D. Major Businesses

(1) Wireless business

The Company provides wireless telecommunications services, characterized by its competitive strengths in handheld devices, affordable pricing, network coverage and an extensive contents library. We continue to maintain our reputation as the unparalleled premium network operator in the LTE market on the basis of our technological leadership and network management technology.

The Company plans to increase its profitability by strengthening its retention policy, which is the fundamental basis of competitiveness for telecommunication companies in this data-intensive era. The Company will lead the information and communication technology (ICT) trend by providing products through which customers can have a distinctive experience and by providing innovative services to transition to service-based competition.

In the business-to-business (B2B) area, the Company is striving to strengthen its solutions business as well as its existing leased line business. In the area of healthcare, the Company achieved several tangible milestones: point-of-care diagnostic devices manufactured by a company of which the Company is the largest shareholder received approval from the U.S. Food and Drug Administration; the Company entered the Chinese healthcare market; and the Company was the first Korean company to export medical information systems. The Company plans to continue to find and develop new growth businesses in healthcare in the mid- to long-term. The Company also plans to seek out new growth engines in existing businesses, including the intelligence business, by utilizing its technologies relating to big data.

In order to strengthen its sales channels, the Company has been offering a variety of fixed-line and wireless telecommunication convergence products to its customers through PS&Marketing Co., Ltd. (PS&Marketing), one of its subsidiaries. Through Service Ace Co., Ltd., another subsidiary, the Company operates customer service centers in Seoul and provides telemarketing services. Furthermore, Network O&S Co., Ltd., the Company's subsidiary responsible for the operation of the Company's 2G to 4G networks (including its CDMA, WCDMA and LTE networks), provides customers with quality network services and provides the Company with technological know-how in network operations.

(2) Fixed-line business

SK Broadband Co., Ltd. (SK Broadband) is engaged in providing telecommunications, broadcasting and new media services and various other services that are permitted to be carried out by SK Broadband under relevant regulations, as well as business activities that are directly or indirectly related to providing those services. In 1999, SK Broadband launched its high-speed Internet service in Seoul, Busan, Incheon and Ulsan and currently provides such services nationwide. SK Broadband also commercialized its TV-Portal service in July 2006 and its IPTV service in January 2009 upon receipt of permit in September 2008.

(3) Other businesses

The Company is a leading player in the Korean e-commerce industry with 11th Street, an e-commerce platform service that connects various sellers and purchasers through its online and mobile platforms, Shocking Deal, a mobile commerce curation service and BENEPIA, a customized benefits and rewards service platform. In addition, the Company has rapidly grown into a top tier player in Turkey, Indonesia and Malaysia after launching open market businesses in these countries by optimizing its businesses for the respective local markets and utilizing its expertise in the e-commerce platform business. In the online-to-offline (O2O) area, the Company is a leading player and continues to expand its market power with OK Cashbag, Korea's largest loyalty mileage program, Syrup Wallet, which offers smart shopping services utilizing its network of business partners and information technology such as big data, Syrup Store, which provides integrated marketing solutions to business partners and other Syrup-related services such as gifticon, Syrup Table and Syrup Pay. The Company focuses on the mobile platform to connect various on- and offline commerce service platforms that provide various benefits and information at the right place and the right time to give consumers a pleasant and convenient shopping experience and retailers an integrated marketing solution to reach their target audience. The Company intends to continue its efforts to secure the market leading position in these markets.

Table of Contents

In the advertising business area, the Company is engaged in advertisement production, promotion services and research and consulting services. The Company offers differentiated services utilizing a combination of SK Planet's big data, research-driven insight, sophisticated communication strategies, innovative and creative strategies, optimized media execution and powerful promotions. Surpassing the role of a conventional advertising agency, we help businesses create new value.

In the location-based services business area, the Company provides real time traffic information and various local information through its T-Map Navigation service. In the digital contents business area, the Company provides high-quality digital contents in its leading mobile contents marketplace, Onestore.

In the media business area, the Company provides the optimum environment for subscribers to access multimedia contents according to personal taste and preference through oksusu, available on various digital devices such as personal computers and mobile devices.

The Company provides integrated Internet portal services through NATE and instant messaging services through NATE-ON. In the mobile internet service business area, the Company provides portal-based services and Cymera, which is a camera application. In the portal service business area, key sources of revenue are display advertising, search engine-based advertising, and contents and other services. Display advertising consists of image, video and flash-based multimedia advertising carried on NATE and NATE-ON and aims to give greater exposure to the advertiser's brand name to the public. The increased effectiveness of online media as an advertising outlet has resulted in a greatly expanded advertiser base, and the increasing variety in the format of advertising has contributed to the growth of display advertising. Search engine-based advertising refers to the type of advertising that embeds advertisements within search results produced by searches of certain keywords on the NATE portal site. Search engine-based advertising has a certain appeal to small and medium-sized advertisers.

[SK Broadband]

SK Broadband acquired subscriberships of regional cable and other service providers on several different occasions. Such acquisitions were intended to secure a stable subscriber base for its broadband Internet service and, at the same time, increase the service coverage area. Because such acquisitions were conducted on a relatively small scale and involved the purchase of subscriberships, SK Broadband did not believe that such acquisitions rose to the level of purchasing an entire business line from another company or were likely to have a material impact on its business, and therefore decided that such acquisitions did not require resolutions of its shareholders.

A. Industry Characteristics

The Korean mobile communication market is considered to have reached its maturation stage with more than a 100% penetration rate. However, the Korean mobile communications market continues to improve in the quality of services with the help of advances in network-related technology and the development of highly advanced LTE-A, LTE and 3G smartphones which enable the provision of convergence services for multimedia contents, mobile commerce, telematics, new media and other related services. In addition, through the commercialization of LTE network in July 2011 and LTE-A network in June 2013, B2B businesses, such as the corporate connected workforce business which can directly contribute to an enhancement in productivity, are expected to grow rapidly. In the first half of 2014, wideband LTE-A service was commercialized and on December 29, 2014, tri-band LTE-A service with a maximum speed of 300 Mbps was also commercialized. Such achievements were the building blocks towards the Company's LTE penetration reaching 69.8% as of September 30, 2016.

C. Domestic and Overseas Market Conditions

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. Sales revenue related to data services is expected to increase due to the increasing popularity of smartphones and high-speed wireless networks. There is also a growing importance to the business-to-business segment, which creates added value by selling and developing various solutions. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries.

Set forth below is the historical market share of the Company.

D. Business Overview and Competitive Strengths

The Company is seeking to transform itself from a telecommunications service provider into a comprehensive ICT service provider. It has continued to innovate the scope of its services and achieved strong growth in subscribers amid fierce competition and rate cuts. As a result, for the nine months ended September 30, 2016, the Company recorded Won 12.7 trillion in revenue and Won 1.2 trillion in operating income on a consolidated basis and Won 9.3 trillion in revenue and Won 1.4 trillion in operating income on a separate basis.

In particular, the number of subscribers subscribing to Band Data plans, which was launched in the second quarter of 2015, has continued to steadily increase in 2016, which in turn led to an increase in data usage. The success of Luna, a smartphone launched in September 2015 that was designed to run exclusively on the Company's networks, led to the launch of various other relatively low-priced devices and became an example of successfully targeting a niche market.

By continuing to be innovative in developing core competencies, the Company has more firmly established its position as the market leader in wireless telecommunications. The competitive environment of the wireless telecommunications industry has become more focused on retention. For the nine months ended September 30, 2016, the average monthly churn rate was 1.4%, a record low since 2004 when the mobile number portability system was first introduced. The number of subscribers (including MVNO subscribers) as of September 30, 2016, was 29.5 million, an increase of approximately 300,000 from the previous quarter. In particular, the number of smartphone subscribers as of September 30, 2016, was 21.7 million, an increase of approximately 350,000 from the previous quarter, propelled by 20.6 million LTE subscribers, solidifying the Company's market leadership. In addition, as of September 30, 2016, the number of subscribers for products targeted towards second devices such as the T Kids phone Joon and T Outdoor reached over a million, which the Company believes shows a level of demand that can potentially lead to growth of the lifestyle enhancement platform.

Table of Contents

Following the launch of commercial LTE services in July 2011, the Company became the first telecommunications service provider in the world to launch commercial wideband LTE-A services in June 2014. In December 2014, the Company launched tri-band LTE-A services. By launching various high quality services utilizing the LTE-A and wideband LTE networks such as group video conference call services and full high definition mobile IPTV streaming services, the Company plans to provide an innovative user experience, enhance customer satisfaction and increase profitability.

The Company has proved that it has superior network quality compared to its competitors according to the Korea Communications Commission quality evaluations. The Company has also proved to be the leader in Korea's top three customer satisfaction indices: according to the National Customer Satisfaction Index, Korean Customer Satisfaction Index and Korean Standard Service Quality Index, the Company has continued to hold the leading position for 19 years, 19 years and 17 years, respectively.

SK Telink, a consolidated subsidiary of the Company, expanded its operations to the MVNO business based on its technical expertise and know-how obtained in its international telecommunications business and launched its MVNO service, 7Mobile, which is offered at reasonable rates and provides excellent quality. SK Telink is increasing its efforts to develop low-cost distribution channels and create niche markets through targeted marketing towards customers with lower average revenue per user. An MVNO leases the networks of a mobile network operator (MNO) and provides wireless telecommunication services under its own brand and fee structure, without owning telecommunication networks or frequencies.

Network O&S, a subsidiary of the Company responsible for the operation of the Company's base stations and related transmission and power facilities, offers quality fixed-line and wireless network services to customers, including mobile office products to business customers.

PS&Marketing, a subsidiary of the Company, provides a sales platform for products of the Company and SK Broadband including fixed-line and wireless telecommunication products that address customers' needs for various convergence products. PS&Marketing provides differentiated service to clients through the establishment of new sales channels and product development.

[Fixed-line Business]**A. Industry Characteristics**

As subscribers to various bundled wireless and fixed-line products continue to increase, the IPTV business is evolving to satisfy diverse customer needs for media services through differentiated service offerings, including mobile IPTV, bundled wireless and IPTV products and ultra-high definition broadcasting services for smart televisions. In the Korean pay TV market, analog cable broadcasting is increasingly being replaced with digital broadcasting and IPTV is the fastest growing digital broadcasting platform. While it is currently expected that there will be a decline in the number of subscribers switching from cable TV to IPTV, the Company believes that it will need to aggressively increase its subscriber base by providing differentiated services on its IPTV platform. In addition, with the maturity of the residential market and the changing trends of broadcasting consumption towards mobile platforms, the Company believes that giga and ultra-high definition broadcasting services and mobile media services will be important competitive factors. In the future, the Company believes that there will be rapid evolution towards a broadband network stemming from increased demand for giga and ultra-high definition broadcasting services and cloud services and the government is likely to promote the development of the next-generation ICT industry through various policies and regulations.

C. Cyclical Nature and Seasonality

High-speed Internet, fixed-line telephone and IPTV services are mature markets that are comparatively less sensitive to cyclical economic changes as such services have become more of a necessity and the market has matured. The telecommunications services market overall is not expected to be particularly affected by economic downturns due to the low income elasticity of demand for telecommunication services.

Set forth below is the historical market share of the Company.

Classification	(Unit: in percentages)		
	As of September 30, 2016	As of December 31, 2015	2014
High-speed Internet (including resales)	25.4	25.1	25.1

* With respect to Internet telephone, the market share was calculated based on market shares among the Company, KT and LG U+ and is based on the number of IP phone subscribers.

* The number of IPTV subscribers was taken from data announced by the MSIP on May 18, 2016, and the IPTV market shares as of December 31, 2015, and September 30, 2016, was calculated using the average number of subscribers for the last six months of 2015.

D. Business Overview and Competitive Strengths

In 1999, the Company was the first in the world to commence commercial ADSL services. On the back of its premium technology and enhanced competitiveness achieved through bundled products, it is currently expanding

subscriber base across all of its businesses, including broadband Internet, telephone and IPTV. In particular, SK Broadband has positioned itself to focus on corporate customer services and IPTV services as key strategic areas for mid- to long-term growth, exploiting opportunities in new ICT-based businesses that have led to revenue growth, and providing differentiated contents in its IPTV business by securing popular programming which includes exclusive children's channels and live broadcasts of Major League Baseball games. In addition, the Company has reinforced its leadership in the ultra-high definition broadcasting market by launching ultra-high definition services that require no set-top boxes in April 2014 and by commercializing ultra-high definition set-top boxes for the first time in Korea in September 2014. Furthermore, the Company was the first in the industry to adopt solutions to upgrade full high definition to ultra-high definition, and the Company also strengthened the line-up of ultra-high definition contents by securing access to diverse contents provided by Sony and NBC Universal. Moreover, the Company provides the greatest number of channels in full high definition in the IPTV market due to its recent upgrade of all 130 live high definition channels to full high definition. The Company has also been selected by the government as the lead trial operator of gigabit (GiGA) Internet service to promote the discovery of new technologies and services related to the expansion of GiGA coverage within the hybrid fiber-coaxial network and provide GiGA Wi-Fi and other services. Furthermore, the Company has solidified its technological leadership by setting a worldwide precedent for providing super 8K ultra-high definition broadcasting service, which has resolution four times as high as the pre-existing 4K ultra-high definition broadcasting service in the IPTV industry.

Table of Contents

SK Telink, a provider of international telecommunications service, has been able to establish itself as a market leader as a result of its affordable pricing, proactive marketing and the quality of its services. It launched a mobile phone-based international calling service under the brand name 00700 in 1998, creating a new niche market within the long-distance telephony market that was otherwise dominated by existing service providers. In 2003, SK Telink was designated a common carrier for international calling services, which allowed the Company to expand its international calling services to fixed-line international calling services. In 2005, SK Telink obtained a license to operate VoIP services and local calling value-added services to develop into a versatile fixed-line telecommunications service provider. SK Telink plans to strategically target the convergence of wireless and fixed-line telecommunications and strengthen its existing business, including international and long-distance calling services, value-added services for local calling and B2B services, and video conference call services while aiming to satisfy the diverse needs of customers by providing quality solutions at reasonable prices.

[Other Business]

A. Industry Characteristics

As the number of smartphones distributed in Korea exceeds 40 million, the growth in various mobile devices has spurred the rise of the service provider with a strong platform business as the leader in the ICT market. It is becoming increasingly important to enhance competitiveness by building a platform with large data capacity to handle the increase in data transmission.

A platform business acts as an intermediary by promoting interactions among various customer groups, thereby generating new values. It is important for a platform business to continually attract subscribers and users and to create an ecosystem with certain lock-in effects. A platform can exist in various forms, including as a technological standard (iOS, Android OS), a subscriber-based service platform (Facebook, Twitter) or a marketplace (Amazon, Onestore). Platform businesses are evolving and expanding globally.

In order to move beyond the saturated wireless telecommunications market and plan for new future opportunities, the Company is aiming to transform itself into a next-generation platform service provider. The Company plans to actively develop a portfolio of services on its growth platforms using its leading position in the ICT business as a foundation to overcome boundaries between industries. In particular, the Company intends to maximize synergies between various business areas and overcome the limitations on growth in the wireless telecommunications market through its three growth platforms, comprising its Internet of Things (IoT) solutions platform, lifestyle enhancement platform and advanced media platform. The Company intends to expand its competitive strengths in the residential market, based on its media offerings through its advanced media platform, to also develop its IoT solutions and lifestyle enhancement platforms. The Company also intends to continue to seek business opportunities for its growth businesses such as its healthcare and B2B solutions businesses and integrate them with its growth platforms.

A platform business has strong growth potential due to its connectivity with related services and ease of global expansion. Apple became a world-leading smartphone producer based on its innovative design and the competitive strength of its App Store platform. Google has created a new ecosystem of long-tail advertising by attracting millions of third parties to its advertising platform, as well as showing strong growth in mobile markets with its competitive platform based on Android OS. It is becoming increasingly important to enhance competitiveness through a database that can register and analyze purchase patterns of customers across all areas and a platform with large data capacity with which to utilize this database and provide differentiated services to customers.

B. Growth Potential

The scope and value generated by the platform business, including application and content marketplaces and N-screen services, continue to increase as smartphones and tablet computers become more popular and the bandwidth and speed of network infrastructure improve. As the wireless network evolves to LTE, business opportunities for the platform business exist, including multimedia streaming, N-screen service based on cloud technology and high-definition location-based services. Since the platform business realizes profit by connecting with advertisements or commerce sites after building a critical mass of subscribers and traffic, the recent growth in the advertising and commerce markets is expected to present an opportunity for platform businesses. The importance of building a platform with large data capacity that is connected to various digital contents and commerce is expected to increase in the future.

Table of Contents

C. Domestic and Overseas Market Conditions

(1) Commerce markets

The Company expects that online/mobile commerce markets will continue to grow due to the growth potential of the Internet shopping population, the strengthening of online business models by off-line operators, and the rapid rise of mobile commerce. Recently, due to the widespread use of smartphones and social media, the commercialization of location-based services and the development of big data technology, online to offline (or, O2O) business, which is a concept of attracting customers to offline stores using online and mobile environments, is being highlighted as a new field in the online commerce market industry.

(2) Digital contents

The growth of application marketplaces, which started with Apple's App Store, provides the platform business with new opportunities for revenue generation. The competitive paradigm is shifting from a competition among platform operators toward a competition among eco-systems that include application developers as well as platform operators.

(3) Media

Due to an increase in the number of devices owned by each user and an increase in network speed, each user can now enjoy music or video files anywhere and anytime by storing them in cloud servers, called N-screen service. Users can recommend music to other users through social networking services and this is expected to become a distribution model for digital media contents. Various service providers are competing in this market expecting a strong growth in the online and mobile video market.

D. Business Overview and Competitive Strengths

The Company plans to expand its platform ecosystem in operating its commerce business which includes marketplace and O2O businesses, such as 11th Street, Syrup and OK Cashbag, thereby ultimately increasing its enterprise value.

(1) Commerce business

11th Street, an online marketplace, has continued its growth through effective marketing and customer satisfaction. Despite its later entry into the online commerce market (launched in 2008) which was already divided between Auction and G-Market, it is leading the domestic e-commerce market. Furthermore, 11th Street has established itself as the domestic market leader in mobile commerce, following its successful entry into and rapid growth in this market. Growth plans involving overseas joint ventures based on 11th Street's business expertise have resulted in the successful launch of an open online commerce market in Turkey in partnership with Doğuş Group in March 2013. In Indonesia, an open market service was launched in March 2014 through collaboration with PT XL Axiata Tbk, a wireless telecommunications company in Indonesia. In October 2014, SK Planet and Celcom Axiata Berhad, which is a leading telecommunications service provider in Malaysia, established a joint venture, Celcom Planet, and launched online commerce services tailored to the Malaysian market in April 2015. 11th Street is not only actively engaged in operating such business in Malaysia, but is also preparing to launch its service in Thailand.

Syrup is a consumer-oriented commerce service with the goal of minimizing its customers' time and efforts while maximizing the economic benefits by providing information about coupons and events based on time, place and occasion. To achieve this goal, Syrup combines location-based services, such as geo-fencing, a virtual perimeter technology using a global positioning system (or, GPS) and Bluetooth Low Energy (or, BLE), with big data analysis

of consumption patterns. Syrup's business partners can benefit from cost-effective marketing through Syrup by utilizing statistics and analysis regarding consumers' frequency of visits, preferred products, and consumption patterns. Furthermore, Syrup is strengthening its market power and competitiveness through the continual release of vertical products such as Syrup Pay and Syrup Table and the expansion of Merchant.

OK Cashbag is a point-based loyalty marketing program which has grown to become a global top-tier loyalty marketing program since its inception in 1999. Customers have access to increased benefits through accumulation of loyalty reward points and partner companies use OK Cashbag as a marketing resource. As Korea's largest loyalty mileage program, OK Cashbag maintains a leading position in the industry. The Company is continuing to develop its service in light of market conditions and customers' needs to enhance its customers' perception of point value and is reviewing and pursuing various plans to develop OK Cashbag into a service that goes beyond a mileage program that leverages the key competitiveness of OK Cashbag such as its platform and partnership network.

(2) Location-based services

T-Map Navigation provides map, local information, real-time traffic information and navigation services. T-Map Navigation is one of the leading location-based service platforms in Korea. By entering the Online to Offline service area with T map Taxi, T map Public Transportation and others, the Company is expanding its mobile platform foundation that connects day to day life. The Company is also providing infotainment systems to commercial vehicle businesses as well as providing localized content on its products, such as region-specific information and advertisements. The Company plans to further develop the T-Map Navigation platform by initiating open application programming interface-based services, providing services to more diverse types of devices and providing local area-based services.

(3) Digital contents

Onestore, an application platform launched in 2016 through a joint venture between SK Telecom, KT, LG U+ and Naver's app store, plans to widen its services to tablets and navigation devices. The Company intends to further develop Onestore into a personalized gateway and mobile playground through expansion of the scope of serviceable devices, reinforcement of digital content offerings and enhancement of search services, among other things.

(4) Social networking services (SNS) and Internet portal services

The Company's instant messenger service, Nate-On, had a market share of 20.7% in the instant messenger market in Korea with 3.2 million net users during the month of September 2016. The Company's Internet search portal service, Nate, had a page-view market share of 3.9% as of September 30, 2016. (Source: Korean Click, based on fixed-line access)

(3) Policies for Allowance for Doubtful Accounts

The Company establishes allowances for doubtful accounts based on the likelihood of recoverability of trade and other receivables based on their aging at the end of the period and past customer default experience for the past two years. With respect to trade receivables relating to wireless telecommunications services, the Company considers the likelihood of recovery based on past customer default experience and the length of default in connection with the type of default (e.g., whether the customer's service has been terminated or is continued). For such trade receivables that have been overdue for more than two years after the customer's service has been terminated, the Company records an allowance of 100% of such receivables. For such trade receivables that have been overdue for less than two years after the customer's service has been terminated or relates to a customer that is continuing his service, the Company records an allowance of a certain percentage of such receivable. Consistent with customary practice, the Company writes off trade and other receivables for which the prescription period has passed or that are determined to be impossible or economically too costly to collect, including receivables that are less than Won 200,000 and more than six months overdue and receivables that have been determined to be the subject of identity theft.

[SK Telecom]

On July 4, 2012, the Fair Trade Commission issued correctional orders and imposed fines on the Company and seven affiliated companies for alleged unfair advantage provided to SK C&C, an affiliated company, in services fees for information technology system management and operation. The Company and SK Planet were imposed fines of Won 25,042 million and Won 1,349 million, respectively. The Company and the seven affiliated companies appealed the orders and on May 14, 2014, won the suit at the Seoul High Court. The Fair Trade Commission appealed the decision, and on March 10, 2016, the Supreme Court of Korea ruled in favor of the Company.

On December 27, 2013, the Korea Communications Commission imposed on the Company a fine of Won 56.0 billion and issued a correctional order for providing discriminatory subsidies to subscribers. The Company paid the fine and completed the improvement of the procedures and reported to the Korea Communications Commission on the implementation of actions pursuant to the correctional order by January 2014.

On March 7, 2014, the MSIP imposed a suspension of operations for 45 days for failure to observe the order of the Korea Communications Commission to cease providing discriminatory subsidies to subscribers. The Company suspended its operations during the period between April 5, 2014 and May 19, 2014, and reported to the MSIP on the implementation of actions pursuant to the suspension order by May 2014.

On March 13, 2014, the Korea Communications Commission imposed on the Company a fine of Won 16.65 billion, imposed a suspension on acquiring new customers for 7 days, and issued a correctional order for providing discriminatory subsidies to subscribers. In April 2014, the Company paid the fine and completed the improvement of the procedures and reported to the Korea Communications Commission on the implementation of actions pursuant to the correctional order by April 2014. The Company suspended acquisition of new customers during the period beginning September 11, 2014 and ending September 17, 2014, and reported to the Korea Communications Commission on the implementation of actions pursuant to the correctional order by September 2014.

On January 31, 2013, the Seoul Central District Court acquitted Mr. Jae Won Chey, the Company's former director and vice chairman, on all charges against him. On September 27, 2013, the Seoul High Court reversed the acquittal of the above-mentioned former director, sentencing him to a prison term of three and a half years for violating the Act on the Aggravated Punishment, etc. of Specific Economic Crimes. On February 27, 2014, the Supreme Court of Korea affirmed the Seoul High Court's decision. While the court's final decision on the appealed case is not expected to have a material effect on the Company's financial position, investors should note that it is difficult to predict, among others, the market's assessment of such case.

On August 21, 2014, the Korea Communications Commission imposed on the Company a fine of Won 37.1 billion and issued a correctional order for providing discriminatory subsidies to subscribers. The Company paid the fine and completed the improvement of the procedures and reported to the Korea Communications Commission on the implementation of actions pursuant to the correctional order by September 2014.

On December 4, 2014, the Korea Communications Commission imposed on the Company a fine of Won 800 million and issued a correctional order for violating the Mobile Device Distribution Improvement Act. The Company paid the fine and completed the improvement of the procedures and reported to the Korea Communications Commission on the implementation of actions pursuant to the correctional order by January 2015.

On March 12, 2015, the Korea Communications Commission imposed on the Company a fine of Won 934 million and issued a correctional order for violating the Mobile Device Distribution Improvement Act with respect to the Company's compensation programs for used handsets. The Company paid the fine and completed the improvement of the procedures and reported to the Korea Communications Commission on the implementation of actions pursuant to the correctional order by April 2015.

Table of Contents

On March 26, 2015, the Korea Communications Commission imposed on the Company a fine of Won 23.5 billion, imposed a suspension on acquiring new customers for seven days, and issued a correctional order for violating the Mobile Device Distribution Improvement Act. The Company paid the fine and implemented the improvement of the procedures and reported to the Korea Communications Commission on the implementation of actions pursuant to the correctional order in May 2015. The suspension on acquiring new customers was implemented from October 1, 2015 to October 7, 2015.

On May 13, 2015, the Korea Communications Commission imposed on the Company a fine of Won 3.56 billion and issued a correctional order for violating its obligations to protect personal information (a fine of Won 360 million imposed for violation of its obligations to protect personal information and Won 3.2 billion imposed for damaging users' interests). The Company paid the fine in July 2015 and reported to the Korea Communications Commission on the implementation of actions pursuant to the correctional order in September 2015. Whether the correctional order on the violation of obligations to protect personal information will be enforced depends on the Court's ruling following the Company's filing of an administrative proceeding to appeal the order on June 24, 2015.

On May 28, 2015, the Korea Communications Commission imposed on the Company a fine of Won 350 million and issued a correctional order for misleading and exaggerated advertisement of bundled media and telecommunications products. The Company paid the fine in August 2015 and reported to the Korea Communications Commission on the implementation of actions pursuant to the correctional order in October 2015.

Independent Auditors' Review Report

Based on a report originally issued in Korean

To The Board of Directors and Shareholders

SK Telecom Co., Ltd.:

Reviewed financial statements

We have reviewed the accompanying condensed separate interim financial statements of SK Telecom Co., Ltd. (the Company), which comprise the condensed separate statement of financial position as of September 30, 2016, the related condensed separate statements of income and comprehensive income for the three and nine-month periods ended September 30, 2016 and 2015, the condensed separate statements of changes in equity and cash flows for the nine-month periods ended September 30, 2016 and 2015, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's responsibility

Management is responsible for the preparation and fair presentation of these condensed separate interim financial statements in accordance with Korean International Financial Reporting Standards (K-IFRS) No.1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed separate interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to issue a report on these condensed separate interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. A review of interim financial statements consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the accompanying condensed separate interim financial statements referred to above are not prepared fairly, in all material respects, in accordance with K-IFRS No.1034, *Interim Financial Reporting*.

Other matters

The separate statement of finance position of the Company as of December 31, 2015, and the related separate statements of income, comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this report, were audited by us in accordance with Korean Standards on Auditing and our report thereon, dated February 23, 2016, expressed an unqualified opinion. The accompanying condensed separate statement of financial position of the Company as of December 31, 2015, presented for comparative purposes, is consistent, in all material respects, with the audited separate financial statements from which it has been derived.

The procedures and practices utilized in the Republic of Korea to review such condensed separate interim financial statements may differ from those generally accepted and applied in other countries.

Treasury stock	10,136,551	12.55
	80,745,711	100.00

2. Basis of Presentation

(1) Statement of compliance

These condensed separate interim financial statements were prepared in accordance with K-IFRS No. 1034, *Interim Financial Reporting*, as part of the period covered by the Company s K-IFRS annual financial statements. Selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since December 31, 2015. These condensed separate interim financial statements do not include all of the disclosures required for full annual financial statements.

These condensed interim financial statements are separate interim financial statements prepared in accordance with K-IFRS No.1027, *Separate Financial Statements*, presented by a parent, an investor with joint control of, of significant influence over, an investee, in which the investments are accounted for at cost.

(2) Use of estimates and judgments

1) Critical judgments, assumptions and estimation uncertainties

The preparation of the condensed separate interim financial statements in conformity with K-IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed separate interim financial statements, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial statements as of and for the year ended December 31, 2015.

2) Fair value measurement

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Company has an established control framework with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the finance executive.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the valuation team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of K-IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or a liability, the Company uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Information about assumptions used for fair value measurements are included in Note 27.

3. Significant Accounting Policies

The accounting policies applied by the Company in these condensed separate interim financial statements are the same as those applied by the Company in its separate financial statements as of and for the year ended December 31, 2015.

- (2) Details of investments in subsidiaries as of September 30, 2016 and December 31, 2015 are as follows, Continued:

(*1) On November 2, 2015, the board of directors of the Company entered into a share purchase agreement to acquire 30%(23,234,060 shares) of the issued and outstanding common shares of CJ Hello Vision Co., Ltd. (CJ Hello Vision) from CJ O Shopping Co., Ltd. (CJ O Shopping) for an aggregate purchase price of ₩500,000 million. The agreement stated government's approval as prerequisite.

On November 2, 2015, the board of directors of SK Broadband Co., Ltd. (SK Broadband), a subsidiary of the Company, approved the merger of SK Broadband into CJ Hello Vision, and then SK Broadband entered into a merger agreement with CJ Hello Vision with government's approval as prerequisite.

After the announcement of disapproval of proposed takeover of CJ Hello Vision by the Fair Trade Commission (FTC) on July 18, 2016, the Company announced the revocation of share purchase agreement to CJ O Shopping while SK Broadband withdrew from merger agreement with CJ Hello vision on July 25, 2016 as execution of the share purchase agreement with CJ O Shopping and merger agreement between SK Broadband and CJ Hello Vision became objectively impossible.

(*2) During the nine-month period ended September 30, 2016, SK techx Co., Ltd. and One Store Co., Ltd. were established by spin-offs of platform service division and T-store service division of SK Planet Co., Ltd. from SK Planet Co., Ltd., respectively. In connection with the spin-offs, the Company exchanged 12,323,905 shares of SK Planet Co., Ltd. for 6,323,905 shares of SK techx Co., Ltd. and 6,000,000 shares of One Store Co., Ltd. The Company additionally acquired 4,409,600 shares of One Store Co., Ltd. for ₩22,048 million by participating in capital increase. The Company has equity interest of 65.5% on One Store Co., Ltd. as a result of unparticipated disproportionate capital increase by One Store Co., Ltd.

(*3) During the nine-month period ended September 30, 2016, the Company acquired Location Based Service(LBS) division and mobile phone verification services business, spun-off from SK Planet Co., Ltd., in order to strengthen the platform business capabilities. Since this is considered a business combination of entities under common control, the Company succeeded the assets and liabilities at the acquiree's carrying amounts and recognized the difference between the carrying amount of 1,547,516 shares of SK Planet Co., Ltd., which were retired, and the net assets acquired in capital surplus and others.

(*4) ₩47,618 million of impairment loss was recognized during the nine-month period ended September 30, 2016.

(*5) The ownership interest changed due to the shares issued to employee stock ownership association by SK Planet Co., Ltd. during the nine-month period ended September 30, 2016.

27. Financial Risk Management

- (1) Financial risk management

The Company is exposed to credit risk, liquidity risk and market risk. Market risk is the risk related to the changes in market prices, such as foreign exchange rates, interest rates and equity prices. The Company implements a risk management system to monitor and manage these specific risks.

The Company's financial assets consist of cash and cash equivalents, financial instruments, available-for-sale financial assets, trade and other receivables. Financial liabilities consist of trade and other payables, borrowings, and debentures.

1) Market risk

(i) Currency risk

Currency risk occurs on forecasted transaction and recognized assets and liabilities which are denominated in a currency other than the functional currency of the Company. The Company manages currency risk by using currency forward, etc., if needed, to hedge currency risk on business transactions.

In addition, the Company has entered into cross currency swaps to hedge against currency risk related to foreign currency borrowings and debentures. (See Note 15)

As of September 30, 2016, effects on income (loss) before income tax as a result of change in exchange rate by 10% are as follows:

(In millions of won)

	If increased by 10%	If decreased by 10%

JPY	74	(74)
Others	153	(153)

₩	8,113	(8,113)
---	-------	---------

(ii) Equity price risk

The Company has equity securities which include listed and non-listed securities for its liquidity management and operating purpose. As of September 30, 2016, available-for-sale equity instruments measured at fair value amounts to ₩715,744 million.

(iii) Interest rate risk

Since the Company's interest bearing assets are mostly fixed-interest bearing assets, the Company's revenue and operating cash flows are not influenced by the changes in market interest rates. However, the Company still has interest rate risk arising from borrowings and debentures.

Accordingly, the Company performs various analysis of interest rate risk to reduce interest rate risk and to optimize its financing. To minimize risks from changes in interest rates, the Company takes various measures such as refinancing, renewal, alternative financing and hedging.

(1) Financial risk management, Continued

1) Market risk, Continued

(iii) Interest rate risk, Continued

The Company's interest rate risk arises from floating-rate borrowings and payables. As of September 30, 2016, floating-rate debentures amount to ₩328,890 million and the Company has entered into interest rate swaps to hedge interest rate risk related to floating-rate borrowings and debentures (See Note 15). Therefore, income before income taxes for the nine-month period ended September 30, 2016 would not have been changed by the interest expense from floating-rate borrowings and debentures.

2) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet his/her contractual obligations. The maximum credit exposure as of September 30, 2016 and December 31, 2015 are as follows:

(In millions of won)

	September 30, 2016	December 31, 2015
Cash and cash equivalents	₩ 326,833	431,636
Financial instruments	116,602	131,562

Financial assets at fair value through profit or loss	6,163	7,073
	₩ 3,343,624	2,762,698

To manage credit risk, the Company evaluates the credit worthiness of each customer or counterparty considering the party's financial information, its own trading records and other factors. Based on such information, the Company establishes credit limits for each customer or counterparty.

For the nine-month period ended September 30, 2016, the Company has no trade and other receivables or loans which have indications of significant impairment loss or are overdue for a prolonged period. As a result, the Company believes that the possibility of default is remote. Also, the Company's credit risk can arise due to transactions with financial institutions related to its cash and cash equivalents, financial instruments and derivatives. To minimize such risk, the Company has a policy to deal only with financial institutions with high credit ratings. The amount of maximum exposure to credit risk of the Company is the carrying amount of financial assets as of September 30, 2016.

(2) Capital management

The Company manages its capital to ensure that it will be able to continue as a business while maximizing the return to shareholders through the optimization of its debt and equity structure. The overall strategy of the Company is the same as that of the Company as of and for the year ended December 31, 2015.

The Company monitors its debt-equity ratio as a capital management indicator. This ratio is calculated as total liabilities divided by total equity; the total liabilities and equity is derived from the financial statements.

(3) Fair value, Continued

Fair value of the financial instruments that are traded in an active market (available-for-sale financial assets, financial liabilities at fair value through profit or loss, etc.) is measured based on the bid price at the end of the reporting date.

The Company uses various valuation methods for determination of fair value of financial instruments that are not traded in an active market. Fair value of available-for-sale securities is determined using the market approach methods and financial assets through profit or loss are measured using the option pricing model. In addition, derivative financial contracts and long-term liabilities are measured using the present value methods. Inputs used to such valuation methods include swap rate, interest rate, and risk premium, and the Company performs valuation using the inputs which are consistent with natures of assets and liabilities measured.

Interest rates used by the Company for the fair value measurement as of September 30, 2016 are as follows:

	Interest rate
Derivative instruments	1.90 ~ 3.44%
Borrowings and debentures	1.55 ~ 1.57%

- 3) There have been no transfers between Level 2 and Level 1 for the nine-month period ended September 30, 2016 and changes of financial assets classified as Level 3 for the nine-month period ended September 30, 2016 are as follows:

Independent Auditors' Review Report

Based on a report originally issued in Korean

To The Board of Directors and Shareholders

SK Telecom Co., Ltd.:

Reviewed financial statements

We have reviewed the accompanying condensed consolidated interim financial statements of SK Telecom Co., Ltd. and its subsidiaries (the Group), which comprise the condensed consolidated statement of financial position as of September 30, 2016, the related condensed consolidated statements of income and comprehensive income for the three and nine-month periods ended September 30, 2016 and 2015, the condensed consolidated statements of changes in equity and cash flows for the nine-month periods ended September 30, 2016 and 2015, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's responsibility

Management is responsible for the preparation and fair presentation of these condensed consolidated interim financial statements in accordance with Korean International Financial Reporting Standards (K-IFRS) No. 1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed consolidated interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to issue a report on these condensed consolidated interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. A review of interim financial statements consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial statements referred to above are not prepared fairly, in all material respects, in accordance with K-IFRS No.1034, *Interim Financial Reporting*.

Other matters

The consolidated statement of financial position of the Group as of December 31, 2015, and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this report, were audited by us in accordance with Korean Standards on Auditing and our report thereon, dated February 23, 2016, expressed an unqualified opinion. The accompanying condensed consolidated statement of financial position of the Group as of December 31, 2015, presented for comparative purposes, is consistent, in all material respects, with the audited consolidated financial statements from which it has been derived.

The procedures and practices utilized in the Republic of Korea to review such condensed consolidated interim financial statements may differ from those generally accepted and applied in other countries.

Notes to the Condensed Consolidated Interim Financial Statements

For the nine-month periods ended September 30, 2016 and 2015

2. Basis of Preparation

(1) Statement of compliance

These condensed consolidated interim financial statements were prepared in accordance with K-IFRS No. 1034, *Interim Financial Reporting*, as part of the period covered by the Group's K-IFRS annual financial statements. Selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since December 31, 2015. These condensed consolidated interim financial statements do not include all of the disclosures required for full annual financial statements.

(2) Use of estimates and judgments

1) Critical judgments, assumptions and estimation uncertainties

The preparation of the condensed consolidated interim financial statements in conformity with K-IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed consolidated interim financial statements, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as of and for the year ended December 31, 2015.

2) Fair value measurement

Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Group has an established control framework with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the finance executive.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the valuation team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of K-IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or a liability, the Group uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

2. Basis of Preparation, Continued

(2) Use of estimates and judgments, Continued

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Information about assumptions used for fair value measurements are included in Note 32.

3. Significant Accounting Policies

The accounting policies applied by the Group in these condensed consolidated interim financial statements are the same as those applied by the Group in its consolidated financial statements as of and for the year ended December 31, 2015.

4. Operating Segments

The Group's operating segments have been determined to be each business unit which provides different services and merchandise. The Group's reportable segments are: 1) cellular services, which include cellular voice service, wireless data service and wireless internet services, and 2) fixed-line telecommunication services, which include telephone services, internet services, and leased line services. The other operating segments, which include the Group's internet portal services and other operations, do not meet the quantitative thresholds separately to be considered reportable segments and are collectively presented as Others.

32. Financial Risk Management

- (1) Financial risk management

The Group is exposed to credit risk, liquidity risk and market risk. Market risk is the risk related to the changes in market prices, such as foreign exchange rates, interest rates and equity prices. The Group implements a risk management system to monitor and manage these specific risks.

The Group's financial assets consist of cash and cash equivalents, financial instruments, financial assets available-for-sale, trade and other receivables. Financial liabilities consist of trade and other payables, borrowings, and debentures.

1) Market risk

(i) Currency risk

Currency risk occurs on forecasted transaction and recognized assets and liabilities which are denominated in a currency other than the functional currency of the Group. The Group manages currency risk by using currency forward, etc. to hedge currency risk on business transactions.

In addition, the Group has entered into cross currency swaps to hedge against currency risk related to foreign currency borrowings and debentures. (See Note 20)

As of September 30, 2016, effects on income before income tax as a result of change in exchange rate by 10% are as follows:

(In millions of won)

		If increased by 10%	If decreased by 10%

(ii) Equity price risk

The Group has equity securities which include listed and non-listed securities for its liquidity management and operating purpose. As of September 30, 2016, available-for-sale equity instruments measured at fair value amount of ₩931,455 million.

(iii) Interest rate risk

Since the Group's interest bearing assets are mostly fixed-interest bearing assets, the Group's revenue and operating cash flows are not influenced by the changes in market interest rates. However, the Group still has interest rate risk arising from borrowings and debentures.

Accordingly, the Group performs various analysis of interest rate risk to reduce interest rate risk and to optimize its financing. To minimize risks from changes in interest rates, the Group takes various measures such as refinancing, renewal, alternative financing and hedging.

(1) Financial risk management, Continued

1) Market risk, Continued

(iii) Interest rate risk, Continued

The Group's interest rate risk arises from floating-rate borrowings and debentures. As of September 30, 2016, floating-rate borrowings and debentures amount to ₩5,299 million and ₩328,890 million respectively, and the Group has entered into interest rate swaps to hedge interest rate risk related to floating-rate debentures (See Note 20). On the other hand, if the interest rate increases (decreases) 1% with all other variables held constant, income before income taxes over the next one year will fluctuate as much as ₩53 million due to the interest expense on floating-rate borrowings that have not entered into an interest rate swap agreement.

2) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet his/her contractual obligations. The maximum credit exposure as of September 30, 2016 and December 31, 2015 are as follows:

(In millions of won)

	September 30, 2016	December 31, 2015
Cash and cash equivalents	₩ 858,971	768,794
Financial instruments	533,883	701,713

Accounts receivable – trade	2,348,286	2,390,110
Loans and receivables	1,955,162	1,102,403
Derivative financial assets	47,660	166,399
	₩ 5,746,892	5,132,849

To manage credit risk, the Group evaluates the credit worthiness of each customer or counterparty considering the party's financial information, its own trading records and other factors. Based on such information, the Group establishes credit limits for each customer or counterparty.

For the nine-month period ended September 30, 2016, the Group has no trade and other receivables or loans which have indications of significant impairment loss or are overdue for a prolonged period. As a result, the Group believes that the possibility of default is remote. Also, the Group's credit risk can arise due to transactions with financial institutions related to its cash and cash equivalents, financial instruments and derivatives. To minimize such risk, the Group has a policy to deal only with financial institutions with high credit ratings. The amount of maximum exposure to credit risk of the Group is the carrying amount of financial assets as of September 30, 2016.

The Group manages its capital to ensure that it will be able to continue as a business while maximizing the return to shareholders through the optimization of its debt and equity structure. The overall strategy of the Group is the same as that of the Group as of and for the year ended December 31, 2015.

The Group monitors its debt-equity ratio as a capital management indicator. This ratio is calculated as total liabilities divided by total equity; the total liabilities and equity is derived from the financial statements.

Debt-equity ratios as of September 30, 2016 and December 31, 2015 are as follows:

The above information does not include fair values of financial assets and liabilities of which fair values have not been measured as carrying amounts are reasonable approximation of fair values.

Available-for-sale financial assets amounting to ₩351,196 million and ₩223,197 million as of September 30, 2016 and December 31, 2015, respectively, are measured at cost in accordance with K-IFRS 1039 since they are considered as equity instruments which do not have quoted price in an active market for the identical instruments (inputs for level 1) and cannot be reliably measured using other valuation methods.

Fair value of the financial instruments that are traded in an active market (available-for-sale financial assets, financial liabilities at fair value through profit or loss, etc.) is measured based on the bid price at the end of the reporting date.

(3) Fair value, Continued

The Group uses various valuation methods for determination of fair value of financial instruments that are not traded in an active market. Fair value of available-for-sale securities is determined using the market approach methods and financial assets through profit or loss are measured using the option pricing model. In addition, derivative financial contracts and long-term liabilities are measured using the present value methods. Inputs used to such valuation methods include swap rate, interest rate, and risk premium, and the Group performs valuation using the inputs which are consistent with natures of assets and liabilities measured.

Interest rates used by the Group for the fair value measurement as of September 30, 2016 are as follows:

	Interest rate
Derivative instruments	1.90 ~ 3.44%
Borrowings and debentures	1.55 ~ 3.48%

- 3) There have been no transfers between Level 2 and Level 1 for the nine-month period ended September 30, 2016 and changes of financial assets classified as Level 3 for the nine-month period ended September 30, 2016 are as follows:
