## 1. EXECUTIVE SUMMARY

### 1.1 Key information and valuation report conclusions

The valuation of **GVT Participações S.A. ("GVTPar")** and **Global Village Telecom S.A. (GVT or Company)**, whose base date is December 31, 2014, utilized information from the 2012 to 2014 balance sheets as well as strategic projections, complemented by other documents, information and estimates, such as investment, debt, taxes, administrative and commercial expenses, and forecast evolution, provided by the management of **GVT** and **Telefônica Brasil S.A. (Telefônica Brasil)**. The information provided is reasonable and reliable and reflects the best estimate in light of the Company's business plan. Considerations were made about future events, which may be changed, or modifying the conclusions.

This appraisal report is issued in the context of the acquisition, by **Telefônica Brasil**, of all shares issued by **GVTPar**, holder of 99.96% of the shares of **GVT (Operational Company)** and therefore its direct parent. The valuation in this Report was conducted taking into consideration the cash flow generated by **GVT**, and therefore, analyzing **GVTPar** on a consolidated basis. With this in mind, references are made to **GVTPar** interchangeably in relation to **GVTPar** and **GVT** and vice versa. The **GVTPar** is pure holding company, which holds, as its only asset, the investment in **GVT**.

The valuation report performed by Planconsult was not an audit of the information of **GVT**, provided by **GVT** and **Telefônica Brasil**, as **GVT** is a corporation audited by independent auditors.

The information processed did not have its validity and legal effects analyzed by Planconsult, as this analysis is beyond its professional scope.

Planconsult did not analyze the validity and enforceability of the liens or encumbrances on the properties of the Company. However, the figures for liens or encumbrances that we were informed by the Company were considered in our work.

### **Brief Description of Operation**

Pursuant to the press release of September 18, 2014, date on which Vivendi SA, Société d'Investissements et de Gestion 72 SA ("FrHolding72"), Société d'Investissements et de Gestion SAS 108 ("FrHolding108"), **Telefônica Brasil**, Telefónica, S.A. and, as consenting parties, **GVTPar** and **GVT**, signed a Stock Purchase Agreement and Other Covenants (Purchase and Sale Agreement). This Purchase and Sale Agreement has as its object the acquisition of the shares of **GVTPar** (parent company of **GVT**) by **Telefônica Brasil**.

As consideration for the acquisition of the shares of **GVTPar** by **Telefônica Brasil**, the latter will pay part of the price with financial resources and also with shares to be issued by it under the incorporation of shares of **GVTPar** by **Telefônica Brasil**, with the corresponding delivery of common and preferred shares issued by **Telefônica Brasil** for FrHolding108 to replace the **GVTPar** shares, subject to the number of shares negotiated between the parties and set out in the Purchase and Sale Agreement, as follows: (i) the amount of EUR 4.663 billion (four billion, six hundred sixty three million euros) corresponding portion of the price in financial resources that will be paid in cash on the closing date; and (ii) shares of **Telefônica Brasil's** equivalent to 12% of its common shares and 12% of its preferred shares after the merger of **GVTPar** shares, that will be delivered to FrHolding108.

## 1.2 Criteria adopted and main assumptions

This valuation was performed under an operating environment, according to the objective of the Company's bylaws. The Company is engaged in providing telecommunications services, including the transmission of voice, data and information; the sale of equipment and / or telecommunications and electronic accessories; and participation in other companies as a shareholder or member.

The following methods can be used to value a company:

- a) Weighted average price of the shares – not used in this case since **GVT** shares are not traded in a stock exchange or over-the-counter markets, and therefore is not an appropriate basis for the valuation of the company.
- b) Book value - not used in this case since it focuses the enterprise's past performance and does not take into account future projections of potential return of capital to the shareholders.
- c) Multiples of comparative transactions and market - not used in this case since the Company does not have shares traded on the stock exchange. Therefore, it is not possible to establish the relationship of values with other comparable companies.
- d) Net worth at market value – provides a "static picture" and therefore discarded. This methodology considers only the market value of tangible assets and liabilities adjusted to market value, not including therefore fair values of intangible assets, which are present in most of the companies, and therefore not considering the prospect of future profitability of the Company;
- e) Free Cash Flow to Firm (FCFF) - is the used method, and the most appropriate in order to reflect the company's profitability perspective, also taking into account the value of the intangible assets.

The following information was the basis for the Valuation:

Ø Financial Statements and Balance Sheets of 2012 to 2014;

Ø Prospects of development of the Company's target markets, provided by **GVT** and **Telefônica Brasil**;

Ø Company's strategic planning complemented with other information, such as investment, debt, taxes, administrative and commercial expenses, as well as evolution forecast; Ø Discussions with executives of **Telefônica Brasil** regarding the past performance and expectations for the future of **GVT's** business.

**Macroeconomic assumptions of FCFF**

The macroeconomic assumptions used in the projection of Free Cash Flow were prepared jointly by Planconsult and **Telefônica Brasil**, based on public information on the base date of 12/31/2014, and are described below:

|                         | Source  | Unit     | 2015 E  | 2016 E  | 2017 E  | 2018 E  | 2019 E | 2020 E | 2021 E | 2022 E | 2023 E | 2024 E |
|-------------------------|---------|----------|---------|---------|---------|---------|--------|--------|--------|--------|--------|--------|
| <b>Exchange Rate</b>    |         |          |         |         |         |         |        |        |        |        |        |        |
| Average                 | Focus   | R\$/US\$ | 2,71    | 2,76    | 2,79    | 2,86    | 2,74   | 2,78   | 2,88   | 2,97   | 3,07   | 3,17   |

| <b>Interest Rate</b>    |         |          |         |         |         |         |        |        |        |        |        |        |
| SELIC Average           | Focus   | %        | 12,25 % | 11,67 % | 10,83 % | 10,25 % | 9,50 % | 9,50 % | 9,50 % | 9,50 % | 9,50 % | 9,50 % |
| TJPL                    | BNDES   | %        | 5,00 %  | 5,00 %  | 5,00 %  | 5,00 %  | 5,00 % | 5,00 % | 5,00 % | 5,00 % | 5,00 % | 5,00 % |
| <b>GDP</b>              |         |          |         |         |         |         |        |        |        |        |        |        |
| Annual growth rate      | Bacen   | %        | 0,45 %  | 1,75 %  | 2,30 %  | 2,50 %  | 2,50 % | 2,50 % | 2,50 % | 2,50 % | 2,50 % | 2,50 % |

Perpetuity value was adopted in this valuation. The valuation includes the explicit period of cash flow between January 1<sup>st</sup> 2015 and December 31, 2024, and perpetuity the forward.

**Sales Revenue**

Sales revenues of the explicit period of free cash flow were projected based on information provided by the management of **Telefônica Brasil**. This information has reliability / reasonableness in the light of market practices, and all the cities involved in the business have been considered, both those in which **GVT** is present as well as where it could be, divided into 4 categories that guided the projections scenarios: Mature Market (broadband penetration in over 50% of households) with NET (currently main competitor of **Telefônica Brasil**), Mature Market without NET, Not mature with NET and not mature without NET. Each city profile was analyzed considering the operational strategies of **Telefônica Brasil** and **GVT** and certain projections of changes in income over the projected period, based on market behavior and broadband penetration in households in each city. Additionally, Pay-TV revenues, voice and other were projected proportionally to broadband revenue.

A real growth was projected in perpetuity of 1.09% p.y. (Source: Central Bank regarding the average of 10 lower results of GDP growth in the last 20 years).

**Operating Costs**

Operating costs were estimated based on the percentage of Gross Operating Revenue, obtained from the historical data of the 2012 to 2014 income statement, as well as management information provided by

**Telefônica Brasil.**

**Administrative, Commercial, and Other Expenses**

Commercial, general and administrative expenses were determined according to the historical data of the 2012 to 2014 income statements provided by the management of **GVT** and **Telefônica Brasil**.

**Taxes**

i. Sales Taxes

The projections considered the Net Sales Revenue forecast provided by **GVT**, along the explicit period of Cash Flow

ii. Income Tax and Social Contribution

Calculated according to the current rates and legislation.

**Interest and loan amortization**

The interest and loan amortization were considered in accordance with the conditions of each of the operation, both in short and long terms, as reported by **GVT** management.

**Adjustments and Contingencies**

No adjustments or contingencies were considered, given that the valuation of the Company through FCFF (Free Cash Flow to Firm).

**Observations regarding the valuation**

Sale of non-operating assets was not considered in the cash flow, nor any income from subsidiaries or affiliates without profit or little equity.

**1.3 Valuation Method**

Among the several valuation criteria, the one we consider the most appropriate, is the free cash flow, including the purpose of its incorporation to the equity of **Telefônica Brasil**, considering the provisions of Articles 252 and 256 of Law 6404/76, as amended.

#### 1.4 Discount rate

The discount rate was calculated according to the methodology of Weighted Average Cost of Capital –WACC of **Telefônica Brasil**, with appropriate application of CAPM (Capital Asset Pricing Model - Asset Pricing Model).

The WACC used in this valuation is the one of **Telefônica Brasil** since it is the Company that is acquiring **GVT**. The WACC of Telefônica Espanha was not taken into consideration since it includes other businesses in several countries (other than Brazil) and different from those in Brazil.

The adoption of the WACC of **Telefônica Brasil** is justified on the basis that **GVT** is now administered under the policies and guidelines of its purchaser, where the merits and risks of the business will be responsibility of the new Company: **Telefônica Brasil**.

The criteria used in the calculation of WACC take into consideration the market indicator data on the base date of December 31, 2014, considering the capital structure of **Telefônica Brasil**. The indicators used in the WACC calculation are based on historical return of US Treasury securities (20 years) and the S & P, beta of comparable companies in the industry, the Country Risk (Brazil) and the inflation differential between these countries. As a result, the WACC considered in this valuation is 12.535% (nominal fee).

#### 1.5 Value and Valuation methodology

The result of this valuation was based on the future profitability criteria, according to the discounted cash flow methodology, which set a value of R\$ 26.4 billion, as below indicated:

| Description  | Result of the Free<br>Cash Flow to Firm -<br>FCFF |
|--|---|
| Discount Rate (WACC)                                 | 12,535%   |
| Real growth rate in Perpetuity                       | 1,090%  |
| Value of the explicit forecast period (R\$ thousand) | 8.167.234,8                                       |
| Value of the Perpetuity (R\$ thousand)               | 18.249.876,6                                      |
| <b>ENTERPRISE VALUE (R\$ Thousand)</b>               | <b>26.417.111,4</b>                               |

In order to comply with article 256 of Law 6404/76, a range between R\$ 24.7 billion and R\$ 28.3 billion was established, supported by the sensitivity analysis that considered the WACC and growth of perpetuity, as below indicated:

| <b>Description</b>                                   | <b>Minimum Value</b> | <b>Maximum Value</b> |
|--|----------------------|----------------------|
| Discount Rate (WACC)                                 | 12.735%              | 12.335%              |
| Real growth rate in Perpetuity                       | 0.590%               | 1.590%               |
| Value of the explicit forecast period (R\$ thousand) | 8,092,090            | 8,243,427            |
| Value of the Perpetuity (R\$ thousand)               | 16,653,608           | 20,108,238           |
| <b>ENTERPRISE VALUE (R\$ Thousand)</b>               | <b>24,745,697</b>    | <b>28,351,665</b>    |

## 2. GOAL

PLANCONSULT Planejamento e Consultoria Ltda (Planconsult) was hired by **Telefônica Brasil** to establish the value of the shares of **GVT**, for their economic value, on the base date of December 31, 2014, for the purpose of its incorporation to the equity of **Telefônica Brasil**. According to Article 256 -Paragraph 1, in conjunction with Article 8 of Law 6404/76, as amended, this valuation will also serve as a basis for (i) approval of the acquisition of **GVTPar** by the General Meeting of **Telefônica Brasil** pursuant to Article 256 of Law 6404/76, as amended; and (ii) determining the value of the capital increase of **Telefônica Brasil** to be formalized due to the merger of **GVTPar** by **Telefônica Brasil** under Article 252 of Law 6404/76, as amended.

It is important to mention that the valuation in this Report was conducted taking into consideration the cash flow generated by **GVT**, the operating Company. **GVTPar**, is a pure holding company, which holds the investment in **GVT** as its only asset,. With this in mind, references are made to **GVTPar** interchangeably in relation to **GVTPar** and **GVT** and vice versa.

The valuation was conducted based on the future profitability criteria, using the method of discounted cash flow to present value, using as discount rate WACC (Weighted Average Cost of Capital) which includes the determination of the Company's Total Value - FCFE (Free Cash Flow to Firm).

## 3. INFORMATION ABOUT THE APPRAISAL COMPANY

### 3.1 Institution responsible for the appraisal report

Planconsult specialized in the Appraisal of companies and fixed assets, is a market leader in large companies appraisal, focusing on medium and large size customers,. To this effect, we have been successful for over 39 years.

The internal process of review and approval of the work herein presented was performed by a committee of analysts, managers and members of Planconsult, as well as consultants to the Company, with academic and professional background in the areas of business administration, economics, engineering and accounting. This committee approved the report from the exhibition held by analysts, managers and the managing partner responsible for preparing the work.

**3.3 Identification and Qualification of the professionals responsible for this Valuation Report**

### 3.4 Disclaimer

This Economic-Financial Valuation Report has been prepared by Planconsult based on the information provided by the management of **GVT** and **Telefônica Brasil**, including accounting and financial statements of the company as of 12/31/2014. Planconsult has taken precaution and acted on a highly diligent basis in order to request that information provided by the Company was true and consistent. Notwithstanding the foregoing, it may not warrant that such information is correct and complete. Also public information was considered, such as interest rates, macroeconomic assumptions, growth projections of the company, etc.

Planconsult has not carried out any legal, accounting or other audit processes nor has independently investigated the information made available for purposes of preparing the Economic-Financial Valuation Report. Accordingly, impacts of any other audit or investigation process were not taken into consideration and Planconsult does not undertake any responsibility for the truthfulness, accuracy or extent of the information obtained. Planconsult was assured by the Company that all information provided is complete, correct and sufficient, provided that all the information was prepared in a reasonable manner and that reflect the best estimates and valuations at the time they were made, and the best judgment of the administration of the Company about its future financial performance

### 3.5 Commercial or credit information that may impact the valuation report

Forward-looking considerations were made, which may be subject to changes, thus modifying the work conclusions. It may not be guaranteed that any of the assumptions, estimates, projections, partial or total results or conclusions used or presented in this Economic-Financial Valuation Report are or may be actually achieved, either fully or partially. The final results may differ from the projections, which may be material. The final results may be also impacted, among other factors, by market conditions. Therefore, no guarantee may be provided by Planconsult as for projections contained in this document being realized or not, especially those occurrence of which depends on future and uncertain events. These considerations about future events, reflect the best estimate on the elements present.

The processed information was not analyzed by Planconsult as to its validity and legal effectiveness, since such analysis is beyond its professional scope. The validity and enforceability of the liens or encumbrances over the Company's properties have also not been analyzed.

Therefore, Planconsult does not undertake any liability for legal, engineering or finance issues, other than those implicit in the exercise of its specific duties in the case, as primarily set forth in Brazilian laws, codes or regulations.

The companies staff has not, in any way, directed, prevented or acted in any way which could have impaired the access, use or knowledge of the information material for the quality of the work, having declared that all the documents and/or other information available for the valuation and quality of the respective conclusions were provided to Planconsult.

It must be pointed out that all the amounts considered in this work were recorded on a uniform basis as cash values, at the base date of December 31, 2014.

### 3.6 Absence of conflict of interest

Planconsult as well as their partners, directors and employees have no direct or indirect interest in **GVT** or **Telefônica Brasil**, in relation to the subject involved in this Valuation Report nor receive any advantage, without any conflict or pooling of interests, current or potential, that prevents them from preparing this report, including but not limited to, for example, **GVT** and **Telefônica Brasil** controllers.

To our best knowledge,, the analyzes, opinions and conclusions expressed in this Valuation Report are based on true and correct data, research and surveys.

The Valuation Report presents all the restrictive conditions imposed by the adopted methodologies, which affect the analyzes, opinions and conclusions contained therein.

Planconsult professional fees are not, in any way, subject to the conclusions of this Valuation Report.

For the Valuation Report preparation, Planconsult used information and audited unaudited data by third parties, provided in writing or verbally by the company management, or obtained from the sources mentioned.

Planconsult assumed as true information and management data supplied by **GVT** and **Telefônica Brasil** and has no responsibility regarding its accuracy and completeness.

In the present valuation was adopted value in perpetuity. This valuation comprehends the explicit cash flow period between Jan 1st, 2015 and dec 31th, 2024, and later perpetuity.

**4.5 Relevant investment projects that have been considered in the valuation, indicating the amounts involved and the financial impact**

Investments in **GVT** were estimated based on historical CAPEX for Net Revenue and inflation, projected over the period.

**5. COMPANY'S VALUE BY DIFFERENT CRITERIA**

Traditional methodologies used in business valuation are explained below, including an explanation when they are used or not.

a) Weighted average price of the shares – not used in this case since **GVT** shares are not traded in a stock exchange or over-the-counter markets, and therefore is not an appropriate basis for the valuation of the company.

b) Book value - not used in this case since it focuses the enterprise's past performance and does not take into account future projections of potential return of capital to the shareholders.

c) Multiples of comparative transactions and market - not used in this case since the Company does not have shares traded on the stock exchange. Therefore, it is not possible to establish the relationship of values with other comparable companies.

d) Net worth at market value - a "static picture" and therefore discarded. This methodology only considers the market value of tangible assets and liabilities adjusted to market value, not including therefore fair values of intangible assets, which are present in most of the companies, and therefore not considering the prospect of future profitability of the company;

e) Free Cash Flow to Firm (FCFF) - is the used method, since it is the most appropriate in order to reflect the company's profitability perspective, and considers the value of the intangible assets.

## 6. METHODOLOGY CONSIDERATIONS

The purpose of this valuation's is to establish the economic value of the **GVT** company, in a DCF basis.

The Free Cash Flow to Equity method is used in valuing a Company according to the present value of the cash flow it generates,. The valuation is carried out by analyzing all the income and capital accounts influence the operational results, as well as assets which do not generate cash flows, but have a market value for sale (realization).

After the initial understanding of the business (a stable, cyclic Company with growth potential, useful assets, undergoing a restructuring process, etc.), we considered its historic aspects and a defined scenario, projected the company's growth model (stability, and growth in one, two or more stages) and the variables; sales, costs, new investments required for the expansion and technological adequacy of the business, as well as the operational investments, replacement, and cash recovery from depreciation and amortization, and defined the residual value of the assets, as applicable.

The overall business risk is determined as per the business nature risk, its stage of development or maturation, the competing conditions arising out of the industry structure (oligopoly or competitive scenario), and the globalization. We have further considered the interest rate free of risk in the economy. In general, the discount rate reflects expectancy based on similar investment opportunities at the present time.

Throughout the appraisal process, we took into consideration the existence of eventual non-operational assets and their realization, as well as the existence of cash surplus at the initial date of the project, as well as the residual value of the assets, if applicable.

The period during which cash generation is computed is, in general, such time as is consistent with the life of the assets and the technical and marketing feasibility of the Company.

We developed the valuation process with the identification of the business model and the Company's market position, considering, whenever possible, the current stage of adjustment of the Company to the globalization process, in particular as far as it refers to price, costs and standard of products and services.

Two aspects of this method deserve special attention: the Time Frame of the Free Cash Flow and the discount rate, which reflects Capital Cost. As for the Time Frame of the cash flow, the appraisal of the Company was carried out in two different periods, during and after a certain explicit forecasting period. Therefore, we have:

Present value of the Free Cash Flow (FCF) during the explicit period: is the present value resulting from the operating cash flows during a certain period of time that is feasible for projections, according to the type of activity of the Company.

Perpetual value: also defined as residual value or terminal value, is the value for the period after the last year of the explicit period. It is calculated as from the FCF result for the period subsequent to the last projection period, divided by the discount rate adopted, deducted from the perpetual growth rate, that is:

$$\text{Residual Value} = \frac{\text{Net Result of last year's explicit forecasting period (n+1)}}{(\text{Discount rate}) - (\text{perpetual growth rate})}$$

Where:

n is the number of forecasting periods.

The discount rate of the Free Cash Flow (FCF) is the Weighted Average Cost of Capital, as defined by the WACC methodology, shown in the item 7.2 below.

All the cash flow elements must be discounted to their present values and, in totaling these results, their net present value is achieved, which reflects the market value of the Company, pursuant to the method of the Free Cash Flow to Firm, discounted at present value.

The present value concept includes the notion of the opportunity cost of capital. The discount rate reflects the return that the shareholders of the Company are able to obtain on the market, on an investment with a similar profile.

Important Notes:

a) In the present valuation, a value in perpetuity was adopted. This valuation comprehends the explicit cash flow period between Jan 1st, 2015 and dec 31th, 2024, and perpetuity, thereafter.

**b) All projections are based on nominal values (R\$), therefore contemplate inflation.**

## 7. CASH FLOW ASSUMPTIONS

The information used to value **GVT** was based on information such as audited balance sheet of 2012-2013 (Jan. through Dec.) and non-audited balance sheet of 2014, strategic projections, investments, loans, taxes, administrative and business expenses, all provided by **GVT** and **Telefônica Brasil**.

The operational assumptions used in the projection of the cash flow of the Company are presented as follow:

### 7.1 Time Frame

The Discounted Cash Flow is forecasted for an explicit period of **10 years** (jan2015-dec/2024)

### 7.2 Discount Rate

To discount the free cash flow to firm (FCFF), it was estimated a discount rate of 12.535% according to the standard methodology of Weighted Average Cost of Capital (WACC), which is represented by:

where:

- WACC - Weighted Average Cost of Capital;
- Ke: Cost of Equity;
- Kd: Cost of Debt;
- T: Income Tax Rate;
- E: Shareholder's Equity;
- D: Net Debt.

All data for the calculation of the discount rate were provided by **Telefônica Brasil** administrators.

### 7.3 Sales revenues

As previously mentioned, the main assumptions of **GVT**'s revenue projection for the period jan/2015-dec/2024 are sustained in historical data and strategic actions of the Company, as well as market forecasts provided by the management of **Telefônica Brasil** (information at their degree of reliability / reasonableness in the light of market practices), represented by the graphs below:

### 7.4 Operational Expenses

Operational expenses were estimated based on the percentage of Gross Operating Revenue, obtained from the historical data of the 2012 to 2014 income statement, provided by the management of **GVT** and market forecasts provided by the management of **Telefônica Brasil**.

### 7.5 Administrative, Selling and Other Expenses

Commercial, general and administrative expenses were determined according to the historical data of the 2012 to 2014 income statement, provided by the management of **GVT** and market forecasts provided by the management of **Telefônica Brasil**.

### 7.6 Depreciation and amortization a) Historical

Calculated resulting from the balance to depreciate on December 31, 2014, according to each relevant fixed assets accounts.

## b) Investments

Investments are also depreciated linearly from the year of its implementation, in accordance with the relevant rates for each fixed assets account.

### 7.7 Interest and loans amortization

Interest and loan amortization were considered in accordance with the conditions of each of the operations, both short and long terms, as reported by **GVT** management.

### 7.8 Investments

Investments in **GVT** were estimated based on historical CAPEX for Net Revenue and inflation, projected over the explicit period.

### 7.9 Taxes

**Sales taxes:** The projections were considered from the Net Sales Revenue forecast by **GVT**, along the explicit period of Cash Flow

**Income Taxes and Social Contribution:** Calculated according to the current legislation rates.

### 7.10 Working Capital Variation

The changes in working capital requirement were calculated based on the effective maturities of the historical operating assets and liabilities of **GVT**, applied in proportion to the amounts of net income projected over the explicit period of the cash flow.

### 7.11 Sinergies

The synergies that **GVT** brings to the operation of **Telefônica Brasil** were considered.

### 7.12 Notes regarding the valuation

The sale of non-operating assets was not considered in the cash flow, nor any income of cash from subsidiaries or affiliates without profit or little equity.

### **7.13 Subsequent Events**

This valuation does not reflect events occurring after the closing date of this report. No relevant facts which have occurred between the base date of the valuation and the closing date of this report were brought to the attention of Planconsult.

Up to the the closing date of this report, Planconsult is unaware of any event that can substantially change the valuation result.

### **7.14 Summary of Operating and Financial Projections**

**8. CONCLUSION**

Therefore, in **Dec/31/2014** the Firm Value attributed to **GVT** was defined, according to assumptions mentioned above, as shown in the Discounted Cash Flows (APPENDIX A).

The result of this valuation was based on the future profitability criteria, with the use of the discounted cash flow methodology, which set a value of R\$ 26.4 billion, as below indicated:

| <b>Description</b>                                   | <b>Result of the Free Cash Flow to Firm - FCFF</b> |
|--|--|
|  | <b>TOTAL VALUE</b>                                 |
|  | <b>FCFF</b>  |
| Discount Rate (WACC)                                 | 12.535%  |
| Real growth rate in Perpetuity                       | 1.090%   |
| Value of the explicit forecast period (R\$ thousand) | 8,167,235  |
| Value of the Perpetuity (R\$ thousand)               | 18,249,877   |
| <b>ENTERPRISE VALUE (R\$ Thousand)</b>               | <b>26,417,111</b>                                  |

In order to comply with article 256 of Law 6404/76, a range between R\$ 24.7 billion and R\$ 28.3 billion was established, supported by the sensitivity analysis that considered the WACC and growth of perpetuity, as below indicated:

| <b>Description</b>                                   | <b>Minimum Value</b> | <b>Maximum Value</b> |
|--|----------------------|----------------------|
| Discount Rate (WACC)                                 | 12.735%              | 12.335%              |
| Real growth rate in Perpetuity                       | 0.590%               | 1.590%               |
| Value of the explicit forecast period (R\$ thousand) | 8,092,090            | 8,243,427            |
| Value of the Perpetuity (R\$ thousand)               | 16,653,608           | 20,108,238           |
| <b>ENTERPRISE VALUE (R\$ Thousand)</b>               | <b>24,745,697</b>    | <b>28,351,665</b>    |

It is important to emphasize that the Company's valuation was based on assumptions defined and informed by **Telefônica Brasil**.
