GLOSSARY OF TERMS

As commonly used in the oil and gas industry and as used in this Quarterly Report on Form 10-Q, the following terms have the following meanings:

Bbl. One stock tank barrel or 42 United States gallons liquid volume.

Bcf. One billion cubic feet.

Bcfe. One billion cubic feet equivalent, determined using a ratio of six Mcf of gas to one Bbl of oil, condensate or natural gas liquids.

Btu. One British thermal unit, which is the heat required to raise the temperature of a one-pound mass of water from 58.5 degrees to 59.5 degrees Fahrenheit.

MBbls. One thousand barrels of oil or other liquid hydrocarbons.

MBbls/d. MBbls per day.

Mcf. One thousand cubic feet.

Mcfe. One thousand cubic feet equivalent, determined using the ratio of six Mcf of gas to one Bbl of oil, condensate or natural gas liquids.

MMBbls. One million barrels of oil or other liquid hydrocarbons.

MMBtu. One million British thermal units.

MMcf. One million cubic feet.

MMcf/d. MMcf per day.

MMcfe. One million cubic feet equivalent, determined using a ratio of six Mcf of gas to one Bbl of oil, condensate or natural gas liquids.

MMcfe/d. MMcfe per day.

MMMBtu. One billion British thermal units.

Tcfe. One trillion cubic feet equivalent, determined using the ratio of six Mcf of gas to one Bbl of oil, condensate or natural gas liquids.

LINN ENERGY, LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) Basis of Presentation

Nature of Business

Linn Energy, LLC (“LINN Energy” or the “Company”) is an independent oil and gas company focused on the development and acquisition of long-life properties which complement its asset profile in producing basins within the United States.

Principles of Consolidation and Reporting

The condensed consolidated financial statements at September 30, 2009, and for the three months and nine months ended September 30, 2009, and September 30, 2008, are unaudited, but in the opinion of management include all adjustments (consisting only of normal recurring adjustments) necessary for a fair presentation of the results for the interim periods. Subsequent events were evaluated through the issuance date of the financial statements, November 4, 2009. Certain information and note disclosures normally included in annual financial statements prepared in accordance with United States generally accepted accounting principles (“GAAP”) have been condensed or omitted under Securities and Exchange Commission (“SEC”) rules and regulations, and as such this report should be read in conjunction with the financial statements and notes in the Company’s Annual Report on Form 10-K for the year ended December 31, 2008. The results reported in these unaudited condensed consolidated financial statements should not necessarily be taken as indicative of results that may be expected for the entire year.

The condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany transactions and balances have been eliminated upon consolidation.

Presentation Change

Certain amounts in the condensed consolidated financial statements and notes thereto have been reclassified to conform to the 2009 financial statement presentation. In particular, the condensed consolidated statements of operations include categories of expense titled “lease operating expenses,” “transportation expenses,” “exploration costs,” “taxes, other than income taxes” and “(gain) loss on sale of assets and other, net” which were not reported in prior period presentations. The new categories present expenses in greater detail than was previously reported and all comparative periods presented have been reclassified to conform to the 2009 financial statement presentation. There was no impact to net income (loss) for prior periods.

Discontinued Operations

The Company’s Appalachian Basin and Mid Atlantic Well Service, Inc. (“Mid Atlantic”) operations have been classified as discontinued operations on the condensed consolidated statements of operations for all periods presented. Unless otherwise indicated, information about the statements of operations that is presented in the notes to condensed consolidated financial statements relates only to LINN Energy’s continuing operations. See Note 2 for additional details.

Use of Estimates

The preparation of the accompanying condensed consolidated financial statements in conformity with GAAP requires management of the Company to make estimates and assumptions about future events. These estimates and the

underlying assumptions affect the amount of assets and liabilities reported, disclosures about contingent assets and liabilities, and reported amounts of revenues and expenses. The estimates that are particularly significant to the financial statements include estimates of the Company's

5

Table of Contents

LINN ENERGY, LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
(Unaudited)

reserves of oil, gas and natural gas liquids (“NGL”), future cash flows from oil and gas properties, depreciation, depletion and amortization, asset retirement obligations, fair values of commodity and interest rate derivatives, and fair values of assets acquired and liabilities assumed. These estimates and assumptions are based on management’s best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. Illiquid credit markets and volatile equity and energy markets have combined to increase the uncertainty inherent in such estimates and assumptions. As future events and their effects cannot be determined with precision, actual results could differ from these estimates. Any changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods.

(2) Acquisitions, Divestitures and Discontinued Operations

Acquisitions – 2009

On August 31, 2009, and September 30, 2009, the Company completed the acquisitions of certain oil and gas properties located in the Permian Basin in Texas and New Mexico from Forest Oil Corporation and Forest Oil Permian Corporation, (collectively referred to as “Forest”) for an aggregate contract price of \$117.6 million. The Company paid \$116.5 million in cash and recorded a receivable from Forest of approximately \$2.7 million, resulting in total consideration for the acquisitions of approximately \$113.8 million. The transactions were financed with borrowings from the Company’s Credit Facility (as defined in Note 6). The acquisitions represent a strategic entry into the Permian Basin for the Company.

The acquisitions were accounted for under the acquisition method of accounting in accordance with an accounting standard adopted by the Company effective January 1, 2009, (see Note 16). Accordingly, the Company conducted a preliminary assessment of net assets acquired and recognized provisional amounts for identifiable assets acquired and liabilities assumed at their estimated acquisition date fair values, while transaction and integration costs associated with the acquisitions were expensed as incurred. The initial accounting for the business combinations is not complete and adjustments to provisional amounts, or recognition of additional assets acquired or liabilities assumed, may occur as more detailed analyses are completed and additional information is obtained about the facts and circumstances that existed as of the acquisition dates.

Table of Contents

LINN ENERGY, LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
(Unaudited)

The following presents the preliminary values assigned to the net assets acquired as of the acquisition dates (in thousands):

Assets:	
Current assets	\$ 800
Oil and gas properties	115,952
Total assets acquired	\$ 116,752
Liabilities:	
Current liabilities	\$ 1,567
Asset retirement obligations	1,350
Total liabilities assumed	\$ 2,917
Net assets acquired	\$ 113,835

Current assets include gas imbalance receivables, prepaid ad valorem taxes, and inventory of oil produced but not yet sold. Current liabilities include gas imbalance payables, ad valorem taxes payable and environmental liabilities.

The preliminary fair values of oil and gas properties and asset retirement obligation liabilities were measured using valuation techniques that convert future cash flows to a single discounted amount. Significant inputs to the valuation of oil and gas properties include estimates of: (i) oil and gas reserves; (ii) future operating and development costs; (iii) future oil and gas prices; and (iv) a market-based weighted average cost of capital rate. Significant inputs to the valuation of asset retirement obligation liabilities include estimates of: (i) plug and abandon costs per well; (ii) remaining life per well; and (iii) a credit-adjusted risk-free interest rate.

Acquisition – 2008

On January 31, 2008, the Company completed the acquisition of certain oil and gas properties located primarily in the Mid-Continent Shallow region from Lamamco Drilling Company for \$542.2 million.

Divestitures – 2008

On December 4, 2008, the Company completed the sale of its deep rights in certain central Oklahoma acreage, which includes the Woodford Shale interval, to Devon Energy Production Company, LP (“Devon”). During 2008, the Company received net proceeds of \$153.2 million and the carrying value of net assets sold was \$54.2 million. In the first quarter of 2009, certain post-closing matters were resolved and the Company recorded a gain of \$25.4 million, which is recorded in “(gain) loss on sale of assets and other, net” on the condensed consolidated statements of operations for the nine months ended September 30, 2009.

On August 15, 2008, the Company completed the sale of certain properties in the Verden area in Oklahoma to Laredo Petroleum, Inc. During 2008, the Company received net proceeds equal to the carrying value of net assets sold of \$169.4 million.

On July 1, 2008, the Company completed the sale of its interests in oil and gas properties located in the Appalachian Basin to XTO Energy, Inc. During 2008, the Company received net proceeds of \$566.5 million and the carrying value of net assets sold was \$405.8 million. In addition, in March 2008, the

Table of Contents

LINN ENERGY, LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
(Unaudited)

Company exited the drilling and service business in the Appalachian Basin provided by its wholly owned subsidiary Mid Atlantic. The Company used the net proceeds from all divestitures to reduce indebtedness.

Discontinued Operations

The Company's Appalachian Basin and Mid Atlantic operations have been classified as discontinued operations on the condensed consolidated statements of operations for all periods presented. The following summarizes the Appalachian Basin and Mid Atlantic amounts included in "income (loss) from discontinued operations, net of taxes" on the condensed consolidated statements of operations:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2009	2008	2009	2008
	(in thousands)			
Total revenues and other	\$ —	\$ (421)	\$ (1,216)	\$ 49,564
Total operating expenses	(1,247)	(1,549)	(970)	(23,779)
Interest expense	—	196	—	(13,398)
Income (loss) from discontinued operations, net of taxes	\$ (1,247)	\$ (1,774)	\$ (2,186)	\$ 12,387

Discontinued operations activity for 2009 primarily represents activity related to post-closing adjustments. The Company computed interest expense related to discontinued operations for 2008 based on debt required to be repaid as a result of the disposal transaction.

(3) Unitholders' Capital

Public Offering of Units

In October 2009, the Company sold 8,625,000 units, representing limited liability company interests at \$21.90 per unit (\$21.024 per unit, net of underwriting discount), for net proceeds (after underwriting discount of \$7.6 million and estimated offering expenses of \$0.7 million) of approximately \$180.6 million, which was used to reduce indebtedness under the Company's Credit Facility.

In May 2009, the Company sold 6,325,000 units, representing limited liability company interests at \$16.25 per unit (\$15.60 per unit, net of underwriting discount), for net proceeds (after underwriting discount of \$4.1 million and offering expenses of \$0.4 million) of approximately \$98.2 million, which was used to reduce indebtedness under the Company's Credit Facility.

Unit Repurchase Plan

In October 2008, the Board of Directors of the Company authorized the repurchase of up to \$100.0 million of the Company's outstanding units from time to time on the open market or in negotiated purchases. During the nine months ended September 30, 2009, 123,800 units were repurchased at an average unit price of \$12.99, for a total cost of approximately \$1.6 million. All units were subsequently canceled. At September 30, 2009, approximately \$85.4 million was available for unit repurchase under the program. The timing and amounts of any such repurchases will be

at the discretion of management, subject to market conditions and other factors, and in accordance with applicable securities laws and other legal requirements. The repurchase plan does not obligate the Company to acquire any specific number of units and may be discontinued at any time. Units are repurchased at fair market value on the date of repurchase.

8

Table of Contents

LINN ENERGY, LLC
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
 (Unaudited)

Cancellation of Units

During the nine months ended September 30, 2009, the Company purchased 63,031 units for approximately \$1.1 million, in conjunction with units received by the Company for the payment of minimum withholding taxes due on units issued under its equity compensation plan (see Note 12). All units were subsequently canceled.

Distributions

Under the limited liability company agreement, Company unitholders are entitled to receive a quarterly distribution of available cash to the extent there is sufficient cash from operations after establishment of cash reserves and payment of fees and expenses. Distributions paid by the Company during the nine months ended September 30, 2009, are presented on the condensed consolidated statement of unitholders' capital. On October 21, 2009, the Company's Board of Directors declared a cash distribution of \$0.63 per unit with respect to the third quarter of 2009. The distribution, totaling approximately \$81.9 million, will be paid November 13, 2009, to unitholders of record as of the close of business November 6, 2009.

(4) Oil and Gas Capitalized Costs

Aggregate capitalized costs related to oil and gas production activities with applicable accumulated depletion and amortization are presented below:

	September 30, 2009	December 31, 2008
	(in thousands)	
Proved properties:		
Leasehold acquisition	\$ 3,396,033	\$ 3,278,155
Development	581,976	460,730
Unproved properties	82,394	92,298
	4,060,403	3,831,183
Less accumulated depletion and amortization	(416,766)	(278,805)
	\$ 3,643,637	\$ 3,552,378

(5) Business and Credit Concentrations

For the three months and nine months ended September 30, 2009, the Company's three largest customers represented approximately 26%, 19% and 15%, and 23%, 18% and 15%, respectively, of the Company's sales. For the three months and nine months ended September 30, 2008, the Company's four largest customers represented approximately 17%, 12%, 11% and 10%, and 19%, 11%, 11% and 10%, respectively, of the Company's sales.

At September 30, 2009, trade accounts receivable from three customers were more than 10% of the Company's total trade accounts receivable. At September 30, 2009, trade accounts receivable from the Company's three largest customers represented approximately 24%, 18% and 13%, respectively, of the Company's receivables. At December 31, 2008, trade accounts receivable from two customers were more than 10% of the Company's total trade accounts receivable. At December 31, 2008, trade accounts receivable from the Company's two largest customers represented approximately 20% and 16%, respectively, of the Company's receivables.

(6) Debt

At September 30, 2009, and December 31, 2008, the Company had the following debt outstanding:

	September 30, 2009	December 31, 2008
(in thousands)		
Credit facility (1)	\$ 1,251,000	\$ 1,403,393
Senior notes due 2017, net (2)	238,038	
Senior notes due 2018, net (3)	250,454	250,175
Less current maturities		
	\$ 1,739,492	\$ 1,653,568

(1) Variable interest rate of 3.0% at September 30, 2009, and 2.47% at December 31, 2008.

(2) Fixed interest rate of 11.75% and effective interest rate of 12.73%. Amount is net of unamortized discount of approximately \$12.0 million at September 30, 2009.

(3) Fixed interest rate of 9.875% and effective interest rate of 10.25%. Amount is net of unamortized discount of approximately \$5.5 million and \$5.8 million at September 30, 2009, and December 31, 2008, respectively.

Credit Facility

On April 28, 2009, the Company entered into a Fourth Amended and Restated Credit Agreement (“Credit Facility”), with an initial borrowing base of \$1.75 billion and a maturity of August 2012, which amended and restated the Company’s existing credit facility, which had a maturity of August 2010. The terms of the Credit Facility required that, upon the issuance of the senior notes due 2017 in May 2009 (see below) and cancellation of certain commodity derivatives in July 2009 (see Note 7), the borrowing base be decreased by approximately \$62.5 million and \$45.0 million, respectively, to \$1.64 billion at September 30, 2009. At September 30, 2009, available borrowing capacity was \$386.0 million, which reflects borrowings used to finance the recent acquisitions in the Permian Basin (see Note 2) and a \$5.5 million reduction in availability for outstanding letters of credit. In October 2009, the Company used net proceeds from its public offering of units (see Note 3) to reduce indebtedness under its Credit Facility. At October 30, 2009, available borrowing capacity was \$535.0 million, which includes a \$5.5 million reduction in availability for outstanding letters of credit. In connection with the amended and restated Credit Facility, during the nine months ended September 30, 2009, the Company paid approximately \$52.7 million in financing fees and expenses, which were deferred and will be amortized over the life of the Credit Facility.

Redetermination of the borrowing base under the Credit Facility occurs semi-annually, in April and October, as well as upon the occurrence of certain events, by the lenders in their sole discretion, based primarily on reserve reports that reflect oil and gas prices at such time. Significant declines in oil, gas or NGL prices may result in a decrease in the borrowing base. The Company’s obligations under the Credit Facility are secured by mortgages on its oil and gas properties as well as a pledge of all ownership interests in its operating subsidiaries. The Company is required to maintain the mortgages on properties representing at least 80% of its oil and gas properties. Additionally, the obligations under the Credit Facility are guaranteed by all of the Company’s material operating subsidiaries and may be guaranteed by any future subsidiaries.

At the Company's election, interest on borrowings under the Credit Facility is determined by reference to either the London Interbank Offered Rate ("LIBOR") plus an applicable margin between 2.50% and 3.25% per annum or the alternate base rate ("ABR") plus an applicable margin between 1.00% and 1.75% per

10

Table of Contents

LINN ENERGY, LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
(Unaudited)

annum. Interest is generally payable quarterly for ABR loans and at the applicable maturity date for LIBOR loans. The Company is required to pay a fee of 0.5% per annum on the unused portion of the borrowing base under the Credit Facility.

The Credit Facility contains various covenants, substantially similar to those included prior to the amendment and restatement, which limit the Company's ability to: (i) incur indebtedness; (ii) enter into commodity and interest rate swaps; (iii) grant certain liens; (iv) make certain loans, acquisitions, capital expenditures and investments; (v) make distributions other than from available cash; and (vi) merge or consolidate, or engage in certain asset dispositions, including a sale of all or substantially all of its assets. The Credit Facility also contains covenants, substantially similar to those included prior to the amendment and restatement, which require the Company to maintain adjusted earnings to interest expense and current liquidity financial ratios. The Company is in compliance with all financial and other covenants of its Credit Facility.

Senior Notes Due 2017

On May 12, 2009, the Company entered into a purchase agreement with a group of initial purchasers ("Initial Purchasers"), pursuant to which the Company agreed to issue \$250.0 million in aggregate principal amount of the Company's senior notes due 2017 ("2017 Notes"). The 2017 Notes were offered and sold to the Initial Purchasers and then resold to qualified institutional buyers, each in transactions exempt from the registration requirements of the Securities Act. The Company used the net proceeds (after deducting the Initial Purchasers' discounts and offering expenses) of approximately \$230.8 million to reduce indebtedness under its Credit Facility. In connection with the 2017 Notes, the Company incurred financing fees and expenses of approximately \$6.9 million, which will be amortized over the life of the 2017 Notes; the expense is recorded in "interest expense, net of amounts capitalized" on the condensed consolidated statements of operations. The \$12.3 million discount on the 2017 Notes will be amortized over the life of the 2017 Notes; the expense is recorded in "interest expense, net of amounts capitalized" on the condensed consolidated statements of operations.

The 2017 Notes were issued under an Indenture dated May 18, 2009, ("Indenture"), mature May 15, 2017, and bear interest at 11.75%. Interest is payable semi-annually beginning November 15, 2009. The 2017 Notes are general unsecured senior obligations of the Company and are effectively junior in right of payment to any secured indebtedness of the Company to the extent of the collateral securing such indebtedness. Each of the Company's material subsidiaries guaranteed the 2017 Notes on a senior unsecured basis. The Indenture provides that the Company may redeem: (i) on or prior to May 15, 2011, up to 35% of the aggregate principal amount of the 2017 Notes at a redemption price of 111.75% of the principal amount, plus accrued and unpaid interest; (ii) prior to May 15, 2013, all or part of the 2017 Notes at a redemption price equal to the principal amount, plus a make-whole premium (as defined in the Indenture) and accrued and unpaid interest; and (iii) on or after May 15, 2013, all or part of the 2017 Notes at redemption prices equal to 105.875% in 2013, 102.938% in 2014 and 100% in 2015 and thereafter. The Indenture also provides that, if a change of control (as defined in the Indenture) occurs, the holders have a right to require the Company to repurchase all or part of the 2017 Notes at a redemption price equal to 101%, plus accrued and unpaid interest.

The 2017 Notes' Indenture contains covenants that, among other things, limit the Company's ability to: (i) pay distributions on, purchase or redeem the Company's units or redeem its subordinated debt; (ii) make investments; (iii) incur or guarantee additional indebtedness or issue certain types of equity securities; (iv) create certain liens; (v) sell assets; (vi) consolidate, merge or transfer all or substantially all of the Company's assets; (vii) enter into agreements that restrict distributions or other payments from the Company's restricted subsidiaries to the Company;

(viii) engage in transactions with affiliates; and (ix) create unrestricted subsidiaries.

11

Table of Contents

LINN ENERGY, LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
(Unaudited)

In connection with the issuance and sale of the 2017 Notes, the Company entered into a Registration Rights Agreement (“Registration Rights Agreement”) with the Initial Purchasers. Under the Registration Rights Agreement, the Company agreed to use its reasonable best efforts to file with the SEC and cause to become effective a registration statement relating to an offer to issue new notes having terms substantially identical to the 2017 Notes in exchange for outstanding 2017 Notes. In certain circumstances, the Company may be required to file a shelf registration statement to cover resales of the 2017 Notes. The Company will not be obligated to file the registration statements described above if the restrictive legend on the 2017 Notes has been removed and the 2017 Notes are freely tradable (in each case, other than with respect to persons that are affiliates of the Company) pursuant to Rule 144 of the Securities Act, as of the 366th day after the 2017 Notes were issued. If the Company fails to satisfy its obligations under the Registration Rights Agreement, the Company may be required to pay additional interest to holders of the 2017 Notes under certain circumstances.

Senior Notes Due 2018

On June 24, 2008, the Company entered into a purchase agreement with a group of initial purchasers (“Initial Purchasers”), pursuant to which the Company agreed to issue \$255.9 million in aggregate principal amount of the Company’s senior notes due 2018 (“2018 Notes”). The 2018 Notes were offered and sold to the Initial Purchasers and then resold to qualified institutional buyers, each in transactions exempt from the registration requirements of the Securities Act. The Company used the net proceeds (after deducting the Initial Purchasers’ discounts and offering expenses) of approximately \$243.6 million to repay an outstanding term loan. In connection with the 2018 Notes, the Company incurred financing fees and expenses of approximately \$7.8 million, which will be amortized over the life of the 2018 Notes; the expense is recorded in “interest expense, net of amounts capitalized” on the condensed consolidated statements of operations. The \$5.9 million discount on the 2018 Notes will be amortized over the life of the 2018 Notes; the expense is recorded in “interest expense, net of amounts capitalized” on the condensed consolidated statements of operations.

The 2018 Notes were issued under an Indenture dated June 27, 2008, (“Indenture”), mature July 1, 2018, and bear interest at 9.875%. Interest is payable semi-annually beginning January 1, 2009. The 2018 Notes are general unsecured senior obligations of the Company and are effectively junior in right of payment to any secured indebtedness of the Company to the extent of the collateral securing such indebtedness. Each of the Company’s material subsidiaries guaranteed the 2018 Notes on a senior unsecured basis. The Indenture provides that the Company may redeem: (i) on or prior to July 1, 2011, up to 35% of the aggregate principal amount of the 2018 Notes at a redemption price of 109.875% of the principal amount, plus accrued and unpaid interest; (ii) prior to July 1, 2013, all or part of the 2018 Notes at a redemption price equal to the principal amount, plus a make-whole premium (as defined in the Indenture) and accrued and unpaid interest; and (iii) on or after July 1, 2013, all or part of the 2018 Notes at redemption prices equal to 104.938% in 2013, 103.292% in 2014, 101.646% in 2015 and 100% in 2016 and thereafter. The Indenture also provides that, if a change of control (as defined in the Indenture) occurs, the holders have a right to require the Company to repurchase all or part of the 2018 Notes at a redemption price equal to 101%, plus accrued and unpaid interest.

The 2018 Notes’ Indenture contains covenants that, among other things, limit the Company’s ability to: (i) pay distributions on, purchase or redeem the Company’s units or redeem its subordinated debt; (ii) make investments; (iii) incur or guarantee additional indebtedness or issue certain types of equity securities; (iv) create certain liens; (v) sell assets; (vi) consolidate, merge or transfer all or substantially all of the Company’s assets; (vii) enter into agreements that restrict distributions or other payments from the Company’s restricted subsidiaries to the Company; (viii) engage in transactions with affiliates; and (ix) create unrestricted subsidiaries. In June 2009, the Company

instructed the trustee to remove the restrictive legend from the 2018 Notes making them freely tradable (other than with respect to persons that
12

(Unaudited)

are affiliates of the Company). This terminated the Company's obligations under a registration rights agreement entered into in connection with issuance of the 2018 Notes.

Fair Value Measurements

At September 30, 2009, the estimated fair values of the 2017 Notes and the 2018 Notes were approximately \$268.8 million and \$254.3 million, respectively. The fair values were estimated based on prices quoted from third-party financial institutions.

(7) Derivatives

Commodity Derivatives

The Company sells oil, gas and NGL in the normal course of its business and utilizes derivative instruments to minimize the variability in cash flows due to price movements in oil, gas and NGL. The Company enters into derivative instruments such as swap contracts, collars and put options to economically hedge a portion of its forecasted oil, gas and NGL sales. Oil puts are also used to economically hedge NGL sales. The Company did not designate these contracts as cash flow hedges; therefore, the changes in fair value of these instruments are recorded in current earnings. See Note 8 for fair value disclosures about oil and gas commodity derivatives.

(1) Settle on the Panhandle Eastern Pipeline (“PEPL”) spot price of gas to hedge basis differential associated with gas production in the Mid-Continent Deep and Mid-Continent Shallow regions.

(2) The Company utilizes oil puts to hedge revenues associated with its NGL production.

Settled derivatives on gas production for the three months and nine months ended September 30, 2009, included a volume of 12,970 MMBtu and 38,910 MMBtu at average contract prices of \$8.32. Settled derivatives on oil and NGL production for the three months and nine months ended September 30, 2009, included a volume of 1,132 MBbls and 3,397 MBbls at average contract prices of \$102.21. The gas derivatives are settled based on the closing New York Mercantile Exchange (“NYMEX”) future price of gas or on the published PEPL spot price of gas on the settlement date, which occurs on the third day

14

Table of Contents

LINN ENERGY, LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
(Unaudited)

preceding the production month. The oil derivatives are settled based on the month's average daily NYMEX price of light oil and settlement occurs on the final day of the production month.

Interest Rate Swaps

The Company has entered into interest rate swap agreements based on LIBOR to minimize the effect of fluctuations in interest rates. If LIBOR is lower than the fixed rate in the contract, the Company is required to pay the counterparties the difference, and conversely, the counterparties are required to pay the Company if LIBOR is higher than the fixed rate in the contract. The Company did not designate the interest rate swap agreements as cash flow hedges; therefore, the changes in fair value of these instruments are recorded in current earnings. See Note 8 for fair value disclosures about interest rate swaps.

The following presents the settlement terms of the interest rate swaps at September 30, 2009:

	Year 2009	Year 2010	Year 2011	Year 2012	Year 2013 (1)
	(dollars in thousands)				
Notional amount	\$ 1,212,000	\$ 1,212,000	\$ 1,212,000	\$ 1,212,000	\$ 1,212,000
Fixed rate	3.85 %	3.85 %	3.85 %	3.85 %	3.85 %

(1) Actual settlement term is through January 6, 2014.

Outstanding Notional Amounts

The following presents the outstanding notional amounts and maximum number of months outstanding of derivative instruments:

	September 30, 2009	December 31, 2008
Outstanding notional amounts of gas contracts (MMMBtu)	122,250	196,756
Maximum number of months gas contracts outstanding	27	48
Outstanding notional amounts of oil contracts (MBbls)	10,483	21,229
Maximum number of months oil contracts outstanding	27	72
Outstanding notional amount of interest rate swaps (in thousands)	\$ 1,212,000	\$ 1,212,000
Maximum number of months interest rate swaps outstanding	51	24

Balance Sheet Presentation

The Company's commodity and interest rate derivatives are presented on a net basis in "derivative instruments" on the condensed consolidated balance sheets. The following summarizes the fair value of derivatives outstanding on a gross basis:

	September 30, 2009	December 31, 2008
(in thousands)		
Assets:		
Commodity derivatives	\$ 636,933	\$ 977,847
Interest rate swaps	179	
	\$ 637,112	\$ 977,847
Liabilities:		
Commodity derivatives	\$ 149,036	\$ 119,124
Interest rate swaps	77,149	82,422
	\$ 226,185	\$ 201,546

By using derivative instruments to economically hedge exposures to changes in commodity prices and interest rates, the Company exposes itself to credit risk and market risk. Credit risk is the failure of the counterparty to perform under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes the Company, which creates credit risk. The Company's counterparties are participants or affiliates of participants in its Credit Facility (see Note 6), which is secured by the Company's oil and gas reserves; therefore, the Company is not required to post any collateral. The Company does not require collateral from its counterparties. The maximum amount of loss due to credit risk that the Company would incur if its counterparties failed completely to perform according to the terms of the contracts, based on the gross fair value of financial instruments, was approximately \$637.1 million at September 30, 2009. The Company minimizes the credit risk in derivative instruments by: (i) limiting its exposure to any single counterparty; (ii) entering into derivative instruments only with counterparties that meet the Company's minimum credit quality standard, or have a guarantee from an affiliate that meets the Company's minimum credit quality standard; and (iii) monitoring the creditworthiness of the Company's counterparties on an ongoing basis. In accordance with the Company's standard practice, its commodity and interest rate derivatives are subject to counterparty netting under agreements governing such derivatives and therefore the risk of such loss is somewhat mitigated.

Gain (Loss) on Derivatives

Gains and losses on derivatives are reported on the condensed consolidated statements of operations in "gain (loss) on oil and gas derivatives" and "gain (loss) on interest rate swaps" and include realized and unrealized gains (losses). Realized gains (losses), excluding canceled commodity derivatives, represent amounts related to the settlement of derivative instruments, and for commodity derivatives, are aligned with the underlying production. Unrealized gains (losses) represent the change in fair value of the derivative instruments and are noncash items.

Table of Contents

LINN ENERGY, LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
(Unaudited)

The following presents the Company's reported gains and losses on derivative instruments:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2009	2008	2009	2008
(in thousands)				
Realized gains (losses):				
Commodity derivatives	\$ 97,209	\$ (28,270)	\$ 328,165	\$ (62,289)
Interest rate swaps	(10,958)	(5,817)	(31,629)	(11,479)
Canceled derivatives	44,780	(13,161)	48,977	(81,358)
	\$ 131,031	\$ (47,248)	\$ 345,513	\$ (155,126)
Unrealized gains (losses):				
Commodity derivatives	\$ (156,054)	\$ 887,249	\$ (462,727)	\$ (150,133)
Interest rate swaps	(14,751)	(3,877)	6,327	(6,004)
	\$ (170,805)	\$ 883,372	\$ (456,400)	\$ (156,137)
Total gains (losses):				
Commodity derivatives	\$ (14,065)	\$ 845,818	\$ (85,525)	\$ (293,780)
Interest rate swaps	(25,709)	(9,694)	(25,362)	(17,483)
	\$ (39,774)	\$ 836,124	\$ (110,887)	\$ (311,263)

During the three months and nine months ended September 30, 2009, the Company canceled (before the contract settlement date) derivative contracts on estimated future oil and gas production resulting in realized net gains of approximately \$44.8 million and \$49.0 million, respectively. In July 2009, the Company repositioned its commodity derivative portfolio. The Company canceled oil and gas derivative contracts for years 2012 through 2014 and used the realized net gains of approximately \$44.8 million, along with an incremental premium payment of approximately \$48.8 million, to raise prices for oil and gas derivative contracts in years 2010 and 2011.

During the three months and nine months ended September 30, 2008, the Company canceled (before the contract settlement date) derivative contracts on estimated future gas production resulting in realized losses of approximately \$13.2 million and \$81.4 million, respectively. The future gas production under the canceled contracts primarily related to properties in the Verden area and the Appalachian Basin (see Note 2).

(8) Fair Value Measurements on a Recurring Basis

The Company accounts for its commodity and interest rate derivatives at fair value (see Note 7) on a recurring basis. The fair value of derivative instruments is determined utilizing pricing models for significantly similar instruments. Inputs to the pricing models include publicly available prices and forward curves generated from a compilation of data gathered from third parties. Assumed credit risk adjustments, based on published credit ratings, public bond yield spreads and credit default swap spreads, are applied to the Company's commodity and interest rate derivatives.

Table of Contents

LINN ENERGY, LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
(Unaudited)

The following presents the Company's fair value hierarchy for assets and liabilities measured at fair value on a recurring basis at September 30, 2009:

	Fair Value Measurements on a Recurring Basis		
	September 30, 2009		
	Level 2	Netting (1)	Total
	(in thousands)		
Assets:			
Commodity derivatives	\$ 636,933	\$ (133,019)	\$ 503,914
Interest rate swaps	\$ 179	\$ (179)	\$ —
Liabilities:			
Commodity derivatives	\$ 149,036	\$ (133,019)	\$ 16,017
Interest rate swaps	\$ 77,149	\$ (179)	\$ 76,970

(1) Represents counterparty netting under derivative netting agreements.

(9) Asset Retirement Obligations

Asset retirement obligations associated with retiring tangible long-lived assets, are recognized as a liability in the period in which a legal obligation is incurred and becomes determinable and are included in "other noncurrent liabilities" on the condensed consolidated balance sheets. The fair values of additions to the asset retirement obligation liability were estimated using valuation techniques that convert future cash flows to a single discounted amount. Significant inputs to the valuation include estimates of: (i) plug and abandon costs per well; (ii) remaining life per well; and (iii) a credit-adjusted risk-free interest rate (average of 9.92% for the nine months ended September 30, 2009).

The following presents a reconciliation of the asset retirement obligation liability (in thousands):

Asset retirement obligations at December 31, 2008	\$28,922
Liabilities added from acquisitions	1,350
Liabilities added from drilling	50
Current year accretion expense	1,789
Settlements	(509)
Revision of estimates	1,037
Asset retirement obligations at September 30, 2009	\$32,639

(10) Commitments and Contingencies

On September 15, 2008, Lehman Brothers Holdings Inc. (“Lehman Holdings”) filed a voluntary petition for reorganization under Chapter 11 of the United States Bankruptcy Code (“Chapter 11”) with the United States Bankruptcy Court for the Southern District of New York (the “Court”). On October 3, 2008, Lehman Brothers Commodity Services Inc. (“Lehman Commodity Services”) also filed a voluntary petition for reorganization under Chapter 11 with the Court. As of September 30, 2009, and December 31, 2008, the Company had a receivable of approximately \$67.6 million from Lehman Commodity Services for canceled derivative contracts. The Company is pursuing various legal remedies to protect its interests. At September 30, 2009, and December 31, 2008, the Company estimated approximately \$6.7 million of the receivable balance to be collectible. The net receivable of approximately \$6.7 million is included in “other current assets” on the condensed consolidated balance sheets at September 30, 2009, and December 31, 2008. The Company believes that the ultimate disposition of this matter will not have a material adverse effect on its business, financial position, results of operations or liquidity.

From time to time, the Company is a party to various legal proceedings or is subject to industry rulings that could bring rise to claims in the ordinary course of business. The Company is not currently a party to any litigation or pending claims that it believes would have a material adverse effect on its business, financial position, results of operations or liquidity.

(11) Earnings Per Unit

Effective January 1, 2009, the Company adopted an accounting standard requiring the Company’s unvested restricted units to be included in the computation of earnings per unit under the two-class method. The adoption required retrospective adjustment of all prior period earnings per unit data. The impact of the adoption was a reduction to income from continuing operations per unit – diluted and net income per unit – diluted, of \$0.04 per unit and \$0.06 per unit, respectively, for the three months ended September 30, 2008. There was no impact to the Company from the adoption for the nine months ended September 30, 2008.

Table of Contents

(Unaudited)

2009, respectively. Basic units outstanding excludes the effect of weighted average anti-dilutive unit equivalents related to 1.6 million and 1.8 million unit options and warrants for the three months and nine months ended September 30, 2008, respectively. All equivalent units were anti-dilutive for the three months and nine months ended September 30, 2009, and the nine months ended September 30, 2008.

(12) Unit-Based Compensation

During the nine months ended September 30, 2009, the Company granted an aggregate 1,088,755 restricted units and 382,405 unit options to employees, primarily as part of its annual review of employee compensation, with an aggregate fair value of approximately \$17.6 million. The unit options and restricted units vest over three years. For the three months and nine months ended September 30, 2009, the Company recorded unit-based compensation expenses in continuing operations of approximately \$3.5 million and \$11.5 million, respectively. For the three months and nine months ended September 30, 2008, the Company recorded unit-based compensation expenses in continuing operations of approximately \$3.9 million and \$11.4 million, respectively. These amounts are included in "lease operating expenses" or "general and administrative expenses" on the condensed consolidated statements of operations.

(13) Income Taxes

The Company is a limited liability company treated as a partnership for federal and state income tax purposes, with the exception of the state of Texas, with income tax liabilities and/or benefits of the Company passed through to unitholders. Limited liability companies are subject to state income taxes in Texas. As such, with the exception of the state of Texas, it is not a taxable entity, it does not directly pay federal and state income tax and recognition has not been given to federal and state income taxes for the operations of the Company. In addition, certain of the Company's subsidiaries are Subchapter C-corporations subject to federal and state income taxes.

(14) Related Party Transactions

During the nine months ended September 30, 2008, (through July 3), on an aggregate basis, a group of certain direct or indirect wholly owned subsidiaries of Lehman Holdings owned more than 10% of the Company's outstanding units. A reference to "Lehman" hereafter in this footnote refers to Lehman Holdings or one or more of its subsidiaries, as applicable. Lehman was considered a related party under the provisions of GAAP during the period in which its unit ownership exceeded 10%. Lehman's subsidiaries provided certain services to the Company, including participation in the Company's Third Amended and Restated Credit Agreement, offering of 2018 Notes (see Note 6) and sale of commodity derivative instruments (see Note 7), which were all consummated on terms equivalent to those that prevail in arm's-length transactions. During the nine months ended September 30, 2008, (through July 3), the Company paid distributions on units to Lehman of approximately \$18.5 million, interest on borrowings of approximately \$2.2 million, and financing fees of approximately \$1.8 million. In addition, during the nine months ended September 30, 2008, (through July 3), the Company paid Lehman approximately \$18.8 million on settled derivative contracts, and the Company purchased approximately \$1.3 million of oil swap contracts from Lehman.

(15) Supplemental Disclosures to the Condensed Consolidated Balance Sheets and Statements of Cash Flows

“Other accrued liabilities” reported on the condensed consolidated balance sheets include the following:

	September 30, 2009	December 31, 2008
	(in thousands)	
Accrued compensation	\$ 11,340	\$ 11,366
Accrued interest	19,512	14,232
Other	987	1,565
	\$ 31,839	\$ 27,163

Supplemental disclosures to the condensed consolidated statements of cash flows are presented below:

	Nine Months Ended September 30,	
	2009	2008
	(in thousands)	
Cash payments for interest	\$ 50,990	\$ 78,176
Cash payments for income taxes	\$ 922	\$ 443
Noncash investing activities:		
In connection with the acquisition of oil and gas properties, liabilities were assumed as follows:		
Fair value of assets acquired	\$ 116,882	\$ 581,712
Cash paid	(116,694)	(573,096)
Receivable from seller	2,729	—
Liabilities assumed	\$ 2,917	\$ 8,616
Noncash financing activities:		
Units issued in connection with the acquisition of oil and gas properties	\$ —	\$ 23,455

For purposes of the statements of cash flows, the Company considers all highly liquid short-term investments with original maturities of three months or less to be cash equivalents. Restricted cash of \$1.9 million and \$1.3 million is included in “other noncurrent assets” on the condensed consolidated balance sheets at September 30, 2009, and December 31, 2008, respectively, and represents cash the Company has deposited into a separate account and designated for asset retirement obligations in accordance with contractual agreements.

(16) Recently Issued Pronouncements

Codification

In June 2009, the Financial Accounting Standards Board (“FASB”) approved the FASB Accounting Standards Codification (“Codification”), effective for financial statements for interim or annual reporting

Table of Contents

LINN ENERGY, LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
(Unaudited)

periods ending after September 15, 2009. The Codification is the single source of authoritative nongovernmental GAAP, superseding existing FASB, American Institute of Certified Public Accountants, Emerging Issues Task Force and related literature. References herein to prior GAAP standards that were used to create the Codification have been replaced or supplemented with references to the relevant section of the Codification and are identified as “FASB ASC” or “ASC Update.”

Accounting Standards

In August 2009, the FASB issued ASC Update 2009-5, “Fair Value Measurements and Disclosures (Topic 820) – Measuring Liabilities at Fair Value,” which includes amendments to Subtopic 820-10, “Fair Value Measurements and Disclosures – Overall,” for the fair value measurement of liabilities and provides clarification that in circumstances in which a quoted price in an active market for the identical liability is not available, an entity is required to measure fair value using one or more of the techniques provided for in this update, including the quoted price of the liability when traded as an asset. The guidance in this update is effective for interim and annual periods ending after September 30, 2009. The Company does not expect the adoption to have a material impact on its results of operations or financial position.

In May 2009, the FASB issued FASB ASC 855, “Subsequent Events,” which establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued and requires disclosure of the date through which an entity has evaluated subsequent events. This standard is effective for interim and annual periods ending after June 15, 2009, and the Company adopted it effective June 30, 2009. The adoption did not have a material impact on the Company’s results of operations or financial position.

In April 2009, the FASB issued three related standards to clarify the application of FASB ASC 820 “Fair Value Measurements and Disclosures,” to fair value measurements in the current economic environment, modify the recognition of other-than-temporary impairments of debt securities, and require companies to disclose the fair value of financial instruments in interim periods. The final standards are effective for interim and annual periods ending after June 15, 2009, and the Company adopted the new standards effective June 30, 2009. The adoption did not have a material impact on the Company’s results of operations or financial position. The three related standards are as follows:

FASB ASC 820-10-65-4, “Transition Related to FASB Staff Position FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly,” provides guidance on how to determine the fair value of assets and liabilities under FASB ASC 820 in the current economic environment and reemphasizes that the objective of a fair value measurement remains the price that would be received to sell an asset or paid to transfer a liability at the measurement date.

FASB ASC 320-10-65-1, “Transition Related to FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments,” modifies the requirements for recognizing other-than-temporarily impaired debt securities and significantly changes the existing impairment model for such securities. It also modifies the presentation of other-than-temporary impairment losses and increases the frequency of and expands already required disclosures about other-than-temporary impairment for debt and equity securities.

FASB ASC 825-10-65-1, “Transition Related to FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments,” requires disclosures of the fair value of financial instruments within the scope of FASB

ASC 825, "Financial Instruments," in interim financial statements, adding to the current requirement to make those disclosures in annual financial statements. It also requires that companies disclose the method or methods and

Table of Contents

LINN ENERGY, LLC
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
(Unaudited)

significant assumptions used to estimate the fair value of financial instruments and a discussion of changes, if any, in the method or methods and significant assumptions during the period.

FASB ASC 805, "Business Combinations," issued in December 2007, with additional guidance issued in April 2009, requires an acquiring entity to recognize all assets acquired and liabilities assumed at fair value with limited exceptions. Assets acquired and liabilities assumed that arise from contingencies are to be recognized at fair value if fair value can be reasonably estimated. If fair value of such an asset or liability cannot be reasonably estimated, the asset or liability should generally be recognized in accordance with FASB ASC 450, "Contingencies." This standard changes the accounting treatment for certain specific items, including acquisition costs, which are expensed as incurred, and also includes new disclosure requirements. This standard applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period on or after December 15, 2008. The Company adopted this standard effective January 1, 2009, (see Note 2).

FASB ASC 820, "Fair Value Measurements and Disclosures," issued in September 2006, provides guidance for using fair value to measure assets and liabilities. This standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value and clarifies that for items that are not actively traded, such as certain kinds of derivatives, fair value should reflect the price in a transaction with a market participant, including an adjustment for risk, not just the mark-to-market value. The Company adopted the provisions of this standard related to financial assets and liabilities and nonfinancial assets and liabilities measured on a recurring basis effective January 1, 2008, and related to nonfinancial assets and liabilities measured on a nonrecurring basis effective January 1, 2009, (see Note 2 and Note 9). There was no impact from the adoption related to items measured on a nonrecurring basis.

SEC Rule-Making Activity

In December 2008, the SEC announced that it had approved revisions designed to modernize the oil and gas company reserve reporting requirements. The most significant amendments to the requirements include the following:

- commodity prices – economic producibility of reserves and discounted cash flows will be based on a 12-month average commodity price unless contractual arrangements designate the price to be used;
- disclosure of unproved reserves – probable and possible reserves may be disclosed separately on a voluntary basis;
- proved undeveloped reserve guidelines – reserves may be classified as proved undeveloped if there is a high degree of confidence that the quantities will be recovered;
- reserve estimation using new technologies – reserves may be estimated through the use of reliable technology in addition to flow tests and production history; and
- nontraditional resources – the definition of oil and gas producing activities will expand and focus on the marketable product rather than the method of extraction.

The rules are effective for fiscal years ending on or after December 31, 2009, and early adoption is not permitted. The SEC is coordinating with the FASB to obtain the revisions necessary to FASB ASC 932, "Extractive Industries – Oil and Gas," to provide consistency with the new rules. The Company is currently evaluating the new rules and assessing the impact they will have on its reported oil and gas reserves.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q and in the Company's Annual Report on Form 10-K for the year ended December 31, 2008. The following discussion contains forward-looking statements that reflect the Company's future plans, estimates, beliefs and expected performance. The forward-looking statements are dependent upon events, risks and uncertainties that may be outside the Company's control. The Company's actual results could differ materially from those discussed in these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, market prices for oil, gas and NGL, production volumes, estimates of proved reserves, capital expenditures, economic and competitive conditions, regulatory changes and other uncertainties, as well as those factors discussed in "Cautionary Statement" below and in the Annual Report on Form 10-K, particularly in Part I. Item 1A. "Risk Factors." In light of these risks, uncertainties and assumptions, the forward-looking events discussed may not occur.

A reference to a "Note" herein refers to the accompanying Notes to Condensed Consolidated Financial Statements contained in Item 1. "Financial Statements."

Executive Overview

LINN Energy is an independent oil and gas company focused on the development and acquisition of long-life properties which complement its asset profile in producing basins within the United States. The Company's properties are located in three regions in the United States:

- Mid-Continent Deep, which includes the Texas Panhandle Deep Granite Wash formation and deep formations in Oklahoma;
- Mid-Continent Shallow, which includes the Texas Panhandle Brown Dolomite formation, shallow formations in Oklahoma, and the Permian Basin in Texas and New Mexico; and
 - Western, which includes the Brea Olinda Field of the Los Angeles Basin in California.

The results of the Company's Appalachian Basin and Mid Atlantic operations are classified as discontinued operations for all periods presented (see Note 2). Unless otherwise indicated, results of operations information presented herein relates only to LINN Energy's continuing operations.

Results from continuing operations for the three months ended September 30, 2009, included the following:

- oil, gas and NGL sales of approximately \$103.0 million, compared to \$240.6 million in the third quarter of 2008;
 - average daily production of 217 MMcfe/d, compared to 227 MMcfe/d in the third quarter of 2008;
- realized gains on commodity derivatives of approximately \$142.0 million, compared to realized losses of \$41.4 million in the third quarter of 2008;
- capital expenditures, excluding acquisitions, of approximately \$24.5 million, compared to \$59.2 million in the third quarter of 2008; and
 - six wells drilled (all successful), compared to 63 wells drilled (all successful) in the third quarter of 2008.

Results from continuing operations for the nine months ended September 30, 2009, included the following:

- oil, gas and NGL sales of approximately \$274.8 million, compared to \$672.1 million in the nine months ended September 30, 2008;
- average daily production of 218 MMcfe/d, compared to 216 MMcfe/d in the nine months ended September 30, 2008;
-

realized gains on commodity derivatives of approximately \$377.2 million, compared to realized losses of \$143.6 million in the nine months ended September 30, 2008;

- capital expenditures, excluding acquisitions, of approximately \$128.0 million, compared to \$222.4 million in the nine months ended September 30, 2008; and
- 66 wells drilled (65 successful), compared to 209 wells drilled (207 successful) in the nine months ended September 30, 2008.

25

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Public Offering of Units

In October 2009, the Company sold 8,625,000 units, representing limited liability company interests at \$21.90 per unit (\$21.024 per unit, net of underwriting discount), for net proceeds (after underwriting discount of \$7.6 million and estimated offering expenses of \$0.7 million) of approximately \$180.6 million, which was used to reduce indebtedness under the Company's Credit Facility.

Acquisitions

On August 31, 2009, and September 30, 2009, the Company completed the acquisitions of certain oil and gas properties located in the Permian Basin in Texas and New Mexico from Forest for an aggregate contract price of \$117.6 million. The Company paid \$116.5 million in cash and recorded a receivable from Forest of approximately \$2.7 million, resulting in total consideration for the acquisitions of approximately \$113.8 million. See Note 2 for additional details. The transactions were financed with borrowings from the Company's Credit Facility. The acquisitions represent a strategic entry into the Permian Basin for the Company, and include approximately 72 Bcfe of proved reserves, primarily oil.

Commodity Derivative Repositioning

In July 2009, the Company repositioned its commodity derivative portfolio to help protect against sustained weakness in commodity prices. The Company canceled oil and gas derivative contracts for years 2012 through 2014 and realized net gains of approximately \$44.8 million, which, along with an incremental premium payment of approximately \$48.8 million, was used to raise prices for its oil and gas derivative contracts in years 2010 and 2011.

Credit and Capital Market Conditions

Multiple events involving numerous financial institutions have restricted current liquidity within the capital markets throughout the United States and around the world. To the extent the Company accesses credit or capital markets in the near term, its ability to obtain terms and pricing similar to its existing terms and pricing may be limited. In addition, the Company cannot be assured that counterparties to the Company's derivative contracts or lenders in the Company's Credit Facility will be able to perform under these agreements. For additional information about the Company's credit risk related to derivative contracts see "Counterparty Credit Risk" in "Liquidity and Capital Resources" below.

Notes to table:

(1) During the three months ended September 30, 2009, the Company repositioned its commodity derivative portfolio to help protect against sustained weakness in commodity prices and canceled (before the contract settlement date) derivative contracts on estimated future oil and gas production resulting in realized net gains of approximately \$44.8 million. During the three months ended September 30, 2008, the Company canceled (before the contract settlement date) derivative contracts on estimated future gas production primarily associated with properties in the Verden area (see Note 2) resulting in realized losses of approximately \$13.2 million.

(2) General and administrative expenses for the three months ended September 30, 2009, and September 30, 2008, include approximately \$3.4 million and \$3.9 million, respectively, of noncash unit-based compensation expenses.

Depreciation, depletion and amortization	\$2.47	\$2.49	(1))%
Taxes, other than income taxes	\$0.30	\$0.82	(63))%

Notes to table:

(1) Includes the effect of realized gains (losses) on derivatives of approximately \$97.2 million (excluding \$44.8 million realized net gains on canceled contracts) and \$(28.2) million (excluding \$13.2 million realized losses on canceled contracts) for the three months ended September 30, 2009, and September 30, 2008, respectively. The Company utilizes oil puts to hedge revenues associated with its NGL production; therefore, all realized gains (losses) on oil derivative contracts are included in weighted average oil prices, rather than weighted average NGL prices.

(2) Does not include the effect of realized gains (losses) on derivatives.

(3) General and administrative expenses for the three months ended September 30, 2009, and September 30, 2008, include approximately \$3.4 million and \$3.9 million, respectively, of noncash unit-based compensation expenses. Excluding these amounts, general and administrative expenses for the three months ended September 30, 2009, and September 30, 2008, were \$0.81 per Mcfe and \$0.71 per Mcfe, respectively. This is a non-GAAP measure used by management to analyze the Company's performance.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Revenues and Other

Oil, Gas and NGL Sales

Oil, gas and NGL sales decreased by approximately \$137.6 million, or 57%, to approximately \$103.0 million for the three months ended September 30, 2009, from \$240.6 million for the three months ended September 30, 2008, due to lower commodity prices. Lower gas, oil and NGL prices resulted in a decrease in revenues of approximately \$61.7 million, \$38.9 million and \$25.1 million, respectively.

Average daily production decreased to 217 MMcfe/d during the three months ended September 30, 2009, from 227 MMcfe/d during the three months ended September 30, 2008. Volume decreases during the three months ended September 30, 2009, resulted in a decrease in total oil, gas and NGL revenues of approximately \$11.9 million compared to the three months ended September 30, 2008.

The following presents average daily production by region:

	Three Months Ended		Variance	
	2009	2008		
Average daily production (MMcfe/d):				
Mid-Continent Deep	132	147	(15)	(10)%
Mid-Continent Shallow	71	65	6	9 %
Western	14	15	(1)	(7)%
	217	227	(10)	(4)%

The 10% decrease in average daily production in the Mid-Continent Deep region primarily reflects the Company's sale of assets in Oklahoma in August 2008 (see Note 2), its decision to suspend completions on recent wells drilled in the Granite Wash and shut-in production on certain wells. The 9% increase in average daily production in the Mid-Continent Shallow region reflects results of the Company's drilling and optimization programs. The Western region consists of a very low-decline asset base and continues to produce at levels consistent with the comparable period of the prior year.

Gain (Loss) on Oil and Gas Derivatives

The Company determines the fair value of its oil and gas derivatives utilizing pricing models that use a variety of techniques, including market quotes and pricing analysis. See Note 7 and Note 8 for additional information about commodity derivatives. During the three months ended September 30, 2009, the Company had commodity derivative contracts in place for approximately 116% of its gas production and 77% of its oil and NGL production, which resulted in realized gains of approximately \$142.0 million (including realized net gains on canceled contracts of approximately \$44.8 million). In July 2009, the Company repositioned its commodity derivative portfolio to help protect against sustained weakness in commodity prices. The Company canceled oil and gas derivative contracts for years 2012 through 2014 and used the realized net gains of approximately \$44.8 million, along with an incremental premium payment of approximately \$48.8 million, to raise prices for oil and gas derivative contracts in years 2010 and 2011. During the three months ended September 30, 2008, the Company recorded realized losses of approximately \$41.4 million (including realized losses on canceled contracts of approximately \$13.2 million). Unrealized gains and losses result from changes in market valuations of derivatives as future commodity price expectations change compared to the contract prices on the derivatives. During the third quarter of 2009, expected future oil and gas prices increased, which resulted in unrealized losses on derivatives of approximately \$156.1 million for the three months ended September 30, 2009. During the third quarter of 2008, expected future oil and gas prices decreased, which resulted in unrealized gains on derivatives of approximately \$887.2 million for the

three months ended September 30, 2008. For information about the Company's credit risk related to derivative contracts see "Counterparty Credit Risk" in "Liquidity and Capital Resources" below.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Expenses

Lease Operating Expenses

Lease operating expenses include expenses such as labor, field office, vehicle, supervision, maintenance, tools and supplies and workover expenses. Lease operating expenses were approximately \$33.5 million for the three months ended September 30, 2009, and September 30, 2008. Lease operating expenses per Mcfe increased, to \$1.67 per Mcfe for the three months ended September 30, 2009, from \$1.60 per Mcfe for the three months ended September 30, 2008, primarily due to decreased production levels during the three months ended September 30, 2009.

Transportation Expenses

Transportation expenses increased by approximately \$0.7 million, or 12%, to \$6.4 million for the three months ended September 30, 2009, from \$5.7 million for the three months ended September 30, 2008, primarily due to increased expenses on nonoperated properties.

General and Administrative Expenses

General and administrative expenses are costs not directly associated with field operations and include costs of employees and executive officers, related benefits, office leases and professional fees. General and administrative expenses increased by approximately \$1.0 million, or 5%, to \$19.7 million for the three months ended September 30, 2009, from \$18.7 million for the three months ended September 30, 2008. General and administrative expenses per Mcfe also increased, to \$0.98 per Mcfe for the three months ended September 30, 2009, from \$0.89 per Mcfe for the three months ended September 30, 2008. The increase was primarily due to an increase in salaries and benefits expense of approximately \$3.3 million, partially offset by lower professional fees and insurance expenses.

Exploration Costs

Exploration costs were approximately \$0.9 million for the three months ended September 30, 2009, compared to \$0.3 million for the three months ended September 30, 2008. The increase was primarily due to an increase in unproved leasehold costs of approximately \$0.6 million during the three months ended September 30, 2009.

Depreciation, Depletion and Amortization

Depreciation, depletion and amortization decreased slightly, by approximately \$2.6 million, or 5%, to \$49.4 million for the three months ended September 30, 2009, from \$52.0 million for the three months ended September 30, 2008, primarily due to decreased production levels during the three months ended September 30, 2009. Depreciation, depletion and amortization per Mcfe also decreased slightly to \$2.47 per Mcfe for the three months ended September 30, 2009, from \$2.49 per Mcfe for the three months ended September 30, 2008.

Taxes, Other Than Income Taxes

Taxes, other than income taxes, which consist primarily of production and ad valorem taxes, decreased by approximately \$11.2 million, or 65%, to \$6.0 million for the three months ended September 30, 2009, from \$17.2 million for the three months ended September 30, 2008. Production taxes, which are a function of revenues generated from production, decreased by approximately \$10.5 million compared to the three months ended September 30, 2008, primarily due to lower commodity prices. Ad valorem taxes, which are based on the value of reserves and production equipment and vary by location, also decreased slightly compared to the three months ended September 30, 2008.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Other Income and (Expenses)

	Three Months Ended September 30,		
	2009	2008	Variance
	(in thousands)		
Interest expense, net of amounts capitalized	\$(28,025)	\$(22,574)	\$(5,451)
Loss on interest rate swaps	(25,709)	(9,694)	(16,015)
Other, net	(757)	(3,558)	2,801
	\$(54,491)	\$(35,826)	\$(18,665)

Other income and (expenses) increased by approximately \$18.7 million, due primarily to interest rate swap losses. The unrealized mark-to-market loss on interest rate swaps increased as the forward curve decreased during the three months ended September 30, 2009, as compared to the three months ended September 30, 2008. Realized losses on interest rate swaps also increased during the three months ended September 30, 2009, compared to the three months ended September 30, 2008.

In the second quarter of 2009, the Company entered into an amended and restated Credit Facility and issued senior notes due 2017, which resulted in increased interest expense due to higher interest rates and amortization of financing fees. See "Credit Facility" and "Senior Notes Due 2017" in "Liquidity and Capital Resources" below for additional details.

Income Tax Expense

Income tax expense was approximately \$0.1 million and \$1.0 million for the three months ended September 30, 2009, and September 30, 2008, respectively, and primarily represents Texas margin tax expense. The Company is a limited liability company treated as a partnership for federal and state income tax purposes, with the exception of the state of Texas, with income tax liabilities and/or benefits of the Company passed through to unitholders. Limited liability companies are subject to state income taxes in Texas. In addition, certain of the Company's subsidiaries are Subchapter C-corporations subject to federal and state income taxes.

Notes to table:

- (1) During the nine months ended September 30, 2009, the Company canceled (before the contract settlement date) derivative contracts on estimated future oil and gas production resulting in realized net gains of approximately \$49.0 million, primarily associated with the Company's commodity derivative repositioning in July 2009. During the nine months ended September 30, 2008, the Company canceled (before the contract settlement date) derivative contracts on estimated future gas production primarily associated with properties in the Verden area and the Appalachian Basin (see Note 2) resulting in realized losses of approximately \$81.4 million.
- (2) General and administrative expenses for the nine months ended September 30, 2009, and September 30, 2008, include approximately \$11.2 million and \$11.3 million, respectively, of noncash unit-based compensation expenses.

Depreciation, depletion and amortization	\$2.56	\$2.49	3	%
Taxes, other than income taxes	\$0.36	\$0.81	(56))%

Notes to table:

- (1) Includes the effect of realized gains (losses) on derivatives of approximately \$328.2 million (excluding \$49.0 million realized net gains on canceled contracts) and \$(62.2) million (excluding \$81.4 million realized losses on canceled contracts) for the nine months ended September 30, 2009, and September 30, 2008, respectively. The Company utilizes oil puts to hedge revenues associated with its NGL production; therefore, all realized gains (losses) on oil derivative contracts are included in weighted average oil prices, rather than weighted average NGL prices.
- (2) Does not include the effect of realized gains (losses) on derivatives.
- (3) General and administrative expenses for the nine months ended September 30, 2009, and September 30, 2008, include approximately \$11.2 million and \$11.3 million, respectively, of noncash unit-based compensation expenses. Excluding these amounts, general and administrative expenses for the nine months ended September 30, 2009, and September 30, 2008, were \$0.88 per Mcfe and \$0.75 per Mcfe, respectively. This is a non-GAAP measure used by management to analyze the Company's performance.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Revenues and Other

Oil, Gas and NGL Sales

Oil, gas and NGL sales decreased by approximately \$397.3 million, or 59%, to approximately \$274.8 million for the nine months ended September 30, 2009, from \$672.1 million for the nine months ended September 30, 2008, due to lower commodity prices. Lower gas, oil and NGL prices resulted in a decrease in revenues of approximately \$196.1 million, \$135.3 million and \$67.7 million, respectively.

Average daily production increased to 218 MMcfe/d during the nine months ended September 30, 2009, from 216 MMcfe/d during the nine months ended September 30, 2008. Volume increases during the nine months ended September 30, 2009, resulted in an increase in total oil, gas and NGL revenues of approximately \$1.8 million compared to the nine months ended September 30, 2008.

The following presents average daily production by region:

	Nine Months Ended		Variance		
	September 30, 2009	2008			
Average daily production (MMcfe/d):					
Mid-Continent Deep	137	141	(4)	(3)	%
Mid-Continent Shallow	67	61	6	10	%
Western	14	14	—	—	
	218	216	2	1	%

The 3% decrease in average daily production in the Mid-Continent Deep region reflects results of the Company's sale of assets in Oklahoma in August 2008 (see Note 2), its decision to suspend completions on recent wells drilled in the Granite Wash and shut-in production on certain wells. The 10% increase in average daily production in the Mid-Continent Shallow region reflects results of the Company's drilling and optimization programs. The Western region consists of a very low-decline asset base and continues to produce at levels consistent with the comparable period of the prior year.

Gain (Loss) on Oil and Gas Derivatives

The Company determines the fair value of its oil and gas derivatives utilizing pricing models that use a variety of techniques, including market quotes and pricing analysis. See Note 7 and Note 8 for additional information about commodity derivatives. During the nine months ended September 30, 2009, the Company had commodity derivative contracts in place for approximately 111% of its gas production and 84% of its oil and NGL production, which resulted in realized gains of approximately \$377.2 million (including realized net gains on canceled contracts of approximately \$49.0 million). In July 2009, the Company repositioned its commodity derivative portfolio to help protect against sustained weakness in commodity prices. The Company canceled oil and gas derivative contracts for years 2012 through 2014 and used the realized net gains of approximately \$44.8 million, along with an incremental premium payment of approximately \$48.8 million, to raise prices for oil and gas derivative contracts in years 2010 and 2011. During the nine months ended September 30, 2008, the Company recorded realized losses of approximately \$143.6 million (including realized losses on canceled contracts of approximately \$81.4 million). Unrealized gains and losses result from changes in market valuations of derivatives as future commodity price expectations change compared to the contract prices on the derivatives. During the first nine months of 2009 and 2008, expected future oil and gas prices increased, which resulted in unrealized losses on derivatives of approximately \$462.7 million and \$150.1 million for the nine months ended September 30, 2009, and September 30, 2008, respectively. For information about the Company's credit risk related to derivative contracts see "Counterparty

Credit Risk” in “Liquidity and Capital Resources” below.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Expenses

Lease Operating Expenses

Lease operating expenses include expenses such as labor, field office, vehicle, supervision, maintenance, tools and supplies and workover expenses. Lease operating expenses increased by approximately \$22.1 million, or 28%, to \$100.3 million for the nine months ended September 30, 2009, from \$78.2 million for the nine months ended September 30, 2008. Lease operating expenses per Mcfe also increased, to \$1.69 per Mcfe for the nine months ended September 30, 2009, from \$1.32 per Mcfe for the nine months ended September 30, 2008. Lease operating expenses increased primarily due to costs associated with properties acquired in the first quarter of 2008 in the Mid-Continent Shallow region (see Note 2), as well as materials and service cost increases across all operating regions. In addition, higher chemical and treating costs associated with certain wells drilled in late 2008 contributed to the increase.

Transportation Expenses

Transportation expenses decreased by approximately \$0.8 million, or 6%, to \$11.9 million for the nine months ended September 30, 2009, from \$12.7 million for the nine months ended September 30, 2008, driven primarily by lower fuel costs.

General and Administrative Expenses

General and administrative expenses are costs not directly associated with field operations and include costs of employees and executive officers, related benefits, office leases and professional fees. General and administrative expenses increased by approximately \$7.4 million, or 13%, to \$63.2 million for the nine months ended September 30, 2009, from \$55.8 million for the nine months ended September 30, 2008. General and administrative expenses per Mcfe also increased, to \$1.06 per Mcfe for the nine months ended September 30, 2009, from \$0.94 per Mcfe for the nine months ended September 30, 2008. The increase was primarily due to an increase in salaries and benefits expense of approximately \$6.5 million.

Exploration Costs

Exploration costs increased by approximately \$1.7 million, or 59%, to \$4.6 million for the nine months ended September 30, 2009, from \$2.9 million for the nine months ended September 30, 2008. The increase was primarily due to an increase in unproved leasehold costs of approximately \$3.9 million, partially offset by decreases in 3-D seismic and data library expenses.

Depreciation, Depletion and Amortization

Depreciation, depletion and amortization increased by approximately \$4.6 million, or 3%, to \$151.9 million for the nine months ended September 30, 2009, from \$147.3 million for the nine months ended September 30, 2008. Higher total production levels and higher depletion rates associated with downward year-end price-related reserve revisions were the main reason for the increase. Depreciation, depletion and amortization per Mcfe increased to \$2.56 per Mcfe for the nine months ended September 30, 2009, from \$2.49 per Mcfe for the nine months ended September 30, 2008.

Taxes, Other Than Income Taxes

Taxes, other than income taxes, which consist primarily of production and ad valorem taxes, decreased by approximately \$26.4 million, or 55%, to \$21.4 million for the nine months ended September 30, 2009, from \$47.8 million for the nine months ended September 30, 2008. Production taxes, which are a function of revenues generated from production, decreased by approximately \$26.6 million compared to the nine months ended September 30, 2008, primarily due to lower commodity prices. Ad valorem taxes, which are based on the value of reserves and production equipment and vary by location, increased slightly compared to the nine months ended September 30, 2008.

(Gain) Loss on Sale of Assets and Other, Net

The increase in (gain) loss on sale of assets and other, net for the nine months ended September 30, 2009, was primarily due to a gain of \$25.4 million from the sale of Woodford Shale assets (see Note 2).

35

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Other Income and (Expenses)

	Nine Months Ended September 30,		Variance
	2009	2008	(in thousands)
Interest expense, net of amounts capitalized	\$(65,696)	\$(71,199)	\$5,503
Loss on interest rate swaps	(25,362)	(17,483)	(7,879)
Other, net	(1,987)	(8,034)	6,047
	\$(93,045)	\$(96,716)	\$3,671

Other income and (expenses) decreased by approximately \$3.7 million during the nine months ended September 30, 2009, compared to the nine months ended September 30, 2008. Interest expense decreased, driven by lower interest rates on the Credit Facility due to lower LIBOR rates. Realized losses on interest rate swaps increased, as the average settlement interest rate decreased during the nine months ended September 30, 2009. These losses were partially offset by unrealized mark-to-market gains on interest rate swaps during the nine months ended September 30, 2009, compared to unrealized losses during the nine months ended September 30, 2008. In addition, the Company wrote off deferred financing fees of approximately \$4.6 million during the nine months ended September 30, 2008.

Income Tax Expense

Income tax expense was approximately \$0.4 million and \$1.0 million for the nine months ended September 30, 2009, and September 30, 2008, respectively, and primarily represents Texas margin tax expense. The Company is a limited liability company treated as a partnership for federal and state income tax purposes, with the exception of the state of Texas, with income tax liabilities and/or benefits of the Company passed through to unitholders. Limited liability companies are subject to state income taxes in Texas. In addition, certain of the Company's subsidiaries are Subchapter C-corporations subject to federal and state income taxes.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Liquidity and Capital Resources

Overview

The Company has utilized public and private equity, proceeds from bank borrowings and issuance of senior notes, and cash flow from operations for capital resources and liquidity. To date, the primary use of capital has been for the acquisition and development of oil and gas properties. For the nine months ended September 30, 2009, the Company's capital expenditures, excluding acquisitions, were approximately \$128.0 million. For 2009, the Company estimates its capital expenditures, excluding acquisitions, will be approximately \$150.0 million. This estimate is under continuous review and is subject to ongoing adjustment. The Company expects to fund these capital expenditures with cash flow from operations.

As the Company pursues growth, it continually monitors the capital resources available to meet future financial obligations and planned capital expenditures. The Company's future success in growing reserves and production will be highly dependent on the capital resources available and its success in drilling for or acquiring additional reserves. The Company actively reviews acquisition opportunities on an ongoing basis. If the Company were to make significant additional acquisitions for cash, it would need to borrow additional amounts, if available, or obtain additional debt or equity financing. In April 2009, the Company entered into an amended and restated Credit Facility with a maturity of August 2012. See "Credit Facility" below for additional details. At October 30, 2009, the Company had \$535.0 million in available borrowing capacity under its Credit Facility. The Company's Credit Facility, 2017 Notes and 2018 Notes impose certain restrictions on the Company's ability to obtain additional debt financing. Based upon current expectations, the Company believes liquidity and capital resources will be sufficient for the conduct of its business and operations.

Cash Flows

The following presents a comparative cash flow summary:

	Nine Months Ended September 30,		Variance
	2009	2008	
	(in thousands)		
Net cash:			
Provided by operating activities (1)	\$330,124	\$42,788	\$287,336
Used in investing activities	(247,993)	(84,105)	(163,888)
Provided by (used in) financing activities	(100,204)	87,145	(187,349)
Net increase (decrease) in cash and cash equivalents	\$(18,073)	\$45,828	\$(63,901)

(1)The nine months ended September 30, 2009, and September 30, 2008, include premiums paid for derivatives of approximately \$93.6 million and \$129.5 million, respectively.

Operating Activities

Cash provided by operating activities for the nine months ended September 30, 2009, was approximately \$330.1 million, compared to \$42.8 million for the nine months ended September 30, 2008. The increase in operating cash flow was driven by increased cash from working capital as cash collections on accounts receivable increased because of higher commodity prices in the fourth quarter of 2008. Higher realized gains from oil and gas derivatives, partially offset by reduced oil and gas revenues associated with lower commodity prices in 2009, also contributed to the increase in operating cash flow.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Premiums paid were for commodity derivative contracts that hedge future production. These derivative contracts provide the Company long-term cash flow predictability to pay distributions, service debt and manage its business and are primarily funded through the Company's Credit Facility. See Note 7 for additional details about commodity derivatives. The amount of derivative contracts the Company enters into in the future will be directly related to expected future production.

Investing Activities

The primary use of cash in investing activities is for capital spending, which is offset by proceeds from asset sales. Cash used in investing activities was approximately \$248.0 million for the nine months ended September 30, 2009, compared to \$84.1 million for the nine months ended September 30, 2008. The increase in cash used in investing activities was primarily due to reduced divestiture activity during the nine months ended September 30, 2009, compared to the nine months ended September 30, 2008. Cash used in investing activities for the nine months ended September 30, 2009, includes approximately \$116.5 million for the acquisition of Permian Basin properties in the Mid-Continent Shallow region (see Note 2). The following provides a comparative summary of cash flow from investing activities:

	Nine Months Ended September 30,	
	2009	2008
	(in thousands)	
Cash flow from investing activities:		
Acquisition of oil and gas properties	\$ (116,694)	\$ (573,096)
Capital expenditures	(157,981)	(255,142)
Proceeds from sale of properties and equipment	26,682	744,133
	\$ (247,993)	\$ (84,105)

Financing Activities

Cash used in financing activities was approximately \$100.2 million for the nine months ended September 30, 2009, compared to cash provided by financing activities of \$87.1 million for the nine months ended September 30, 2008. The change in financing cash flow was primarily due to increased operating cash flow and decreased acquisition and development activity during the nine months ended September 30, 2009, which resulted in lower net borrowings compared to the same period of 2008. The following provides a comparative summary of proceeds from borrowings and repayments of debt:

	Nine Months Ended September 30,	
	2009	2008
	(in thousands)	
Proceeds from borrowings:		
Credit facility	\$ 361,500	\$ 772,000
Senior notes	237,703	250,000
Term loan	—	400,000
	\$ 599,203	\$ 1,422,000
Repayments of debt:		
Credit facility	\$ (513,893)	\$ (693,607)
Term loan	—	(400,000)

Notes payable	—	(1,509)
	\$ (513,893)	\$ (1,095,116)

Distributions

Under the limited liability company agreement, Company unitholders are entitled to receive a quarterly distribution of available cash to the extent there is sufficient cash from operations after establishment of cash reserves and payment of fees and expenses. The following provides a summary of distributions paid by the Company during the nine months ended September 30, 2009:

Date Paid	Period Covered by Distribution	Distribution Per Unit	Total Distribution (in millions)
August 2009	April 1 – June 30, 2009	\$ 0.63	\$ 76.4
May 2009	January 1 – March 31, 2009	\$ 0.63	\$ 72.5
February 2009	October 1 – December 31, 2008	\$ 0.63	\$ 72.5

On October 21, 2009, the Company's Board of Directors declared a cash distribution of \$0.63 per unit with respect to the third quarter of 2009. The distribution, totaling approximately \$81.9 million, will be paid November 13, 2009, to unitholders of record as of the close of business November 6, 2009.

Credit Facility

On April 28, 2009, the Company entered into a Credit Facility with an initial borrowing base of \$1.75 billion and a maturity of August 2012, which amended and restated the Company's existing credit facility, which had a maturity of August 2010. The terms of the Credit Facility required that, upon the issuance of the senior notes due 2017 in May 2009 (see below) and cancellation of certain commodity derivatives in July 2009 (see Note 7), the borrowing base be decreased by approximately \$62.5 million and \$45.0 million, respectively. At October 30, 2009, available borrowing capacity was \$535.0 million, which includes a \$5.5 million reduction in availability for outstanding letters of credit. In connection with the amended and restated Credit Facility, during the nine months ended September 30, 2009, the Company paid approximately \$52.7 million in financing fees and expenses, which were deferred and will be amortized over the life of the Credit Facility.

Redetermination of the borrowing base under the Credit Facility occurs semi-annually, in April and October, as well as upon the occurrence of certain events, by the lenders in their sole discretion, based primarily on reserve reports that reflect oil and gas prices at such time. Significant declines in oil, gas or NGL prices may result in a decrease in the borrowing base. The Company's obligations under the Credit Facility are secured by mortgages on its oil and gas properties as well as a pledge of all ownership interests in its operating subsidiaries. The Company is required to maintain the mortgages on properties representing at least 80% of its oil and gas properties. Additionally, the obligations under the Credit Facility are guaranteed by all of the Company's material operating subsidiaries and may be guaranteed by any future subsidiaries.

At the Company's election, interest on borrowings under the Credit Facility is determined by reference to either LIBOR plus an applicable margin between 2.50% and 3.25% per annum or the ABR plus an applicable margin between 1.00% and 1.75% per annum. Interest is generally payable quarterly for ABR loans and at the applicable maturity date for LIBOR loans. The Company is required to pay a fee of 0.5% per annum on the unused portion of the borrowing base under the Credit Facility.

The Credit Facility contains various covenants, substantially similar to those included prior to the amendment and restatement, which limit the Company's ability to: (i) incur indebtedness; (ii) enter into commodity and interest rate

swaps; (iii) grant certain liens; (iv) make certain loans, acquisitions, capital expenditures and investments; (v) make distributions other than from available cash; and (vi) merge or consolidate, or engage in certain asset dispositions, including a sale of all or substantially all of its assets. The Credit Facility also contains covenants, substantially similar to those included prior to the amendment and restatement, which require the Company to maintain adjusted

earnings to interest expense and current liquidity financial ratios. The Company is in compliance with all financial and other covenants of its Credit Facility.

Senior Notes Due 2017

On May 12, 2009, the Company entered into a purchase agreement with a group of Initial Purchasers, pursuant to which the Company agreed to issue \$250.0 million in aggregate principal amount of the Company's senior notes due 2017. The 2017 Notes were offered and sold to the Initial Purchasers and then resold to qualified institutional buyers, each in transactions exempt from the registration requirements of the Securities Act. The Company used the net proceeds (after deducting the Initial Purchasers' discounts and offering expenses) of approximately \$230.8 million to reduce indebtedness under its Credit Facility. In connection with the 2017 Notes, the Company incurred financing fees and expenses of approximately \$6.9 million, which will be amortized over the life of the 2017 Notes; the expense is recorded in "interest expense, net of amounts capitalized" on the condensed consolidated statements of operations. The \$12.3 million discount on the 2017 Notes will be amortized over the life of the 2017 Notes; the expense is recorded in "interest expense, net of amounts capitalized" on the condensed consolidated statements of operations.

The 2017 Notes were issued under an Indenture dated May 18, 2009, mature May 15, 2017, and bear interest at 11.75%. Interest is payable semi-annually beginning November 15, 2009. The 2017 Notes are general unsecured senior obligations of the Company and are effectively junior in right of payment to any secured indebtedness of the Company to the extent of the collateral securing such indebtedness. Each of the Company's material subsidiaries guaranteed the 2017 Notes on a senior unsecured basis. The Indenture provides that the Company may redeem: (i) on or prior to May 15, 2011, up to 35% of the aggregate principal amount of the 2017 Notes at a redemption price of 111.75% of the principal amount, plus accrued and unpaid interest; (ii) prior to May 15, 2013, all or part of the 2017 Notes at a redemption price equal to the principal amount, plus a make-whole premium (as defined in the Indenture) and accrued and unpaid interest; and (iii) on or after May 15, 2013, all or part of the 2017 Notes at redemption prices equal to 105.875% in 2013, 102.938% in 2014 and 100% in 2015 and thereafter. The Indenture also provides that, if a change of control (as defined in the Indenture) occurs, the holders have a right to require the Company to repurchase all or part of the 2017 Notes at a redemption price equal to 101%, plus accrued and unpaid interest.

The 2017 Notes' Indenture contains covenants that, among other things, limit the Company's ability to: (i) pay distributions on, purchase or redeem the Company's units or redeem its subordinated debt; (ii) make investments; (iii) incur or guarantee additional indebtedness or issue certain types of equity securities; (iv) create certain liens; (v) sell assets; (vi) consolidate, merge or transfer all or substantially all of the Company's assets; (vii) enter into agreements that restrict distributions or other payments from the Company's restricted subsidiaries to the Company; (viii) engage in transactions with affiliates; and (ix) create unrestricted subsidiaries.

In connection with the issuance and sale of the 2017 Notes, the Company entered into a Registration Rights Agreement with the Initial Purchasers. Under the Registration Rights Agreement, the Company agreed to use its reasonable best efforts to file with the SEC and cause to become effective a registration statement relating to an offer to issue new notes having terms substantially identical to the 2017 Notes in exchange for outstanding 2017 Notes. In certain circumstances, the Company may be required to file a shelf registration statement to cover resales of the 2017 Notes. The Company will not be obligated to file the registration statements described above if the restrictive legend on the 2017 Notes has been removed and the 2017 Notes are freely tradable (in each case, other than with respect to persons that are affiliates of the Company) pursuant to Rule 144 of the Securities Act, as of the 366th day after the 2017 Notes were issued. If the Company fails to satisfy its obligations under the Registration Rights Agreement, the Company may be required to pay additional interest to holders of the 2017 Notes under certain circumstances.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Senior Notes Due 2018

On June 24, 2008, the Company entered into a purchase agreement with a group of Initial Purchasers, pursuant to which the Company agreed to issue \$255.9 million in aggregate principal amount of the Company's senior notes due 2018. The 2018 Notes were offered and sold to the Initial Purchasers and then resold to qualified institutional buyers, each in transactions exempt from the registration requirements of the Securities Act. The Company used the net proceeds (after deducting the Initial Purchasers' discounts and offering expenses) of approximately \$243.6 million to repay an outstanding term loan. In connection with the 2018 Notes, the Company incurred financing fees and expenses of approximately \$7.8 million, which will be amortized over the life of the 2018 Notes; the expense is recorded in "interest expense, net of amounts capitalized" on the condensed consolidated statements of operations. The \$5.9 million discount on the 2018 Notes will be amortized over the life of the 2018 Notes; the expense is recorded in "interest expense, net of amounts capitalized" on the condensed consolidated statements of operations.

The 2018 Notes were issued under an Indenture dated June 27, 2008, mature July 1, 2018, and bear interest at 9.875%. Interest is payable semi-annually beginning January 1, 2009. The 2018 Notes are general unsecured senior obligations of the Company and are effectively junior in right of payment to any secured indebtedness of the Company to the extent of the collateral securing such indebtedness. Each of the Company's material subsidiaries guaranteed the 2018 Notes on a senior unsecured basis. The Indenture provides that the Company may redeem: (i) on or prior to July 1, 2011, up to 35% of the aggregate principal amount of the 2018 Notes at a redemption price of 109.875% of the principal amount, plus accrued and unpaid interest; (ii) prior to July 1, 2013, all or part of the 2018 Notes at a redemption price equal to the principal amount, plus a make-whole premium (as defined in the Indenture) and accrued and unpaid interest; and (iii) on or after July 1, 2013, all or part of the 2018 Notes at redemption prices equal to 104.938% in 2013, 103.292% in 2014, 101.646% in 2015 and 100% in 2016 and thereafter. The Indenture also provides that, if a change of control (as defined in the Indenture) occurs, the holders have a right to require the Company to repurchase all or part of the 2018 Notes at a redemption price equal to 101%, plus accrued and unpaid interest.

The 2018 Notes' Indenture contains covenants that, among other things, limit the Company's ability to: (i) pay distributions on, purchase or redeem the Company's units or redeem its subordinated debt; (ii) make investments; (iii) incur or guarantee additional indebtedness or issue certain types of equity securities; (iv) create certain liens; (v) sell assets; (vi) consolidate, merge or transfer all or substantially all of the Company's assets; (vii) enter into agreements that restrict distributions or other payments from the Company's restricted subsidiaries to the Company; (viii) engage in transactions with affiliates; and (ix) create unrestricted subsidiaries. In June 2009, the Company instructed the trustee to remove the restrictive legend from the 2018 Notes making them freely tradable (other than with respect to persons that are affiliates of the Company). This terminated the Company's obligations under a registration rights agreement entered into in connection with issuance of the 2018 Notes.

Counterparty Credit Risk

The Company accounts for its commodity and interest rate derivatives at fair value (see Note 7). The Company's counterparties are participants or affiliates of participants in its Credit Facility (see Note 6), which is secured by the Company's oil and gas reserves; therefore, the Company is not required to post any collateral. The Company does not require collateral from its counterparties. The Company minimizes the credit risk in derivative instruments by: (i) limiting its exposure to any single counterparty; (ii) entering into derivative instruments only with counterparties that meet the Company's minimum credit quality standard, or have a guarantee from an affiliate that meets the Company's minimum credit quality standard; and (iii) monitoring the creditworthiness of the Company's counterparties on an ongoing basis. In accordance with the Company's standard practice, its commodity and interest rate derivatives are subject to counterparty netting under agreements governing such derivatives and therefore the risk of loss due to

counterparty nonperformance is somewhat mitigated.

Off-Balance Sheet Arrangements

The Company does not currently have any off-balance sheet arrangements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Contingencies

In September 2008 and October 2008, Lehman Holdings and Lehman Commodity Services, respectively, filed voluntary petitions for reorganization under Chapter 11. As of September 30, 2009, and December 31, 2008, the Company had a receivable of approximately \$67.6 million from Lehman Commodity Services for canceled derivative contracts. The Company is pursuing various legal remedies to protect its interests. Based on market expectations, the Company estimated approximately \$6.7 million of the receivable balance to be collectible. The net receivable of approximately \$6.7 million is included in "other current assets" on the condensed consolidated balance sheets at September 30, 2009, and December 31, 2008. The Company believes that the ultimate disposition of this matter will not have a material adverse effect on its business, financial position, results of operations or liquidity.

During the nine months ended September 30, 2009, and September 30, 2008, the Company made no significant payments to settle any legal, environmental or tax proceedings. The Company regularly analyzes current information and accrues for probable liabilities on the disposition of certain matters, as necessary. Liabilities for loss contingencies arising from claims, assessments, litigation or other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated.

Commitments and Contractual Obligations

The Company has contractual obligations for long-term debt, operating leases and other long-term liabilities that were summarized in a table of contractual obligations in the 2008 Annual Report on Form 10-K. With the exception of \$250.0 million of 2017 Notes, as of September 30, 2009, there have been no significant changes to the Company's contractual obligations from December 31, 2008. See "Senior Notes Due 2017" above for additional details.

Critical Accounting Policies and Estimates

The discussion and analysis of the Company's financial condition and results of operations is based upon the condensed consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of these financial statements requires the Company to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. Certain accounting policies involve judgments and uncertainties to such an extent that there is reasonable likelihood that materially different amounts could have been reported under different conditions, or if different assumptions had been used. The Company evaluates its estimates and assumptions on a regular basis. The Company bases estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates and assumptions used in the preparation of financial statements.

Table of Contents

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations - Continued

With the exception of accounting policies related to acquisition accounting as detailed in Note 2, there have been no significant changes with regard to the critical accounting policies disclosed in the Company’s Annual Report on Form 10-K for the year ended December 31, 2008. The policies disclosed include the accounting for oil and gas properties, revenue recognition and derivative instruments.

New Accounting Standards

See Note 11 and Note 16 for details regarding implementation of new accounting standards.

Cautionary Statement

This Quarterly Report on Form 10-Q contains forward-looking statements that are subject to a number of risks and uncertainties, many of which are beyond the Company’s control. These statements may include statements about the Company’s:

- business strategy;
- acquisition strategy;
- financial strategy;
- drilling locations;
- oil, gas and NGL reserves;
- realized oil, gas and NGL prices;
- production volumes;
- lease operating expenses, general and administrative expenses and development costs;
- future operating results; and
- plans, objectives, expectations and intentions.

All of these types of statements, other than statements of historical fact included in this Quarterly Report on Form 10-Q, are forward-looking statements. These forward-looking statements may be found in Item 2. In some cases, forward-looking statements can be identified by terminology such as “may,” “will,” “could,” “should,” “expect,” “plan,” “project,” “intend,” “anticipate,” “believe,” “estimate,” “predict,” “potential,” “pursue,” “target,” “continue,” the negative of such other comparable terminology.

The forward-looking statements contained in this Quarterly Report on Form 10-Q are largely based on Company expectations, which reflect estimates and assumptions made by Company management. These estimates and assumptions reflect management’s best judgment based on currently known market conditions and other factors. Although the Company believes such estimates and assumptions to be reasonable, they are inherently uncertain and involve a number of risks and uncertainties beyond its control. In addition, management’s assumptions may prove to be inaccurate. The Company cautions that the forward-looking statements contained in this Quarterly Report on Form 10-Q are not guarantees of future performance, and it cannot assure any reader that such statements will be realized or the forward-looking statements or events will occur. Actual results may differ materially from those anticipated or implied in forward-looking statements due to factors listed in “Item 1A. Risk Factors” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2008, and elsewhere in the Annual Report. The forward-looking statements speak only as of the date made and, other than as required by law, the Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The primary objective of the following information is to provide forward-looking quantitative and qualitative information about potential exposure to market risks. The term “market risk” refers to the risk of loss arising from adverse changes in oil, gas and NGL prices and interest rates. The disclosures are not meant to be precise indicators of expected future losses, but rather indicators of reasonably possible losses. This forward-looking information provides indicators of how the Company views and manages its ongoing market risk exposures. All of the Company’s market risk sensitive instruments were entered into for purposes other than trading.

The following should be read in conjunction with the financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q and in the Company’s Annual Report on Form 10-K for the year ended December 31, 2008. A reference to a “Note” herein refers to the accompanying Notes to Condensed Consolidated Financial Statements contained in Item 1. “Financial Statements.”

Commodity Price Risk

The Company enters into derivative contracts with respect to a portion of its projected production through various transactions that provide an economic hedge of the risk related to the future prices received. The Company does not enter into derivative contracts for trading purposes (see Note 7). At September 30, 2009, the fair value of contracts that settle during the next 12 months was an asset of approximately \$260.6 million and a liability of \$5.4 million for a net asset of approximately \$255.2 million. A 10% increase in the index oil and gas prices above the September 30, 2009, prices for the next 12 months would result in a net asset of approximately \$170.0 million which represents a decrease in the fair value of approximately \$85.2 million; conversely, a 10% decrease in the index oil and gas prices would result in a net asset of approximately \$341.9 million which represents an increase in the fair value of approximately \$86.7 million.

Interest Rate Risk

At September 30, 2009, the Company had long-term debt outstanding under its Credit Facility of approximately \$1.25 billion, which incurred interest at floating rates (see Note 6). A 1% increase in LIBOR would result in an estimated \$12.5 million increase in annual interest expense. The Company has entered into interest rate swap agreements based on LIBOR to minimize the effect of fluctuations in interest rates (see Note 7).

Counterparty Credit Risk

The Company accounts for its commodity and interest rate derivatives at fair value on a recurring basis (see Note 8). The fair value of these derivative financial instruments includes the impact of assumed credit risk adjustments, which are based on the Company’s and counterparties’ published credit ratings, public bond yield spreads and credit default swap spreads, as applicable.

At September 30, 2009, the average public bond yield spread utilized to estimate the impact of the Company’s credit risk on derivative liabilities was approximately 4.90%. A 1% increase in the average public bond yield spread would result in an estimated \$1.1 million increase in net income for the three months and nine months ended September 30, 2009. At September 30, 2009, the credit default swap spreads utilized to estimate the impact of counterparties’ credit risk on derivative assets ranged between 0% and 2.02%. A 1% increase in each of the counterparties’ credit default swap spreads would result in an estimated \$4.7 million decrease in net income for the three months and nine months ended September 30, 2009.

Table of Contents

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's reports under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer and, as appropriate, the Company's Audit Committee of the Board of Directors, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

The Company carried out an evaluation under the supervision and with the participation of its management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures as of the end of the period covered by this report. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of September 30, 2009.

Changes in the Company's Internal Control Over Financial Reporting

The Company's management is also responsible for establishing and maintaining adequate internal controls over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. The Company's internal controls were designed to provide reasonable assurance as to the reliability of its financial reporting and the preparation and presentation of the condensed consolidated financial statements for external purposes in accordance with accounting principles generally accepted in the United States.

Because of its inherent limitations, internal control over financial reporting may not detect or prevent misstatements. Projections of any evaluation of the effectiveness to future periods are subject to the risk that controls may become inadequate because conditions may change, or because the degree of compliance with policies or procedures may deteriorate.

There were no changes in the Company's internal controls over financial reporting during the third quarter of 2009 that materially affected, or were reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

Not applicable.

Item 1A. Risk Factors

Our business has many risks. Factors that could materially adversely affect our business, financial position, results of operations, liquidity or the trading price of our units are described in “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2008. Except as set forth below, as of the date of this report, these risk factors have not changed materially. This information should be considered carefully, together with other information in this report and other reports and materials we file with the SEC.

Changes to current federal tax laws may affect unitholders’ ability to take certain tax deductions.

Substantive changes to the existing federal income tax laws have been proposed that, if adopted, would affect, among other things, the ability to take certain operations-related deductions, including deductions for intangible drilling and percentage depletion, and deductions for United States production activities. Other proposed changes may affect our ability to remain taxable as a partnership for federal income tax purposes. We are unable to predict whether any changes, or other proposals to such laws, ultimately will be enacted. Any such changes could negatively impact the value of an investment in our units.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

In October 2008, the Board of Directors of the Company authorized the repurchase of up to \$100.0 million of the Company’s outstanding units from time to time on the open market or in negotiated purchases. The repurchase plan does not obligate the Company to acquire any specific number of units and may be discontinued at any time. The Company did not repurchase any units during the three months ended September 30, 2009. At September 30, 2009, approximately \$85.4 million was available for unit repurchase under the program.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders
