-consuming to repair, could make potential or existing clients reluctant to select us for new engagements, resulting in a loss of business, and could adversely affect our recruitment and retention efforts. Damage to our reputation could also reduce the value and effectiveness of the Cognizant brand name and could reduce investor confidence in us, adversely affecting our share price.

Provisions in our charter and by-laws and provisions under Delaware law may discourage unsolicited takeover proposals.

Provisions in our charter and by-laws, each as amended, and Delaware General Corporate Law, or DGCL, may have the effect of deterring unsolicited takeover proposals or delaying or preventing changes in our control or management, including transactions in which stockholders might otherwise receive a premium for their shares over then-current market prices. In addition, these documents and provisions may limit the ability of stockholders to approve transactions that they may deem to be in their best interests. Our board of directors has the authority, without further action by the stockholders, to fix the rights and preferences, and issue shares of preferred stock. Our charter provides for a classified board of directors until the 2016 annual meeting of stockholders, at which point the board of directors will be declassified and each director will be elected on an annual basis. While our board of directors remains classified, a change of control of our board of directors cannot occur at a single meeting of stockholders. The prohibition of our stockholders' ability to act by written consent and the restrictions imposed on our stockholders' ability to call a special meeting may have the effect of delaying stockholder actions until annual meetings or until a special meeting is called by our chairman or chief executive officer or our board of directors. The supermajority-voting requirement for specified amendments to our charter and by-laws allows a minority of our stockholders to block those amendments. The DGCL also contains provisions preventing stockholders from engaging in business combinations with us, subject to certain exceptions. These provisions could also discourage bids for our common stock at a premium as well as create a depressive effect on the market price of the shares of our common stock.

New and changing corporate governance and public disclosure requirements add uncertainty to our compliance policies and increase our costs of compliance.

Changing laws, regulations and standards relating to accounting, corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002, other SEC regulations, and the NASDAQ Global Select Market rules, are creating uncertainty for companies like ours. These laws, regulations and standards may lack specificity and are subject to varying interpretations. Their application in practice may evolve over time, as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs of compliance as a result of ongoing revisions to such corporate governance standards.

In particular, our efforts to comply with Section 404 of the Sarbanes-Oxley Act of 2002 and the related regulations regarding our required assessment of our internal controls over financial reporting and our external auditors' audit of that assessment requires the commitment of significant financial and managerial resources. We consistently assess the adequacy of our internal controls over financial reporting, remediate any control deficiencies that may be identified, and validate through testing that our controls are functioning as documented. While we do not anticipate any material weaknesses, the inability of management and our independent auditor to provide us with an unqualified report as to the adequacy and effectiveness, respectively, of our internal controls over financial reporting for future year ends could result in adverse consequences to us, including, but not limited to, a loss of investor confidence in the reliability of our financial statements, which could cause the market price of our stock to decline.

Table of Contents

We are committed to maintaining high standards of corporate governance and public disclosure, and our efforts to comply with evolving laws, regulations and standards in this regard have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities. In addition, the laws, regulations and standards regarding corporate governance may make it more difficult for us to obtain director and officer liability insurance. Further, our board members, chief executive officer and chief financial officer could face an increased risk of personal liability in connection with their performance of duties. As a result, we may face difficulties attracting and retaining qualified board members and executive officers, which could harm our business. If we fail to comply with new or changed laws, regulations or standards of corporate governance, our business and reputation may be harmed.

Our share price could be adversely affected if we are unable to maintain effective internal controls.

The accuracy of our financial reporting is dependent on the effectiveness of our internal controls. We are required to provide a report from management to our stockholders on our internal control over financial reporting that includes an assessment of the effectiveness of these controls. Internal control over financial reporting has inherent limitations, including human error, the possibility that controls could be circumvented or become inadequate because of changed conditions, and fraud. Because of these inherent limitations, internal control over financial reporting might not prevent or detect all misstatements or fraud. If we cannot maintain and execute adequate internal control over financial reporting or implement required new or improved controls to ensure the reliability of the financial reporting and preparation of our financial statements for external use, we could suffer harm to our reputation, fail to meet our public reporting requirements on a timely basis, or be unable to properly report on our business and the results of our operations, and the market price of our securities could be materially adversely affected.

We are exposed to credit risk and fluctuations in the market values of our investment portfolio.

Recent turmoil in the financial markets has adversely affected economic activity in the United States, Europe and other regions of the world in which we do business. We believe that based on our current cash, cash equivalents and investment balances and expected operating cash flows, the current lack of liquidity in the credit markets will not have a material impact on our liquidity, cash flow or financial flexibility. Continued deterioration of the credit and capital markets could result in volatility of our investment earnings and impairments to our investment portfolio, which could negatively impact our financial condition and reported income. The continued decline in economic activity could adversely affect the ability of counterparties to certain financial instruments such as marketable securities and derivatives to meet their obligations to us.

Our stock price continues to be volatile.

Our stock has at times experienced substantial price volatility as a result of variations between our actual and anticipated financial results, announcements by us and our competitors, projections or speculation about our business or that of our competitors by the media or investment analysts or uncertainty about current global economic conditions. The stock market, as a whole, also has experienced extreme price and volume fluctuations that have affected the market price of many technology companies in ways that may have been unrelated to these companies operating performance. Furthermore, we believe our stock price should reflect future growth and profitability expectations and, if we fail to meet these expectations, our stock price may significantly decline.

None.

Table of Contents**Item 2. Properties**

To support our planned growth, we are continually expanding our development and delivery center capacity through the construction of new facilities, supplemented by additional leasing of non-owned facilities. As presented in the table below, as of December 31, 2013, the company leased 10,980,135 square feet and owned 9,154,042 square feet in 14 countries, which are used to deliver services to our customers across all four of our business segments.

Geographic Area	Number of Locations	Square Footage Leased	Square Footage Owned	Total Square Footage
India	40	9,837,342	9,002,894	18,840,236
North America	15	579,031	151,148	730,179
Europe	8	109,787		109,787
Rest of World ¹	13	453,975		453,975
Total	76	10,980,135	9,154,042	20,134,177

¹ Includes our operations in Asia Pacific, Middle East and Latin America. Substantially all of this square footage is located in the Philippines, China and Argentina.

We operate out of our Teaneck, New Jersey executive office where we lease 96,107 square feet. In addition to our executive office and the above development and delivery centers, we have business development offices in approximately 52 cities in 29 countries across the globe.

We believe that our current facilities are adequate to support our existing operations. We also believe that we will be able to obtain suitable additional facilities on commercially reasonable terms on an as needed basis.

Item 3. Legal Proceedings

We are involved in various claims and legal actions arising in the ordinary course of business. In the opinion of our management, the outcome of such claims and legal actions, if decided adversely, is not expected to have a material adverse effect on our quarterly or annual operating results, cash flows or consolidated financial position.

Item 4. Mine Safety Disclosures

Not applicable.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our Class A common stock trades on the NASDAQ Global Select Market (NASDAQ) under the symbol CTSH.

The following table shows the per share range of high and low sale prices for shares of our Class A common stock, as listed for quotation on the NASDAQ, for the quarterly periods indicated.

Quarter Ended	High	Low
March 31, 2012	\$ 78.00	\$ 64.92
June 30, 2012	\$ 77.85	\$ 55.25
September 30, 2012	\$ 71.45	\$ 53.92
December 31, 2012	\$ 74.87	\$ 64.20
March 31, 2013	\$ 81.08	\$ 74.03
June 30, 2013	\$ 77.89	\$ 60.92
September 30, 2013	\$ 84.17	\$ 63.14
December 31, 2013	\$ 101.13	\$ 81.24

As of December 31, 2013, the approximate number of holders of record of our Class A common stock was 159 and the approximate number of beneficial holders of our Class A common stock was 41,000.

Cash Dividends

We have never declared or paid cash dividends on our Class A common stock. We currently intend to retain any future earnings to finance the growth of our business and, therefore, do not currently anticipate paying any cash dividends in the foreseeable future.

Stock Split

On February 4, 2014, our Board of Directors declared a two-for-one stock split of the company's Class A common stock in the form of a 100% stock dividend. The record date for the two-for-one stock split is the close of business on February 21, 2014, and share distribution will occur on or about March 7, 2014. As a result of the stock split, stockholders will receive one additional share of Class A common stock, par value \$0.01, for each share they hold as of the record date.

Issuer Purchases of Equity Securities

In May 2013, our Board of Directors approved an expansion of our stock repurchase program, increasing the company's stock repurchase authorization under the program from \$1.0 billion to \$1.5 billion and extending the term of the stock repurchase program from December 31, 2013 to December 31, 2014.

We did not repurchase any shares of our Class A common stock under our stock repurchase program during the three months ended December 31, 2013. The remaining authorized balance under our stock repurchase program as of December 31, 2013 was \$502.1 million.

Table of Contents***Performance Graph***

The following graph compares the cumulative total stockholder return on our Class A common stock with the cumulative total return on the S&P 500 Index, NASDAQ-100 Index and a Peer Group Index (capitalization weighted) for the period beginning December 31, 2008 and ending on the last day of our last completed fiscal year. The stock performance shown on the graph below is not indicative of future price performance.

Table of Contents

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Executive Summary

We are a leading provider of IT, consulting and business process services, dedicated to helping the world's leading companies build stronger businesses. Our clients engage us to help them build more efficient operations, provide solutions to critical business and technology problems, and to help them drive technology-based innovation and growth. Our core competencies include: Business, Process, Operations and IT Consulting, Application Development and Systems Integration, EIM, Application Testing, Application Maintenance, IT IS, and BPS. We tailor our services to specific industries and utilize an integrated global delivery model. This seamless global sourcing model combines client service teams based on-site at the client locations with delivery teams located at dedicated near-shore and offshore global delivery centers.

In 2013, our revenue increased to \$8,843.2 million compared to \$7,346.5 million in 2012. Net income increased to \$1,228.6 million or \$4.03 per diluted share, compared to net income of \$1,051.3 million or \$3.44 per diluted share. On a non-GAAP basis our 2013 diluted earnings per share increased to \$4.38¹ compared to \$3.74¹ during 2012.

The key drivers of our revenue growth in 2013 were as follows:

Strong performance across all of our business segments, particularly our Manufacturing/Retail/Logistics and Financial Services business segments, which reported revenue growth of 24.7% and 22.5%, respectively, as compared to 2012;

Continued penetration of the European and Rest of World (primarily the Asia Pacific) markets where we experienced revenue growth of 32.1% and 28.3%, respectively, as compared to 2012;

Sustained strength in the North American market where revenues grew 17.5%, as compared to 2012;

Increased customer spending on discretionary projects;

Expansion of our service offerings, including Consulting, IT IS, and BPS services, which enabled us to cross-sell new services to our customers and meet the rapidly growing demand for complex large-scale outsourcing solutions;

Increased penetration at existing customers, including strategic clients; and

Continued expansion of the market for global delivery of IT services and BPS.

We saw a continued demand from our customers for a broad range of services, including IT strategy and business consulting, application development and systems integration, EIM, application testing, application maintenance, IT IS, and BPS. In addition, we are seeing an increased customer interest in our social, mobile, analytics and cloud-based services. We finished the year with approximately 1,197 active clients, compared to approximately 821 active clients as of December 31, 2012, and increased the number of strategic clients by 29 during the year, bringing the total number of our strategic clients to 243. We define a strategic client as one offering the potential to generate at least \$5 million to \$50 million or more in annual revenues at maturity.

Our revenue growth is also attributed to increasing market acceptance of, and strong demand for, offshore IT software and services and BPS. NASSCOM (India's National Association of Software and Service Companies) reports indicate that export revenues from India's IT software and services and BPS sectors are expected to grow approximately 12% to 14% for NASSCOM's fiscal year ending March 31, 2014. For the fiscal year ended March 31, 2013, the industry recorded export revenue growth of 10.2%, which was at the lower end of NASSCOM's growth projection.

- ¹ Non-GAAP diluted earnings per share and non-GAAP operating margin are not measurements of financial performance prepared in accordance with GAAP. See Non-GAAP Financial Measures for more information and a reconciliation to the most directly comparable GAAP financial measures.

Table of Contents

In 2013, our operating margin increased to approximately 19.0% compared to 18.5% in 2012. Our non-GAAP operating margin in 2013 was approximately 20.6%¹ compared to 20.2%¹ in 2012. The increase in our GAAP and non-GAAP operating margins was due to revenue growth outpacing headcount growth and the impact of the depreciation of the Indian rupee against the U.S. dollar, net of losses on our cash flow hedges, partially offset by increases in compensation and benefit costs, including incentive-based compensation. Historically, we have invested our profitability above the 19% to 20% non-GAAP operating margin level back into our business, which we believe is a significant contributing factor to our strong revenue growth. This investment is primarily focused in the areas of hiring client partners and relationship personnel with specific industry experience or domain expertise, training our technical staff in a broader range of service offerings, strengthening our business analytics capabilities, strengthening and expanding our portfolio of services, continuing to expand our geographic presence for both sales and delivery as well as recognizing and rewarding exceptional performance by our employees. In addition, this investment includes maintaining a level of resources, trained in a broad range of service offerings, to be well positioned to respond to our customer requests to take on additional projects. We expect to continue to invest amounts in excess of our targeted operating margin levels back into the business.

We finished the year with approximately 171,400 employees, which is an increase of approximately 14,700 over the prior year. The increase in the number of our technical personnel and the related infrastructure costs to meet the demand for our services is the primary driver of the increase in our operating expenses in 2013. Annualized turnover, including both voluntary and involuntary, was approximately 14.5% for the three months ended December 31, 2013. The majority of our turnover occurs in India. As a result, annualized attrition rates on-site at clients are below our global attrition rate. In addition, attrition is weighted towards the more junior members of our staff. We have experienced increases in compensation and benefit costs, including incentive-based compensation costs, in India which may continue in the future; however, historically, this has not had a material impact on our results of operations as we have been able to absorb such cost increases through price increases or cost management strategies such as managing discretionary costs, the mix of our professional staff as well as utilization levels, and achieving other operating efficiencies.

At December 31, 2013, we had cash, cash equivalents and short-term investments of \$3,747.5 million and working capital of \$4,373.4 million. Accordingly, we do not anticipate any near-term liquidity issues.

During 2014, barring any unforeseen events, we expect the following factors to affect our business and our operating results:

Continued focus by customers on directing IT spending towards cost containment projects, such as application maintenance, IT IS and BPS;

Demand from our customers to help them achieve their dual mandate of simultaneously achieving cost savings while investing in innovation;

Secular changes driven by evolving technologies and regulatory changes;

Volatility in foreign currency rates; and

Continued uncertainty in the world economy.

In response to this macroeconomic environment, we plan to:

Continue to invest in our talent base and new service offerings;

Partner with our existing customers to garner an increased portion of our customers' overall IT spend by providing innovative solutions;

Edgar Filing: COGNIZANT TECHNOLOGY SOLUTIONS CORP - Form 10-K

Continue our focus on growing our business in Europe, the Middle East, the Asia Pacific and Latin America regions, where we believe there are opportunities to gain market share;

Continue to increase our strategic customer base across all of our business segments;

Table of Contents

Opportunistically look for acquisitions that may improve our overall service delivery capabilities, expand our geographic presence and/or enable us to enter new areas of technology;

Continue to focus on operating discipline in order to appropriately manage our cost structure; and

Continue to locate most of our new development center facilities in tax incentivized areas.

Business Segments

Our four reportable business segments are:

Financial Services, which includes customers providing banking/transaction processing, capital markets and insurance services;

Healthcare, which includes healthcare providers and payers as well as life sciences customers;

Manufacturing/Retail/Logistics, which includes consumer goods manufacturers, retailers, travel and other hospitality customers, as well as customers providing logistics services; and

Other, which is an aggregation of industry operating segments each of which, individually, represents less than 10.0% of consolidated revenues and segment operating profit. The Other segment includes information, media and entertainment services, communications, and high technology operating customers.

Our chief operating decision maker evaluates Cognizant's performance and allocates resources based on segment revenues and operating profit. Segment operating profit is defined as income from operations before unallocated costs. Generally, operating expenses for each operating segment have similar characteristics and are subject to the same factors, pressures and challenges. However, the economic environment and its effects on industries served by our operating groups may affect revenue and operating expenses to differing degrees. Expenses included in segment operating profit consist principally of direct selling and delivery costs as well as a per seat charge for use of the development and delivery centers. Certain selling, general and administrative expenses, excess or shortfall of incentive compensation for delivery personnel as compared to target, stock-based compensation expense, a portion of depreciation and amortization and the impact of the settlements of our cash flow hedges are not allocated to individual segments in internal management reports used by the chief operating decision maker. Accordingly, such expenses are excluded from segment operating profit.

We had approximately 1,197 active clients as of December 31, 2013. Accordingly, we provide a significant volume of services to many customers in each of our business segments. Therefore, a loss of a significant customer or a few significant customers in a particular segment could materially reduce revenues for that segment. However, no individual customer accounted for sales in excess of 10% of our consolidated revenues during 2013, 2012 or 2011. In addition, the services we provide to our larger customers are often critical to the operations of such customers and we believe that a termination of our services would require an extended transition period with gradually declining revenues.

Table of Contents**Results of Operations for the Three Years Ended December 31, 2013**

The following table sets forth certain financial data for the three years ended December 31, 2013:

(Dollars in thousands)

	2013	% of Revenues	2012	% of Revenues	2011	% of Revenues	Increase (Decrease)	
							2013	2012
Revenues	\$ 8,843,189	100.0	\$ 7,346,472	100.0	\$ 6,121,156	100.0	\$ 1,496,717	\$ 1,225,316

Non-GAAP diluted earnings per share	\$ 4.38		\$ 3.74		\$ 3.10		\$ 0.64	\$ 0.64

(1) Exclusive of depreciation and amortization expense.

(2) Non-GAAP income from operations, non-GAAP operating margin and non-GAAP diluted earnings per share are not measurements of financial performance prepared in accordance with GAAP. See Non-GAAP Financial Measures for more information and a reconciliation to the most directly comparable GAAP financial measure.

Revenue Overall. Revenue increased by 20.4% to \$8,843.2 million during 2013 as compared to an increase of 20.0% to \$7,346.5 million in 2012. In both years, the increase was primarily attributed to greater acceptance of our global delivery model among an increasing number of industries, continued interest in using our global delivery model as a means to reduce overall IT and operations costs, increased customer spending on discretionary projects, and continued penetration in all our geographic markets. Revenues from new customers contributed \$243.4 million and \$136.5 million, representing 16.3% and 11.1% of the year-over-year revenue growth for 2013 and 2012, respectively. Our acquisitions of the C1 Group companies and Equinox Consulting contributed to new customer revenue growth in 2013. In 2013, our consulting and technology services revenues increased by approximately 18.3% and represented approximately 50.2% of total 2013 revenues, while our outsourcing services revenue increased by approximately 22.6% and constituted approximately 49.8% of total revenues. In 2012, consulting and technology services revenue increased by 20.4% and represented

Table of Contents

approximately 51.1% of total 2012 revenues, while our outsourcing services increased by approximately 19.6% and constituted approximately 48.9% of total 2012 revenues.

We had approximately 1,197 active clients as of December 31, 2013 as compared to approximately 821 and 785 active clients as of December 31, 2012 and 2011, respectively. Revenues from our top five customers as a percentage of total revenues were 13.2%, 14.0% and 16.3% in 2013, 2012 and 2011, respectively. Revenues from our top ten customers as a percentage of total revenues were 22.6%, 25.0% and 27.7% in 2013, 2012 and 2011, respectively. As we continue to add new customers and increase our penetration at existing customers, we expect the percentage of revenues from our top five and top ten customers to decline over time.

Revenue Reportable Segments. Revenues by reportable business segment were as follows:

(Dollars in thousands)

	2013	2012	2011	Increase		2012	
				2013	%	\$	%
Financial services	\$ 3,717,573	\$ 3,035,447	\$ 2,518,422	\$ 682,126	22.5	\$ 517,025	20.5
Healthcare	2,264,826	1,934,898	1,622,157	329,928	17.1	312,741	19.3
Manufacturing/Retail/Logistics	1,868,305	1,498,668	1,197,472	369,637	24.7	301,196	25.2
Other	992,485	877,459	783,105	115,026	13.1	94,354	12.0
Total revenue	\$ 8,843,189	\$ 7,346,472	\$ 6,121,156	\$ 1,496,717	20.4	\$ 1,225,316	20.0

Revenue from our Financial Services segment grew 22.5% or \$682.1 million in 2013, as compared to 2012. This strength was driven by revenue growth of \$494.1 million from our banking customers who benefited from the improving economy. In this segment, revenue from customers added during 2013 was approximately \$75.3 million and represented 11.0% of the year-over-year revenue increase in this segment. During the year, key areas of focus for our Financial Services customers included cost optimization, regulatory and compliance driven initiatives, risk management, and the adoption and integration of SMAC solutions to align with shifts in consumer preferences. Revenue from our Financial Services segment grew 20.5% or \$517.0 million in 2012, as compared to 2011. During 2012, our banking and insurance customers each almost equally contributed to the year-over-year revenue increase. In 2012, revenue from customers added during that year was approximately \$35.5 million and represented 6.9% of the year-over-year revenue increase in this segment.

Revenue from our Healthcare segment grew 17.1% or \$329.9 million in 2013, as compared to 2012. Our healthcare and life sciences customers contributed approximately \$241.5 million and \$88.4 million, respectively, to the year-over-year revenue increase. Revenue from customers added during 2013 was approximately \$30.4 million and represented 9.2% of the year-over-year revenue increase in this segment. Growth within the segment was driven by work related to Affordable Care Act initiatives, including extended support for member enrollment and the implementation of direct to consumer programs through mobile platforms. Revenue from our Healthcare segment grew 19.3% or \$312.7 million in 2012, as compared to 2011. In 2012, growth was driven primarily by our healthcare customers, which contributed \$222.4 million to year-over-year revenue growth. Revenue from customers added during 2012 was approximately \$19.8 million and represented 6.3% of the year-over-year revenue increase in this segment. IT spending by some of our life sciences customers has been and may continue to be adversely impacted by the patent cliff affecting some of our pharmaceutical customers.

Revenue from our Manufacturing/Retail/Logistics segment grew 24.7% or \$369.6 million in 2013, as compared to 2012. During 2013, growth was stronger among our manufacturing and logistics customers, where revenue increased by approximately \$200.0 million as compared to approximately \$169.6 million for our retail and hospitality customers. Revenue from customers added during 2013 was approximately \$79.9 million and represented 21.6% of the year-over-year revenue increase in this segment. Demand within this segment was

Table of Contents

driven by multichannel commerce implementation and integration efforts, supply chain consulting and implementation initiatives, and increased adoption of SMAC solutions. Revenue from our Manufacturing/Retail/Logistics segment grew 25.2% or \$301.2 million in 2012, as compared to 2011. In 2012, growth within this segment was stronger among our retail and hospitality customers, where revenue increased by approximately \$219.0 million, while revenue for our manufacturing and logistics customers increased by approximately \$82.2 million. In 2012, revenue from customers added during that year was approximately \$57.8 million and represented 19.2% of the year-over-year revenue increase in this segment.

Revenue from our Other segment grew 13.1% or \$115.0 million in 2013, as compared to 2012. In 2013, growth within Other was particularly strong among our high technology customers, where revenue increased by approximately \$54.0 million due to an increase in discretionary spending. Revenue from customers added during 2013 was approximately \$57.9 million and represented 50.3% of the year-over-year revenue increase in this segment. Revenue from our Other segment grew 12.0% or \$94.4 million in 2012, as compared to 2011. In 2012, each of our operating segments within Other, including information, media and entertainment services, communications and high technology, grew slower than the company average. In 2012, revenue from customers added during that year was approximately \$23.4 million and represented 24.8% of the year-over-year revenue increase in this segment.

Revenue Geographic Locations. Revenues by geographic location were as follows:

(Dollars in thousands)

					Increase		
	2013	2012	2011	2013		2012	
				\$	%	\$	%
North America	\$ 6,860,067	\$ 5,836,258	\$ 4,802,958	\$ 1,023,809	17.5	\$ 1,033,300	21.5
United Kingdom	942,579	764,936	698,853	177,643	23.2	66,083	9.5
Rest of Europe	636,626	430,554	398,622	206,072	47.9	31,932	8.0
Europe Total	1,579,205	1,195,490	1,097,475	383,715	32.1	98,015	8.9
Rest of World	403,917	314,724	220,723	89,193	28.3	94,001	42.6
Total Revenue	\$ 8,843,189	\$ 7,346,472	\$ 6,121,156	\$ 1,496,717	20.4	\$ 1,225,316	20.0

North America continues to be our largest market representing approximately 77.6% of total revenue in 2013 and accounted for \$1,023.8 million of the \$1,496.7 million revenue increase in 2013. Revenue from Europe grew 32.1% in 2013. Excluding approximately \$93.5 million of revenue from our 2013 acquisitions of the C1 Group companies and Equinox Consulting, revenue from Europe grew 24.3%. The strong revenue growth in Europe was driven by Europe's economic recovery and the increasing acceptance of our global delivery model. Conversely, in 2012, revenue in Europe grew 8.9% year-over-year and was negatively impacted by the economic downturn in Europe during 2012. We believe the European market is under-penetrated and represents a significant future growth opportunity for us. The acquisitions of the C1 Group companies and Equinox Consulting significantly strengthen our local presence in Germany and France. Revenue growth from Rest of World customers in 2013 was primarily driven by the Middle East, Singapore and India markets and, in 2012, the revenue growth for Rest of World was driven primarily by the Singapore market. We believe that Europe, the Middle East, the Asia Pacific and Latin America regions will continue to be areas of significant investment for us as we see these regions as growth opportunities for the long term.

Cost of Revenues (Exclusive of Depreciation and Amortization Expense). Our cost of revenues consists primarily of salaries, incentive-based compensation, stock-based compensation expense, payroll taxes, employee benefits, immigration and project-related travel for technical personnel, subcontracting and sales commissions related to revenues. Our cost of revenues increased by 23.1% or \$987.2 million during 2013 as compared to an increase of approximately 20.9% or \$739.6 million during 2012. In both 2013 and 2012, the increase was due

Table of Contents

primarily to an increase in compensation and benefits costs, including incentive-based compensation. In 2013, compensation and benefit costs, including incentive-based compensation, increased by approximately \$870.2 million as a result of the increase in the number of our technical personnel and higher accrual of individual bonus payouts. In 2012, the increase in compensation and benefit costs, including incentive based compensation, was approximately \$660.3 million and was due primarily to the increase in the number of our technical personnel, partially offset by the favorable impact of the depreciation of the Indian rupee versus the U.S. dollar, net of the impact of our cash flow hedge losses.

Selling, General and Administrative Expenses. Selling, general and administrative expenses consist primarily of salaries, incentive-based compensation, stock-based compensation expense, payroll taxes, employee benefits, immigration, travel, promotion, communications, management, finance, administrative and occupancy costs. Selling, general and administrative expenses, including depreciation and amortization, increased by 11.3%, or \$193.1 million during 2013 as compared to an increase of approximately 18.0% or \$260.7 million during 2012. Selling, general and administrative expenses, including depreciation and amortization, decreased as a percentage of revenue to 21.5% in 2013 as compared to 23.2% in 2012 and 23.6% in 2011. In both 2013 and 2012, the decrease as a percentage of revenue was due primarily to economies of scale that allowed us to leverage our cost structure over a larger organization and the favorable impact of the depreciation of the Indian rupee versus the U.S. dollar, net of losses on our cash flow hedges.

Income from Operations and Operating Margin Overall. Income from operations increased 23.2%, or approximately \$316.4 million in 2013 as compared to an increase of 19.8% or approximately \$225.0 million during 2012. Our operating margin increased to 19.0% of revenues in 2013 from 18.5% of revenues in 2012, due to revenue growth outpacing headcount growth and the impact of the depreciation of the Indian rupee against the U.S. dollar, net of losses on our cash flow hedges, partially offset by increases in compensation and benefit costs, including incentive-based compensation costs. In 2012, operating margin decreased slightly to 18.5% of revenues in 2012 from 18.6% of revenues in 2011, due to continued investments to grow our business partially offset by the favorable impact of the depreciation of the Indian rupee against the U.S. dollar, net of losses on our cash flow hedges, and economies of scale that allowed us to leverage our cost structure over a larger organization. Excluding the impact of applicable designated cash flow hedges, the depreciation of the Indian rupee against the U.S. dollar positively impacted our operating margin by approximately 209 basis points or 2.09 percentage points in 2013 and 355 basis points or 3.55 percentage points in 2012. Each additional 1.0% change in exchange rate between the Indian rupee and the U.S. dollar will have the effect of moving our operating margin by approximately 22 basis points or 0.22 percentage points.

For the years ended December 31, 2013, 2012, and 2011, our non-GAAP operating margins were 20.6%², 20.2%², and 20.3%², respectively. As set forth in the *Non-GAAP Financial Measures* section below, our non-GAAP operating margin excludes stock based compensation expense and acquisition-related charges.

We entered into foreign exchange forward contracts to hedge certain Indian rupee denominated payments in India. These hedges are intended to mitigate the volatility of the changes in the exchange rate between the U.S. dollar and the Indian rupee. During the years ended December 31, 2013 and 2012, the settlement of certain cash flow hedges negatively impacted our operating margin by approximately 184 basis points or 1.84 percentage points and 131 basis points or 1.31 percentage points, respectively. During 2011, the settlement of certain cash flow hedges favorably impacted our operating margin by approximately 31 basis points or 0.31 percentage points.

² Non-GAAP operating margin is not a measurement of financial performance prepared in accordance with GAAP. See *Non-GAAP Financial Measures* for more information and a reconciliation to the most directly comparable GAAP financial measure.

Table of Contents

Segment Operating Profit. Segment operating profits were as follows:

(Dollars in thousands)

					Increase		
	2013	2012	2011	2013		2012	
				\$	%	\$	%
Financial Services	\$ 1,212,099	\$ 998,339	\$ 872,267	\$ 213,760	21.4	\$ 126,072	14.5
Healthcare	829,916	724,454	625,052	105,462	14.6	99,402	15.9
Manufacturing/Retail/Logistics	630,250	527,970	440,416	102,280	19.4	87,554	19.9
Other	318,357	288,052	254,145	30,305	10.5	33,907	13.3
Total segment operating profit	2,990,622	2,538,815	2,191,880	451,807	17.8	346,935	15.8
Less: unallocated costs ⁽¹⁾	1,312,712	1,177,319	1,055,412	135,393	11.5	121,907	11.6
Income from operations	\$ 1,677,910	\$ 1,361,496	\$ 1,136,468	\$ 316,414	23.2	\$ 225,028	19.8

(1) Includes \$118,800, \$107,355 and \$90,232 of stock-based compensation expense for the years ended 2013, 2012 and 2011, respectively. The increase in segment operating profit within all reportable segments during 2013 and 2012 was attributable primarily to increased revenues and the favorable impact of the depreciation of the Indian rupee versus the U.S. dollar, partially offset by an increase in compensation and benefit costs resulting primarily from additional headcount to support our revenue growth and continued investment in sales and marketing.

Other Income (Expense), Net. Total other income (expense), net consists primarily of foreign currency exchange gains and (losses) and interest income. The following table sets forth, for the periods indicated, Total other income (expense), net:

(Dollars in thousands)

					Increase (Decrease)	
	2013	2012	2011	2013	2012	
Foreign currency exchange (losses)	\$ (55,214)	\$ (11,745)	\$ (32,400)	\$ (43,469)	\$ 20,655	
Gains (losses) on foreign exchange forward contracts not designated as hedging instruments	14,084	(8,270)	23,621	22,354	(31,891)	
Net foreign currency exchange (losses)	(41,130)	(20,015)	(8,779)	(21,115)	(11,236)	
Interest income	48,896	44,514	39,249	4,382	5,265	
Other, net	2,241	1,601	2,211	640	(610)	
Total other income (expense), net	\$ 10,007	\$ 26,100	\$ 32,681	\$ (16,093)	\$ (6,581)	

The foreign currency exchange losses in all the years presented were primarily attributed to the remeasurement of the Indian rupee denominated net monetary assets on the books of our India subsidiaries to the U.S. dollar functional currency. The gains (losses) on foreign exchange forward contracts not designated as hedging instruments relate to the realized and unrealized gains on foreign exchange forward contracts entered into primarily to offset foreign currency exposure to Indian rupee denominated net monetary assets. As of December 31, 2013, the notional value of our undesignated hedges was \$279.3 million. The increase in interest income in 2013 and 2012 was primarily attributed to the increase in average invested balances partially offset by the depreciation of the Indian rupee against the U.S. dollar.

Table of Contents

Provision for Income Taxes. The provision for income taxes was \$459.3 million in 2013, \$336.3 million in 2012 and \$285.5 million in 2011. The effective income tax rate increased to 27.2% in 2013 from 24.2% in 2012 due primarily to a shift in the geographic mix of our current year earnings towards countries with higher statutory rates, an increase in the India statutory rate effective April 1, 2013, and a scheduled reduction of certain income tax holiday benefits in India in 2013. The effective income tax rate decreased slightly to 24.2% in 2012 from 24.4% in 2011, due primarily to favorable discrete items in 2012 partially offset by the scheduled reduction of certain income tax holiday benefits in India in 2012.

Net Income. Net income increased to approximately \$1,228.6 million in 2013 from approximately \$1,051.3 million in 2012 and approximately \$883.6 million in 2011. Net income as a percentage of revenues decreased to 13.9% in 2013 from 14.3% in 2012 and 14.4% in 2011. In 2013, the decrease in net income as a percentage of revenues was a result of the increase in the provision for income taxes and an increase in net foreign currency exchange losses, partially offset by the increase in the operating margin.

Non-GAAP Financial Measures

Portions of our disclosure, including the following table, include non-GAAP income from operations, non-GAAP operating margin, and non-GAAP diluted earnings per share. These non-GAAP financial measures are not based on any comprehensive set of accounting rules or principles and should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and may be different from non-GAAP measures used by other companies. In addition, these non-GAAP measures should be read in conjunction with our financial statements prepared in accordance with GAAP. The reconciliations of Cognizant's non-GAAP financial measures to the corresponding GAAP measures should be carefully evaluated.

Historically, we sought to manage the company to a targeted operating margin, excluding stock-based compensation expense, of 19% to 20% of revenues. Beginning with 2013, we continue to seek to manage the company to the same targeted operating margin, but we now also exclude acquisition-related charges, in addition to excluding stock-based compensation expense, in setting our internal operating targets. We believe providing investors with an operating view consistent with how we manage the company provides enhanced transparency into the operating results of the company. For our internal management reporting and budgeting purposes, we use non-GAAP financial information that does not include stock-based compensation expense and acquisition-related charges for financial and operational decision making, to evaluate period-to-period comparisons and for making comparisons of our operating results to those of our competitors. Therefore, it is our belief that the use of non-GAAP financial measures excluding these costs provides a meaningful measure for investors to evaluate our financial performance. Accordingly, we believe that the presentation of non-GAAP income from operations, non-GAAP operating margin and non-GAAP diluted earnings per share, when read in conjunction with our reported GAAP results, can provide useful supplemental information to our management and investors regarding financial and business trends relating to our financial condition and results of operations.

A limitation of using non-GAAP financial measures versus financial measures calculated in accordance with GAAP is that non-GAAP measures do not reflect all of the amounts associated with our operating results as determined in accordance with GAAP and exclude costs that are recurring, namely stock-based compensation expense and certain acquisition-related charges. In addition, other companies may calculate non-GAAP financial measures differently than us, thereby limiting the usefulness of these non-GAAP financial measures as a comparative tool. We compensate for this limitation by providing specific information regarding the GAAP amounts excluded from non-GAAP income from operations, non-GAAP operating margin and non-GAAP diluted earnings per share to allow investors to evaluate such non-GAAP financial measures with financial measures calculated in accordance with GAAP.

Table of Contents

The following table presents a reconciliation of each non-GAAP financial measure to the most comparable GAAP measure for the years ended December 31:

(Dollars in thousands, except per share amounts)

	2013	% of Revenues	2012	% of Revenues	2011	% of Revenues
GAAP income from operations and operating margin	\$ 1,677,910	19.0	\$ 1,361,496	18.5	\$ 1,136,468	18.6
Add: Stock-based compensation expense	118,800	1.3	107,355	1.5	90,232	1.5
Add: Acquisition-related charges ⁽¹⁾	24,002	0.3	15,871	0.2	13,421	0.2
Non-GAAP income from operations and non-GAAP operating margin	\$ 1,820,712	20.6	\$ 1,484,722	20.2	\$ 1,240,121	20.3
GAAP diluted earnings per share	\$ 4.03		\$ 3.44		\$ 2.85

Non-GAAP diluted earnings per share	\$ 4.38		\$ 3.74		\$ 3.10	

- (1) Acquisition-related charges include, when applicable, amortization of purchased intangible assets included in the depreciation and amortization expense line on our consolidated statements of operations, external deal costs, acquisition-related retention bonuses, integration costs, changes in the fair value of contingent consideration liabilities, charges for impairment of acquired intangible assets and other acquisition-related costs.

Liquidity and Capital Resources

At December 31, 2013, we had cash, cash equivalents and short-term investments of \$3,747.5 million. We have used, and plan to use, such cash for expansion of existing operations, including our offshore development and delivery centers, continued development of new service lines, acquisitions of related businesses, formation of joint ventures, stock repurchases and general corporate purposes, including working capital. As of December 31, 2013, we had no third party debt and had working capital of approximately \$4,373.4 million. Accordingly, we do not anticipate any near-term liquidity issues.

The following table provides a summary of the major cash flows and liquidity trends for the three years ended December 31:

(Dollars in thousands)

	2013	2012	2011	Increase / Decrease	
	2013	2012	2011	2013	2012
Net cash from operating activities	\$ 1,423,776	\$ 1,172,583	\$ 875,152	\$ 251,193	\$ 297,431
Net cash (used) in investing activities	(730,763)	(570,046)	(850,281)	(160,717)	280,235
Net cash (used) in financing activities	(30,867)	(342,988)	(255,455)	312,121	(87,533)
Cash, cash equivalents and short-term investments	3,747,473	2,863,758	2,432,264	883,715	431,494
Working capital	4,373,374	3,436,964	2,875,801	936,410	561,163

Operating activities. The increase in operating cash flow for both 2013 and 2012 was primarily attributed to the increase in net income and more efficient deployment of working capital. Trade accounts receivable increased to approximately \$1,648.8 million at December 31, 2013 as compared to approximately \$1,345.7 million at December 31, 2012 and approximately \$1,179.0 million at December 31, 2011. Unbilled

Table of Contents

accounts receivable increased to approximately \$226.5 million at December 31, 2013 from approximately \$183.1 million at December 31, 2012 and \$139.6 at December 31, 2011. The increase in trade accounts receivable and unbilled receivables during 2013 was primarily due to increased revenues. We monitor turnover, aging and the collection of accounts receivable through the use of management reports that are prepared on a customer basis and evaluated by our finance staff. At December 31, 2013, our days sales outstanding, including unbilled receivables, was approximately 73 days as compared to 72 days as of December 31, 2012 and 73 days as of December 31, 2011.

Investing activities. The increase in net cash used in investing activities during 2013 is primarily related to higher net investment purchases and payments for acquisitions during 2013 as compared to the 2012 period, partially offset by lower spending for capital expenditures during the year. The 2012 decrease in net cash used in investing activities, when compared to 2011, is related to a decrease in net purchases of investments and lower payments for acquisitions, partially offset by higher spending for capital expenditures.

Financing activities. The decrease in net cash used in financing activities during 2013 compared to 2012 primarily related to lower levels of repurchases of our common stock under our stock repurchase program in 2013. The increase in net cash used in financing activities during 2012 when compared to 2011 primarily related to higher levels of repurchases of our common stock under our stock repurchase program.

As of December 31, 2013, \$2,510.9 million of our cash, cash equivalents and short-term investments was held outside the United States. We utilize certain strategies in an effort to ensure that our worldwide cash is available in the locations in which it is needed. Most of the amounts held outside of the United States could be repatriated to the United States but, under current law, would be subject to income taxes in the United States, less applicable foreign tax credits. Other than amounts for which we have already accrued U.S. taxes, we intend to indefinitely reinvest these funds outside the U.S. and our current plans do not demonstrate a need to repatriate these amounts to fund our cash needs in the United States. If such earnings are repatriated in the future, or are no longer deemed to be indefinitely reinvested, we will accrue the applicable amount of taxes associated with such earnings at that time. Due to the various methods by which such earnings could be repatriated in the future, it is not currently practicable to determine the amount of applicable taxes that would result from such repatriation.

Our ability to expand and grow our business in accordance with current plans, to make acquisitions and form joint ventures and to meet our long-term capital requirements beyond a twelve month period will depend on many factors, including the rate, if any, at which our cash flow increases, our ability and willingness to accomplish acquisitions and joint ventures with capital stock, our continued intent not to repatriate foreign earnings, and the availability of public and private debt and equity financing. We cannot be certain that additional financing, if required, will be available on terms favorable to us, if at all. We expect our operating cash flow and cash and cash equivalents to be sufficient to meet our operating requirements for the next twelve months.

Commitments and Contingencies

As of December 31, 2013, we had outstanding fixed capital commitments of approximately \$63.3 million related to our India development center expansion program, which includes expenditures for land acquisition, facilities construction and furnishings to build new state-of-the-art development and delivery centers in regions primarily designated as SEZs located in India.

Table of Contents

As of December 31, 2013, we had the following obligations and commitments to make future payments under contractual obligations and commercial commitments:

	Total	Payments due by period			More than 5 years
		Less than 1 year	1-3 years (in thousands)	3-5 years	
Operating leases	\$ 673,337	\$ 135,745	\$ 216,168	\$ 133,990	\$ 187,434
Fixed capital commitments ⁽¹⁾	63,260	63,260			
Other purchase commitments ⁽²⁾	81,561	48,345	33,216		
Total	\$ 818,158	\$ 247,350	\$ 249,384	\$ 133,990	\$ 187,434

(1) Relates to our India development and delivery center expansion program.

(2) Other purchase commitments include, among other things, communications and information technology obligations, as well as other obligations in the ordinary course of business that we cannot cancel or where we would be required to pay a termination fee in the event of cancellation.

As of December 31, 2013, we had \$96.6 million of unrecognized tax benefits. This represents the tax benefits associated with certain tax positions on our domestic and international tax returns that have not been recognized on our financial statements due to uncertainty regarding their resolution. The resolution of these income tax positions with the relevant taxing authorities is at various stages and therefore we are unable to make a reliable estimate of the eventual cash flows by period that may be required to settle these matters.

We are involved in various claims and legal actions arising in the ordinary course of business. In the opinion of management, the outcome of such claims and legal actions, if decided adversely, is not expected to have a material adverse effect on our business, financial condition, results of operations and cash flows. Additionally, many of our engagements involve projects that are critical to the operations of our customers business and provide benefits that are difficult to quantify. Any failure in a customer's systems or our failure to meet our contractual obligations to our clients, including any breach involving a customer's confidential information or sensitive data, or our obligations under applicable laws or regulations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Although we attempt to contractually limit our liability for damages arising from negligent acts, errors, mistakes, or omissions in rendering our services, there can be no assurance that the limitations of liability set forth in our contracts will be enforceable in all instances or will otherwise protect us from liability for damages. Although we have general liability insurance coverage, including coverage for errors or omissions, there can be no assurance that such coverage will cover all types of claims, continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. The successful assertion of one or more large claims against us that exceed or are not covered by our insurance coverage or changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could have a material adverse effect on our business, results of operations, financial condition and cash flows.

Foreign Currency Risk

Overall, we believe that we have limited revenue risk resulting from movement in foreign currency exchange rates as approximately 77.6% of our revenues during 2013 were generated from customers located in North America. However, a portion of our costs in India, representing approximately 27.3% of our global operating costs during 2013, are denominated in the Indian rupee and are subject to foreign exchange rate fluctuations. These foreign currency exchange rate fluctuations have an impact on our results of operations. In addition, a portion of our balance sheet is exposed to foreign currency exchange rate fluctuations, which may result in non-operating foreign currency exchange gains or losses upon remeasurement. In 2013, we reported foreign currency exchange losses, exclusive of hedging gains or losses, of approximately \$55.2 million, which

Table of Contents

were primarily attributed to the remeasurement of the Indian rupee denominated net monetary assets on the books of our India subsidiaries to the U.S. dollar functional currency. On an ongoing basis, we manage a portion of this risk by limiting our net monetary asset exposure to certain currencies in our foreign subsidiaries, primarily the Indian rupee.

We entered into a series of foreign exchange forward contracts that are designated as cash flow hedges of certain Indian rupee denominated payments in India. Cognizant India converts U.S. dollar receipts from intercompany billings to Indian rupees to fund local expenses. These hedges to buy Indian rupees and sell U.S. dollars are intended to partially offset the impact of movement of exchange rates on future operating costs. We reported losses of \$163.0 million in 2013 and \$96.1 million in 2012, on contracts that settled during these periods. As of December 31, 2013, we have outstanding contracts with a notional value of \$2,340.0 million and weighted average forward rate of 57.2 rupees to the U.S. dollar. These contracts are scheduled to mature as follows: outstanding contracts with a notional value of \$1,200.0 million and a weighted average forward rate of 54.1 rupees to the U.S. dollar scheduled to mature in 2014; outstanding contracts with a notional value of \$900.0 million and a weighted average forward rate of 58.6 rupees to the U.S. dollar scheduled to mature in 2015; and outstanding contracts with a notional value of \$240.0 million and a weighted average forward rate of 67.2 rupees to the U.S. dollar scheduled to mature in 2016.

Our foreign subsidiaries are exposed to foreign exchange rate risk for transactions denominated in currencies other than the functional currency of the respective subsidiary. We also use foreign exchange forward contracts to hedge balance sheet exposure to certain monetary assets and liabilities denominated in currencies other than the functional currency of the subsidiary. These contracts are not designated as hedges and are intended to offset the foreign currency exchange gains or losses upon remeasurement of these net monetary assets. We entered into a series of foreign exchange forward contracts scheduled to mature in 2014 which are used to hedge our foreign currency denominated net monetary assets. At December 31, 2013, the notional value of the outstanding contracts was \$279.3 million and the related fair value was an asset of \$9.9 million. During 2013, inclusive of gains of \$14.1 million on our undesignated balance sheet hedges, we reported net foreign currency exchange losses of approximately \$41.1 million.

Off-Balance Sheet Arrangements

Other than our foreign exchange forward contracts, there were no off-balance sheet transactions, arrangements or other relationships with unconsolidated entities or other persons in 2013, 2012 and 2011 that have, or are reasonably likely to have, a current or future effect on the company's financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Effects of Inflation

Our most significant costs are the salaries and related benefits for our programming staff and other professionals. In certain regions, competition for professionals with advanced technical skills necessary to perform our services has caused wages to increase at a rate greater than the general rate of inflation. As with other service providers in our industry, we must adequately anticipate wage increases, particularly on our fixed-price contracts. Historically, we have experienced increases in compensation and benefit costs, including incentive-based compensation, in India; however, this has not had a material impact on our results of operations as we have been able to absorb such cost increases through price increases or cost management strategies such as managing discretionary costs, mix of professional staff and utilization levels and achieving other operating efficiencies. There can be no assurance that we will be able to offset such cost increases in the future.

Critical Accounting Estimates and Risks

Management's discussion and analysis of our financial condition and results of operations is based on our accompanying consolidated financial statements that have been prepared in accordance with accounting

Table of Contents

principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported for assets and liabilities, including the recoverability of tangible and intangible assets, disclosure of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses during the reported period. On an on-going basis, we evaluate our estimates. The most significant estimates relate to the recognition of revenue and profits based on the percentage of completion method of accounting for certain fixed-bid contracts, the allowance for doubtful accounts, income taxes, valuation of goodwill and other long-lived assets, valuation of investments and derivative financial instruments, assumptions used in valuing stock-based compensation arrangements, contingencies and litigation. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. The actual amounts may differ from the estimates used in the preparation of the accompanying consolidated financial statements. Our significant accounting policies are described in Note 1 to the accompanying consolidated financial statements.

We believe the following critical accounting policies require a higher level of management judgments and estimates than others in preparing the consolidated financial statements:

Revenue Recognition. Revenues related to our highly complex information technology application development contracts, which are predominantly fixed-price contracts, are recognized as the services are performed using the percentage of completion method of accounting. Under this method, total contract revenue during the term of an agreement is recognized on the basis of the percentage that each contract's total labor cost to date bears to the total expected labor cost (cost to cost method). This method is followed where reasonably dependable estimates of revenues and costs can be made. Management reviews total expected labor costs on an ongoing basis. Revisions to our estimates may result in increases or decreases to revenues and income and are reflected in the consolidated financial statements in the periods in which they are first identified. If our estimates indicate that a contract loss will be incurred, a loss provision is recorded in the period in which the loss first becomes probable and reasonably estimable. Contract losses are determined to be the amount by which the estimated costs of the contract exceed the estimated total revenues that will be generated by the contract and are included in cost of revenues in our consolidated statement of operations. Changes in estimates related to our revenue contracts and contract losses were immaterial for the periods presented.

Stock-Based Compensation. Utilizing the fair value recognition provisions prescribed by the authoritative guidance, stock-based compensation cost is measured at the grant date based on the value of the award and is recognized as expense over the vesting period. Determining the fair value of stock-based awards at the grant date requires judgment, including estimating the expected term over which the stock awards will be outstanding before they are exercised, the expected volatility of our stock and the number of stock-based awards that are expected to be forfeited. In addition, for performance stock units, we are required to estimate the most probable outcome of the performance conditions in order to determine the amount of stock compensation costs to be recorded over the vesting period. If actual results differ significantly from our estimates, stock-based compensation expense and our results of operations could be materially impacted.

Income Taxes. Determining the consolidated provision for income tax expense, deferred income tax assets (and related valuation allowance, if any) and liabilities requires significant judgment. We are required to calculate and provide for income taxes in each of the jurisdictions where we operate. Changes in the geographic mix of income before taxes or estimated level of annual pre-tax income can affect our overall effective income tax rate. The consolidated provision for income taxes may also change period to period based on non-recurring events, such as the settlement of income tax audits and changes in tax laws, regulations, or accounting principles.

Our provision for income taxes also includes the impact of reserves established for uncertain income tax positions, as well as the related interest, which can involve complex issues and may require an extended period of time to resolve. Although we believe we have adequately reserved for our uncertain tax positions, no assurance

Table of Contents

can be given that the final outcome of these matters will not differ from our recorded amounts. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit. To the extent that the final outcome of these matters differs from the amounts recorded, such differences will impact the provision for income taxes in the period in which such determination is made.

Significant judgment is also required in determining any valuation allowance recorded against deferred income tax assets. In assessing the need for a valuation allowance, we consider all available evidence for each jurisdiction including past operating results, estimates of future taxable income and the feasibility of tax planning strategies. In the event we change our determination as to the amount of deferred income tax assets that can be realized, we will adjust the valuation allowance with a corresponding impact recorded to income tax expense in the period in which such determination is made.

Our Indian subsidiaries, collectively referred to as Cognizant India, are primarily export-oriented companies and are eligible for certain income tax holiday benefits granted by the Indian government for export activities conducted within SEZs for periods of up to 15 years. We have constructed and expect to continue to locate most of our newer development facilities in SEZs. All Indian profits, including those generated within SEZs, are subject to the MAT, at the current rate of approximately 20.0%. Any MAT paid is creditable against future corporate income tax within a 10-year expiration period, subject to limitations. Currently, we anticipate utilizing our existing MAT balances against our future corporate income tax obligations in India. However, our ability to do so could be impacted by possible changes to the Indian tax laws as well as the future financial results of Cognizant India.

Derivative Financial Instruments. Derivative financial instruments are accounted for in accordance with the authoritative guidance which requires that each derivative instrument be recorded on the balance sheet as either an asset or liability measured at its fair value as of the reporting date. Our derivative financial instruments consist of foreign exchange forward contracts. We estimate the fair value of each foreign exchange forward contract by using a present value of expected cash flows model. This model utilizes various assumptions, including, but not limited to timing and amounts of cash flows, discount rates, and credit risk factors. The use of different assumptions could have a positive or negative effect on our results of operations and financial condition.

Investments. Our investment portfolio is comprised primarily of time deposits, mutual funds invested in fixed income securities and U.S. dollar denominated corporate bonds, municipal bonds, certificates of deposit, commercial paper, debt issuances by the U.S. government, U.S. government agencies, foreign governments and supranational entities and asset-backed securities. The asset-backed securities included Government National Mortgage Association (GNMA) mortgage backed securities and securities backed by auto loans, credit card receivables, and other receivables. The years of issuance of our asset-backed securities fall in the 2004 to 2013 range.

We utilize various inputs to determine the fair value of our investment portfolio. To the extent they exist, unadjusted quoted market prices for identical assets in active markets (Level 1) or quoted prices on similar assets (Level 2) are utilized to determine the fair value of each investment in our portfolio. In the absence of quoted prices or liquid markets, valuation techniques would be used to determine fair value of any investments that require inputs that are both significant to the fair value measurement and unobservable (Level 3). Valuation techniques are based on various assumptions, including, but not limited to timing and amounts of cash flows, discount rates, rate of return, and adjustments for nonperformance and liquidity. A significant degree of judgment is involved in valuing investments using Level 3 inputs. The use of different assumptions could have a positive or negative effect on our results of operations and financial condition. See Note 10 to our consolidated financial statements for additional information related to our security valuation methodologies.

We periodically evaluate if unrealized losses, as determined based on the security valuation methodologies discussed above, on individual securities classified as available-for-sale in the investment portfolio are considered to be other-than-temporary. The analysis of other-than-temporary impairment requires the use of

Table of Contents

various assumptions, including, but not limited to, the length of time an investment's book value is greater than fair value, the severity of the investment's decline, any credit deterioration of the investment, whether management intends to sell the security and whether it is more likely than not that we will be required to sell the security prior to recovery of its amortized cost basis. Once a decline in fair value is determined to be other-than-temporary, an impairment charge is generally recorded to income and a new cost basis in the investment is established.

Allowance for Doubtful Accounts. We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. The allowance for doubtful accounts is determined by evaluating the relative credit-worthiness of each customer, historical collections experience and other information, including the aging of the receivables. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Goodwill. We evaluate goodwill for impairment at least annually, or as circumstances warrant. When determining the fair value of our reporting units, we utilize various assumptions, including projections of future cash flows. Any adverse changes in key assumptions about our businesses and their prospects or an adverse change in market conditions may cause a change in the estimation of fair value and could result in an impairment charge. Based upon our most recent evaluation of goodwill, there are no significant risks of impairment for any of our reporting units. As of December 31, 2013, our goodwill balance was \$444.2 million.

Long-Lived Assets and Intangibles. We review long-lived assets and certain identifiable intangibles for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In general, we will recognize an impairment loss when the sum of undiscounted expected future cash flows is less than the carrying amount of such asset. The measurement for such an impairment loss is then based on the fair value of the asset. If such assets were determined to be impaired, it could have a material adverse effect on our business, results of operations and financial condition.

Risks. The majority of our development and delivery centers, including a majority of our employees, are located in India. As a result, we may be subject to certain risks associated with international operations, including risks associated with foreign currency exchange rate fluctuations and risks associated with the application and imposition of protective legislation and regulations relating to import and export or otherwise resulting from foreign policy or the variability of foreign economic or political conditions. Additional risks associated with international operations include difficulties in enforcing intellectual property rights, limitations on immigration programs, the burdens of complying with a wide variety of foreign laws, potential geo-political and other risks associated with terrorist activities and local and cross border conflicts, and potentially adverse tax consequences, tariffs, quotas and other barriers. We are also subject to risks associated with our overall compliance with Section 404 of the Sarbanes-Oxley Act of 2002. The inability of our management to ensure the adequacy and effectiveness of our internal control over financial reporting for future year ends could result in adverse consequences to us, including, but not limited to, a loss of investor confidence in the reliability of our financial statements, which could cause the market price of our stock to decline. See Part I, Item 1A. Risk Factors.

Recently Adopted Accounting Pronouncements

In February 2013, the Financial Accounting Standards Board, or FASB, issued additional guidance related to accumulated other comprehensive income, requiring the presentation of significant amounts reclassified out of accumulated other comprehensive income to the respective line items in the statement of operations. For those amounts required by U.S. GAAP to be reclassified to earnings in their entirety in the same reporting period, this presentation is required either on the statement of operations or in a single footnote. For items that are not required to be reclassified in their entirety to earnings, the presentation requirement can be met by cross-referencing disclosures elsewhere in the footnotes. We adopted this standard on January 1, 2013 and included the required disclosures in Note 7 to our consolidated financial statements. The adoption of this standard affects financial statement presentation only and has no effect on our financial condition or consolidated results of operations.

Table of Contents

In December 2011, the FASB issued guidance requiring enhanced disclosures related to the nature of an entity's rights to offset and any related arrangements associated with its financial instruments and derivative instruments. The new guidance requires the disclosure of the gross amounts subject to rights of set-off, amounts offset in accordance with the accounting standards followed and the related net exposure. In January 2013, the FASB issued an additional update clarifying the scope of this guidance. We adopted this standard on January 1, 2013 and included the required disclosures in Note 11 to our consolidated financial statements. The adoption of this standard affects financial statement disclosures only and has no effect on our financial condition or consolidated results of operations.

New Accounting Pronouncement

In July 2013, the FASB issued new guidance which requires the netting of any unrecognized tax benefits against all available same-jurisdiction deferred tax carryforward assets that would apply if the uncertain tax positions were settled. This standard will be effective for periods beginning on or after January 1, 2014. The adoption of this standard affects financial statement presentation only and will have no effect on our financial condition or consolidated results of operations.

Forward Looking Statements

The statements contained in this Annual Report on Form 10-K that are not historical facts are forward-looking statements (within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended) that involve risks and uncertainties. Such forward-looking statements may be identified by, among other things, the use of forward-looking terminology such as believes, expects, may, could, would, plan, intend, predict, potential, continue, should or anticipates or the negative thereof or other variations thereon or comparable terminology, or by discussions of strategy that involve risks and uncertainties. From time to time, we or our representatives have made or may make forward-looking statements, orally or in writing.

Such forward-looking statements may be included in various filings made by us with the Securities and Exchange Commission, or press releases or oral statements made by or with the approval of one of our authorized executive officers. These forward-looking statements, such as statements regarding anticipated future revenues or operating margins, contract percentage completions, earnings, capital expenditures, liquidity, plans, objectives, and other statements regarding matters that are not historical facts, are based on our current expectations, estimates and projections, management's beliefs, and certain assumptions made by management, many of which, by their nature, are inherently uncertain and beyond our control. Our actual results, performance or achievements could differ materially from the results expressed in, or implied by, these forward-looking statements. There are a number of important factors that could cause our results to differ materially from those indicated by such forward-looking statements, including, but not limited to, continuing worsening economic conditions in the United States and Europe; the loss of customers; the rate of growth in the use of technology in business and the type and level of technology spending by our clients; the risk of reputational harm to us; increased competition from other service providers; the risk that we may not be able to keep pace with the rapidly evolving technological environment; competition for hiring highly-skilled professionals or the loss of key personnel; the risk that we may not be able to control our costs or maintain favorable pricing and utilization rates; the risk that we might not be able to maintain effective internal controls; the risk that we may not be able to enforce non-competition agreements with our executives; the risk of liability resulting from security breaches; our inability to successfully acquire or integrate target companies; changes in domestic and international regulations and legislation, including immigration and anti-outsourcing legislation; the effect of fluctuations in the Indian rupee and other currency exchange rates; the effect of our use of derivative instruments; the risk of war, terrorist activities, pandemics and natural disasters; the possibility that we may choose to repatriate foreign earnings or that those earnings may become subject to tax on a U.S. basis; the possibility that we may lose certain tax benefits provided to companies in our industry by India; the risk that we may not be able to enforce or protect our intellectual property rights, or that we may infringe upon the intellectual property rights of others; the possibility that we could lose our ability to utilize the intellectual property rights of others; and the factors set

Table of Contents

forth in Part I, in the section entitled "Item 1A. Risk Factors" in this report. You are advised to consult any further disclosures we make on related subjects in the reports we file with the Securities and Exchange Commission, including this report in the sections titled "Part I, Item 1. Business," "Part I, Item 1A. Risk Factors" and "Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations." We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

We are exposed to foreign currency exchange rate risk in the ordinary course of doing business as we transact or hold a portion of our funds in foreign currencies, particularly the Indian rupee. Accordingly, we periodically evaluate the need for hedging strategies, including the use of derivative financial instruments, to mitigate the effect of foreign currency exchange rate fluctuations and expect to continue to use such instruments in the future to reduce foreign currency exposure to appreciation or depreciation in the value of certain foreign currencies. All hedging transactions are authorized and executed pursuant to regularly reviewed policies and procedures.

We have entered into a series of foreign exchange forward contracts that are designated as cash flow hedges of certain Indian rupee denominated payments in India. Cognizant India converts U.S. dollar receipts from intercompany billings to Indian rupees to fund local expenses. These U.S. dollar / Indian rupee hedges are intended to partially offset the impact of movement of exchange rates on future operating costs. As of December 31, 2013, the notional value of these contracts was \$2,340.0 million. The outstanding contracts as of December 31, 2013 are scheduled to mature each month during 2014, 2015 and 2016. As of December 31, 2013, the net unrealized loss on our outstanding foreign exchange forward contracts was \$354.9 million. Based upon a sensitivity analysis of our foreign exchange forward contracts at December 31, 2013, which estimates the fair value of the contracts based upon market exchange rate fluctuations, a 10.0% change in the foreign currency exchange rate against the U.S. dollar with all other variables held constant would have resulted in a change in the fair value of approximately \$183.8 million.

Our foreign subsidiaries are exposed to foreign currency exchange rate risk for transactions denominated in currencies other than the functional currency of the respective subsidiary. We also use foreign exchange forward contracts to hedge balance sheet exposure to certain monetary assets and liabilities denominated in currencies other than the functional currency of the subsidiary. These contracts are not designated as hedges and are intended to offset the foreign currency exchange gains or losses upon remeasurement of these net monetary assets. We entered into a series of foreign exchange forward contracts scheduled to mature in 2014 which are used to hedge our foreign currency denominated net monetary assets. At December 31, 2013, the notional value of the outstanding contracts was \$279.3 million and the related fair value was an asset of \$9.9 million. Based upon a sensitivity analysis of our foreign exchange forward contracts at December 31, 2013, which estimates the fair value of the contracts based upon market exchange rate fluctuations, a 10.0% change in the foreign currency exchange rate against the U.S. dollar with all other variables held constant would have resulted in a change in the fair value of approximately \$26.8 million.

We do not believe we are exposed to material direct risks associated with changes in interest rates other than with our cash, cash equivalents and short-term investments. As of December 31, 2013, we had approximately \$3,747.5 million of cash, cash equivalents and short-term investments most of which are impacted almost immediately by changes in short-term interest rates.

We typically invest in highly-rated securities and our policy generally limits the amount of credit exposure to any one issuer. Our investment policy requires investments to be investment grade with the objective of minimizing the potential risk of principal loss. We may sell our investments prior to their stated maturities for strategic purposes, in anticipation of credit deterioration, or for duration management. As of December 31, 2013,

Table of Contents

our short-term investments totaled \$1,534.5 million. Our investment portfolio is comprised primarily of time deposits, mutual funds invested in fixed income securities and U.S. dollar denominated corporate bonds, municipal bonds, certificates of deposit, commercial paper, debt issuances by the U.S. government, U.S. government agencies, foreign governments and supranational entities and asset-backed securities. The asset-backed securities included Government National Mortgage Association (GNMA) mortgage backed securities and securities backed by auto loans, credit card receivables, and other receivables.

Item 8. Financial Statements and Supplementary Data

The financial statements required to be filed pursuant to this Item 8 are appended to this Annual Report on Form 10-K. A list of the financial statements filed herewith is found in Part IV, Item 15. Exhibits, Financial Statements and Financial Statement Schedule .

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management under the supervision and with the participation of our chief executive officer and our chief financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act) as of December 31, 2013. Based on this evaluation, our chief executive officer and our chief financial officer concluded that, as of December 31, 2013, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in our reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to our management, including our chief executive officer and our chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

No changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended December 31, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Responsibility for Financial Statements

Our management is responsible for the integrity and objectivity of all information presented in this annual report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments. Management believes the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements fairly represent the company's financial position and results of operations.

The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the company's independent registered public accounting firm and representatives of management to review accounting, financial reporting, internal control and audit matters, as well as the nature and extent of the audit effort. The Audit Committee is responsible for the engagement of the independent registered public accounting firm. The independent registered public accounting firm has free access to the Audit Committee.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rule 13a-15(f) and 15d-15(f) of the Exchange Act and is a process designed by, or under the supervision of, our chief executive and chief financial officers and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;

Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of our management and directors; and

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Our management assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2013. In making this assessment, the company's management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework (1992)*.

Based on its evaluation, our management has concluded that, as of December 31, 2013, our internal control over financial reporting was effective. PricewaterhouseCoopers LLP, the independent registered public accounting firm that audited the financial statements included in this annual report, has issued an attestation report on our internal control over financial reporting, as stated in their report which is included on page F-2.

Inherent Limitations of Internal Controls

Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Item 9B. Other Information

None.

Table of Contents

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information relating to our directors and nominees for election as directors under the heading "Election of Directors" in our definitive proxy statement for the 2014 Annual Meeting of Stockholders is incorporated herein by reference to such proxy statement. The information relating to our executive officers in response to this item is contained in part under the caption "Our Executive Officers" in Part I of this Annual Report on Form 10-K and the remainder is incorporated herein by reference to our definitive proxy statement for the 2014 Annual Meeting of Stockholders under the headings "Section 16(a) Beneficial Ownership Reporting Compliance," "Corporate Governance-Code of Ethics" and "Committees of the Board-Audit Committee."

We have adopted a written code of business conduct and ethics, entitled "Cognizant's Core Values and Standards of Business Conduct," that applies to all of our employees, including our principal executive officer, principal financial officer, principal accounting officer and controller, or persons performing similar functions. We make available our code of business conduct and ethics free of charge through our website which is located at www.cognizant.com. We intend to disclose any amendments to, or waivers from, our code of business conduct and ethics that are required to be publicly disclosed pursuant to rules of the SEC and the NASDAQ Global Select Market by posting it on our website.

Item 11. Executive Compensation

The discussion under the headings "Executive Compensation," "Compensation Committee Report," "Executive Compensation Tables" and "Compensation Committee Interlocks and Insider Participation" in our definitive proxy statement for the 2014 Annual Meeting of Stockholders is incorporated herein by reference to such proxy statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The discussion under the heading "Security Ownership of Certain Beneficial Owners and Management" and "Executive Compensation Tables-Equity Compensation Plan Information" in our definitive proxy statement for the 2014 Annual Meeting of Stockholders is incorporated herein by reference to such proxy statement.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The discussion under the headings "Certain Relationships and Related Person Transactions" and "Corporate Governance - Determination of Independence" in our definitive proxy statement for the 2014 Annual Meeting of Stockholders is incorporated herein by reference to such proxy statement.

Item 14. Principal Accountant Fees and Services

The discussion under the heading "Independent Registered Public Accounting Firm Fees and Other Matters" in our definitive proxy statement for the 2014 Annual Meeting of Stockholders is incorporated herein by reference to such proxy statement.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Cognizant Technology Solutions Corporation:

In our opinion, the consolidated financial statements listed in the accompanying index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Cognizant Technology Solutions Corporation (the Company) and its subsidiaries at December 31, 2013 and December 31, 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2013 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes to Consolidated Financial Statements

(Dollars in thousands, except share data)

Note 1 Summary of Significant Accounting Policies

The terms Cognizant, we, our, us and the company refer to Cognizant Technology Solutions Corporation and its subsidiaries unless the context indicates otherwise.

Description of Business. We are a leading provider of information technology (IT), consulting and business process services, dedicated to helping the world's leading companies build stronger businesses. Our clients engage us to help them build more efficient operations, provide solutions to critical business and technology problems, and to help them drive technology-based innovation and growth. Our core competencies include: Business, Process, Operations and IT Consulting, Application Development and Systems Integration, Enterprise Information Management, or EIM, Application Testing, Application Maintenance, IT Infrastructure Services, or IT IS and Business Process Services, or BPS. We tailor our services to specific industries and utilize an integrated global delivery model.

Basis of Presentation and Principles of Consolidation. The consolidated financial statements are presented in accordance with generally accepted accounting principles in the United States of America, or U.S. GAAP, and reflect the consolidated financial position, results of operations, comprehensive income and cash flows of our consolidated subsidiaries for all periods presented. All intercompany balances and transactions have been eliminated in consolidation.

Cash and Cash Equivalents and Investments. Cash and cash equivalents consist of all cash balances, including money market funds and liquid instruments. Liquid instruments are classified as cash equivalents when their maturities at the date of purchase are three months or less and as short-term investments when their maturities at the date of purchase are greater than three months.

We determine the appropriate classification of our investments in marketable securities at the date of purchase and reevaluate such designation at each balance sheet date. We have classified and accounted for our marketable securities as available-for-sale. After consideration of our risk versus reward objectives, as well as our liquidity requirements, we may sell these securities prior to their stated maturities. As we view these marketable securities as available to support current operations, we classify such securities with maturities at the date of purchase beyond twelve months as short-term investments because such investments represent an investment in cash that is available for current operations.

Available-for-sale securities are reported at fair value with changes in unrealized gains and losses recorded as a separate component of accumulated other comprehensive income (loss) until realized. We determine the cost of the securities sold based on the specific identification method. Time deposits with financial institutions are valued at cost, which approximates fair value.

Interest and amortization of premiums and discounts for debt securities are included in interest income. We also evaluate our available-for-sale investments periodically for possible other-than-temporary impairment by reviewing factors such as the length of time and extent to which fair value has been below cost basis, the financial condition of the issuer, whether we intend to sell the security and whether it is more likely than not that we will be required to sell the security prior to recovery of its amortized cost basis. Once a decline in fair value is determined to be other-than-temporary, an impairment charge is generally recorded to income and a new cost basis in the investment is established.

Allowance for Doubtful Accounts. We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. The allowance for doubtful accounts is determined by evaluating the relative credit-worthiness of each customer, historical collections experience and other information, including the aging of the receivables. We evaluate the collectability of our accounts receivable on an on-going basis and write-off accounts when they are deemed to be uncollectible.

Table of Contents

Unbilled Accounts Receivable. Unbilled accounts receivable represent revenues on contracts to be billed, in subsequent periods, as per the terms of the related contracts.

Short-term Financial Assets and Liabilities. Cash and cash equivalents, trade receivables, accounts payable and other accrued liabilities are short-term in nature and, accordingly, their carrying values approximate fair value.

Property and Equipment. Property and equipment are stated at cost, net of accumulated depreciation. Depreciation is calculated on the straight-line basis over the estimated useful lives of the assets. Leasehold improvements are amortized on a straight-line basis over the shorter of the term of the lease or the estimated useful life of the improvement. In India, leasehold land is leased by us from the government of India with lease terms ranging up to 99 years. Lease payments are made at the inception of the lease agreement and amortized over the lease term. Maintenance and repairs are expensed as incurred, while renewals and betterments are capitalized. Deposits paid towards acquisition of long-lived assets and the cost of assets not put in use before the balance sheet date are disclosed under the caption capital work-in-progress in Note 4.

Internal Use Software. Costs for software developed or obtained for internal use are capitalized, including the salaries and benefits of employees that are directly involved in the installation and development of such software. The capitalized costs are amortized on a straight-line basis over the software's useful life. Costs associated with preliminary project stage activities, training, maintenance and all post-implementation stage activities are expensed as incurred.

Goodwill. We allocate the cost of an acquired entity to the assets acquired and liabilities assumed based on their estimated fair values including goodwill and identifiable intangible assets. We test goodwill at the reporting unit level for impairment at least annually or as circumstances warrant. If an impairment is indicated, a write-down to fair value (normally measured by discounting estimated future cash flows) is recorded. We do not have any indefinite-lived intangible assets.

Long-Lived Assets and Intangibles. We review long-lived assets and certain identifiable intangibles for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. We recognize an impairment loss when the sum of undiscounted expected future cash flows is less than the carrying amount of such assets. The impairment loss would equal the amount by which the carrying amount of the asset exceeds the fair value of the asset. Other intangibles consist primarily of customer relationships and developed technology, which are being amortized on a straight-line basis over their estimated useful lives.

Stock Repurchase Program. Our existing stock repurchase program, as amended and approved by our Board of Directors, allows for the repurchase of \$1,500,000 of our outstanding shares of Class A common stock and expires on December 31, 2014. Through December 31, 2013, we completed stock repurchases of 15,721,275 shares for \$998,127, inclusive of fees and expenses, under this program. Additional stock repurchases were made in connection with our stock-based compensation plans, whereby company shares were tendered by employees for payment of applicable statutory tax withholdings. During 2013, 2012, and 2011 such repurchases totaled 582,936, 532,592 and 504,164 shares, respectively, at an aggregate cost of \$47,442, \$34,925 and \$35,365, respectively. At the time of repurchase, shares are returned to the status of authorized and unissued shares. We account for the repurchases as constructively retired and record such repurchases as a reduction of Class A common stock and additional paid-in capital.

Revenue Recognition. Revenues related to time-and-material contracts are recognized as the service is performed and amounts are earned. Revenues from transaction-priced contracts are recognized as transactions are processed and amounts are earned. Revenues related to fixed-price contracts for highly complex application development and systems integration services are recognized as the service is performed using the percentage of completion method of accounting, under which the total value of revenue is recognized on the basis of the

Table of Contents

percentage that each contract's total labor cost to date bears to the total expected labor costs (cost to cost method). Revenues related to fixed price outsourcing services are recognized on a straight-line basis unless revenues are earned and obligations are fulfilled in a different pattern. Revenues related to fixed-price contracts for consulting or other IT services are recognized as services are performed on a proportional performance basis based upon the level of effort.

For all services, revenue is earned and recognized only when all of the following criteria are met: evidence of an arrangement is obtained, the price is fixed or determinable, the services have been rendered and collectibility is reasonably assured. Contingent or incentive revenues are recognized when the contingency is satisfied and we conclude the amounts are earned. Volume discounts are recorded as a reduction of revenue over the contract period as services are provided. Revenues also include the reimbursement of out-of-pocket expenses.

Costs to deliver services are expensed to cost of revenues as incurred with the exception of specific costs directly related to transition or set-up activities for outsourcing contracts. Transition costs are deferred and expensed ratably over the period of service. Generally, deferred amounts are protected in the event of early termination of the contract and are monitored regularly for impairment. Impairment losses are recorded when projected remaining undiscounted operating cash flows of the related contract are not sufficient to recover the carrying amount of the contract assets. Deferred transition costs were approximately \$80,254 and \$51,615 as of December 31, 2013 and 2012, respectively, and are included in other noncurrent assets in our consolidated statements of financial position. Costs related to warranty provisions are accrued at the time the related revenues are recorded.

We may enter into arrangements that consist of multiple elements. Such arrangements may include any combination of our consulting and technology services and outsourcing services. For arrangements with multiple deliverables, we evaluate at the inception of each new arrangement all deliverables to determine whether they represent separate units of accounting. For arrangements with multiple units of accounting, consideration is allocated among the units of accounting, where separable, based on their relative selling price. Relative selling price is determined based on vendor-specific objective evidence, if it exists. Otherwise, third-party evidence of selling price is used, when it is available, and in circumstances when neither vendor-specific objective evidence nor third-party evidence of selling price is available, management's best estimate of selling price is used. Revenue is recognized for each unit of accounting based on our revenue recognition policy described above.

Fixed-price contracts are generally cancelable subject to a specified notice period. All services provided by us through the date of cancellation are due and payable under the contract terms. We issue invoices related to fixed-price contracts based upon achievement of milestones during a project or other contractual terms. Differences between the timing of billing, based on contract milestones or other contractual terms, and the recognition of revenue are recognized as either unbilled receivables or deferred revenue. Estimates of certain fixed-price contracts are subject to adjustment as a project progresses to reflect changes in expected completion costs or efforts. The cumulative impact of any revision in estimates is reflected in the financial reporting period in which the change in estimate becomes known and any anticipated losses on contracts are recognized immediately.

Stock-Based Compensation. Stock-based compensation expense for awards of equity instruments to employees and non-employee directors is determined based on the grant-date fair value of those awards. We recognize these compensation costs net of an estimated forfeiture rate over the requisite service period of the award. Forfeitures are estimated on the date of grant and revised if actual or expected forfeiture activity differs materially from original estimates.

Foreign Currency. The assets and liabilities of our foreign subsidiaries whose functional currency is not the U.S. dollar are translated into U.S. dollars from local currencies at current exchange rates and revenues and expenses are translated from local currencies at average monthly exchange rates. The resulting translation adjustments are recorded in accumulated other comprehensive income (loss) on the accompanying consolidated

Table of Contents

statements of financial position. The U.S. dollar is the functional currency for certain foreign subsidiaries who conduct business predominantly in U.S. dollars. For these foreign subsidiaries, non-monetary assets and liabilities are remeasured at historical exchange rates, while monetary assets and liabilities are remeasured at current exchange rates. Foreign currency exchange gains or losses from remeasurement are included in income. Net foreign currency exchange (losses) included in our results of operations, inclusive of our undesignated foreign currency hedges, were (\$41,130), (\$20,015), and (\$8,779), for the years ended December 31, 2013, 2012 and 2011, respectively.

Derivative Financial Instruments. Derivative financial instruments are accounted for in accordance with the authoritative guidance which requires that each derivative instrument be recorded on the balance sheet as either an asset or liability measured at its fair value as of the reporting date. Our derivative financial instruments consist of foreign exchange forward contracts. For derivative financial instruments to qualify for hedge accounting, the following criteria must be met: (1) the hedging instrument must be designated as a hedge; (2) the hedged exposure must be specifically identifiable and expose us to risk; and (3) it is expected that a change in fair value of the derivative financial instrument and an opposite change in the fair value of the hedged exposure will have a high degree of correlation. The authoritative guidance also requires that changes in our derivatives' fair values be recognized in income unless specific hedge accounting and documentation criteria are met (i.e., the instruments are accounted for as hedges). For items to which hedge accounting is applied, we record the effective portion of our derivative financial instruments that are designated as cash flow hedges in accumulated other comprehensive income (loss) in the accompanying consolidated statements of financial position. Any ineffectiveness or excluded portion of a designated cash flow hedge is recognized in income.

Use of Estimates. The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, including the recoverability of tangible and intangible assets, disclosure of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses during the period. On an on-going basis, management reevaluates these estimates. The most significant estimates relate to the recognition of revenue and profits based on the percentage of completion method of accounting for certain fixed-bid contracts, the allowance for doubtful accounts, income taxes, valuation of goodwill and other long-lived assets, valuation of investments and derivative financial instruments, assumptions used in valuing stock-based compensation arrangements, contingencies and litigation. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. The actual amounts may vary from the estimates used in the preparation of the accompanying consolidated financial statements.

Risks and Uncertainties. The majority of our development and delivery centers and employees are located in India. As a result, we may be subject to certain risks associated with international operations, including risks associated with foreign currency exchange rate fluctuations and risks associated with the application and imposition of protective legislation and regulations relating to import and export or otherwise resulting from foreign policy or the variability of foreign economic or political conditions. Additional risks associated with international operations include difficulties in enforcing intellectual property rights, the burdens of complying with a wide variety of foreign laws, potential geo-political and other risks associated with terrorist activities and local or cross border conflicts and potentially adverse tax consequences, tariffs, quotas and other barriers.

Concentration of Credit Risk. Financial instruments that potentially subject us to significant concentrations of credit risk consist primarily of cash and cash equivalents, time deposits, investments in securities, derivative financial instruments and trade accounts receivable. We maintain our cash and cash equivalents and investments with high credit quality financial institutions, invest in investment-grade debt securities and limit the amount of credit exposure to any one commercial issuer. Trade accounts receivable are dispersed across many customers operating in different industries; therefore, concentration of credit risk is limited.

Income Taxes. We provide for income taxes utilizing the asset and liability method of accounting. Under this method, deferred income taxes are recorded to reflect the tax consequences in future years of differences

Table of Contents

between the tax basis of assets and liabilities and their financial reporting amounts at each balance sheet date, based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income. If it is determined that it is more likely than not that future tax benefits associated with a deferred income tax asset will not be realized, a valuation allowance is provided. The effect on deferred income tax assets and liabilities of a change in the tax rates is recognized in income in the period that includes the enactment date. Tax benefits earned on exercise of employee stock options in excess of compensation charged to income are credited to additional paid-in capital. Our provision for income taxes also includes the impact of provisions established for uncertain income tax positions, as well as the related interest.

Earnings Per Share, or EPS. Basic EPS excludes dilution and is computed by dividing earnings available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted EPS includes all potential dilutive common stock in the weighted average shares outstanding. For purposes of computing diluted earnings per share for the years ended December 31, 2013, 2012 and 2011, respectively, 2,824,000, 4,570,000, and 7,074,000 shares were assumed to have been outstanding related to common share equivalents. We exclude options with exercise prices that are greater than the average market price for the period from the calculation of diluted EPS because their effect would be anti-dilutive. We excluded 3,400 shares in 2013, 19,500 shares in 2012, and 12,500 in 2011 from our diluted EPS calculation. Also, in accordance with the authoritative guidance, we excluded from the calculation of diluted EPS an additional 48,900 shares in 2013, 79,300 shares in 2012, and 38,600 shares in 2011, related to stock based awards whose combined exercise price, unamortized fair value and excess tax benefits were greater in each of those periods than the average market price of our common stock because their effect would be anti-dilutive. We include performance stock unit awards in the dilutive potential common shares when they become contingently issuable per the authoritative guidance and exclude the awards when they are not contingently issuable.

Recently Adopted Accounting Pronouncements.

In February 2013, the Financial Accounting Standards Board, or FASB, issued additional guidance related to accumulated other comprehensive income, requiring the presentation of significant amounts reclassified out of accumulated other comprehensive income to the respective line items in the statement of operations. For those amounts required by U.S. GAAP to be reclassified to earnings in their entirety in the same reporting period, this presentation is required either on the statement of operations or in a single footnote. For items that are not required to be reclassified in their entirety to earnings, the presentation requirement can be met by cross-referencing disclosures elsewhere in the footnotes. We adopted this standard on January 1, 2013 and included the required disclosures in Note 7. The adoption of this standard affects financial statement presentation only and has no effect on our financial condition or consolidated results of operations.

In December 2011, the FASB issued guidance requiring enhanced disclosures related to the nature of an entity's rights to offset and any related arrangements associated with its financial instruments and derivative instruments. The new guidance requires the disclosure of the gross amounts subject to rights of set-off, amounts offset in accordance with the accounting standards followed and the related net exposure. In January 2013, the FASB issued an additional update clarifying the scope of this guidance. We adopted this standard on January 1, 2013 and included the required disclosures in Note 11. The adoption of this standard affects financial statement disclosures only and has no effect on our financial condition or consolidated results of operations.

New Accounting Pronouncement.

In July 2013, the FASB issued new guidance which requires the netting of any unrecognized tax benefits against all available same-jurisdiction deferred tax carryforward assets that would apply if the uncertain tax positions were settled. This standard will be effective for periods beginning on or after January 1, 2014. The adoption of this standard affects financial statement presentation only and will have no effect on our financial condition or consolidated results of operations.

Table of Contents**Note 2 Business Combinations**

During 2013, we completed four business combinations for total cash consideration of approximately \$184,200 (net of cash acquired). These transactions strengthened our local presence in Germany, Switzerland and France, expanded our expertise in enterprise application services and high-end testing services, broadened our business process services capabilities within finance and accounting, and strengthened our financial services management and regulatory consulting practice. As part of these business combinations, we acquired customer relationship assets, assembled workforces, a software platform and other assets.

During 2012, we completed three business combinations for total cash consideration of approximately \$28,100 (net of cash acquired). In August of 2012, we entered into a transaction pursuant to which we signed a multi-year service agreement, assumed an assembled workforce, and acquired land, building and other assets. Under the authoritative business combination guidelines, this transaction qualified as a business combination. This transaction expanded our business process services capabilities within the insurance industry. Additionally, in 2012, we completed two business combinations to strengthen our business process services and research capabilities within the media and healthcare industries. As part of these transactions, we acquired customer relationship assets, assembled workforces, and other assets. In addition, during 2012, we settled contingent payment provisions of approximately \$31,400 related to business combinations completed in prior years.

During 2011, we completed two business combinations for total consideration, including stock, of approximately \$91,000 (net of cash acquired). These transactions strengthened our business process services and analytics solution offerings and enhanced our retail SAP capabilities.

These acquisitions were included in our consolidated financial statements as of the date on which the businesses were acquired and were not material to our operations, financial position or cash flow. We have allocated the purchase price related to these transactions to tangible and intangible assets and liabilities, including goodwill, based on their fair values as follows:

	2013		2012		2011	
	Fair Value	Useful Life	Fair Value	Useful Life	Fair Value	Useful Life
Total initial consideration, net of cash acquired ⁽¹⁾	\$ 184,200		\$ 28,100		\$ 91,000	
Purchase price allocated to:						
Tax deductible goodwill					21,367	
Non-deductible goodwill	129,886		19,096		44,713	
Customer relationship intangible assets	58,572	5-10 years	9,400	6-12 years	17,900	6-10 years
Other intangible assets	7,192	1-5 years	600	5 years	1,500	2-4 years

(1) Includes stock consideration in 2011.

The primary items that generated the aforementioned goodwill are the value of the synergies between the acquired companies and us and the acquired assembled workforces, neither of which qualify as an amortizable intangible asset.

Table of Contents

Note 3 Short-term Investments

Our short-term investments were as follows as of December 31:

	2013	2012
Available-for-sale investment securities:		
U.S. Treasury and agency debt securities	\$ 506,285	\$ 551,236
Corporate and other debt securities	401,800	294,556
Asset-backed securities	160,267	97,112
Municipal debt securities	115,196	47,292
Mutual funds	21,136	21,150
Total available-for-sale investment securities	1,204,684	1,011,346
Time deposits	329,783	282,335
Total short-term investments	\$ 1,534,467	\$ 1,293,681

Our available-for-sale investment securities consist of U.S. dollar denominated investments primarily in U.S. Treasury notes, U.S. government agency debt securities, municipal debt securities, non-U.S. government debt securities, U.S. and international corporate bonds, certificates of deposit, commercial paper, debt securities issued by supranational institutions, mutual funds invested in fixed income securities, and asset-backed securities, including Government National Mortgage Association (GNMA) mortgage backed securities and securities backed by auto loans, credit card receivables, and other receivables. Our investment guidelines are to purchase securities which are investment grade at the time of acquisition. We monitor the credit ratings of the securities in our portfolio on an ongoing basis. The carrying value of the time deposits approximated fair value as of December 31, 2013 and 2012.

Available-for-Sale Investment Securities

The amortized cost, gross unrealized gains and losses and fair value of available-for-sale investment securities were as follows at December 31:

	2013			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
U.S. Treasury and agency debt securities	\$ 506,094	\$ 544	\$ (353)	\$ 506,285
Corporate and other debt securities	400,891	1,152	(243)	401,800
Asset-backed securities	160,559	99	(391)	160,267
Municipal debt securities	114,888	348	(40)	115,196
Mutual funds	22,705	280	(1,849)	21,136
Total available-for-sale investment securities	\$ 1,205,137	\$ 2,423	\$ (2,876)	\$ 1,204,684

	2012			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
U.S. Treasury and agency debt securities	\$ 550,317	\$ 972	\$ (53)	\$ 551,236
Corporate and other debt securities	292,736	1,842	(22)	294,556
Asset-backed securities	97,004	237	(129)	97,112
Municipal debt securities	47,266	93	(67)	47,292
Mutual funds	21,583		(433)	21,150

Edgar Filing: COGNIZANT TECHNOLOGY SOLUTIONS CORP - Form 10-K

Table of Contents

The fair value and related unrealized losses of available-for-sale investment securities in a continuous unrealized loss position for less than 12 months and for 12 months or longer were as follows as of December 31:

	Less than 12 Months		2013 12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Treasury and agency debt securities	\$ 221,548	\$ (353)	\$	\$	\$ 221,548	\$ (353)
Corporate and other debt securities	106,485	(243)			106,485	(243)
Asset-backed securities	84,051	(333)	5,048	(58)	89,099	(391)
Municipal debt securities	10,702	(34)	1,019	(6)	11,721	(40)
Mutual funds			20,183	(1,849)	20,183	(1,849)
Total	\$ 422,786	\$ (963)	\$ 26,250	\$ (1,913)	\$ 449,036	\$ (2,876)

	Less than 12 Months		2012 12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Treasury and agency debt securities	\$ 120,118	\$ (53)	\$	\$	\$ 120,118	\$ (53)
Corporate and other debt securities	25,662	(21)	699	(1)	26,361	(22)
Asset-backed securities	27,180	(93)	1,499	(36)	28,679	(129)
Municipal debt securities	7,908	(32)	696	(35)	8,604	(67)
Mutual funds	21,150	(433)			21,150	(433)
Total	\$ 202,018	\$ (632)	\$ 2,894	\$ (72)	\$ 204,912	\$ (704)

The unrealized losses for the above securities as of December 31, 2013 and 2012 are primarily attributable to changes in interest rates. As of December 31, 2013, we do not consider any of the investments to be other-than-temporarily impaired. The gross unrealized gains and losses in the above tables were recorded, net of tax, in accumulated other comprehensive income (loss).

The contractual maturities of our fixed income available-for-sale investment securities as of December 31, 2013 are set forth in the following table:

	Amortized Cost	Fair Value
Due within one year	\$ 198,105	\$ 198,312
Due after one year up to two years	358,174	358,990
Due after two years up to three years	415,555	415,896
Due after three years up to four years	50,039	50,083
Asset-backed securities	160,559	160,267
Fixed income available-for-sale investment securities	\$ 1,182,432	\$ 1,183,548

Asset-backed securities were excluded from the maturity categories because the actual maturities may differ from the contractual maturities since the underlying receivables may be prepaid without penalties. Further, actual maturities of debt securities may differ from those presented above since certain obligations provide the issuer the right to call or prepay the obligation prior to scheduled maturity without penalty.

Table of Contents

Proceeds from sales of available-for-sale investment securities and the gross gains and losses that have been included in earnings as a result of those sales were as follows:

	2013	2012	2011
Proceeds from sales of available-for-sale investment securities	\$ 1,119,822	\$ 697,406	\$ 652,992
Gross gains	\$ 1,951	\$ 2,410	\$ 3,102
Gross losses	(554)	(402)	(785)
Net realized gains on sales of available-for-sale investment securities	\$ 1,397	\$ 2,008	\$ 2,317

Note 4 Property and Equipment, net

Property and equipment were as follows as of December 31:

	Estimated Useful Life (Years)	2013	2012
Buildings	30	\$ 444,955	\$ 423,340
Computer equipment and software	3	426,527	352,147
Furniture and equipment	5 9	273,815	240,988
Land		22,644	20,396
Leasehold land	lease term	60,306	60,306
Capital work-in-progress		360,578	256,272
Leasehold improvements	Shorter of the lease term or		
	the life of the leased asset	211,675	191,829
Sub-total		1,800,500	1,545,278
Accumulated depreciation and amortization		(719,336)	(573,792)
Property and equipment, net		\$ 1,081,164	\$ 971,486

Depreciation and amortization expense related to property and equipment was \$155,681, \$137,561, and \$107,257 for the years ended December 31, 2013, 2012, and 2011, respectively.

In India, leasehold land is leased by us from the government of India with lease terms ranging up to 99 years. Lease payments are made at the inception of the lease agreement and amortized over the lease term. Amortization expense of leasehold land is immaterial for the periods presented and is included in depreciation and amortization expense in our accompanying consolidated statements of operations.

Note 5 Goodwill and Intangible Assets, net

Changes in goodwill were as follows for the years ended December 31:

	2013	2012
Balance, beginning of year	\$ 309,185	\$ 288,772
Business combinations	129,886	19,096
Cumulative translation adjustments	5,165	1,317
Balance, end of year	\$ 444,236	\$ 309,185

In 2013 and 2012, the increase in goodwill was primarily related to business combinations completed during the period. No impairment losses were recognized during the three years ended December 31, 2013.

F-16

Table of Contents

Goodwill has been allocated to our reportable segments as follows as of December 31:

	2013	2012
Financial Services	\$ 208,588	\$ 137,677
Healthcare	107,409	78,977
Manufacturing/Retail/Logistics	71,644	48,304
Other	56,595	44,227
Total goodwill	\$ 444,236	\$ 309,185

Components of intangible assets were as follows as of December 31:

	2013		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Customer relationships	\$ 203,543	\$ (88,159)	\$ 115,384
Developed technology	4,250	(2,994)	1,256
Other	21,438	(6,804)	14,634
Total intangible assets	\$ 229,231	\$ (97,957)	\$ 131,274

	2012		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Customer relationships	\$ 142,653	\$ (67,058)	\$ 75,595
Developed technology	4,222	(2,204)	2,018
Other	13,921	(4,059)	9,862
Total intangible assets	\$ 160,796	\$ (73,321)	\$ 87,475

All of the intangible assets have finite lives and as such are subject to amortization. Amortization of intangible assets totaled \$24,249 for 2013, \$19,027 for 2012, and \$16,918 for 2011. During 2013, 2012 and 2011, amortization of \$7,729, \$7,499 and \$6,774, respectively, relating to customer relationship intangible assets was recorded as a reduction of revenues. These intangible assets are attributed to direct revenue contracts with sellers of acquired businesses.

Estimated amortization expense related to our existing intangible assets for the next five years are as follows:

Year	Amount
2014	\$ 26,779
2015	21,308
2016	19,635
2017	16,934
2018	11,606

Table of Contents**Note 6 Accrued Expenses and Other Current Liabilities**

Accrued expenses and other current liabilities were as follows as of December 31:

	2013	2012
Compensation and benefits	\$ 894,986	\$ 661,816
Income taxes	24,312	29,570
Professional fees	45,453	35,366

Note 8 Employee Benefits

We contribute to defined contribution plans in the United States and Europe, including a 401(k) savings and supplemental retirement plans in the United States. Total expenses for company contributions to these plans were \$34,628, \$24,789, and \$19,453 for the years ended December 31, 2013, 2012, and 2011, respectively.

We maintain employee benefit plans that cover substantially all India-based employees. The employees' provident fund, pension and family pension plans are statutory defined contribution retirement benefit plans. Under the plans, employees contribute up to 12% of their base compensation, which is matched by an equal contribution by the company. For these plans, we recognized a contribution expense of \$56,070, \$54,125, and \$49,200 for the years ended December 31, 2013, 2012, and 2011, respectively.

Table of Contents

We also maintain a gratuity plan in India that is a statutory post-employment benefit plan providing defined lump sum benefits. We make annual contributions to the employees' gratuity fund established with a government-owned insurance corporation to fund a portion of the estimated obligation. Accordingly, our liability for the gratuity plan reflects the undiscounted benefit obligation payable as of the balance sheet date which was based upon the employees' salary and years of service. As of December 31, 2013 and 2012, the amount accrued under the gratuity plan was \$69,629 and \$56,737, which is net of fund assets of \$55,004 and \$50,427, respectively. Expense recognized by us was \$30,962, \$28,496, and \$29,703 for the years ended December 31, 2013, 2012, and 2011, respectively.

Note 9 Income Taxes

Income before provision for income taxes shown below is based on the geographic location to which such income is attributed for years ended December 31:

	2013	2012	2011
United States	\$ 540,738	\$ 381,940	\$ 344,143
Foreign	1,147,179	1,005,656	825,006
Income before provision for income taxes	\$ 1,687,917	\$ 1,387,596	\$ 1,169,149

The provision for income taxes consists of the following components for the years ended December 31:

	2013	2012	2011
Current:			
Federal and state	\$ 269,974	\$ 265,826	\$ 120,441
Foreign	277,559	188,415	173,689
Total current	547,533	454,241	294,130
Deferred:			
Federal and state	(37,085)	(99,649)	26,549
Foreign	(51,109)	(18,259)	(35,148)
Total deferred	(88,194)	(117,908)	(8,599)
Total provision for income taxes	\$ 459,339	\$ 336,333	\$ 285,531

The reconciliation between our effective income tax rate and the U.S. federal statutory rate were as follows for the years ended December 31:

	2013	%	2012	%	2011	%
Tax expense, at U.S. federal statutory rate	\$ 590,771	35.0	\$ 485,659	35.0	\$ 409,202	35.0
State and local income taxes, net of federal benefit	33,147	2.0	24,032	1.7	20,373	1.7
Non-taxable income for Indian tax purposes	(146,326)	(8.7)	(151,789)	(10.9)	(125,708)	(10.8)
Rate differential on foreign earnings	(24,606)	(1.5)	(22,126)	(1.6)	(26,030)	(2.2)
Other	6,353	0.4	557	0.0	7,694	0.7
Total provision for income taxes	\$ 459,339	27.2	\$ 336,333	24.2	\$ 285,531	24.4

Table of Contents

The significant components of deferred income tax assets and liabilities recorded on the consolidated statements of financial position were as follows as of December 31:

	2013	2012
Deferred income tax assets:		
Net operating losses	\$ 8,831	\$ 10,911
Revenue recognition	34,368	31,628
Compensation and benefits	132,134	99,110
Stock-based compensation	23,202	26,993
Minimum alternative tax (MAT) and other credits	217,099	178,244
Depreciation and amortization	4,720	
Other accrued expenses	70,193	61,095
Other	10,170	1,321
	500,717	409,302
Less valuation allowance	(5,659)	(6,288)
Deferred income tax assets, net	495,058	403,014
Deferred income tax liabilities:		
Undistributed Indian earnings		5,601
Depreciation and amortization		832
Intangible assets	38,653	19,094
Deferred income tax liabilities	38,653	25,527
Net deferred income tax assets	\$ 456,405	\$ 377,487

At December 31, 2013, we had foreign net operating loss carryforwards of approximately \$28,962. We have recorded valuation allowances on certain foreign net operating loss carryforwards. As of December 31, 2013 and 2012, deferred income tax assets related to the minimum alternative tax, or MAT, were approximately \$195,000 and \$163,000, respectively. The calculation of the MAT includes all profits realized by our Indian subsidiaries and any MAT paid is creditable against future corporate income tax within a 10-year expiration period, subject to limitations. Our existing MAT assets expire between March 2018 and March 2024 and we expect to fully utilize them within the applicable 10-year expiration periods.

Our Indian subsidiaries, collectively referred to as Cognizant India, are primarily export-oriented and are eligible for certain income tax holiday benefits granted by the government of India for export activities conducted within Special Economic Zones, or SEZs, for periods of up to 15 years. Our Indian operations outside of SEZs are subject to corporate income tax at the rate of 33.99%. In addition, all Indian profits, including those generated within SEZs, are subject to the MAT, at the current rate of approximately 20.0%. For the years ended December 31, 2013, 2012, and 2011, the effect of the income tax holidays granted by the Indian government was to reduce the overall income tax provision and increase net income by approximately \$146,326, \$151,789, and \$125,708, respectively, and increase diluted EPS by \$0.48, \$0.50, and \$0.41, respectively.

We pursue an international strategy that includes expanded infrastructure investments in India and geographic expansion outside the United States. Therefore, other than foreign earnings for which we have already accrued U.S. taxes, we do not intend to repatriate our foreign earnings as such earnings are deemed to be indefinitely reinvested outside the United States. As of December 31, 2013, the amount of unrepatriated Indian earnings and total foreign earnings (including unrepatriated Indian earnings) upon which no incremental U.S. taxes have been recorded is approximately \$4,357,000 and \$4,827,500, respectively. If such earnings are repatriated in the future, or are no longer deemed to be indefinitely reinvested, we will accrue the applicable amount of taxes associated with such earnings at that time. Due to the various methods by which such earnings could be repatriated in the future, it is not practicable to determine the amount of applicable taxes that would result from such repatriation.

Table of Contents

Due to the geographical scope of our operations, we are subject to tax examinations in various jurisdictions. Accordingly, we record incremental tax expense, based upon the more-likely-than-not standard, for any uncertain tax positions. In addition, when applicable, we adjust the previously recorded income tax expense to reflect examination results when the position is effectively settled or otherwise resolved. Our ongoing evaluations of the more-likely-than-not outcomes of the examinations and related tax positions require judgment and can result in adjustments that increase or decrease our effective income tax rate, as well as impact our operating results. The specific timing of when the resolution of each tax position will be reached is uncertain.

Changes in unrecognized income tax benefits were as follows for the years ended December 31:

	2013	2012
Balance, beginning of year	\$ 92,721	\$ 56,526
Additions based on tax positions related to the current year	12,982	37,270
Additions for tax positions of prior years	14,854	7,847
Additions for tax positions of acquired subsidiaries		88
Reductions for tax positions due to lapse of statutes of limitations	(4,353)	(8,816)
Reductions for tax positions of prior years	(10,199)	
Settlements		
Foreign currency exchange movement	(9,395)	(194)
Balance, end of year	\$ 96,610	\$ 92,721

At December 31, 2013, the entire balance of unrecognized income tax benefits would affect our effective income tax rate, if recognized. While the company believes uncertain tax positions may be settled or resolved within the next twelve months, it is difficult to estimate the income tax impact of these potential resolutions at this time. We recognize accrued interest and any penalties associated with uncertain tax positions as part of our provision for income taxes. The total amount of accrued interest and penalties at December 31, 2013 and 2012 was approximately \$8,725 and \$8,209, respectively, and relates to U.S. and foreign tax matters. The amount of interest and penalties expensed in 2013, 2012, and 2011 were immaterial.

We file a U.S. federal consolidated income tax return. The U.S. federal statute of limitations remains open for the years 2010 and onward. The statute of limitations for state audits varies by state. Years still under examination by foreign tax authorities are years 2001 and forward.

Note 10 Fair Value Measurements

We measure our cash equivalents, investments and foreign exchange forward contracts at fair value. The authoritative guidance defines fair value as the exit price, or the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The authoritative guidance also establishes a fair value hierarchy that is intended to increase consistency and comparability in fair value measurements and related disclosures. The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable. Observable inputs reflect assumptions market participants would use in pricing an asset or liability based on market data obtained from independent sources while unobservable inputs reflect a reporting entity's pricing based upon their own market assumptions.

The fair value hierarchy consists of the following three levels:

Level 1 Inputs are quoted prices in active markets for identical assets or liabilities.

Level 2 Inputs are quoted prices for similar assets or liabilities in an active market, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable and market-corroborated inputs which are derived principally from or corroborated by observable market data.

Table of Contents

Level 3 Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable. The following table summarizes our financial assets and (liabilities) measured at fair value on a recurring basis as of December 31, 2013:

	Level 1	Level 2	Level 3	Total
Cash equivalents:

We measure the fair value of money market funds and U.S. Treasury securities based on quoted prices in active markets for identical assets. The fair value of commercial paper, certificates of deposit, U.S. government agency securities, municipal debt securities, U.S. and international corporate bonds and foreign government debt securities is measured based on relevant trade data, dealer quotes, or model driven valuations using significant inputs derived from or corroborated by observable market data, such as yield curves and credit spreads. We measure the fair value of our asset-backed securities using model driven valuations based on significant inputs derived from or corroborated by observable market data such as dealer quotes, available trade information, spread data, current market assumptions on prepayment speeds and defaults and historical data on deal collateral performance. The value of the mutual funds invested in fixed income securities is based on the net asset value, or NAV, of the fund, with appropriate consideration of the liquidity and any restrictions on disposition of our investment in the fund.

We estimate the fair value of each foreign exchange forward contract by using a present value of expected cash flows model. This model calculates the difference between the current market forward price and the contracted forward price for each foreign exchange contract and applies the difference in the rates to each outstanding contract. The market forward rates include a discount and credit risk factor. The amounts are aggregated by type of contract and maturity.

During the year ended December 31, 2013, 2012 and 2011, there were no transfers among Level 1, Level 2, or Level 3 financial assets and liabilities.

Table of Contents**Note 11 Derivative Financial Instruments**

In the normal course of business, we use foreign exchange forward contracts to manage foreign currency exchange rate risk. The estimated fair value of the foreign exchange forward contracts considers the following items: discount rate, timing and amount of cash flow and counterparty credit risk. Derivatives may give rise to credit risks from the possible non-performance by counterparties. Credit risk is generally limited to the fair value of those contracts that are favorable to us. We have limited our credit risk by entering into derivative transactions only with highly-rated global financial institutions, limiting the amount of credit exposure with any one financial institution and conducting ongoing evaluation of the creditworthiness of the financial institutions with which we do business. In addition, all the assets and liabilities related to our foreign exchange forward contracts set forth in the below table are subject to International Swaps and Derivatives Association, or ISDA, master netting arrangements or other similar agreements with each individual counterparty. These master netting arrangements generally provide for net settlement of all outstanding contracts with the counterparty in the case of an event of default or a termination event. We have presented all the assets and liabilities related to our foreign exchange forward contracts on a gross basis, with no offsets, in our accompanying consolidated statements of financial position. There is no financial collateral (including cash collateral) posted or received by us related to our foreign exchange forward contracts.

The following table provides information on the location and fair values of derivative financial instruments included in our consolidated statement of financial position as of:

Designation of Derivatives	Location on Statement of Financial Position	December 31, 2013		December 31, 2012	
		Assets	Liabilities	Assets	Liabilities
Cash Flow Hedges Designated as hedging instruments

	Accrued expenses and other current liabilities		1,198		5,290
	Total	11,105	1,198	114	5,290
Total		\$ 11,105	\$ 356,074	\$ 4,780	\$ 306,551

Cash Flow Hedges

We have entered into a series of foreign exchange forward contracts that are designated as cash flow hedges of Indian rupee denominated payments in India. These contracts are intended to partially offset the impact of movement of exchange rates on future operating costs and are scheduled to mature each month during 2014, 2015 and 2016. Under these contracts, we purchase Indian rupees and sell U.S. dollars. The changes in fair value of these contracts are initially reported in the caption accumulated other comprehensive income (loss) in our consolidated statements of financial position and are subsequently reclassified to earnings in the same period the

Table of Contents

hedge contract matures. As of December 31, 2013, we estimate that \$160,942, net of tax, of the net losses related to derivatives designated as cash flow hedges recorded in accumulated other comprehensive income (loss) is expected to be reclassified into earnings within the next 12 months.

The notional value of our outstanding contracts by year of maturity and the net unrealized (loss) included in accumulated other comprehensive income (loss) for such contracts were as follows as of:

	December 31, 2013	December 31, 2012
2013	\$	\$ 1,253,000
2014	1,200,000	1,200,000
2015	900,000	780,000
2016	240,000	120,000
Total notional value of contracts outstanding	\$ 2,340,000	\$ 3,353,000
 Net unrealized (loss) included in accumulated other comprehensive income (loss), net of taxes	 \$ (299,993)	 \$ (252,810)

Upon settlement or maturity of the cash flow hedge contracts, we record the related gain or loss, based on our designation at the commencement of the contract, with the hedged Indian rupee denominated expense reported within cost of revenues and selling, general and administrative expenses. Hedge ineffectiveness was immaterial for all periods presented.

The following table provides information on the location and amounts of pre-tax (losses) on our cash flow hedges for the year ended December 31:

	(Increase) Decrease in Derivative Losses Recognized in Accumulated Other Comprehensive Income (Loss) (effective portion)		Location of Net Derivative (Losses) Reclassified from Accumulated Other Comprehensive Income (Loss) into Income (effective portion)	Net (Loss) Reclassified from Accumulated Other Comprehensive Income (Loss) into Income (effective portion)	
	2013	2012		2013	2012
Cash Flow Hedges Designated as hedging instruments					
Foreign exchange forward contracts	\$ (221,275)	\$ (7,065)	Cost of revenues	\$ (135,044)	\$ (79,335)
			Selling, general and administrative expenses	(27,950)	(16,775)
			Total	\$ (162,994)	\$ (96,110)

The activity related to the change in net unrealized (losses) on our cash flow hedges included in accumulated other comprehensive income (loss) is presented in Note 7.

Other Derivatives

We use foreign exchange forward contracts, which have not been designated as hedges, to hedge balance sheet exposure to certain monetary assets and liabilities denominated in currencies other than the functional currency of our foreign subsidiaries. We entered into foreign exchange

Edgar Filing: COGNIZANT TECHNOLOGY SOLUTIONS CORP - Form 10-K

forward contracts to purchase U.S. dollars and sell Indian rupees, Euros and British pounds. Contracts outstanding as of December 31, 2013 are scheduled to mature in 2014. Realized gains or losses and changes in the estimated fair value of these derivative financial instruments are recorded in Other, net in our consolidated statements of operations.

F-26

Table of Contents

Additional information related to our outstanding contracts is as follows as of:

	December 31, 2013		December 31, 2012	
	Notional	Market Value	Notional	Market Value
Contracts to purchase U.S. dollars and sell:				
Indian rupees	\$ 171,802	\$ 11,105	\$ 178,571	\$ (5,290)
Euros	55,500	(412)	30,000	114
British pounds	52,000	(786)		
Total	\$ 279,302	\$ 9,907	\$ 208,571	\$ (5,176)

The following table provides information on the location and amounts of realized and unrealized pre-tax gains and losses on our other derivative financial instruments for the years ended December 31, 2013 and 2012:

		Location of Net Gains (Losses)	Amount of Net Gains (Losses)	
		on Derivative Instruments	on Derivative Instruments	
			2013	2012
Other Derivatives	Not designated as hedging instruments			
Foreign exchange forward contracts		Other, net	\$ 14,084	\$ (8,270)

The related cash flow impacts of all of our derivative activities are reflected as cash flows from operating activities.

Note 12 Stock-Based Compensation Plans

On June 5, 2009, our stockholders approved the adoption of the Cognizant Technology Solutions Corporation 2009 Incentive Compensation Plan (the "2009 Incentive Plan"), under which 24,000,000 shares of our Class A common stock were reserved for issuance. The 2009 Incentive Plan is the successor plan to our Amended and Restated 1999 Incentive Compensation Plan which terminated on April 13, 2009 in accordance with its terms (the "1999 Incentive Plan"), our Amended and Restated Non-Employee Directors' Stock Option Plan (the "Director Plan") and our Amended and Restated Key Employees' Stock Option Plan (the "Key Employee Plan") which terminated in July 2009 (collectively, the "Predecessor Plans"). The 2009 Incentive Plan will not affect any options or stock issuances outstanding under the Predecessor Plans. No further awards will be made under the Predecessor Plans. As of December 31, 2013, we have 11,635,263 shares available for grant under the 2009 Incentive Plan.

Stock options granted to employees under our plans have a life ranging from seven to ten years, vest proportionally over four years, unless specified otherwise, and have an exercise price equal to the fair market value of the common stock on the date of grant. Grants to non-employee directors vest proportionally over two years. Stock-based compensation expense relating to stock options is recognized on a straight-line basis over the requisite service period.

Restricted stock units vest proportionately in quarterly or annual installments over three years. Stock-based compensation expense relating to restricted stock units is recognized on a straight-line basis over the requisite service period.

We granted performance stock units that vest over periods ranging from one to three years to employees, including executive officers. The vesting of performance stock units is contingent on both meeting revenue performance targets and continued service. Stock-based compensation costs for performance stock units that vest proportionally are recognized on a graded-vesting basis over the vesting period based on the most probable outcome of the performance conditions. If the minimum performance targets are not met, no compensation cost is recognized and any recognized compensation cost is reversed.

Table of Contents

The company's 2004 Employee Stock Purchase Plan (the "Purchase Plan"), as amended in 2013, provides for the issuance of up to 14,000,000 shares of Class A common stock to eligible employees. The Purchase Plan provides for eligible employees to purchase whole shares of Class A common stock at a price of 90% of the lesser of: (a) the fair market value of a share of Class A common stock on the first date of the purchase period or (b) the fair market value of a share of Class A common stock on the last date of the purchase period. Stock-based compensation expense for the Purchase Plan is recognized over the vesting period of three months on a straight-line basis. As of December 31, 2013, we had 6,080,870 shares available for future grants and issuances under the Purchase Plan.

The allocation of total stock-based compensation expense between cost of revenues and selling, general and administrative expenses as well as the related income tax benefit were as follows for the three years ended December 31:

	2013	2012	2011
Cost of revenues	\$ 19,107	\$ 16,773	\$ 15,257
Selling, general and administrative expenses	99,693	90,582	74,975
Total stock-based compensation expense	\$ 118,800	\$ 107,355	\$ 90,232
 Income tax benefit	 \$ 29,387	 \$ 26,206	 \$ 21,510

We estimate the fair value of each stock option granted using the Black-Scholes option-pricing model. For the years ended December 31, 2013, 2012 and 2011, expected volatility was calculated using implied market volatilities. In addition, the expected term, which represents the period of time, measured from the grant date, that vested options are expected to be outstanding, was derived by incorporating exercise and post-vest termination assumptions, based on historical data, in a Monte Carlo simulation model. The risk-free rate is derived from the U.S. Treasury yield curve in effect at the time of grant. We have not paid any dividends. Forfeiture assumptions used in amortizing stock-based compensation expense are based on an analysis of historical data.

The fair values of option grants, including the Purchase Plan, were estimated at the date of grant during the years ended December 31, 2013, 2012, and 2011 based upon the following assumptions and were as follows:

	2013	2012	2011
Dividend yield	0%	0%	0%
Weighted average volatility factor:			
Stock options	33.47%	36.71%	31.87%
Purchase Plan	29.17%	32.31%	34.66%
Weighted average expected life (in years):			
Stock options	3.82	3.69	3.54
Purchase Plan	0.25	0.25	0.25
Weighted average risk-free interest rate:			
Stock options	0.73%	0.43%	1.06%
Purchase Plan	0.05%	0.06%	0.05%
Weighted average grant date fair value:			
Stock options	\$ 17.30	\$ 16.77	\$ 18.85
Purchase Plan	\$ 11.74	\$ 11.13	\$ 12.21

During the year ended December 31, 2013, we issued 879,548 shares of Class A common stock under the Purchase Plan with a total vested fair value of approximately \$10,323.

Table of Contents

A summary of the activity for stock options granted under our stock-based compensation plans as of December 31, 2013 and changes during the year then ended is presented below:

	Number of Options	Weighted Average Exercise Price (in dollars)	Weighted Average Remaining Life (in years)	Aggregate Intrinsic Value (in thousands)
Outstanding at January 1, 2013	5,801,346	\$ 29.52		
Granted	52,020	64.82		
Exercised	(2,409,290)	25.54		
Cancelled				
Expired	(8,215)	22.56		
Outstanding at December 31, 2013	3,435,861	\$ 32.86	3.08	\$ 234,065
Vested and expected to vest at December 31, 2013	3,426,185	\$ 32.77	3.06	\$ 233,696
Exercisable at December 31, 2013	3,338,841	\$ 32.00	2.99	\$ 230,324

As of December 31, 2013, \$902 of total remaining unrecognized stock-based compensation cost related to stock options is expected to be recognized over the weighted-average remaining requisite service period of one year. The total intrinsic value of options exercised was \$137,446, \$256,623, and \$136,182 for the years ended December 31, 2013, 2012, and 2011, respectively.

The fair value of performance stock units and restricted stock units is determined based on the number of stock units granted and the quoted price of our stock at date of grant.

A summary of the activity for performance stock units granted under our stock-based compensation plans as of December 31, 2013 and changes during the year then ended is presented below. The presentation reflects the number of performance stock units at the maximum performance milestones.

	Number of Units	Weighted Average Grant Date Fair Value (in dollars)
Unvested at January 1, 2013	1,771,294	\$ 66.84
Granted	818,846	93.84
Vested	(578,559)	67.35
Forfeited	(73,040)	67.42
Reduction due to the achievement of lower than maximum performance milestones	(64,730)	66.69
Unvested at December 31, 2013	1,873,811	\$ 78.46

As of December 31, 2013, \$70,489 of total remaining unrecognized stock-based compensation cost related to performance stock units is expected to be recognized over the weighted-average remaining requisite service period of 2.11 years.

Table of Contents

A summary of the activity for restricted stock units granted under our stock-based compensation plans as of December 31, 2013 and changes during the year then ended is presented below:

	Number of Units	Weighted Average Grant Date Fair Value (in dollars)
Unvested at January 1, 2013	1,784,735	\$ 69.39
Granted	1,079,962	84.11
Vested	(945,020)	70.18
Forfeited	(121,273)	69.62
Unvested at December 31, 2013	1,798,404	\$ 77.80

As of December 31, 2013, \$117,925 of total remaining unrecognized stock-based compensation cost related to restricted stock units is expected to be recognized over the weighted-average remaining requisite service period of 2.08 years.

Note 13 Commitments and Contingencies

We lease office space and equipment under operating leases, which expire at various dates through the year 2024. Certain leases contain renewal provisions and generally require us to pay utilities, insurance, taxes, and other operating expenses. Future minimum rental payments on our operating leases as of December 31, 2013 are as follows:

2014	\$ 135,745
2015	119,396
2016	96,772
2017	78,564
2018	55,426
Thereafter	187,434
Total minimum lease payments	\$ 673,337

Rental expense totaled \$166,206, \$147,576, and \$122,035 years ended December 31, 2013, 2012, and 2011, respectively.

As of December 31, 2013, we had outstanding fixed capital commitments of approximately \$63,260 related to our India real estate development program to build new company-owned state-of-the-art IT development and delivery centers.

We are involved in various claims and legal actions arising in the ordinary course of business. In the opinion of management, the outcome of such claims and legal actions, if decided adversely, is not expected to have a material adverse effect on our business, financial condition, results of operations and cash flows. Additionally, many of our engagements involve projects that are critical to the operations of our customers business and provide benefits that are difficult to quantify. Any failure in a customer's systems or our failure to meet our contractual obligations to our clients, including any breach involving a customer's confidential information or sensitive data, or our obligations under applicable laws or regulations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Although we attempt to contractually limit our liability for damages arising from negligent acts, errors, mistakes, or omissions in rendering our services, there can be no assurance that the limitations of liability set forth in our contracts will be enforceable in all instances or will otherwise protect us from liability for damages. Although we have general liability insurance coverage, including coverage for errors or omissions, there can be no assurance that such coverage will cover all

Table of Contents

types of claims, continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. The successful assertion of one or more large claims against us that exceed or are not covered by our insurance coverage or changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could have a material adverse effect on our business, results of operations, financial condition and cash flows.

In the normal course of business and in conjunction with certain client engagements, we have entered into contractual arrangements through which we may be obligated to indemnify clients or other parties with whom we conduct business with respect to certain matters. These arrangements can include provisions whereby we agree to hold the indemnified party and certain of their affiliated entities harmless with respect to third-party claims related to such matters as our breach of certain representations or covenants, or out of our intellectual property infringement, our gross negligence or willful misconduct or certain other claims made against certain parties. Payments by us under any of these arrangements are generally conditioned on the client making a claim and providing us with full control over the defense and settlement of such claim. It is not possible to determine the maximum potential amount under these indemnification agreements due to the unique facts and circumstances involved in each particular agreement. Historically, we have not made payments under these indemnification agreements and therefore they have not had any impact on our operating results, financial position, or cash flows. However, if events arise requiring us to make payment for indemnification claims under our indemnification obligations in contracts we have entered, such payments could have material impact on our business, results of operations, financial condition and cash flows.

Note 14 Segment Information

Our reportable segments are: Financial Services, which includes customers providing banking/transaction processing, capital markets and insurance services; Healthcare, which includes healthcare providers and payers as well as life sciences customers; Manufacturing/Retail/Logistics, which includes manufacturers, retailers, travel and other hospitality customers, as well as customers providing logistics services; and Other, which is an aggregation of industries each of which, individually, represents less than 10% of consolidated revenues and segment operating profit. The Other reportable segment includes our information, media and entertainment services, communications and high technology operating segments. Our sales managers, account executives, account managers and project teams are aligned in accordance with the specific industries they serve.

Our chief operating decision maker evaluates the company's performance and allocates resources based on segment revenues and operating profit. Segment operating profit is defined as income from operations before unallocated costs. Generally, operating expenses for each operating segment have similar characteristics and are subject to the same factors, pressures and challenges. However, the economic environment and its effects on industries served by our operating segments may affect revenue and operating expenses to differing degrees. Expenses included in segment operating profit consist principally of direct selling and delivery costs as well as a per seat charge for use of the development and delivery centers. Certain selling, general and administrative expenses, excess or shortfall of incentive compensation for delivery personnel as compared to target, stock-based compensation expense, a portion of depreciation and amortization and the impact of the settlements of our cash flow hedges are not allocated to individual segments in internal management reports used by the chief operating decision maker. Accordingly, such expenses are excluded from segment operating profit and are separately disclosed as unallocated and adjusted only against our total income from operations. Additionally, management has determined that it is not practical to allocate identifiable assets by segment, since such assets are used interchangeably among the segments.

Table of Contents

Revenues from external customers and segment operating profit, before unallocated expenses, for the Financial Services, Healthcare, Manufacturing/Retail/Logistics, and Other reportable segments were as follows:

	2013	2012	2011
Revenues:			
Financial Services	\$ 3,717,573	\$ 3,035,447	\$ 2,518,422
Healthcare	2,264,826	1,934,898	1,622,157
Manufacturing/Retail/Logistics	1,868,305	1,498,668	1,197,472
Other	992,485	877,459	783,105
Total revenue	\$ 8,843,189	\$ 7,346,472	\$ 6,121,156
Segment Operating Profit:			
Financial Services	\$ 1,212,099	\$ 998,339	\$ 872,267
Healthcare	829,916	724,454	625,052
Manufacturing/Retail/Logistics	630,250	527,970	440,416
Other	318,357	288,052	254,145
Total segment operating profit	2,990,622	2,538,815	2,191,880
Less: unallocated costs⁽¹⁾	1,312,712	1,177,319	1,055,412
Income from operations	\$ 1,677,910	\$ 1,361,496	\$ 1,136,468

(1) Includes \$118,800, \$107,355 and \$90,232 of stock-based compensation expense for the years ended 2013, 2012 and 2011, respectively.

Geographic Area Information

Revenue and long-lived assets, by geographic area, were as follows:

	2013	2012	2011
Revenues:⁽¹⁾			
North America ⁽²⁾	\$ 6,860,067	\$ 5,836,258	\$ 4,802,958
Europe ⁽³⁾	1,579,205	1,195,490	1,097,475
Rest of World ⁽⁴⁾	403,917	314,724	220,723
Total	\$ 8,843,189	\$ 7,346,472	\$ 6,121,156
Long-lived Assets:⁽⁵⁾			
North America ⁽²⁾	\$ 48,352	\$ 52,149	\$ 27,387
Europe	22,707	8,696	5,232
Rest of World ⁽⁴⁾⁽⁶⁾	1,010,105	910,641	725,415
Total	\$ 1,081,164	\$ 971,486	\$ 758,034

(1) Revenues are attributed to regions based upon customer location.

Edgar Filing: COGNIZANT TECHNOLOGY SOLUTIONS CORP - Form 10-K

- (2) Substantially all relates to operations in the United States.
- (3) Includes revenue from operations in the United Kingdom of \$942,579, \$764,936 and \$698,853 for the years ended 2013, 2012, and 2011, respectively.
- (4) Includes our operations in Asia Pacific, the Middle East and Latin America.
- (5) Long-lived assets include property and equipment, net of accumulated depreciation and amortization.
- (6) Substantially all of these long-lived assets relate to our operations in India.

F-32

Table of Contents**Note 15 Subsequent Event***Class A Common Stock Split.*

On February 4, 2014, our Board of Directors declared a two-for-one stock split of the company's Class A common stock in the form of a 100% stock dividend. The record date for the two-for-one stock split is the close of business on February 21, 2014, and share distribution will occur on or about March 7, 2014. As a result of the stock split, stockholders will receive one additional share of Class A common stock, par value \$0.01, for each share they hold as of the record date.

All numbers of shares outstanding and per share amounts in the consolidated financial statements and notes to the consolidated financial statements are presented on a pre-split basis. Subsequent to the effective date of the stock split, all historical numbers of shares outstanding and per share data amounts presented in future financial statements will be retroactively adjusted.

Pro-forma unaudited earnings per share are as follows, giving retroactive effect to the stock split:

(in thousands, except per share data)

	2013	2012 Basic	Year Ended December 31,		2012 Diluted	2011
			2011	2013		
Net income	\$ 1,228,578	\$ 1,051,263	\$ 883,618	\$ 1,228,578	\$ 1,051,263	\$ 883,618
Weighted average number of common shares outstanding, as reported	302,007	301,291	303,277	304,831	305,861	310,351
Weighted average number of common shares outstanding, pro-forma	604,015	602,582	606,553	609,662	611,722	620,702
Earnings per share, as reported	\$ 4.07	\$ 3.49	\$ 2.91	\$ 4.03	\$ 3.44	\$ 2.85
Earnings per share, pro-forma	\$ 2.03	\$ 1.74	\$ 1.46	\$ 2.02	\$ 1.72	\$ 1.42

Pro-forma unaudited quarterly earnings per share for the year ended December 31, 2013 are presented in Note 16.

In addition, the pro-forma unaudited impact on the consolidated statement of financial position as a result of the stock split is an increase of \$3,039 to Class A common stock and an offsetting reduction in additional paid-in capital.

Note 16 Quarterly Financial Data (Unaudited)

Summarized quarterly results for the two years ended December 31, 2013 are as follows:

2013	Three Months Ended				
	March 31	June 30	September 30	December 31	Full Year
Revenues	\$ 2,020,738	\$ 2,161,240	\$ 2,305,723	\$ 2,355,488	\$ 8,843,189
Cost of revenues (exclusive of depreciation and amortization expense shown separately below)	1,199,965	1,272,013	1,382,336	1,411,155	5,265,469
