**Relevant Events**

In August, we agreed to acquire a 100% ownership interest in Oceanic Digital Jamaica, which provides wireless and value added services throughout the island. The completion of the transaction is subject to regulatory approvals and other conditions and is expected to take place in the fourth quarter of 2007.

In October, AMX Peru issued its first corporate bond. It placed with investors bonds in the amount of 125 million Peruvian Soles (approximately 40 million dollars equivalent) at a rate of 6.40% with a 5-year maturity. This was the largest bond issued in the country throughout the year.

Over the last few years we captured a very significant share of the Latin American wireless market. We have been reducing our prices per minute and have generally encouraged greater usage of our wireless services. The position we have attained in Latin America and the healthy economic environment we are encountering in the region provide a solid platform for our continued growth in these markets in the years to come, with revenues expected to be buoyed by strong subscriber and usage growth trends.

América Móvil is already fairly advanced in the process of rolling out its UMTS (3G) services in various Latin American countries. This new technology will allow us to provide a broad array of new services to our clients, including wireless broadband accesses.

The quarter's operating profit was affected by an acceleration of depreciation charges related to the phasing out of TDMA services in some countries. It rose 29.9% year-on-year to 19.7 billion pesos, which brought to 63.6 billion pesos the total for the first nine months of the year. This figure was up 48.5% in annual terms.

We obtained a comprehensive financing income of 183 million pesos in the quarter and 454 million pesos in the first nine months of the year, as foreign exchange gains and the inflationary benefit from our net debt position more than offset net interest payments. Pursuant to guidelines under Mexican GAAP that took effect this year, América Móvil has moved to capitalize as investment a portion of its financial charges.

Our net profit for the quarter was 11.1 billion pesos and 42.1 billion pesos through September, up 26.4% on the previous year. It was equivalent to 32 peso cents per share or 57 dollar cents per ADR. The net profit was affected by the greater depreciation charges mentioned above and other non-cash charges (under other income and expenses) associated with the dismantling of TDMA equipment in some countries.

Our net debt ended September at 69.9 billion pesos, slightly higher than the 69.1 billion pesos level at which it started the year. In the nine months to September América Móvil's cash flow from operations financed for the most part the acquisition of our Puerto Rican subsidiary (24.4 billion pesos), share buybacks and dividend payments in the amount of 14.2 billion pesos and capital expenditures totaling 17.9 billion pesos, all of which represented an aggregate outlay of 56.5 billion pesos.

### **Mexico**

Our Mexican operation gained 1.4 million subscribers in the third quarter. Telcel's subscriber base thus reached 47.5 million, having grown by 4.3 million subscribers in the first nine months of the year. Postpaid subscribers continued to increase more rapidly than prepaids, both quarter-over-quarter and in annual terms.

Driven by service revenues that expanded 2.1% sequentially and 13.8% year-on-year (in constant pesos), Telcel's third quarter revenues reached 31.4 billion pesos, bringing to 91.6 billion pesos the figure for the nine months to September. Usage is in a clear upward trend, with MOUs increasing 10.7% on the quarter and 29.9% relative to a year ago, partly driven by lower prices per minute.

---

EBITDA rose 18.6% with respect to the third quarter of 2006, with the EBITDA margin increasing from 50.7% to 53.4% . Through September our Mexican operation had generated nearly 50 billion pesos in EBITDA, 21.0% more than a year ago.

Claro registered its highest number of third quarter net subscriber additions ever 1.7 million bringing to 4.1 million the additions in the first nine months of the year. These were 16.7% higher than the ones obtained in 2006. At the end of September we had close to 28 million clients, 6.6% more than in the previous quarter and 26.2% more than a year before. It is worth noting that our postpaid subscriber base is growing almost twice as fast as our prepaid one.

Brazil generated revenues of 2.5 billion reais during the quarter, up 4.4% sequentially and 18.9% annually, with service revenues expanding 7.3% quarter-on-quarter and 24.2% annually. In spite of the strong growth of service revenues, ARPU was flat over the quarter given the high number of net subscriber additions in the period. Usage has been increasing at a solid pace, with MOUs rising 11.5% sequentially.

Through September Claro's revenues came in at 7.1 billion reais, after climbing 18.0% year-on-year on the back of service revenues that increased by 22.7%.

At 635 million reais, third quarter EBITDA more than doubled the previous year's, supported by strong service revenue growth and by the expansion of its EBITDA margin, which rose 12.7 percentage points from a year before, to 25.0%. In the first nine months of 2007, Claro generated 1.8 billion reais of EBITDA, which translates into a 25.6% margin, nearly thirteen percentage points higher than a year before. Year-to-September EBITDA was up 138.1% year-on-year.
