Net Mobile Revenues increased 3.0% y-o-y in 4Q18. The performance can be attributed to the growth of Data and Digital Service Revenues (+6.3% y-o-y), higher Handset Revenues (+70.0% y-o-y), related to the strong sales activities in the period, to the upselling to postpaid plans with higher data volume, and higher Interconnection Revenues (+11.2% y-o-y), due to increased incoming off-net traffic. On the other hand, the macroeconomic scenario, the growth of unlimited voice plans, lower interconnection tariffs, the decrease in prepaid revenues and the maturity of services such as Voice and SMS continued to negatively affect the performance of Net Mobile Revenues.

Outgoing Voice Revenues fell 24.5% in comparison to 4Q17, mainly reflecting the migration to the consumption of data services. In addition, the prepaid business continued to be influenced by the lower volume of top-ups in the annual comparison, mainly due to macroeconomic conditions and the migration of customers to hybrid plans.

Interconnection Revenues grew 11.2% over 4Q17, due to increased incoming off-net traffic because of the expansion of unlimited voice plans in the sector, besides interconnection settlements in the period.

Data and Digital Service Revenues grew 6.3% y-o-y in 4Q18, driven by our strategy focused on data. This performance was once again driven by the increase in Digital Service Revenues and the higher adoption of Family Plans. In the quarter, Data and Digital Service Revenues contributed 79.8% to Net Mobile Services Revenues, up 4.7 p.p. y-o-y.

SMS (P2P Messaging) Revenues fell 16.6% y-o-y in 4Q18, reflecting the lower consumption of this service due to its maturity.

Mobile Internet Revenues decreased 5.3% in the annual comparison. This performance was directly related to higher usage and consumption of digital services, leading to the migration of revenues between the lines.

In 4Q18, **Digital Service** Revenues moved up 40.4% y-o-y in 4Q18, representing 35.7% of Data and Digital Service Revenues (+8.7 p.p.), due to the inclusion of value-added services in the prepaid, hybrid and pure postpaid plans since 2017.

Net Handset Revenues rose 70.0% over the same quarter of the previous year, in line with the strategy of gaining market share in this relevant and growing market through our brand and sales channels, attracting high-end consumers to our physical and online stores.

1) Broadband Revenues include residential and SME customers.

2) Non-Voice Revenues include revenues from Broadband, Corporate Data and IT, Pay TV and Other Services.

Net Fixed Revenues fell 3.5% in 4Q18 compared with the same period last year, impacted by the decrease of Voice Revenues, the cut in the fixed-to-mobile tariff (VC) and the reduction in the fixed interconnection tariff (TU-RL and TU-RIU) in February 2018, partially offset by the positive evolution of Broadband Revenues, Pay TV Revenues and Other Services.

Voice Revenues fell 20.0% in the period compared to 4Q17, mainly due to the maturity of the service and the fixed-to-mobile substitution.

Interconnection Revenues grew 12.9% y-o-y in 4Q18, mainly due to increased incoming off-net traffic, partially offset by a reduction in TU-RL (-35.5%) and TU-RIU (-54.4%) in February 2018.

Broadband Revenues rose 12.3% in 4Q18 over 4Q17, fueled by the 33.8% y-o-y increase in Ultra-Broadband Revenues, which accounted for 71.7% of the total revenue in the period, reflecting the Company's efforts to expand the base and encourage customers' migration to higher speeds, fueling fiber accesses, whose ARPU is higher, in addition to the expansion of the FTTH network to 30 new cities in 2018. FTTH revenues climbed 44.0% over 4Q17.

Corporate Data and IT Revenues fell 2.0% y-o-y. The decrease is related to the usual volatility of these revenues, reflecting the eventual negotiation of large B2B contracts. However, data, cloud and IT service revenues continued to perform well in the recent quarters.

In 4Q18, **Pay TV** Revenues grew 4.9% in the annual comparison, thanks to the Company's more selective strategy for this service, focusing on higher-value products designed to improve customer experience and optimize profitability, such as IPTV, whose revenues grew 59.0% y-o-y.

1) Excludes the following non-recurring effects: **4Q17**: non-cash regulatory provision, in the amount of R\$178.9M. **2Q18**: positive effect of R\$1,830.2M mainly due to the final judgment in the Superior Court of Justice, in favor of the Company, recognizing the right to deduct the ICMS from the basis of calculation of PIS/COFINS contributions, related to TELESP operations from 2003 to 2014; expense of R\$92.0M due to the adoption of a risk assessment model to calculate labor contingencies; expense of R\$170.6M due to the write-off of assets related to judicial deposits; expense of R\$116.9M due to organizational restructuring. **3Q18**: positive effect of R\$1,381.7M due to the final judgment in the Superior Court of Justice, in favor of the Company, recognizing the right to deduct the ICMS from the basis of calculation of PIS/COFINS contributions, related to Vivo operations from 2004 to 2013; expense of R\$487.1M related to extraordinary fiscal contingencies recorded in 3Q18. **4Q18**: expense of R\$80.2M due to organizational restructuring.

Personnel Costs increased 9.5% year over year, mainly due to the expense of R\$80.2 million registered in 4Q18, related to an organizational restructuring. Excluding this effect, personnel costs grew 1.1% due to the effect of inflation on salaries and benefits in the period.

The **Cost of Services Rendered** fell 0.1% y-o-y in 4Q18, mainly due to the higher efficiencies in the management of contracts with third parties, to the strict policy of removing unprofitable customers from the base, besides the reductions in MTR/VC and TU-RL/TU-RIU in February 2018, partially offset by higher expenses related to the expansion of the network infrastructure in the period, related to the coverage expansion of 4G, 4.5G and fiber.

The **Cost of Goods Sold** grew 37.5% over 4Q17, due to the Company's strategy of focusing on handset and equipment sales since 4Q17.

Selling Expenses fell 5.9% in 4Q18, reflecting the evolution of the Company's simplification, efficiency and digitalization initiatives.

The **Provision for Doubtful Accounts** reduced 0.1% y-o-y in the 4Q18 and 8.4% in comparison to 3Q18, mainly due to credit and collection efforts in the B2B and B2C segments. The default level remained in line with 3Q18, reaching 2.2% of Gross Revenues in 4Q18.

Third-Party Services fell 6.9% in the annual comparison. The growing digitalization of customer service and customer relationship, exemplified by the larger share of e-commerce in products, services and top-ups sales; the accelerated adoption of e-billing by the new and existing customers; and by the growing usage of virtual channels and the MEU VIVO app, led to a reduction in call center, back offices, commissioning, billing and posting costs, providing to our customers with a unique and customized experience.

General and Administrative Expenses fell 0.7% in 4Q18, thanks to ongoing cost control.

Other Net Operating Revenues (Expenses) totaled revenues of R\$119.0 million in the quarter, due to proceeds from contractual fines and tax recoveries, combined with lower provisions for labor and civil contingencies.
