OMEGA FLEX, INC.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. BASIS OF PRESENTATION AND DESCRIPTION OF BUSINESS

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements include the accounts of Omega Flex, Inc. (Omega) and its subsidiaries (collectively the “Company”). The Company’s unaudited condensed consolidated financial statements for the quarter ended June 30, 2011 have been prepared in accordance with generally accepted accounting principles (GAAP), and with the instructions of Form 10-Q and Article 10 of Regulation S-X. Certain information and note disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to those rules and regulations, although the company believes that the disclosures made are adequate to make the information not misleading. It is suggested that these condensed consolidated financial statements be read in conjunction with the financial statements and the notes thereto included in the Company’s latest shareholders’ annual report (Form 10-K). All material inter-company accounts and transactions have been eliminated in consolidation. It is Management’s opinion that all adjustments necessary for a fair statement of the results for the interim periods have been made, and that all adjustments are of a normal recurring nature or a description is provided for any adjustments that are not of a normal recurring nature.

Description of Business

The Company is a leading manufacturer of flexible metal hose, which is used in a variety of applications to carry gases and liquids within their particular applications. These applications include carrying liquefied gases in certain processing applications, fuel gases within residential and commercial buildings and vibration absorbers in high vibration applications. Our industrial flexible metal piping is used to carry other types of gases or fluids in a number of industrial applications where the customer requires a degree of flexibility, an ability to carry corrosive compounds or mixtures, a double containment system, or piping to carry gases or fluids at very high or very low (cryogenic) temperatures.

The Company manufactures flexible metal hose at its facility in Exton, Pennsylvania, with a minor amount of manufacturing performed in the United Kingdom. The Company sells its product through distributors, wholesalers and to original equipment manufacturers (“OEMs”) throughout North America, and in certain European markets.

## 2. SIGNIFICANT ACCOUNTING POLICIES

### Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. The most significant estimates and assumptions relate to revenue recognition and related sales incentives, accounts receivable valuations, inventory valuations, goodwill valuation, product liability reserve and accounting for income taxes. Actual amounts could differ significantly from these estimates.

### Revenue Recognition

The Company's revenue recognition activities relate almost entirely to the manufacture and sale of flexible metal hose and pipe. Under GAAP, revenues are considered to have been earned when the Company has substantially accomplished what it must do to be entitled to the benefits represented by the revenues. The following criteria represent preconditions to the recognition of revenue:

- Persuasive evidence of an arrangement for the sale of product or services must exist.
- Delivery has occurred or services rendered.
- The sales price to the customer is fixed or determinable.
- Collection is reasonably assured.

The Company recognizes revenue upon shipment in accordance with the above principles.

Gross sales are reduced for all consideration paid to customers for which no identifiable benefit is received by the Company. This includes promotional incentives, which includes various programs including year-end rebates, and discounts. The amounts of certain incentives are known with reasonable certainty at the time of sale, while others are projected based upon the most reliable information available at the reporting date.

Commissions, for which the Company receives an identifiable benefit, are accounted for as a sales expense.

### Earnings per Common Share

Basic earnings per share have been computed using the weighted-average number of common shares outstanding. For the periods presented, there are no dilutive securities. Consequently, basic and dilutive earnings per share are the same.

### Currency Translation

Assets and liabilities denominated in foreign currencies are translated into U.S. dollars at exchange rates prevailing on the balance sheet dates. The Statements of Income are translated into U.S. dollars at average exchange rates for the period. Adjustments resulting from the translation of financial statements are excluded from the determination of income and are accumulated in a separate component of shareholders' equity. Exchange gains and losses resulting from foreign currency transactions are included in operations (other income (expense)) in the period in which they occur.

### Income Taxes

The Company accounts for taxes in accordance with the FASB ASC Topic 740 Income Taxes. Under this method the Company records tax expense and related deferred taxes and tax benefits.

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities from a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is provided for deferred tax assets if it is more likely than not that these items will either expire before the Company is able to realize the benefit, or that future deductibility is uncertain.

### Other Comprehensive Loss

For the quarters ended June 30, 2011 and 2010, respectively, the sole component of Other Comprehensive Loss was a foreign currency translation adjustment.

### 3. INVENTORIES

Inventories, net of reserves consisted of the following:

	June 30, 2011	December 31, 2010
	(dollars in thousands)	
Finished Goods	\$4,745	\$4,297
Raw Materials	1,906	1,719
Total Inventory	\$6,651	\$6,016

#### 4. LINE OF CREDIT

On December 30, 2010, the Company agreed to a new Revolving Line of Credit Note and Loan Agreement with Sovereign Bank, NA (“Sovereign”). The Company established a line of credit facility in the maximum amount of \$10,000,000, maturing on December 31, 2014, with funds available for working capital purposes and other cash needs. The loan is collateralized by all of the Company’s tangible and intangible assets. The loan agreement provides for the payment of any borrowings under the agreement at an interest rate range of either LIBOR plus 1.75% to plus 2.75% (for borrowings with a fixed term of 30, 60, or 90 days), or, Prime less 0.50% to plus 0.50% (for borrowings with no fixed term other than the December 31, 2014 maturity date), depending upon the Company’s then existing financial ratios. At June 30, 2011, the Company’s ratio would allow for the most favorable rates under the agreement’s range, which would be a rate of 2.00% (LIBOR plus 1.75%). The Company is required to pay an annual commitment fee for the use of the funds, and is also obligated to pay a “Line Fee” ranging from 17.5 to 35.0 basis points of the average unused balance on a quarterly basis, depending again upon the Company’s then existing financial ratios. The Company may terminate the line at any time during the four year term, as long as there are no amounts outstanding.

As of June 30, 2011, and December 31, 2010, respectively, the Company had no outstanding borrowings on its line of credit.

As of June 30, 2011 and December 31, 2010, the Company was in compliance with all debt covenants.

#### 5. COMMITMENTS AND CONTINGENCIES

##### Commitments:

Under a number of indemnity agreements between the Company and each of its officers and directors, the Company has agreed to indemnify each of its officers and directors against any liability asserted against them in their capacity as an officer or director, or both. The Company’s indemnity obligations under the indemnity agreements are subject to certain conditions and limitations set forth in each of the agreements. Under the terms of the Agreement, the Company is contingently liable for costs which may be incurred by the officers and directors in connection with claims arising by reason of these individuals’ roles as officers and directors.

The Company has salary continuation agreements with two employees, which provide for monthly payments to each of the employees or their designated beneficiary upon the employee’s retirement or death. The payment benefits range from \$1,000 per month to \$3,000 per month with the term of such payments limited to 15 years after the employee’s retirement at age 65. The agreements also provide for survivorship benefits if the employee dies before attaining age 65, and severance payments if the employee is terminated without cause; the amount of which is dependent on the length of company service at the date of termination. The net present value of the retirement payments is \$409,000 at June 30, 2011, of which \$397,000 is included in Other Long Term Liabilities, and the remaining current portion of \$12,000 is included in other liabilities, as one of the employees retired at the end of 2010 and is now receiving payments.

The December 31, 2010 liability of \$407,000, had \$395,000 reported in Other Long Term Liabilities, and a current portion of \$12,000 in Other Liabilities. The Company has obtained and is the beneficiary of three whole life insurance policies with respect to the two employees discussed above, and one other policy. The cash surrender value of such policies (included in Other Long Term Assets) amounts to \$752,000 at June 30, 2011 and \$706,000 at December 31, 2010, respectively.

Contingencies:

The Company's general liability insurance policies are subject to deductibles or retentions, in amounts ranging from \$25,000 to \$75,000, (depending on policy year) up to an aggregate amount. The Company is insured on a 'first dollar' basis for workers' compensation subject to statutory limits.

In the ordinary and normal conduct of our business, the Company is subject to periodic lawsuits, investigations and claims (collectively, the "Claims"). The Company has in place commercial general liability insurance policies that cover the Claims, including those alleging damages as a result of product defects. Although we cannot predict with certainty the ultimate resolution of the Claims asserted against the Company, the estimated liability for the Claims, both in litigation and pre-suit, are currently limited to the deductible amounts under those insurance policies. Those liabilities were estimated to be \$304,000 and \$309,000, at June 30, 2011 and December 31, 2010, respectively, and are included in Other Liabilities. The liability reflects deductible amounts anticipated to be paid with respect to new Claims, and includes an estimate of incurred but not reported claims. The Company does not believe that the Claims have legal merit, and is therefore vigorously defending those Claims. Notably, the Company has experienced a recent influx of Claims, which appear to be prompted by a partial adverse verdict against the Company on one particular case in October of 2010, which is currently under appeal, as described in Part II, Item 1 – Legal Proceedings. Along with the Claims noted, it is possible that additional Claims may be filed against the company in the future, which could adversely impact the terms and pricing of the Company's product liability insurance programs, possibly materially, thus diminishing profits and cash. We do not believe that any currently pending Claim to which the Company is a party will have a material adverse effect on our business, financial condition or results of operations.

Warranty Commitments:

Gas transmission products such as those made by the Company carry potentially serious personal injury risks in the event of failures in the field. As a result, the Company performs extensive internal testing and other quality control procedures. Historically, due to the extensive nature of these quality controls the Company has not had a meaningful failure rate in the field. Due to the Company's quality systems, the warranty expense is de minimis, and accordingly, the Company does not maintain a warranty reserve beyond a nominal amount.

## 6. STOCK BASED PLANS

### Phantom Stock Plan

Plan Description. On April 1, 2006, the Company adopted the Omega Flex, Inc. 2006 Phantom Stock Plan (the "Plan"). The Plan authorizes the grant of up to one million units of phantom stock to employees, officers or directors of the Company and of any of its subsidiaries. The phantom stock units ("Units") each represent a contractual right to payment of compensation in the future based on the market value of the Company's common stock. The Units are not shares of the Company's common stock, and a recipient of the Units does not receive any of the following:

- § ownership interest in the Company
- § shareholder voting rights
- § other incidents of ownership to the Company's common stock

The Units are granted to participants upon the recommendation of the Company's CEO, and the approval of the compensation committee. Each of the Units that are granted to a participant will be initially valued by the compensation committee, and at a minimum, the Unit's value will be equal to the closing price of the Company's common stock on the grant date. The Units follow a vesting schedule, with a maximum vesting of 3 years after the grant date. Upon vesting, the Units represent a contractual right to the payment of the value of the Unit. The Units will be paid on their maturity date, one year after all of the Units granted in a particular award have fully vested, unless an acceptable event occurs under the terms of the Plan prior to one year, which would allow for earlier payment. The amount to be paid to the participant on the maturity date is dependent on the type of Unit granted to the participant.

The Units may be Full Value, in which the value of each Unit at the maturity date, will equal the closing price of the Company's common stock as of the maturity date; or Appreciation Only, in which the value of each Unit at the maturity date will be equal to the closing price of the Company's common stock at the maturity date minus the closing price of the Company's common stock at the grant date.

On December 9, 2009, the Board of Directors authorized an amendment to the Plan to pay an amount equal to the value of any cash or stock dividend declared by the Company on its common stock to be accrued to the phantom stock units outstanding as of the record date of the common stock dividend. The dividend equivalent will be paid at the same time the underlying phantom stock units are paid to the participant.

In certain circumstances, the Units may be immediately vested upon the participant's death or disability. All Units granted to a participant are forfeited if the participant is terminated from his relationship with the Company or its subsidiary for "cause," which is defined under the Plan. If a participant's employment or relationship with the Company is terminated for reasons other than for "cause," then any vested Units will be paid to the participant upon termination. However, Units granted to certain "specified employees" as defined in Section 409A of the Internal Revenue Code will be paid approximately 181 days after that termination.

Grants of Phantom Stock Units. As of December 31, 2010, the Company had 15,555 unvested units outstanding, all of which were granted at Full Value. On March 3, 2011, the Company granted an additional 8,100 Full Value Units with a fair value of \$10.55 per unit on grant date, using historical volatility. In all cases, the grant price was equal to the closing price of the Company's common stock at the grant date. In March 2011, the Company paid \$40,000 for the 2,724 fully vested and matured units that had been granted on March 5, 2007.

The Company uses the Black-Scholes option pricing model as its method for determining fair value of the Units. The Company uses the straight-line method of attributing the value of the stock-based compensation expense relating to the Units. The compensation expense (including adjustment of the liability to its fair value) from the Units is recognized over the service or vesting period of each grant or award.

The FASB ASC Topic 718 Stock Compensation requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates in order to derive the Company's best estimate of awards ultimately to vest.

Forfeitures represent only the unvested portion of a surrendered Unit and are typically estimated based on historical experience. Based on an analysis of the Company's historical data, which has limited experience related to any stock-based plan forfeitures, the Company applied a 0% forfeiture rate to Plan Units outstanding in determining its Plan Unit compensation expense as of June 30, 2011.

The total Phantom Stock related liability as of June 30, 2011 was \$238,000 of which \$69,000 is included in current liabilities, as it is expected to be paid in March 2012, and the balance of \$169,000 is included in other long term liabilities.

In accordance with FASB ASC Topic 718 Stock Compensation, the Company recorded compensation expense of approximately \$13,000 and \$24,000 related to the Phantom Stock Plan for the six months ended June 30, 2011 and 2010, respectively.

The following table summarizes information about the Company's nonvested phantom stock Units at June 30, 2011:

	Units	Weighted Average Grant Date Fair Value
Number of Phantom Stock Unit Awards:		
Nonvested at December 31, 2010	15,555	\$11.01
Granted	8,100	\$10.55
Vested	(7,274)	(\$11.92)
Forfeited	(---)	(\$--- )</td
Canceled	(---)	(\$--- )</td
Nonvested at June 30, 2011	16,381	\$10.38
Phantom Stock Unit Awards Expected to Vest	16,381	\$10.38

The total unrecognized compensation costs calculated at June 30, 2011 are \$163,000 which will be recognized through March of 2014. The Company will recognize the related expense over the weighted average period of 1.79 years.

#### 7. NONCONTROLLING INTERESTS

The Company owns 100% of all subsidiaries, except for its UK subsidiary Omega Flex, Limited, of which it owns 95%. A non-controlling interest owns the other 5%, which had a value of \$126,000 at December 31, 2010. The total equity of the Company including the non-controlling interest was \$18,266,000 at December 31, 2010.

For the first six months of 2011, the operations of Omega Flex, Limited generated a loss. The non-controlling interest's portion of the loss was \$13,000.

The non-controlling Interest must also recognize its share of any currency translation adjustment, since the subsidiary's local books are in British Pounds, and are translated into US Dollars for consolidation purposes. Their share for the first six months of 2011 was a gain of \$5,000.

At June 30, 2011, after considering the components above, the balance of the non-controlling interest at was \$118,000.

#### 8. SHAREHOLDERS' EQUITY

(Amounts in thousands, except share amounts)

As of June 30, 2011 and December 31, 2010, the Company had authorized 20,000,000 common stock shares with par value of \$0.01 per share. For both periods, the number of shares issued was 10,153,633, and the total number of outstanding shares was 10,091,822, with the 61,811 variance representing shares held in Treasury.

#### 9. SUBSEQUENT EVENTS

The Company evaluated all events or transactions that occurred through the date on which the Company issued these financial statements. During this period, the Company did not have any material subsequent events that impacted its condensed consolidated financial statements.

Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

This report contains forward-looking statements, which are subject to inherent uncertainties. These uncertainties include, but are not limited to, variations in weather, changes in the regulatory environment, customer preferences, general economic conditions, increased competition, the outcome of outstanding litigation, and future developments affecting environmental matters. All of these are difficult to predict, and many are beyond the ability of the Company to control.

Certain statements in this Quarterly Report on Form 10-Q that are not historical facts, but rather reflect the Company’s current expectations concerning future results and events, constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The words “believes”, “expects”, “intends”, “plans”, “anticipates”, “hope”, “likely”, “will”, and similar expressions identify such forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause the actual results, performance or achievements of the Company, or industry results, to differ materially from future results, performance or achievements expressed or implied by such forward-looking statements.

The Company undertakes no obligation to update the result of any revisions to these forward-looking statements which may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events, conditions or circumstances.

## OVERVIEW

The Company is a leading manufacturer of flexible metal hose, and is currently engaged in a number of different markets, including construction, manufacturing, transportation, petrochemical, pharmaceutical and other industries.

The Company's business is managed as a single operating segment that consists of the manufacture and sale of flexible metal hose and accessories. The Company's products are concentrated in residential and commercial construction, and general industrial markets. The Company's primary product line, flexible gas piping, is used for gas piping within residential and commercial buildings. Through its flexibility and ease of use with patented fittings distributed under the trademark AutoFlare®, TracPipe® and CounterStrike® flexible gas piping allows users to substantially cut the time required to install the gas piping, as compared to traditional methods. Most of the Company's products are manufactured at the Company's Exton, Pennsylvania facility with a minor amount of manufacturing performed in the UK. A majority of the Company's sales across all industries are generated through independent outside sales organizations such as sales representatives, wholesalers and distributors, or a combination of both. The Company has a broad distribution network in North America and to a lesser extent in other global markets.

## CHANGES IN FINANCIAL CONDITION

Cash and cash equivalents were \$1,802,000 at June 30, 2011, compared to \$2,209,000 at December 31, 2010, a decrease of \$407,000. Consistent with past years, the Company had significant payments during the first half of the year for accrued selling related incentives, taxes and incentive compensation earned during the prior fiscal year, which typically deplete cash during that period. Those outflows were partially offset by net income generated during the year.

Accounts Receivable at June 30, 2011 was \$7,771,000, and was \$7,314,000 at December 31, 2010, an increase of \$457,000. The majority of this is consistent with sales growth and timing related, as there has been no discernible increase to the Company's accounts receivable aging, and no significant collectability issues.

Inventory has increased \$635,000, moving to \$6,651,000 at June 30, 2011, from \$6,016,000 at December 31, 2010. The Company had significant sales in December of 2010, which caused a reduction in inventory levels at year end. Additionally, the Company has decided to increase the inventory levels of some components to produce superior response time for customer demand. Overall, inventory turnover has improved slightly compared to the same quarter last year, as evidenced by the ratio of inventory to quarterly cost of goods sold, which was 1.01 and 1.28 at the end of June 2011 and 2010, respectively.

Accrued Compensation has decreased \$599,000 as a result of the annual first quarter scheduled compensation payment less the 2011 accrual.

Accrued Commissions and Sales Incentives decreased \$1,113,000, starting at \$2,410,000 at December 31, 2010, and going to \$1,297,000 at June 30, 2011. The decrease mostly pertained to the payment of annual sales incentive programs earned in 2010 and paid in 2011, offset partially by the recording of the new 2011 program obligations.

## RESULTS OF OPERATIONS

Three-months ended June 30, 2011 vs. June 30, 2010

The Company reported comparative results from continuing operations for the three-month period ended June 30, 2011 and 2010 as follows:

	Three-months ended June 30, (in thousands)			
	2011 (\$000)	2011 %	2010 (\$000)	2010 %
Net Sales	\$13,387	100.0%	\$10,715	100.0%
Gross Profit	\$ 6,817	50.9%	\$ 5,539	51.7%
Operating Profit	\$ 1,802	13.5%	\$ 1,107	10.3%

The Company's sales increased \$2,672,000 (24.9%), moving from \$10,715,000 to \$13,387,000 for the three-month periods ended June 30, 2010 and 2011, respectively.

Revenue for the three-months ended June 30, 2011 reflects the market's support of the Company's proprietary products and commitment to innovation and safety, as indicated by the strong sales of TracPipe CounterStrike over the prior year. Consistent with the commitment to innovation and safety, on June 15, 2011 the Company announced it was transitioning its flexible gas piping business to TracPipe CounterStrike effective September 1, 2011. TracPipe CounterStrike is the only corrugated stainless steel tubing (CSST) product on the market that has been listed by independent evaluation agencies for resistance to damage from lightning, seismic events (earthquakes), and flame/smoke spread. The Company has also seen improvements in revenue related to the United Kingdom, and within its varied Industrial related metal hose products. Overall, volume for the quarter was up approximately 16% compared to the prior year quarter. Sales were further enhanced by increases to the selling prices of numerous products, which were required to combat the rising price of the Company's core raw materials. A reduction in marketing incentives during the quarter also helped to increase net sales.

The Company's gross profit margins have decreased modestly from 51.7% to 50.9% for the three-month period ended June 30, 2010 and 2011, respectively. The change is mostly due to cost increases in numerous commodity type metals. An increase in nickel has adversely impacted the price of stainless steel, which is a key raw material used in the manufacturing of many of the Company's flexible metal hoses. An increase in copper, a key component of brass, has made the Company's patented fittings more expensive. Due to the competitive nature of the market place, selling price actions initiated by the Company were not sufficient enough to offset the higher material costs in their entirety.

**Selling Expenses.** Selling expenses consist primarily of employee salaries and associated overhead costs, commissions, and the cost of marketing programs such as advertising, trade shows and related communication costs, and freight. Selling expense was \$2,197,000 and \$2,690,000 for the three-months ended June 30, 2010 and 2011, respectively,

representing an increase of \$493,000. The most significant increase was noted in advertising, which went up \$183,000, largely focused on proprietary products such as TracPipe CounterStrike. There was also an increase during the quarter to staffing expenses, designed to expand sales markets.

Commissions and Freight increased largely in pace with sales volume. Sales expense as a percentage of sales were slightly reduced, going from 20.5% for the three-months ended June 30, 2010 to 20.1% for the three-months ended June 30, 2011.

**General and Administrative Expenses.** General and administrative expenses consist primarily of employee salaries, benefits for administrative, executive and finance personnel, legal and accounting, and corporate general and administrative services. General and administrative expenses were \$1,588,000 and \$1,677,000 for the three-months ended June 30, 2010 and 2011, respectively. The change of \$89,000 between periods was largely the result of increased estimates relating to anticipated product liability accruals. As a percentage of sales, general and administrative expenses decreased from 14.8% for the three months ended June 30, 2010 to 12.5% for the three months ended June 30, 2011.

**Engineering Expense.** Engineering expenses consist of development expenses associated with the development of new products and enhancements to existing products, and manufacturing engineering costs. Engineering expenses were almost identical for the two periods. They were \$647,000 and \$648,000 for the three months ended June 30, 2010 and 2011, respectively. Engineering expenses as a percentage of sales were 6.0% for the three months ended June 30, 2010 and 4.8% for the three months ended June 30, 2011.

**Operating Profits.** Reflecting all of the factors mentioned above, Operating Profit margins increased \$695,000 (62.8%) from a profit of \$1,107,000 in the three-month period ended June 30, 2010 to a profit of \$1,802,000 in the three-month period ended June 30, 2011.

**Interest Income (Expense)-Net.** Interest income in the period ended June 30, 2010 includes interest earned at 6% on the note receivable from Mestek, the Company's former parent, which was issued in June 2009, and repaid in October of 2010, in addition to income earned on short-term investments. Interest expense was recorded at 4% on the Sovereign line of credit loan balance outstanding, which was established in December 2009, and paid in full by the end of November 2010. There was a net increase in interest income of \$22,000 compared to the same quarter last year.

**Other Income (Expense)-Net.** Other Income (Expense)-net primarily consists of foreign currency exchange gains (losses) on transactions with Omega Flex Limited, our U.K. subsidiary.

**Income Tax Expense.** The Company's effective tax rate in 2011 approximates the 2010 rate and does not differ materially from expected statutory rates.

Six-months ended June 30, 2011 vs. June 30, 2010

The Company reported comparative results from continuing operations for the six-month period ended June 30, 2011 and 2010 as follows:

	Six-months ended June 30, (in thousands)			
	2011 (\$000)	2011 %	2010 (\$000)	2010 %
Net Sales	\$24,885	100.0%	\$22,406	100.0%
Gross Profit	\$12,771	51.3%	\$11,957	53.4%
Operating Profit	\$ 3,066	12.3%	\$ 2,827	12.6%

The Company's sales increased \$2,479,000 (11.1%) from \$22,406,000 in the six-month period ended June 30, 2010 as compared to \$24,885,000 in the six-month period June 30, 2011.

Revenue for the six-months ended June 30, 2011 reflects the market's support of the Company's proprietary products and conviction to innovation and safety, as indicated by the strong sales of TracPipe CounterStrike over the prior year. Consistent with the commitment to innovation and safety, on June 15, 2011 the Company announced it was transitioning its flexible gas piping business to TracPipe CounterStrike effective September 1, 2011. TracPipe CounterStrike is the only CSST product on the market that has been listed by independent evaluation agencies for resistance to damage from lightning, seismic events (earthquakes), and flame/smoke spread. Additionally, the Company has recognized improvements in revenue related to the United Kingdom and within its varied Industrial related metal hose products. Overall, volume for the year was up approximately 4% compared to the prior year. There were also increases to the selling prices of numerous products, which were required to overcome the rising price of the Company's core raw materials. A reduction in marketing incentives during the year also helped to increase net sales.

The Company's gross profit margins decreased from 53.4% in the six-month period ended June 30, 2010 to 51.3% in the six-month period ended June 30, 2011. The change is mostly due to cost increases in numerous commodity type metals including nickel and copper, which adversely impact the price of the Company's component material costs, such as stainless steel and brass fittings. Selling price increases were implemented as noted above, but were not sufficient enough to offset the higher material costs in their entirety, due to the competitiveness of the market place.

**Selling Expenses.** Selling expenses consist primarily of employee salaries and associated overhead costs, commissions, and the cost of marketing programs such as advertising, trade shows and related communication costs, and freight. Selling expenses were \$4,352,000 and \$5,048,000 for the six months ended June 30, 2010 and 2011, respectively, increasing \$696,000. Approximately \$260,000 of the increase was attributable to staffing expenses, designed to expand sales markets and marketing expertise. In addition, the Company increased its advertising spending by about \$170,000, with a focus on the many benefits of the Company's

various proprietary products, such as TracPipe CounterStrike. To a lesser extent, expenses related to trade shows, travel, and consulting have also grown. Sales expense as a percentage of sales increased from 19.4% for the six-months ended June 30, 2010 to 20.3% for the six-months ended June 30, 2011.

**General and Administrative Expenses.** General and administrative expenses consist primarily of employee salaries, benefits for administrative, executive and finance personnel, legal and accounting, and corporate general and administrative services. General and administrative expenses were \$3,547,000 and \$3,421,000 for the six months ended June, 2010 and 2011, respectively. The \$126,000 decrease was mainly the result of two larger contrasting variances. Staffing related expenses have decreased \$457,000, primarily associated with incentive compensation which had a higher projected payout rate in 2010 as compared to 2011. In contrast, an increase was experienced in estimates relating to anticipated product liability accruals of \$350,000. General and administrative expense, as a percentage of sales, decreased from 15.8% for the six months ended June 30, 2010 to 13.7% for the six months ended June 30, 2011.

**Engineering Expense.** Engineering expenses consist of development expenses associated with the development of new products and enhancements to existing products, and manufacturing engineering costs. Engineering expenses were reasonably flat for the six months ended June 30, 2010 and 2011 respectively. As a percentage of sales, engineering expenses were 5.5% and 5.0%, for the six months ended June 30, 2010 and 2011, respectively.

**Operating Profits.** Reflecting all of the factors mentioned above, Operating Profit margins increased \$239,000 (8.5%) from a profit of \$2,827,000 in the six-month period ended June 30, 2010 to a profit of \$3,066,000 in the six-month period ended June 30, 2011.

**Interest Income (Expense)-Net.** Interest income in the period ended June 30, 2010 includes interest earned at 6% on the note receivable from Mestek, the Company's former parent, which was issued in June 2009, and repaid in October of 2010, in addition to income earned on short-term investments. Interest expense was recorded at 4% on the Sovereign line of credit loan balance outstanding, which was established in December 2009, and paid in full by the end of November 2010. There was a net increase in interest income from last year of \$39,000.

**Other Income (Expense)-Net.** Other Income (Expense)-net primarily consists of foreign currency exchange gains (losses) on transactions with Omega Flex Limited, our U.K. subsidiary.

**Income Tax Expense.** The Company's effective tax rate in 2011 approximates the 2010 rate and does not differ materially from expected statutory rates.

## CRITICAL ACCOUNTING POLICIES AND USE OF ESTIMATES

(All Amounts in Thousands)

Financial Reporting Release No. 60, released by the Securities and Exchange Commission, requires all companies to include a discussion of critical accounting policies or methods used in the preparation of financial statements. Note 2 of the Notes to the Condensed Consolidated Financial Statements includes a summary of the significant accounting policies and methods used in the preparation of our condensed Consolidated Financial Statements. The following is a brief discussion of the Company's more significant accounting policies.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. The most significant estimates and assumptions relate to revenue recognition and related sales incentives, accounts receivable valuations, inventory valuations, goodwill valuation, product liability reserve and accounting for income taxes. Actual amounts could differ significantly from these estimates.

Our critical accounting policies and significant estimates and assumptions are described in more detail as follows:

#### Revenue Recognition

The Company's revenue recognition activities relate almost entirely to the manufacture and sale of flexible metal hose and pipe. Under generally accepted accounting principles, revenues are considered to have been earned when the Company has substantially accomplished what it must do to be entitled to the benefits represented by the revenues. The following criteria represent preconditions to the recognition of revenue:

- Persuasive evidence of an arrangement for the sale of product or services must exist.
- Delivery has occurred or services rendered.
- The sales price to the customer is fixed or determinable.
- Collection is reasonably assured.

The Company recognizes revenue upon shipment in accordance with the above principles.

Gross sales are reduced for all consideration paid to customers for which no identifiable benefit is received by the Company. This includes promotional incentives, which includes various programs including year-end rebates and discounts. The amounts of certain incentives are known with reasonable certainty at the time of sale, while others are projected based upon the most reliable information available at the reporting date.

Commissions, for which the Company receives an identifiable benefit, are accounted for as a sales expense.

#### Accounts Receivable

Accounts receivable are reduced by an allowance for amounts that may become uncollectible in the future. The estimated allowance for uncollectible amounts is based primarily on specific analysis of accounts in the receivable portfolio and historical write-off experience. While management believes the allowance to be adequate, if the financial condition of the

Company's customers were to deteriorate, resulting in their inability to make payments, additional allowances may be required.

#### Inventory

Inventories are valued at the lower of cost or market. Cost of inventories is determined by the first-in, first-out (FIFO) method. The Company generally considers inventory quantities beyond two-years usage, measured on a historical usage basis, to be excess inventory and reduces the gross carrying value of inventory accordingly.

#### Goodwill and Intangible Assets

In accordance with FASB ASC Topic 350 Intangibles – Goodwill. The Company performed an annual impairment test in accordance with this guidance as of December 31, 2010. This analysis did not indicate any impairment of goodwill. There are no circumstances that indicate that Goodwill might be impaired at June 30, 2011.

#### Product Liability Reserves

Product liability reserves represent the estimated remaining costs for known claims against the Company, and incurred but not reported claims for the current year. The Company uses historical data to project unreported claims. As explained more fully under Contingencies, for various product liability claims covered under the Company's general liability insurance policies, the Company must pay certain defense costs within its deductible or self-insured retention limits, in amounts ranging from \$25,000 to \$75,000, depending on the policy year, up to an aggregate amount. The Company is vigorously defending against all known claims.

#### Accounting for Income Taxes

The Company accounts for federal tax liabilities in accordance with ASC Topic 740, Income Taxes. Under this method the Company recorded tax expense and related deferred taxes and tax benefits.

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities from a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is provided for deferred tax assets if it is more likely than not that these items will either expire before the Company is able to realize the benefit, or that future deductibility is uncertain.

## LIQUIDITY AND CAPITAL RESOURCES

Six Months ended June 30, 2011

The Company's cash balance at June 30, 2011 was \$1,802,000 compared to \$2,209,000 at December 31, 2010, which represents a decrease of \$407,000 between periods.

### Operating Activities

The company's cash from operations was reduced by \$362,000 during the first six months of 2011, versus an increase of \$856,000 during the same period in 2010, a change of \$1,218,000. The more notable uses of cash were associated with accrued commissions and sales incentives, accounts receivable, and accrued compensation. These were however offset partially by an increase in cash produced from other assets. These items are described below.

Accrued commissions and sales incentives required \$821,000 more cash, largely due to the increase in sales in 2010 over 2009, thus allowing more customers to reach growth tiers and earn higher rebates, which were paid out during of 2011.

Accounts receivable including the impact from reserves decreased cash by \$684,000. The majority of this is timing related, as there has been no discernible increase to the Company's accounts receivable ageing, and no significant collectability issues.

Accrued compensation was also changed by \$448,000, as this was being estimated and accrued at a much higher rate during the first half of 2010.

A favorable change to cash of \$407,000 was however acknowledged in Other Assets, with the most significant factor related to higher tax payments in 2010.

### Investing Activities

Cash used in investing activities for the first six months of 2011 was \$86,000, compared with \$71,000 used in the first six months of 2010, all of which was related to a capital spending.

### Financing

Cash used in financing activities during the first six months of 2010 was \$2,003,000, the result of available cash being applied to the outstanding line of credit. There were no financing activities in the first six months of 2011.

## CONTINGENT LIABILITIES AND GUARANTEES

See Note 5 to the Company's financial statements.

## OFF-BALANCE SHEET ARRANGEMENTS

Refer to Item 7 of the Company's 2010 year-end Form 10-K under the caption "Tabular Disclosure of Contractual Obligations and Off-Balance Sheet Arrangements".

### Item 3. Quantitative And Qualitative Information About Market Risks

The Company does not engage in the purchase or trading of market risk sensitive instruments. The Company does not presently have any positions with respect to hedge transactions such as forward contracts relating to currency fluctuations. No market risk sensitive instruments are held for speculative or trading purposes.

### Item 4 – Controls And Procedures

#### (a) Evaluation of Disclosure Controls and Procedures.

At the end of the fiscal second quarter of 2011, the Company evaluated the effectiveness of the design and operation of its disclosure controls and procedures. The Company's disclosure controls and procedures are designed to ensure that the Company records, processes, summarizes and reports in a timely manner the information required to be disclosed in the periodic reports filed by the Company with the Securities and Exchange Commission. The Company's management, including the chief executive officer and chief financial officer, have conducted an evaluation of the effectiveness of the design and operation of the Company's Disclosure Controls and Procedures as defined in the Rule 13a-15(e) of Securities Exchange Act of 1934. Based on that evaluation, the chief executive officer and chief financial officer have concluded that, as of the date of this report, the Company's disclosure controls and procedures are effective to provide reasonable assurance of achieving the purposes described in Rule 13a-15(e), and no changes are required at this time.

#### (b) Changes in Internal Controls.

There was no change in the Company's "internal control over financial reporting" (as defined in rule 13a-15(f) of the Securities Exchange Act of 1934) identified in connection with the evaluation required by Rule 13a-15(d) of the Securities Exchange Act of 1934 that occurred during the three-month period covered by this Report on Form 10-Q that has materially affected or is reasonably likely to materially affect the Company's internal control over financial reporting subsequent to the date the chief executive officer and chief financial officer completed their evaluation.

## PART II - OTHER INFORMATION

### Item 1 – Legal Proceedings

The Company is not presently involved in any litigation that it believes could materially and adversely affect its financial condition or results of operations.

In October 2010, the company took the first case relating to CSST and lightning to trial. At trial the company proved that the company was not negligent in the product design, but the jury did find the company liable under strict product liability. However, the company has appealed the jury verdict. The final outcome of the case is not yet determined.

In 2007, the Company instituted a legal complaint against a former insurer, seeking reimbursement of amounts paid in defense of a class action litigation, as well as supplementary payments made in connection with the class action. After an adverse ruling at the trial court level, the Company appealed the ruling, and in January 2011, the appeals court found in the Company's favor, reversing the trial court decision and establishing the insurer's legal obligation to reimburse us for the defense costs. The case will be remanded to the trial court for further proceedings and determination of the amount payable to the company, which the Company estimates to be in excess of \$3,000,000, together with attorneys' fees incurred in establishing the insurer's defense obligations. The litigation has not been fully resolved and while the Company believes they will ultimately prevail, further developments in the case could reduce or eliminate any potential recoveries.

#### Item 4 – Submission of Matter to a Vote of the Security Holders

On June 7, 2011, the Company held its 2011 Annual Meeting of Shareholders. The shareholders voted on the following proposals:

1. To elect three Class 3 directors for a three year term expiring at the 2014 annual meeting of shareholders.
2. To ratify the appointment by the audit committee of the board of directors of McGladrey & Pullen, LLP (McGladrey), as the independent auditors for the Company for the fiscal year ending December 31, 2011.

The results of the voting are as follows:

#### 1. Election of Directors

	For	Against	Non-votes
John E. Reed	6,826,652	28,452	1,235,812
Kevin R. Hoben	6,832,045	23,059	1,235,812
Mark F. Albino	6,832,085	23,019	1,235,812

2. To ratify the appointment of McGladrey as the independent auditors for the Company for the fiscal year ending December 31, 2011:

For	8,080,290
Against	9,250
Abstain	1,376

Item 6 - Exhibits

Exhibit

No. Description

31.1 Certification of Chief Executive Officer of Omega Flex, Inc. pursuant to Rule 15d-14(a) promulgated under the Securities Exchange Act of 1934, as amended.

31.2 Certification of Chief Financial Officer of Omega Flex, Inc. pursuant to 15d-14(a) promulgated under the Securities Exchange Act of 1934, as amended.

32.1 Certification of Chief Executive Officer and Chief Financial Officer of Omega Flex, Inc., pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
