Adjusted EBITDA, in the amount of R\$ 1,434.6 million, decreased 1.5% when compared to the R\$ 1,456.3 million presented in 3Q17 (R\$ 5,610.3 million in the last 12 months).

2. Gross operating revenue

The gross operating revenue related to sanitation services, in the amount of R\$ 3,331.6 million, which does not consider the construction revenue, increased by R\$ 331.9 million or 11.1%, when compared to R\$ 2,999.7 million in 3Q17.

The main factors that led to the increase were:

- Tariff repositioning index of 7.9% since November 2017; and
- Tariff repositioning index of 3.5% since June 2018.

The increase caused by the above-mentioned factors was partially offset by the higher recognition with allowance for doubtful accounts regarding the wholesale sales in 3Q18, in the amount of R\$ 42.7 million, due to the lower revenue in the period, mainly from the municipality of Guarulhos.

There was no relevant variation in the total billed volume in the related period.

3. Construction revenue

Construction revenue increased by R\$ 11.2 million or 1.6%, when compared to the same period of 2017. The variation is mainly due to the higher investment in the municipalities served by the Company.

In 3Q18, there was an increase of R\$ 68.8 million or 11.0%, due to the following factors:

- Increase of R\$ 61.5 million due to the provision for employees who joined the Knowledge Retention Program (*Programa de Retenção de Conhecimento* - PRC) launched by the Company in 2Q18, aiming to mitigate the impact of the exit of employees who possess strategic knowledge acquired throughout their career, through the transfer of intellectual capital;
- Increase of R\$ 43.7 million in expenses related to health insurance; and
- Increase of R\$ 16.7 million, mainly due to the 1.7% increase related to the Career and Salary Plan (*Plano de Cargos e Salários*) in February 2018, salary increases of 1.3% in May 2018 and the hiring of 675 new employees in 3Q18.

The increases above were partially offset by the reversal of R\$ 56.2 million in the provision for the Provision for Consent Decree (*Termo de Ajuste de Conduta* - TAC), related to the employees who joined the PRC.

5.2. General Materials

Increase of R\$ 21.2 million, or 53.3%, mainly due to the greater use of materials in the maintenance in water and sewage networks and in the maintenance of real estate and facilities, in the amount of R\$ 8.0 million and R\$ 5.9 million, respectively.

5.3. Services

Service expenses in the amount of R\$ 366.5 million increased by R\$ 78.1 million, or 27.1%, compared to the R\$ 288.4 million recorded in 3Q17. The increase in this line was distributed in several items, the main ones were:

- Increased hiring of technical services in 3Q18, in the amount of R\$ 27.9 million, mainly related to: (i) customer service, in the amount of R\$ 3.7 million; and (ii) IT technical support, in the amount of R\$ 3.5 million;
- Greater services execution in maintenance, in the water and sewage systems, in the amount of R\$ 7.8 million;
- Increased surveillance expenses, in the amount of R\$ 6.1 million; and
- Maintenance of properties and facilities, in the amount of R\$ 5.4 million.

5.4. Electricity

Electricity expenses totaled R\$ 241.5 million in 3Q18, an increase of R\$ 37.9 million or 18.6% when compared to the R\$ 203.6 million in 3Q17. This variation was mainly due to:

- Average increase of 10.1% in free market tariffs (*Ambiente de Contratação Livre - ACL*), with a decrease of 1.3% in consumption;
- Average increase of 11.4% in the grid market tariffs (*Tarifas de Uso do Sistema de Distribuição - TUSD*), with a 10.5% increase in consumption; and
- Average increase of 20.4% in regulated market tariffs (*Ambiente de Contratação Regulada - ACR*), with a decrease of 0.9% in consumption.

In 3Q18, ACL represented 34.3% of the total amount of electricity consumed by the Company, TUSD 34.1% and ACR represented 31.6% of this amount.

5.5. General expenses

An increase of R\$ 32.3 million or 17.5%, totaling R\$ 216.7 million in 3Q18, compared to R\$ 184.4 million in 3Q17, mainly due to the following factors:

- Higher expenses related to charging for use of water, in the amount of R\$ 23.0 million, related to an additional payment made to Foundation Agency of Alto Tietê Water Basin (*Fundação Agência Bacia Hidrográfica Alto Tietê - FABHAT*) from 2014 to 2016; due to the signature of a Recognition of Obligations Term (*Termo de Reconhecimento de Obrigações*) between the Company and FABHAT in 3Q18; and
- Higher provision for transfer to the São Paulo Municipal Fund for Environmental Sanitation and Infrastructure (*Fundo Municipal de Saneamento Ambiental e Infraestrutura de São Paulo*), in the amount of R\$ 15.2 million.

The above-mentioned increases were partially offset by the lower provisioning for lawsuits in 3Q18, in the amount of R\$ 8.7 million.

5.6. Depreciation and Amortization

The expenses with depreciation and amortization increased by R\$ 18.0 million or 5.5%, mainly due to the start-up of intangible assets, in the amount of R\$ 3.7 billion.

PAGE: 18 of 86

5.7. Allowance for doubtful accounts

Increase of R\$ 53.7 million, mainly due to:

- Lower recovery of unpaid amounts of R\$ 30.1 million in 3Q18; and
- Increase in delinquency rates, with an impact of R\$ 23.6 million.

6. Other Operating Revenues (Expenses), Net

Increase of R\$ 19.6 million, mainly related to the higher receipt of resources from the Water Basin Decontamination Program (*Programa de Despoluição de Bacias Hidrográficas*) in 3Q18, in the amount of R\$ 12.8 million.

Increase of R\$ 50.6 million, mainly due to the following factors:

- Increase of R\$ 11.8 million in interest and charges on domestic loans and financings, mainly due to the lower capitalized amount to intangible assets in 3Q18 when compared to 3Q17;
- Increase of R\$ 17.0 million in interest and charges on foreign loans and financings, mainly due to the higher outstanding amounts in 3Q18 when compared to 3Q17, resulting from the appreciation of the dollar and yen against the real; and
- Increase of R\$ 15.7 million in other financial expenses, mainly due to: (i) recognition of interest on investment related to the Public-Private Partnership - PPP, in 3Q18, in the amount of R\$ 36.1 million, due to the full startup of the São Lourenço Production System (*Sistema Produtor São Lourenço*) in July 2018; and (ii) lower recognition of interest in lawsuits, in the amount of R\$ 16.8 million.

The effect of net monetary and exchange variations in 3Q18 was R\$ 435.1 million higher than in 3Q17, highlighting the increase of R\$ 444.0 million in exchange variation on loans and financing, due to the appreciation of the dollar and the yen against the real in 3Q18 (3.8% and 1.3%, respectively) when compared to the depreciation occurred in 3Q17 (-4.2% and -4.5%, respectively).

8. Income tax and social contribution

The Company recorded a decrease of R\$ 170.5 million, due to the lower taxable result presented in 3Q18, mainly due to the appreciation of the dollar and yen against the real in 3Q18, when compared to the depreciation in 3Q17.

1 Operations

Companhia de Saneamento Básico do Estado de São Paulo ("SABESP" or the "Company") is a mixed-capital company headquartered in São Paulo, at Rua Costa Carvalho, 300, CEP 05429-900, controlled by the São Paulo State Government. The Company is engaged in the provision of basic and environmental sanitation services in the State of São Paulo, as well as it supplies treated water and sewage services on a wholesale basis.

In addition to providing basic sanitation services in the State of São Paulo, SABESP may perform these activities in other states and countries, and can operate in drainage, urban cleaning, solid waste handling and energy markets. SABESP aims to be a world reference in the provision of sanitation services, in a sustainable, competitive and innovative manner, with a focus on customers.

As of September 30, 2018, the Company operated water and sewage services in 369 municipalities of the State of São Paulo. Most of these municipalities operations are based on 30-year concession, program and services contracts. The Company has two partial contracts with the municipality of Mogi das Cruzes, however, since most of the municipality is serviced by wholesale, it was not included in the 369 municipalities. As of September 30, 2018, the Company had 371 contracts.

SABESP is not temporarily operating in the municipalities of Macatuba and Cajobi due to judicial orders. The lawsuits are in progress and the carrying amount of these municipalities' intangible assets was R\$ 4,345 as of September 30, 2018 (R\$ 4,345 as of December 31, 2017).

As of September 30, 2018, 42 concession agreements (51 as of December 31, 2017) had expired and are being negotiated. From October 1, 2018 to 2030, 31 concession agreements will expire. Management believes that concession agreements expired and not yet renewed will result in new contracts, disregarding the risk of discontinuity in the provision of municipal water supply and sewage services. By September 30, 2018, 298 program and services contracts were signed (287 contracts as of December 31, 2017).

As of September 30, 2018, the carrying amount of the underlying assets used in the 42 concessions of the municipalities under negotiation totaled R\$ 4,827,224, accounting for 13.90% of the total intangible assets, and the related gross revenue for the nine-month period ended September 30, 2018 totaled R\$ 918,677, accounting for 7.72%

of total revenue.

The Company's operations are concentrated in the municipality of São Paulo, which represents 54.86% of the gross revenues on September 30, 2018 (53.64% on September 30, 2017) and 48.24% of intangible assets (46.92% on December 31, 2017).

As of June 23, 2010, the State of São Paulo, the Municipality of São Paulo, the Company and the regulatory agency "Sanitation and Energy Regulatory Agency – ARSESP" signed an agreement to share the responsibility for water supply and sewage services to the Municipality of São Paulo based on a 30-year concession agreement. This agreement is extendable for another 30 years, pursuant to the law. This agreement sets forth SABESP as the exclusive service provider and designates ARSESP as regulator, establishing prices, controlling and monitoring services. On the same date, the State of São Paulo, the Municipality of São Paulo and SABESP signed the "Public service provision agreement of water supply and sewage services", a 30-year concession agreement which is extendable for another 30 years. This agreement involves the following activities:

- i. protection of the sources of water in collaboration with other agencies of the State and the City;
- ii. capture, transport and treatment of water;
- iii. collect, transport, treatment and final dispose of sanitary sewage; and
- iv. adoption of other actions of basic and environmental sanitation.

PAGE: 22 of 86

The Company operates under an authorization by public deed in some municipalities in the Santos coast region and in the Ribeira Valley, where the Company started to operate after the merger of the companies that formed it. In September 2015, the Company entered into a water supply and sewage public utility services agreement with the municipality of Santos; the gross revenue calculated in the nine-month period ended September 30, 2018 totaled R\$ 240,571 (R\$ 251,212 in the nine-month period ended September 30, 2017) and the intangible asset was R\$ 500,965 on September 30, 2018 (R\$ 310,577 on December 31, 2017).

Article 58 of Law 11,445/07 determines that precarious and overdue concessions, as well as those effective for an undetermined period, including those that do not have an instrument formalizing them, will be valid until December 31, 2010. However, Article 2 of Law 12,693 of July 24, 2012, which amended Article 7-A of Law 11,578, of November 26, 2007, allowed the provision of public basic sanitation services to be executed until December 31, 2016. The Company's Management understands that in the municipalities where the concession agreements were not yet renewed, the operation is governed by Laws 8,987/95 and 11,445/07, including those municipalities served without an agreement.

Public deeds are valid and governed by the Brazilian Civil Code.

The Company's shares have been listed in the Novo Mercado segment of B3 under the ticker symbol SBSP3 since April 2002 and on the New York Stock Exchange (NYSE) as American Depositary Receipts ("ADRs") Level III, under the SBS code, since May 2002.

Since 2008, the Company has been setting up partnerships with other companies, which resulted in the following companies: Sesamm, Águas de Andradina, Saneaqua Mairinque, Aquapolo Ambiental, Águas de Castilho, Attend Ambiental and Paulista Geradora de Energia. Although SABESP has no majority interest in the capital stock of these companies, the shareholders' agreements provide for the power of veto and casting vote in certain issues jointly with associates, indicating the shared control in the management of investees.

In March 2018, the Jaguari-Atibainha interconnection was inaugurated; this interconnection allows the transfer of an average annual outflow of 5.13 cubic meters per second (m³/s) and a maximum outflow of 8.5 m³/s from the Paraíba do Sul Basin to the Cantareira System. In April 2018, the São Lourenço Production System was inaugurated and expands water production and capacity by 6.4 m³/s. With the completion of the construction, the Company has nine

large production systems available to supply the São Paulo Metropolitan Region. These two important works aim at expanding water security in the São Paulo Metropolitan Region.

Management expects that with improved water security, due to the works carried out, the generation of operating cash and the credit lines available for investment, the Company will have sufficient funds to meet its commitments and not compromise its necessary investments.

Corporate reorganization

On May 12, 2017, the Board of the State Privatization Program approved:

(i) the conducting of studies for SABESP's Capitalization (as defined below);

(ii) the hiring, by SABESP, of the International Finance Corporation, which is associated with the World Bank;

PAGE: 23 of 86

(iii) the execution of an agreement between SABESP and the State Government through the Water Resources and Sanitation Department and the Treasury Department, in order to define the scope of the contract and control the relationship between the parties, including a proportional expense reimbursement.

The proposed Capitalization provides for the creation of a corporation to directly control SABESP through the transfer of the shares held by the São Paulo State to the capital stock of the new corporation. The São Paulo State will continue holding a sufficient number of shares to ensure SABESP's control, as provided for in law. The objective of the Capitalization is to overcome a situation that restricts investments designed to preserve the expansion of activities to ensure the universalization of basic sanitation services offered by the Company.

The Capitalization may provide for the admission of institutional investors to contribute financial resources to the capital stock of the new company, strengthening SABESP's corporate governance and business efficiency in order to promote and accelerate the universalization of sanitation services in the State of São Paulo.

On September 15, 2017, Law 16,525 was sanctioned, enacted and published; it provides for the corporate reorganization of Companhia de Saneamento Básico de São Paulo - SABESP and sets forth other provisions.

The interim financial information was approved by the Board of Directors on November 8, 2018.

3 Summary of significant accounting policies

Except for the amendments introduced by CPC 47/IFRS 15 (Revenue from Contracts with Customers) and CPC 48/IFRS 9 (Financial Instruments) pursuant to the accounting policies described below, the other policies used in the preparation of the interim financial information for the period ended September 30, 2018 are consistent with those used to prepare the Annual Financial Statements for the year ended December 31, 2017:

3.1 Operating income

(a) Revenue from sanitation services

Revenue from water supply and sanitation services are recognized as the water is consumed and services are provided. Revenues, including revenues unbilled, are recognized at the fair value of the consideration received or receivable for the sale of those services. Revenue is shown net of value-added tax, rebates and discounts. Unbilled revenues represent incurred revenues in which the services were provided, but not yet billed until the end of the each period and are recorded as trade receivables based on monthly estimates of the completed services. Concerning revenues of wholesale municipal governments, which do not pay the full invoice, the Company records allowance for doubtful accounts upon invoicing in revenue reduction account.

The Company recognizes revenue when: i) it identifies the contracts with customers; ii) it identifies the different obligations in the contract; iii) it determines the transaction price; iv) it allocates the transaction price to the performance obligations in the contracts; and (v) it satisfies all performance obligations. Amounts in dispute are recognized as revenue when collected.

PAGE: 25 of 86

(b) Construction revenue

Revenue from concession construction contracts is recognized in accordance with ICPC 01 (R1)/IFRIC 12 (Concession Contracts) and CPC 47 (R1)/IFRS 15 (Revenue from Contracts with Customers), as all performance obligations are satisfied over time. During the construction of the contract, an asset is classified as intangible, as the Company estimates that the fair value of its consideration is equivalent to expected construction costs plus margin. The fee represents the additional margin related to the work performed by the Company in relation to such construction contracts and it is added to construction costs, resulting in the construction revenue.

3.2 Financial assets and liabilities**Financial Asset - Classification**

The Company classifies its financial assets according to the following categories: measured at amortized cost, measured at fair value through other comprehensive income and measured at fair value through profit or loss. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of the financial assets at inception. As of September 30, 2018, the Company did not have financial assets classified as fair value through other comprehensive income and fair value through profit or loss.

- Amortized cost

This comprises financial assets that meet the following conditions: (i) it is held within the business model whose objective is to hold financial assets to collect contractual cash flows; and (ii) the contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Presented as current assets, except for those with maturity of more than 12 months after the reporting date (these are classified as noncurrent assets). The Company's financial assets measured at amortized cost include cash and cash

equivalents, restricted cash, balances of trade receivables, accounts receivable from related parties, other receivables, receivables from the Water National Agency – ANA. Financial assets measured at amortized cost are recorded at fair value and subsequently at amortized cost, under the effective interest rate method.

Financial Liabilities - Classification

The Company classifies its financial liabilities measured at amortized cost. Classification depends on the purpose to which the financial liabilities were assumed. This category comprises balances payable to contractors and suppliers, borrowings and financing, services payable, balances payable from public-private partnership (PPP), and program contract commitments.

The effective interest rate method is adopted to calculate the amortized cost of a financial liability and allocate its interest expense under the respective period. The effective interest rate exactly deducts the estimated future cash flows (including fees, transaction costs and other issue costs) throughout the financial liability's estimated life or, when appropriate, during a shorter period, for initial recognition of the net carrying amount.

PAGE: 26 of 86

3.3 Trade receivables and allowance for doubtful accounts

Trade receivables are amounts due from customers for services performed in the ordinary course of business. These are classified as current assets, except when maturity exceeds 12 months after the end of the reporting period. In these cases, they are presented as noncurrent assets.

The Company records allowance for doubtful accounts for receivable balances at an amount that Management considers to be sufficient to cover eventual losses. The analysis is carried out based on objective “accounts receivable” data, past receipts, existing guarantees and expected future losses.

4 Risk management

4.1 Financial Risk Management Financial risk factors

The Company's activities are affected by Brazilian economic scenario, making it exposed to market risk (exchange rate and interest rate), credit risk and liquidity risk. The Company's financial risk management is focused on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

The Company has not utilized derivative instruments in any of the reported periods.

(a) Market risk Foreign currency risk

SABESP's foreign exchange exposure implies market risks associated with currency fluctuations, since the Company has foreign currency-denominated liabilities, mainly US dollar and yen-denominated short and long-term borrowings.

The management of SABESP's foreign currency exposure considers several current and projected economic factors, besides market conditions.

This risk arises from the possibility that the Company may incur in losses due to exchange rate fluctuations that would impact liability balances of foreign currency-denominated borrowings and financing raised in the market and related financial expenses. The Company does not maintain hedge or swap contracts or any derivative financial instrument to hedge against this risk.

PAGE: 27 of 86

A significant amount of the Company's financial debt is indexed to the US dollar and Yen, in the total amount of R\$ 6,961,495 as of September 30, 2018 (R\$ 5,702,375 as of December 31, 2017). Below, the Company's exposure to exchange risk:

Borrowing cost – Yen		(3,084)		(3,100)
Total foreign currency-denominated borrowings (Note 15)		6,934,441		5,672,821

1) The 22.2% increase in foreign-currency denominated debt from December 31, 2017 to September 30, 2018 was mainly due to exchange rate changes, as a result of the 21.0% increase of the US dollar against the Real, from R\$ 3.3080 on December 31, 2017, to R\$ 4.0039 on September 30, 2018, and the 20.0% increase of the Yen versus the Real, from R\$ 0.02940 on December 31, 2017, to R\$ 0.03528 on September 30, 2018.

As of September 30, 2018, if the Brazilian real had depreciated or appreciated by 10 percentage points, in addition to the impacts mentioned above, against the US dollar and Yen with all other variables held constant, the effects on results before taxes on the nine-month period ended September 30, 2018 would have been R\$ 696,150 (R\$ 570,238 for the year ended December 31, 2017), lower or higher, mainly as a result of exchange losses or gains on the translation of foreign currency-denominated loans.

Scenario I below presents the effect in income statements for the next 12 months, considering the projected rates of the US dollar and the Yen. Considering the other variables as remaining constant, the impacts for the next 12 months are shown in scenarios II and III with possible depreciations of 25% and 50%, respectively, in the Brazilian real.

(*) For the probable scenario in US dollar, the exchange rate estimated for September 30, 2019 was used, pursuant to the Focus Report-BACEN of September 30, 2018, while for the Yen, the average exchange rate was considered for the 12-month period after September 30, 2018, according to B3's Reference Rates report of September 30, 2018.

Interest rate risk

This risk arises from the possibility that the Company could incur losses due to fluctuations in interest rates, increasing the financial expenses related to borrowings and financing.

The Company has not entered into any derivative contract to hedge against this risk; however, it continually monitors market interest rates, in order to evaluate the possible need to replace its debt.

PAGE: 29 of 86

The table below provides the Company's borrowings and financing subject to variable interest rate:

	September 30, 2018	December 31, 2017
CDI ⁽ⁱ⁾	1,500,000	1,144,391
TR ⁽ⁱⁱ⁾	1,629,546	1,574,564
IPCA ⁽ⁱⁱⁱ⁾	1,635,360	1,699,747

LIBOR ^(v)	3,518,034	2,814,399

(ii) TR – Interest Benchmark Rate

(iii) IPCA - (*Índice Nacional de Preços ao Consumidor Amplo*), a consumer price index

(iv) TJLP - (*Taxa de Juros a Longo Prazo*), a long-term interest rate index

(v) LIBOR - London Interbank Offered Rate

Another risk to which the Company is exposed, is the mismatch of the monetary restatement indices of its debts with those of its service revenues. Tariff adjustments of services provided by the Company do not necessarily follow the increases in the inflation indexes to adjust loans, financing and interest rates affecting indebtedness.

As of September 30, 2018, if interest rates on borrowings and financing had been 1 percentage point higher or lower with all other variables held constant, the effects on profit before taxes for the nine-month period ended September 30, 2018 would have been R\$ 97,699 (R\$ 87,133 as of December 31, 2017), lower or higher, mainly as a result of lower or higher interest expense on floating rate borrowings and financing.

(b) Credit risk

Credit risk arises from cash and cash equivalents, deposits in banks and financial institutions, as well as credit exposures to wholesale basis and retail customers, including outstanding accounts receivable, restricted cash and accounts receivable from related parties. Credit risk exposure to customers is mitigated by sales to a dispersed base.

The maximum exposures to credit risk as of September 30, 2018 are the carrying amounts of instruments classified as cash equivalents, deposits in banks and financial institutions, restricted cash, trade receivables and accounts receivable from related parties at the reporting period. See additional information in Notes 6, 7, 8 and 9.

Regarding the financial assets held with financial institutions, the credit quality that is not past due or subject to impairment can be assessed by reference to external credit ratings (if available) or to historical information about the bank's default rates. The credit quality of the banks, such as deposits and financial investments, the Company considers the lower rating published by three main international rating agencies (Fitch, Moody's and S&P), according to internal policy of market risk management:

(c) Liquidity risk

The Company's liquidity is primarily reliant upon cash provided by operating activities, loans from Brazilian Federal and State governmental financial institutions, and financing in the local and international capital markets. The liquidity risk management considers the assessment of its liquidity requirements to ensure it has sufficient cash to meet its operating and capital expenditures needs, as well as the payment of debts.

The funds held by the Company are invested in interest-bearing current accounts, time deposits and securities, selecting instruments with appropriate maturity or liquidity sufficient to provide margin as determined by projections mentioned above.

The table below shows the Company's financial liabilities, into relevant maturities, including the installments of principal and future interest to be paid according to the agreement.

(*) The Company also considered future commitments (construction not yet performed) still not recognized in the financial statements related to São Lourenço PPP, due to the relevance of future cash flows, the impacts on its operations and the fact the Company already has formalized this commitment through an agreement signed by the parties.

Future interest

Future interest was calculated based on the contractual clauses for all agreements. For agreements with floating interest rate, the interest rates used correspond to the base dates above.

Cross default

The Company has borrowings and financing agreements including cross default clauses, i.e., the early maturity of any debt, may imply the early maturity of these agreements. The indicators are continuously monitored in order to avoid the execution of these clauses.

(d) Sensitivity analysis on interest rate risk

The table below shows the sensitivity analysis of the financial instruments, prepared in accordance with CVM Rule 475/2008 in order to evidence the balances of main financial assets and liabilities, calculated at a rate projected for the twelve-month period after September 30, 2018, or until the final settlement of each contract, whichever is shorter, considering a probable scenario (scenario I), appreciation of 25% (scenario II) and 50% (scenario III).

The purpose of the sensitivity analysis is to measure the impact of changes in the market over the financial instruments of the Company, considering constant all other variables. In the time of settlement the amounts can be different from those presented, due to the estimates used in the measurement.

4.2 Capital management

The Company's objectives when managing capital are ensure its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

The Company monitors capital based on the leverage ratio. This ratio corresponds to net debt divided by total capital. Net debt corresponds to total borrowings and financing less cash and cash equivalents. Total capital is calculated as total equity as shown in the balance sheet plus net debt.

PAGE: 33 of 86

	September 30, 2018	December 31, 2017
Total borrowings and financing (Note 15)	13,726,968	12,100,966
(-) Cash and cash equivalents (Note 6)	(3,619,253)	(2,283,047)
Net debt	10,107,715	9,817,919
Total equity	18,786,951	17,513,009
Total capital	28,894,666	27,330,928
Leverage ratio	35%	36%

As of September 30, 2018, the leverage ratio fell to 35% on the 36% reported on December 31, 2017, chiefly due to the increase of equity arising from the profit calculated in the nine-month period ended September 30, 2018 and the increase of cash and cash equivalents, mitigated by higher borrowings and financing due to the appreciation of the US dollar and the Yen against the Real.

4.3 Fair value estimates

It is assumed that balances from trade receivables (current) and accounts payable to suppliers by carrying amount, less impairment approximate their fair values, considering the short maturity. Long-term trade receivables also approximate their fair values, as they will be adjusted by inflation and/or will bear contractual interest rates over time.

4.4 Financial instruments

With the changes introduced by CPC 48/IFRS 9 (Financial Instruments), as of September 30, 2018, the Company did not have financial assets classified as fair value through other comprehensive income and fair value through profit or loss. The Company's financial instruments included in the amortized cost category comprise cash and cash equivalents, restricted cash, trade receivables, balances with related parties, other receivables, and balances receivable from the Water National Agency – ANA, accounts payable to contractors and suppliers, borrowings and financing, services payable, balances payable deriving from the Public Private Partnership-PPP and program contract commitments, which are non-derivative financial assets and liabilities with fixed or determinable payments, not quoted in an active

Edgar Filing: COMPANHIA DE SANEAMENTO BASICO DO ESTADO DE SAO PAULO-SABESP - Form 6-K
market.

The estimated fair values of financial instruments are as follows:

	September 30, 2018		December 31, 2017	
	Carrying amount	Fair value	Carrying amount	Fair value

Additionally, SABESP has financial instrument assets receivable from related parties, in the amount of R\$ 827,394 as of September 30, 2018 (R\$ 815,160 as of December 31, 2017), which were calculated in accordance with the conditions negotiated between related parties. Part of this balance, totaling R\$ 732,626 (R\$ 709,208 as of December 31, 2017), refers to reimbursement of additional retirement and pension plan – G0 and is indexed by the IPCA plus simple interest of 0.5% p.m. This interest rate approximates that one practiced by federal government bonds (NTN-b) with terms similar to those of related-party transactions.

Financial Liabilities

	Carrying amount	Fair value	Carrying amount	Fair value

Public-Private Partnership - PPP	3,391,562	3,391,562	3,071,416	3,071,416

The criteria adopted to obtain the fair values of borrowings and financing, in preparing the interim financial information as of September 30, 2018, are consistent with those adopted in the Annual Financial Statements for the fiscal year ended December 31, 2017.

Considering the nature of other financial instruments, assets and liabilities of the Company, the balances recognized in the balance sheet approximate the fair values, taking into account the maturities close to the end of the reporting period, comparison of contractual interest rates with market rates in similar operations at the end of the reporting period, their nature and maturity terms.

5 Key accounting estimates and judgments

Estimates and judgments are continually evaluated and are based on historical experience and on other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The key accounting estimates and judgments are: (i) allowance for doubtful accounts, (ii) intangible assets resulting from concession agreements and program contracts, (iii) pension benefits, (iv) deferred income tax and social contribution, and (v) provisions.

As of September 30, 2018, the average yield of financial investments corresponds to 98.55% of CDI (98.88% as of December 31, 2017).

Should SABESP comply with its monthly obligations with the SPE, the funds from the restricted account will be released.

The guarantee is effective since the beginning of the operation and will be valid until the conclusion, termination, intervention, annulment or caducity of the Administrative Concession, or other extinction events provided for in the Concession Agreement or in the law applicable to administrative concessions, including in the event of bankruptcy or extinction of the SPE.
