(1) Estimated Loss in 2008 Interim Results

I. Estimated results for the reporting period

1. Period to which the estimated results applies: From 1 January 2008 to 30 June 2008;

2. Estimated results: Based on a preliminary estimate of the Accounts Department of the Company, it is expected that the Company may record an unaudited loss for the period from 1 January 2008 to 30 June 2008;

3. The estimate results have not been audited nor reviewed by certified public accounts.

II. Results of the corresponding period last year (Based on the Accounting Standard of the People's Republic of China)

1. Net profit attributable to the Company's shareholders: RMB2,936,589,038;

2. Earnings per share (based on the net profit attributable to the Company's shareholders): RMB0.24.

III. Reasons for the change in the results

The major reason for the estimated loss was due to a substantial increase in prices for coal used in power generation.

## V. Risk Warning

Detailed financial information will be disclosed in the 2008 Interim Report of the Company. Potential investors and shareholders of the Company should exercise caution when dealing in the shares of the Company.

## (2) Power Generation Increases 13.43% in the First Half Year of 2008

The Company announces its power generation for the first half year of 2008.

Based on the Company's preliminary statistics, as of 30 June 2008, the Company's total power generation based on a consolidated basis amounted to 91.448 billion kWh, an increase of 13.43% over the same period last year. The power generation of Yingkou Power Plant, Yuhuan Power Plant, Qinbei Power Plant, Weihai Power Plant, Luohuang Power Plant and Nantong Power Plant increased significantly as compared to the same period last year.

The increase in power generation of the Company's power plants was mainly attributable to the following reasons:

1. The newly operating generating units and the newly acquired generating units provided strong support to the growth of the Company's power generation.
2. The continued economic growth in the regions where the Company's power plants are located provided an increase in power demand and room for increasing the power generation of the Company's power plants.
3. Renovation arrangements for the Company's generating units have been optimized, thus facilitating a growth in the Company's power generation.

The power generation of each of the Company's power plants in the first half year of 2008 was listed below (in billion kWh):
