SECOND QUARTER 2007 CONSOLIDATED RESULTS

July 20, 2007 – VIVO Participações S.A. announces today its consolidated results for the second quarter 2007 (2Q07) and for year 2007. The Company’s operating and financial information, except as otherwise indicated, is presented in Brazilian reais in accordance with Brazilian Corporate Law.

Vivo’s 2Q07 figures reflect the **results** of the work developed towards resumption of **profitable growth** goal. The company’s decision to offer **CDMA/EV-DO and GSM/EDGE technologies** to its customers enhances the strategy adopted in the implementation of the new network and the adequate time for repositioning Vivo with its campaign “**Vivo. Sinal de Qualidade**”.

2Q07 Database

- Increase in the **customer base**, with the addition of 1,210 thousand customers in the quarter, with emphasis on the Mothers’ Day and Valentines’ Day campaigns;
- **GSM** has already exceeded 3.3 million handsets sold;
- Authorization area and domestic **market leadership**;
- **Nationwide digital coverage** and a broad portfolio of solutions in **GSM/EDGE and CDMA/EV-DO** technologies;
- Implementation of the **new bill** format for Post-paid customers, making understanding of invoices easier;
- A large **distribution network** with 338 thousand points of sale for credit recharge;
- Continued success of “**Vivo Escolha**” plans, which have allowed an increase in retention of existing customers and addition of new customers;
- **Service Revenue** of R\$2,647.8 million and **EBITDA** of R\$ 634.2 million in 2Q07, an increase of 107.0% over 2Q06;
- **EBITDA Margin** of 21.0% in 2Q07 is 9.2 percentile points higher than the margin recorded in the same quarter of last year. By eliminating the effects of termination of the partial Bill&Keep system, the EBITDA margin would be 23.5% compared to 16.2% recorded in 2Q06;
- The **provision for bad debt** was R\$ 101.2 million in the quarter, representing 2.3% of the gross revenue, a reduction of 70.1% in relation to 2Q06;
- The **operating cash flow** plus the change in working capital increased R\$434.3 million in the year;

Edgar Filing: Vivo Participacoes S.A. - Form 6-K

Daily avrg. Volume	R\$ 26 mm
Vivo ON Upside	(2.0)%
Vivo PN Upside	34.5%
Change Ibovespa	18.7%
Change ITEL	23.8%

- The **net debt** in the amount of R\$3,336.3 million remained almost stable in 2Q07 and represents a reduction of 23.0% in relation to the same period of last year;
- The ANATEL approved the adjustment to VUM, which is expected to be around 2% and will positively impact on the interconnection services revenue.

Basis for presentation of results

Figures disclosed are subject to differences, due to rounding-up procedures. Some information disclosed for 1Q07 and 2Q06 was re-classified, as applicable. Vivo's accounting criteria kept stable.

Operating Cash Flow

Operating cash flow (EBITDA-CAPEX) of R\$ 296.9 million in the quarter, reversing the negative result in relation to 2Q06. When compared to 1Q07, it recorded a reduction of 43.1%, which, added to the change in working capital, generated R\$ 137.6 million in the quarter, which is less than the figure recorded for the same period of the previous year, which was R\$ 217.5 million. It must be reminded that the TFF (Fistel Fee) was paid in 2Q07, which impacted such result. The year-to-date operating cash flow plus the change in current assets recorded R\$ 434.3 million, which represents 3 times the amount recorded for the same period of the previous year.

Capital Expenditures (CAPEX)

GSM/EDGE Network already covers 2,250 municipalities.

The necessary activities for the GSM/EDGE overlay continued in this quarter, with 76% of the total CapEx estimated in the initial project having been invested up to the moment. A total of R\$ 337.3 million were invested in 2Q07, which were intended for maintenance of networks and systems quality, expansion of coverage and terminals into the corporate segment, among other things. The 2Q07 CapEx represented 11.2% over the net revenue. The year-to-date invested total was R\$ 572.7 million.

OPERATING HIGHLIGHTS

Handset portfolios, better quality of service rendered and GSM contributed towards reversing the net gain percentage.

- The company recorded 30,240 thousand customers in the end of the quarter, up 4.2% over 1Q07 and 6.0% over the same period of the previous year, which reflects the results obtained from the Mothers' Day and Valentines' Day campaigns and the progressive increase in sales of GSM handsets, which have already exceeded 3.3 million handsets.
- Net additions in 2Q07 totaled 1,210 thousand new customers, with a market share of net additions of 34.7% in its coverage area, strongly increasing its market share and keeping its market leadership both in its operational area and in the national market. It must be pointed out that 84% of total activations correspond to the GSM technology. This steady and consistent growth is a result of Vivo's positioning as the "Best Signal" and best choice in its class of services. Confirming the mentioned positioning, in the post-paid segment the company recorded 63% growth in the high end segment in the quarter.
- In the same manner, the ARPU remained stable at R\$ 29.9, even though in a period of intense growth of the customer base, which also evidences the quality of Vivo's present customer base.
- The company has continued to place its focus on capturing and keeping high and medium value customers, maintaining rationality and searching for positive results in each campaign and commercial action.

SAC of R\$107 even during the time of the strongest selling efforts in the Mothers' Day and Valentines' Day campaigns.

- SAC in the second quarter 2007 was R\$ 107, against R\$ 100 in 1Q07. Such increase is a result of enhanced selling efforts and "entry barriers" implemented in the period, besides increased advertising expenses due to the Mothers' Day campaign, the second largest campaigns in the year, and the Valentines' Day campaign. When compared to 2Q06, the 16.4% reduction was due to the R\$/US\$ exchange rate variation and reduction in the Dollar cost of handsets sold, which reflects on the CMV (cost of goods sold), allowing, consequently, a lower acquisition cost.

"Better signal", a result of the constant improvement in service quality.

- **Churn** of 2.3% in the quarter, with a reduction of 0.3 percentile points in relation to the previous quarter. The value segment, represented by "premium" customers, was maintained under strict control with specific actions aiming at retaining and capturing customers. In relation to 2Q06, the reduction of 2.3 percentile points is due to the adjustment effected in the customer base in the second quarter of 2006.

New Bill for post-paid customers

- By reassuring its commitment to keep a transparent relationship and to show respect towards its customers, Vivo launched a new format of bill for services rendered to post-paid customers. The bill now show better information and

details on a most didactic basis, allowing better indicators and service level to be obtained.

ON-NET traffic increase through specific campaigns.

- The **blended MOU** was 2.7% higher than in 1Q07 and 14.9% higher than in 2Q06. The outgoing MOU increased by 35.5% in relation to 2Q06 and 7.7% in relation to 1Q07. In addition to the above mentioned factors, such growth was due to the campaigns for stimulating use for the prepaid segment, adoption of new service plans and segmented campaigns. The incoming traffic, which is several markets records a decreasing trend, in the case of Vivo has remained stable along the last quarters.

Growth in the total outgoing traffic.

- The **total traffic** recorded a 3.9% growth in 2Q07 in relation to 1Q07, emphasizing both the growth in the outgoing traffic and the stability in the incoming traffic. Considering only the outgoing traffic, the increase was 7.9%. In the comparison between 2Q07 and 2Q06, the total traffic increased by 12.8% and considering only the outgoing traffic the increase is 30.5%. The incoming traffic stability arises mainly from the increase in the off-net mobile-mobile and long-distance traffic, showing each time more the increase in mobile access as a means of personal communication, offsetting the trend of decrease in the fixed-mobile traffic market.

ARPU remained stable at R\$30 due to quality improvement

- The **blended ARPU** recorded the amount of R\$ 29.9 in 2Q07, remaining almost stable in relation to the previous quarter. When compared to 2Q06, it shows an increase of 24.1%. Vivo continued its active and passive re-adequacy policy of the service plans of its customers, seeking to improve loyalty of customer base specially in high end value segment and capturing value customers in the market. The “Vivo Escolha” plans were responsible for improving Vivo’s service competitiveness. Following the trend mentioned for the MOU, the outgoing ARPU increased by 12.5% over 2Q06. By eliminating the effects of termination of the partial Bill&Keep system, the blended ARPU in 2Q07 would record 7.5% increase in relation to 2Q06.

RECEITA OPERACIONAL

Service revenue grew 21.2%, increasing the **total net revenue** by 16.3% in relation to 2Q06, recording R\$ 3,021.0 million in the quarter. In relation to 1Q07, the total net revenue grew by of 6.0%, especially due to the increase in the revenue from sales of handsets. By eliminating the effects of the partial Bill&Keep in the 2Q07, the net service revenue would still record an increase of 4.9% in 2Q07 over 2Q06.

Consistent growth in the revenue from the outgoing traffic

The increase of 9.9% in “**subscription and usage revenue**”, when compared to 2Q06, is mainly due to the increase in the total outgoing revenue, which was impacted by the growth in the total outgoing traffic, by the incentive to usage and promotions and, especially, by the launching of the “*Vivo Escolha*” plans, as above commented, which 50% of the individual post-paid customer base have already adopted, which plans, besides stimulating usage and loyalty, also increase profitability and customer satisfaction, thus generating a most advantageous cost-benefit relation. When compared to 1Q07, there was 3.0% increase in the subscription and usage revenue, as result of customer base increase and incentive to usage with segmented campaigns. **Also contributed to such growth the 29% increase in the volume of recharges in 2Q07 over 2Q06**, which was possible due to the existence of a large distribution channels with more than 338 thousand charge points.

More than 200 thousand customers with mobile internet access.

Data revenue plus SVA's accounted for 7.9% of the service revenue in 2Q07, a 15.0% increase over 2Q06. In the comparison between 2Q07 and 1Q07, it remained almost stable. Data Revenue plus SVA's have had a sustained growth due to actions that stimulate usage of the present services (such as SMS, VIVO AVISA, Voice Mail and Voice Portal), with the continuous increase of our offer in the WAP, in contents and game downloads (inclusion of new and relevant partners), with VIVO ZAP solutions (EV-DO PMCIA and USB boards) and with the launching of innovative products and services (such as complete song downloading in VIVO PLAY), in addition to no-charge for download traffic (upon selection of already charged services) and

navigation of applications, allowing more clear communication of price to consumers. Vivo is a pioneer in this action, confirming its commitment and respect to customers and its belief on the adoption of this service.

OPERATING EXPENSES

Strict control over manageable costs.

The growth of 6.2% in **Human Resources** in 2Q07 over 2Q06 is due to the adjustment provided for the Collective Union Agreement in November 2006 and to severance payments arising out of a reduction in the labor count.

The reduction of 5.0% in **Human Resources** in 2Q07 over 1Q07 is due to the decrease in severance payments and the adequacy in the labor count.

By eliminating the effects of termination of the B&K program, the services costs would remain stable in relation to 2Q06.

The increase of 81.4% in the **cost of services rendered** in 2Q07, when compared to 2Q06, is due to the 946.1% increase in interconnection costs arising out of the termination of the partial Bill&Keep system, in addition to the increase in expenses with third-party services, especially public utilities. Such increase is partially offset by a reduction in Fistel fee and other contributions, in addition to a reduction in losses arising out of roaming. When compared to 1Q07, there was an increase by 5.9%, due to the same reasons above, however with less intensity. By eliminating the effects of the partial Bill & Keep system, the cost of services in 2Q07 would remain stable in relation to 2Q06.

The **cost of goods sold** increased by 56.0% over 1Q07, especially due to an increased number of gross activations which accounted for 47.3% growth and remained stable in relation to 2Q06, even though with more intense selling activity, as a result of the foreign exchange rate variation and the sales of GSM handsets at lower purchase prices. In 2Q07, the Company carried out several actions with the purpose of capturing new customers and also ensuring loyalty of its existing customer base, which resulted in an increased number of additions, Churn reduction, as well as launching of GSM handsets.

In 2Q07, **selling expenses** decreased by 27.3% in relation to 2Q06, as a result of the reduction in expenses with provision for bad debt and third-party expenses, especially sales commissions and public utilities. When compared to 1Q07, the 17.6% increase reflects the repositioning actions with an increase in advertising, commissions, outsourced labor and client care expenses, offset by a reduction in the provision for bad debt and public utilities.

5.8% reduction in the PDD in relation to the previous quarter.

The **Provision for Bad Debt – PDD** in 2Q07 was of R\$ 101.2 million, representing 2.3% of the total gross revenue, a 70.1% reduction in relation to the same period of the previous year, which was R\$ 338.7 million, representing 9.0% of the gross revenue. The second quarter of 2006 was impacted by an incremental PDD of R\$ 161.5 million due to the migration of customers to new systemic platforms, which caused a delay in the issuance of invoices in the post-implementation period, in addition to application of collection rules, creating difficulties for customers when paying accrued amounts. Should we eliminate such incremental value, even though the PDD would record a 42.9% reduction in relation to 2Q06. This result evidences the strict control exercised over new customers obtained with the year-end campaigns and on accounts receivable. When compared to 1Q07, the PDD also recorded a reduction of 0.4 percentile point on the total gross revenue.

General and administrative expenses increased by 11.1% in 2Q07 in relation to 2Q06, due to the increase in expenses with third-party services, especially technical assistance due to technology transfer, legal and other expenses, partially offset by a reduction in expenses with regular services due to efficiency gains as a result of the conclusion of the systemic (TI and SI) platforms unification project, public utilities, as well as reduction in other expenses with materials and rental, insurance and condominium fees. When compared to 1Q07, it recorded a 10.8% growth, due to the increase in technical assistance and other expenses, positively impacted by the reduction in expenses with rental, insurance and condominium fees and plant maintenance and conservation services.

Other Operating Revenue / Expenses recorded an expense of R\$ 24.8 million. The 71.5% drop in relation to 1Q07 arises from the reduction in the provision for contingencies, in addition to the increase in the revenue from recovered expenses and commercial incentives. When compared to 2Q06, the 4.2% increase in the variation is mainly due to an increase in expenses referring to taxes, duties and contributions and in the provision for contingencies, almost fully offset by the increase in the revenue from recovered expenses and commercial incentives.

EBITDA

EBITDA margin of 21.0% in the quarter, reflecting the commercial activity in the period.

The **EBITDA** (earnings before interests, taxes, depreciation and amortization) in 2Q07 was R\$ 634.2 million, an increase of 107.1% in relation to 2Q06, resulting in an EBITDA Margin of 21.0%. When compared to 1Q07, the EBITDA recorded a 16.2% reduction, this performance reflects the commercial activity in the period, which resulted in a significant increase in the customer base. By eliminating the effects of the termination of the partial Bill&Keep system, the EBITDA would be in the amount of R\$ 626.3 million or a margin of 23.5% in 2Q07. Such result was mainly due to the increase in the revenue due to the increase in the customer base and to the strict control of expenses, even though considering the number of additions and the sustainable growth. The stability in the cost of goods sold also contributed to such increase, explained by the sales of GSM handsets at lower acquisition cost.

DEPRECIATION AND AMORTIZATIN

Depreciation and amortization expenses remained stable in relation to 2Q06 and grew by 5.5% in relation to 1Q07, which result was due to the activation of new handsets. In the comparison of the year-to-date figures for 2007 and 2006, the evolution has remained stable.

Reduction in financial expenses by 41.8% in 2Q07 over 2Q06.

VIVO's **net financial expense** in 2Q07 remained almost stable in relation to 1Q07. The R\$ 5.7 million increase due to expenses related to CPMF (tax over financial transactions) which impacted over the R\$ 420 million Fistel payment at the beginning of the second quarter. In the comparison of 2Q07 over 2Q06, there was a reduction of R\$ 89.2 million in the net financial expense due to decrease in net debt, increase in operating cash flow generation and restructuring of financial liabilities, besides a reduction in interest rates in the period (3.58% in 2Q06 and 2.89% in 2Q07).

Reduction in net debt by 23.0% in the year-to-year comparison and by 20.9% in gross debt. On June 30, 2007, VIVO's debts related to loans and financing amounted to R\$ 3,705.7 million (R\$ 4,057.2 million at March 31, 2007), 49% of which is denominated in foreign currency. The Company has executed exchange rate hedging contracts thus protecting 100% of its financial debt against foreign exchange volatility, so that the final cost (debt and swap) is Reais-referenced. Additionally, the Company has entered into swap transactions – CDI x Pre, in order to partially protect it against fluctuations in domestic interest rates. Covered transactions totaled R\$ 2,274.0 million. (R\$ 871.0 million at March 31, 2007). This debt was offset by the Company's available cash and financial investments (R\$ 955.2 million) and by derivative assets and liabilities (R\$ 585.8 million payable) resulting in a net debt of R\$ 3,336.3 million.

The 20.9% reduction in VIVO's gross debt in relation to 2Q06, amounting to R\$ 980.7 million, is due to the financial flexibility and rationality, as a result of the corporate restructuring, which made possible the prepayment of debts contracted through the use of cash from companies with greater availability of funds.

Debt stability due to cash generation Although the company paid the TFF (Fistel Fee) in the amount of R\$ 420 million in 2Q07, its net debt remained almost stable in relation to 1Q07 due to the generation of operating cash in this last quarter.

Loss of R\$ 112.8 million in the quarter, showing a 77.1% reduction in comparison to the loss of R\$ 493.1 million recorded in 2Q06.

Capital Market

Subsequent Event.

At a Meeting held on 07/11/2007, the Board of Directors made a resolution on the Second Renegotiation of Debentures of the 1st Issue of the Company, whose issuance terms were approved on 07.10.2003 and 08.14.2003 and on the first renegotiation on 07.08.2004, at the meetings of the Board of Directors of the Company, which renegotiation shall be under the following terms and conditions (the "Second

Renegotiation”): (i) Third Interest-Bearing Period: 08/01/2007 until 08/01/2008, period in which the interest payment terms shall remain unchanged; (ii) Interest Payment: The interest payment related to the Renegotiation of the Debentures shall be equivalent to a percentage of the accrued average daily rates of the over extra group one-day Interfinancial Deposits – DI, expressed as a yearly percentage, based on two hundred and fifty-two (252) business days, calculated and disclosed by the Custody and Settlement Agency – CETIP, which percentage shall not exceed the maximum limit of one hundred and three per cent (103%); (iii) Periodicity of Interest Payment: The Payment of Interest on Debentures shall be effected semiannually, the first payment being due on February 01, 2008 and the last payment being due on the Maturity Date, that is, on August 01, 2008, and (iv) Guarantee: The guarantee granted upon the issuance of the Debentures shall remain unchanged for the New Interest-Bearing Period.

Quality and coverage improvement program

Better connection and coverage quality

VIVO has continued significantly expanding its coverage, increasing the number of municipalities served, in addition to enlarging and optimizing the 1xRTT coverage and installing the new GSM/EDGE network convertible into W-CDMA. Vivo Participações, through its wholly-owned subsidiary, Vivo S/A, the largest operator in Brazil, provides mobile telephone services in the states of São Paulo, Paraná, Santa Catarina, Rio de Janeiro, Espírito Santo, Bahia, Sergipe, Rio Grande do Sul, Acre, Amazonas, Amapá, Goiás, Maranhão, Mato Grosso, Mato Grosso do Sul, Pará, Rondônia, Roraima and Tocantins and in the Federal District. Digital coverage is provided in 100% of the municipalities comprised in its service area, with more than 2,000 municipalities having 1xRTT coverage, of which 27 municipalities are provided with EV-DO service. The GSM/EDGE network is already present in 2,250 municipalities. Some states as São Paulo, Rio de Janeiro and Espírito Santo are already served by Vivo in 100% of their municipalities.

Nationwide coverage, a goal to be achieved.

The auction for 1.9 GHz frequencies conducted by Anatel places Vivo about to achieve one of its major goals: nationwide operation, reaching the state of Minas Gerais and other Northeast states in which it does not yet operate.

Main Prizes, Awards and Events

Vivo was granted the **Top of Marketing 2007** prize from the ADVB. Once again, Vivo recorded an outstanding performance in the communication industry in Brazil, due to its innovating strategies, investments and results achieved from its brand repositioning campaign. The prize awarded by the ADVB (Brazilian Sales and Marketing Directors Association) is one of the most traditional and renowned prizes in the marketing industry in Brazil.

Vivo is Top of Mind among internet users. Vivo is the most recalled brand among the mobile telephone operators in Brazil, according to the Top of Mind Internet research. With 27% of the internet users' votes, the company was ranked 8 percentile points ahead of its competitors. The research which prized the company was carried out by Instituto Datafolha by order of UOL internet portal, with more than 2,000 people, aged f
